Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	16x	18x	20x	22x	24x	26x	28x	30x	32x
12x	14x	16x	18x	20x	22x	/	26x	28x	30x	32x

**The copy filmed here has been reproduced thanks
to the generosity of:**

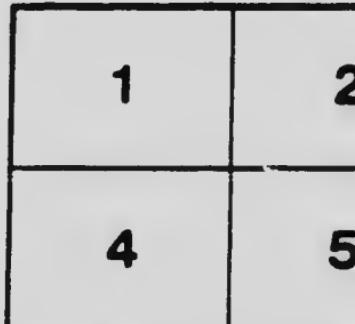

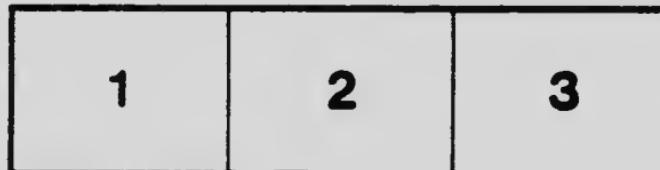

**Stauffer Library
Queen's University**

**The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.**

**Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.**

**The last recorded frame on each microfiche
shall contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.**

**Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirely included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diagrams illustrate the
method:**

L'exemplaire filmé fut reproduit grâce à la générosité de:

Stauffer Library
Queen's University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtront sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Issued September 12, 1919

Mallophaga of the Canadian Arctic Expedition, 1913-18.

A. W. BAKER, *Ontario Agricultural College, Guelph.*

The Mallophaga taken on the Canadian Arctic Expedition comprise a small collection of twenty species occurring in eleven genera. These parasites were taken from thirteen species of bird hosts and one mammal. The collection shows three new records for America, and a considerable number of new host records. The specimens were collected by Mr. Frits Johansen and other members of the expedition.

In preparing this list I have followed Harrison's generic classification, and also have followed his specific synonymy. The result is that a number of common species appear under names which have not previously been given them in papers from this continent. I have also followed Harrison in giving the original bibliographical record for Nitzschian species.

Since the districts where the collections were made are so infrequently worked over I have included the dates of collections for the possible benefit of future collectors. Considerable collections of Mallophaga from Alaskan birds have been worked over by Kellogg and others, and where these workers have made previous records from Alaskan birds of one of the species occurring in this collection, I have made mention of the record.

I append figures of several forms which are new American records or of which descriptions and figures may not be readily available to Canadian students.

I am much indebted to Mr. G. F. Ferris, of Leeland Stanford Junior University, for examining a number of species in the collection and comparing them with material in the University collections. I am also indebted to Mr. H. G. Crawford, of the Department of Entomology, Ontario Agricultural College, for preparation of the material for microscopic examination.

Genus Menopon.

Menopon striatum Kellogg.

New Mallophaga III, 1899, p. 44, PL IV, f. 6.

Numerous specimens, males and females, from Rock Ptarmigan, *Lagopus rupestris* (Gmel.), taken at Bernard harbour, Dolphin and Union strait, Northwest Territories, in October, 1915; and from Willow Ptarmigan, *Lagopus lagopus* (Linn.), taken at Bernard harbour in March, 1915.

Recorded by Kellogg from *Lagopus lagopus* taken at Kodiak island, Alaska.

Menopon sp.

One specimen too immature for specific identification from a Horned Lark, *Otocoris alpestris* (Linn.), taken at Bernard harbour, Northwest Territories, in August, 1915.

Genus Myrsidea.

Myrsidea brevimea Nitzsch.

Zeit. f. ges. Nat., XXVII, 1866, p. 420.

Numerous specimens, males and females, from American Raven, *Corvus corax principalis* (Ridgw.), taken at Bernard harbour, Northwest Territories, in August, 1915.

The expedition specimens under this record approach most nearly to the above species, which was described by Nitzsch from a Nutcracker, *Nucifraga caryocatactes* Linn.

Genus **Trinoton**.

Trinoton anserinum Fabricius.

Syst. Anti., 1805, p. 365.

One female from a Hutchins Goose, *Branta canadensis hutchinsi* (Richardson), taken at Bernard harbour, Northwest Territories, in June, 1915.

