MONTREAL, FRIDAY, MARCH 8, 1901.

SINGLE COPY - . 10 ANNUAL SUBSCRIPTION - \$2,00

"Commonwealth" The Sydney and Melbourne "Review" does not approve of the federated Australias being given the

title "Commonwealth." It is all very well in itself. but when the title has to be applied to the people we get the very clumsy word "Commonwealthers," or "Commonwealthians," or "Commonwealthy." Our Antipodean contemporary pokes fun at the word "Dominion," the the title of the federated Canadians. "For instance, 'Dominioners,' or 'Dominionians' becomes painfully suggestive of the vegetable garden, besides arousing a suspicion that people who should be so called would be no better than they ought to be. But there is nothing the matter with the term 'Canadians,' which promises to altogether oust from use, except in official documents, the term 'Dominion,' and that of no very distant period. It is quite a common expression that 'Canada approves' this, or 'Canada proposes' that, but it is much more rare to read that 'the Dominion intends' to do anything in particular." No person ever applied the word "Dominioner," or "Dominionian," to a Canadian, and the "Review" is right in regard to the original word "Canada" being the popular title of the "Dominion." We have two strings to our bow, in a titular sense, but the original one is by all odds the favourite.

The marvellous new light, the discov-A New Light ery of which was trumpeted some time Gone Out. age seems to have gone out. A substance named "Radium" was said to omit light so freely, that a piece the size of a silver dollar was enough to light a large room perpetually. The material was declared to have an inexhaustible supply of luminant rays. A German scientist, we are told, had failed to discover any waste of its power in using, it was stated to be capable of giving light for a million years. Gas and electricity were to become obsolete, matches needless, pipes, wires, taps, meters, gas bills, gas and lamp explosions, smells, and fatalities at hotels, were prophesied as being about to pass into mere memories of a literally dark age. A bit of radium carried in a watch chain as a charm would give light to the wearer perpetually. Every man would be his own

lamp post and burner. Darkness in houses, offices, streets, pits and caverns would be an unknown condition. "More light," for which Goethe desired when dying, would never again be wished, for radium would turn night into day. The discoverer of this marvellous substance was stated to have been rewarded by the French Academy of Science, and its display at the Smithsonian Institute, Washington, is said to have amazed the professors, as it did also those of Germany and Russia. Since the first outburst of wonder, nothing has been heard of this greater marvel than Aladdin's Lamp. Were the scientists fooled? Or, were the descriptions of "Radium" a hoax? The light companies should see to this before they amalgamate, as if radium will do what has been described, both gas and electric and oil lighting are all doomed, for, as the old glee says, "Before its bright presence darkness flees away."

The Montreal "Transcript" of this date. This Date. 1838, contains long narratives of raids 1838. made on the Canadian frontier by what are styled, "Whisky-sling and cocktail heroes," "brigands," "pirates" and other complimentary phrases, who came from the States. On this day, 1838, Pelee Island, off the coast of Essex, Ont., had just been rescued from the hands of a gang of marauders, who were threatening to burn every Canadian house and barn in the district. They were severely punished by British troops. In the 8th March number of the "Transcript," is a copy of an "Address adopted by the House of Assembly, Upper Canada," "To the Queen's Most Excellent Majesty," stating the causes of the troubles existing in the Canadian Provinces. and praying that Upper and Lower Canada be united. It is amusing to read in this address that in the division which took place in 1791 constituting Upper and Lower Canada, or, as we now say, Ontario and Quebec, into separate and distinct colonies, "all the wealth, and means of acquiring wealth, were given to and placed at the control of the French, and a mere wilderness allotted to the English portion of the population." Were the men who signed that Address to re-visit Ontario and Quebec, their opinion about the Western Province being "a mere wilderness," and Quebec alone possessed of "the means of acquiring wealth," as they thought, would cause them "inextinguishable laughter." The revolting nature of the raids on Canada years ago caused the New York "Journal of Commerce" to say: "The conduct of the American authorities and citizens would justify Canadians in burning Detroit and Buffalo."

Although the readers of The Chron-Love My Dog. ICLE do not need the hint, they have opportunities of spreading the information that under the new penal laws Canada, the punishment for dog-stealing is much more severe than formerly. The fine for this offence is now \$50 and a maximum term of imprisonment of two years, except in case the value of the stolen animal is under \$20, when the former penalty is retained. The principle upon which the non-payment of fines is regulated is not clear. It seems an easy way of escaping two years' incarceration to pay a \$50 fine. Probably this sum was fixed as being so far beyond the financial resources of any dog-stealer, as to ensure his retirement for two years where "no dogs are allowed to enter the premises," though the place is full of curs. The attachment between some persons and their pet dog is only paralleled by the affection between human beings. Indeed, many a good dog has sacrificed its life for its master, or for some child to whom it had become attached. To steal such a creature is almost as infamous as abducting a child. It is not a mere theft of property, it is the deprivation of a source of daily pleasure and of protection. Many a dog, not worth a cent as a mere canine, has saved its owner from burglary, probably from murder. One valuable dog was stolen in December last in this city, and returned owing to the thief's dread of the new law, the severity of which he learnt from a policeman. Every culprit of this class should be tried before a lover of dogs, he would then get part of his deserts, at least. There seems an opening for insurance in this connection.

A Bill is about being introduced into Secret the British Parliament of a similar char-Commissions. acter to the one known as Lord Russell's Prevention of Corruption Act. The Bill is in the hands of two distinguished members of the House of Commons so that it has a good prospect of being passed. The object of this proposed Act, as quoted by "The Review," is, "An effort to check, by making them criminal, a large number of inequitable and illegal secret payments, all of which are dishonest, and tend to shake confidence between man and man, and to discourage honest trade and enterprise." That the practice of giving secret commissions is often attended by fraud is known. Employees, for instance, are bribed by tradesmen to

bring them custom from their employer, who, all unknown to himself, pays the commission received by his servant by increased prices. Housekeepers and others who are careless in their methods, are very liable to being defrauded by a secret arrangement existing between traders and their servants. Wherever there is an intermediary between the actual buy. er and the actual seller, there is an opening for "inequitable and illegal secret payments." In the old land, this evil is much more common than here as there are so many persons in Great Britain who have never been associated with business and who leave almost everything of a business nature to their employees. The custom of solicitors and others who have charge of estates taking a commission from insurance companies with whom they place business was condemned by Lord Russell, who first introduced the Prevention of Corruption Act. Our esteemed contemporary, viewing the proposed Act from an insurance stand-point, remarks:-"Under the provisions of the Bill every one who gives or offers, or any agent who asks or receives commission without authority from or without the knowledge of the insured would be liable to fine and imprisonment, with or without hard labour. Such an enactment would deter a great many useful agents from continuing to introduce business for well-earned and rightfullypaid commissions, and the volume of new business would undoubtedly be seriously diminished, even to such an extent that ultimately there would be an appreciable increase in pauperism in the country, owing to the discouragement of the usual propaganda of thrift." As legislation in Canada and the interpretation of our laws are materially affected by English precedents and practices, it is well to keep an eye upon what is being done, or proposed in the old country.

The Director of the United States Distribution Mint in a recent address and Production. the following remarks in reference to the complaint that the distribution of wealth is not keeping pace with the production, as reported in the New York "Journal of Commerce." "The system of distribution is by no means so bad as persons with more sympathy than knowledge and reflection suppose. But, if it were as defective, as great a perversion of justice, as persons with socialistic leanings imagine, the vital fact would remain that the total production of the entire race is very small, very little more than is necessary to keep the race in healthy working condition. By far the greater part of all that men produce they necessarily consume as they go along. The bequest of each generation to the next one is small, and if the large aggregations of wealth, which excite the fear and anger of social reformers, could be distributed, the condition of the greater part of the people would be only moderately changed.

"The United States, is adding to its wealth as no country ever before did. If its increase in wealth during the last ten years was not quite so rapid as at some previous stages, it was in the aggregate much greater. The Director of the Census estimates that in ten years the United States added twenty-five billion dollars to its wealth. The amount seems enormous; more than a quarter of all the wealth in existence in this country to-day has been added since 1890. And yet that twenty-five billions is under forty dollars a year for every man, woman and child of the average population of the United States during the decade. No distribution would give everyone a competence. The prosperity of the community is to be attained only by getting more out of nature; making more wealth. Where there is more wealth everyone gets a larger division of wealth, whether he gets all that abstract principles of equity demand or not, and there is no possibility of knowing this. But where wealth is largest and most rapidly made, the industrial population is most comfortably equipped."

Amalgamation seems the note of the The The scale on which the Amalgamation day. Carnegie-Morgan trust has been Movement. organized is so stupendous a financial operation as to have created a profound sensation in the business world. The iron and steel interests of Great Britain, Belgium, Germany and France are in a state of semipanic as an aggregation of over a thousand millions of dollars capital controlling nearly the whole of the vast output of this continent is regarded as a menace to all outsiders. So long as trade is so prosperous as to keep up the demand for iron and steel goods in their innumerable forms, from tacks and needles to enormous girders and the immense shafts of ocean steamers, there will be no serious danger from so colossal a monopoly as is the placing of the entire output of the United States under the control of one company, but when demand slackens, when production begins to exceed consumption, the competition will become so intense as to bring widespread disaster amongst those in the iron and steel trades who have not sufficient financial resources to keep up a struggle with the most wealthy organization in the world. From such conditions labour troubles may arise that may be disastrous, even Mr. Carnegie himself has expressed alarm at the possibilities involved. Such a company, as all experience teaches, does not as readily respond to a restricted demand as a number of smaller enterprises, it will fight hard to find outlets for its output in every market the world over, and will push its competitors to the wall as ruthlessly as the car of Juggernaut does its victims. It is not desirable to encourage a pessimistic spirit, but when we find the ironmasters of Great Britain, and of Europe expressing great alarm over the American trade being controlled by one company, we must admit that the outlook justifies grave anxiety over the probable financial effects of an organization backed by capital to extent of a thousand millions of dollars.

#### THE WATER-WAYS OF CANADA.

CANAL STATISTICS FOR 1899.

