GLENCOE, ONTARIO, CANADA, THURSDAY, NOVEMBER 29, 1923

Whole No. 2706

FARM FOR SALE
50 acres on Henry Road, south quarter lot 15, in 2nd concession of Aldborough. Good frame buildings, and frame house practically new. One mile from high school; five minutes' walk from public school. Price \$4,500. — Wm. McMaster, Wardsville.

FOR SALE OR EXCHANGE
Reg. Imported Poland China hog, also sow and young pigs.—Bert Williams, Newbury, Ont.

CARD OF THANKS
The family of the late Mrs. John Allan wish to thank their many friends and neighbors for their kindness and sympathy during their recent bereavement.

CARD OF THANKS
Mrs. T. C. Rycraft wishes to express her thanks to the firemen and citizens for their prompt response to the call when fire broke out in her home. It was only due to their splendid efforts that the fire was gotten under control with but little damage being done.

POULTRY WANTED

Highest prices paid for all kinds of Poultry. Best prices paid for Geese. Write

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Christmas Specials

We are offering to the early shopper some wonderful values in Watches, Clocks, Jewellery, Diamonds, Pearl Neckties, Cut Glass, Silverware Waterman Fountain Pens and Eversharp Pencils.

WATCHES

Specials for Men and Boys—Regina, Hamilton and Elgin Watches. One hundred to be sold before Christmas, at prices never heard of in Glencoe. We are overstocked, and these Watches must be sold.

BOYS' SPECIAL
Boys' Watches, in strong, nickle case, while they last—\$1.65.

LADIES' BRACELET WATCHES

15-jewel movement, gold filled case, expanding or ribbon bracelet—\$12.75 to \$50.

White gold filled, oblong or square style case, finest 15-jewel adjusted movement—\$17.75 to \$35.

FRENCH IVORY

Manicure pieces.....25c to 50c
Combs.....35c to \$2.50
Mirrors.....\$3.50 up
Hair Brushes.....\$2.50 to \$10.50
Jewel Cases.....\$1.50 to \$6.50
Powder Boxes.....\$1 to \$3.50
Hair Receivers.....\$1.25 to \$3.75

DISTRICT AND GENERAL

Twenty-five carloads of baled hay were shipped from Forest to New York last week.

The scarcity of men in the northern lumber woods is trying up the operations of many large companies.

Free transportation will be provided to selected farm immigrants from Great Britain by the Canadian Government.

In Lambton the average yield of sugar beets this season will range from 8 to 17 tons per acre, testing from 13 to 17 per cent. sugar.

A Worcester, Mass., landlord is being sued for \$25,000 for alleged refusal to furnish heat, thereby causing the death of a woman tenant.

Big aircraft firms of England plan on producing an airplane for less than 100 pounds sterling. The cost of maintenance and operation will be slight.

Chas. Sarney, veteran newspaper man and at one time publisher of the Thamesville Herald, died at his home in Port Burwell last week in his 80th year.

The barn of Frank Dalton, West Dawn, was completely consumed by fire, together with a team of horses, several cattle and feed. The cause of the fire is unknown.

There is considerable decrease in the shipment of sugar beets from Dunwich this season, only ten cars being loaded at Dutton, which is less than half the number of last season.

Alex. McLachlan, one of the village councillors, was granted the tender of the management of the Alvinston skating rink for the season, for the sum of \$75, cash in advance.

D. A. Grant, an Aldborough boy, has been re-elected for the third term as superintendent of the Portland (Ore.) schools for three years. The position carries with it a salary of \$7,500 per annum.

Mrs. Denholm, wife of J. M. Denholm, publisher of the Blenheim News-Tribune, died last week while visiting at Parry Sound. Mrs. Denholm was a daughter of the late John McGregor, of Blenheim.

Municipal nominations this year in Ontario will be on Monday, December 31st, with elections on Monday, January 7th. In some municipalities, however, municipal elections are held on the first Monday in December.

Fat steers have been moving out of Middlesex county in large quantities during the last two or three weeks and a few carloads have been brought in from the West, costing around \$4.25 per hundred for good feeders.

A large barn, owned by William Jones, of Euphemia, was destroyed by fire when one of the horses kicked over a lantern. The barn and entire contents of season's crops were destroyed, although all the stock was saved.

John A. Morden, Westminster, was charged with shooting Hiram McGlone while gathering mushrooms some time ago. McGlone, who appeared in court on crutches, admitted that he was near an unoccupied house when he was shot and that he had no right there.

Hugh McDonald, one of the oldest pioneers of Dunwich township, died at his home at Wallacetown on Friday. For a number of years he was associated with the McDonald & Forbes Fishery Company. He was a member of the Wallacetown Roman Catholic church.

An indirect victim of the Home Bank failure is the unfortunate Italian woman in Toronto who, panic-stricken by that disaster, drew out all her money, amounting to \$13,000, which she had on deposit in banks, and hid it in the house, only to have it all stolen by a burglar.

The patrons of the Exeter barber shops are in for cheap shaves and hair cuts, the barbers having gone back to pre-war prices, 15 cents for a hair cut and 10 cents for a shave and neck shave. The barbers are about the only ones to get a good example to reduce the cost of living.

The director of the motor licensing department of Quebec announces that on the "black list" of his office are the names of almost eight hundred drivers, professional and non-professional, who cannot obtain driving licenses. Blacklisting of reckless drivers is one way of removing danger from the roads.

July saw the gold mines of Northern Ontario reach the pinnacle of production in their history. The output of the yellow metal was at the rate of \$25,000,000 a year. Porcupine's share was \$1,820,000, a northern writer estimates; Kirkland Lake, \$255,000. Added to this is the output of Cobalt and Lorrain silver mines, around a million ounces, and the nickel-copper production of the three big Sudbury mines.

FOR SALE
In Appin, new eight-roomed cottage, lot 76 by 175 feet. Apply to W. R. Stephenson.

DEATH OF MRS. JOHN ALLAN

Another of the esteemed pioneer residents of this section passed away at her home in South Ekfrid on Tuesday, November 20th, in the person of Mrs. Allan, widow of the late John Allan, in her 85th year.

Mrs. Allan's maiden name was Jean Webster. She was born in Kilmarnock, Ayrshire, Scotland, and came to Canada with her parents when about five years of age. The family settled on a farm near Port Stanley. Later they moved on the farm in Mosa township now owned by Savil Simpson. Mrs. Allan on her marriage some 62 years ago took up her home with her husband on the farm where she died, lot 24, 4th range south, Ekfrid. She leaves a family of three daughters and three sons—Mrs. James Dykes, of Marinette, Wis.; Mrs. J. D. Farris, of Coleville, Sask.; Mrs. Frank Hall, of London, and James, David and George, all of Ekfrid. She has one sister and two brothers—Mrs. Wellman, of Lexington, Mich.; James Webster, of Orford, and John Webster, of Brandon, Man.

The funeral was held from her late home on Thursday afternoon to Oakland cemetery, and was very largely attended. The service was conducted by Rev. C. H. Cooke, pastor of St. Thomas' Presbyterian church, of which deceased had been a member since that congregation was organized, and prior to that a member of the pioneer church, or Old Kirk, on the Longwoods Road, of which Rev. W. R. Sutherland was the minister for many years.

The pallbearers were W. J. Webster, of St. Thomas; J. D. Allan, W. G. Poole, D. A. Dobie, Stanley Dobie and Wm. Gates.

DIED IN EDMONTON

Many old Glencoe friends of the family will regret to learn of the death at Edmonton, Alberta, on November 15th, of Irene L. Enouy, aged 28 years, daughter of F. T. Enouy, Miss Enouy was connected with the Great-West Life Assurance Company, and is survived by her father and one sister, Mabel. Her mother predeceased her last April. The funeral was held from the residence of her uncle, N. M. Lynn, to the Edmonton cemetery. A great many friends, who will greatly miss the pleasant company of deceased, attended the funeral, says the Edmonton Journal. By special request Mr. and Mrs. Holtzman sang "The Homestead," also "Forever With the Lord" and "Lead, Kindly Light." The casket was covered with a profusion of beautiful flowers which were received from many relatives and friends, church organizations and business firms.

ATTEMPTED HOLD-UP

T. J. Thornton, who recently bought the Christner farm adjoining the village, was driving with his horse and buggy to his home near Crinan on Sunday evening when he claims to have been held up at Battle Hill by several men in a motor car. Putting his whip to the horse, he managed to get away from the outlaws, who later overtook him. He again eluded them by turning his horse and buggy in the opposite direction. Driving that he was still being pursued he ran into Nat Currie's and was not further molested. Mr. Thornton had received a considerable amount of money the day before and he thinks he hold-up men had some knowledge of the fact.

FALL FROM APPLE TREE FATAL

The death occurred on Wednesday afternoon at the family residence, lot 8, concession 13, Metcalfe, of James Henry Case, a well-known and highly-respected farmer, in his 64th year. Mr. Case suffered a fall about four weeks ago from an apple tree, when the limb broke on which he was standing while picking apples, dislocating his shoulder and hurting his spine, from which he never recovered. Mr. Case was born near Lapeer, Mich. and came to this country with his parents when about four years of age, settling in Caradoc, where he resided until about seven years ago, when he moved to Metcalfe township. Besides his widow he is survived by three sons and four daughters. The funeral services were conducted by Rev. M. Parr, pastor of the Appin Methodist church, and interment was made in the Strathroy cemetery.

R. A. Finn, county agricultural representative, expresses elation at the creditable showing made by the Middlesex county junior farmers' stock judging team, which finished in third place at the recent provincial championship stock judging contest, held at the Royal Winter Fair, Toronto. Nineteen counties had teams in the competition. York team secured first place and Wentworth second.

INCIPIENT FIRE

The firemen had a run at eight o'clock yesterday morning to the residence of Mrs. T. C. Rycraft, Victoria street, south. An overheated stovepipe started a fire in the partition between two rooms which was difficult to get at. The fire was finally overcome before much damage was done.

GAS ENGINE ON RUN

The C. N. R. purpose replacing the present passenger train out of Petrolia by a steel gasoline combination passenger-haulage car with a 550 h. p. engine and capable of carrying 60 passengers. The change is being made for economical reasons, it being estimated that the new service will require only three men to operate it against the five or six now employed. So far as the run between Petrolia and Wyoming is concerned it should be the clear McCoy, but the early morning run to Glencoe is a different matter and it remains to be seen how it will work out.—Petrolia Advertiser-Topic.

G. H. S. NOTES

Following the example of other high schools, the G. H. S. literary society has decided to have its meetings of this year take the form of a mock Parliament. Last Tuesday the first meeting was held, with the Speaker, Alex. Munroe, in the chair. The two rival parties, the "Go-aheaders," with Gertrude Lotan as leader, and the "Go-easies," under the leadership of William Trestrain, then presented their platforms. Five speakers for each side outlined the policy which that party pledged itself to carry out if elected. Six departments were developed: Finance, Education, Agriculture, Social and Moral Life, Athletics and Public Works. Very able speeches made clear the sharp distinction between the two platforms. The Go-aheaders were for progress, and among other reforms advocated the creation of a new school. The Go-easies were much more conservative and would simply remodel the present building. After each leader had criticized the platform of the other party and had appealed to the electors for support in the coming election, the pupils withdrew and voted. The Speaker announced the result—86 votes for the Go-easies and 34 for the Go-aheaders. The next day the Prime Minister, Hon. William Trestrain, announced his cabinet: Minister of Finance, Hon. William D. Moss; Minister of Education, Hon. Heien Gillies; Minister of Agriculture, Hon. Ida Irwin; Minister of Social and Moral Life, Hon. Ethel George; Minister of Athletics, Hon. John Allan; Minister of Public Works, Hon. Florence McEachren; Minister without Portfolio, Hon. Valentine Griffith; Party Whip, Sherman McAlpine. The Opposition is led by Gertrude Lotan, with Margaret McDonald as Whip. At the first meeting of the Legislature it is expected that some interesting debates will arise.

THE BIG TEN-DAY SALE MAKES J. N. CURRIE & CO'S A BUSY STORE

It is gratifying to the merchant of today when he can be assured that each member of his staff is busy with selling. In fact, to keep them so is one of the most trying problems. Merchandise is not on an equal basis with product, from the farm. This makes it all the more trying on rural merchants. To help overcome this price difference and make things a little more equal, a special sale for ten days at reduced prices is drawing the attention of the buying public at J. N. Currie & Co's store. Just at a time when so much merchandise is required and a chance to choose from such a desirable stock at reduced prices makes the store a busy spot. A splendid time to get the family supply of clothing, underwear, shoes, hosiery and heavy woollens of best standard qualities at reduced prices, avoiding the Christmas rush immediately following this big ten days' sale.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Soils and Crops

Address communications to Agronomist, 75 Adelaide St. West, Toronto

HEN-HOUSE LIGHTS HELP POULTRY PROFITS.

During the last few years the subject of artificial illumination for poultry flocks has been a topic of keen discussion. When the idea first became popular it was supposed that by some psychological process the hen was made believe that she was going through two days instead of one and naturally the old erroneous adage, "An egg a day" would mean two eggs a day. The process is purely a physiological one, however, and not one of psychology at all.

At present we can find records at most college plants and experiment stations which all point in the same direction—more winter eggs.

The underlying principle of artificial illumination is a problem in feeding. It is said that the crop of a hen will contain only enough feed to keep the digestive tract busy for a period of four or five hours. In other words, in the short winter days a hen goes to roost about 4.30 or 5.00 p.m. We have always attempted to send her to bed with a full crop, but now we see that this supply is going to be well on its way before midnight. Then where is the heat and energy to come from for body maintenance? We know that an animal body makes demands on the food and stored materials first for body maintenance. In other words, heat must be supplied. Broken-down tissue must be replaced, energy must be supplied and the natural secretion must be kept up. These functions we find take from three-fourths to four-fifths of all the feed consumed. The excess, if any, will be used for production, or in the case of a hen, for reproduction. We find that in the short winter days the hen has a small amount of excess food to be used for production, due to the short feeding hours and the long hours of inactivity.

The economies of artificial lighting reveals an increase in winter production which means an increase in profit when the price is high. While a slight increase can be expected in early production this is not great enough to add materially to the profits. We really take the heavy spring laying and distribute it over the winter months while prices are better.

Electric, gasoline and kerosene lights are used, but the most economical and successful is electric current. We find many people using gasoline lights and having excellent results. They are not quite as satisfactory, however, for a large plant, due to the labor in tending the lights. Kerosene lanterns do not give very satisfactory results. Automatic devices can readily be arranged for electric lights, thus reducing materially the labor. Where electric current is available two forty or fifty W. T. lights will light a pen 18x20 quite nicely. These lights should be arranged at a point slightly forward of the middle of the house and spaced about evenly from the ends. This reduces the shadows to a minimum. A single light tends to produce more shadows. The lights may be fastened to a rafter or joist. It is not necessary to drop the light closer than six or six and one-half feet from the floor. A reflector will aid materially in lighting up the floor area. One gasoline lantern will illuminate a pen 18x20 quite efficiently.

Since lighting is essentially a feeding practice it will be seen that it must be very regular and never failing. This has led to the use of several automatic devices being invented, to turn the lights on and off. This is practical only where electric lights are available. Many large plants use a time switch. This is an instrument designed to turn the lights on and off automatically. While the original cost is rather high it is doubtless a good investment on a large plant where many birds are being kept. We have, however, many simple home-made devices which rank with equal satisfaction and at a much less cost. These usually consist of alarm clock attachments. Possibly the simplest is an ordinary tumble switch set out from the wall. The alarm clock is then placed so the winding stem in turning throws the switch over. I have seen several modifications of this same idea

Distributing Liquid Manure.

A prosperous farmer who owned two hundred acres of valuable land also maintained a large herd of dairy cattle. The barns were carefully cared for, and all refuse was collected in a manure pit.

One end of the pit contained a sump in which the liquids ran. Since this liquid represented the most valuable part of the manure it was hauled out onto the fields as fast as it accumulated.

But so much time was consumed when disposing of it in the usual manner that a more economical means was sought. The farm owner had a two-ton truck, which was a sort of a general-purpose conveyance. It was decided to equip this with a tank and, by means of the exhaust gases from the engine, spray the liquids over the fields.

