Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below. L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

Coloured covers / Couverture de couleur		Coloured pages / Pages de couleur
Covers damaged / Couverture endommagée		Pages damaged / Pages endommagées
Covers restored and/or laminated / Couverture restaurée et/ou pelliculée		Pages restored and/or laminated / Pages restaurées et/ou pelliculées
Cover title missing / Le titre de couverture manque		Pages discoloured, stained or foxed/ Pages décolorées, tachetées ou piquées
 Coloured maps /		Pages detached / Pages détachées
Cartes géographiques en couleur	\checkmark	Showthrough / Transparence
Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)	\square	Quality of print varies / Qualité inégale de l'impression
Coloured plates and/or illustrations / Planches et/ou illustrations en couleur	[]	Includes supplementary materials /
Bound with other material / Relié avec d'autres documents		Comprend du matériel supplémentaire
Only edition available / Seule édition disponible		Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from scanning / II se peut que certaines pages blanches ajoutées lors d'une
Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.		restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été numérisées.

Advertisers and subscribers are respectfully notified that the JOURNAL OF COMMERCE will not be responsible for any accounts contracted by any person whomsoever, whether employe or_ otherwise, and it does not tolerate any running of accounts on the part of any of its employes, who are all paid prompt cash for their services. No one but the bookkeeper or the proprietor is authorized to collect accounts due to it : all remittances from a distance should be made by P.O. order, by cheque or registered letter, addressed to " The proprietor of the JOURNAL OF COMMERCE. Montreal," whose name is on the front of the page of the paper. We deem this notice necessary again in order to avoid the repetition of any misunderstandings of former years.

BELMONT, Ont., it is said, is soon to have a private bank.

ONE thousand barrels of oysters were recently shipped from Chatham, N.B., to England.

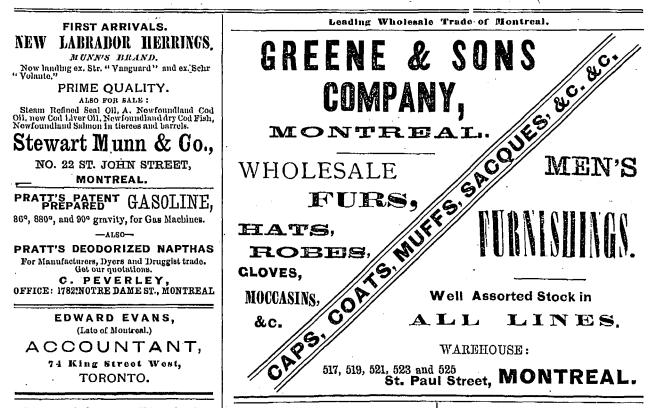

The Traders' Bank has opened a branch at Wallaceburg, Ont., A. W. Murton, manager.

THE Bank of Nova Scotia is closing its agency at Winnipeg after an unfortunate experience.

THE Minnesota and Ontario Lumber Company is building a planing mill at Rat Portage, Ont.

ELECTRICITY is being tested as a motor on one of the elevated street railways in New York.

ANTOINE ROY, storekeeper, St. Telesphoreue., has assigned; liabilities between \$3,000, nd \$3,000,

THE St. Louis Grocer, says Chicago is to have a butterine inspector—not to prevent the sale of the stuff, but merely to prevent its sale as butter.

THE Georgia House of Representatives, recently passed a Bill reducing the amount required as a deposit by outside fire insurance companies from \$25,000 to \$5,000.

APPLICATION will be made by the Essex Centre Manufacturing Co., Essex Centre, Oat., to increase its capital stock from \$50,000 to \$100,000.

Joux Avard, cattle dealer of Westmorland Co., N.B., has assigned. His liabilities are about \$10,000, principally to farmers in Botsford.

DUCHESNE & FRARE, a dry goods firm of some 5 or 6 years standing at Three Rivers, Que., have assigned, showing liabilities of \$7,000, with assets nominally about \$6,000.

APPLICATION for incorporation will be made by "The Ontario Shirt Company," with headquarters at Hamilton, Ont., and capital of\$10,-000, in shares of \$100 cach.

THE London Grocer says: the co-operative stores in Bristol, Engand, are not thriving. The tradesmen beat the co-operatives on prices, and, therefore, the people do not join them.

LEON Lambert, of Halifax, Que., general storekeeper, has compromised liabilities of a few thousand dollars at 75 cents in the dollar, ayable in 4, 8 and 12 months, secured.

THE annual report of the Western Union Telegraph Company shows a heavy falling off in profits during the last five years, while the mileage of wires under its control has nearly doubled. G. N. BRANANT, a well-disposed country merchant of ten or twelve years standing at Vaudreuil, Que., has compromised at 40 cents in the dollar, cash. Liabilities \$3,300; assets nominally \$2,100.

A CITY cigar firm named E. Shutan & Co. has obtained an extension of 3, 6, 9, and 12 months, on liabilities of about \$1,200, unsecured. Assets about \$1600. The law of capias was being invoked.

THE steamer Albert has returned to Halifax from Hudson's Bay. The commander, Captain Gordon, states that the straits are open to navigation for properly-equipped vessels for four months in the year.

HENRY EVANS, late High School treasurer, referred to last week, has eventually been arrested, charged with embezzling the missed \$2,000. Mr. Evans asserts his innocence, and gave bail to stand his trial.

AT Pittsburg gas continues to triumph over coul. At present over 1,500 dwelling-houses, 66 glass factories, 34 rolling mills, and 45 other industrial establishments are being supplied, and, as nearly as can be ascertained, from 8,000 to 10,000 tons of coal are daily displaced.

Mr. R. R. STRVENSON, for the last two years selling-agent of the Valleyfield Cotton Co., has recently accepted a similar position from the Stormont Cotton Co. of Cornwall and will henceforth represent both mills. Mr. Stevenson is the popular organist of St. George's Church, Montreal.

IT IS proposed in Spain to start a fleet of ships representing all maritime nations from the little port of Palos, in Spain, on Aug. 3, 1892, the four hundredth auniversary of the sailing of Columbus and to have the fleet sail to San Salvador over the route taken by the great discoverer.

MR. F. E. SCURRAH, of Acadia Mines, N.S., although not lacking ability, had evidently more irons in the fire than he could take care of. He ran a confectionery and bakery business, a hotel, etc., and at length ran away in despair of being able to make them pay.

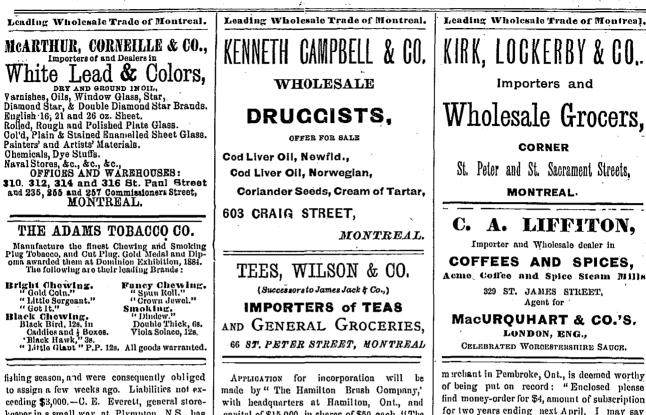

ELIJAH Kemp, dry goods dealer, does not appear to have mended matters by his recent removal from Sutton Junction to Waterloo, Que. Ilis assignment is accounted for by the unrealizable character of his assets, these being nominally \$2,000 in excess of his \$8,000 liabilities.

INCORPORATION will be applied for by "The Hamilton Coffee and Spice Company," with headquarters at Hamilton, Ont., and capital of \$25,000, in shares of \$50 each, and "The St. Thomas Market Company" with headquarters at St. Thomas, Ont., and capital of \$1,500, in shares of \$10 each.

Some men seem to think that the obligations of courtesy which they elsewhere respect as well as they are able, need not be regarded in their business intercourse. They imagine that it is business-like to be in a great hurry, to push, and crowd, and assert themselves, without reference to the rights of these about them.

A SINGULAR discovery concerning rice is mentioned in the *Planters' Gazette*. If the grain is cut just before it is fairly ripe, and is allowed to lie in heaps for a short time, a process of fermentation is set up, which is said to give the rice a delicious flavor. Further particulars on the subject are promised by the same journal.

MESSES. Crocker & Brooks, of Freeport, N.S., general dealers, have had rather a disastrous

keeper in a small way at Plympton, N.S., has assigned, showing liabilities of about \$900 and assets considerably less. THE Commercial Bank of Winnipeg, recently placed the sheriff in possession of the effects of

Wni. Stephenson, hardware merchant, in that city, on a secured claim for \$2,000. In July last he gave a bill of sale, and October brought judgment against him. His stock was estimated under \$5,000. Before his recent troubles he showed a margin of about \$2,500.

The Winnipeg Free Press in a recent issue says :- The Farmers' Union made their first shipment of new wheat to.day. They bought over 6,000 bushels yesterday, and offer 73 cents for No. 1 hard, and other grades in proportion The price before their advent here was only 65c for No. 1 hard, and their worst enemies admit that they always boom prices and can reach the top of the market for farmers' products.

R. A. ALLAN, general storekeeper, Glen Tay, Ont., has assigned. Liabilities \$2,000 to \$3,-000 .--- The stock of Bowman & Co., Barrie; Ont., was recently sold to Mr. Dutton at 67 cents in the dollar .- A. Miller, saddler, Hamilton, who bought out one Wood about two years ago, is reported off .- C. F. Risch, in the same line also at Hamilton, formerly of Montreal, has been sold out by bailiff.

J. S. BEAUDETTE, merchant of Tingwick, Que., who early last June obtained an extension of 4, 8 and 12 months on his statement of liabilities amounting to \$6,000 and nominal assets of \$16,000, has assigned. His troubles last summer were prepipitated by endorsement for a brother at the Hochelaga Bank and for Achille Gagnon, the unfortunate Arthabaska ianner,

capital of \$15,000, in shares of \$50 each. "The Cornwall Street Railway Company, headquarters in Cornwall, Ont., and capital of \$30,-000, in shares of \$10 each ; and "The Dethick Fire Escape Company of Ontario, Limited," with headquarters at Perth, Ont., and capital of \$20,000, in shares of \$50 each.

CHAS. MAGEE, grocer, this city, who recently assigned to A. M. Perkins, has effected a secured compromise at 31 cents in the dollar. payable the 8th prox. Mr. Perkins has been appointed curator to the estate of Mr. Jas. Stewart. At the creditors' meeting last Wednesday Messrs. John Macfarlane, W. W. L. Chipman and David Macfarlane were appointed inspectors.

A meeting of the creditors of W. E. Thompson, druggist, Mattawan, Ont., was held the 21st inst. at the Court house at Pembroke, when the insolvent made an offer of compromise at 25 cents in the dollar, which was not accepted. Liabilities \$2,600; assets about \$1,400, Experience four years .- A. Gow, sawmiller, Wallacetown, Ont., who sold out last spring, and assigned for the benefit of his creditors, is reported to have gone to the United States.

THE GIBSON cotton mill, Marysville, N.B., is reported to have orders on hand for two months. Every loom in the mill is now in operation. Machinery has just been put in for the manufacture of cotton bats. One hundred more spindles are about being put in, which will bring the number up to 375, and cotton-flannel machine, the second of the kind in Canada, will arrive from Germany shortly. It has been decided to light the mill by electricity.

AMONG many cheering letters received from time to time the following from a respectable

of being put on record ; "Enclosed please find money-order for \$4, amount of subscription for two years ending next April. I may say that the JOURNAL OF COMMERCE is the best of its kind I have ever seen, and is indispensable for any man in business." Such encouraging words tend to prove that our labor has not been in vain.

811

THE agricultural fall fairs of Manitoba have passed off successfully. At the Brandon exhibition excellent samples of grain were shown and a considerable improvement was noticeable in live stock, particularly in young animals. The weather has been fine. Fall ploughing will cease about the 7th prox. Large quantities of apples are arriving from Ontario and find a ready sale. The market was formerly supplied with apples from Ontario which are aid to have bee n leathery and poor.