Recorded by various writers (*T. conspicuum* N.) from various species of geese and swans. Recorded by Carricker from a Whistling Swan, *Olor columbianus* (Ord), taken in N. Alaska.

Trinoton querquedulae Linné.

Sys. Nat., 1758, p. 612.

One female from a Pintail, *Dafila acuta* (Linn.), taken at Barter island, Alaska, in June, 1914.

Recorded by various writers (*T. luridum* N.) from this and many other species of ducks.

Genus **Ricinus**.

Ricinus clypeatus Mjöberg.

Arkiv. f. Zool., VI, 1910, p. 60, Pl. II, f. 1.

One female from a Horned Lark, *Otocoris alpestris* (Linn.), taken at Bernard harbour, Northwest Territories, in August, 1915.

Described by Mjöberg from two females from the same host in the Museum of Gothenburg.

Genus **Trichodectes**.

Trichodectes sp.

Included in the records of the collection is a statement that a red fox, *Vulpes alascensis* (Merriam), taken along the Sadlerochit river, in northern Alaska, had a species of *Trichodectes* (?) in its fur. Unfortunately no specimens were preserved.

Genus **Goniodes**.

Goniodes mammillatus Bojow.

Zeit. f. ges. Natur., XXXV, 1870, p. 483.

Numerous specimens, males and females, from Rock Ptarmigan, *Lagopus ruficristis* (Gmel.), taken at Bernard harbour, Northwest Territories, in June, 1915, and May, 1916, and at Demarcation point, Alaska, in May, 1914; and from Willow Ptarmigan, *Lagopus lagopus* (Linn.), taken at Bernard harbour, Northwest Territories, in February, 1915, and March, 1915, and at Demarcation point, Alaska, in May, 1914.

Recorded by Kellogg from *Lagopus lagopus*, taken at Kodiak island, Alaska.

Genus **Lipeurus**.**Lipeurus protervus** Kellogg.

New Mallophaga, III, 1899, p. 31, Pl. III, f. 4.

Many specimens, males and females, from Rock Ptarmigan, *Lagopus rupestris* (Gmel.), taken at Bernard harbour, Northwest Territories, in November, 1915, and May, 1916, and at Demarcation point, Alaska, in May, 1914; and from Willow Ptarmigan, *Lagopus lagopus* (Linn.), taken at Bernard harbour, in February, 1915, and March, 1915, and at Demarcation point, Alaska, in May, 1914.

Also several males and one female from a Lapland Longspur, *Calcarius lapponicus* (Linn.), taken at Demarcation point, Alaska, in May, 1914. Since the species is typically a parasite of grouse, one is led to question the authenticity of this record.

Recorded by Kellogg, and Kellogg and Knwana from *Lagopus lagopus* from Alaska.

From a comparison of the expedition specimens with the descriptions of European writers, I am led to the conclusion that *L. protervus* is closely related to, if not identical with, the *Nirmus quadriatus* of Nitzsch. This species, which Harrison looks on as a syn. eym of *Degeerilla camerata* Nitzsch., has been recorded by a number of European writers from various species of *Tetrao* and *Lagopus*.

Genus **Phillopterus**.**Phillopterus ceblebrachys** Nitzsch.

In Denny, Anoplur. Brit., 1812, p. 92, Pl. I, f. 3.

Numerous specimens, males and females, from Snowy Owl, *Nyctea nyctea* (Linn.), taken at Barter island, Alaska, in June, 1914.

Recorded by Kellogg from the same host taken at point Barrow, Alaska.

I have numerous specimens of this species from the same host taken in Ontario. These specimens are uniformly paler and stouter and the cephal from more broadly truncate than the expedition specimens. The latter approach more nearly to the descriptions and dimensions given by European writers, especially Piaget, than do my southern specimens. It is doubtful, however, if the two can be separated.

Philopterus cursor Nitzsch.

In Bonnecker Handbuch II, 1838, p. 426.

Mature male and female and numerous immature specimens of both sexes from Short-eared Owl, *Asio flammeus* (Pontoppidan), *A. occipitrinus* (Pall.), taken at Barter island, Alaska, and Demarcation point, Alaska, in May, 1914.

Recorded by Kellogg from the same host taken at point Barrow, Alaska.

