The copy filmed here has been reproduced thanks to the generosity of:

Hamilton Public Library

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Hamilton Public Library

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

P R E F A C E.

IN the year 1843, the author of the following Tables published a work that embraced a series of Exchange Tables, both of *Sterling* and *Federal* money, at every rate of Premium from one eighth of one per cent. to ten per cent., by *eighths*.

In 1848, Mr. Joseph M. Price published Tables of *Sterling Exchange only*. But in his preface he points out a mode of calculation by which amounts in *Federal Exchange* can be obtained. This, however, requires more labour than is desirable.

The following year, Mr. Robert M. Folger published a series of Exchange Tables, both *Federal* and *Sterling*, which he carried out by *eighths* to twelve and seven eighths per cent. In his preface he says, "an inspection of its pages will demonstrate it to be an improvement on any former work, as it gives *eighths* per cent., and is more extended in the calculations." Of course, he could not have seen a copy of my book, which was published six years before his appeared.

With regard to the arrangement of the above works, Mr. Price's plan, so far as it goes, is the best; but although it may be said of all these publications, that they are respectable and useful, not one of them can be considered as *The Book*, that has so long been a desideratum on this subject.

The following Tables, the author humbly but confidently believes, furnish the Mercantile World with a work as simple and as comprehensive as can be attained or desired. And in this opinion he is happy to be supported by Bankers and Merchants of the highest standing, to whom he has exhibited it, and who have all expressed their great satisfaction with the work, and their desire that it should be promptly presented to the public.

EXPLANATION OF THE TABLES.

IN both series, *Dominion* and *Sterling*, the large figures from 1 to 100 not only represent their own value, but *one hundred times* that value, so that the figures 1 to 100 actually represent (by taking two of the numbers) every number from *One to Ten Thousand*. Thus in the Table that shows the value of a Sterling Bill in Dominion Money, the figure 1 represents either One Pound, or One Hundred Pounds, and the value in Dominion Money is shown by taking *all* the figures opposite to it for the *large* amount, and by *leaving out* the two figures between the parallel lines for the *small* amount.

In the Table for investing Dominion Money in a Sterling Bill, figures 41 represent either Forty-one Dollars, or Forty-one Hundred Dollars, and the value in Sterling Money is shown by taking the sum in the *first* column (headed Units and Tens) for the *small* amount, and by taking the sum in the *second* column (headed Hundreds) for the *large* amount.

The following Examples will show how the Tables are to be used :—

Example 1st. What is the value in Dominion Money of a Sterling Bill for £1395.16.11, when Exchange is $10\frac{3}{4}$ per cent. premium?

Turn to the Table headed "Sterling Exchange, into Dominion Money, $10\frac{3}{4}$ per cent. premium," and opposite the large figures 13 (for *thirteen hundred pounds*) will be found, *by taking in all the figures* \$6377.22.2

And opposite the large figures 95 (for *ninety-five pounds*), *omitting the two figures between the parallel lines*, is found 466.02.8

Then turn to the last column of small figures, and at 16s. 11d. will be found 4.14.9

The sum required \$6847.40.0

Example 2d. Invest \$6847.40 in a Sterling Bill, Exchange at $10\frac{3}{4}$ per cent. premium.

Turn to the Table headed, "Dominion Money, into Sterling Exchange, $10\frac{3}{4}$ per cent. premium," and opposite the large figures 68 (for *sixty-eight hundred dollars*), in the second column *hundreds*, will be found £1386. 3. 8.

Then turn to the large figures 47 (for *forty-seven dollars*), and opposite to them

in the first column, *units and tens*, will be found 9.11. 7 $\frac{1}{2}$

And in the Cent Table, opposite 40 (*cents*) is found 0. 1. 7 $\frac{1}{2}$

The sum required £1395.16.11

N.B.—5 mills are reckoned one cent, but under 5 mills are nothing.

RECOMMENDATIONS.

SHEFFIELD, 24th October 1850.

DEAR SIR,

We have much pleasure in expressing to you our approbation of the Sterling Interest Tables you are preparing for publication.