AN EXCELLENT SIGN .--- Under this caption the Halifax Herald of the 14th inst. publishes the following despatch from Ottawa to the Evening Mail of that city : "The extent to which the manufacturers of the Maritime Provinces are making markets for their products in Canada may be judged by the fact that in yesterday's issue of the Montreal JOURNAL OF COMMERCE there are forty-seven advertisements of New Brunswick and Nova Scotia manufacturers. On examination I found that in the corresponding issue for 1878 there was not a single such advertisement in the Journal."

INCORPORATION will be applied for by "The Ontario Wire Fencing Company," with headquarters at Picton, Ont., and capital of \$150,000 in shares of \$100 each ; and "The Ningara Falls Steamboat Company" with headquarters-at Niagara Falls, Ont., and capital of \$25,000, in shares of \$100 each. It is proposed to operate a ferry for passengers and freight in the Niagara River below the fulls, and to huild an elevator

supposed that he lost no time in crossing over

the border. He was behind in his accounts

with the township some \$1,600, and with School

Section No. 2, of which he was also Treasurer,

about \$600. Apparently Messrs. Jonathan

Morden and John Frederick, Fraser's sureties,

are stuck for \$1,300, and Mr. R. Surerus, school

trustee, for the \$600. There are other losers

besides. The stock in Fraser's store has been

seized for rent, said to be due his mother. The

case is a very bad one, and the end is not yet.

wards a Sheriff's officer was in possession of the

goods. Mr. Falls began business on his own

account last March, with his son as cutter,

occupying part of the store of another firm. His

capital scarcely exceeded \$1000 ; his stock was

HEARN & Co., dry goods, Ingersoll, Ont., have

assigned to Wm. Ewart in trust. The firm

secured a partial extension in April last, show-

ing a surplus of about \$2,500. This has mean-

about \$3,000.

. WHAT is claimed to be the biggest timber limit sale ever held in Ottawa took place last Tuesday at the Russell House. Nearly all the leading lumbermen of the Ottawa valley were present. McCoshen & Fraser's Black River limit, 74 miles, and the Opeongo limit, 34 miles, were put under the hammer, for the purpose of winding up the affairs of the firm, McCoshen having died suddenly in Quebec a few weeks ago. Bidding began on the Black River limits at fifty thousand dollars, and in the space of

been in the habit of using Risteen's and Mar-

shall's names before, and shortly after the

alleged forgery they signed a paper to the

effect that they had authorized him to use their

Montreal.

fifteen minutes had increased to one hundred thousand. At one hundred and twenty thousand the limits were knocked down, but two parties claimed the bid. The sale was continued, and in a few minutes the sum advanced to \$159,600, at which figure the limits were knocked down to Mr. Hiram Robinson, for Hamilton Bros, of Hawksbury. The Opeongo limit was also purchased by Mr. Hiram Robinson for \$65,600. The prices obtained are considered high.

RECENT London commercial journals give an account of an invention of some interest to canners. This is a, so called, health tin plate for manufacturing cans. The patent, it is stated, consists chiefly in covering one side of the tin plate with a film or coating of papiermaché or prepared paper. This forms the inside of the can, and thus prevents contact between its contents and the metal. The London Grocer states that, after a number of experiments, it has been found that food preserved in

> names from time to time at the Union Bank in Annapolis. Last winter he was arraigned before Justice Harris, at Bridgetown, on a similar charge, and discharged, and afterwards tried before Justices Barteaux and Leavitt at Annapolis for two other charges, and, after a thorough investigation, was discharged. He was arrested not long since, under two executions, one being for the Marshall note, and tried before Commissioner G. T. Bobaker and F. Leavitt, for obtaining money under false pretences, and again discharged, when he was immediately re-arrested on the charge of forgery. He formerly did a big business at Port Lorne and borean exemplary character. He assigned about twelve months ago. Information was laid by Mr. Arnaud, agent of the bank.

known as A, B, C, D, E and F, according to the protection provided by each against fire. At the recent meeting a rule was laid down defining the standard necessary to place a town or village in one of the above divisions, commencing with "A," and describing the water-works, fire department, alarm, etc., required for such towns, then descending to B, C and D towns, and so on, until the lowest class(F) is reached, which last is entirely without appliances of any kind. A great deal of pains has been taken respecting these classifications, and as a standing committee has been appointed to decide on the various standards there is little doubt that even-handed justice will in future. be meted out to each and every town alike.

2. We have often advocated the principle of schedule rating, which is simply judging of each risk in its class according to its merits, giving an advantage in rate when a corresponding benefit is provided for substantial protection against fire. A minimum basis rate is to be fixed for the best mill or factory of its class built upon the most approved method of a certain height, and fitted up with special requirements, after which additions will be charged for every deficiency, and finally an allowance for fully-equipped automatic sprinklers. This is the plan pursued in the United States, and its fairness must recommend it to all honest insurers.

3. The foregoing, however, would have been incomplete without in some way guarding against the practice of underinsurance, for as a risk becomes perceptibly improved by the adoption of appliances as protection against fire, the tendency naturally is to reduce the amount of insurance, so that unless this evil is met and counteracted, the improvements in a risk, so far from being a benefit to the companies, are an absolute disadvantage, inasmuch as the said im provements are more than discounted by the reduced insurance and lower premium combined. The only counterbalance to this double reduction, so to speak is, as we have frequently pointed out, the co-insurance clause, partial or total, and we rejoice to find that at length the justice of our views is acknowledged,-for while it may be a small matter to introduce the three-quarters co-insurance clause into special bazards, we look upon this as the insertion of the small end of the wedge,-and that the day is not far dis tant when the equity of general co-insurance will be universally allowed and followed.

4. We are not surprised that the Association has boldly enunciated the doctrine that "a man cannot serve two

masters," and declared it to be impossible for an agent to represent fairly both a Tariff and a Non-tariff company. History is apt to be repeated, and "a house divided against itself " will as assuredly fall in the ninetcenth century as in the first. Old Colonel Newcome was level-headed when he struck his bamboo cane on the ground exclaiming, "those who are not with us are against us," and the Association has evidently been firm enough to grasp the situation. It was surely anomalous to suppose that a member of the Association could be permitted to assist in forming rules and rates, while at the same time he was building up an outside company by writing below these rates.

In conclusion, we may say that, considering the importance of the subjects brought forward and the manner in which those subjects were handled, the meeting at Ottawa was the most successful ever held by the Canadian Fire Underwriters' Association. The very fact of a deputation, consisting of the Mayor and President of the Board of Trade from Kingston, proceeding to Ottawa and requesting an audience proves that the association is becoming a power in the land, and also that the public may expect to be met on any question fairly and on sound business principles.

THE BANK RETURNS.

The statement of the banks for 30th September shows very few changes in the main items. As was to be expected at this season of the year, the circulation has increased, the improvement here being \$1,200,000; again in resources which is however offset by a decrease of Government deposits to about the same extent. On the other side of the account the loans to the Government have decreased about a million and a half, and net foreign balances at credit have increased over two million dollars. The only other item that has changed is the holding of Dominion Bonds, of which £100,000 were evidently acquired during the month.

The general impression has been that the business of the month has on the whole not been good, and the returns confirm this impression. It has come to be the recognized season for agricultural fairs, provincial and local, and these are so numerous and so fully attended by farmers and storekeepers, to say nothing of manufacturers and others having goods to exhibit, that we can easily believe business is for the time being materially decreased. But we are certain that their educational influences, the diffusion of a

knowledge of better things, of better cattle and other live stock, of better methods in the dairy and elsewhere, are full compensation for the temporary postponement of business transactions. Indeed these occasions, regarded merely as a holiday break in the routine of village and farm life, must have a great value from every point of view. As far as can be gathered from the press reports, the Exhibitions this fall have been marked with much success. There has not only been a great display of material wealth, of which the country has for many years had no lack, but progress in most departments is recorded.

The branch which is most backward, in Ontario at least, appears to be the manufacture of butter. Numerous references have been made to this, which we must find space to discuss at another time.

The reports for September indicate a continued dulness in one of our staples, the cheese trade. Notwithstanding the marked decrease in shipments in the preceding months, the British market showed no signs of improvement, and although during the current month prices have improved, sales are still very moderate in amount.

The harvest reports from the Northwest, since the crops have been gathered, confirm to some extent the forebodings of which we have heretofore made mention. It is believed that a moderate portion of the crop is ruined by the frost, and another portion somewhat damaged for export, while still suitable for manufacture into flour. The remainder of the crop is of very fine quality. We have heard these three grades or divisions estimated at one-third of the crop to each, but from the latest and best information we have been able to obtain we believe that this is exaggerated.

At some points in Ontario it has been found that the crops turned out better when threshed than was expected, and on the whole reports are encouraging. A good deal of grain is already moving to market, and business, especially in Western Ontario, is feeling the benefit. Barley was slow in moving this year, mainly owing to the fact that warm fall weather led the maltsters in the United States to delay starting their malt-houses. Our crop of that grain is not good, being poor in quality and especially in color. It is however now going forward rapidly and bringing fair prices.

A very general deficiency in the potato crop is likely to lead to higher prices for that important article of food; hay commands a good price, but the yield is com-

paratively light, especially in this province.

We learn that an important financial operation connected with railroad extension in Manitoba was carried out last month. During the last session of the Provincial Legislature in that Province an issue of bonds to assist in the extension of certain railways within the province was authorized, on the security of a portion of the land grants of the roads. The Manitoba and Northwestern Railway, an enterprise fostered mainly by Montreal capitalists, and the Manitoba and Southwestern, forming part of the Canadian Pacific system, availed themselves of the subsidy, and bonds amounting to over a million dollars have been issued fall of which were placed with Messrs. Osler & Hammond of Toronto at a good price. There can be no doubt that the extension of these branch railways is the most potent colonization agency the province could employ, and we look for great results. The roads in question open up lands in the best parts of the province, and will bring them within easy reach of a market.

We append our usual abstract of the Returns with those for last month, last years and ten years ago. A careful comparison will confirm all we said as to the general increase in wealth in our last article on this subject :---

BREAD-MAKING.

They make good flour in Minneapolis, yet no better than is usually produced from Manitoba wheat; but they bake it better than we do in Montreal. One of these ubiquitous reporters recently paid a visit to a large bakery in that city and described what he saw. We shall give the substance of his remarks, omitting the painful attempts at wit so frequently introduced.

The process of bread-making, from the setting of the sponge to the time it goes into the oven, shows that the occupation is one which demands a good amount of muscle and nimbleness. A trough full of dough under the influence of "a little leaven" shows no more inclination to wait for a man's convenience than do time, tide, or the tailor. The sponge for bread or rolls is made in one end of a stationary wooden trough about three feet wide by the same depth, and from fifteen to twenty feet long. Another sponge is probably setting in the other end, and the space between is conveniently dammed with flour. Either the compressed yeast (bought in five-pound packages) or a liquid yeast made by the firm, is used as leaven. Sometimes the two are combined. There is very little machine work about bread-making. After it has "proved" or risen, two able-bodied men go to the bottoni and haul the lower stratum to the surface, and agitate the mass for fifteen or twenty minutes Because of the depth of the trough and the mass of dough usually sufficient for 200 or 300 loaves, and the dispatch with which the work 'must'be done to get it out of the way before another batch comes on, the process does not appear in the light of a recreation. The bread is left in the trough to rise after this kneading. It lies there perhaps an hour and a half, and is then lifted out upon a floured table and tackled by four men. The first cuts off a lump of dough about as large as his two hands. The second lays it on a small pair of scales and pinches off a bit or adds a morsel, so as to make the "pound nominated in the bond." A single addition or subtraction makes it right five times in six, and the operation does not take two seconds. A man stands on each side of the table beyond him, and, seizing a pound of dough in each hand, rolls them down with quick deft motions. Then the balls are placed regularly upon the farther end of the table, where they stand fifteen or twenty minutes before they are worked out in the oblong, pointed shape in which most loaves, especially the Vienna, appear. The loaves, having now attained their final form, are placed in tins and encouraged to rise by a coating of egg and sugar, which excludes the air and imprisons the gas. Then they are placed on a longhandled wooden shovel and slid into an oven which has an area of probably 400 feet, and a temperature far above that to be attained in the ordinary range oven.