The tank held three hundred gallons. A faucet six-eighths of an inch

but they are all relatively simple, inexpensive and reliable. Any one who has a mechanical turn of mind and a genius for invention can easily fix up a home-made device at a very small cost.

EARLY BREAKFAST OR LATE SUPPER. Poultrymen are employing several systems of illumination which might be summarized as follows:

1. Morning light.
2. Evening light.
3. Combination of morning and evening light.
4. Night lunch method.

These possibly explain themselves. Where morning light is used the lights are turned on about 4.00 a.m. and off at daylight. This system has an advantage where electric lights are used. No dimming device is required as is necessary with evening lights. Feed and water can be put in the pens the night before and the attendant gets away from late hours at work. This system has a strong appeal to the bird man whose interests in the evenings are not in the chicken coop.

The evening light is often used where gasoline lanterns are used. The lights are put in at dusk and allowed to stay on until 8.30 or 9.00 p.m. A dimming device is necessary with this system in order to get the birds to roost. With lanterns this is accomplished by gradually turning down the light.

A combination system is commonly used by farmers who make a practice of turning the lights on in the morning when going to do their chores, and again in the evening.

The night lunch system consists of allowing the birds to go to roost as usual and putting the lights on about 8.00 o'clock for an hour while the birds are given a feed of scratch feed. This system is most economical on fuel, the lights being on but for a short time.

It is considered that a fourteen-hour day is possibly the correct length of lighting. We would not recommend using lights in excess of that amount.

FEEDING BIRDS UNDER LIGHTS. Birds under lights must be fed more than they otherwise would and must be kept on a constant diet. The birds are in heavier production and are exposed to just as much severe weather. The grain ration should be increased. Fourteen pounds of grain per day to each 100 hens would not be too much. This should be given in four feeds.

The common practice where morning lights are being used is to feed the birds before for morning. Grain is fed again at 8.00 o'clock, right after dinner, and again before the birds go to roost. The last feeding should be the heaviest, with a liberal feeding in the morning. If the birds do not consume large amounts of grain they are sure to lose in weight and go to pieces in the spring. A dry mash is kept before the birds at all times. It is advisable to increase the corn content ten per cent. to aid in maintaining body weight. The common practice where evening light is being used is to feed three times a day on grain. In the morning about three pounds; at noon about two pounds; and at dusk about three pounds per hundred birds. Then when the lights are turned on a feeding of about six pounds.

In addition to the above methods, care must be taken to keep a supply of clean water before the birds at all times. This is sometimes difficult in mornings when the water freezes over night. If there is snow on the ground dump the water in the evening and fill the dishes with snow. This will give very good results until water can be supplied a little later in the morning. Do not neglect the green feed and oyster shell.

LIGHTS IN SPRING.

Many persons using lights have had an unhappy ending to a productive winter by turning the lights off too suddenly in the spring. Any sudden change must be avoided and we usually take from two to three weeks to complete the change, cutting them down gradually a few minutes each day. This should be done about April 15. We plan on having the lights off by May 1. The early and late feeding must be continued even after the lights are turned off.

In diameter was attached to the outlet. The exhaust pipe was continued back of the muffler, and it terminated just beneath the rear end of the tank.

Fifty cents paid for a heavy galvanized iron dustpan of suitable type. This was soldered on the pipe and the seal also soldered, so that the exhaust would emerge and spread far wide across the upper side of the dustpan.

A short piece of hose was attached to the faucet and brought to within two inches of this outlet. After reaching the field, the driver set the faucet to discharge the proper quantity, then went on over the field, the exhaust throwing the liquid over an area from six to fifteen feet wide, depending upon the rate of discharge.

The great problem is to learn how to gain wealth honestly and efficiently and to distribute it justly while, at the same time, we continue to live together as neighbors.

Storehouse or Junk Heap.

A farmer friend of mine broke a better for me if given some feeding. Plants that are kept in pots year after year, like ferns and begonias, will require constant feeding, as well as re-potting now and then. It is better to keep up liberal feeding than to report on. Repotting will always check the plant some, provided it has not become so crowded for root room that it is already checked. I have known ferns to be kept growing well, with very little soil left in the pans, just by feeding regularly and well.

I never feed a weak plant or a sick one. A plant should be healthy and growing normally if feeding will benefit it, and a weak plant is likely to be killed outright by even a light dose of plant food. Neither do I feed plants when the soil is dry. The strength of the solution should be weak at first and gradually increased, while an application once in two weeks at first may be increased to weekly, and with heavy feeders even to twice a week.

For mixing into the soil, bone meal is a safe fertilizer. Most of the prepared plant foods have it as a base. Nitrate of soda and ammonia are good nitrogen carriers, and will make the foliage luxuriant and a deeper color. Too much nitrogen is likely to give foliage at the expense of flowers, and to dull the colors of some of the foliage plants. Bone meal is rich in phosphorus, and has some nitrogen.

English farmers learned during the war that sulphate of ammonia, of which the country had been exporting thousands of tons, was good for increasing crop production. Now they are using 230 per cent. more of this product than before the great conflict.

I find a six-inch rule the handiest thing in sewing, to turn hems, to measure widths in seams.—M. R. M.

How I Feed Plants.

Plants grown in pots thrive much better for me if given some feeding. Plants that are kept in pots year after year, like ferns and begonias, will require constant feeding, as well as re-potting now and then. It is better to keep up liberal feeding than to report on. Repotting will always check the plant some, provided it has not become so crowded for root room that it is already checked. I have known ferns to be kept growing well, with very little soil left in the pans, just by feeding regularly and well.

I never feed a weak plant or a sick one. A plant should be healthy and growing normally if feeding will benefit it, and a weak plant is likely to be killed outright by even a light dose of plant food. Neither do I feed plants when the soil is dry. The strength of the solution should be weak at first and gradually increased, while an application once in two weeks at first may be increased to weekly, and with heavy feeders even to twice a week.

For mixing into the soil, bone meal is a safe fertilizer. Most of the prepared plant foods have it as a base. Nitrate of soda and ammonia are good nitrogen carriers, and will make the foliage luxuriant and a deeper color. Too much nitrogen is likely to give foliage at the expense of flowers, and to dull the colors of some of the foliage plants. Bone meal is rich in phosphorus, and has some nitrogen.

English farmers learned during the war that sulphate of ammonia, of which the country had been exporting thousands of tons, was good for increasing crop production. Now they are using 230 per cent. more of this product than before the great conflict.

I find a six-inch rule the handiest thing in sewing, to turn hems, to measure widths in seams.—M. R. M.

Home Education

"The Child's First School is the Family"—Frederick

Correcting Faults—By Edith Lochridge Reid.

Many a well-meaning mother is laboring under a false idea of what really constitutes a training in right habits and proper attitudes in her child. Often she thinks she is correcting a fault when in reality she is only nagging at the child, or at best shouting very wildly around the mark.

Here is Edward. He is careless with his napkin. "I've been trying for six months to get him to fold it and put it in the ring," his mother observed, as we were clearing the table; "but he does it only about one time in ten." Now Edward's mother was actually sincere in her remark. Imagine! By her own admission she had struggled six months on the one little point of discipline. At the next meal I watched Edward. It was noon and before he was quite through his lunch his boy chum rang the doorbell and Edward dropped everything and dashed to school, of course, without folding his napkin. At dinner that night, we were going for a ride and everyone hurried, Edward included, and no one paid any attention whether he folded his napkin or not. Without elaborating any further, you mothers get the point. It would have taken perhaps a week of time and patience to sit right there at the table and keep an active boy right there also until he had learned to fold his napkin automatically. Anything worth while

takes time, but very few points in children's discipline require six months if properly handled. If we make a child do a thing himself one time in ten, and then do it for him the other nine times, it is absolutely every wasted all around, just like sewing the new patch on the old garment which is too thin and worn to hold the stitches.

Training children is like a business proposition: we get just what we go after. If we invest patience, time and thought in the task of correcting a child's habits the results are inevitably successful. It isn't always easy, nothing worth while is; but a week spent in correcting a fault takes less attention and energy than nagging for months with no definite object achieved after all.

Another point is very important in correcting faults. Be very sure the fault is a real one, that it bears directly on character training. If it is not one on which you are willing to expend time and patience to correct, then why mention it at all? But if a habit is really annoying and one that will prove embarrassing to the child and his friends through his life, then attack it at once and definitely and finally uproot it. Concentrate on that one thing until you and the child have conquered it, and never again will you have that particular trial to meet.

then there was a terrible 'bang.' I ran as fast as I could and hid in some bushes. In a few minutes I peeked out. What I saw I shall never forget! Mrs. Rolly Rabbit's hind foot hanging out of his big pocket. That was the last I saw of her.

I Fooled Dad. My dad doesn't believe in bothering with accounts, but he comes to me time and again and asks how we are coming with this cattle deal and that crop. I'm for accounts, and exacting ones, all the time.

Because we keep accounts we know the cheaper method of fattening our calves. We know the cost of hired labor at harvest of each crop. We don't need to gamble and wait for high markets, for we sell when our cost figures are covered by a fair margin of profit in the market. We've learned what crops in different fields pay more for the fertilizing costs, and why. Labor and time expended are all figured out. Not a sale or purchase is made but is entered in the right departmental column. My account of Mother's chick incubation and final sale was proof that when she thought she was making big profit she was barely covering costs. Accounts showed that her vegetable sales were bringing her big profit. She added acres on both sides of her vegetable patches and made lettuce her star seller and profit winner. I've proved to Father that one big truck of high horsepower did more service and cost less in upkeep than the two small trucks we had the year previous, figuring cost, repair, and gasoline.

All these little accounts mean more intelligent farming, with a complete knowledge of all branches of farm cost. The savings made have paid for my typewriter, book supplies, and many farm improvements, and have made farming 100 per cent. more interesting to me.—I. S.

Sods for the Pigs. Before it freezes up store a wagon load or two of good, tough, green sods away in the barn cellar, pit or shed. Such will be very useful to toss into the pig pens now and again during the winter months. The pigs need mineral matter and this is an easy, cheap and efficient way to give it to them.

Would Craze Him No Doubt. Wife (in humor for fun): "How do you like my new Egyptian vase effect dress?" Of course, it's guaranteed not to crack nor craze.

Hubby: "Went crack nor craze, eh? It'll craze me to pay for it. I don't doubt."

Democracy loses much through its apathy toward experts.

Co-operatives can weather the storms when founded on the rock of fidelity, but not on the sands of distrust.

Whatever progress is made in our rural program will come largely the result of education and organization.

There are said to be 3,424 spoken languages and dialects in the world, of which America has 1,624, Asia 937, Europe 587, and Africa 276.

But Rolly went on, "I saw a big man with one of those horrid bang-bang things pointing right at my wife. I was faint and hollered 'run.' Just

then there was a terrible 'bang.' I ran as fast as I could and hid in some bushes. In a few minutes I peeked out. What I saw I shall never forget! Mrs. Rolly Rabbit's hind foot hanging out of his big pocket. That was the last I saw of her."

THE CHILDREN'S HOUR

HIDE-AND-GO-SEEK WRITING. Little folks love jokes just as much as do grown-ups, and they are always anxious to turn the tables on their playmates, and even big folks.

Here is a little surprise trick that you can fool your little friends with, and perhaps papa and mamma.

Let me call it hide-and-go-seek writing. First, squeeze the juice of a lemon in a thoroughly clean ink bottle, being sure that every trace of ink has been removed. With a new steel pen point write with this fluid on ordinary writing paper.

The writing will be invisible and you will have to be careful to have plenty of the fluid on your pen. After this is thoroughly dry, press it firmly with a hot iron and you will be surprised to see the writing plainly.

It would be fun to write several lines on a sheet of paper and when daddy comes home from work to-night, to ask him what he sees on the sheet. When he tells you he can see nothing, pass the hot iron over the paper and surprise him by letting him read it.

Try this, too, when your little friends come to visit you in the afternoon to play games. With the lemon ink write the names of half of those present on a sheet of paper and pass them to those whose names you did not write. When they press these slips with a hot iron, they will learn who their opposite player will be in the next game.

WHY ROLLY RABBIT LIVES ALONE. "This is surely a fine evening," said Bruin. "The cool air makes my beestings feel much better. Those horrid bees! I'm afraid I shall run every time a bee now."

"Oh, they won't bother you unless you molest them," replied Rolly Rabbit. "But when you do trouble them, they are saucy fellows."

Rolly had just brought a chair out on the porch alongside Bruin's. He had finished up the supper work and was ready to enjoy the evening with his guest and newly made friend.

"You have a very pretty place here for your house," said Bruin, "and such near neighbors."

"They are old settlers over here," said Rolly Rabbit, pointing to the north. "It is a good fellow and makes a fine neighbor. 'Over there, pointing to the east, is Willy Woodchuck's house; and just beyond there is where Charlie Chipmunk lives."

"What a fine lot of neighbors," he said.

"Yes, but it doesn't seem like home any more," said Rolly with a sigh.

"You look so sad, kind friend. May I ask why?" questioned Bruin.

"I do not like to bother others with my misfortunes, but seeing that you ask me, I will tell you," said Rolly Rabbit. "Perhaps you have noticed that I live alone here."

London's Ancient Stalls Vanishing.

The ancient stall-holders of London are fast disappearing. One by one flower girls (a woman of any age up to four score who sells flowers in a girl) and various street vendors who have held advantageous places for a longer time than any one remembers die and no successors are named. There is not room for them in the bustle and hurry of present-day London life.

But London is the loser by the passing of these picturesque characters. Mother Kitchen and Mother Bury, the old Milkmaids of the Mall, have vanished, and "Fanny," a flower girl who sold fragrant blooms for more than a generation under the shadow of St. Paul's Cathedral, was borne to her long rest not long since, after services in Dr. Samuel Johnson's old parish church in the Strand.

A tiny apple stall beside the turreted gateway of Lincoln's Inn, the haunt of barristers in Chancery Lane, is the latest to disappear. The Inn has just celebrated the 500th anniversary of its foundation and the apple stall may well have been as venerable an institution in point of time. Old Mrs. Wise, who kept it, as her mother and grandmother before her did, has died and she left no descendant to come forward and claim a privilege granted by the benchers of the Inn for some reason long ago forgotten. Her mother was there in Dickens' time assisting her mother.

Dickens was a frequenter of this quarter of London and gave the narrow, dingy alley of Chancery Lane as well as other streets and alleys leading out of Fleet Street and the Strand, close by, such interesting associations that every week scores of pilgrims pass in and out searching for the originals of places made immortal by the novelist in his works.

New Safety Device for Miners.

A "singing" lamp is the latest invention to aid miners to detect fire-damp, which they fear more than any other hazard of their calling. Canaries and animals sensitive to slight atmospheric changes have been long used for this purpose, but now a safety lamp has been invented that combines the necessary light for the underground workers and the giving of ample warning of the approach of the dreaded fire-damp.

Fire-damp leads to explosions; breathing it is dangerous, and its approach is so insidious that the damage may be done before it is discovered by the men if they are not warned.

A British engineer has improved the Davy safety lamp by adding a peculiar frame like a bunch of tuning forks, so sensitive that even two per cent. of fire-damp in the air will cause them to vibrate and sing.

As the percentage of fire-damp increases the lamp sings more loudly, affording ample warning.

The device has been tried in some of the deepest anthracite mines, and practical mining engineers of long experience say that it is the best warning ever devised.

Pleasant.

Here is my little piece of land That I've dug, every inch by hand. While I cursed, haggled, sweat, and prayed, And once I get the mortgage paid, There'll have to be tall talking, sir. To prove to me that I should stir One inch from my one-acre plot To fight old Hare for young Have-Not. Finders is keepers, and I've found Some bitter things in this good ground:

Sullen, pinched possessiveness, Absorption in my own distress, Conservatism that won't budge So long as I'm left free to drudge On my own dirt-heap, and to spit On my own hands while working it.

—Robert Louis Burgess.

The Talking Ray.

At the annual assembly of the British Association, a demonstration was given in connection with the talking ray of the wonderful photophone.

The greatest advantage of this apparatus is its secrecy: only persons to whom the ray is directed can receive the message.

A ray of light is reflected from an electric lamp, and the vibrations of the human voice cause the light ray to tremble and oscillate slightly. These tremblings are picked up at the receiving end of the photophone by selenium coils, and translated back again, through a telephone receiver, into intelligible sounds.