To crystalize into a pithy phrase a description of the leading characteristic of any country usually results in failure from imperfection. To fix upon some one feature which a country has in common with other countries, though more prominent in its general aspect than in theirs, conveys no idea that lives as a special designation. Canada in earlier days was styled, "a wooden country," because of her vast forest areas, but the same term might as truthfully have been applied to the United States. "Land of brown heath and shaggy wood" is applied poetically to Scotland; "land of the olive" is applied to Italy, but heaths and woods and olives are found in other climes. One feature of Canada which might justify its use as a national descriptive title, is the magnificent extent of her water-ways, which are unrivalled in length as they are also for serviceable capacities to commerce. From the point where the waters of Canada mingle with those of the Atlantic, to a Canadian port at the head of Lake Superior, the distance is 2,260 statute miles, along the entire course of which a vessel may sail in Canadian waters. From the Straits of Belle Isle to this city, the St. Lawrence river extends 986 miles, with a channel wide enough and deep enough for ocean steamers. From Lake Superior to Three Rivers, on the St. Lawrence, where tidal influence ceases, a few hours sail from this port, there is a drop in level to extent of 600 feet, that is, a vessel from Montreal on its voyage to Port Arthur has to ascend 600 feet. To attain this height, there is a system of locks in operation, by means of which vessels are lifted 551 feet, leaving 49 feet to be overcome by working against a downward stream, which, at one place, near Iroquois, often necessitates the help of a tug to help a steamer up the river. Between Montreal and Kingston, the canals, with their length, lock dimensions, height of lift, are as follows .

ionows.				•	- 1	41 1
Canais.	Leng	th.	Lene	th of		Lift of
Lachine	81	miles.	270	feet.	45	feet.
Soulanges	14		280	**	84	**
Cornwall	11	**	270	**	48	**
Farran's Point	1	**	800	**	34	
Rapide Plat	31	**	270		114	
Galops	71	** 800	& 27	0 "	15	**
Murray	5	" N	o Lock	cs		

The width of the locks is 45 feet, and depth of water on the sills 14 feet. On their course down from Kingston to this port, several of the canals are not used as the rapids are run with safety. From Kingston the course west is thro' Lake Ontario until Port Dalhousie is reached, where the Welland Canal is entered. This splendid construction extends 26 3-4 miles; the total lift is 326 3-4 feet, which is effected by 27 locks, each 270 feet by 45 feet, and a depth of 14 feet. From the end of the Welland Canal, Port Colborne, there is deep water to Sault Canal, 304

miles. The Sault Ste. Marie Canal extends 5.967 feet; it has only one lock which is 900 feet by 60 feet, and lowest Jepth 20 feet 3 inches, the total rise being 18 feet. Another water course runs from this city to Ottawa, and turns down to Kingston, a total distance of 245 miles. The rivers Ottawa and Rideau are part of this water-way. The canals on this route are: Lachine, 8 1-2 miles; St. Anne's lock and piers, 1-8 of a mile; Carillon Canal, 3-4 of a mile; Grenville, 5 3-4 miles; from Ottawa to Kingston, 126 1-4 miles, there are 35 locks. Besides these main line canals there are others on the line of the Richelieu river; in Ontario, through the Peterborough district; in Cape Breton, and a number of branches acting as feeders to the Rideau and Welland systems.

The total quantity of freight passed through the several divisions of the canals during 1899 is as follows:

Canals.	Farm &c.	Merchandise.	Total
	Tons,	Tons.	Tons.
Welland	566,022	223,648	789,770
St. Lawrence	894,755	454,338	2,349 093
Chambly	236,305	126,330	362,635
Ottawa	513,778	6,327	520,105
Rideau	41,568	28,337	69,905
St. Peters	20,105	50,699	70,804
Murray	4,994	11,794	16.788
Trent Valley	38,877	1,283	40,160

The Chicago Trade Report for 1899 gives 19,396,518 as the total number of bushels of grain shipped from that city for transit through Canada in 1899. The value of the exports from Chicago to Canada by water in 1899 was \$5,319,197. The total quantity of through freights passed eastwards and westwards through the Welland and St. Lawrence canals from Lake Erie to Montreal in the last ten years was as follows:

Years,	Eastwards. Tons.	Westwards. Tons.	Percentage of West to East,
1899	354,933	5,991	1.70
1898	538,108	4,436	0.83
1897	584,246	4,502	0.77
1896	480,077	10,050	2.08
1895	266,659	10,555	4.00
1894	292,191	9,439	3.23
1893	508,016	16,545	3.25
1892	263,144	9,452	3.60
1891	309,593	14,060	4.50
1890	231,746	13,951	6.00

The disparity between the volume of freight carried eastward from Lake Erie to this port, and that taken on the westward trip is very striking, the average ratio of the westward freight to the eastward for ten years, 1890 to 1899 having been only 2.58 per cent.

For the same period the revenue from all the canals was as follows:

Years.	Revenue.	Increase.	Decrease.
1899	291,652		50,027
1898	341,679	*** ***	5.079
1897	346,759		3,302
1896	350,061	66,850	
1895	283,211	*******	24,613
1894	307,825		40.187
1893	348,012		10,699
1892	358,711	8,359	
1891	350,352	2,292	
1890	338 059		33 049

The decreases in canal revenue in 1899 were: Welland, \$50,605; St. Lawrence, \$6,111; Ottawa, \$1,545, making together, \$58,261, against which were increases: Chambly, \$6,674; other canals, \$1,561, making a total of \$8,235; which, taken from the gross amount of decreases leaves \$50,026 as the decline in canal revenue in 1899 as compared with 1898.

The freight carried up and down the Welland Canal in 1899 was as follows:

In Canadian Vessels, Tons	297,084 325,020	12,462 135,052
Total	622,104	147,514

Here we find how marked is the advantage of American vessels in the carrying trade from Lake Erie to this port; they had return cargoes westward equal to 41 per cent, of those brought eastward, whereas the Canadian vessels had westward return cargoes to extent of only 4.19 per cent., just about one-tenth of the American. The total expenditure on the canals in Canada to June 30th, 1900, was \$79,043,784, of which \$35,053,171 was spent in construction, and \$43.990,612 for enlargements. new Soulanges canal cost \$5,792,066. If the value of facilities for transport were measured by the percentage the net revenue received from canals bears to the outlay, we fear our canal system would be found wanting, if weighed by such a balance. But, so narrow a view does not prevail in Canada, neither as regards our canals nor railways. We have enlightenment enough in this Dominion to recognize that water-ways and roadways are of incalculable value, for they are absolutely essential to the commercial life of the country.

#### BRITISH AMERICA ASSURANCE COMPANY.

The sixty-seventh annual meeting of the British America Assurance Company was held at Toronto on the 28th February, the Honourable Senator Cox, president, in the chair. The company having entered new fields where business connections have been established, enjoyed a much larger premium in 1900. The Marine business has also shown improved conditions. The fire premium receipts were: \$1,575. 904, and marine, \$459,604, making a total of \$2,-035,508, from which \$163,267 is deducted in the revenue account for re-insurance, leaving the net premium receipts \$1,872,241. Premium on new stock to amount of \$37,500 was received, and \$41,491 for interest and rent account. The total of revenue receipts is \$1,951,233. The fire losses are reported as \$972,007, and marine losses, \$310,061. Commissions and other charges amounted to \$559,246, and taxes, \$49,031. These items of outgo make a total of \$1,-890,348, which, taken from \$1,951,233 total revenue, leaves a balance of \$60,835. The Reserve brought from 1899 was \$577,687, to this is added \$5,330 for appreciation of securities, and \$60,885, balance of revenue account, the total being \$643,903. Against this were charged two half-yearly dividends, at 7 per cent., amounting to \$60,393; \$2,033 written off office furniture, which leaves a balance to credit of Profit and Loss of \$581,457. The total assets are stated to be \$1,776,606, and the reserve to cover estimated liability on outstanding risks \$566,738. This reserve is upwards of 35 per cent. of the year's premium income, less the amount actually earned on account of Inland, Marine and Ocean Cargo risks. The new stock for \$250,000 has all been taken up. Considering the enormous fire losses of 1900, so largely in excess of the average of previous years, the British America came out with far better results than the generality of companies; thus maintaining its old-time reputation for good management and thorough protection of its policyholders' interests by judicious underwriting.

#### CIVIC HOSPITALS.

The Town Council of Westmount at a meeting on 4th instant, passed a resolution unanimously calling upon the Health Committee to consider the question of providing a contagious diseases hospital for the town, and authorizing them to consult an expert or experts in the construction of such hospital, with a view to getting the best possible accommodation for the sum of \$15,000 already voted for the purpose. The amount was thought inadequate, but it would enable a start to be made. The sum of \$15,000 is small for such an institution, but it is larger, in proportion to the population of Westmount, than the sum proposed to be spent by this city over a new civic hospital. The citizens of our pleasant suburb are to be congratulated on their action in this matter, they have voted a sum of money, they have decided to have a town hospital, and have called in expert advice in regard to what is required. steps manifest there being an intelligent appreciation of public duty, and a business-like sense as to the proper method to be pursued in discharging it. Here in this city, a most urgent necessity for a civic hospital is met in the Council by the almost incredible, certainly most discreditable sneer that too much attention was being paid to the public health. As the City Council is charged with the care of the public health, and has a special committee and department to enable this responsible duty to be discharged with all the intelligence and energy befitting a matter of such gravity, it is, indeed, extraordinary to have aldermen reproaching themselves, their committee, their officials and their constituents with being unduly anxious to protect the public health. We fear the fault alleged, of over zeal, arises not from any undue energy on the part of those censured, but from such apathy, indifference and insensibility to the claims of duty and of humanity as border on crime. Indeed, it is held by some that a charge of man-

slaughter could be sustained against civic authorities by whose scandalous neglect of daty any citizen came to his death. That a person is responsible for a fatality which would not have occurred had he done his duty is a principle of law, as it is clearly common sense. Hundreds of men have been heavily and most justly punished by fine and imprisonment for no worse neglect than is being persistently indulged in by those who sneer at attention being given to the public health-by those who are its sworn official guardians. Suppose an engine-driver, when urged to put his engine in better condition, as his neglect was a risk to the train and passengers, sneeringly replied: There's altogether too much attention paid to the safety of the limbs and lives of passengers," what would be said of such a callous brute? Between a driver who risks the lives of passengers by wiful negligence, and aldermen who risk the lives of citizens by their wilful negligence, there is only this difference in guilt, the civic representative is the more culpable, for his neglect may bring evil consequences that continue for months, devastating families, 5lling graves, impoverishing the citizens, and bringing scandal and loss upon the whole city. The smeerers at health precautions must look on the poor with less sympathy than a farmer does on his cattle. A city epidemic is an inexpressible calamity to the poorer Their sufferings, when the household is stricken with disease, would move the sternest to pity. Their distress would only fail to touch the hearts of men who sneer at the obligations of their own duty as guardians of public health. Let the Health authorities rouse themselves, let mechanical routine give way to intelligent action, let them exert their legal powers, and they would soon teach the sneerers that the law contemplates and provides for the utmost zeal being shown to safeguard the city's health. The first step to be taken is to do as Westmount has done, consult experts as to the exact cost of erecting and maintaining the necessary hospital. For its government, immediate provision should be made by constituting a board of management comprising the Mayor, the chairman of the Health and Finance Committee, the presidents of the city's hospitals, a representative of the Board of Trade, Chambre du Commerce, and any other public body desirable to associate with the movement. For the honour of this city, for its credit, for its health's sake, the more intelligent section of the City Council should take up the civic hospital question and deal with it in an enlightened, business-like spirit.

At the Halifax Tramway Co.'s recent annual meeting a statement was presented showing the passenger receipts in 1900 to have been \$135,173; the light and power earnings, \$96,464; other earnings, \$1,129, making a total income of \$232,766. The expenses were, \$128,134; coupons and dividends, \$70,000, which left a surplus of \$34,632.