In mixing they keep adding flour and water until the dough is of the right consistency. The temperature of the oven is also experimental. The time of rising depends on the temperature of the room. " There is," says the baker interviewed, "no such time as baking by an exact rule, any more than there is about bringing up a family." The Vienna bread is mixed with sweet milk instead of water, and that is all the difference. We use a pound of compressed yeast to 150 of flour in setting the sponge. A great deal, of course, depends on the yeast. If that is not first-class you may as well 'throw up the sponge ' at once."

In making rolls the dough is placed in a steam box and made to rise twice as fast. The rolls are not weighed, but guessed at. A man makes one in each hand, and he picks a piece off one and adds it to the other to get them of about equal size. Boston brown bread is baked in pails for 2½ hours. It has corn, graham, and rye flour in it. Rye-bread is raised with a little salt—no yeast. Vienna and rye loaves are raised in cloths without pans and are baked "right on the bottom of the oven."

CRACKERS.

Cracker-making is a more mechanical and less free-hand process than breadmaking. Winter wheat is used exclusively : "Crackers made from spring wheat are tough and springy. The cracker sponge is set over night in an immense trough, and is worked the next morning through a patent screw mixer. The dough comes out in round columns about a foot through, and is dumped back two or-three times until it is well kneaded. Then it is sent down through a chute in the floor to the platform, from which it is fed in sections to three rollers, one after another. The piece is passed under each one several times, and the rollers are so graded that the dough gradually thins and lengthens out as it proceeds. It finally passes into what is called the "form," which determines the width of the strip of dough. This strip is then started upon a canvas revolving belt, over which is a large revolving bush, which constantly dusts flour upon it. Two or three feet further on the dough comes under the stamp, operated also by machinery, and the crackers are given any one of the dozens of shapes know, to the trade and families. If it is the usual square soda cracker,

there will be five in a row, and the strin. of course, is endless as long as the dough holds out. As they emerge from under the stamp, a boy stands ready with a sort of very thin wooden shovel without raised edges and with a handle several feet long, and with this instrument.called a peel, he takes off a section about three feet long, which he dexterously flirts with a twist of the wrist into the oven, or rather upon one of the immense revolving iron shelves which are contained in the oven. These shelves are about three feet wide and fifteen feet long, and one revolution serves to bake the crackers a delicate brown As they come up done, another boy stands with a rake and hauls them unceremoniously into large baskets. in which they are transferred by elevator to the third floor for packing. When only partially cooled they are but away by girls into barrels and boxes, neatly lined with white paper, and are left uncovered until thoroughly cooled and dried. While still warm they have a toughness which makes it possible to handle them in a way that would them into bits break when cold, In getting a perfect edge on the outside rows of crackers a strip about three quarters of an inch wide is incidentally sacrificed on each side, and this, thrown back into the general mass of dough, is supposed to greatly improve it. The batch must consequently improve from first to last, as the amount of scraps keeps climbing up towards a majority. Cracker dust is another branch of the manufacture. Any crackers that have been broken in handling or packing are ground fine and sold, principally to hotels and restaurants, for breading meats, oysters, soups, etc. All the flour sweepings are sold to farmers for cattle feed, so there is little actual waste any where about the establishment.

THE FRASER INSTITUTE.

On Thursday evening of last week a select gathering of men interested in education, literature and science met in the new rooms of the Fraser Institute for the purpose of opening, in an informal way, the Library connected therewith. The Hon. Mr. Abbott, president of the association, occupied the chair, and had with him on the platform Judge Torrance, Thomas Workman, Esq., and other directors, also Mayor Beaugrand, Sir William Dawson, Judge Mackay, and other gentlemen.

Mr. Abbott's inaugural address has been reported fully in the daily journals, and we cannot find space for even a brief resume; suffice it to say, that after fifteen years of litigation and labor, during which time the value of the estate which Hugh Fraser bequeathed in trust to Mr. Abbott and Judge Torrance has been much impaired by the vicissitudes which have overtaken many securities and investments, the directors are at last able to open in a modest way to the public the plain but well-ventilated, well-lighted and comfortable rooms in the building bought from the High school Board. So far the use of the Library is limited to readers within the premises, but before long it is hoped that it may become a circulating library, free to every resident of Montreal.

The object of the Institute is not merely to provide a library, but also an Art gallery, as a nucleus for which a large collection of valuable paintings has already been presented by Judge and Mrs. Mackay, which only await a suitable place of habitation to be transferred to the care of the Institute. A lecture room with the delivery of lectures on various subjects. is also we believe one of the objects in view. This is a great desideratum in Montreal, where such means of education and culture are conspicuously rare. When it is gained we shall hope to see established, under the auspices of the Board. lectures on commercial and financial questions, banking and commercial law, and other similar subjects. The value of these in proper hands, is beyond question. and a common centre like the Fraser Institute, open to all, without respect to race or creed, should form a valuable rallying point for those interested in the acquisition or dissemination of knowledge. It these loyally combine to support and strengthen the institute it will become great power for good amongst us.

The Board of Governors, under the indefatigable leading of Mr. Abbott, may be relied on to carry on the work now fairly begun until they have accomplished the wishes of the founder.

Much more money is needed, and indeed its growth and usefulness dependon the means placed in the directors hands; but the merchants and others concerned in the progress and welfare of the city may, we are sure, be confidently looked to for the necessary help.

We cannot close this brief notice without saying that the community is greatly indebted to Mr. Abbott for his untiring efforts in defending his trust before the Courts through all these years, efforts which it is no secret were bestowed without fee or reward.

OLIVE CULTURE.

Very few people have any idea of the extenand importance of this industry, especially in the South of Europe. The use of olive oil for culinary purposes and as food, is well known to be general among the Southern nations, with whom it takes the place filled in England by butter and lard. There is a certain amount of olive oil produced in the United States, but the facts and figures given in a recent report by the American Consul at Leghorn bring out the im portance of the culture in Europe, and many of them are worth repeating for our readers.

He states that the estimated extent of land in Italy devoted wholly or partially to the olive tree is over 2,000,000 acres, the produce of which in a good year is 75,000,000 gallons of oil. Spain comes next in importance with 25,-000,000 gallons, and France, including Algeria raises about 2,000,000 gallons.

Notwithstanding that the export from Italy is only one-fourth to one-third of the production, a large amount of cotton-seed oil is imported from the United States and used for adulteration. It is reassuring to learn that a comparatively small amount of adulterated oil is exported, and that the choicer oils are never tampered with. The flavor is in any case destroyed by such a mixture, and therefore only the inferior olive oil is adulterated.

About one-half of the product of Italy is fit only for soap-making and similar purposes. The districts that produce the finest oils for the the table are Tuscany, Bari, and the Riviera, of which Tuscany is facile princeps ; the oil grown there is not excelled anywhere. It is known in the market as Lucca oil, although produced in other districts adjoining that locality. The primest oil is obtained from thoroughly ripe fruit, on the first pressure, washed out with cold water. A second pressure, with hot water to assist the process, produces an oil of inferior quality, and after that a third and fourth quality is secured, unfit for culinary purposes. The finest oil is very susceptible of taint, and may easily lose its flavor if brought into contact with foul utensils or impure water, and once tainted can never be restored.

On the vexed question of Italian versus French oil, the consul pronounces for Italy. His opinion may be biassed by his residence in Leghorn, but he shows that the French exporting market is supplied mainly from Italy, the native production being quite insufficient to supply the local consumption. He concludes that, by dealing with firms of high standing in the trade in Tuscany, absolutely pure oil of the finest quality may be obtained, and that "those " who have banished olive oil from their tables " cause their experience has been that it is " rancid and unsavory, will come to a very " different opinion should they procure a really " first-rate brand of Lucca oil."

During the first six months of this year 24,-000,000 pounds of green fruit were shipped from Ualifornia, as against 12,000,000 pounds during the whole year of 1884.

NEW SOUTH WALES LOAN.— A loan of £5, 500,000 sterling of this colony, bearing 34 per cent interest, was placed in London about a fortnight ago, and, notwithstanding the abundance of money seeking investment, the price realized was only £91 13s 5d per cent, almost exactly 2 per cent less than the loan issued by the same colony was taken at last year. As some invidious comparisons were then made between the prices realized by New South Wales and Canada for similar loans, it may be well to remind our readers that events proved that the New South Wales loan last year was largely taken by banks and others interested in the Colony, acting in concert with the colonial authorities, and was really placed on the market only after many months' labor and effort. As to the present loan the Economist says : -- " What makes the loss in borrowing power more marked is the fact that the present time is distinctly more favorable for borrowing than was the case a year ago. Moreover there is every reason to believe that although the tenders for the present loan amounted to over twelve millions, yet the amount taken by the public is not more than one-half, or perhaps one-third, of the amount offered. The amount tendered for is no criterion of the comparative success of a loan, since in such a case as the present the intermediaries who have taken the bulk of the stock apply at low prices for a great deal more than they ever expect to get. It will be well for the New South Wales Gov-crament to observe the effect of their recent heavy borrowing on the prices of their loans.". We may add that Canadian Government securitics have been affected somewhat by the low price obtained for this issue.

THE ENGLISH POST OFFICE.-The report of the Postmaster General for the year ending 31st March last has been published, and affords the usual interesting information. Every department of the business shows more or less increase, the most marked being in the number of parcels carried, which were 11.3 per cent. more than in 1884-85. The increase in the total number of articles carried was 3.8 per cent. The total figures do not convey much information, but the average number for each person in the United Kingdom is striking; 37.8 letters, 4.5 postcards, 8.9 book-packets or circulars and 4 newspapers-making in all 55.6 articles for each person. Thirty years ago the average number was 15. The parcel-post system has grown to large dimensions, nearly 23,000,000 packages having been handled, at an average charge of 5 1-3 pence each., of which the railroads received £256,000 and the department £251,613. In the Savings Bank branch of the department a considerable increase is also observable. The year closes on 31st December, at which date the balance due to 3,333,000 depositors was £44,700,000, an increase of £3,004,000 during the year. In the telegraphic branch the increase has only been slight. On 1st October the new rate for Inland telegrams came into force, sixpence for 12 words or less, and one half-penny per word afterwards, all addresses being charged for. Some alterations have been made in the mode of counting, double names of towns and villag being taken as one word, and a very sensible change has been made as to figures, five of which are to be charged as one word.

The preliminary report of the Ensilage Commission is published in our English Exchanges. We shall refer to it again when fuller details reach us, but some of the conclusions of the commisioners may be noted. They are of opinion that the evidence has established that a nourishing and useful food for animals can be preserved, independently of any drying process, within wide lines of divergence in the details of the methods employed. The degree to which chemical changes increase or diminish the feeding value of the silage, or its relative value to the green crop, is yet a matter of opinion, and the question can only be solved after careful and continued experiment. The experience of dairy farmers shows that the feeding of milch cows with well-made silage improves the milk and cream and quality of butter. The commissioners finally report that they have already heard sufficient evidence to justify them in encouraging the development of the system, as a valuable auxiliary in farm practice. Its economy, through the saving of huy and other crops in unfavorable weather, and the possibility of growing some crops not now raised in the country--notably some varieties of maize--they regard as important elements in the question.

THE ENGLISH BOARD OF TRADE RETURNS FOR September are at hand, and confirm the cabled. figures which we gave last week. The falling off in exports is mainly in the two items of yarns and textiles (£680,000) and metals and machinery (£710,000). In imports, food products show a reduction of £1,520,000. As far as Canadian trade is concerned we are glad to note that the cattle imports from this side maintain their previous level. For September the number entered was 10,088, valued at £205, 559, against 10,261 in 1884, valued at £218,317. The imports from the United States show a falling off, they were for the month 9,325 animal valued at £216,146. In butter and butterino the total imports show a falling off to the extent of 45,000 cwt.; cheese, notwithstanding an increase in quantity of 20,000 packages, shows a decrease in value of £70,000. On the whole, the figures of the returns are considered unfavorable and discouraging.

The money market in England is reported still casier than at our last writing. The accumulation of idle capital continues, and rates are very little beyond 1 per cent for three months bankers bills. How long this state of affairs may continue it is impossible to say, but it is evident that lenders at that rato are running a risk of finding rates suddenly rise. The possibility of withdrawals of gold for shipment to the United States is now remote, but the war-cloud in Roumelia and the East may burst at any moment. The effect of such an event would be felt in every part of the civilized world.