Unfortunately, the range of the light-photophone is limited by the curvature of the earth, as the source of light must be in a direct line with the person receiving.

Happy Savings.

When you're all tired out and ready to drop And men's ways seem mean and vile, Don't frown at a scowl and glare at the world—

Surprise them all with a smile. 'Twill take less out of your tired old bulk, 'Twill tide you over a while; For it takes sixty-four muscles to fashion a frown, And only thirteen for a smile.

—Alice M. Cahill.

"The human body is the vehicle of a colossal and absorbing evolutionary experiment," said Sir Arthur Keith, the famous scientist, recently.

Make Effort to Learn Flight Line of Geese.

An interesting experiment with wild Canada geese is being carried out at the Central Experimental Farm, Ottawa, by officers of the Poultry Division of the Department of Agriculture and of the Canadian National Parks Branch of the Department of the Interior. This experiment is carried out to secure valuable information concerning the habits of these birds and it is hoped that it will result in having large flocks of these geese roost on Dow's lake, an expansion of the Rideau canal near the Farm during their migrations north and south next year.

"Jack" Miner, the well known and original investigator of wild goose life, is assisting the government officials in the experiment. Four wild Canada geese caught on his sanctuary at Kingsville, Ontario, early in May, were wing-clipped and sent to the Central Experimental Farm, and these, together with five geese raised this year by four captives Canada geese at the Farm, are being used in the experiment. Each of the geese caught by Mr. Miner wears one of his bands. These bands bear a scriptural text and his address, the inscription on one of these reading, "The word of the Lord endureth forever." 1 Peter, 1:25. Write Box 46, Kingsville, Ont."

The other bands bear different passages and the address. The birds have also been banded with the official numbered band of the series in use by both the Canadian and United States authorities for marking wild birds.

The geese, which are now full grown, have been placed with the Miner geese, and the flock makes repeated trips to Dow's lake. With the period for southern migration nearing those interested in the experiment are watching the birds to see whether the younger geese will follow their older companions, or will remain at the Farm with their parents. It is hoped they will go south and return in the spring with more of their kind possibly to stop at Dow's lake on their northern journey.

One danger is that these birds may drop in with domestic ducks and geese unsuspecting any danger. If wild geese bearing bands as described join any domestic flocks between Ottawa and the South Atlantic coast, or between Ottawa and the mouth of the Mississippi river (depending upon which route they follow) it is hoped that they will not be killed but allowed to resume their journey. It is desired to learn as much as possible of their travels. If, therefore, persons who hear of any of these birds, or hunters who happen to shoot one, will communicate the particulars to the Commissioner of Canadian National Parks, Ottawa, Canada, their action will be appreciated. If the bird is alive and able to travel the number on the band should be read carefully and the bird released.

One danger is that these birds may drop in with domestic ducks and geese unsuspecting any danger. If wild geese bearing bands as described join any domestic flocks between Ottawa and the South Atlantic coast, or between Ottawa and the mouth of the Mississippi river (depending upon which route they follow) it is hoped that they will not be killed but allowed to resume their journey. It is desired to learn as much as possible of their travels. TEETHING TROUBLES

Baby's teething time is a time of worry and anxiety to most mothers. The little ones become cross, peevish; their little stomach becomes deranged and constipation and colic sets in. To make the teething period easy on baby the stomach and bowels must be kept sweet and regular. This can be done by the use of Baby's Own Tablets—the ideal laxative for little ones. The Tablets are a sure relief for all the minor ailments of childhood such as constipation, colic, indigestion, colds and simple fevers. They always do good—never harm. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The greatest feature in the evolution of human life is perhaps the discovery of the uses of fire and its application to cooking.

Ask for Minard's and take no other.

Insects as Policemen!

The world's most novel police force is probably that which is being trained by a London scientist.

It consists of insects! They are bred and trained in a laboratory at Balham, to fight against and kill other insects which destroy or harm crops.

For instance, caterpillars can be prevented from ruining trees and so on by turning against them hordes of other caterpillars, trained to have cannibal instincts, so that they will fight and eat pests.

The inventor of this aid to farmers and gardeners is Mr. Crabbe. One of his greatest successes is the production of a slug-eater. This creature, called a testocella, has very sharp jaws, with which it pierces the slugs and eats them.

Almost any kind of insect pest can be fought by other insects, and as time goes on it may be possible to make the process of destruction absolutely natural. That is to say, the insect-killers will breed without any assistance from science.

Russian Horse Hair Best for Violin Bow Strings.

Horses are bred in Russia for the purpose of using their hair for violin bows, according to an interesting article in a recent issue of the Scientific American. The finest bows are constructed with hair from white horses and special ranches are maintained for breeding the horses whose hair is of this color.

The primary sorting of the hair takes place at the ranch, from which it goes to the bleacher, who bleaches the hair with sulphur. It is bound up in hanks of 100 to 150 hairs, and the hanks are then ready for export. One hank usually goes to a bow. On arrival at the bow factory or the repair room of the large dealer the hair is combed out and fixed on the end with shellac.

The hair is straightened out by means of a special comb and fastened into the frog at the lower end of the stick.

Church Built From One Tree.

Santa Rosa, in California, has a Baptist church which seats 200 people, built entirely from one giant redwood which, whilst standing, was 18 ft. in diameter.

This giant tree produced 78,000 ft. of lumber, besides many thousands of shingles with which the church was roofed. After the building was completed 60,000 shingles were left over.

The tree grew upon a high mountain range fifteen miles from the Pacific coast, and when felled was estimated to be 800 years old. It took several days to cut the tree down and months to saw it out.

But even this tree was a mere infant when compared with some of the giant sequoias of California. One, when felled, was found to have started its growth in A.D. 550.

China, Perhaps.

Surnames and Their Origin

FERGUSON
Variation—Farquhar.
Racial Origin—Scottish.
Source—A given name.

The family names Ferguson and Farquhar sound very little alike. Yet they are virtually the same name, originating as given names in ancient Ireland, being brought to Scotland as such, and there, under both English and medieval Latin influences, developing respectively into the foregoing forms of family names.

The name of Fergus figures prominently in the Gaelic myths, legends and history of the pre-Christian era. But the spelling Fearghus is a closer approximation of it as spelled with the old Irish alphabet.

About the period 200 A.D., before Ireland became Christianized, there was a great exodus of expeditions of conquest and colonization from the north of Ireland to Scotland. The Irish clans which settled in Scotland, or Alba, as they called it then, were the progenitors of the present Gaelic portion of the Scottish race, for the most part Highlanders.

This name, which was compounded of two Gaelic words, with a meaning of "manly deed," developed in Scotland into the form Fearchar in many instances, from which the Latinized version Farquhardus was taken, later being shortened into Farquhar.

The addition of the Anglo-Saxon ending "son" to the Celtic name Fergus (a much more common mixture of tongues in Scotland than in Ireland), of course produced the family name of Ferguson.

ARMSTRONG
Variation—Armstrong.
Racial Origin—E. Angl.
Source—A nickname.

The family name of Armstrong, of course, is most celebrated and widespread, as a result of having been borne for centuries by one of the most influential clans of the Scottish lowlands. But it is by no means borne only by Scots, and it is a product of the English, not the Gaelic tongue.

The name appears to have sprung up independently, in many localities, being a sobriquet or nickname of the type denoting a physical characteristic. Such nicknames were quite common in medieval England. Its meaning, of course, is exactly what it seems, "strong arm."

A strong arm has become obsolete and is very rarely met with in the United States is "Strongtharm." There is no doubt that in the cases of a number of families the name is simply the Anglicized equivalent of the Norman-French "Bras-lefer" or "Bras-lefer" ("arm of iron"), adopted at the period when the Anglo-Saxon influence reasserted itself throughout England.

There is a legend that the name of the founder of the Armstrong border clan was named Fairbairn, but that a Scottish king conferred the former name on him for his feat in aiding the monarch to mount his horse, burdened with heavy armor as he was, when his former steed had been killed under him in battle, a legend borne out by the crest, which shows an armored arm, with the hand grasping an armored leg, evidently meant to illustrate the act mentioned.

STOMACH TROUBLE DUE TO THIN BLOOD

It Usually Disappears When the Blood is Made Rich and Red.

Thin blood is one of the most common causes of stomach trouble. It affects the digestion very quickly. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened and there is a loss of nerve force. In this state of health nothing will more quickly restore the appetite, digestion and normal nutrition than good, rich, red blood.

Dr. Williams' Pink Pills act directly on the blood, making it rich and red, and this enriched blood strengthens weak and exhausted tired muscles and awakens to normal activity the glands that supply the digestive fluids. This is shown by an improved appetite, and soon the effect of these blood enriching pills is evident throughout the whole system. You find that what you eat does not distress you, and that you are vigorous instead of irritable and listless. If your appetite is feeble, if you have any of the distressing pains and symptoms of indigestion, you should at once take Dr. Williams' Pink Pills and profit by the better condition in which they will put your blood.

These pills are sold by all dealers in medicine, or you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

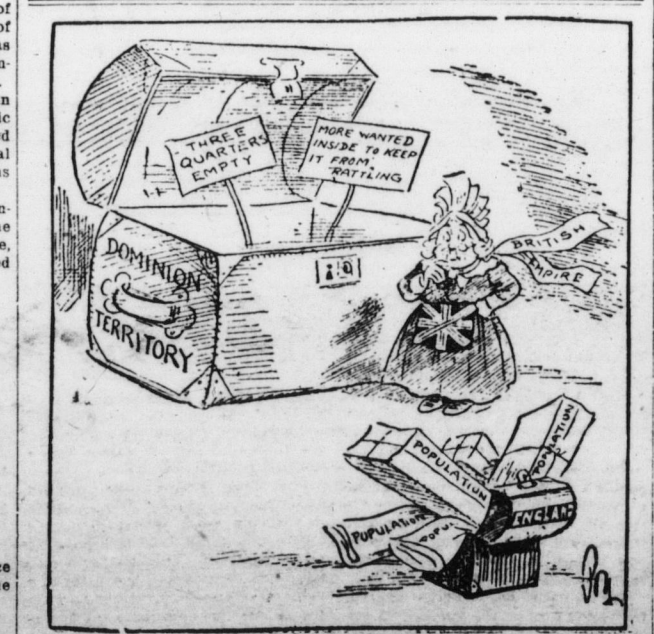

The Power of Light.

It has been pointed out that not only the direction and intensity of light but its color must be considered in estimating its power to reveal fine details.

Experiment shows that most persons are shortsighted for blue and violet light. When patterns are illuminated alternately with red, green and blue light it is found that for ease of seeing minute details blue and green light are preferable to red for short distances but that at greater distances red light gives the best results.

Truth is personified as feminine; but why, nobody knows.

THE PROBLEM OF PACKING

Surely there is some better method than this!

(The question of emigration as a means of relieving congestion in the British Isles and peopling the empty spaces of the overseas Dominions must soon be solved).—From the London Evening News.

Writing by the Mile.

The aggregates of all the things we do in life, such as the steps we take, the words we speak, the beatings of the heart, and so on, grow to huge proportions.

But have you ever asked yourself how many miles you write in the course of a year? Sit down and see how many words you write a minute. If you are a brisk penman you will easily write thirty—a series of twelves and twelves that, stretched out into a straight line would cover a distance of sixteen feet or more.

An easy calculation will bring the fairly rapid writer to the conclusion that in forty minutes of continuous writing his pen travels a furlong, and that in five hours he covers a third of a mile with his pen-point.

Supposing that a clerk writes steadily for five hours during 280 days for every one of fifty years, he will at the end of his time have drawn a line on paper nearly four thousand miles long, or much farther than the distance from London to Toronto. An office staff of six men would in the same period put an ink line round the equator.

Night Work.
"When was Rome built?" asked the teacher.

"At night, ma'am," was the surprising reply of one little girl.
"How did you get that idea?"
"Please, ma'am, I've heard my dada say that Rome wasn't built in a day."

Look Younger

Care-worn, nerve-exhausted women need Bitro-Phosphate, a pure organic phosphate dispensed by druggists that New York and Paris physicians prescribe to increase weight and strength and to revive youthful looks and feelings. Price \$1 per pkge. Arrow Chemical Co., 25 Front St. East.

BABIES LOVE
MRS. WINSLOW'S SYRUP
The Infants' and Children's Regulator
Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly overcomes colic, diarrhoea, flatulency and other like disorders. The open published formula appears on every label.
At All Druggists

INDIGESTION, GAS, STOMACH TROUBLE

"Pape's Diapepsin" is the quickest, surest relief for indigestion, gases, flatulence, heartburn, sourness, or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages of Pape's Diapepsin.

Mother! Give Sick Child "California Fig Syrup"

Harmless Laxative for a Bilious, Constipated Baby or Child.

Constipated, bilious, feverish, or sick, colic babies and children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely.

It sweetens the stomach and starts the liver and bowels acting without gripping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits! Insist upon genuine "California Fig Syrup" which contains directions.

ASPIRIN

Say "Bayer" and Insist!

BAYER
Genuine

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product, proved safe by millions and prescribed by physicians over twenty-three years for Colds, Headache, Toothache, Lumbago, Rheumatism, Neuralgia, Pain, Pain.

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Nonoceticacidester o' Salicylicacid. While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Don't wait till you get the "flu." Inhale Minard's night and morning. The great preventive.

MINARD'S
"KING OF PAIN"
LINIMENT

GIRLS! A GLEAMY MASS OF BEAUTIFUL HAIR

35-Cent "Danderine" So Improves Lifeless, Neglected Hair.

An abundance of luxuriant hair full of gloss, gleams and life shortly follows a genuine tanning up of neglected scalps with dependable "Danderine."

Falling hair, itching scalp and the dandruff is corrected immediately. Thin, dry, wispy or fading hair is quickly invigorated, taking on new strength, color and youthful beauty. "Danderine" is delightful on the hair; a refreshing, stimulating tonic—not sticky or greasy! Any druggist.

Face Disfigured With Large Pimples Cuticura Healed

"For some time my face was affected with pimples and skin eruptions, which by times would be very distressing. The pimples were very hard and large, and turned bluish when rubbed or picked, which caused disfigurement."

"I was treated but it did not prove satisfactory. I read an advertisement for Cuticura Soap and Ointment and decided to try them, and after using two cakes of Cuticura Soap and two boxes of Cuticura Ointment I was healed." (Signed) Mrs. Earl Cooke, Box 374, Napanee, Ontario.

Cuticura Soap daily, with Cuticura Ointment occasionally, prevents pimples or other eruptions. They are a pleasure to use, as is also Cuticura Talcum for perfuming the skin.

Sample sent Free by Mail. Address: "Cuticura, Inc., Dept. 244, P.O. Box 107, Malden, Mass."

Where: Soap & Ointment 25c each, Talcum 10c. 100c Cuticura Soap shaves without soap.

BEFORE MY BABY CAME

I Was Greatly Benefited by Taking Lydia E. Pinkham's Vegetable Compound

Sydenham, Ont.—"I took your medicine before my baby was born, as it was a great help to me as I was very poorly until I had started to take it. I just felt as though I was tired out all the time and would have weak, faint spells. My nerves would bother me until I could get little rest, night or day. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman. I am doing what I can to recommend this good medicine. I will lend that little book you sent me to any one I can help. You can with the greatest of pleasure use my name in regard to the Vegetable Compound if it will help others take it."—Mrs. HARVEY MILLIGAN, Sydenham, Ont.

It is remarkable how many cases have been reported similar to this one. Many women are poorly at such times and get into a weakened, run-down condition, when it is essential to the mother, as well as the child, that her strength be kept up.

Lydia E. Pinkham's Vegetable Compound is an excellent tonic for the mother at this time. It is prepared from medicinal roots and herbs, and does not contain any harmful drugs. It may be taken in safety by the nursing mother.

ISSUE No. 48-28.

Heroic Service Recognized

A system of awards for heroic conduct — acts of outstanding courage and devotion to duty — has been inaugurated by the Bell Telephone Company of Canada. Eight awards were made recently covering the years 1921 and 1922. The record discloses some incidents of remarkable heroism and resource in the face of great danger. To cite only two of them:

John Joseph Carmody, cable splicer, was working away at the foot of a high telephone pole in Kingston a short time ago, when happening to glance upwards he saw a fellow employee at the top of the pole lose his balance and begin a long fall of

thirty feet to the ground. Carmody had only an instant to decide what to do. Gauging the line of flight with all the skill of an oldtime baseball catcher, he braced himself to receive the full impact of the falling body. The man struck squarely on Carmody's back with the result that instead of being killed he received only minor injuries. Carmody was himself only slightly hurt.