Philopterus dentatus Scopoli.

Ent. Carn. 1763, p. 383.

One female from a Hutchin's Goose, *Branta canadensis hutchinsi* (Richardson), taken at Bernard harbour, Northwest Territories, in June, 1915.

Recorded by European and American writers (*P. icterodes*) from various species of ducks and geese; by Kellogg from *Merganser serrator* Linn., taken at Kodiak island, Alaska.

Philopterus pustulosus Nitzsch.

In Giebel, Zeit. f. ges. Nat., XXVIII, 1866, p. 363.

Two mature males and one female and numerous immature specimens of both sexes from a Parasitic Jaeger, *Stercorarius (Lestris) parasiticus* (Linn.), taken at Camden bay, Alaska, in June, 1914.

Recorded by various European writers from the same host.

Philopterus subflavescens (Geoffroy).

Hist. Abr. Ins., II, 1762, p. 599.

Numerous specimens, males and females, from Snow Bunting, *Plectrophenax (Emberiza) nivalis* (Linn.), taken at Demarcation point, Alaska, in May, 1914, and at Bernard harbour, Northwest Territories, in June, 1916; from Lapland Longspur, *Calcarius lapponicus* (Linn.), taken at Demarcation point, Alaska, in May, 1914; and from Gambel's Sparrow, *Zonotrichia leucophrys gambeli* (Nuttall), taken at Demarcation point, Alaska, in May 1914. The latter form is somewhat smaller than those from the other two hosts.

Recorded by European and American writers (*P. communis*) from many species of passerine birds.

Philopterus sp.

One immature female from Baird's Sandpiper, *Pisobia (Actodromas) bairdi* (Coues), taken at Bernard Harbour, Northwest Territories, in June 1916.

The above specimen is too immature for final specific identification. It may be *Philopterus fusiformis* Denny, recorded by different writers from various sandpipers.

Philopterus sp.

One specimen too immature for specific identification, from a Horned Lark, *Otocoris alpestris* (Linn.), taken at Bernard harbour, Northwest Territories, in June, 1915.

Genus Degeeriella.**Degeeriella complexiva** Kell & Chap.

New Mallophaga III, 1899, p. 75, Pl. VI, f. 3.

Two mature males and one immature specimen from Baird's Sandpiper, *Pisobia (Actodromas) bairdi* (Coues), taken at Bernard harbour, Northwest Territories, in June, 1916.

Recorded by Kellogg and Kuwana from *Tringa canutus*, from Alaska and by Kellogg and Chapman from *Tringa (Arquatella) couesi* from Alaska.

Degeeriella vulgata Kellogg.

New Mallophaga II, 1896, p. 496, Pl. LXVII, f. 3.

One female of this common parasite of Passeres taken from a Gambel's Sparrow, *Zonotrichia leucophrys gambeli* (Nuttall), at Demarcation point, Alaska, in May, 1914.

Genus **Ornithobius**.**Ornithobius goniopleurus** Denny,

Anoplar. Brit. 1842, p. 184, Pl. XXIII, f. 2.

Two females from Hutchin's Goose, *Branta canadensis hutchinsi* (Richardson), taken at Bernard harbour, Northwest Territories, in June, 1915.

Recorded by several writers from *Branta canadensis* and other species of geese and swans.

Genus **Esthiopterum**.**Esthiopterum anseris** Linné,

Syst. Nat. 1758, p. 612.

One female from a Hutchin's Goose, *Branta canadensis hutchinsi* (Richardson), taken at Bernard harbour, Northwest Territories, in June, 1915.

Recorded by European and American writers (*E. jejunum* N.) from various species of geese, including *Branta canadensis*.

LIST OF HOSTS WITH PARASITES.