We recently mentioned the course adopted by the Royal Commission on the Depression of Trade and Industry for the purpose of obtaining information, and expressed the opinion that they could scarcely hope for success. We learn from an exchange that this proves to be the case. The questions asked are of so controversial a character that few replies have been received, and the composition of the commission is still regarded as unsatisfactory. It is to be hoped greater success will be achieved as the commission settles down to the work.

AN IMPORTANT WORK.—The writings and speeches of Samuel J. Tilden, recently published in two octavo volumes by Harper Bros., are commanding a ready sale in the United States, being of peculiar interest at a time when the Democratic party has been restored to power after an exclusion of a guarter of a

818 /

century. The 1200 pages of which the volumes are composed are in a great measure a history of the Democratic party, extending over the whole period from Andrew Jackson's time to the present day, and the work will probably prove a text-book for those who wish to study the political doctrine of that party. The work has been edited and compiled by the Hon. John Bigelow, the biographer of Franklin, who is eminently fitted for the task, as well by his close personal relations with Mr. Tilden as by his thorough acquaintance with American political. affairs. The valuable services of Samuel J. Tilden in bringing about the impeachment of Tweed and his followers in New York, his administration as governor of that State, and nomination and candidacy for president invest him with a national reputation. The work should possess some interest for Canadians. For sale by Dawson Bros., Montreal.

BOYCOTTING .- In the course of a decision recently pronounced in the U.S. Circuit Court at Jefferson, Mo., the judge said, in addressing the grand jury: A system and name, foreign to our institutions and language, known as "boy-cotting," has sought to be introduced among us as a means of inducing or compelling con cessions in matters of conflicting interests. Combinations of the kind are not unlawful, so long as their exclusive purpose is to foster the interest of its own members. But if the object of the combination is, or embraces objects the necessary effect of which is, the interfering with other's right, the combination becomes a conspiracy, and may be dealt with as such. Lord Coleridge and Chief Justice Fry, in a late case, declared this to be the law of England, holding that boycotting, as above defined, is action-able and indictable. The courts of the United States have no common law jurisdiction, but there is a statute which is applicable to the matter.

Sterling Exchange pursues a course that perplexes bankers, who have been counting on bottom rates about this time. Either the supply of bills is short, or bankers have too generally overaold in expectation of the profit in covering; in any case rates pursue a most erratic course, and persistently edge away from the gold-importing point. No doubt both causes are at work. Grain cannot be shipped at present prices, while cotton, which usually fills the market with bills at this senson, is going forward less freely and bringing less money. The bills against present shipments, too, are believed to have been sold ahead to a much greater extent than usual.

The crop reports from the Agricultural Department at Washington indicate a heavy crop in almost every line. In corn the unprecedented yield of 2,000,000,000 bushels is estimated, which should make pork cheap for the next year or two. Of wheat the yield although not up to the level of previous years is beyond the requirements of the home markets, and leaves a considerable surplus for export. If the threatened war in the East proves more than a threat, large shipments of food products may be looked for.

The news from New York this week indicate a stendy continuance of the increased demand or money and consequent shrinkage of the surplus in the associated banks. Rates for call money are slightly better, but the strongest indication is perhaps the fact that borrowers who have put off their business till late in the day have been made to pay 3 and even 4 per cent. This is of course merely till the next day, but nevertheless it is an indication of a closer market.

This month will, we hope, see the completion of the Canadian Pacific Railway. In the South another Pacific line, the California Southern, is also rapidly approaching completion. This new route debouches on the Pacific Ocean at San Diego, several hundred miles south of San Francisco, and is mainly valuable as opening up a competing route with the Union Pacific.

The Ontario authorities are beginning to adopt energetic measures to prevent the spread of hog cholera. The Government inspector for the county of Essex reports that more than fifteen hundred swine have perished since the discuse first appeared, and he has quarantined no less than 121 farms in the infected district. Despite all precautions the disease has recently appeared in East Sandwich. In Brant county the inspector there has ordered fifty of the infected swine to be killed, and he is now in communication with the, Dominion and Provincial authorities in regard to compensation. The probabilities are that fully two-thirds of their value will be allowed on diseased animals killed by order of the various inspectors. The disease is also said to exist in Oxford county. It is asserted that it originated at Princeton station, on the Great Western railway, as a consequence of the cleansing of some cars occupied by infected animals from the Western States. Attention may here be directed to the fact that farmers neglecting to give information of the existence of the discase, or attempting to conceal its appearance in any way, are liable to a penalty of \$200, and are not entitled to governmental compensation. The plague is much worse in the United States, and is spreading rapidly in Iowa, Kansas and Nebraska, there being scarcely a county in those States in which it has not obtained a foothold. Dr. Holcomb in the Kansas Farmer says :- Between thirty and forty counties in the State of Kansas are now infected with hog cholera. The discase is rapidly spreading, causing the daily loss of thousands of valuable swine. Some counties have already lost as much as forty thousand dollars from this cause. An impression has gone abroad among the farmers and swineraisers of the State that this is not cholera, but some new and fatal disease.

BREAD.—An Ottawa subscriber, referring to the prices of bread given in the article of last issue under head of "Montreal Misrepresented," thinks there is room here for more bakers. Bakers have usually done well in Montreal. Two brothers from an American city who began a bakery in a small way scarcely two years ago, have done remarkably well; they moved recently into one of the best stands in the city. Montreal bread is dear and, with raro oxceptions, of inferior quality. THE COAL QUESTION. — On the 26th of September, 1884, the Philadelphia Record surprised the coal trade by doclaring that it proposed to reduce the retail price of coal. Philadelphinas had been paying more than the consumers of any other city in the East for coal, though they were the nearest to the coal beds. In fact, that city is so close to themines that coal can be brought there on a down grade all the way, at a cost of less than twenty cents per ton for moving the wheels, though the railroad companies were demanding \$1.80 for toll. On the day mentioned it announced that it would take orders for the best **C**rd white ash Lebigh coal in lots of one ton or more at \$5.75, a break of seventy-five cents from the then ruling price. The movement was attended with great success, and in less than thirty days 12,558 tons had been sold, and \$72,493 had been paid for the fuel. On April 7, 1885, the price was lowered to \$5.50 per ton, and on June 1, 1885, to \$5 per ton, so that within the year *The Record* has broken the retail price of coal from \$6.50 to \$5, and has forced other dealers to that figure, thereby securing a saving of \$1.50 per ton on 1,100,000 tons of family coal consumed annually in Philadelphia —a total saving of \$1,650,000.

SupplyG STATISTICS .- The following ligures show the number and tonnage of vessels arriving at this port during the month of September, and from the opening of navigation to the 1st of October. During the month of September there were 72 steamships of 93,397 tons, and 34 sailing vessels of 12,724 tons, a total of 106 vessels of 106,121 tons ; and during September, 1884, there were 75 steamships of 100,191 tons and 18 sailing vessels of 7,344 tons, a total of 93 vessels, representing 107,535 tons. This shows an increase for September, 1885, of 13 shows in increase for September, 1833, 01 13 vessels, but a decrease in tonnage of 1,414 tons. From the opening of navigation to October 1st there were 350 steamships of 491,724 tons, and 142 sailing vessels of 55,099 tons, making in all 492 vessels of 546, 823 tons, and for the corresponding time last year there were 363 steamships of 472,525 tons, and 139 sailing vessels of 52,147 tons, a total of 502 vessels of 525, 172 tons. The comparison shows a decrease of 10 vessels from last year, but an increase of 21,651 tons, in favor of the current year.

A bee-keeper's association has been organized at Winnipeg, with Chief Justice Wallbridge as president; Mr. Vaughan, of Selkirk, re ported that his bees had swarmed no less than seven times. Mr. Campbell had wintered his bees, notwithstanding the excessively severe weather of last winter, most satisfactorily, and had them in better condition in the spring than he ever had in his life. The Chief Justice explained that the secret of successful wintering was to have plenty of porous material above to absorb the perspiration, which other-wise condenses and falls down again on top of the bees, thereby leading to disease and the eventual destruction of the colony. He also from below. A movement is on foot for the formation of a bee-keeper's association for the Eastern Townships, and for that purpose a meeting of all interested in apiculture will be held at the Ottawa hotel, Cowansvile, on the 20th inst.

THE QUARTER'S FAILURES.—The mercantile failures in the Unites States for the quarter ending 30th ult, as reported by the Mercantilo Agency, number 2, 173, against 2,246 in the corresponding quarter of 1884. The liabilities show a remarkable decline, amounting to \$23,-

819

800,000, against \$56,600,000 in the third quarter of 1884. For the nine months last past the failures showed a slight increase in number over those of last year, but a very marked decline in liabilities, being in number 8,167, compared with 7,856 for the first nine months of 1884, an increase of 311. The liabilities, however, were only \$97,000,000, compared with \$181,000,000 in the first nine months of 1884. The failures throughout Ganada for the quarter ending September 30 were 254, compared with 228 for the corresponding quarter of 1884. The liabilities are \$1,911,000 while the liabilities for the corresponding quarter of 1884 were \$4,112, 000 , for the first nine months of 1885 the total failfies number 944, compared with 979 for the first nine months of 1884. The liabilities amount to a trifle over \$7,000,000, while in 1884, for the first nine months, the liabilities amounted to \$14,855,000.

REPRESENTATIVES of the commercial travellers associations of Montreal, Toronto and London had a conference with the general passenger agents of the Grand Trunk and Canadian Pacific Railway in this city a few days ago, with regard to a proposal to extend to the various boards of trade the same privileges as are given by the railways to the commercial travellers associations. It appears that the president of the Toronto Board of Trade had written to the railway officials on the subject, but not in his official capacity, as the matter was never laid by him before the council of the board. The conference did not arrive at any decision, but seems to have been adverse to the project. Mr. Darling, it is understood, will now bring the question before the Toronto board. It was decided to continue all former privileges to the travellers' associations for another year.

Tus Alaska Fur Company paid the United State Government \$300,000 twenty years ago for a ninety-nine year franchise to sell all the scals taken in the country. For the first six years the company was nearly bankrupted. They caught the seals and sold the furs at \$3 each. Now they bring \$40. The company's revenue now they bring \$40. The company's revenue now amounts to millions a year, but none of the furs are sold on this continent. They all go to London to be dyed. The original color is steel gray in the centre, with an amber undergrowth and blended out towards the sides into a yellowish amber. Martin, of London, is the only man in the world who thoroughly understands dyeing them. No one has ever been able to discover the proper mixture of chemicals. Scientists have analyzed the contents of the drains and sewers which run from his place, but without success. A baby seal undyed is worth \$6 A full-sized seal undyed is worth \$30. The average of a scalskin sacque is eight years.

THE growth of the traffic between Lake Superior and the lower lakes as shown by statistics published in the Detroit *Post* has been somewhat extraordinary. More freight passed through the Sault Ste. Marie canal in September than in any previous month in its history, and exceeded that which went through the Suez canal in the same period by 30,000 tons. During the month, 574 steamboats, 309 sailing vessels, and 29 rafts and unregistered craft passed through the new locks, the registered tonnage being 531,689 tons, and the freight tonnage 553,811 tons. Of the 720 hours in the month, 505 were occupied in locking, The locking incilities of the canal, it is thought, will have to be increased.

MEN of all nations are fruitful in devices to defraud life insurance companies. A claim was made in France on the policy of a Parisian ingured with La Metropole for 10,000 frances. His widow was named as the beneficiary. The policy was taken out in August, 1882, and matured by death the following December. The company was sued for the amount and satisfactorily proved that for several years the insured had been a confirmed cripple, and could only move with the ail of cruches. As the insured was accepted as a sound risk, the inference was that he was impersonated by an associate in the fraud, and the court consequently annulled the policy. E_Z .