Francis Bartholomew Wood, cable splicer, was working on the top of a pole at Ottawa, when a companion on another pole eighty feet away, called to him that he was about to faint!

"Throw yourself over the suspension wire," shouted Wood, "I'll

be there in a jiffy!" He was as good as his word. The sick man was unconscious and hanging limp across the wire, but Wood, no other help being available, was able single-handed to fasten a rope about him and to lower him safely from his perilous perch. Then applying first aid, he soon brought his companion back to consciousness.

The other awards made were for deeds equally praiseworthy. They were chiefly to operators who continued at their switchboards in the face of advancing fire and flood. An handsomely engraved certificate, with a substantial present in the shape of silverware or gold timepiece accompanied each award.

SCOTCH LASSIES FIND NEW HOMES AWAITING THEM IN CANADA

SHOULD the "hired girl" or the "maid of all work" of times gone by take a look into the present day situation, the shock would be severe and possibly fatal.

Signs of the times show conditions to be improved in relation to the "domestic." When the above group of girls from the British Isles arrived at Dorchester House, Montreal, after crossing to Quebec by the Canadian Pacific S.S. Montcalm, to take up domestic service in Canada, the street was literally lined with limousines and smart touring cars.

After the formalities of interviewing and the signing of papers, the authorities of Dorchester House might easily say "Yes! we have no maids," as all of the group of excellent Old Country lassies found immediate employment. There were approximately fifty in the consignment and there were well over fifty waiting homes for them. The Rev. John Chisholm, who is seen in the illustration as a prominent factor in bringing to Canada an excellent type of domestic servant and he follows his work up by seeing that the individual girl is placed in a house congenial to her. These girls are from all parts of the Old Country and are representative of all religious bodies. It is invariably arranged that girls are placed in homes of their own religious denominations.

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—In Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townpeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

The marriage of Minnie, daughter of the late William and Mrs. Randless, of Wardsville, to Mr. Carter, of Thorold, was quietly solemnized at the bride's home recently by Rev. R. J. Murphy.

Airplanes will be used for business and pleasure in the United States within the next ten years on a scale commensurate with the extension of automobile traffic between 1905 and 1915, it is predicted in a statement issued by the department of commerce.

John McDougall, a former Alvinston boy, and son of Mrs. Dan McDougall, of Alvinston, was shot and killed a few days ago at Fort Frances. Particulars have not yet been received, but it is supposed that the shooting was the result of an accident while on a hunting expedition.

Miss Mona McKeown, daughter of Mr. and Mrs. W. H. McKeown, of Cairo, and Joseph Cross, second son of G. H. Cross, of Alvinston, were married at the Divine Street Methodist parsonage in Sarnia on Wednesday, November 14. The young couple will make their home in Euphonia.

The construction of a telephone system on the St. Clair branch of the Michigan Central Railroad from St. Thomas to Courtright, a distance of 90 miles, and the rebuilding of the present line from Petrolia to Oil Springs, is under consideration jointly by the Michigan Central. Trains are at present dispatched by telegraph.

A claim for more than \$1,000,000 is to be made by manufacturers and sales agencies of motor cars at Windsor against the Canadian Government. The claim is for rebate by the Government of luxury taxes paid by dealers in excess of the amount they were obliged to pay before the revision of taxes went into effect at Ottawa.

According to the January report on vital statistics, issued by the Dominion Government at Ottawa, 310 persons died from tuberculosis and 400 from cancer in Canada in January of this year. The deaths from cancer average about 100 per week in Canada. In view of this, and of the greater suffering entailed, it must now be regarded as a greater scourge than tuberculosis.

To commemorate the fiftieth year of its publication the Amherstburg Echo has issued a souvenir edition on which its staff must be warmly congratulated. Extending to twenty-eight pages, with special sections descriptive of the progress and present state of the town, handsomely illustrated with cuts and portraits, the special number is a credit to the Echo and also to Amherstburg itself.

The five young men near Cayuga who as a Halloween prank last year removed a red lantern from the entrance to a bridge, which was down, and which resulted in Dr. John Jacques, a veterinary surgeon, being instantly killed when he motored into the trap and his car crashed down into the creek, have been ordered to pay the widow \$500 each as well as all the costs of the action, and to furnish securities for their good behaviour for three years.

At the time of the recent eclipse of the sun, September 10, along the southern coast of California there were on the state highway 140 miles of automobiles, packed closely together. The occupants were journeying from Los Angeles to San Diego and Tia Juana, Mexico, to see the total eclipse. Traffic moved at six miles an hour, and 1,000 arrests were made for cutting out of line and endangering others on the Torrey Pines Grade, just out of San Diego. Gasoline stations were drained early in the day and fuel was sold for forty cents a gallon instead of fifteen cents.

Here and There

Exports in Canada's inter-Empire trade last month exceeded imports by over \$12,000,000. Against imports from 26 countries belonging to the British Empire, amounting to \$15,715,000, Canadian exports of goods amounted to \$27,885,000.

Noel Victor Fearnough, aged seven weeks, son of a farmer of Morris Alberta, the youngest child on record to travel alone, left pool, England, in charge of officials of the Canadian Pacific Railway and Steamship Lines throughout the trip.

An experiment in shipping Canadian peaches to England has proven successful. The peaches were packed in small boxes and placed in cold storage, reaching London in fine condition. There is likelihood of an increased demand for Canadian peaches.

Representative of the best sheep and swine blood of Great Britain, 33 animals imported from the Old Country arrived in Regina, Saskatchewan, recently. There were 19 sheep and 16 hogs in the shipment. The animals were bought by the government for farmers in the province.

Canada's highest lookout station has been completed and will be ready for use next year. It is situated on Mount Carleton, near Revelstoke, British Columbia, and is 8,623 feet above sea-level. It will be used for the detection of forest fires and for meteorological and other observations.

The Canadian McIntosh red apple is the champion apple in the British Empire, so judges at the Imperial Fruit Show, which opened in Manchester recently, adjudged. They also decided that Cox orange pippins, from British Columbia, on the whole, are the best of the sixteen exhibits from overseas, and winners, therefore, of the "Daily Mail's" fifty-guinea cup.

What is declared to be a world's record for the transportation of grain has just been achieved by the Canadian Pacific Railway. In one period of 24 hours there were moved from Winnipeg for the head of the lakes 1,776 loaded cars. The best previous record, also held by the Canadian Pacific Railway, was 1,579 cars, moved east on October 25th, 1921.

One thousand young buffalo will be taken from the Dominion park at Wainwright, Alberta, and turned loose in the north in the region in which wood buffalo are found. Hon. Charles Stewart, Minister of the Interior, announces. This will prevent the slaughter of these animals made necessary by the increasing size of the Wainwright herd.

A dispatch from London says that the gold medal of the British Dairy Farmers' Association has been awarded to the Government of Ontario for its collection of dairy produce, including bacon, dead poultry and eggs, at the Dairy Show held there recently. First prize in the colonial farming section, namely the silver medal was won by the Ontario Dairy Farmers' Association of Guelph, and the bronze medal was awarded to H. Leclerc, of Montmagny, Quebec.

Details have just been announced concerning the "Aorangi," the new motor ship that is being built by the Motor Steamship Company of New Zealand.

The motorship is under construction at the Clyde yards of the Fairfield Shipbuilding Company and when completed will be the largest motorship in the world, having a displacement of 20,000 tons. On the Pacific she will be exceeded in size only by the "Empress of Canada" and the "Empress of Australia," of the Canadian Pacific Railway Company, which is her agent.

All grain shipment records for the prairie provinces have been shattered during the past two months. Since the commencement of the crop year, September 1st, loadings totalled 121,505 cars, representing 169,053,085 bushels, against 158,795,320 bushels handled in the same period last year. If this quantity the Canadian Pacific load—123,469 cars, representing 160,507,045 bushels—be added, the total for the 1922 period is 220 bushels.

The death at the home of her sister, Mrs. Donald McPherson, Cowal, on Thursday, November 15, of Mrs. Catherine McNabb, relict of the late Mungo McNabb, removed a pioneer of West Elgin. The deceased had reached the age of 90 years. She was born in Scotland, and came to Canada in childhood, settling in Southwold, where she resided for nearly eighty years. Her husband died nine years ago.

The province of Quebec has received 10,917 immigrants in the course of the summer, according to figures by the Provincial Director of Colonization. These immigrants, who have established their headquarters in Quebec, arrived there through the ports of Quebec, Montreal, St. John, New York, Halifax, Portland and Boston. Divided by nationalities, the immigrants were classified as follows:—English, 2,115; Scotch, 1,194; Irish, 1,136; Belgian, 71; United States, 2,890; and other countries, 2,692.

"Paw, what is a gentleman farmer?" "One that raises nothing but his hat, my son."

Renew your daily newspaper subscriptions at The Transcript office.

SAFETY FOR ALL

"Safety for all" appears to be a most desirable slogan in this day and generation when too many chances are taken by the average individual. Increased safety is a demand that should be made by modern industry, as accidents reported to our Provincial Compensation Board have shown a very large increase in 1923 over the same period in 1922; in fact, each month in 1923 so far has averaged nearly 1,000 more accidents than in 1922. This must give considerable food for thought to management and men, for both employer and employee stand to lose time and money by the preventable accidents occurring in industry today. It has been truly said, "Accidents do not happen; they are caused," and in many cases it must be apparent that certain conditions or practices are bound to lead to accidents. For this reason those vitally interested in industry in Canada, and that means all of us in the country, should take a share in securing greater safety for all.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Save her many fatiguing miles

What more welcome Xmas gift for your wife or mother than an extension telephone?

The time and strength used in running up and down stairs to answer or make telephone calls can be better employed.

Extension telephones cost only \$1.24 a month! The charge for installing is only \$1.00! They are a wonderful convenience.

If you order now, we can install an Extension telephone for Christmas.

Every Bell Telephone is a Long Distance Station

NOTICE OF APPLICATION FOR DIVORCE

NOTICE is hereby given that David McFarlane, of the City of Windsor, in the County of Essex, and Province of Ontario, Mechanic, will apply to the Parliament of Canada, at the next session thereof, for a Bill of Divorce from his wife, Eliza McFarlane, late of the Town of Glencoe, in the County of Middlesex, presently of address unknown, on the ground of adultery and desertion.

DATED at the City of Windsor, in the County of Essex, in the Province of Ontario, this 21st day of November, A. D. 1923.

J. E. TAYLOR, Windsor, Ont., Solicitor for the Petitioner.

THE BANKRUPTCY ACT

In the Estate of John Grier Best, Authorized Assignor.

NOTICE is hereby given that John Grier Best, of the Village of Glencoe, in the County of Middlesex, Oil Operator, did on the 19th day of November, 1923, make an authorized Assignment of all his property for the benefit of his creditors, and that Edmund Weld, Official Receiver, has appointed me to be the custodian of the estate of the debtor until the creditors at their first meeting shall elect a trustee to administer the estate of the debtor.

NOTICE is further given that the first meeting of creditors in the above estate will be held at the office of Edmund Weld, in the Court House at London, Ont., on the 7th day of December, 1923, at eleven o'clock in the forenoon.

To entitle you to vote thereat, proof of your claim must be lodged with me before the meeting is held. Proxies to be used at the meeting must be lodged with me prior thereto.

And further take notice that if you have any claim against the debtor for which you are entitled to rank, proof of such claim must be filed with me within thirty days from the date of this notice, or, from and after the expiration of the time fixed by subsection 8 of section 37 of the said Act, I shall distribute the proceeds of the debtor's estate among the parties entitled thereto, having regard only to the claims of which I have then notice.

DATED at Glencoe, Ont., this 23rd day of November, A. D. 1923.
W. F. HATYER, Glencoe, Ont., Custodian.

Tillsonburg, Ont.

Harry Brown has issued a writ against the township of Adelaide, claiming \$600 for damage done to his auto and for bodily injuries received when he met with an accident recently on one of the township roads.

On November 14th James Alexander Steadman, of the 6th line, Brooke, son of Mr. and Mrs. John Steadman, was united in marriage to Miss Lillie Pearl Morgan, of the 4th line, Warwick, only daughter of Mr. and Mrs. Andrew Morgan.

The Guild meeting held on Monday evening was in charge of the missionary committee and an interesting program was arranged. Musical numbers consisted of a piano solo by Miss Elma King, and vocal solos by Mrs. A. E. Sutherland and Miss Muriel Weeks. Papers were given by Mrs. Jamieson and Martin Abbott. The social committee are preparing an attractive program for next Monday evening.

The bazaar held in St. John's school room on Friday last week under the auspices of the Ladies' Guild proved successful. Though the weather was not favorable a fairly large crowd attended. Booths of fancy work, homemade candy and the bran pie especially were very attractive. A delightful chicken supper was served at six o'clock by the ladies of the Guild. Proceeds of the day were most satisfactory to all.

BIBLE THOUGHT FOR TODAY

Bible Thoughts memorized, will prove a precious heritage in after years.

SURE GUIDANCE:—In all thy ways acknowledge him, and he shall direct thy paths.—Proverbs 3: 6.

Born

PATTERSON.—At North Ekfrid, on Wednesday, November 14, 1923, to Mr. and Mrs. B. F. Patterson, a daughter—Lorena May.

WATSON.—In Ekfrid, on Thursday, November 15, 1923, to Mr. and Mrs. G. E. Watson, a son.

Died

McCALLUM.—In Ekfrid, on Tuesday, November 27th, Catherine, beloved wife of Christopher McCallum, in her 63rd year. Funeral service at the family residence, Longwoods Road, on Friday, November 30, at 2 o'clock; interment in Oakland cemetery.

In Memoriam

CORNEIL.—In loving memory of John M. Cornell, who passed away at his home, Melbourne, Ont., on November 30th, 1918.

—Wife and Children.

TOWN AND VICINITY

Radio fans should remember that there is a penalty of from \$50 to \$500 for non-payment of licenses. The fee is \$1.

The Great War Veterans' Association are arranging for a New Year's ball on the evening of Monday, December 31st.

Rev. D. G. Paton received word on Saturday of the death of his sister-in-law, Mrs. (Dr.) Paton, of Kenora, and left for there on Sunday at noon.

Grant Hibbert, teller at the Bank of Montreal, has been transferred to the branch at Mount Forest, and is succeeded here by Mr. Harris, of Sarnia.

Gordon Foote, Wabash railroad brakeman, of St. Thomas, was struck and fatally injured, it is believed, by an express train near Belle River on Sunday morning.

Rev. W. Williams will conduct anniversary services marking the completion of fifty years since the opening of St. John's church, at Alwinston on December 9th.

A most enjoyable time was had at a dance given by the local tennis club in the Memorial hall on Tuesday evening. Laughton's orchestra furnished excellent music.

The many friends of Mrs. George Harris, of Glencoe, will regret to learn that she is seriously ill, having been overtaken with a stroke of paralysis on Monday evening.

Middlesex Fruit Growers' Association have sold their apples well, at \$4.25 to \$4.50 for No. 1's, \$4 to \$4.25 for No. 2's and \$3.25 for domestics, with 75c per hundred for culls. Apples have culled heavier than usual, due to side worms.

Returns of the election in West Middlesex for the Boys' Parliament are not all in. Two groups are yet to report, but in any event Ronald Macfie, of Appin, has a sufficient majority of votes over Norman Moore, of Belmont, to assure his election.

New subscribers to The Transcript will get the concluding issues of this year free. Now is the time to subscribe for the paper as a Christmas gift to be sent to your friends or members of the family living away from the home town or community.

Anniversary services of St. John's church will be held on Sunday, December 9th. Rev. W. E. Larier, B. A., L. Th., will preach morning and evening. Special music is being arranged by the choir. The evening services of the Methodist and Presbyterian churches will be withdrawn on that date.

The death occurred at Newbury on Sunday morning of Margaret Bayne, daughter of Wm. Bayne, well-known business man of that village. Miss Bayne was a popular young lady of the community, and had been in ill health for some time. The sympathy of the community goes out to the family in their bereavement.