BIRDS -

Stercorarius parasiticus (Linn.).*Philopterus pustulosus* Nitzsch.*Dafila acuta* (Linn.).*Trinoton querquedulae* Linné.*Branta canadensis hutchinsi* (Richardson).*Trinoton anserinum* Fabricius.*Philopterus dentatus* Seopoli.*Ornithobius goniopleurus* Denny.*Esthiopterum anseris* Linné.*Pisobia bairdi* (Cones).*Philopterus* sp.*Degeeriella complexira* Kell & Chap.*Lagopus lagopus* (Linn.).*Menopon striatum* Kell.*Goniodes mammillatus* Rudow.*Lipeurus proterrus* Kell.*Lagopus rupestris* (Linn.).*Menopon striatum* Kell.*Goniodes mammillatus* Rudow.*Lipeurus proterrus* Kell.*Asio flammeus* (Pontoppidan).*Philopterus cursor* Nitzsch.*Nyctea nyctea* (Linn.).*Philopterus celebrachys* Nitzsch.*Otocoris alpestris* (Linn.).*Menopon* sp.*Rieinus elypeatus* Mjoberg.*Philopterus* sp.*Corvus corax principalis* (Ridgway.)*Myrsidea brunnea* Nitzsch.*Plectrophenax nivalis* (Linn.).*Philopterus subflavescens* Geoffroy.

Calcarius lapponicus (Linn.).

Lipeurus proterus Kell.

Philopterus subflavescens Geoffroy.

Zouolrichia leucophrys gambeli (Nuttall).

Philopterus subflavescens Geoffroy.

Degeeriella vulgata Kell.

MAMMALS—

Vulpes alascensis (Merriam.)

Trichodectes (?) sp.

EXPLANATION OF PLATE.

- Fig. 1. *Myrsidea brunnea* Nitzsch.
Fig. 2. *Philopterus pusillus* Nitzsch.
Fig. 3. *Ricinus clypeatus* Mioberg.
Fig. 4. *Ornithobius goniopleurus* Denny.

K D 2 2 5 0

Anoplura of the Canadian Arctic Expedition, 1913-18.

G. F. FERRIS, Stanford University, California.

The material submitted to me for examination contains two species, in addition to specimens of the human louse *Pediculus humanus capitis* which have been examined by Prof. G. H. F. Nuttall and are recorded in this report. The species are as follows:—

***Linognathus setes* (Olfers).**

Great numbers taken from a white fox, *Alopex lagopus innuitus* (Merriam), Cross island, north coast of Alaska, January 18, 1918, by A. Castel.

This is the first published record of the occurrence of this species from fox, as it had previously been recorded only from the domestic dog but I have at hand specimens from a captive fox in Massachusetts. The specimens from foxes differ not at all from those taken from the dog. The species ordinarily passes under the name of *Linognathus piliferus* (Burm.).

***Echinophthirius horridus* (Olfers).**

Specimens from *Phoca hispida*, Schreber. Collected by F. Johansen, Beaufort sea Alaska, April, 1914.

These specimens are quite inseparable from others from *Phoca vitulina* Linneus, Shetland islands, and *Phoca richardii geronimensis* Allen, coast of California. The species was ordinarily passed under the name of *Echinophthirius phocæ* (Lucas).

REPORT ON *Pediculus* COLLECTED FROM ESKIMOS.

On the 22nd of November, 1917, I received six specimens of lice from Dr. C. Gordon Hewitt, Dominion Entomologist, Department of Agriculture, Ottawa, the same bearing a label stating that they had been collected from the head hairs of Copper Eskimos, Dolphin and Union straits, Coronation Gulf region, by F. Johansen, of the Canadian Arctic Expedition during the winter of 1915-16¹.

On examination they proved to be 3 males and 3 females *Pediculus humanus capitis*, typical specimens and fairly dark in respect to pigmentation. So far it has been impossible to detect any difference between these and other head lice from different parts of the world.

G. H. F. NUTTALL,

Quick Professor of Biology, Cambridge, England.

November 30, 1917.

¹Specimens of *Pediculus* were also collected on Copper Eskimo by Mr. D. Jenness, ethnologist, of the expedition.

FLEAS.

A small collection of fleas, of great interest on account of the meagre character of our knowledge of the fleas of the Canadian Arctic, was sent to Hon. N. Charles Rothschild, London, England, for identification and report. Unfortunately, however, they have been lost, and consequently no report on this group has been prepared. They were collected from the following hosts:

Continental Arctic Fox, *Alopex lagopus inuatus* (Merriam).

Parry's Ground Squirrel, *Citellus parryi* (Richardson).

Keewatin Arctic Hare, *Lepus arcticus canus* Preble.

C. GORDON HEWITT,

Dammon Entomologist.