The arrangement is very concise and simple, and, so far as we know, has not been adopted by any previous compiler of such Tables.

We doubt not that the peculiar facilities afforded for calculating Interest, at a *variety* of rates, together with the convenient size of the volume, and the beauty and clearness of the type, will strongly recommend it to public attention.

With regard to your *Sterling and Federal Exchange Tables*, we feel quite satisfied that they will at once recommend themselves to all bankers and merchants who have commercial transactions with the United States of America.

We remain yours, sincerely,

MR. GEORGE OATES.

NEW YORK, February 1851.

We, the undersigned, have been requested by Mr. Oates to examine Specimen Tables of the following works, viz. :—

6 per cent. Interest Tables, for 360 days to the year.

7 per cent. Interest Tables, for 365 days to the year.

5 per cent. Sterling Interest Tables, and

Sterling and Federal Exchange Tables, from $\frac{1}{8}$ to $12\frac{1}{2}$ per cent. by eighths.

have much pleasure in stating that, in our opinion, he will render an important service to the mercantile world by publishing those Tables, which, for simplicity and comprehensiveness, are unequalled, and which we believe cannot well be surpassed.

SUPPLEMENT
TO
OATES' EXCHANGE TABLES,
FOR
CALCULATIONS IN STERLING EXCHANGE

BY THE METHOD RECENTLY ADOPTED IN THE UNITED STATES; AND TO ADAPT SUCH
CALCULATIONS TO THE METHOD IN USE IN THE DOMINION OF CANADA.

MONTREAL :
PUBLISHED BY DAWSON BROTHERS.

P R E F A C E .

—o—

Upon the 1st of January, 1874, a law came into operation throughout the United States, not only altering the mode of computing exchange with Great Britain, but, by a very stringent clause, rendering null and void any transaction expressed in the language of calculation which has been so long in use, and with which alone Canadians are familiar.

The business relations of Canada with the United States are so intimate, and the influence of New York upon Exchange rates is so controlling, that it will be impossible for Canadians to ignore this change. The law referred to and now in operation is as follows :

" § 1. That the value of foreign coin as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation, of the various nations of the world, shall be estimated annually by the Director of the Mint, and be proclaimed on the first day of January by the Secretary of the Treasury.

" § 2. That in all payments by or to the Treasury, whether made here or in foreign countries, where it becomes necessary to compute the value of the sovereign or pound sterling, it shall be deemed equal to four dollars eighty-six cents and six and one-half mills; and the same rule shall be applied in appraising merchandise imported, where the value is by invoice, in sovereigns or pounds sterling, and in the construction of contracts payable in sovereigns or pounds sterling; and this valuation shall be the par of exchange between Great Britain and the United States; and all contracts made after the first day of January, 1874, based on an assumed par of exchange with Great Britain of fifty-four pence to the dollar, or four dollars forty-four and four-ninths cents to the sovereign or pound sterling, shall be null and void.

" § 3. That all acts and parts of acts inconsistent with these provisions be, and the same are hereby, repealed."

Thus it will be seen that the par of exchange as fixed by law in the United States is **\$4.86,65**, while the par of exchange as fixed by law in Canada is **\$4.86,66** to the pound sterling. The difference is slight, but quite appreciable in large transactions.

The object of the United States Government in thus abolishing a usage which has existed for nearly two hundred years, was to endeavour to put a stop to a method of quoting the values of United States securities in the London market by which those securities appeared to be at a discount of nearly nine per cent. under their real selling value; so that United States securities when actually at par were quoted at 91 $\frac{3}{4}$. This state of affairs really injured the sale of those securities and offended the patriotism of the United States. The new system now introduced has, moreover, the merit of being much simpler than the old.

The Banks and Exchange dealers of New York, in adapting their business to the new regulations, have resolved upon abandoning entirely the use of the words " premium or discount," and upon quoting the current value of the pound in dollars and cents. Therefore, when bills, according to the former method, are at 8% prem., they will quote \$4.80 to the £. When bills are at 12 $\frac{1}{2}$ % prem. they will quote \$5.00 to the £.