At the November meeting of the Gordon Mission Band, held at the home of Mrs. Wm. McCallum on Saturday afternoon, Miss Margaret Morrison was presented with a Life Membership certificate of the W. M. S., which was donated by a friend of the Band. Miss Eliza McDonald received a Junior Life Membership certificate for repeating the largest number of quotations from Christ's teachings.

The Guild meeting held on Monday evening was in charge of the missionary committee and an interesting program was arranged. Musical numbers consisted of a piano solo by Miss Elma King, and vocal solos by Mrs. A. E. Sutherland and Miss Muriel Weeks. Papers were given by Mrs. Jamieson and Martin Abbott. The social committee are preparing an attractive program for next Monday evening.

The bazaar held in St. John's school room on Friday last week under the auspices of the Ladies' Guild proved successful. Though the weather was not favorable a fairly large crowd attended. The Union Sunday School of S. S. No. 4, Ekfrid, will hold their Christmas entertainment on Thursday, December 20th.

Arrived this week—another lot of new currants, raisins and other dried fruits, at our popular close prices, at W. A. Currie's.

The Wardsville public school Christmas entertainment will be held in the town hall, Wardsville, on Wednesday evening, Dec. 19th.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—J. D. Brown, first door north of Transcript office; phone 63.

Ladies' extra high grade visiting cards, plain or printed, at the Transcript office. Price for plain, 30c per package of 50; printed, \$1.25 per package of 50.

The Major-General McRae Chapter I. O. D. E. will hold a SALE of useful and fancy articles and HOMEMADE COOKING in the Memorial Hall on Saturday, Dec. 15.

The Glencoe Methodist Christmas entertainment will be held on Wednesday evening, Dec. 19, in the town hall. An exceedingly attractive program is being arranged.

Agent for Exide batteries. Good stock of parts on hand. Work guaranteed, at Galbraith Bros. garage.—J. H. Welch, Appin; phone 48-20.

The No. 9, Mossa, W. I. will hold a bazaar in the L.O.D.E. hall, Glencoe, on Saturday, Dec. 1st. Plain and fancy articles for sale. Specialty, homemade cooking of bread, buns, cakes and pies.

Special sale of mitts and gloves at Lamont's this week. Horsehide mitts, regular price \$1.50, for \$1; horsehide mitts, regular price \$1.25, for 75c; cowhide pullovers, regular price 50c, for 25c.

L. H. Grigg wishes to announce that he has moved his barber shop from the McKellar House to his new shop across Main street, and hopes to meet all his old customers along with many new ones.

Clarke's large can pork and beans, 24c; Tiger Brand catsup, large bottle, at 29c; Thomson's seedless raisins, 15c lb.; seeded raisins, 15c; currants, 16c; Valencia raisins, 15c a lb. All new.—W. A. Currie's.

Record sale of tickets for "Adventures of Grandpa" Dec. 4.

Quality in a repair job is based on the experience and thoroughness of the workman who is doing it. I have that experience which enables me with the latest tools and equipment to take the shortest cut to efficiency and eliminate waste time, ensuring high class work at lowest cost.—J. F. Park, shoe and harness maker, Glencoe. Electric shoe shine—10c.

At London on Monday Clarence Topping, formerly of Strathroy, was charged with murder as a consequence of the death in Victoria Hospital late Saturday afternoon of Geraldine Durston, 19-year-old former Watford girl, whom he shot early Friday morning after she had told him of her purpose to marry another man. Miss McNaughton, of Watford, who was shot at the same time, it is believed accidentally by the policeman who came to arrest Topping, is steadily gaining strength and may recover.

In the Presbyterian church on Sunday evening, in the absence of the minister, who was called away owing to a bereavement in the family, the service was conducted by two of the elders, J. G. Lethbridge, M.P.P., and John Strachan, the former giving a discourse from Acts 2: 42. Next Sunday the services will be conducted by Rev. D. Robertson, of Kilmartin, in the morning, and by Rev. C. H. Cooke, of Tait's Corners, in the evening. Communion in this church will be observed on Sunday morning, December 9th.

An interesting reception last week was that of Mrs. W. G. Thompson, formerly Miss Anna McCallum, of Ekfrid, who entertained at her new home in West Lorne. Mrs. Thompson's mother, Mrs. Duncan McCallum, of Ekfrid, received with her, also Mrs. Hugh McKillop, of West Lorne. Mrs. W. L. Denny, of London, invited the guests to the tea-room, where Mrs. Murray McCallum, of Ekfrid, poured tea, and Mrs. Ferguson, of West Lorne, cut the loaves. The many callers included friends from Glencoe, Rodney, Dutton and elsewhere.

Addressing the annual U.F.O. convention of North Oxford on Saturday at Woodstock, J. G. Lethbridge, M. L. A. for West Middlesex, pointed out that at the annual provincial convention the organization would be called upon to vote on three alternatives regarding political action. Personally he did not see how the U. F. O. could continue to look after the interests of the farmer unless they were in politics. He expressed the hope that the convention in December would come to the best decision for the good of the U. F. O. and its members.

PERSONAL AND SOCIAL

Miss Ada Reyecraft was home from Chatham for the week-end.

Miss Florence Hurley, of London, visited at her home here over the week-end.

Lorne Simpson, of Moorestown, visited his cousin, Lloyd Farrell, a few days last week.

Miss Mary Munro spent the week-end with her cousin, Mrs. Warren Munro, of Alvinston.

Margaret B. and Effie J. Ferguson are visiting D. A. McRae and family at Chilo, California.

Mr. and Mrs. J. M. Beckton were in Toronto last week and while there spent a day at the Royal Winter Fair.

Morley Farrell, of Detroit, and Miss Nellie Farrell, of Windsor, spent the week-end at their home here.

Mr. and Mrs. Adam Roemmle and Mrs. Russell Roemmle and baby Elleen spent Sunday at Calvert Reyecraft's, Newbury.

Misses Gladys and Audrey Donaldson, of Strathroy, were guests for a few days this week with their cousin, Miss Lorna Luckham.

Mr. and Mrs. Bob McDonald and Miss Margaret Kerr, of Windsor, visited at the home of Mr. and Mrs. Wm. Kerr over the week-end.

Pte. Lloyd N. Farrell, of the U. S. Marine Corps, left Sunday to report at Virginia headquarters after spending a two weeks' leave at his home here.

Mr. and Mrs. VanAlstyne are leaving next week for Central City, Nebraska, to visit her sister, Mrs. Robert Rice. They will also visit other relatives in Denver and may eventually make their home in the West.

NOVEMBER SCHOOL REPORTS

S. S. No. 17, Mossa

Highest in spelling contest—Zelda Munroe and Prudence Moore.

Primer—Donald Seale.

I.—Archibald McKellar, Innes Graham.

III.—Prudence Moore 74, Duncan Leitch 60, Harley Lease 52.

Jr. IV.—Kenneth McKellar 70, Viola Munro 61, Hugh Leitch 56.

Sr. IV.—Mary McLachlan 78 (honours), Zelda Munroe 76 (honours), Lloyd Little 72.

Corinne Howe, Teacher.

"Mike de Pike" Heitler, of Chicago, jaunty, dapper and well-dressed, says: "Sure, I sold a lot of whiskey, but who sold it to me, and where are the guys that bought it? The law says they are as guilty as I am. I don't know to this day where the last lot came from, but the federal government knows and the owners of that distillery are still out in the free. It's as easy as eating a poached egg to stop it all. If the federal government would only put the screws on the places where it leaks out, and then check up on practically ninety per cent. of the federal agents who are getting their palms greased to the extent of millions a year, there would not be anything for the local police to do but pinch stickups and stop speeders. Hadn't I ought to know?"

Fresh herring at Jelly's.

OPERA HOUSE, DECEMBER 4th

THE ADVENTURES OF GRANDPA

CHARACTERS

Montgomery Ray ("Monte")	Grandpa's Grandson
Tod Hunter	A Young Dancing Master
Otis Hammerhead ("Grandpa")	From Yellow Bird, Ohio
Officer McCormack	"Who Seen His Duty and Done It"

Kloomp	Twelve Days from Copenhagen Over

SCENE—Reception Room of the Hunter Dancing Academy, Chicago.

Act 1—That Afternoon—Grandpa arrives, quarantined.

Act 2—That Night—Pansy almost breaks out. So does Grandpa. Smallpox!

Act 3—The Next Morning—Kloomp spills the beans. Goodbye, Grandpa.

Presented by Glencoe Tennis Club

A Laugh a Minute Guaranteed

Miss Margaret Morrison, pianist. Mrs. Hill, Glencoe's Popular Vocalist, will assist.

Tickets, 35c and 50c (war tax extra). Plan at Johnston's Drug Store.

Paris Brings a Special Charm to the

Winter Coats

For Women and Misses'

\$65.00 - \$85.00

A collection delightfully representative of the new. Rich and lavish trimming of lovely furs is an outstanding feature. The tube-like silhouette, the graceful flares and the circular flounces and tiers are the influences that impart a chic to these superb styles. Velvety materials such as Geron, Marvella, Lustrosa and Fashona remain unsurpassed for beauty.

is the time to solve that perplexing Christmas problem by coming in and seeing the very complete line of Christmas presents that we now have in stock.

Our line of Ivory, Shell, Ebony and Combination Shell and Ivory Toilet Ware is more complete than ever before and the prices are away down.

We have a full line of Chocolates, Leather Goods, Stationery, Dolls, Toys, Perfumes, Etc., that surpass anything before shown.

Don't forget a VICTROLA for the family and a good assortment of Victor Records.

We will put away until Christmas any article selected without charge.

Watch our ads for suggestions.

P. E. LUMLEY

A DESPICABLE CRITTER

A correspondent writes:—"Malice, envy, deceit, cowardice, ignorance—all the legions of hell, in fact, are harboured in the bosom of the anonymous letter writer," so it has been said. And the delusion that the writer can "get away" with the nefarious business without discovery indicates a diseased brain. Discovery is inevitable, if in nothing else than the shame-faced, downcast attitude when in the presence of upright, normally constituted people. The author of such epistles, stabbers in the dark who would seek to separate good friends, usually live in glass houses—and what a hell they must endure!

The above lines are dedicated to the would-be social lionsess in Glencoe who during the past week has broadcast several of these missiles—a boomerang to her own hurt. At this season, when the world over is ex-

changing Christmas greetings and doing its best to spread the message of love and good cheer as taught by the only perfect One, it is unseemly and unfortunate that one small, miserable soul should seek to

Delicious! Economical!

FOR THE SCHOOL LUNCH BOX. Cookies and fudge and fruit cake are popular additions to any school box, providing, of course, that enough of the "filling" foods are included to take away that empty feeling.

Fig Cookies—For the fig cookies use any preferred cookie recipe, roll thin and cut in long, narrow cakes. Lay half of these in a shallow, oiled baking tin and spread with a fig paste. Brush the edges of the cookies with cold water and place the remaining rolled cookies on top. Press the edges together like a sandwich, brush over with beaten white of egg and dredge with granulated sugar. Bake about ten minutes and lift out of the pan with a spatula. To make the fig paste cook half a pound of figs in boiling water to cover, and when tender and the water is almost absorbed chop finely, add one-quarter of a cup of sugar and the grated rind and juice of half a lemon. Cook for five minutes longer, cool and pack.

Mock Mince Turnovers—Roll rich pastry into a thin sheet and cut in circles. Place in the centre of each two tablespoons of the following mixture: Mix together half a cup of seeded raisins, a quarter of a cup each of currants and shredded citron, the grated yellow rind and juice of one lemon, four tablespoons of melted butter and three-quarters of a cup of sugar. Turn the pastry over into nest half circles and crimp the edges of the crust together with the tines of a fork, dipped in flour. Lay in a greased pan, brush over with beaten egg, mixed with a little cold water, and dust lightly with sugar. Bake in a hot oven until crisp and brown.

Nut Bread—Mix together three cups of entire wheat flour, one-half cup of bread flour, one teaspoon of salt, one tablespoon of sugar, three and a half teaspoons of baking powder and one cup of chopped hickory nuts and English or black walnuts. Gradually beat in two and a half cups of sweet milk and turn into two well-oiled bread pans. Bake in a moderate oven for forty-five minutes. If preferred, half a cup each of nuts and raisins may be used instead of all nuts.

BE ASHAMED TO BE SICK. The woman of to-day, instead of being proud of her illness, is beginning to be ashamed to be sick. Sickness is an admission of inefficiency. It is an admission that one has been a bad manager in the business of living.

The principal topics of conversation among women, and men, too, for that matter, have been the number of operations and "what the doctor said." Instead, the conversation should be on the number of miles one can walk without tiring and the record months or years of unbroken good health.

An unbroken record of good health does not necessarily mean the absence of a doctor in the house; that is a proud remark frequently heard. The absence of a physician in the home does not necessarily indicate that his services were not needed. The best assurance of good health requires the regular co-operation of the family with the physician to the end that medical science may be brought to bear on the problems of the family health and welfare.

The work of the physician is changing and the new attitude of the people toward disease and health. The doctor will probably have more instead

10 Marvellous Book Bargains
Tracy's History of Canada, Champlain to Laurier, full of plates, 3 volumes (\$6.00), the set \$2.25. The Gift Of The Gods

BY PEARL FOLEY.
(Copyright.)

CHAPTER XXIV.—(Cont'd.)
Yes, truly, there is no spot in the whole world to which the little god Cupid can steal away and rest; the whole globe is his workshop, and he was having a busy time in China right now.

"Poor mother, I don't care about leaving her too long. Her eyes follow me so wistfully, as if she were afraid I might vanish any moment."
"And so you may, dear."

Tu Hee lifted smiling eyes to David's face, but her voice was softly pleading.

"Ah, David dear, you know I long for that time as much as you, but don't you think I owe my parents at least a year? I feel if I gave them that it would help Uncle Weng's spirit to rest easier."

"Dear little girl, I understand. A year from now, then, we will say."

"David, David, how good the gods have been to me! Yes, say gods, for I hardly know what to believe now! I thought I should never smile again and I want to laugh always now. No, please don't misunderstand me. I haven't forgotten Uncle Weng, but somehow I feel that he isn't far away, that he can see me and that my being happy makes him happy too."

"Here is the temple; will you come in with me?"

As they made their way past the prostrated guards, Tu Hee slipped her hand into David's and together they approached the great image in the centre.

"See, David," whispered Tu Hee. David glanced up. "Why, there are two rubies now."

"Yes, father and mother have given Paul's gift back to the house to which it belonged. It is better so, just as it is better that this great statue should pass out of my hands to the next in line. So you see, dear, I shall like nothing better than to see memories and undying love, for his love will surround me always, as he said it would."

The moment was too sacred for an answer. Silently and reverently David watched Tu Hee as she knelt before the statue and made her offering of incense. He glanced again at the glowing, radiating pools of crimson shining up so brilliantly against the whiteness of the alabaster brow. The jewels no longer scintillated like restless, wandering spirits seeking to right earthly wrongs. Instead, their rays appeared to proclaim an everlasting peace.

As David's eyes lingered on the compassionate, lifelike face of the image, again, as on that other night weeks ago, the temple seemed filled with the presence of the Christ whose love had redeemed the world. The questioning faith of childhood overwhelmed him, that time when he still glimpsed a hallowed light in the far away past, when he had knelt at his mother's knee, a small, white-clad, meddlesome boy, and impelled by a force that lifted his soul strong and clear above the mundane things of existence, he dropped on his knees beneath Tu Hee and with hers his heart went up in a great cry of thanksgiving and praise to the God of all humanity.

CHAPTER XXV.
The wonder of it peeped in anew with the dawn. Irma Culver slipped on her dressing-gown and stole to the casement window. A soaring lark gave forth his ecstasy in full-throated, golden notes; the flowers, drowsy with dew, unclosed sleepily their petals as the sunbeams danced across them; the temple bells added to the magic of a new day by low, mellow music; and the woman gazing on all this pure splendor compared it to a new dawn in her own life.

It was without regret, however, that she turned away from the scene and moved softly to the door in order not to awaken her husband, who slept after a late vigil at a sick bed.

Her step acquired a joyful spring when the corridor was reached, and she sped along the passage like an arrow.