Cotton manufacturing is making steady progress in India. The first cotton spinning mill was established at Bombay as late as 1875. Weaving was shortly added to spinning; and as other mills sprang up a considerable export trade was added to the home consumption. By the year 1882-3 the number of mills had grown to 62, the majority of them being situated in the Bombay Presidency. Capital to the amount of \$4,500,000 was invested in them. At Calcuta there were 20 jute mills in 1883. There are 54 coal mines in operation, which in 1882 produced 1,130,000 tons. These industries give employment to large numbers of the unaive population.

An exhibition will be opened in Liverpool next May the object of which will be to illustrate on a grand scale the history and evolution of travelling by land, sea and air. In the department of sea travel will be shown models of ships and boats of all ages and countries, models of docks, harbors, light-houses, lifesaving apparatus, etc. The department of land travel will contain chariots, coaches and carriages of all times, and there will be illustrated the history of the development of steam as a motive power. The Prince of Wales is the President of the Board of Exhibitors.

It is thought that the rush to the gold fields at Granite Creek, British Golumbia, will probably equal that of '58 to the then newly-discovered mines of the Province. It was only in June last that two prospectors came across the first indications of the precious metal, and there are already over a thousand men at work in the district, half of them Chinese, and the inpour of fortune seekers still continues. Extraordinary tales are told of the richness of the inds. This is the way to settle a new country when it has anything worth settling on.

GURLEH Mercury : A number of gentlemen in Orangeville have taken up the project of establishing a factory for the manufacture of agricultural implements in that town, with a capital stock of \$50,000, in shares of \$100 each. A gentleman in London has offered to take \$6,000 worth of stock. He is a practical man of twenty years' experience, and believes that such an undertaking will pay.—It is reported that the Dominion Bank purposes establishing a branch in St. Thomas, and will erect a \$20, 000 bank building there.

A MACHINE has just been patented which will revolutionize the chair trade. It is a loom for weaving cane seats. An expert manual operator can cane a seat fourteen by ten inches in one hour and forty minutes. The now new loom will do the some work in thirty-five minutes. In hand work a large item of expenso is the waste of cane, while with machinery every inch is utilized, $-E_{x_i}$ A CONVENTION of shippers and vessel owners has been in session at Ishpening, Mich., which resulted in a permanent organization being effected, the object of which will be to secure improvements in Lake Superior waterways. The convention decided that the Ste. Marie ship canal required a depth of 25 feet and the lake channel also needed improvement. The leaders were of opinion that the Ste. Marie canal should be attended to first, and the Portage lake ship canal next.

The semi-annual meeting of the shareholders of the Dominion Leather Board Co. was held recently at the offices in this city, when the statement, which was of a most satisfactory nature, was submitted and adopted.

THE Montreal agent of a fire company, the Canadian business of which has been disproportionate to its own merits, is reported behind in his accounts. It would seem to run in the family.—Gilbert Coderre, hoot and shoe manufacturer this city, has assigned, with liabilities of \$9,000.

The annual meeting of the Ottawa, Waddington and New York Railway Company was held recently in Ottawa when Dr. Hickey, M.P., Morrisburg, was elected president and Charles Odell, C.E., Montreal, vice-president. It was stated at this meeting that the people at Waddington and Canton had agreed to be responsible for the survey from Gooseneck Island, where the company's bridge crosses the St. Lawrence, through Waddington to Canton, and would also pay for the right of way the whole distance and for station grounds. One of the directors reported `that he had been in correspondence with several parties lately, some of whom wished to know the price at which the bonds of the company on the railway could be had, the bonus of \$3,200 per mile to be placed in trust to meet the interest on the bonds, which it would pay for four years, long before which it was thought the railway would be able to pay well. Others again had made pro-positions on the basis of receiving the bonus, and a certain amount of stock and bonds for which they would build the railway and bridges. It was, however, thought advisable to wait for a short time the movements of a company for a short time the movements of a company formed of railway men and bankers and brokers who propose building a railway from Schenectady to the St. Lawrence, availing themselves of the New York Central to Sche-nectady, thence over the St. Lawrence bridges and the Ottawa and Waddington to Ottawa, from Ottawa over the C. P. R. to Soult Sie from Ottawa over the C. P. R. to Sault Sie Marie, and thence by lines of railway, 910 miles Marie, and inence by mes of railway, 910 miles long connecting with St. Paul, Minneapolis and other western eities, shortening the line from these cities over the C. P. R: and Ottawa and Waddington to New York 150 miles, and to Liverpool, via Montreal, over 700 miles.

"Twas in Detroit, says the Free Press:--He drifted into a sample saloon the other day, wiped his forehead, felt around in his pocket, and said, with a pleasant smile.--" Well, as it seems I have just one 10-cent piece left to-day, I'll take a drink."--When the four fingers of Antioch nerve tangler had been secreted in his remotest recesses; the customer fumbled among his koys and laid someting on the counter. As he did so he said :--" Great Scot! just look at that !"--" I see it," said the barkeeper, scornfully regarding the alleged dime. "It's a suspender button. What of it ?"-"" Why, I didn't look at it, you know. I just felt in my pocket, and I'm blamed if I didn't think it was a dime. Ahem! I suppose you'll have to put it on ice until to-morrow. I'll drop in and fix it. "-" Oh, of course you will, Take this and fix it now." And the cocktail dispenser handed over a needle and thered.-" What's that for ?"-" Why, for you to sew that button on with, right now. You may make the same mistake somewhere else; sew her on strong."

COMBINATION OF TIN-PLATE MFRS.-At Swan-sea the most isuccessful meeting ever held in connection with the tin-plate trade has taken place, Mr. James Spence, the president, in the chair, no fewer than fifty-two works being represented. The president said he had not heard a single case of infraction or evasion of the existing agreement to restrict the make of tin-plates, and he believed it had been faith-fully carried out by all. He then replied to the various arguments put forth by those who opposed the movement, and add that there were now in operation in Wales and Gloucestershire seventy-nine works, having 367 mills, so that, with the very important addition of that day they had now seventy-live works and 354 mills in the combination, leaving but the trivial minority of four works having 13 mills outside minority of four works having 13 mills outside of it. Messrs. Rogers, Thomas, Tregoning, T. D. Daniel, T. Ohivers, G. B. Strick, D. W. Williams and others addressed the meeting, after which the following resolution was unanimously passed :-----That whereas the present agreement will terminate on the 31st December, it is now decided that it be con-tioned from 31st December to the 30th June tinued from 31st December to the 30th June next, on the basis of stopping one week in six during the additional half year ending June 30th, 1885." On the motion of Mr. Rogers, it was decided that a contribution of £2 per mill be made for the purpose of presenting a testimonial to Mr. Spence as a mark of their appreciation of his unwearied efforts to bring about unity of action and rally the trade out of the depression into which it had fallen.

Correspondence.

FIRE INSURANCE TARIFF.

To the Editor of the JOURNAL OF COMMERCE. DEAR SIR,-Let me thank "Equity" for his compliment: I cannot however, take any credit to myself, I have merely expressed what

I have observed. My, error, if any, in under-estimating the value of the figures given in the Insurance Blue Book has yet to be proved. The subject is important enough to merit study, and, if time is given and your patience and valuable space hold out, I will try to justify the opinion I expressed in my first letter, but I must point here to the concession which Equity makes to what will be a part of my argument on this subject, when he says "That the natural increase in insurable values in 1884 is larger than the increase in insured values."

The Blue Book deals with insured values only, and if an inequitable tariff is really widening the difference between the two the difficulty of accounting for the increase in insured values, as shown by the Blue Book, is augmented. But be that as it may, the truth will be discovered when the subject is dealt with; meanwhile I return to the one in hand.

Your view, plainly stated, is that the failures met with in the business of Fire Insurance result from the mismanagement of Fire Underwriters; I, on the other hand, am of opinion that insurance managers accomplish all that can be expected, and that the troubles to which fire

insurance is exposed arise from causes beyond their control.

I have stated the range and pliancy of the present tariff, and shown it to be wide enough to meet every occurring circumstance and case, and, having done so, I do not think I have avoided the main issue as stated.

The tariff is sufficiently pliable to be made to yield to all reasonable requirements ; but what is wanted is concession without prudence, abandonment of the right of judgment in the interest of insurance capital, the emasculation of the tariff, and its final overthrow. This is what is really wanted ; and the ignoraut who think that insurers have no rights to maintain against the insured, and the half friends of insurance interests and the eccentric among the fraternity who have hobbies to ride, become oracles, and gain popularity for their criticisms of insurance management among those who regard the tariff as an infringement of human rights ; but, fortunately, the people that Equity speaks about are not only becoming aware of their interest in systems of insurance rating, they are becoming aware also of their interest in solvent insurance companies and in the practical economy of their management. They know that there is no business or profession which is not open to criticism, none which are absolutely free from friction, and they will have more confidence in the deliberative and necessary policy of trained and experienced men than in illustrations of mismanagement which have no place in practice. I believe sincerely that "Equity" has no grounds whatever for assuming that any manager other than a mere novice knowingly writes policies on deficient applications from his agents. He forgets that there is less litigation over insurance contracts proportionately than there is over any other class of contract. He forgets that the instances are rare indeed where litigation is not on the grounds of either arson, fraud, misrepresentation or change of risk without consent, and never over the interpretation of an application.

I believe he is wrong in his estimate of insurance clerks and local agents, for exceptions prove no rules, and I am told by prominent insurance men, who have had large and varied experience in other occupations, that they find both taking a high average position in comparison with other agents and other clerks; and, moreover, I believe that if the practice of inspecting every risk were adopted it would be found that the great army of inspectors would not only afford instances of mistakes for critics to enlarge upon, but would introduce confusion and a vast amount of heart-burning where now there is little or none. I ignore the necessity for every possible care by insurance managers in the selection of risks, as little as I ignore the necessity for liberal and conciliatory respect for the rights of the insured, but insurance companies cannot safely be driven into regarding every risk as being its own standard ; they must classify them and deal with them in classes.

All capital is invested in educational establishments, and no insurance manager can disregard the morality of men and of communities. They are the pedestal upon which the employment of capital is based, the pedal with which the director of its employment modifies its

action; but neither insurance capital nor managers, can create them, no more than banking, commercial or private capital can all have an equal right to their existence, and it is outside of the province of either to be responsible for their absence ; it is unfair to call upon insurance managers only to create them, it is illogical as well, and to blame insurance managers when they fail to meet them is simply an illustration of what I have said, that the course of modern thought is to throw all responsibility upon the insurer and take it all away from the insured. Why is not this strange doctrine or its analogy applied to other commercial interests? The only answer that can be given is that prejudice does not exist against them, and prejudice is incidental to fire insurance for-though it is protective of all other interests, so much so that without it they could not survive—its direct benefit is feltonly on the occurrence of unforeseen casualties, and, because unforeseen, it is thought that the payment of an insurance pre-mium is an outlay without return. I pity insurance agents who have to meet all this prejudice, who,as Alderman Mooney expresses it, are ever ready to receive premiums and to refuse to pay losses. One critic suys, mind your own busi-ness and there will be less arson, less fraud, less litigation, less disturbance; another says, don't mind your own business, don't regard what I did, if you do we will litigate, we will fight, we will slander.

It is the duty of the agent to facilitate honorable business, not to insist upon written applications for insurance upon known city risks, and in other cases to help the applicant by recording the information he imparts and the expression of his wishes. In doing so the agent acts as a notary upon instructions, the applicant has no right to assume that the agent knows, what is wanted, further than is explained to him, and applications so drawn, are with the interim receipt and policy, efficient as witnesses of the the transaction.

I am again referred to the necessity of using as aids the records and information of mercantile agencies; it is granted, and it is done, --well? not one in every hundred of insured persons are noted in these records, or known to the agencies, and they fail to show whether a person that is noted or known is worthy of being trusted with an insurance policy as completely, and more so than they fail to show that he will pay only 50 cents instead of a dollar to his creditors. Even the private protective records of insurance compaules-- a step far beyond morcantile agency reports--fail to guard the companics against imposture in every case.