#### THE MANITOBA GOVERNMENT AND THE RAIL-WAYS OF THAT PROVINCE.

The problem presented by the necessity of providing a province of such vast area as Manitoba with the railway facilities required for its development and for the convenience of agricultural settlers, scattered at very wide intervals, is one of extreme difficulty. Until population becomes so extended as to bring the settlers into closer connection, to provide freights in sufficient volume to render their transportation remunerative to a railway, to enable what railways are constructed to pay operating expenses, and realize a return upon the capital invested therein, it cannot reasonably be expected that transportation charges will be as low as in districts where haulage is less costly and the entire business can be conducted with more economy. On the other hand, if transportation charges are much higher than in those districts where products compete in the world's market with the products raised where freight is more costly, the farmers who have to bear such higher charges are discouraged in their enterprise, and the development of such a section of country is materially hindered. Such conditions created a difficulty in Manitoba which placed the Canadian Pacific Railway in conflict with the agriculturists of that Province. The latter demanded cheaper freights, the C.P.R. protested that, having, as a commercial enterprise, to earn enough over operating expenses to pay interest on its bonds and a dividend to its stockholders, it was unable to reduce its rates to the level called for by the settlers in Manitoba and the North-West Territories. The Canadian Pacific Railway was also hampered in extending its branch system by the difficulty of working them at a Pressure was consequently brought to bear upon the Government of Manitoba to enter upon arrangements for lowering freight rates, and for acquiring control over, or building such railways as were needed to tap new districts where settlements were devloping so fast as to need railway facilities. An arrangement has consequently been entered into under which the Northern Pacific line has been handed over by the Government of Manitoba to the Canadian Northern Railway, under a lease, the rentals being for first ten years \$210,000 per year; second ten years, \$225,000; third ten years, \$275,000, and after-The Northern Railway is wards, \$300,000 yearly. bound to allow the Lieut.-Governor-in-Council to fix freight rates to Lake Superior, with power to refer disputes to the Chief Justice of the Province. company binds itself to reduce the passenger rate in Manitoba to 3 cents per mile, to complete the line from Winnipeg to Port Arthur by October next, and to build a spur line at or near Sprague to Duluth. The Government engages to pay the rentals to the Northern Pacific if the net earnings are inadequate to meet them. The Government also guarantees interest on the bonds of the Northern Railway up to \$5,800,000, that is, if the earnings fall short of the

interest the Government is to make up the deficiency. Under this arrangement, the people of Manitoba get, first, a through line from Port Arthur to Winnipeg; second, control of freight rates on a road to a shipping port; third, a 3-cent passenger rate on provincial railways. The contingent liability of the Government for rental and interest will be \$5,30,000 yearly.

When negotiations were still in progress, the president of the Canadian Pacific pointed out that it was easy for a railway company to lower rates, if the Government stood ready to grant assistance in paying its interest obligations. He claimed that the C.P.R. rates were even lower than in some corresponding districts in the States, and that the demand for a 10-cent rate was as reasonable as to ask for gold dollars at 70 cents each. He, however, offered on behalf of the C.P.R., to lease the Northern Pacific at \$220,000 for first ten years; \$245,000 the second ten years, and \$300,000 a year afterwards. Under this offer the total rentals for the first forty years would be \$10,650,000, as compared with \$10,075,000 under the Government lease. After forty years, the terms are identical. The president of the C.P.R. offered certain reduced rates on condition that it was relieved of Provincial taxation and an undertaken being given by the Government that it would not build any competing lines. He also proposed that a Commission be appointed to supervise traffic charges. These proposals were favoured by the Government of Manitoba, but rejected by their supporters. Thereupon, the C.P.R. president made an amended offer, in which he pointed out that the fresh liabilities of the Province under the scheme popular with the House amounted to \$12,800,000 with a contingent annual payment of \$682,000. He alleged that the Northern Pacific would not pay anything over operating expenses for many years, and suggested that a practical test be made as to the working of the Northern, and for this the C.P.R. would provide rolling stock. This amended offer was also rejected. The Government of Manitoba under an arrangement effected assumes liabilities capitalized at \$12,800,000; which, with other railway guarantees, make a capitalized liability of \$16,600,000, with contingent annual charges of \$682. 000. Amalgamation and pooling arrangement with the C.P.R. are prohibited, and the Government has the option of levying the entire property of the railways in 1929 for par value as going concerns.

The exact amount which the Government will have to pay each year is uncertain, but, supposing it is the full sum guaranteed, viz., \$682,000—which is very improbable—it will, no doubt, add materially to the taxation of the Province. But the people on the average are above the ordinary standard in their capacity to bear taxation without distress. To quote the total debt as evidence of its ruinous amount is not reasonable, the amount of the annual charges of a public debt are the true, practical test of its burden.

Whether this possible addition to the taxation of the Province would exceed the financial resources of the people seems to be answered in the negative by the almost unanimous determination of their representatives to incur the obligation. They may be oversanguine to the point of imprudence, but they must be reflecting the opinions and feelings of the people of Manitoba, and a people who are so generally intelligent, who have had considerable business experience, who undertake such obligations in broad daylight and mature consideration, are not likely to be "ruined," as Sir William Van Horne says they will be, by meeting obligations to maintain the credit of their Province, and to keep in operation a railway system which they have established in order to secure cheap transportation. They are only anticipating an equivalent compensation for any possible increase in taxation from cheaper freight, and, if the lines in question have any surplus earnings over operating expenses, such surplus will go towards paying rentals and interest.

If we assume the aggregate value of the annual cereal crops of Manitoba to be \$25,000,000, an impost of two cents and three-quarters per each \$100 of value would pay the \$682,000 required for rentals and interest of the railways in question. Or, if the average quantity of cereals and other products moved by the railways in question were, as in last three years, from forty-five to forty-six millions of bushels, a charge of about one and a half cents per bushel would more than cover the railway rentals and interest, and the farmers and dealers seem confident that they will save more than either of the above amounts by reduced freight on agricultural products and lower passenger fares.

The establishment of cheap freights for produce and low passenger fares throughout Manitoba will advance its development; it will encourage settlement; it will so add to the contentment and prosperity of the farmers as to make them more and more active in inducing others to take up lands in the Province; it will add to the value of the settler's property, and by enlarging the population of the North-West, will have a beneficial effect on the trade of the whole country. Sir John Macdonald said: "You cannot check Manitoba." Its wheat fields are unrivalled in the world; the lands of Manitoba are of an extent equal to supporting a population of many millions of settlers; the tide of population is setting in steadily; ample and cheap railway facilities cannot fail to stimulate the general welfare of the whole North-West, as they did in Ontario, Quebec and the eastern provinces. Manitoba is like a lusty youth who is blessed with a splendid physical constitution, with ambition tempered by good judgment, and enjoying opportunities for a brilliant career. The future of the Province is assured as a magnificent and wealthy section of the Dominion.

#### MUTUAL LIFE INSURANCE COMPANY.

The annual statement of the Mutual Life Insurance Company published in our columns presents figures of such magnitude as to be almost embarrassing, they are so difficult to realize. The assets are larger than tenance for the entire population of Canada for one the entire paid-up capital of all the banks in England and Wales. They are large enough to find a main-year. Out of these assets the entire national debt of Canada could be paid off, and enough would be left to pay the whole expenses of the Government for one year. We give these illustrations as helps in grasping the immensity of the figures in the Mutual Life statement. The following statistics of the company's business in 1900 compared with 1899 show the increase in past year:

	1900.	1899.	Increase.
Assets	325,753,152	301,844,537	23,908,615
Policy reserves	269,191,130	251,711,988	17,479,142
Insurance and As-			
surance in force	1,141,497,888	1,052,665,211	88.832,677
Premium income	47.211,171	44,524.519	2,686,652
To al	60,582,802	58,890,077	1,692,725
P'd Policyholders	26,361,863	26,369,036	•• · · · · · · · · ·

Since 1890 the premiums have advanced from \$27,063,083 to \$47,211,171, an increase in ten years of \$20,148,088; the insurance in force has risen in that decade from \$638,041,180 to \$1,141,497,888, an increase of \$503,456,708, or nearly 80 per cent., and the assets have advanced from \$146,494.180 to \$325,-753.153, an expansion of \$179.258,973, which shows the assets to have developed to extent of 122 per cent. since 1890. In the same period the total amount paid to policyholders was \$232,155,886, that is an average of \$23,215,588 annually has been paid by the Mutual Life to its policyholders. Truly this is a gigantic company. Amongst the policyholders in Canada are many of its most wealthy and prominent citizens, to whose policies material additions have been made by periodic bonuses. Although exceptionally conservative in its methods the business of the company in Canada has enlarged steadily in recent years. The net premiums increased in 1900 from \$848,702 to \$889,908, and the policies taken up. from \$3,460,000, to \$4,490,400; the total insurance in force of this company in Canada being \$23,500,401. Mr. Fayette Brown who represented this insurance giant, whose strength is almost fabulous, is very highly esteemed by our citizens and efficiently promotes the interests of his charge.

JOHN BULL IS SLEEPY, but when he wakes up, he goes ahead to distance competitors. The development of electrical industries in England has been very slow, but now new works have been founded at Preston, Lancashire, which are reported to be unrivalled. The machine shop alone is 900 feet by 120 feet. The company which owns this vast establishment is open to take contract for every form of electrical y Jrk,

#### THE RETIREMENT OF MR. W. M. RAMSAY.

A REMARKABLE CAREER OF FIDELITY AND SUCCESS.

On the 27th February, 1851, William Miller Ramsay signed an indenture by which he was bound to serve the Colonial Life Assurance Company of Edinburgh, Scotland, "as their apprentice in the office of the said company for four years." On the 29th November, 1855, he was released from the indenture, which was returned to him endorsed with the highest enconiums of his "most exemplary conduct." For these four years Mr. Ramsay was paid 190 sterling, an average of \$109.50 per year. On the corresponding date in 1901, Mr. Ramsay retired from the active management of the Standard Life Assurance Company, into whose service he had been transferred from the Colonial, after, practically, half a century's service with one organization. The endorsement on his indenture is now placed on his life as manager in Canada of the Standard Company, an endorsement which covers also his career as a citizen, an endorsement which many thousands in Canada would rejoice to sign, though with sincere regret at a tie being severed so honourable to himself, so pleasant to all his associates, so advantageous to the institution with which his name will be ever associated.