"Help the Veterans"
To help solve the problems of the Veterans' Associations, a Dominion-wide campaign for funds is now being conducted in the form of a Poster Judging Competition.

Send Donation of \$1.20
Every donor of \$1.20 will be presented with one ticket-folder on which sixteen of the most celebrated BOVRIL posters are reproduced in full colors.

Which are the 12 best, in order of merit, is what you must decide. The folder shows just what you must do. It is a fascinating trial of taste and judgment to class these posters in the order which popular fancy will endorse. It is a real game which can be played over and over again, and in which the family can join.

To add interest, 2,003 prizes have been arranged for, amounting in all to \$30,000 (about \$136,888.00), these having been donated by BOVRIL LIMITED.

The first three are approximately as follows:
1st Prize, \$55,555.00
2nd Prize, 13,888.00
3rd Prize, 4,555.00

Only the vast scale on which this Poster Judging Competition has been organized has made it possible to offer these wonderful prizes.

Join in the game which is a most entertaining one, and which calls for intelligence and skill. So send your donation now and let every one try the game.

Address donations to any of the following organizations, or their headquarters, which are actively interested and ask your help:
Veterans' Association of Great Britain, 2725 Park Ave., Montreal.
Great War Veterans' Association, Citizens Building, Ottawa.
Army and Navy Veterans in Canada, 121 Bishop St., Montreal.
Imperial Veterans in Canada, 700 Main St., Winnipeg.

eager girl about to keep a tryst. Her heart was palpitating, her cheeks were flushed, and her eyes wide when she at last paused and opened a door on her right.

Softly she closed it and stood gazing expectantly across the dainty room.

Only for a moment did she hesitate. Like a magnet she was drawn forward to the small white bed. There she caught her breath as she looked down at the girl, whose soft, regular breathing proclaimed youth's untrodden sleep.

The miracle saturated Irma Culver's soul anew. Her daughter—her very own, this radiant, joyous creature—bone of her bone, flesh of her flesh—the babe whom she had mourned from the grave! Surely God reigned in the heavens and all was well with the world! He had heard her prayers, had watched over and kept untarnished the moist, smooth brow. In his own good time returned it to her arms, a blossom pure and unstained as when He took it from her.

How lovely she was! The long, dark lashes lay like silk on her cheeks, her fair skin, which returning health and happiness had delicately flushed. The hair clung in soft, golden curls around the moist, smooth brow. One hand was lying palm up on the pillow, the other curled, small and white, over the lace counterpane. The nails, pink and shell-like, had discarded the seal of the East—those menacing shields, Irma could resist the promptings of her great mother love no longer. Impulsively she reached her arms to the wonderful child—her very own. Her starved heart beat in great, suffocating throbs. Her love was almost primitive in its wildness.

Tu Hee stirred. Her hand uncured and lifted Irma bent her head and thrilled at the slender fingers brushed her lips.

As her hand fell back Tu Hee's eyes opened. She smiled dreamily into Irma's adoring face, and a sob of joy died in the woman's throat.

"Mother!" Tu Hee raised her arms now, and with a soft, endearing term, resurrected from the dead dead past, Irma clasped her child to her breast.

"You have been with me all through this wonderful night, my darling little mother," murmured Tu Hee, as she stroked her mother's face and hair; "you and father and Uncle Weng, and Uncle Weng was as kind as we, you don't mind my loving him so much, mother dear?"

"No, no, my darling. He has robbed me of sixteen years of mother love, but we can make it up, can we not, Tu Hee mine?"

"Ah, yes; and he suffered all those years, mother. How he suffered! I know, for I loved him so well."

Tu Hee pressed her lips to the hands that clasped her.

"Mother! What a name! How I have longed to say it from a tiny child! I used to pretend and call it to Lun, but dear old Lun, she couldn't bear it—understand at last the reason—I pricked her just as ever-increasing remorse hurt Uncle Weng."

So they talked, mother and child, until the sun burst in full radiance through the open windows and household sounds proclaimed a wonderful new day had begun.

Neil Culver closed his heart to all petitions that day. The sick he turned over to a doctor in a neighboring hill, who, although a foreigner merely sojourning like himself, readily acceded to his request despatched by the voluble, beaming Yu.

His eyes followed his new-found child with a mixture of awe and incredulity. Somehow his practical nature could not readily grasp this wonderful revolution in his life. It seemed to him that a miracle had indeed been wrought. This lovely, radiant creature his! And then regret lashed him. He remembered his repeated warnings against the repeated warnings against the influence of her near she, his child, had come to tossing herself into the abyss of despair. He remembered his reach, as the wife of the Chinaman, Chu Sing. His face blanched as he called to mind how, but for his sudden decision to return, the sea might have remained between them.

Bitter, inflexible anger gripped him at the cruel, barbarous wrong that had been perpetrated against him and the present flood of ecstasy that engulfed his heart only raised the hideous crime to appear blacker and larger. He sat, an unforgiving judge, over Weng Toy's written confession: "I swear by the spirits of my ancestors, madam, my intention was but to regain my own, my sister's child. I saw my opportunity when plague had called your husband to the interior, but my heart's heart only raised the belief that the mistake proved the faithful nurse and attendant of your daughter, for she has ever provided that."

"But madam, our scheme failed, miscarried. When the child was unwrapped before me, I discovered the frightful blunder. In consternation I ordered the immediate return of the white babe, but my servants brought the word it could not be done—your husband had arrived from his long vigil in the plague-stricken district. Lun was cowed into an ally by the belief that the mistake proved the gods desired the little Gift of the Gods for China. A story was quickly concocted and accepted by you and your husband that the child had died with the dreaded fever during your illness."

"I offer no excuse for my conduct, madam, but by the gods I swear it colors."

was not my wish then to keep your child. I had no interest in the foreign babe. I merely desired to gain possession of my sister's child. It was my intention to return your child when the first opportunity offered, which would not incriminate me and put my nephew beyond my reach forever. And then one day I discovered that your babe's sunny, foreign ways had bound tight cords around my heart. I loved her. I saved my conscience with the thought she was my flesh and blood in your possession. I bribed and coerced your servants to leave you. And then you sailed for your own country and my way was clear.

"I ask not your pardon, madam. The beauty of your child's soul bruises and tortures me every day of my life with the realization of what I have bereft you. My daily prayer is, may the gods give me strength to confess in time. I think they will. On your child's twentieth birthday my guilt will be made known. If the spirits of my ancestors call me before then, this letter is to be handed to be by the faithful Lun two moons after my death."

"May the gods crowd into the remaining years of your and your husband's lives all the blessings you have foregone, and multiply them twice over."

(To be continued.)

Try it in the Dark.

We discovered this rather effective method by which to locate certain trouble arising from faulty ignition of the driver.

After a futile search for a bad plug, ground, "short," or some other trouble, we drove the car into the carriage shed. The interior of the shed happened to be quite dark. With the hood still up and the motor running we discovered a tiny spark—we were unable to detect the light outside—between the porcelain and shell of a plug. This unlooked-for fault was the troublemaker.

The engine would miss only when under load, seeming to run smoothly when idling. This rendered the screw-driver method ineffective. By resorting to this take-in-the-dark plan later we were able to find a short in the wiring.—R. R. C.

Once a Sifter.

When the flour sifter has become too shabby for work as a sieve it makes an excellent egg boiler. It can be placed inside the saucepan and the eggs can be placed in the water at once and all can be removed together when done.

What Tired Him So?

"Well, have you got all your things packed ready to go away?"
"Yes, and I'm worn out—my wife has just gotten through with the job."

Minard's Liniment Heals Cuts.

SALESMEN
We pay weekly and offer steady employment selling our complete and exclusive line of whole-retail, fresh-cut-to-order trees and plants. Best stock and service. We teach and equip you free. A money-making opportunity.

MAKE MONEY! GRADE EGGS
New Dominion Law says all eggs must be sold by a person who has been trained in the egg business. These factories are making extra money buying eggs and grading them. You can make extra money by grading and egg business in your home by mail through Shaw's Egg Grading Course. Approved by authorities. Prepare now for the coming April rush with credit full information. Write Prof. C. E. Graham, Dept. 56, Shaw Schools, Limited, 45 Elm St., W. Toronto.

WOODSTONES.
Woodstone is the name of a material made of sawdust mixed with magnesia cement and compressed under enormous pressure. This woodstone is very like ordinary wood, save that it has no grain. It is made in planks which can be cut with a saw and planed, and has the advantage of not being inflammable.

MASTERPIECES FOR CHILDREN

Not long ago the original manuscript of "The Rose and the Ring" was sold in the United States for a hundred times its weight in gold. It is the story of Giglio and Bulbo, and it is illustrated by crude drawings.

The tragedy of Thackeray's marriage to a woman whom he loved dearly, but who was destined to spend all her best years in a lunatic asylum, is one of the greatest in literary annals. But she left at home two little girls whom the novelist loved passionately.

A Labor of Love.

Whilst they were still very young their famous father took them to Italy to see Robert Browning and his equally famous wife. They had one son, a boy of six, known as "Pen," for whom the story of Giglio and Bulbo was started. As the big man with the shining spectacles told the story he drew pictures to illustrate it, and before the story had gone far all the children of the English colony had gathered round the storyteller.

Then one of them, a little girl, fell ill, and the great novelist and all the other children used to go every day to her house to read to her the latest installment. And that's how this little masterpiece came into being.

"To my children, Rose, Maurice, Mary, a little Present of Old Greek Fairy Tales"—that is the dedication to Charles Kingsley's "Heroes." But after this charming little classic had been in circulation some time another "little stranger" arrived in the vicarage of Eversley, and Mrs. Kingsley said, "Rose, Maurice, and Mary have got their book, and now Baby must have his."

Her husband obeyed, and penned "Water Babies," that pathetic story of a little boy-sweep which did so much to abolish this and many other child cruelties which disgrace the industrial record of the last century.

Wordsworth's world-known poem, "We Are Seven," was inspired by the poet's interview with a fair-haired child at Bettws-y-Coed, in North Wales; and the same poet's "Triolet" was inspired by his own little daughter Dora, Edith Southey, and Sarah Coleridge—three daughters of three great poets, two of whom became Poet Laureate.

The Children's Question.

"How does the water come down at Loreto?" is the beginning of Southey's well-known poem. He not only had a big fan of his own, but he was more often than not charged with Cole-ridge's children as well, at Kendal, where he lived. The dual flock used to go for long tramps, and it was while watching the Falls of Loreto at the head of Derwentwater that the children asked the poet to tell them how the waters came down.

One of Browning's earliest child favorites was Willie Mowbray, the great actor's little son. Willie fell ill and was confined to his room. To keep him amused Browning told him the old legend of the Pied Piper of Hamelin, but Willie would not be satisfied until his poet had put it into verse.

Scott's "Tales of a Grandfather" was told chapter by chapter, before a word was written down, to his granddaughter, during the very worst period of the financial troubles which killed him. Dickens also wrote his "Child's History of England" for his own little ones.

Alice Liddell is immortalized as "Alice in Wonderland." She was one of a family of girls belonging to the Very Rev. Henry George Liddell, Dean of Oxford, whom the Rev. Charles Lutwidge Dodgson, a shy old bachelor, used to take for walks. To beguile the way Mr. Dodgson told the little girls an interminable story which they knew as "Alice's Adventures Underground." Presently it appeared in print as "Alice in Wonderland," with illustrations by John Tenniel. The nom de plume of the Oxford don was "Lewis Carroll."

POTS FOR HOUSEPLANTS.

Tin cans and old kettles and pans have been called into use as flower pots about as often as regular pots, but pots are so inexpensive that if we can get them they will add so much to the beauty of the window that it will pay. If we cannot get pots conveniently then we can use cans, but they should be painted a neutral tint to make them less conspicuous. If we use cans it is best to cut the top off just below the rim and carefully pound the edge into a little roll outward. This ridge of sharp edge will permit plants being shaken out without danger to the roots.

The shape and size of pots should suit the plants grown. Ferns will do best in a shallow pan, and for bulbs there is a half-depth pot made that will give them plenty of soil and save much heavy lifting. Some plants, like geraniums, will bloom best in small pots so the roots will be pot-bound, while others, like callas or chrysanthemums, want plenty of rich soil.

Woodstones.

Woodstone is the name of a material made of sawdust mixed with magnesia cement and compressed under enormous pressure. This woodstone is very like ordinary wood, save that it has no grain. It is made in planks which can be cut with a saw and planed, and has the advantage of not being inflammable.

GERMAN SILESIAN FARM BUILDINGS AND MANSIONS PREY TO FLAMES

Attempt by German Junkers to Force Towns and Cities to Oppose Chancellor Stresemann's Methods by Stoppage of Food Supplies Causes Invasion of Barons' Domains by Starving Victims.

A despatch from Berlin says:—The sky of German Silesia is aflame with the reflection of thousands of burning farmhouses and barns.

In the lurid light of this vast fire, which is licking up in flames the fairest fields in Germany, innumerable bands of unemployed from the towns and cities of Silesia are plundering the still smoking houses, and are driving off cattle.

Along the roads the rifles of the police are splitting fire and lead the continuous procession of plunderers moving toward the towns with their booty.

The Silesian Landbund, or farm association, which is intensely Nationalist, declared a food boycott at Breslau on Thursday night against all towns in Silesia until Chancellor Stresemann and his Cabinet resign. Immediately the town dwellers, and particularly the unemployed, met this challenge with fire, the only weapon left to them. They began their operations in the morning. The proud establishments of scores of Junkers and farmers are only ashes. From the towns of Wroclaw, Jauer, Jankowitz and Brieg, particularly, the unemployed angrily streamed into the countryside with blazing torches by the thousand.

A few frightened, lonely farmers who surrendered after their food and all their cattle without a fight were not disturbed. At the big Junker estates armed farmhands tried to fight off the invaders, but the latter burned one farm building after another. Houses were plundered and everything taken, valuables as well as food. Scores were killed.

Thursday these bands are still burning and plundering lonely estates, but the Junkers and police gradually are forming columns against the incendiaries. At Waldenburg troops clashed with returning bandits and plunderers, killing one and wounding sixteen. The police suffered one dead.

A meeting at Breslau of the Silesian Landbund deliberately decided to starve out the cities and towns until they went against the Stresemann Cabinet. These stony-hearted Junkers, who are mostly country squires with big estates, and with the help of the towns in other German States, that they cannot support Stresemann because he lacks public confidence, and must be replaced by a National Gov-

ernment, in which they would participate. All of the big German farmers and most of the smaller farmers are Nationalist and Monarchist. These farmers are opposed bitterly to the towns where there are strong Socialist factions supporting Chancellor Stresemann. These landlords have been fighting Chancellor Stresemann by withholding their foodstuffs, thereby causing starvation and dissatisfaction, which directs itself against the Government.

A later despatch from Berlin says:—Chancellor Stresemann is out. The vote of confidence in his Government was defeated on Friday in the Reichstag by 230 to 155.

Only a portion of his own People's Party voted to keep him in power. Stresemann's Cabinet has resigned and with the defeat of the Chancellor goes the program of thrusting the Rhineland and Ruhr down Premier Poincare's throat and refusing to pay further reparations.

"Thank God," Stresemann said as he left the Reichstag, "at least the agreement between the Ruhr industrialists and the French has been signed, if my information is correct. A reactionary putsch is not impossible at this moment."

"I am going to President Ebert to beseech him to reconstruct the Government so that Germany may not be without constituted rule in these difficult days. I hope to return to Parliament life and serve the Fatherland again. But I beg my fellow Ministers and the newspapers to keep sharp watch for a monarchistic putsch that seems so likely."

Hunger-crazed mobs from the towns again devastated the great Junker estates in Silesia on Friday with flame and sword. The beautiful castle of Herr von Berge und Surrendorf zu Herrherndorf, one of the oldest and richest families in Germany, located in the district of Glogau, was burned early Friday morning by plunderers and the family and servants were forced to flee in their night-clothes. This castle, which was used by Frederick the Great as his headquarters in 1770, and was one of the historical landmarks of Silesia, is only a mass of blackened and smoking walls.

In Odermuehle, incendiaries fired a big mill and saw 700 tons of flour, 700 tons of grain and 300 tons of fodder swept up in flames before they could carry any of it off.

10,000 DEATHS CAUSED BY FAKERS

"Doctor" George Sutcliffe of Albany Faces Manslaughter Charge.