 $\langle \cdot \rangle_{\mathcal{T}}$

 $, \lambda$

It is assumed that district inspection would be unburdensome in cost; it is overlooked that inspection is twisted into being a voluntary acceptance of responsibility which belongs to the insured, that an inspection is limited to what is seen and fails in respect of what is concealed, that everything is in review order at inspection, that in a month afterwards the force pump is out of gear, the watch-clock unwound, bearings and floors alike foul, and that the inspector's report becomes merely an ornamental addition to the loss papers. It is forgotten that the principle of inspection, if adopted, should apply to every risk, and first reports need to be followed at short intervals by periodic reports to overtake all changes. How many risks and what sized district could one inspector watch efficiently? Inspectors would be needed by fifties; their salaries and travelling expenses would more than double the cost of insurance. A private annual inspection is valuable after, acceptance of risks, if it assumes no responsi-bility, and I fancy there are few companies that do not already go so far, and a special inspection may properly be made of extra-hazardous risks such as saw mills using saw-dust burners, but to extend the system further would defeat itself in practice. Finally, my argument is ad-mitted when it is said "a judge may be dis-tinguished by the ignorance which should cutuse him to be extinguished;" the reform needed is the extinguishment of abuses outside of insurance management. Laws should be framed and enforced against the unpardonable

waste of national wealth by preventable fires. Revise the equities of the insurance contract if you please—I am in favor of that—but whatever they are they should be enforced with equal vigor against the insured as against the in-surer. Heed a quotation : The Insurance Monitor says :- " Let the insurance companies have rest, dear Legislators, turn your eye for the moment to the volume of fire losses ; please consider that whether insured or not, just so much taxable, value as been a beolutely wiped out; what can you do towards lessening this fire loss? Does it arise from defective building? then get up some good national building laws and enforce them. Does it arise from incendiarism? then make a law establishing fire coroners ("You can establish revising barristers ") in every county whose duty it shall be to investigate every fire, large or small, public or private, insured or uninsured, and report on its origin to the State" (Insurance Department you would then add to its usefulness). "Does it arise from over insurance? then make a law that no man on whose property fire originates shall, under any circumstances, collect more than three-fourths the amount of his actual loss " (You have precedents in other countries where there are very few losses and where insurance rates are trifles), " the remainder of the insurance money to go to the State," (to support the Insurance Department and scence real investigations) "make it a misdemeanor on the part of any company to pay a loss under sixty days" (and give the Insurance Department time to act) "Do these things" (and the reduction in insurance premiums that will follow will satisfy the public)

Another quotation and I close: "And now fire insurance, which was so largely instrumental in bunishing the idea of prevention in favor of eure, is again working to bring that idea to the front. The cost has become too small to remunerate the insurers, and they have raised it till the insured in return refuse to submit, the element of eure has reached its limit; and fire protective appliances (and insurance management, inspection, and so forth)" are unable to arrest the increase of losses." The evil has to be dealt with sociologically and legally or it will continue to grow until it destroys itself by destroying all insurance capital.

Yours, Reform.

Financial.

THURSDAY EVENING, 22nd Oct., 1885.

The money market is entirely unchanged since our last report. There are still full supplies of money, and rates are as previously quoted. A growing tendency to invest spare funds in good bonds and stocks appears to be spreading amongst banks, and it is a pity that the heading for public securities in the statement were not amended to cover bonds of municipal and other corporations, in order that this tendency might be gauged. In New York the same movement of money is going on as heretofore reported, steadily though slowly reducing the surplus funds of the associated banks, and bringing rates to a higher level. Call loans on best securities are, however, still made at 14 to 2 per cent, but the discount rate for commercial paper has somewhat increased. In / England the market is dull but expectant, the key to the monetary situation being the outcome of the Eastern quarrel. Meantime best bankers' bills are done at 1 per cent. Bank ate 2 per cent. Sterling 60-day sight between banks were quoted at 8 11-16 to 8 13-16 and 9 1-16 to 91 demand. Counter rates were 81

and 91 to 92; cables 91 to 93. In New York, posted rates were 4.844 and 4.864, actual rates, 4.83] and 4.85] to 1; cables 4.853. The street rate for money in London was cabled at 1 per cent. New York funds 1-32 discount to par; counter & to # premium, The stock, market has been active all week, but closes a little off to-day. Cotton stocks have shared in the advance, and Dundas, Montreal and the Canada Company have changed hands more freely than for a year past. Today bank of Montreal sold at 204 and at 1994 and 199 ex-dividend. A few sales of Merchants took place at 117 and 1171, and 25 Molsons went at 120. Toronto changed hands at 189 and Commerce at 128}. Passenger_opened at 1163 and declined to 1154, when it re-acted to 117. Gas dropped from 194 to 1923. Dundas Cotion was placed to-day at 60, Canada Cotton at 633, Montreal Cotton at 75, and Hudon Cottou at 871. \$2,500 corporation 4 per cent bonds sold at 981, and a like amount at 99, \$2,000 C. P. Land grant bonds sold at 971. The following were the total sales and highest and lowest prices of leading stocks for the week ;

MONTREAL WHOLESALE MARKETS.

Ост. 22, 1885.

The position of affairs is much the same as previously reported. In most lines there has been a moderately active movement, with trade about up to the average of former years at this senson. Leading dry goods merchants report that, while travellers are meeting with some difficulty in securing a fresh batch of orders, remittances have come in much better than was hoped for. A few departments of trade have suffered from the epidemic, but, generally speaking, trade at this point is fully as active as in Western business centres, and perhaps more **80**. CANNED GOODS, ETG.—The market has been quiet. Evaporated apples are quoted at 73c to 8c in small lots. Peas are about sold out. Lobsters firm, at \$5.80 to \$6 per case; mackerel, good \$3; common, \$2.85; sardines, fine \$10.50 to \$11; common, \$9.50; salmon, per dozen \$1.25 to \$1.30; spiced salmon \$3; finnan haddies \$1.25; Hoegg roast beef \$1.95 per 2lb. tin; tomatoes, \$1.15 to \$1.20; pie peaches, \$1.90; corn, \$1.20 to \$1.80; the latter for Portland packing; peas, \$1.25; new strawborries, per dozen, \$3; raspberries, \$1.75.

COAL AND WOOD .- The market is reported rather bare of American anthracite, and there is a good business at firm prices. In steam coal an advance of 25c has occurred : the amalgamation of Nova Scotia mines is said to have been determined upon. The offerings are light and the demand has increased. Last week we advanced the price of Pictou steam, and this week we quote Cape Breton higher, at \$3.25 to \$3.50. There is more enquiry for cord-wood, 53.50. There is more enquiry for cord-wood, which is unchanged in price. Prices are as follows:—American anthracite in ordinary dis-tributing lots, stove, \$6.25 to \$6.50; chestnut, \$6 to \$6.25; egg and furnace, \$5.75 to \$6. Gape Breton, \$3.25 to \$3.50; Pietou, \$3.75; Scotch Steam, \$4 to \$4.10; Welsh anthracite, \$4.50. Cordwood—Yard prices per long cord \$4.50. Cordwood—Yard prices per long cord (cartage 50c extra) are as follows :—Maple,\$6; birch, \$5.50; beech, \$5; tamarac, \$4.50; hem-lock \$4. Wharf prices about 50c lower. The Delaware & Hudson Canal Company has further advergenced the prime for each 15 gentles further advanced the price of egg coal 15 cents per ton, and grate 5 cents. President Olyphant says the demand increases with the advance in prices, and the company is compelled to buy coal from other companies to supply dealers.

 D°_{AHV} PRODUCE AND PROVISIONS.—Oboice butter has shown additional strength, but business is far from brisk. Greamery has sold for the city trade at high prices, the rates being far above what shippers are justified in paying. Selected townships dairy has sold at 20c for shipment, and more is asked for jobbing selections. Factorymen are firm in their views on anything like fine goods. Cheese is firm and some business is being done over the cable by holders here. It is said that as high as 10c has been paid. A good deal of 'bull' and 'bear' talk is being indulged in on this market. Some buyers have purchased heavily, and are anxious to advance prices, while others who have not goon in so largely would like to persuade country producers that the market is in a drooping condition, their object being to take in all they can on a 'break.' Our quotations are given in prices current. At Ulica, N.Y., cheese sold as follows; 4,600 boxes at 9 7-8c; 690 at 10&c; 10& at 10&c; 120 at 10 3-8c; 1100 at 10&c; 10& at 10&c; also 35 packages of creamery butter at 23c, and 54 packages of irramery butter at 23c, and 54 packages of creamery butter at 23c, and 54 packages of any at 20c to 21c. Market firm. Provisions.—The local trade has been quiet; prices steady. Eggs were in fair demand at 10c to 20c for fresh. Good Gamadian in New York 19c to 19g.c. The

DRUGS AND CHEMICALS.—In heavy chemicals there is little change, and business is light. Soda-ash is easier in England and caustic-soda firmer. Chlorate of Potash is dull, but there is no decline noted. The wholesale trade in drugs has improved and is fair for the season; collections also show up better. Quinine has, advanced considerably, and is likely to go further in the same direction, bark having got into the hands of speculators. The gain on the

week is 10c per oz. There is a demand from the combination of manufacturers and brokers, but it has not been successful as yet; meanwhile the ad vance has occurred so unexpectedly that stock in second hands is not to be heard of. Bromide of potash will likely be advanced. 5,000 lbs. of bromide were sold to a leading manufacturer in the States, and considerable quantities have also gone to France from Baltimore. An advance in iodine and iodide of potassh is intimated as likely to occur; the chemists having probably used up all their low cost iodine, the combination, previously thwarted, will be able to fix prices as they please. Reports from England state that importers of castor oil are careless about selling forward, nor is there much disposition on the part of buyers to operate. Sales at Liverpool reached about 450 cases of good seconds at 3 1-8d per lb. Dye stuffs.—Gutch, $7\frac{1}{2}c$ to 8c; sumac, S90 to S100 per ton for prime brands; extract of logwood, $7\frac{1}{2}c$; chip logwood, $1\frac{1}{2}c$ to 2c; archil 27c to 30c per lb. for concentrated.

Day Goops .- Remittances, it is pleasing to learn, have shown a decided improvement this past week, but the orders received from travellers still out have not been so satisfactory, the extremely mild weather operating as an influence to curtail business. City merchants engaged in the retail trade are fairly busy, some quite active, but in the suburban districts complaint is made that business is not what it would be if the epidemic had not come upon us. Stocks in the hands of wholesalers continue to be well assorted, but so far as it is possible to judge they are not excessive in any department. Prices of all goods are well maintained, and on the whole it is safe to say that this department of trade is not in a worse condition than on the date of last review.

FISH AND OILS .--- In fish there has been little doing the past week. Sales of herrings hav been principally from the wharf, and fewer wil go into store than expected. About 25,000 brls on a rough estimate are already in, and there will be a few more arrivals. One cargo arriving at Quebec for Montreal was ordered to the coast of Ireland. Canso herrings are quoted at \$5 in Boston, this would be equal to \$4 here, less \$1 per bri duty. The market price for Cansos here is, however, \$3.75 to \$4, although the supply is small. As a rule Canso herrings are good and show regular inspection, they would give every satisfaction if only the pkgs were in better shape and would undertake to were in better shape and would undertake to hold the pickle. Advices from Boston report sales of 200 brls of Cape Breton splits at \$5 and Labrador at \$4.50 to \$4.75. No cheap herrings are offering there. Mackerel are advancing. A private letter from Boston shows that the market for herrings there is 25c to 50c higher than in Montreal. Our readers will computer the the durie is 51 method. will remember that the duty is \$1 per brl. We quote -- Receipts of Labrador herrings about 10,000 brl; sales 7,000. Sold none ourselves under \$4.50, but a small cargo of 500 brls was placed at \$4.25. If we have large receipts we may have to come down to \$4.25. Case Breton sold in a small way at \$4.50 to \$5. Last sale of No. 1 salmon at \$12.50 per brl." A lot of 500 brls of Labrador herrings is reported sold on this market at \$3. We advance our prices for mackerel and also for green cod. The market for fish oils is firm and without much change. The last reported sale of steam change. The last reported sale of steam reduced scal was at 48½ to arrive, but this, it is said, could not be repeated. We quote 50c for spot delivery. Newfoundland cod is firm at 55c. At closing, herrings rule a little better. Good well-known brands \$3.25 and firm. Dry codfish, \$3.20.