Mr. William Millar Ramsay, born in 1834, is a son of the late Alexander Ramsay, manager of the Water Company, Edinburgh, where he was educated. In 1851 he entered the service of the Colonial Life Assurance Company, which was merged into the Standard. In 1857 he was appointed inspector in Canada, the branch being under management of Mr. J. D. Dickson, who retired in 1861, and was succeeded by Mr. Ramsay. This year completes fifty years continuous service with the same company. When Mr. Ramsay came to Canada, the company's income was only about \$120,000; the sum assured, \$1,360,000, and the funds invested were \$36,600. They are now, respectively, \$1,364,000; \$19,110,000, and \$14.830. 000. Mr. Ramsay is a brother of Mr. A. G. Ramsay, so long connected with, and practically the founder of the Canada Life, who also had the invaluable experience of an apprenticeship with the Colonial, which was managed by Mr. Thomson, the most eminent actuary of his day, who is father of the present manager of the Standard. In those days high rates were charged for residence in the Colonies, and a colonial company was established to provide life assurance in distant parts of the Empire at more moderate rates. As the Colonial was found to be taking a position somewhat to the disadvantage of the present company, the Standard, an amalgamation was effected, since which event the Standard has shown itself to be one of the most progressive and successful of life assurance companies.

On the 1st instant, the officers, agents and some

connections of the company assembled in the Board Room of the offices in this city to present Mr. Ramsay with a brilliantly illuminated address, in album form, with also a splendid tea and coffee service of solid silver as a mark of their affection and esteem. The proceedings were opened by Mr. D. M. Mc-Goun, Mr. Ramsay's successor, who remarked upon the event of celebrating fifty years service as one few are privileged to enjoy. Mr. McGoun said: "We. here present and distant friends throughout the Dominion, desire to mark the occasion of your retiring from the management of the company by presenting you with this tea service, which we ask your acceptance of as a token of our esteem and regard for you. As the occasion should be one of great pride and rejoicing, it is also an occasion mixed with great sorrow, inasmuch as it marks the time when you lay down the trust so long imposed upon you, to be taken up by another. This pleasure and this grief is shared in alike by your successor and by those who have been so long time associated with you in business, I have been honoured with the request that I should make the presentation, but I feel that it would have afforded you greater pleasure if someone more capable had been deputed to the task, inasmuch as you cannot help being struck with the incongruity of the situation in one who joined the company under your management as a junior making public remarks in testimony of the esteem in which you are universally held. Nevertheless, you will not misinterpret the sincerity of my motives if I add my own personal testimony to the sorrow of this occasion. It must be a source of great satisfaction to you to look back on your career and read the steady progress the Standard has made in Canada under your own personal direction. The company was small in those days in income, funds and assurances, and other particulars; and now these features have assumed the large proportions of \$1,360,000 in income; the total assurances reaching \$19,000,000, and the funds \$15,000,000, which speak for themselves as an indisputable evidence of good judgment in the selection of investment, faithful consideration for the interests of the institution and successful results. Your management has been characterized by singleness of purpose, purity of motive, justice in your judgment, and kindness of heart in your demeanour to those surrounding you. I cannot bear greater testimony to your worth than to say that I shall endeavour, under God's guidance, to follow in your footsteps in seeking to cultivate those same qualities that have been so prominent in your dealin's with men, and that have won for you the honourable name you hold in Montreal. I now ask your acceptance of this service.

The si verware was contained in a polished oak cabinet, and bore the inscription:—

1851-1901. Presented to

WILLIAM MILLER RAMSAY, ESQ.,

On the occasion of his retirement from the management of the

STANDARD LIFE ASSURANCE COMPANY, in Canada.

After fifty years of service, By the officers and agents in the Dominion.

W. M. RAMSAY.

Director of The Standard Life Assurance Company.

(Who retired from the management, after a service of 50 years, on February 15th, 1901.)

in the control of the

Mr. Charles Hunter, of Toronto, representing the western members of the company, spoke of the respect, esteem and affection in which Mr. Ramsay was held, and said that, as a manager, he had been kind and just, and had set an example of faithfulness, zeal, and loyalty that would ever remain. The termination of Mr. Ramsay's management was regretted by the company, but they consoled themselves by knowing that, as a director, he would still be with them; and might be live long, and enjoy many, many years of happiness.

Dr. Robert Craik, whose official connection with the company extends over nearly a score of years, added his testimony to the esteem and admiration in which their old friend and chief; Mr. Ramsay, was

held.

The richly illuminated address, which is handsomely bound in album form, was then presented and read by Mr. J. H. Balfour, secretary of the Standard Life. It reads as follows:

"Dear Sir.—On the occasion of your retiring from the management of the Standard Life Assurance Company in Canada, after a period of fifty years' service, we, the officers, agents, and others, connected with the company in the Dominion beg to offer you our heartiest congratulations on the completion of so long a period of service, and upon the conspicuous success which has attended your efforts in building up the company to the honorable position it holds in the estimation of the people of Canada.

"We desire to express deep regret at the loss we shall experience in losing your personality in the direction of the affairs of the company, where your guidance and example will ever be remembered. In expressing that regret, we desire to place on record the high esteem in which you are held by all who know you from the uniform courtesy and unfailing kindness, which has, at all times, characterized your dealings. We are proud to know that this regard for you is not confined to your own office and to those about you, but is general throughout the whole Dominion, and is a worthy tribute to that high sense of honor and rectitude which has governed your public as well as your private life. It is gratifying to us to know that you are not retiring entirely from the guidance of the company, but that, as a member of the Canadian board of directors, the company will still have the great advantage of your counsel and judgment in further promoting its interests and efficiency which you have so long and so ably administered with dignity and honor.

"We take advantage of this memorable occasion to present this address and beg your acceptance of a silver service as a token of our great respect and regard for you. We heartily wish you, Mrs. Ramsay, and your family, health, long life, and much enjoyment in your retirement from the active duties of office.

We have the honor to be, etc., etc."

In returning thanks for the address and presentation, Mr. Ramsay said:—"I am at a loss for words in which to thank you for these too generous gifts, and for the too favourable language of the address. I thank you all for this kindness and I am sure the beautiful gift, which is far too handsome and much too good for my desserts, will be handed down by my family as a very proud heirloom. I take this as being a recognition of the Standard Company as well as myself personally. The company has paid about five millions of dollars in claims, since I came

here, and these payments mean a provision for the families of the insured which, in many cases, brought comfort and happiness to the survivors. My service has been long but pleasant, I have no recollections of any jar between myself and the directors. I was but a youngster on arriving in Canada, but I set about doing the best I could. Then the total life assurance in Canada was thirty-five millions, whereas, it is now four hundred and four millions. The Standard then had little over a million of insurance, its premiums were \$120,000, and investments, \$36,-000. They now are, respectively, \$19,000,000; \$1,-364,000, and nearly \$15,000,000. The business under the experienced management of Mr. McGoun will continue to prosper because we started business in a right way, so that no man can say that the Standard ever did a dishonourable act. Mr. Ramsay asked the staff to give loyal support to his successor, and complimented Mr. Hunter, the chief agent in Ontario, for his services. He again thanked all most heartily for the address and presentation, and wished them health and prosperity, with an assurance of the pleasure he would have in being of use to them in any way."

Although retiring from the active management of the Standard Life, Mr. Ramsay will continue to give the company the benefit of his long experience and exceptionally sound judgment as a director of the institution. His record as manager is as unique in length of service as it is in success, more especially as the administrator of the funds of the company. During the long term of his management, during which very large sums have come under responsible control, involving many hundreds of transactions of an investment nature, subject to the special risks and vicissitudes of colonial conditions, Mr. Ramsay has lost none of the company's funds. He gives up a lifetime stewardship by handing over all that was entrusted to his care, not perfect merely, but enhanced in value, and with it an example and an experience and a record that will redound to his honour so long as the Standard Life Assurance Company exists, as they will also work to its material advantage by affording an inspiration and a model to every one of its officials throughout the British Empire. By stainless honour; by shrewdness without craft; by generosity without ostentation; by perennial geniality within the limits of becoming mirth; by dignity without pride; by strictness without severity, Mr. Ramsav throughout his long career has shown that a thorough business man may be a thorough gentleman.

THE CHRONICLE sees this change with unfeigned sorrow, for to Mr. Ramsay it is, and will ever feel, deeply indebted for early encouragement, and for steady support. He realized the desirability and the great value of a journal of this class being conducted on the line of independence, inspired by sound principles as regards insurance in all its phases, and of

finance in all its practical aspects. His kindly counsels, his friendly sympathy, his unwavering good will, are memories THE CHRONICLE will cherish with

As director of the company, Mr. Ramsay will keep in touch with the business he has done so much to build up and to maintain. In other spheres too, his sagacity will be exercised and his counsel be a power for good. In the enjoyments of wider leisure, freedom from responsibility, relief from the troubles incident to managerial life, in the consciousness of having all over Canada "troops of friends," whose marks of affectionate esteem will never cease, we hope to see Mr. Ramsay spending many happy years, in the enjoyment of good health and all temporal blessings.

#### MR. D. M. McGOUN.

Manager, Standard Life Assurance Co.

Early last year, in view of the retirement of Mr. W. M. Ramsay from the position of manager of the Standard Life Assurance Company, Mr. David Mackay McGoun was appointed assistant manager for Canada. Last month, when Mr. Ramsay retired, Mr. McGoun was promoted to position. He is a son of the late Mr. Archibald McGoun, of Montreal. In 1875 he joined the staff of the Standard Life under Mr. Ramsay's management. In 1891 he was appointed secretary for the Company in the West Indies, from there he was promoted in 1895 to the management of the branch in South Africa, an office he retained until recalled to Montreal last year. Mr. McGoun has had the inestimable benefit of a training under his predecessor, and experience of the company's business in other fields, of which opportunities he has taken full advantage. The business of the Standard Life will be maintained on the same principles and conducted by the same methods, and we anticipate with similar good results as those which distinguished the highly honourable managerial career of Mr. McGoun's predecessor. He has our heartiest good wishes for a long and prosperous career.

#### The Bank of Bri ish North America

Incorporated by Royal Charter.

The Court of Directors hereby give notice that a Dividend of Thirty (30) Shilings per Share will be paid on the 4th day of April next to the Proprietors of Shares registered in the Colonies making with the dividend paid in October a distribution of 6 per cent, for 4th year ending 31st December, 1900.

The Dividend will be paid at the rate of exchange current on the 4th day of April, 1901, to be fixed by the Managers.

No transfers can be made between the 21st inst., and the 4th prox., as the books must be closed during that period.

By Order of the Court.

By Order of the Court (Signed) A. G. WALLIS. Secretary.

No. 3 Clements' Lane, Lombard Street, London, E.C., 5th March, 1901.