Hartford, Nov. 25.—Wholesale indictments of quack doctors for manslaughter as one result of the Grand Jury investigation were predicted tonight by two officials.

State Health Commissioner Osborn announced that a painstaking examination of all death certificates in Connecticut for five years is revealing an immense total signed by alleged quack doctors. More than 200 of these, he said, would be turned over to the Grand Jury Monday.

Dr. Osborn, who was ordered by the Grand Jury to select from the official records all suspicious certificates or anything indicating potential manslaughter, said he had a special staff of clerks on this task, and added: "At least ten days will be required to examine all the cards, and the suspicious cards submitted to the Grand Jury may run into the thousands. There is no exact method of estimating the number because some of the doctors have been in Connecticut five years. Also, I am finding more death certificates from some than from others."

Dr. George F. Sutcliffe was located tonight at the Bond Hotel annex, where he is staying with his brother-in-law, F. M. Dubbs, of Albany. He is wanted on a manslaughter charge based upon his cans of ether to Albert C. Hoody, who came to his office with a crushed finger and died an hour later on Sutcliffe's operating table.

Sutcliffe, who fled from Albany to Toronto, escaped Canadian officers by late one hour. He has confessed to Gov. Templeton and other State officials.

On the basis of one death a month confessed by Sutcliffe, 200 fakers during the last five years would have signed more than 10,000 death certificates. Whatever the number, the Grand Jury purposes to scrutinize each carefully, according to Foreman Holden.

More than double the number of immigrants came to Canada during the past six months, as compared with the similar period of last year. The figures, according to the Department of Immigration, show 94,333 people of all nationalities have entered Canada during the six months, April-September, 1924, while the number was 46,331 for the same period in 1923. British immigration during the past six months amounted to 51,961, United States 13,065.

Col. Hamilton Gault
Famous Canadian soldier and commander of the Princess Pats in the Great War, who is entering British politics as a supporter of the protection policy.

WORLD CHALLENGED BY CANADIAN PORTS

Elevators of Fort William-Port Arthur Harbor Establish Quick Loading Record.

A despatch from Fort William says:—A world record for all time to date is being established by the elevators of the Fort William-Port Arthur harbor in the loading of grain into ships.

Between midnight on Wednesday and midnight on Thursday 6,700,000 bushels were loaded into boats from stocks in store by elevators in filling orders distributed during the day by the Lake Shippers' Clearance Association. The previous record of the port was about 6,000,000 bushels and that was the record for the world.

There is no other port which can compete with the one at the Canadian head of the lakes in the rapid handling of grain. About the best that Chicago could do would be about 2,000,000 bushels in the same length of time. Duluth has one very fast elevator, the Great Northern, but here there are many just as fast for a short time, and nearly as fast under an opportunity for continuous operation.

WHEN DEATH WIPES OUT POLITICAL BARRIERS
A significant picture at Bonar Law's funeral, in which the leaders of the three great political parties in Great Britain are grouped around the bier to the throne. The Prince of Wales is conversing with Ramsay MacDonald, leader of the British Labor-Socialists, H. H. Asquith, leader of the Liberal party, is at the left, and Premier Baldwin, leader of the Conservatives, on the right. This is a picture which could scarcely be duplicated in any country in the world, for British statesmen of rival parties are often good friends in private life.

Where and How Insulin is Made

Tucked away in an obscure corner of the University of Toronto grounds, overshadowed by the new electrical engineering building and flanked by a row of venerable elms, stands a two-story, red-brick building formerly occupied by the University Y.M.C.A. A year or two ago it was planned to remove the building, as it was not suitable for any university purpose. To-day, housing, as it does, the only "Insulin laboratory" in Canada, the building, together with its recently installed equipment, is worth upwards of \$95,000.

The Insulin laboratory is one of the latest chapters in the romance of Insulin. It stands as a confirmation of the success of the research of Dr. F. G. Banting and his fellow-investigator, Charles H. Best, M.A. Its management and operation are in the capable hands of Mr. Best, who has, from the beginning, been in charge of the large-scale production of insulin. The laboratory is operated as a division of the famous Connaught Anti-Toxin laboratories, of which Dr. J. G. Fitzgerald is director and Dr. E. D. Duffries, associate director. The business administration is in charge of Dr. Fitzgerald and Dr. Duffries. Mr. Best is assisted in the new laboratories by Dr. A. Scott, M.A., as assistant director, and a staff of twenty-six people working night and day shifts. With the exception of three trained chemical technicians, under direction of Mr. Arthur Wall, who was the first technician to assist Mr. Best when the manufacture of insulin was begun, and four chemists, the staff is largely technically untrained. During the summer months five medical students were employed in the laboratories and during the winter two students are engaged in part-time work.

The erection of such a completely equipped plant was made possible through the Ontario Government's grant of \$25,000, the remaining \$70,000 to \$75,000 being secured from funds of the laboratory and from private donations. The plant is now producing in the neighborhood of 250,000 units a week for distribution throughout Canada, Ireland, South Africa, Central and South America, New Zealand, Australia, and other countries where plants have not been established. The average dosage for the diabetic patients for whom such a large quantity of insulin is being prepared varies from 15 to 20 units a day.

The price for which Insulin is distributed is, as with other products of the Connaught Laboratories, governed entirely by costs of material and of production. The Connaught Laboratories are not engaged in commercial business but constitute a department of the University of Toronto. Mr. Best has called attention to the gradual fall in the price of insulin. In May, 1923, the material was sold at 5 cents per unit, in June at 3 cents per unit and now at 2 cents per unit.

The distribution of insulin is effected through two channels. The first is hospitals which have organized departments for the administration of insulin. The second is through physicians trained in the use of insulin. For these latter a special short course of instruction was provided at the University of Toronto last July under the direction of Professor Duncan Graham.

The preliminary stages in the preparation of the health-giving extract are conducted in a large laboratory in the north-east corner of the insulin building where beef and pork pancreas (sweetbreads), fresh from the abattoirs, are first minced in a large meat-grinder, dissolved in vats of alcohol, and then placed in a large basket centrifuge. The liquid is drawn off from the centrifuge and further clarified by filtration through paper in glass funnels. This liquid, containing the soluble constituents of the pancreas, is reduced to a small volume by evaporation of the alcohol and water content in a large vacuum still. The residue contains the insulin. The solution is purified in two chemical laboratories, one on the main floor and one on the second floor, by chemical procedures known as "fractional precipitations." The purified product is then sterilized, standardized, and filled into vials for distribution by the Connaught Laboratories.

But the equipment of the Insulin Laboratory embraces more than the mere processes necessary to produce the serum. A distilling room on the main floor contains a large rectifying still, vacuum pumps, and condensers by which the used alcohol is reclaimed. An oil-burning furnace in the basement supplies steam for the vacuum still and a refrigeration machine cools the alcohol condenser and manufactures cakes of ice for small refrigerators. A large electric fan is kept running continuously to ventilate the laboratories and clear the air of alcohol fumes.

On the second floor, in addition to the purification laboratory, there is a laboratory in which two chemists are employed on research work in connection with insulin. Clean, well-ventilated rooms are provided for the animals used and a small operating room is near at hand.

The preparation of insulin is controlled by patents applied for in various countries of the world by the original investigators. These patents have been assigned to the University of Toronto and a committee, appointed by the Board of Governors, is responsible for the administration of patent and other rights and for the promotion of efficient production and distribution of insulin in all countries of the world. The original investigators, Dr. Banting and Mr. Best, receive no financial benefit from the patent but desired to prevent the filing of other patents which might restrict the preparation of insulin. In Great Britain complete patent rights have been assigned to the British Medical Research Council and in the United States the Ely, Lilly Company of Indianapolis has been licensed by the University of Toronto to manufacture insulin. The licensing of other firms in the United States is at present under consideration. Rights in all countries except Great Britain have been retained by the University of Toronto. The patents for insulin have been obtained largely through the efforts of C. H. Richey, a patent lawyer of Toronto, who has given his services to the University without charge.

In addition to carrying out his duties as director of the Insulin Laboratory, Mr. Best is continuing the fifth year of his course in Medicine, which he interrupted in 1921 to collaborate with Dr. F. G. Banting in his researches which led to the discovery of the insulin treatment of diabetes.

IRISH FREE STATE TO FLOAT LARGE LOAN

Unanimous Action Taken by the Dublin Chamber of Commerce.

A despatch from Dublin says:—A largely attended meeting of the Dublin Chamber of Commerce on Friday unanimously endorsed the proposed Free State loan, after listening to a statement by Ernest Blythe, the Finance Minister.

Those at the meeting included practically all the heads of Dublin's big business. Mr. Blythe said the attempt to destroy the State by armed force had been definitely defeated and there was no fear of its renewal, as the Government had refused all compromise which involved risk. The loan was not for the ordinary expenses of the Government, which would be brought within its revenue, but for the damage caused in the conflict.

A loan of £10,000,000 would suffice for the present needs and within a year the Free State's credit would be as good as that of South Africa, which had floated a five per cent. loan at 9 1/2%. That Republicans in the Free State had been returned to Parliament made no difference, for South Africa also had its Republicans.

The production of lumber in British Columbia for the first eight months of 1923 was twenty per cent. higher than the best previous record. This will easily be the best year in the history of the lumber industry in the province.

OLD WORLD ARCHIVES RICHES FOR CANADA

Dominion Archivist Succeeds in Securing for Nothing Priceless Historical Records.

A despatch from London says:—Dr. A. G. Doughty, Dominion Archivist, sailed on Saturday for Canada after a most successful raid on the private treasures in England and France, for documents of historical importance for the Dominion. Canada's chief archivist, who, as a tireless collector for his department, has won international fame for his ability to get something for nothing, is said to have surpassed himself on this occasion. Besides Sir Leicester Harmsworth's gift of the Wolfe Papers, the decision of the Hudson Bay Company to make its record available, and an arrangement for the publication of a series of biographies of makers of Canada, Mr. Doughty has been promised a mass of other material of priceless historical value.

It is hoped to obtain from English banks and trading houses records which will throw a new light on early commerce with the new world. From France it is hoped to obtain documents relating to the famous company of One Hundred Associates, as well as papers preserved by descendants of Bigot Talon and other great figures in the early history of New France. More interesting than all, perhaps, is the likelihood of securing a document signed in Canada in 1535 by Jacques Cartier. It will be the oldest record in all America, antedating that now possessed by the Canadian Archives, which is dated 1542. The money value of these collections aggregates thousands of pounds. Canada is securing them for nothing.

The greatest sin is laziness; the second greatest sin is too great self-satisfaction.—Mr. Gordon Selridge.

POINCARE REVERSES HIS FOREIGN POLICY

Aims to Conciliate Great Britain and Put Reparations Issue in Second Place.

Paris, Nov. 24.—Premier Poincare finally has reversed his foreign policy. No longer will he put reparations for France uncompromisingly first and friendly relations with Great Britain and the United States second.

Hereafter he may be expected to follow in the footsteps of the Premiers who have preceded him, and whose policies he condemned so bitterly in the recent battle of Yellow Book notes with Lord Curzon.

He aims now to conciliate Great Britain at almost any cost, and to interest her and the United States once more in France's security, if it is not too late. To-night the semi-official Temps and the Journal des Debats begin to prepare the way.

The Temps takes the theme, "The French government must neglect nothing in order to act in concert with the other Allies." And the Journal des Debats says: "No form of guarantees will provide us an efficacious security. Signatory Governments would nevertheless decide their action according to circumstances and the condition of their public sentiment. We must, therefore, entertain with the United States and Great Britain amicable and cordial relations."

S. J. Farmer Re-elected Mayor of Winnipeg

A despatch from Winnipeg says:—S. J. Farmer, Mayor, was re-elected Mayor of Winnipeg on Friday by a majority of 4,899. The unsuccessful candidate was Robert Jacob.

The contest was fought on variety of issues, including the record of Mr. Farmer as Mayor during the past year, the platform of the Independent Labor party, which endorsed his candidature, the policy and personnel of the Winnipeg Civic Association which brought Mr. Jacob into the field, the alleged intentions of the Winnipeg Electric Railway in the matter of their city franchise, and the general question of public utilities and the city Hydro system in particular.

Earl of Cavan
Chief of the Imperial General Staff, who is leaving for a visit to Singapore and on his return will be a visitor at several Canadian cities.

Weekly Market Report

TORONTO.
Manitoba wheat—No. 1 Northern, \$1.04 1/4.
Manitoba oats—No. 3 CW, 42 1/2c; No. 1 extra feed, 41c.
Manitoba barley—Nominal.
All the above, track, bay ports.
American corn—Track, Toronto, No. 2 yellow, \$1.17.
Ontario barley—58 to 60c.
Buckwheat—No. 2, 72 to 75c.
Ontario rye—No. 2, 73 to 75c.
Peas—Sample, \$1.50 to \$1.55.
Milled—Del., Montreal freight, bulk included: Bran, per ton, \$27; shorts, per ton, \$30; middlings, \$36; good feed flour, \$2.05.
Ontario wheat—No. 2 white, 94 to 96c, outside.
Ontario No. 2 white oats—38 to 40c.
Ontario corn—Nominal.
Ontario flour—Ninety per cent. pat., in jute bags, Montreal, prompt shipment, \$4.75; Toronto basis, \$4.76; bulk, seaboard, \$4.25.
Manitoba flour—1st pat., in jute sacks, \$6.30 per bbl.; 2nd pat., \$5.80.
Hay—Extra No. 2 timothy, per ton, track, Toronto, \$14.50 to \$15; No. 2, \$14.50; No. 3, \$12.50; mixed, \$12.
Straw—Car lots, per ton, \$3.
Cheese—New, large, 25 to 24c; twins, 24 to 25c; triplets, 25 to 26c; Stiltons, 25 to 26c. Old, large, 30 to 31c; twins, 31 to 32c.
Butter—Finest creamery 30c; 41 to 42c; No. 1 creamery, 38 to 40c; No. 2, 30 to 32c.
Eggs—Extras, fresh, in cartons, 70 to 74c; extras, storage, in cartons, 45 to 47c; extras, 42 to 45c; firsts, 38 to 39c; seconds, 30 to 32c.
Live poultry—Spring chickens, 4 lbs. and over, 25c; chickens, 3 to 4 lbs., 22c; hens, over 5 lbs., 22c; do, 4 to 5 lbs., 15c; do, 3 to 4 lbs., 15c; roosters, 15c; ducklings, over 5 lbs., 20c; do, 4 to 5 lbs., 18c; turkeys, young, 10 lbs. and up, 28c.
Dressed poultry—Spring chickens, 4 lbs. and over, 35c; chickens, 3 to 4 lbs., 30c; hens, over 5 lbs., 28c; do, 4 to 5 lbs., 24c; do, 3 to 4 lbs., 18c; roosters, 18c; ducklings, over 5 lbs., 28c; do, 4 to 5 lbs., 25c; turkeys, young, 10 lbs. and up, 32c.
Beans—Canadian hand-picked, lb. 10c; primes, 9 1/2c.
Maple products—Syrup, per lb., \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25c.
Honey—No. 1, 12 to 13c; No. 2, 10 to 11c; No. 3, 8 to 9c; No. 4, 6 to 7c; No. 5, 4 to 5c; No. 6, 3 to 4c; No. 7, 2 to 3c; No. 8, 1 to 2c; No. 9, 1/2 to 1c; No. 10, 1/4 to 1/2c; No. 11, 1/8 to 1/4c; No. 12, 1/16 to 1/8c; No. 13, 1/32 to 1/16c; No. 14, 1/64 to 1/32c; No. 15, 1/128 to 1/64c; No. 16, 1/256 to 1/128c; No. 17, 1/512 to 1/256c; No. 18, 1/1024 to 1/512c; No. 19, 1/2048 to 1/1024c; No. 20, 1/4096 to 1/2048c; No. 21, 1/8192 to 1/4096c; No. 22, 1/16384 to 1/8192c; No. 23, 1/32768 to 1/16384c; No. 24, 1/65536 to 1/32768c; No. 25, 1/131072 to 1/65536c; No. 26, 1/262144 to 1/131072c; No. 27, 1/524288 to 1/262144c; No. 28, 1/1048576 to 1/524288c; No. 29, 1/2097152 to 1/1048576c; No. 30, 1/4194304 to 1/2097152c; No. 31, 1/8388608 to 1/4194304c; No. 32, 1/16777216 to 1/8388608c; No. 33, 1/33554432 to 1/16777216c; No. 34, 1/67108864 to 1/33554432c; No. 35, 1/134217728 to 1/67108864c; No. 36, 1/268435456 to 1/134217728c; No. 37, 1/536870912 to 1/268435456c; No. 38, 1/1073741824 to 1/536870912c; No. 39, 1/2147483648 to 1/1073741824c; What is said about those who trust in the Lord?—Psalm 125: 1, 2.

