that seems to be destroving cabbage and other regetables rapidly, we give what has been tried with considerable success in former years. Take a handful of nitrate of poissh and discolve in a pail-ful of water and sprinkle the plants with the solution. It can be done most effec-tually with a large brunh. Emmar is being used in the West in feeding hogs, cattle and horses. Unless the grains is well developed it does not pay famine is of the solution with the solution the grains is well developed it does not pay famine is a flesh-former in contra-distinction to our and other grains, which largely develop fat. In feeding to houses one half the quantity that would be given of cats is enough.