#### NORTH AMERICAN LIFE ASSURANCE COMPANY.

The 20th annual statement of this prosperous company appears in a later page in this issue. From the data presented in the statement we have compiled the following comparative table, showing the movement and results of the business in 1899-1900:

	FINANCIAL		INCRUASE	
	Mov	EMEN C.	OR DEC	
	1900.	1899.		
n	800 000	74.000		
Premiums net	822,929	744,865		78,064
Interest &c	183,041	148,657	**	34,384
Total income	1,005,970	893,522	**	112,448
Payments to policyholders	304,679	303,082	**	1.597
Expenses	264,493	231, 182	**	33,311
Total outgo	569,172	534,264	**	34,908
Excess of income over outgo	436,798	359,258	**	77,540
Total assets	3,977.266	3,509 083		468,181
Policy and other reserves		2,982 059		435,012
Surplus to policyholders	560,192	527,024		33,168
Surplus over all liabilitieis in-				,
ciuding guarantee fund	500,192	467,024	**	33.168

The new insurance issued in 1900 was \$4,153,150, which exceeds the best previous year, except one, in the company's history. The total insurance in force at close of 1900, net, was \$24,883,061. The claim is made that "the financial company is unexcelled, and that its percentage of net surplus to liabilities exceeds that of any other company." The development of the business and resources of the North American Life in recent years have each been very marked. The assets since 1898 have risen from \$3,187,829 to \$3.-977,263, an increase in two years of \$789,434. the same period the premiums have gone up from \$649,751 to \$822,929, and the interest and rent receipts from \$135,380 to \$183,041. The steady ascent of the North American Life to its present prominence and stability is chiefly attributable to the actuarial skill and business sagacity of the managing director, Mr. Wm. McCabe, LL.B., F.I.A., who, in Mr. Goldman, A.I.A., the secretary, has a valuable coadjutor. Messrs Ault & McConkey, of this city who are managers for Province of Quebec, represent this company with zeal and judgment,

#### TWO HALIFAX BANKS.

The annual statement of the Union Bank of Halifax, issued on 31st January last, show the net profits for the year to have been \$85,237, which, with balance brought forward, made \$87,233. This was distributed as follows: two dividends, \$48,446; to reserve fund, \$29,886; office fixtures and additions to bank premises, \$7,096; these being drawn away left a balance to be carried forward of \$1,805. The Reserve Fund brought down from previous year was \$275,000, to this \$29,885 was added from net profits. and \$150,114 from premiums on new stock, which. together, raised this fund to \$455,000, equal to about 57 per cent. on the paid-up capital.

The People's Bank of Halifax made a net profit of \$68,430 last year, out of which two dividends each of \$21,000 were paid; \$5,800 was applied to bank premises account: \$2,291 to cover loss by burglary at Danville, and \$30,000 was transferred to Reserve The Reserve Fund now stands at \$260,000. which is 37.14 per cent, on the paid-up capital.

#### NEW YORK LIFE INSURANCE IN 1900.

The complete returns of the above company's business in Canada for 1900 were not prepared in time for our table. The Canadian returns for last year as compared with 1899 were as follows:

	31 Dec. 1899.	31 Dec. 1900.	Increase
Income in Canada	1,138,505	1,288,011	149,506
New Business actually paid for within the year	4,588,100	5,227,506	639,506
First years' premiums paid within the year Total paid business in force	175,310 26,840,096	211,155 29,484,779	35,845 2,644,683
Sworn and approved assets in Canada	5,410,267	5,971,873	561,606

#### Showing a surplus of \$426,208. over all Canadian liabilities.

The following shows the new business paid for by the company in past three years and in 1895:

1900. 1899. 1898. 1897. \$5,227,506 4,588,100 3,202,700 2,171,000

It will be noted that the business of 1900 is nearly equal to the aggregate of the years 1895 and 1898. Further substantial deposits will shortly be made with the Dominion Government. In the figures of business, that portion only is included which was already paid for in cash within the year.

#### INSURANCE INSTITUTE OF MONTREAL.

The regular monthly meeting of the Insurance Institute of this city, was held on 28th instant, in the Karn Hall. Mr. W. M. Ramsay, president, occupied the chair. There was a good attendance of managers, agents and other officials. Prior to the reading of the papers the governing Council met to dispose of routine business, and to receive reports of the officers. The first paper read was by Mr. David Burke, A.I.A., F.S.S., on "The Antiquity of Insurance." Mr. Burke prefaced his essay by saying that 'his object was not to give information on the antiquity of insurance, which had not already been given by historians and writers, but to induce the younger members of the Institute, who may have chosen, or who may think of insurance as their profession, to understand the difficulties under which the scientific structure of insurance has been erected, which stands to-day as a great bulwark of protection to not only trade and commerce, but to the families and homes of the people."

The paper proved to be a highly interesting sketch of the history of insurance. A second paper was contributed by Mr. Peers Davidson, Advocate, on "Real Estate Securities in the Province of Quebec." The essayist explained the nature of a "hypothec," which, in this Province, practically answers to the "mortgage" of other provinces. The variations of this security, its conditions, advantages, risks and peculiar features were explained. Mr. Davidson, however, advised that a legal adviser be consulted whenever legal questions were, or were likely to be raised. The paper is very interesting, as few laymen

have even an elementary knowledge of the real estate laws of this Province, which widely differ from those of the rest of Canada. Mr. Davidson regards them as better—which is a debateable question.

We hope to have an opportunity of placing the above papers before our readers at an early date.

#### DOMINION IRON AND STEEL COMPANY.

This organization has recently been the centre of great public interest all over Canada, owing to a report that it was to be swallowed up by the Carnegie-Morgan syndicate. Had this been done, there would have been universal regret throughout the Dominion, as the establishment of the iron and steel industry at Sydney, C.B., has excited the liveliest interest and inspired the most sanguine hopes. The Dominion Iron and Steel Company, Ltd., is inviting subscriptions for 30,000 of \$100 each preferred stock. Its capital stock consists of Common Stock shares, to number of 150,000, par value \$100, issued and fully paid, \$15,000,000; 50,000 shares, 7 per cent. Cumulative, Preference Stock, par value \$100 each, \$5,-000,000, the total being \$28,000,000 The preferred stock, after the bonds, is preferred both as to capital and dividends. The shares are entitled from the net earnings of the company to cumulative preferential dividends at the rate of 7 per cent. per annum, payable half-yearly on 1st April, 1st October. They may, at option of the holder, be exchanged for common shares. They are subject to be called in by the company at \$115 per share and accrued dividends. Of the preferred stock, 30,000 are offered. If the production of the company's works be as is estimated, 300,000 tons of pig metal, and 60,000 tons of steel blooms in 1901, and afterwards, 400,000 tons of iron and steel per annum made from foreign ore, mined in Newfoundland, the bounties receivable from the Government of Canada will be, in 1901, \$870,000; in 1902, \$2,075,000; 1903, \$1,850,000; 1904, \$1,450,000, and from 1905 to 1907, a total of \$1,850,000. These bounties in seven years would amount to \$8,005,000, a sum which was not contemplated as being likely to be called for when the bounties on iron production were decided upon,

The Right of Way over a street crossing is with a pedestrian, says the Supreme Court of Wisconsin if, calculating intelligently, he has sufficient time to clear the track without retarding the movement of the car. But even if he should miscalculate, he is still within his rights, the court held, and is not chargeable with lack of care, if the railroad company should be compelled to retard the motion of the car, or to stop it in order to permit him to pass in safety. The wise man, however, gives the car precedence, as he does also other vehicles, as the path of safety is behind a carriage. It would be poor comfort if a limb were smashed to know that it had suffered in an effort to assert a legal right.

#### FIRE INSURANCE MARKS.

Any person with an observant eye, who has looked at old buildings in England, has seen metal plates fastened to their front, which it was customary in days long past for fire insurance companies to aftach to such structures as they had insured. The "Daily News" gives a description of some of these, and of their object, and a notice of the companies which followed this custom.

These plates were generally of thin sheet lead, their design embossed, painted and gilt. The Friendly Society in 1684 stated officially that "no house is to be esteemed a Secured House till the Mark hath

One of the very earliest, if not, indeed, the first, of

been actually fixed thereon."

fire insurance companies was that established by Dr. Nicholas Barbon, or Barebones, one of the two sons of the notorious Praise-God Barebones. It is uncertain whether he was the "If-Christ-had-not-diedthou-hadst-been-damned Barebones" of Puritan fame, or infamy. However that may be, he was an unsuccessful physician, who took to speculative building on an extensive scale, and died in debt in 1698. In 1667, at the psychological moment, following the Great Fire, he had started his office, but sold it in 1680 to a company, which, as it was then the only one in the business, called itself simply "The Fire In 1705 this title was altered to the "Phe-Office.' nix," which is suposed to have ended its career in 1717. At any rate, it has no connection with the existing "Phenix," originally the "New Fire Office," which was established in 1782, and celebrated its centenary in 1882. The badge of this companythe representation of the fabled bird rising from the flames-is frequently seen. The "Alliance," founded in 1824, owes its name to its absorption of several small companies. Its badge of a triple-towered castle is as often seen as that of the "Royal Exchange Assurance Corporation," a concern dating back to its establishment by charter in 1720. Two badges of the "Royal Exchange" are to be noticed, either variety showing views of the Exchange, surmounted by a Royal crown. But the clasped hands and crown of the "Hand-in-Hand" Company have a still longer history. The "Hand-in-Hand" was founded in 1696, with the cumbrous title of "Contributors for Insuring Houses, Chambers, or Rooms from Loss by Fire by Amicable Contribution within the Cities of London and Westminster and the liberties thereof, and the places thereunto adjoining." The undertaking speedily became known as the "Amicable Contributors for Insuring from Loss by Fire," and then as the "Amicable Contributorship." It was in 1706 that the title "Hand-in-Hand" was adopted, perhaps, as an indication of the mutual principle on which the society was originally founded. This society was so successful that a rival sprang up, in the shape of the "Union, or Double Hand-in-Hand," which began its career in 1714. The badge represented two pairs of clasped hands, with the date 1714 above. The still-flourishing "Sun" office dates from 1710, when it was started as the "Company of London Insurers." It was at that time, and for long years afterwards, the practice of the fire insurance companies to maintain their individual staffs of fire-engines and firemen. On the occasion of a fire breaking out, they might have been observed racing along the streets towards the scene where our old friend the "devouring element" was raging. A contemporary poet remarks on these helter-skelters:

> The Hand-in-Hand the race begun, Then came the Phœnix and the Sun.

Arriving at the spot, the firemen's first duty was to look out for the Fire Mark. If that mark proclaimed the burning house to be insured in another office, all the engines and firemen of the rival companies retired, leaving the place to burn, or the fire to be quenched by the company interested, as the case might be. Every office fought for its own hand in those brutal old days before the establishment respectively of a fire brigade supported by subscriptions from the various offices, and of the rate-supported Metropolitan fire brigade of later years.

It happened sometimes in those old days that insurers would cease to renew their policies, and yet retain the Company's badge. Thus it was not infrequently found that the firemen had busied themselves in saving houses whose insurance had long lapsed. We may pause here for a moment to realize the blind rage of an old insurance company thus putting forth its energies without reward. Their chagrin seems to be reflected in the order issued by the directors of the "Sun" office in 1719, "that all the Marks of Relinquishers be taken down." The name "Relinquisher" appears to carry a subtle stigma with it.