WARDSVILLE

Miss Margaret Aitchison spent a couple of days last week at the home of her brother in London.

Miss Janet Elliott spent Tuesday in London.

Mrs. Jim Thomas returned home Thursday after attending the funeral of her brother-in-law, F. A. Gourley, in Adrian, Mich.

Mr. and Mrs. J. C. Weer, of South Bend, Ind., are visiting his parents, Mr. and Mrs. Thos. H. Weer.

Miss Violet Murphy, of London, spent the week-end at her home.

Mr. and Mrs. Homer Shaw, of Chatham, called on friends in the village Sunday.

Mr. and Mrs. L. Purdy and son, of Windsor, are visiting relatives here. Will Atkinson and W. H. Parnall spent Wednesday in London.

Mr. and Mrs. Geo. Faulds and Ray spent a few days in St. Thomas last week.

Mr. and Mrs. Alex. Stewart and Ruby spent Sunday with Mr. and Mrs. Thos. H. Weer.

Mrs. Firth, of St. Thomas, is the guest of Mrs. Henry Archer.

R. J. Petch was in Tillsonburg last week attending the funeral of his brother-in-law.

A number from this village attended the funeral in Rodney on Saturday of Archie Purcell, who died in Leithbridge, Alberta. Mr. Purcell was a resident of Rodney but had been in the West for a couple of years owing to poor health.

The W. H. S. football eleven played a return game with Thamesville in that place on Monday. In spite of the condition of the park and the unfavorable weather the W. H. S. boys played a good game and defeated their opponents 2-0. On Wednesday they met the Glencoe eleven and the boys, who were somewhat handicapped, played another good game. Result, 2-1 in favor of Glencoe.

On Friday evening the Bothwell dramatic company presented their play, "The Little Cidhopper," in the Wardsville hall. Owing to the inclement weather only a small number were present. The play was enjoyed by all who saw it and showed careful and hard work by those taking part in it. After the play the floor was cleared and dancing was enjoyed until the small hours of the morning.

Mrs. D. L. Purcell entertained at a family dinner on Thursday in honor of the birthday of her daughter, Mrs. G. Long.

Much sympathy is extended to Mr. and Mrs. Wm. Bayne by the people of Wardsville on their bereavement by the death of their daughter, Margaret. Deceased was a student at the W. H. S. and was well known in the village. She was a friend to all and will be greatly missed by the younger set.

The A.Y.P.A. of St. James' church met on Thursday night in the basement of the church for their bi-monthly meeting. The president,

James O'Hara, took the chair and the routine business was dispensed with. During the social time a spelling match was indulged in, in which Miss Frances Murphy carried off the honors.

A meeting of the W.C.T.U. was held at the home of Mrs. W. H. Parnall on Friday afternoon. Mrs. Douglas took the chair and the usual business was carried on.

The marriage of Miss Reta Hubbard, daughter of Mr. and Mrs. D. Hubbard, of Wardsville, took place on Friday in Chatham to Homer Shaw. The bride was gowned in blue crepe de chine, with black satin slippers. Mrs. Shaw has been a resident of Wardsville for a number of years and is a member of the Presbyterian church. The best wishes of the villagers go with Mr. and Mrs. Shaw to their new home.

Mrs. T. English, who was injured by a fall some time ago, is improving gradually.

Don't forget Wardsville public school concert, December 19th.

A Foe to Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the inmost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

MELBOURNE

The annual bazaar held in the Methodist church parlors under the auspices of the Ladies' Aid was well attended. The booths of homemade cooking, ice cream, cake, homemade candy, aprons, towels, bed linen, fancy work, etc., were all well patronized. From 5 o'clock to 8 the people came in crowds to the chicken supper, many coming from Appin and Mount Brydges. The proceeds amounted to \$140, making a total of over \$550 raised by the Ladies' Aid since May 1st. Although all of the ladies did their part well, much credit is due to the president, Mrs. Gilbert McLean, for the successful period.

Miss Jean Johnson, of S. S. No. 3, has received her certificate of honor for the highest number of points at the school fair. This is the second year in succession that Jean has been successful in obtaining this certificate.

Mrs. Oscar Brown and daughter, of Edmonton, are the guests of the former's mother, Mrs. Mary Ann Campbell, who has been in poor health for some time, although improving.

Mrs. Ross and son Otto, of Detroit, and Dr. Will Cady and Mrs. Cady, of Rodney, spent Sunday with Mrs. James Showers.

The funeral of Archie Purcell, of Rodney, who died in Alberta, passed through here Saturday afternoon to the Longwood cemetery, in charge of the Masonic order. Deceased married a Miss Elizabeth Cady, daughter of John Cady, who passed away thirty years ago. He afterwards married Miss Gillis. M. Purcell was 66 years of age and well known in this district.

James Showers spent the week-end in St. Thomas.

Henry Harvey is visiting his daughter in Detroit.

CRINAN

Services in Argyle church Sunday were conducted by Evangelist McLaren and Mr. McBretnay, of Toronto. The public school was also visited during the past week by Rev. Mr. Carr, Mr. McLaren and Mr. McBretnay.

The young people of the district are preparing for a Christmas tree to be held in the church on Friday evening, December 21st. Rev. A. L. Carr will be chairman.

Miss Nellie Campbell is on the sick-list.

M. A. McAlpine's annual sale, held recently, was a decided success.

Choir practice was held at the church Saturday evening. Mr. McBretnay conducted the practice.

Born to Mr. and Mrs. Bruce McPherson, townline north, on November 21st, a son.

Miss Mary McGill, who has been ill for some time, is quite well again. Geo. Mogg, con. 3, who has been seriously ill, is improving.

A large acreage of fall plowing has been completed this year.

The committee in charge of the preparing of programs for the Y. P. Guild of Argyle church have already met and outlined their program.

The Crinan W. I. will meet this Thursday at the home of Mrs. Ed. Auckland. The subject will be: "What to do before the doctor comes," by Nurse McEachren. There will also be a report of the convention, given by the delegates, Mrs. A. J. McMurphy and Mrs. J. C. McMillan.

CAIRO

We are glad to report that Mrs. Agnes Smith is improving, though still confined to her bed.

Mrs. Carter, of Walkerville, is visiting her daughter, Mrs. Robert Hoffman.

Mr. and Mrs. Will Ball, of Strathroy, spent Sunday with the latter's mother, Mrs. Agnes Smith.

Arthur Hopkins spent Sunday in the burg.

PRATT'S SIDING

The regular monthly meeting of the Book Club was held at the home of Mrs. John Reycraft on Wednesday afternoon, November 7th. The president opened the meeting with the reading of the creed, and the minutes of the last meeting were adopted as read by the secretary. The roll call was answered with a suggestion for a Christmas gift.

Interesting readings were given by Mrs. E. F. Reycraft and Mrs. Will McCutcheon. Attendance, 23 members and 6 visitors. Collection, \$2.82. Dainty refreshments were served by the hostess. The next meeting will be held at the home of Mrs. Elias Reycraft on Wednesday, December 6th. A hale is to be packed for a needy family. Roll call—A New Year's suggestion.

APPIN

The second subject of a series of sermons by Rev. M. C. Parr in the Methodist church on Sunday evening will be "Stewardship of Personality."

Mr. and Mrs. D. A. Campbell and family spent a week-end recently with Mr. and Mrs. J. S. Smith, of St. Thomas.

CASHMERE

Miss Rhoda Taylor and friend, of Walkerville, spent the week-end at the former's home here.

Mrs. B. F. Jeffery, of Newbury, spent Thursday with her daughter, Mrs. Gavin Sitter.

Tom Farrell has gone to fill a position in Windsor.

Bob Sutherland, the "road boss," has gone to his home in Woodslee until the weather clears, when some grading will be done on the new road.

Mr. Dewhurst, of Tilbury, has completed the fence along the highway, which is a great improvement on the old saggy fence. The lawn fences look real nice, too.

A number from here attended the play "The Little Cidhopper" at Wardsville on November 23rd, put on by the Bothwell dramatic club, and report it as being "just fine."

Mrs. Chas. Tunks has returned home after spending three weeks with her daughters in Pontiac.

Clarence Tunks and Norval Sitter arrived home from the West last week.

Mrs. Earle Linden and son Murray are visiting relatives in Detroit.

Basil and Melvin Sitter, of Detroit, visited their sister, Mrs. Earl Tunks, on Sunday.

We are very sorry to hear of the death of Miss Margaret Bayne, of Newbury. We extend sympathy to the bereaved ones.

Mr. and Mrs. Allan Sitter, Bothwell, spent Sunday with their daughter, Mrs. Earle Tunks.

Mr. and Mrs. Calvin Sitter and Franklin and Donald spent Sunday with Mr. and Mrs. B. F. Jeffery at Newbury.

CAIRO

Miss Carrie Penby, of Madison, Wis., who has been visiting her uncle and aunt, Mr. and Mrs. Penby, has returned home.

Jim Surse made a business trip to London on Monday.

Mrs. Adams and Miss Brown, of Sarnia, are visiting their brother, Wes Brown.

Miss Tena Leitch, of Glencoe, spent Thursday with Mrs. Fred Burr. Quite a number attended the funeral of Michael Coleman on Wednesday.

Mr. and Mrs. Fred Clements spent Sunday with Mr. and Mrs. Clarence Brown.

We are glad to report that Miss Myrtle Annett is improving, though slowly.

The Willing Workers held a meeting Monday evening at the home of Mrs. Robert Huffman to arrange for their bazaar on Friday afternoon and evening.

Mr. and Mrs. Frank Munroe, of Oakdale, spent Sunday with Mr. and Mrs. Alex. Munroe.

Mr. and Mrs. Albert Rush, Bothwell, and Mr. and Mrs. John Cross were Sunday visitors with Mr. and Mrs. John Armstrong.

With so thorough a preparation at hand as Miller's Worm Powders, he mother who allows her children to suffer from the ravages of worms is unwise and culpably careless.

A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a mercurial act to rid it of these destructive parasites, especially when it can be done without difficulty.

DAVISVILLE

Mr. and Mrs. Fred Haggith and family spent Sunday with Mr. and Mrs. Lawrence Babcock.

Mr. and Mrs. Fred Waterworth and daughter, Madeline, spent Sunday with her brother, Fred Armstrong.

Mrs. Robert Armstrong and son Edgar spent Sunday with Mr. and Mrs. Archie Regis.

Mr. and Mrs. Wm. Blackhall are spending a few weeks with his mother here.

WOODGREEN

A quiet wedding was solemnized at the home of Mr. and Mrs. A. F. Squire on Tuesday, November 20th, at 3 o'clock, when their eldest daughter, Iva, was united in marriage to Duncan McLachlan, of Kilmartin.

Rev. Mr. Bridgette, of Wardsville, officiated. Amid showers of rice and confetti the happy couple left for a honeymoon trip to Detroit and points west. They will reside on the groom's farm near Kilmartin.

Miss Margaret Archer and Miss Margaret Rodgers, of Wardsville, spent Saturday at Thos. Simpson's.

A number of delegates from here attended the Sunday school convention in Bothwell on Thursday.

Mr. and Mrs. Scoyne and daughter, of Blenheim, are visiting at David Perrin's.

Mrs. J. Slyff and baby son, of West Lorne, are visiting at H. Coyne's.

Don't forget the concert on Friday evening, December 21. A good program will be given.

Harold Elsom spent the week-end in London.

Mr. and Mrs. W. Edwards and Howard, of Strathroy, spent Sunday at Geo. Edwards'.

Mrs. Daum visited in Glencoe last week.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation, and it always maintains its reputation.

SOUTH EKFRID

Mr. and Mrs. Archie Duncanson, of London, spent Sunday at D. A. Dobie's.

Mrs. Duncan Leitch, of Cowal, spent the week-end with her sister, Mrs. D. A. Dobie.

Mrs. James McRae and Barbara spent a few days last week in Windsor and Detroit.

Albert Brown has returned home after spending four months in the West.

Mr. and Mrs. John McAlpine and Mrs. McDonald and family, of Glencoe, spent Sunday at John L. Tait's.

Mr. and Mrs. Alfred Jones, of Pratt's Siding, spent Sunday at Dougald McIntyre's.

The annual meeting of the U. F. W. O. was held at the home of Mrs. Bert McEachren on Wednesday, November 21, when an excellent program was rendered. Papers were given by Mrs. Roy Squire and Mrs. James McRae, also two choruses.

Mrs. F. Arnold was appointed delegate to the U. F. O. convention in Toronto. Mrs. W. Cyster and Mrs. Dunc. Hyndman were appointed delegates to the West Middlesex convention in Strathroy on November 29th. The following officers were appointed for the coming year:—

President, Mrs. H. Arnold; vice-president, Mrs. J. L. Tait; secretary-treasurer, Mrs. Crawford Allan; directors—Mrs. D. A. Dobie, Mrs. Geo. Coad, Mrs. A. Coulthard, Mrs. Roy Squire, Mrs. W. Cyster and Miss A. Thomas. Lunch was served by the hostess, assisted by Mrs. J. McRae, Mrs. G. Thomas and Mrs. R. Squire.

The annual meeting of the U. F. O. was held on Monday evening when the former officers were re-elected. Alex. Coulthard was appointed delegate to the U. F. O. convention in Toronto. Wm. Cyster and Bert McEachren were appointed delegates to the convention in Strathroy on November 29. The next meeting will be a joint meeting at the home of H. Arnold on Wednesday evening, December 19th, when the reports of the conventions will be given.

EKFRID STATION

The regular meeting of the Eureka Community Club has been postponed and another date will be set.

John Switzer, of Windsor, visited his parents recently.

Lawrence Eaton has returned home from the West.

The school and Sunday school have been closed on account of measles in this neighborhood.

Miss Anna Eaton is visiting friends in Dunwich.

KILMARTIN

The regular meeting of the Burns' church Y. P. literary society will be held next Tuesday, December 4. The main feature of the program will be a debate: "Resolved that public speaking is a greater power in the progress of a people than is the written word." Affirmative speakers—Doug. Walker, Will Walker, Jean Patterson. Negative speakers—Emerson Little, Malcolm Walker, Jean McNaughton.

Dr. D. F. McLachlan, of Windsor, visited his father, Alex. McLachlan, last Wednesday. We are sorry to report that Mr. McLachlan is in poor health.

Rev. Mr. Oaten, Dominion Alliance representative, of Toronto, will occupy the pulpit in Burns' church, Moss, next Sunday morning.

Mrs. Tom Moore, of Walkerville, is seriously ill at the home of her mother, Mrs. Alex. D. McAlpine, here.

Peter McGregor, of Detroit, is renewing old acquaintances in this vicinity.

James Munroe is spending some time with friends in Toronto.

Leonard Munroe is visiting his brothers in Windsor.

Alex. McKellar and Hughell Munroe were Detroit visitors last week.

Dan L. McKellar is home from the West.

The annual meeting of the No. 9 U. F. O. club will be held next Monday evening.

STRATHBURN

The annual meeting of the Battle Hill U. F. W. O. was held at the home of Mrs. John Letbridge on November 7th. The following officers were appointed for the ensuing year:—

President, Mr. Bert Gould; vice-presidents, Mrs. Nixon and Mrs. Bert Simpson; secretary-treasurer, Mrs. Alfred Gould; directors—Mrs. Joseph Gilbert, Mrs. George, Miss Hurley, Mrs. Copeland, Mrs. Weekes and Miss Gilbert. The next meeting will be held at the home of Mrs. Frank Copeland on December 5th.

Mrs. Chas. Simpson, of Windsor, arrived a week ago to visit with her sons.

Frank Trestant left this week for Detroit after spending two weeks at his home here.

Wedding bells will be ringing in South Ekfrid this week.

We are pleased to hear that Miss Jean Coulthard is improving after her recent illness.