The following tables were published by the Secretary of the Treasury at Washington in order that the mercantile public might gradually learn to calculate exchange by the new method. They consist of comparative tables, showing values side by side, quoted by the former method of premium upon the old par of 4.44, by a new method of premium or discount upon the legal par of 4.86,65, and by the method now adopted by the New York exchange dealers of expressing in dollars and cents the current value of the sterling pound. By means of these tables the quotations of the New York exchange market can at once be rendered into the terms of the exchange books in use in Canada and *vice versa*. For the use of merchants trading with the East, tables are also given of the value of the dollar expressed in shillings and pence sterling, and these are compared with the other modes of quotation now and formerly in use, so that, small as these tables are, they will be found, in conjunction with the exchange books at present in use, to cover the wants of merchants dealing with Great Britain or with the East, either as importers or as exporters.

TABLE B.—Showing the value in New York computation of Sterling bills as quoted in Canada.

TABLE C.—Showing the value in Canadian computation of Sterling bills as quoted in New York; and also giving equivalents of exchange as quoted in the Eastern trade, and the corresponding premium or discount upon the new legal par of the United States.

TABLE D.—Showing the value in Western rates of exchange of Sterling money quoted in East Indian and Californian circulars.

TABLE E.—Converting shillings and pence into decimals of a pound; so as to facilitate all percentage calculations in Sterling money.

TABLE F.—Equivalents. New York into Canada quotation, advancing by half cents.

NOTE.—To find the value of any number of pounds represented by one figure, find the figure in the left hand margin of the above table, and its value will appear in the column adjoining, opposite that figure. To find the value when expressed by two figures, look for the *tens* in the left-hand column, and for the *units* in the top margin, and the value will be shown in the place where the two columns meet; thus, the value of 57 £ is \$277.3905. To find the value of 576 £, look for 57, as before and move the decimal point one place to the right, and it shows \$2773.905; then add 6 £, as already shown, \$29.199, and it gives the sum of \$2803.104.

Shillings and Pence into \$ c. at the rate of \$4.86.65 to the £ stg.

One shilling equals 24 $\frac{133}{100}$ cents. One penny equals 2 $\frac{133}{100}$ cents.

NOTE.—The above table shows the value of every combination of shillings and pence less than 1 £; the upper margin representing the shillings, and the left-hand margin the pence. Thus, to find the value of 17 shillings and 6 pence, follow the column 17 downward until it meets the left-hand column opposite 6, and it shows \$4.25. By this method any number of pounds, shillings, and pence can be reduced to United States Gold quickly and accurately.

NOTE.—Column 1 shows the even percentages; column 2, the value of dollars to the pound at that rate, and the subsequent columns the values for successive increases of one-eighth per cent. in the rate. The dots after the mill figure in the decimals show that it is continued or circulating, or the mill may stand for the numerator of a fraction of which the denominator is 9. For example, opposite 109 and under 1/8 is the value of the pound at 109 1/8 per cent, viz: \$4.86,6666... or \$4.86 2/3.

NOTE.—The expressions on the same line are equivalent, or practically so. Thus, exchange quoted at \$4.89 per pound sterling corresponds to 49 $\frac{1}{10}$ pence to the dollar, or to the 100.5 per cent. of the U. S. present par, (that is, half per cent. premium,) or to 110 per cent. of the old par, (or by old calculation, 10 per cent. premium.) The legal par corresponds to \$4.86,65 to the pound, equivalent to 49 $\frac{1}{4}$ pence to the dollar, and to 109 $\frac{1}{2}$ former percentage, and £15 equals \$73.

NOTE.—In using the table, first separate the decimal representing shillings, which can be generally done by inspection, since each shilling is exactly £0.050. Any decimal less than .050 will represent pence, &c. Examples: Required s. and d. equivalent to £0.983. Since .950 = 19s., and .039 = 9 1/4d. Answer, £0. 19 9/4d. Answer, £0. 19 9/4d. Since 8s. = 400 and 4 1/2 = .019. Answer, £0.419.