Among the Fire Marks infrequently found in London are those of the "West of England," an Exeter office; the "Farmers," long since amalgamated with the Alliance; the "Lion" and the "Beacon," whose unexpired risks were handed over to the "Protector" in 1827, after a short career of seven years. The "Protector" itself has long since ceased to exist, but its really striking mark may occasionally be seen, though one of the rarest. It is also the most appropriate of all such marks, representing a fireman in the costume of a hundred and fifty years ago most dramatically turning a hose on a building bursting with the most melo-dramatic and awe-inspiring flames. Others, those of such defunct offices as the "London," the "Protection," the "Palladium," still remain beside those of the yet flourishing "Royal," and the "Guardian." The badge of the "Guardian." with its impressive figure of Minerva, is said to have been designed by Richard Westall, a distinguished Royal Academician of a century ago.

#### PERSONALS.

Mr. William T. Woods, president of Lloyds Plate Glass Insurance Co., New York, visited Montreal this week, and was met by Messrs. Eastmure and Lightbourn, representatives of the company for Canada.

Mr. H. Sutherland, managing director of the Temperance & General Life Assurance Company, recently paid a flying visit to Montreal, from whence he went to Ottawa.

Mr. T. D. Richardson has been appointed assistant manager of the Manchester Assurance Company and the American Fire Insurance Company, made vacant by the retirement of Mr. R. P. Templeton.

Mr. George Hague, general manager of the Merchants Bank, arrived at Jerusalem yesterday in good health.

## British America Assurance Company.

The sixty-seventh Annual Meeting of the Shareholders was held at the Company's Office, Toronto, on Thursday, 28th February, 1901.

The President, Hon. Geo. A. Cox, occupied the chair; and Mr. P. H. Sims, who was appointed to act as Secretary, read the following

#### ANNUAL REPORT.

Your Directors have the honor to present the Annual Report and Financial Statement of the Company's sixty-seventh year, duly vouched for by its Auditors.

It will be noted that there has been a considerable increase in the Premium Income for the year, this being mainly due to the business derived from the new fields in which the Company has established business connections, and also to the improved conditions that have prevailed in the Marine business.

Two half-yearly dividends have been declared at the rate of seven per cent. per annum, amounting to \$60,393.26, and the Reserve Fund has been increased to \$581,457.22.

To cover the liability on unexpired risks a reserve is held of upwards of thirty five per cent. of the year's Premium Income, less the amount actually earned on account of Inland Marine and Ocean Cargo risks.

In view of the abnormal fire losses on this continent during the year 1900, including the disastrous conflagration in April last in the Cities of Hull and Ottawa, which involved a loss of property to the value of about ten million dollars, your Directors feel that the statements herewith submitted must be regarded as satisfactory by the Shareholders.

The Capital Stock of the Company has been increased to One Million Dollars, in accordance with the by law passed at the last Annual Meeting, the \$250,000 00 new stock authorized to be issued at a premium of fifteen per cent, having been all taken up.

GEO. A. C

President.

MANAGING-DIRECTOR

WM. McCABE, LL B., F.I.A., F.S.S.

SECRETARY L. GOLDMAN, A.I.A.

MEDICAL DIRECTOR J. THORBURN, M.D., Edin.

The Report containing the proceedings of the Annual Meeting, held on January 30 last, showing marked proofs of the continued progress and solid position of the Company, will be sent to policyholders. Pamphlets explanatory of the attractive investment plans of the Company, and a copy of the annual report, showing its unexcelled financial position, will be furnished on appli-cation to the Head Office or any of the Company's agencies.

AULT & McCONKEY, Managers Province of Quebec.

180 ST. JAMES STREET, MONTREAL.

#### PROMINENT TOPICS.

The budget speech of Premier Murray, Nova Scotia, shows a large increase in revenue last year. There was \$1,014,000 received, of which \$413,000 consisted of royalties on coal mining. The Dominion Coal Company shipped 600,000 tons of coal to Boston last year. More is expected to be sent in current year by which the revenue of Nova Scotia will be enlarged. For a province to have received 40 per cent. of its entire revenue last year from royalties on coal production is a remarkable exhibit of the mineral wealth of that region.

The Legislature of British Columbia had a remarkable statement placed before it on 6th instant, in reference to the output of minerals last year. The production in 1900 was greatly in excess of that of 1899. The total for 1899 was \$12,393,131, and for 1900, \$16,407,645, which is an increase of about 33 per cent. The gold output was \$3,461,087; silver, \$2,295,099; copper, \$1,615,289; lead, \$2,690,507; coal and coke, \$5,066,899. These are all largely above the figures of 1900. There are now 99 mines shipping ore, the number of mines at work being 3,731. Canada is evidently entering upon an era of mineral production and of industrial enterprise based thereon which will advance the national wealth by leaps and bounds.

At a banquet given in this city on 4th instant, in honour of the Hon. L. Gouin, Senator Dandurand suggested that a Provincial tax be levied upon stock transactions. From this source, he thought, \$300,-000 might be raised. Doubtless, for a brief period, a sum of money at the rate of \$300,000 per year might be procured from taxing stock transactions, but the attempt to continue such an extortionate impost would be an up-to-date exhibition of the art of killing the goose that lays golden eggs. A tax so heavy in this Province would drive stock operators to conduct their business where it would not be subject to such a fleecing, so the golden vision of Senator Dandurand would turn out to have been a "baseless fabric," a mere imaginative supposition. Why should the buyers and sellers in stocks be taxed on the amount of their business any more than any other buyers and sellers of what men have to exchange for value? The entire business of a bank is one between buyer and seller, the exchangeable commodity being credit and financial facilities. To place a tax on every dollar turned over by a bank would be merely acting on Senator Dandurand's idea, so would the taxing of a merchant's turn over. If the Senator's principle were adopted generally, as in equity it should be to avoid class legislation, every transaction in this Province involving sale and purchase, ought to be taxed. Those who deal in stocks pay their full share of Provincial taxation, and the brokers have each to pay \$50 for the right to carry on business. The worthy Senator needs to study the history of taxation, from which he would learn that unjust, excessive business taxes defeat their own object by diverting the stream of business into outside channels.

The more the policy of the Manitoba Government is discussed in that Province, the stronger becomes the position of the Premier and his colleagues. Winnipeg, at first, seemed disposed to be hostile to the railway arrangements, but, on further consideration, it has expressed approval of the Government's policy. So great was the demand for copies of the article on this subject in THE CHRONICLE of 22nd February, that we have been compelled to republish it in this issue.

The attention of the City Council needs calling to the great importance of not granting permission for street railway tracks, either for electric or steam car service, to be laid along Commissioners street. Such tracks would be a serious obstruction to the traffic to and from the harbour, which already has not enough accommodation. To place a new and serious obstacle n the way of this traffic would be a deplorable policy. We observe that the Belt line is wishing to run its tracks along Commissioners street. It is alleged that the reason for this is the intention of the company to replace electric by steam power in the near future. The question demands the most earnest consideration.

The City Fathers are wrestling with the Abattoir question in their customary style. It is to be hoped that the interests of the city will be better safeguarded than they were under old contracts with Abattoir company. The city needs a public abattoir, up-to-date in every respect, placed conveniently, with perfect provisions against any nuisance being created, or any risk of danger to the health of the locality, and the general interests of the city must be paramount to any private ones.

An indignation meeting of citizens in regard to the civic hospital will soon be in order. The resolution passed by the Council of the Board of Trade in connection with the ownership and erection of a civic hospital has received the approval of citizens generally and been endorsed by the medical faculty. Now small-pox is lurking around our borders, like an enemy seeking an opening for attack; the apathy of the aldermen in regard to making preparation for any cases that occur is inexcusable. We deal with this question in a special article.

The Inspector of the Fire Underwriters has issued his report in regard to the condition of the fire preventive services of this city. He lays great stress upon the necessity of more and more efficient mechanical equipments for the fire brigade, a larger number of men, far better supply of water, more hydrants, and the whole service raised in power and capacity to cope with large fires. Citizens would do well to reflect that \$50,000 spent for these purposes may save one or two millions of dollars of fire waste, and that the extra insurance rates charged because of bad fire protection probably far exceed the annual expense necessary to improve that protection.

The proposed civic loans seem to be giving the aldermen unusual trouble. They would like to have one by-law voted upon covering the whole of the expenditures projected. The only chance of getting a favourable vote for some items is to have them included with more acceptable ones in a general sum total. No coercion of the citizens by the City Council ought to be tolerated in this matter. They have a clear right to say "Yea," or "Nay" to each item of expenditure; the money to be spent is their money, and in its disposal they ought to insist upon having a controlling voice. Each loan by-law should set forth the object for which the money is to be borrowed, details thereof should be given so specifically set forth as to prevent the possibility of money raised for one purpose being spent on some other object.

The civic lighting committee seems to be taking a rest from the ardous labour of postponing work. Every day's delay is liable to increase the cost of lighting. The present affords an opportunity for getting more favourable terms than those likely to be had later on. The specifications should be plain and straightforward, without needlessly irritating clauses involving pains and penalties which increase the cost, but which are never intended to be enforced.

A Bill is before the House of Assembly, Quebec, to enable the Trustees of the Montreal Cemetery to erect a crematory, the cost of which would be paid by Sir William MacDonald. Opposition has been shown to this Bill by opponents of cremation, who, we believe, represent the great majority of the people. Cremation seems to violate the sacredness which has ever attached to the human body when life has become extinct, save amongst some heathen peoples. The clergy, who should have decided convictions on this matter, have been strangely silent..

We are glad to note that some steps are likely to be taken to make the Canadian railways that were, in whole or main part, built by this country and its citizens, hesitate before making their headquarters, practically, at a foreign port.

The proposal of the People's Life Insurance Company to secure power to issue debentures is not one that it is desirable to see carried out. The issuance of debentures is a financial operation that does not appear to us as in harmony with the business of a life assurance company.

#### LONDON LETTER.

#### FINANCE.

21st February; 1901.

Notwithstanding the set-back in the quotations of most of the West African, or, as we call them, "Jungle" securities, the promoter by no means holds his hand. Three out of every four new flotations have as their object the search for gold on the Guinea Coast. Take a look with me at a few of them. There is the Gold Reefs of West Africa, a five year old company which is offering 50,000 shares of \$1.25 each. The company has only had the most moderate results from its trading, and the market price of its other \$1.25 shares is down to \$1.12.

Liverpool is the birthplace of the third company I want to mention. Liverpool's advocacy of the West Coast of Africa is very understandable. There are only two steamship lines which trade with that territory, one coming from Liverpool and the other from Hamburg, I think. Great batches of mining machinery are going out to Cape Coast Castle and Sekondi every week, and, perhaps, after all, A. L. Jones, of Elder-Dempster, is wise in his generation in putting \$5,000 into every decent Jungle property which comes out. It resures that the transport shall not go to Hamburg, although, Hamburg, I understand, can quote cheaper rates.