FLOUR AND GRAIN.—The market for flour continues steady to firm, despite freer arrivals of

new ground. Strong flour is somewhat scarce. The sale is reported of 4 cars of Manitoba strong bakers at \$5 to \$5.05. This flour is gaining rapidly in popularity with local and foreign buyers. Superior has sold at \$4.45 and extra at \$4.35. In grain there has been little done and the market, since our last, has been slightly easier in tone. There have been sales in car lots but for shipment no transactions are reported. The European markets have been easier during the past few days. The imports of breadstuffs into the United Kingdom last week show an increase of 20,000 bris flour, a decrease of 90,000 quarters wheat, and a decrease of 60,000 guarters corn compared with the previous week, and a decrease of 45,000 brls. of flour, a decrease of 5,000 quarters wheat, and an increase of 35,000 quarters corn compared with the same time last year. At London a majority of the samples of the new wheat crop have been unsatisfactory. The sales of English wheat during the week were 76,092 quarters at 30s 11d, against 73,412 quarters at 32s 4d during the corresponding week last year. Flour is freely offered at the lowest rates. Prices of superior barleys are advancing; those of inferior are de-clining. Foreign wheats have gradually im-proved and are quoted at 6d to 1s dearer. It appears, says the Mark Lane *Express*, that a project for creating a basis for pure gambling in the London wheat market has been quietly kept alive, and that a definite movement is now being made toward its realization. If the plan is successful, it will be the beginning of the end of the stability of the London corn trade, which has been the marvel of the world during a long period of unprecedented depression." At Chicago the "bear" prestigo has been restored and the market has had several "breaks." A steaty increase is now looked for in the visible supply.

FREGRITS.—Grain freights have advancep and are now at 2s 9d to Liverpool and 3s to London, Glasgow and Bristol. Cattle rates are higher at 40s to 50s. The last vessels have been fixed for the River Plate on former terms quoted. Phosphate freights are up to 7s 6d to 8s 6d as to port. Deals to London, Liverpool and Glasgow 50s. Butter and cheese to direct ports, 25s per gross ton. Flour in sacks 11s 6d to 12s 6d per ton to Liverpool, London and Glasgow.

GREEN FRUITS, ETC.—A good business has been transacted in apples at lower prices; winter fruit \$2 to \$2.50; fall \$1 to \$1.50. Almeria grapes are higher at \$5 to \$6 per keg; Concord grapes 4c to 5c: Delaware and Rogers 4c to 8c. Malaga lemons \$3 to \$3.50 per half chest, \$6.-50 to \$7 per chest. Oranges \$5.50 to \$9 per brl. Coccoa nuts \$5.50 per 100. Vegetables.— Spanish onions \$4 per cuse; Canadian in brls, \$1.75 to \$2. Sweet polatoes ensier at \$3.50 per brl. Quebec turnips 50c per bag.

GROCERES.—Business has been moderate but fully up to the average of the past few weeks. *Teas.*—About 1,000 half chests of teas have been sold at 17c to 24c. Low-grade Japans at a price under 18c have been in active demaud.. Late despatches from Japan state that the advances there have been equal to \$2 to \$3 per picul. Mail advices this week contain nothing of importance. As there are no old stocks here to fall back upon, as was the case up to a comparatively short time ago, the local market with the present foreign outlook seems likely to remain strong. Sugars since our last have declined about 1-8c, and the turn-over has reached several thousand barrels. Granulated in lots, is worth 67-8c and yellows 5 1-8c and upwards, as to quality. In New York, holders of the stock of raw sugars have again found it

necessary to nurse their patience, in view of a general sort of indifference among customers. Refiners get along very well with the stock they have, in view of the slow sale of their product, and, as a result, no demand is developed except as a matter of imperative necessity. Offerings of samples, however, seem to be made carefully, and "former rates" are quite generally quoted. No sale from first hands. Retined have been fairly active on small trade orders, but general business lacking in satisfactory features, and at the close the market had rather features, and at the close the market had rather a dull sort of tone. Granulated quoted at 65-8c and cut loaf at 74c. A London cable-gram of the 19th inst. says :--Cane sugar dull but not quotably lower. Holders of beet experience trouble in finding buyers, market drooping. Stock in four ports United King-dom, Oct. 17th, 11,000 tons under last week, or 272.083 tons architet 322.883 tons some time dom, Get. 17th, 11,000 tons under has week, or 272,083 tons, against 252,882 tons same time-last year. Quotations: Java No. 15, 178 9d; fully fair refining muscovado, 148 9d, and Austrian and German beet, 88 deg., new crop, 14s, 71d. Molusses are firmer, as there is no prospect of any further arrivals by water direct, and deliveries will have to be made from store. A 50 puncheon lot might be placed at 28c, but it is doubtful if anything reliable could be obtained under 28½c. We quote 28c to 29c. *Fruit.*—A few lots have been arriving, but chiefly for the West. Two direct steamers are expected about the lst to the 5th prox. Valen-cias have ruled steady, and have sold at Sic. Since writing the above it is reported that nothing in good common tens can be secured under 21c to 22c. In raw sugar some Barbadoes under 21c to 22c. In raw sugar some Barbadoes only fit for relinery has been placed at $4\xi_c$. Rio coffee.—We learn of a small invoice having been sold at ξ_c^{g} to ξ_c^{g} . Fruit.—Old sultanas $6\xi_c$; new $6\xi_c$. Valencias are firmer, and now held at ξ_c^{g} but ξ_c^{g} would be accepted for a round lot. Buyers are holding off until after the sale of fruit to be held ex Avlona, now coming direct here. Peanuts much firmer; filberts 54c to 6c; pecans 74c; walnuts, 8c to 84c. Almonds, Tarragoua, 144c to 15c.

HAY, STRAW & FRED.—The market is unchanged. Choice timothy is quoted at \$11, and inferior at \$8 per 100 bundles. Straw unchanged at \$5 to \$6 as to quality. Best timothy in bales is quoted at \$15 per ton, and secondary quality at \$14. Straw per ton, pressed, \$9 to \$10. Bran and shorts have advanced about \$1. Shorts, best, \$21; ordinary \$18. Moulic, \$22, \$20 and \$18. Bran \$16 per ton. Buckwheat, 60c. per bushel.

HIDES AND TALLOW .- The market for hides has been stendy; receipts are light and stocks small. Most of the local supply has been sold ahead. Despite high prices, tanners continue to "put in" hides, though it is difficult to imagine how they can see a profit at present prices of leathor. In the Western States the market has been stiffer and Chicago buyers have been compelled to follow the market up grade. They were disappointed when packers advanced Texas hides to 11c, but, as there has been a falling off in receipts of Texas cattle, the price of Texas hides of heavy weight has been further advanced to 112c. Natives are held at the same figures, with spready stock at 113c. The effort to introduce side branded stock at Chicago as a substitute for Texas hides is not very successful, as the stock is too spready and flabby. Some have sold at 93c. But branded are firm at 10%c. Tallow in this market is firm, and the sale is reported of 70 bris at 6c. For choice a higher price is asked, while poor stock might be secured at 5%c.

IRON AND HARDWARE.—The market for pigiron during the past week has been dull. As noted previously, the senson for large sales is about over, and very little has been done outside sales of jobbing lots to the smaller buyers. It is thought that a steady business of this

823

NORTHEY & COMPANY. Cheap. TORONTO, ONT Cheaper than any Pump built Compact. Having the well-known compactness of direct-acting Pumps. Simple. Only two moving parts in Engine, Durable. Guaranteed the most durable Pump made; impossible to break down. ----If you want a $\mathbf{U}\mathbf{M}\mathbf{P}$ for any purpose, Write to us.

Send for Circular and state your requirements. "Ba

nature will be transacted during the winter m mils. Pig-iron freights are firm, and cables received to-day confirm the recent rise, which we may say is about equivalent to 4s per ton advance on Glasgow to Montreal and 6s advance to Western points as compared with the rates current during the summer senson. There is improved enquiry for bar-iron from those who have not placed their fall orders, and prices are firm. Ganada plates are quiet at last week's prices, and the general features are an 'hanged. Stocks are in few hands but are h avier than expected, or is usual at this season of the year, margins are consequently much eut, and many of our leading firms whose stocks are low are refusing to take importation orders in competition with the stocks referred to. In all classes of metals, such as tim plates, zine, lead, etc., trade has been light during the week with nothing particular to note. No recent change has been made in the price of mails, horse shoes, etc., by local manufacturers. The following is a London cable of the 19th inst:—Tin, spot, L92, three months futures at L91 5s. Market firm ; G. O. B. Chili bars L30. The sj best selected copper L45; soft Spanish lead L11. 5s. Glasgow warrants 41s 10d ; Midd, No. 3, foundry G. M. B., 32s 44d. A late report of the New York market says :—Copper. —The market for ingot shows a rather weakish undertone in face of all that is said regarding the favorable statistical position. Lake has sold at 10,00e, and 11e srems now an ouside rate, while down to 10e is named for Bultimore and similar stock. Iron.- American pig is very stendy at the old range of prices, with a good average trade passing, but the purchases restricted mainly to moderate lots. Small sales of certain Laking brands No. 1 X foundry are reported made from second hands at a little advance on agents' quotations, and that grade, as well as first-class grey forge, is said to be rather scarce for prompt delivery. No. X foundry seems the only grade of which the supply is liberal. We quote at \$18 to \$18.50 for No. 1 X foundry, \$16 for No. 2 X foundry, and \$15 for grey forge. Sates reported of 5,500 tons, mainly Thomas, at the above prices. Lead.—The movement of pig lead has been unimportant a.d confined to small lots. Common is quoted at 4. 15c for prompt delivery, with the market rather easy. Tin.—Pig tin has ruled quite firm. London cables has been more in sellers' favor, aud: the market have had the support of good buying by large consumers, besides a fair general distribution. Several hundred tons have been taken for Western account for November to January delivery. Straits, in rounds lots, quoted at 20% counds; in a jobbing way at 20% cash, a.d 20% con the spot. Tin plate is firm and fairly active. Quite liberal purchases have been made by oil canners and Western meat packers, besides which a good store trade is reported.

LEATHER, BOOTS AND SIDES.—Within the past few days the demand for leather has brightened up a little, but there is still room for improvement in this respect. Shughter sole is scarce, but most of the other lines are in full stock. The English nurket keeps flat, and although some shipments continue to go forward from the United States prices are too low to make it anything like a safe speculation. Some manufacturers say they are in receipt of hair orders from travellers now on the sorting trip while others profess to have delayed the departure of the customary number of salesmen until country trade shows some improvenent and stocks already shipped get worked down to smaller proportions. There seems to be an impression that the sorting up trade will be below the average, owing to the silly prejudice against Montreal manufactures because of the epidemic. The Boston bo-t and shoe market remains in good condition. Duplicate fail orders are criming along as well as expected. Spring trade is opening well. Travelling salesmen who have returned from an early Western trip with spring samples report a fair business in the way of sample orders. They also find stocks of goods well cleared up, and the late fall duplicate orders are going into consumption readily. The larger jobb is are now beginning to arrive here from the West and South, but have not done much business as yet. New England trade is good. Collections continue satisfactory. The shipments from Boston since Jan. 1 have been 2,175,017 cases against 2,174,198 cases for the same week of last year, 2,299,306 cases in 1883 ; 2,087,277 cases in 1882.

LIVE STOCK.—Receipts by G.T.R., for the past week were :— Cattle, 1,821; sheep, 1,235; calves, 11; hogs, 210. Since May 1st :—cattle 58,615; sheep, 43,409; calves, 4,532; hogs, 9,220. Receipts by C.P.R. for the past week : cattle, 1,000; sheep 1,014; hogs 100. Since August 9th :—Cattle 6,780; Sheep 6,500; hogs 1,300. The total exports of cattle to date havo been 50,803 head, an increase of 6,270 over last year. Total exports of sheep 36,858, a decrease of 13,465. The demand for shipping stock has been slow, and quality was generally inferior. Sales occurred at 3 $\frac{3}{2}$ e to 41c, but really choice

cattle would have brought more. Butcher's cattle changed hands at 24 cto 3c. Live hogs firm at 43 c to 5c. Calves \$1 to \$20 as to size and quality. Total exports of beef 12,571 quarters against 13,570 last year. Forty carcasses of mutton also left last week. The English cattle trade continues addressed, but prices for prime Canadian are unchanged at 11c. Best sheep were quoted in Liverpool at 13c.