#### INSURANCE.

Whether it be at peace or at war with its agents, the Pearl Life continues to make grand progress. I should imagine that a peep into the sanctum sancturum at London Bridge would often find managing-director Foley hardly able to control his enthusiasm sometimes. During the quinquennium just completed, the premium income has grown from \$2,114,470 to \$4,208,715, and the assets from \$2,554,890 to \$6,001,430. In the cost of these assets, the growth in 1900 alone was over a million dollars. The participating policyholders and shareholders get close upon \$155,000 between them, and the substantial balance of \$862,975 is caried forward.

Both branches, industrial as well as ordinary, have had an exceptionally good experience. The whole record is splendid for a society still in the heyday of youth. The Pearl was established in 1863. The early years were ones of great stress and storm, of which the outside world knows little, but in the end, excellence of business ideas and thoroughness (that's where the trouble with the agents came in) of business methods triumphed over all obstacles, and the result is a prosperity which is deep and promises to be lasting.

I ran across a man the other day who wanted to sell some certificates he had subscribed for in connection with the British Home Assurance Corporation. He couldn't find a buyer at anything like what he had paid for them, although they are supposed to convey good rights to house-property. I am afraid that the British Homes will do no better than has its progenitor, the Provident Association.

Who says London never learns? Anyone who remembers the old Jewin street area, which was the scene of the great Cripplegate fire of 1897, and sees it now, would not answer that he did. The County Council were unable to get the ground landlords, the Goldsmiths Company, to widen the streets in rebuilding, but it has done wonders in polishing up the local fire extinction service. Right in the heart of the dangerous area, a site was purchased for \$160,000, upon which a fully equipped station was built for \$80,000. One engine is kept absolutely ready for an instant exit, and the net result is that the merchants living in the locality now want lower insurance premiums.

#### RECENT LEGAL DECISIONS.

HEIGHT AND WEIGHT IN ACCIDENT INSURANCE.-It would seem that a short, stout man is not always a desirable risk for accident companies. One Levy, in England, applied for a policy to an agent of The Scottish Employers' Insurance Company. He gave his height as 5 feet 8 inches, and his weight as 203 pounds, and these figures, with other information, the agent filled in the proposed form; at the same time the agent told him that if he had no word to the contrary in 14 days, he was to consider himself as insured. The company declined the risk, but Levy did not know this until the day after he was injured in a railway accident. Subsequently, he sued the company, which defended, on the ground that he had misrepresented both his weight and height, his weight being 34 pounds more than he stated, and his height 5 inches less. The jury found (1) that Levy knew that the agent had inserted his height and weight in the proposal; (2) that he did not know they were incorrect, and (3) that the agent had said that the plaintiff was to treat himself as insured if he did not have word within 14 days. On these findings judgment was given for the plaintiff, from which the company appealed, to a Divisional Court of the King's Bench.

Mr. Justice Wills said, unless there is a specific finding of the jury that the agent had a wider authority, it is impossible to assume that he had authority to make a verbal contract which was in different terms from those of the written documents forming the basis of the negotiation. The words at the foot of the proposal: "no verbal statement made to the agent in respect of the within mentioned answers shall be binding upon the company" are important. These words mean that the answers in the proposal form are to be the things which are binding, and that verbal statements (that the assured, for instance, did not know his own height or weight) are to be neglected, and that the document as it stands is to be taken as the proposal. It is sought to get rid of the want of a proper written policy, by evidence that the agent said that the plaintiff might consider himself as insured if he did not hear from the company within 14 days. That is to say, the agent was treated as having authority to make an entirely different contract to that contained in the proposal. The agent had no such authority. The finding of I

the jury in answer to the second question is preposterous, and can only be explained by the fact that the plaintiff is a poor man and the defendants a rich corporation. To suggest that the agent knew that the height and weight as inserted in the application were incorrect, while the plaintiff did not, is absurd. If anyone was likely to know the plaintiff's height and weight, it was the plaintiff himself. Every one should know his own height within five inches. If there is evidence of a contract of insurance, then the question arises whether the misstatements in the application affect the insurance. The misstatements are material and are fatal. It is not suggested that they were fraudulent misstatements.

Judge Phillimore in concurring, and speaking of the duty of the agent, said:—"It was contended that, as the incorrectness in the application was due, or at any rate known by the agent, the assured could recover, and Bawden's case, decided in 1892, was relied on. Bawden's case, however, turned upon the special terms of the contract, and the utmost the decision came to was this—that it was the agent's duty to put into the proposal form obvious and patent matters. Levy v. Scottish Employers' Insurance Co., 17 Times Law Reports 229.

St. Peter's, Rome, has just been lighted by electricity.

INCANDESCENT LAMPS are to be soon produced at a factory in Hamilton.

THE EASTERN COAL MINES of Canada shipped 3,025,000 tons of coal last year, an increase of 14 per cent. over 1899.

Mr. ALEXANDER LANG, the manager of the Bank of Montreal in London, has been appointed a member of the Pacific Cable Board as one of the representatives of the Government of Canada.

New Zealand exported last year frozen meat, the total weight of which was 192,074,451 pounds; 103,-891,269 pounds in mutton, 52,245,517 pounds in lamb, and 35,937,665 pounds beef.

Mr. Robert H. McCurdy, superintendent of the foreign department of the Mutual Life, has received from the French Government the decoration of the Legion of Honour, as a recognition of the merits of the exhibit of the Mutual at the Paris Exposition. Dr. E. J. Marsh, medical director of the company, received a gold medal for his exhibit of mortality statistics.

An Insurance Adjuster, of New Orleans, has secured \$2,500 as damages against the "Daily Item" newspaper for a libel.

REPUBLICAN FREEDOM was recently illustrated at Manilla, where the performers in a band of musicians who played "Aguinaldo's March" at a festival were each fined \$100 and sent to jail for thirty days. Five others were put in prison for printing on cigarette covers figures emblematic of liberty.

The fire loss of the United States and Canada during the month of February, as compiled from records of New York "Commercial Bulletin," shows a total of \$13.992,000. The figures for the first two months of this year compare as follows with the same period in 1899 and 1900:—

January February	٠.	 	1899. \$10,718,000 18,469,000	1900. \$11,755,300 15,427,000	1901. \$16,574,950 13,992,000
Total		 ٠.	\$29,187,000	\$27,182,300	\$30,566,950

In the Imperial House of Commons Lord Stanley recently said, in reply to a question: "The total number of horses and cobs purchased for South Africa between October, 1899, and January 31st, 1901, was, in Great Britain and Ireland, 35.775 horses and 3,827 cobs; and in other countries, 36,314 horses and 35.516 cobs. Of the former, about 80 per cent. were sent to South Africa. The English and Irish were considered the best, and the next best were the American and Canadian. While purchases are still going on it is not considered expedient to state the prices."

The Wisconsin Supreme Court, in a decision filed recently, says the "Standard," holds that companies may rebuild under the valued policy law. The hotel of W. A. Temple, Knapp, Wis., burned. The assured demanded \$6,000, the face of the policies, but the companies elected to rebuild and contracted for \$4,000. Notice was served on them not to trespass, but the building proceeded. The assured then demanded full payment of the policies and damages for trespass, the lower court deciding in his favour. For a time it appeared that the companies would be obliged to pay three losses—one under the valued policy law, for trespass, and for rebuilding expenses.

OVER-ESTIMATED FIRE PROTECTION .- The frequency with which total losses are now being reported on property located in so-called protected cities and towns makes it quite evident, says a contemporary, that too much allowance is being given for fire protection which does not protect. Frozen hydrants, bursting of poor hose, defective apparatus, lack of water and other causes as various as they are numerous have a very marked effect upon loss ratios. Rates in fire department towns are made in accordance with dress parade conditions, and without thought of the mishaps that experience shows too frequently occur under the haste, excitement and unexpectedness of an alarm. In theory the equipment is perfect, the discipline beyond criticism and the water abundant; but in practice these conditions are very seldom fully realized, and in too many cases fail entirely. Much of this failure can be laid to politics, and much to general carelessness, but the fact remains that the claims made by each town for its

model fire protection can be safely and quite largely discounted when rates are made, and, unless this is done, there is likely to be a deficiency in results which will worry managing underwriters.

THE BESTOWAL OF KING EDWARD of the insignia of the 4th class of the Royal Victorian Order upon Lieut.-Colonel Steele was a well-deserved tribute, says the "Canadian Gazette," to the gallant officer under whose command Strathcona's Horse have rendered such signal service to the Empire. Though the Colonel is returning to Canada, it will not be for long. While there he will nelp in the choice of suitable recruits for Baden-Powell's South African Constabulary, and return to South Africa in command of the Canadian section of this force. The Colonel is, we believe, to be given the command of the Lydenburg district of the Transvaal, the most northerly of the divisions already maped out by General Baden-Powell under the police system which he is at present organizing.

THE U. S. TREASURY has decided, in reference to the duty which had been paid on goods burnt on the Hoboken docks on 30th June last, that, the time of lodging a permit is not to be considered as the time at which the Government's custody over the goods ceases. It is substantially held that if the goods were actually on the dock at the time of the fire and had not been left there for an unreasonable time by the importers the duties may be remitted. This over-rules the original decision of the Department which was, that duties should be remitted only on public store packages and on goods for which no permit of delivery had been lodged with the Dock Inspector prior to the conflagration. The later decision is clearly the more just one; it was hard enough for importers to lose their goods without also sacrificing what duties on them had been paid.

WHEN IS A BURGLAR NOT A BURGLAR? This is a new conundrum asked by "The Spectator," upon the answer to which depends a payment by the New Amsterdam Casualty Company of New York. This company issued a burglary policy of \$1,000 upon the contents of a flat in New York, which flat, it was afterward claimed by the insured had been burglariously entered and goods taken away to the value of \$1,800. Upon inspection by the company's representatives, the latter failed to find satisfactory evidence of the actual entrance of burglars, although the interior had been wrecked, and the closet doors showed very distinct marks of force. Only a slight mark, however, was found on the outer door. Now, the insured would like to prove that it was possible for a burglarious entrance to have been effected without leaving clearer traces than in this case, and is looking for an expert burglar's testimony. In its defence, the company quotes the following definition of a burglary from its policy form: "The term burglary, as used in this policy, shall be understood to mean the forcible and violent entry upon the premises, or exit therefrom, whether by day or by night, of which force and violence there is visible evidence, effected by any person or persons other than the assured or any of his employees or other persons lawfully in said premises," The company denies that there was in this case a "forcible or violent entry," and declines to pay the insurance. The distinction made between "burglary" and "theft" is an important one, for the company charges double the "burglary" premium if loss by "theft" is to be covered as well. Loss by "theft" could be accomplished without "forcible and violent entry," but was not covered by the policy in question.

THE DANGER OF FIRE IN THEATRES gives interest to any suggestion for obviating any form of risk. A paper in the "Coast Review" has the following:-"If iron or steel is used in the construction of the tiers it must be thoroughly protected from the influence of heat. A dress circle or gallery constructed of radiating steel joists supported by cross steel girders and columns cannot be considered safe as far as fire is concerned, but if the construction be altered to hardwood beams, girders and posts its fire-resisting qualities are very great. The one objection to the use of the latter is the great thickness of timber required. Where a post, at least, ten inches square would be required, we now substitute an iron or steel column four inches diameter. The best way to meet the difficulty, without the great expense of the cantilever system, is to use our best hardwoods for all the main girders and joists of the circles. The columns supporting them to be of the best mild steel and of the smallest diameter possible so that they might be encased in some fire-resisting material without increasing their size to such an extent as to interfere with the sighting of the house. The under sides of the circles, fronts and boxes should be covered with fibrous plaster-a material I cannot speak of too highly for its fire-resisting qualities."

#### STOCK EXCHANGE NOTES.

Wednesday p.m., March 6, 1901.

The buoyancy and activity which marked the trading up to Monday last has ceased for the moment, and the closing to-day was dull. Gas, Electric, Toronto Railway and Richelieu, the leading features of the market at the commencement of the week. show decided declines. In the case of Gas and Electric, the heavy decline on Monday afternoon has been accounted for in some quarters by a hitch in the much-talked-of amalgamation scheme and suggested amendments to the measure now before the Ouebec Parliament. Dominion Coal and Twin City have been quite strong in the local market this week. A further rise is looked for in Twin and it would seem almost certain that the stock is a purchase for a hold, as their surplus earnings continue

The New York market has proved interesting this week and the Railway stocks have been the feature and some good advances have been recorded. The circular of the United States Steel Corporation regarding the exchange of stocks of the companies coming into the amalgamation has been issued, and March the 20th is set as the time up to which the exchange may be made.

Business on the Stock Exchange in London is limited, with prices of Americans strong. The demand for money has diminished and supplies are ample.

Call money in Montreal continues easy at 5 p. c., and in London the rate is 3½, while the New York rate remains at 2½ p. c.

The quotations for money at continental points are as follows:—

	Market.	Bank,
Paris		3
Berlin		41/2
Hamburg	35/8	41/2
Frankfort		41/2
Amsterdam		41/2
Vienna		31/2
Brussels	• 3	3 1/2
St. Petersburg	7 1/2	51/2

C.P.R. closed at 91½ an advance of 5% points over last week's quotation, and 1,709 shares were traded in during the week. The quotation in London to-day was 94. The earnings for the last week of February show an increase of \$52,000.

The Grand Trand Tailway Company's earnings for the last week of February show an increase of \$43.095.

The stock quotations, as compared with a week ago, are as follows:-

A week	ago. To-day
First Preference92	931/4
Second Preference643	6678
Third Preference 225	2 2334

Montreal Street Railway closed at 266 bid, a loss on quotation of a full point for the week. The transactions involved 1,089 shares and the stock was not in heavy demand. The increase in earnings for the week ending 2nd inst. is heavy, but this is accounted for in part by the fact that the contrasting days, last year, were those of the heavy snow-storm which pratically tied up the Street Railway system for some days. The amount of the increase is \$8,549.36 as follows:—

		Increase.
Sunday	\$3.710.14	\$993.88
Monday	4,719 30	470.79
Tuesday	4,588.55	* 49.14
Wednesday	4,445.75	254.18
Thursday	4, 95.72	2,460.99
Friday	4,722.26	3,231.13
Saturday	4,870.84	1,187.53
*Decrease.		

Toronto Railway which sold as high as 114, closed at 1031/2 bid, a loss of 3 3.8 points from last week's quotation. There were fairly heavy transactions in the stock, and 7,400 shares changed hands. There

are rumors of an issue of new stock to purchase the Metropolitan System, and also that power is to be brought from Niagara Falls to operate the Railway, but none of these rumors seem to have been sufficient to maintain the stock at the higher level. The increase in earnings for the week, ending 2nd inst., amounted to \$1,251.45 as follows:—

		Increase.
Sunday	\$1,707.75	\$172.41
Monday	4,159.88	108.06
Tuesday	4,344.93	200.94
Wednesday	4,132.23	200.70
Thursday	4,169.45	318.16
Friday	4,232,10	168.35
Saturday	4,815.62	82.83

Twin City has been a decided feature of this week's market and 3.285 shares were traded in. The stock sold up to 73 1-4 closing with 72 1-2 bid, an advance of 4 3-8 points for the week. The earnings for the month of January show an increase of 48.65 per cent. in net earnings, and it seems that the Company is in a position to pay 4 per cent. and still be able to carry forward a good surplus for investment in extentensions, etc. The interest in the stock here is a reflection of that displayed in the New York Market where the stock sold up to 73 1-2. The earnings for the last week of February show an increase of \$3,255.80.

Montreal Gas advanced again on Monday morning selling as high as 238 ½, but in the afternoon under selling pressure it declined to 230 and closed to-day with 22934 bid, a loss of 634 points from last week's close. The stock, however, sold at 231 this afternoon and it seems as if, for the time being, the low water mark has been reached. The number of shares which changed hands during the week amounted to 6552.

Royal Electric has displayed the same tendency, and after selling up to 226 X. D. on Monday morning, it declined to 220 the same afternoon closing today with 221½ X. D. bid, a loss of 4 points from last week's closing quotation. The trading involved 3963 shares.

Dominion Cotton continues strong around 90 closing with 89 ¼ bid an advance of ¾ point for the week.

Richelieu & Ontario on transactions of 7.174 shares shows an advance of 134 points over last week's close, the quotation at the sound of the gong being 11234. The stock sold as high as 114, but has reacted. The issue of new stock will be made to sharehelders of record on 16th inst in the ratio of

one new share for five of old, and the stock will sell ex-rights on March 15th.

The Dominion Iron and Steel Company, Limited will open lists Thursday, March 14, and close at 3 p.m. on Monday, March 18, for an issue of \$3,000,000,000,7 per cent. preferred stock in 30,000 shares of \$100 each. The total issue of prefered stock will be \$5,000,000 or 50,000 shares, of which 30,000 shares are now offered at \$85 and accrued dividend for each \$100 share. The shares are entitled to cumulative preferential dividends at the rate of 7 per cent. per annum, payable from the net earnings of the company, halfyearly, in April and October. The securities of this company will be listed on Friday.

Montreal Cotton sold up to 145 during the week. The issue of new stock in the ratio of one share in four is announced, and will come to holders of record on 20th inst, payments to be made in five monthly instalments of twenty per cent, each, commencing the 1st of April.

#### MINING MATTERS.

The shipments from the mines of the Rossland Camp for the week ending 2nd inst. were as follows:—

Le Roi	3,911	tons
Centre Star	2,160	**
War Eagle	630	"
Le Roi No. 2	230	**
Iron Mask	140	**
Rossland G. W	540	"
Evening Star	70	"
Total	7,681	tons

The closing prices of the listed stocks and sales for the week were as follows:—

A	week ago.	To-day.	Sales.
War Eagle	321/2	38	5,000
Payne		42	9,250
Republic	40	381/2	21,000
Montreal-London			
Virtue	20	25	7,000
North Star		80	,,,

War Eagle has recovered somewhat from the recent low level, closing with 38 bid, an advance of 5½ points for the week on transactions of 5,000 shares. The highest price realized this week was 39.

Payne closed with 42 bid on transactions for the week of 9,250 shares.

Republic shows a further decline of 1½ points from last week's quotation, and closed with 38½ bid. 21,000 shares were traded in this week. Last sales at 40.

Virtue sold up to 27 and closed with 25 bid on transactions involving 7000 shares for the week.

North Star was not traded in this week, and closed with 80 bid.

World's Imports and Exports.—The imports and exports of the world, if the figures are perfectly correct, should be equal. In point of fact a considerable difference is shown in the "Journal of the Royal Statistical Society," and Mr. Wilhelm Schou, who makes the study, puts the difference to the account of freight charges. The aggregate imports, exports, and excess of imports are as tollows:—

Year.	Imports,	Exports.	Excess of Imports.
1867-68	t. £1,165,000,000	£1,045,000,000	£120,000,000
1879	1,571,000,000	1,355,000,000	216,000,000
1885	1,606,000,000	1.380,000,000	226,000,000
1890	1,916,000,000	1,646,000,000	270,000,000
1894	1,834,000,000	1,580,000,000	254,000,000

The large excess in the value of imports probably arises from the exports being valued minus the cost of carriage, whereas the imports generally include that cost. Freights in the first year quoted seem to have equalled 11.48 per cent, of the value of the exports; 15.94 per cent. in the second year; 16.37, 16.46 and 16.07 per cent. in the other years respectively. The rise in freight charges is only apparent, the larger percentage being the result of the lower prices of commodities, or, in other words, more tonnage was carried in proportion to the money value. This does not mean that transportation is not cheaper per ton than formerly, but only that freight rates have not fallen so much as prices. Notwithstanding the decline in the prices of merchandise, the immense increase in the totals is a feature.

PATENT REPORT.-Messrs Fetherstonhaugh & Co., patent solicitors, Canada Life Building, furnish us with the following complete weekly list of patents granted to Canadians in the following countries. Any further information may be readily obtained from them direct: Canadian Patents.-E. B. Nagle, centrifugal separators; W. Rowlands, adjustable clamp rods for split switches; A. Desjardins, horse foot-pad or cushion; J. Quinn, sanders for railways; D. N. Phillips, grass uprooters; F. E. Libenow and A. Cruickshank, wash-pails; F. G. Gale, mattress frames; E. Rioux, nut locks; W. R. Porter, root and vegetable seed-drills; W. S. Goddard, snow ploughs; J. A. Burgess, A. E. Scanlon, J. Elliott, acetylene gas generators; J. Furbow, air pumps for bicycles. Henry, heater or cooler for liquids; J. J. Stevens, drill vise and attachment for same; S. Toles, buck saw.

WANTED for a leading Fire Insurance Company a French Inspector. Address W, "The Chronicle," P.O. Box, 578 Montreal.

WANTED by the Canadian Fire Underwriters'
Association a competent person (conversant with both languages) as Rating Officer for the Province of Quebec. Application in writing, stating experience, &c., to be addressed to

Alf. W. Hadrill, Secretary, 242 St. James Street, Montreal,

THE RIGHTS OF A FIREBUG.—A peculiar case was disposed of in New York recently, says "The Insurance Monitor." A party unable, on account of his reputation, to secure insurance, was tenant in a building where his presence deprived the owner and other occupants of insurance protection. The court holds that he cannot be ejected on that account. His inability to insure is, itself, a protection against fire, and deprives him of the character of a moral hazard, There is force in the argument, so long as the theory works out in practice. But it is obviously important that all the insurers should be posted, and keep off the risk. The hardship to the owner and other occupants is, unfortunately, one of those things for which the law offers no remedy. A man's character will not defeat his contract rights. The only way to escape the hardship is for landlords to learn the character of would-be tenants, before letting. The law will not deprive even the criminal of his right to earn a livelihood. The doctrine that "inability to insure is itself a protection against fire," seems to us fan-