LUMBER.—Less than the usual amount of business for the season has been done of la te from the city yards. Manufacturers are busy in the west, but dullness is the prevailing feature in the market here, and is likely to be for some time to come. Prices on the whole maintain their ground, and with the moderate stock on hand are likely to continue to do so. The arount shipped has been large; deals have gone forward by most steamers to complete cargoes in the absence of sufficient cattle. The bulk of the sailing vessels in port recently have been loading for South America. Lath per M sells at \$1.60 to \$1.70, and shingles, 1st per M \$3; seconds, \$2.50.

PAINTS, OILS, ETC.—In paints and glass, business is only moderate, and there are no new features to note. We make a slight advance in prices of linseed oil. English cables report the market higher and firm. It would cost 63c to lay raw down here. Our market, however, does not readily respond, as stocks in some hunds are large and the demand is only of a jobhing nature: Spirits of turpentine unchanged.

PETROLEUM.—The market at Petrolia, Ont., is unchanged at 11c for car lots. Here there is a better enquiry, but prices are unaltered at 15c for one to ten brl. lots and 13 5-8c for car lots in store.

Woot.—The demand for wool of all kinds has continued fair, and moderate sales are being made each day at our quotations, which are unchanged There are no large transactions to report. A report of the Boston market says:—Again quiecress has ruled, and yet the sales show the astonishing total of 5,127,317 lbs. Two fifths of the sum is foreign carpet wool. It must also be remembered that some of it e sales are merely deliveries of previous contracts, and some is the accumulation of transactions not hitherto reported. The general tone of the market, in spite of the lack of inquiry, has been quite firm. There has been but little froth to the market. Little or no speculating, and no spectators. The buyers who have been in the market have purchased and departed, and the class that contents itself with aginting twenty firms for the sake of a single small purchase has been conspicuous by its absence.

JOSEPH E. SEAGRAM DISTILLER, WATERLOO, ONTARIO. Alcohol, 65 O.P. Pure Spirits, 65 O.P. Pure Spirits, 50 O.P. Pure Spirits, 25 U.P Old Rye, Malt and Family Proof Whiskies

827

. TORONTO WHOLESALE MARKETS.

(Revised by Telegraph.)

Токонто, Oct. 22, 1885.

Business in wholesale circles is said to be fairly active, and the feeling continues of a hopeful character. There are no very large transactions reported in any particular branch ; but there is a fair consumptive demand, and no speculative buying. Prices, as a rule, are firm, and the movement, it is thought, will increase as the season advances. Remittances are fair. The money market is without feature. There is a fair demand from grain merchants, but as yet little enquiry from stock brokers. Money on call rules at 44 to 54 per cent on good stocks, and at 4 on debentures. Time loans are quoted at 6 per cent. Commercial paper in moderate offer : A1 is discounted at 6 to 62 per cent and ordinary at 7 to 71 per cent. Sterling Exchange quiet and rates stendy; 60day bills are quoted at 108 5-8 to 1082 and demand bills at 109 to 109 1-8 between bank. The stock market is a little more active and prices of bank shares firmer. There have been sales the past few days of Montreal at 204 to 204\$, Ontario at 110 and 110}, Toronto at 188 to 189, Merchants at 1163 and 117, Commerce at 126½ to 1284, Imperial at 126, Federal at 97 and 971, British America Assurance at 85, and Western at 1113 to 112}. Following are prices bid to-day as compared with those of last Thursday :

Banks.	Bid Oct. - 15	Bid Oct. 22	Loan Cos.	Bid Oct. 15	Bid Oct 22
Montreal Toronto Ontario Merchant Commerce Dominion Hamilton Stand'd Federal Imper'l Molsons	208) 189 108 116 127 201 125 1157 96 125	188 109 116 127 xd1 99 125 117 96 325	Can. Per Freehold. Westorn Can Bidg. & Loan Farmers' Loan. Lond. & Can'du Landed Credit National Invt Ontario Lonu Itanilton Prov Itanilton Prov	1134 143 1221 1221 124 124	167] 191 106] 1429 123 123 124 124

BUTTER.—The market is quiet, with prices a shade firmer. Receipts of choice qualities are limited, and fine tub jobs at 16c to 17c. Medium and poor qualities are plentiful, the former selling at 12c to 14c and the latter at 10c to 11c. Round lots of medium store-packed aro quoted at 10c to 10gc. Ergs continue scarce and prices firm; cuse lots bring 18c to 18gc per dozen. Cheese is firmer, but the movement is limited; fine makes job at 9gc, and medium at 8gc.

COAL OIL.—The demand is fair and prices steady. Canadian refined sells at 161c for single barrels and at 16c for five to ten barrel lots. Carbon safety at 19c. American oils unchanged at 23c for prime and at 26c for water white. Crude casier at 78c to 79 per barrel in Petrolea, and refined unchanged at 11c per gallon in ear lots.

COAL AND WOOD.—The demand for coal is good and prices unchanged. Store and nut sell at \$5.50 a ton, egg and grate at \$5.25, and the best soft at \$6. Wood unchanged at \$4.50 for best hard, \$3.50 for second quality, and \$4 for best pine. DRUGS.—Trade is fairly active and prices generally rule firm. Turpentine, 58c to 60c a gallon; alcohol at \$3.27 per gallon; castor oil at 10c to 12c; opium at \$3.75 to \$3.90; glycerine, 17c to 20c; quinine, \$1.15 to \$1.20; morphia, \$1.90 to \$2.00; bicarbounte of potash, 18c; potass iodide, \$4.40 per lb; tartaric acid, 55c to 60c; cream of tartar, 33c to 35c; linseed, raw, 66c; do, boiled, 68c; best Dutch madder, 12g to 14c; occhineal, 40c to 45c; camphor, 35c to 45c. Oil of peppermint \$4.50 to \$4.75.

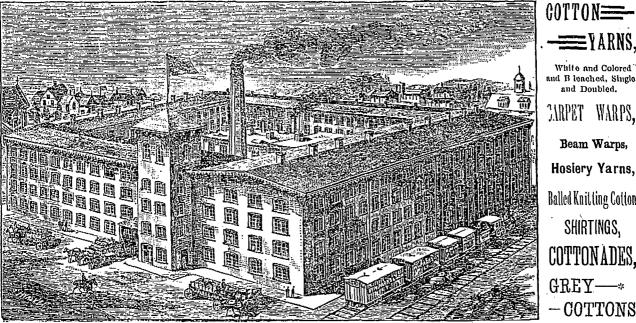

FLOUR AND GRAIN .- There has been less demand for flour this week, and transactions me limited. On Monday Superior Extra sold at \$4.10, but since then buyers and sellers are apart. The best bid at the close to-day was \$4. Extras are quoted at \$3.95, and Spring Extras at \$3.85 to \$3.90. The stock in store is unchanged at 250 barrels, as compared with 500 at this time last year and 35 barrels in 1883. Wheat is dull, and prices easier in sympathy with outside markets. Buyers hold back, and lower prices seem to be anticipated as millers are pretty well filled up. On Monday No. 1 new fall sold at 88c, No. 3 fall at 84c, and No. 2 Red Winter at 87c. On Tuesday No. 2 fall sold at 86c. The closing is weak at about 87c for No. 1 fall, 85c for No. 2, 83c for No. 3, and 90c to 91c for old No. 2 Spring. The stock in store has increased, and is now 164,116 bushels as compared with 85,222 bushels at the corresponding period of last year, and 36,042 bushels in 1883. Barley in fair demand and prices firm. No. 1 is very scarce and closes at 82c. No. 2 is firm with transactions the past two days at 72c to 73c. No. 3 Extra sells at 66c to 67c, No. 3 at 58c to 59c, and No. 4 at 50c. The stock in store is 203,635 bush as against 201,796 bush at the corresponding period of last year, and 113,629 bush in 1883. Oats have been in moderate demand, and prices firm. Sales of new are reported at 324c on track and old at 344c. The stock in store is nil as against 1818 bush last week, and 1362 bush at the corresponding period of last year. Peas are quiet and steady ; sales at outside points have been made at equal to 60c for No. 2. Stock in store 26,641 bush as against 9,298 bush at the corresponding period of last year. Rye is nominal, no sales being reported; no stocks in store. Outman, no sates being reported; no stocks in store. Outmeal dull and prices nominal at \$3.80 to \$3.90 for ear lots and at \$4.15 to \$4.50 for small lots. Bran quiet and easier at \$11.50 on spot.

GROCERES.—There has been a fair trade this week, and prices rule steady, sugars quiet but firm; granulated 74c to 74c, and Paris lump 84c to 84c. Fish firm, Labrador No. 1, \$4.25 to \$4.50; Codlish, \$4.50 to \$5.00; Trout, \$3.25 to \$3.50 and Whitelish, \$3.75 to \$4. New fruit arriving in large quantities; Sultanas, new, 8c; Valencias, 9c; currants new, in barrels, 6c to 64c. Pepper firm at 28c to 32c for white and 15c to 22c for black. Teas quiet and prices steady. Tobaccos unchanged.

HALIFAX. N.S. SPECIAL NOTICES. One of the large establishments in Ontario which has grown from a small beginning in a remarkubly short time to its present proportions is the Chatham Manufacturing Company. The works of the company are complete in every detail, the machinery being of the most com-plete make. They are confined to the produc-tion of waggons, carts, bob-sleighs, waggon stock, hardwood lumber and ship-plank. All these articles are manufactured direct from the log, the destruction of which commences in the saw mills located a few rods from the main fac-tory. Ship timber is extensively turned out saw mills located a few rods from the mith ac-tory. Ship timber is extensively turned out here, which finds a market principally in the U. S. The short log mill, previously used, was destroyed by fire and has been replaced by a band saw mill—the first of its kind in Qanada band saw mill—the first of its kind in Canada —fitted up with the most modern machinery, and capable of sawing boards from a slick of timber five feet square, or siding up or sawing a log six feet in diameter. The class of timber used comprises white and red oak, white ash, white wood, sycamore and black ash. The Erie and Huron railway runs in close connection to the extensive lamber yards belonging to the company thus affording excellent shipping for to the extensive lumber yards belonging to the company, thus affording excellent shipping fa-cillities for all goods turned out of the establish-ment. "The Chatham Waggon," by which name the principal product of this establish-ment is commonly known, has too wide a reputa-tion to require comment here, as there is now hardly a point throughout the country where this waggon is not in use. The works at present give employment to 200 practical arti-sans, and the number is steadily increasing. The capital stock of the company-which is in-corporated—is \$100,000, and the following gentlemen are the company's officers: President, D. R. Van Allen : Vice-President, Wm. Ball ; Sec-Treas., Geo. E. Ireland.

Prominent among the monetary institutions of Newfoundland is the Commercial Bank at St John's. This Bank was established in 1857 b) rewinding is like Commercial Bank at SI John's. This Bank was established in 1857 and incorporated by Act of Local Legislature in 1858 with a capital of \$200,000. It paid divi-dends of 6 per cent per annum, for some years and afterwards 8 per cent and 10 per cent, with a bonus of 1 per cent and 2 per cent. The-first year of its existence it established a re-serve fund, and added to the fund yearly until it reached \$140,000. In the year 1884 the bank increased its capital to £76,500, or \$306,-000, by taking from the reserve fund \$100,000; every owner of half shares paying the sum of \$100 to secure a full share. Last year, 1885, it paid 8 per cent and a bonus of 1 per cent to the original shareholders. It is pleasing to state that the bank is doing a large and profi-table businers and since its establishment has not lost \$25,000 by had debts. Its present note ousmess and since its establishment has not lost \$29,000 by bad debts. Its present reserve fund is \$60,000, about \$20,000 having been added to it during the past year, and it has an undivided profit and loss balance of \$10,000.

The St. Louis Grocer, referring to the coffees of Chuse & Sanborn, says:-" These goods are of the highest grade of quality, always uniform, and packed in air-tight lin cans, which thoroughly retains all the original strength and flavor of the coffee. Good goods packed up by so good a house must produce good gesalts.
