

URIC MATISM MAKES FREE

up in compressed tablet form, and are called "GLORIA TONIC," and fifty thousand boxes are offered free to introduce it.

If you suffer from any form of uric acid in the blood, and have Rheumatism, Gout, Lumbago, Sciatica, this is the way to drive it out of your system in quick time. Simply send your name and address, enclosing this advertisement, to JOHN A. SMITH, 1,000 Leing Bldg., Windsor, Ont., and by return mail you will receive the box absolutely free. It is only in "Gloria Tonic" that you can get the above combination ready for use.

ES FOR HONORS TUESDAY NEXT

Thomas B. Carson and C. Fred Stephenson, Musquash—Councillors Wm. J. Dean and James K. Corcoran, J. McHarg and Edward Hanson.

St. Martin's—Warden Robert Connelly, councillor C. Fred Black, John C. Howard, Wm. Smith and Cochrane Creamer.

Patrick McMurtry, of Lancaster, and J. Albricht of Lorneville, had been spoken as probable candidates, but neither of them decided to run. The withdrawal of councillor Cochrane was also a last minute surprise. There had been rumors that councillor Stewart would drop out this week but he is again in the field at the declaration of his friends.

The polling places on Tuesday next will be in the Mason building, Fairville, for Musquash and in the school, for Lorneville. The hall at Dipper Harbor, for Musquash and in Simons they will be located at the agricultural hall, Loch Lomond, and at Kane's corner.

WEDDINGS

Kerrigan-Boyle.

A pretty wedding was celebrated in St. Andrew's church, Dipper Harbor, on Tuesday morning, Oct. 3, at 9 o'clock, when Miss Alice Boyle, daughter of Mr. and Mrs. James Boyle, and James Kerrigan of Church's Mills, were united in marriage by Rev. J. W. Holland. The bride is attended by her sister, Miss Kathleen, while Timothy Driscoll supported the groom. Only the immediate relatives of the principals were the guests. The bride's gift to the bride was a substantial one and the bridesmaid a very pretty hat and pearl ring. A breakfast was taken at the home of the bride's parents, after which they drove to their new home at Church's Mills.

Tingley-Smith.

Hopewell Hill, Oct. 3.—A very interesting event occurred here last evening, when Miss Maud Smith, youngest daughter of Mr. and Mrs. Valentine Smith, was united in marriage to Raymond K. Tingley, son of Mr. Tingley of Midway, at 8 o'clock, at the home of Rev. Mr. Kirby, pastor of the Methodist church. The newly-married couple drove to Hillsboro today and will be on a wedding trip to St. John and other American cities. The bride, who was one of this village's most popular young ladies, was a member of the Methodist church choir and an active worker in the Sunday school and I. O. G. Lodge, and will be much missed.

CRITICISM OF BIBLE DEBATED

(Continued from page 1.)

task of increasing stipends "right off."

There is similar need for action in Cambridge.

"What I ask for myself," said Mr. Henry, "I want to see realized for every sufficient remuneration for his work allow him to live in some degree of comfort."

He was emphasized by Mr. Essex, M. P. who said, "a living wage to working men should be the first charge upon the conscience of the state."

He decided upon a sermon on the fact that the length of a sermon occupies in delivery was illustrated yesterday morning in Parkdale Church, in Rev. R. J. Cooke, D. D., of New York, preached for fifty-five minutes and nearly anybody thought or spoke of it as a long sermon, so exceedingly interesting and eloquent did it prove to be.

Other discourses, which were all heard, occupying but twenty minutes in length, have seemed long. At the same time the pastors, or our Canadian brethren undertake to follow the example these unseasonable preachers and give their congregations hour sermons every day, there will certainly be trouble.

BALM FOR DEFEATED WESTERN TORIERS

Nine Senatorships Now Ready for New Provinces to Follow Census

Redistribution Bill Likely to Be Introduced in Parliament at Its Second Session, and Rewards to the Faithful Will Then Be Handed Out.

Ottawa, Oct. 12.—The Borden government has in view one very convenient and happy way out of the difficulty of finding places for the foremost names on the long list of party workers now anxiously awaiting increased representation for newer provinces to follow census.

The redistribution of the west in the senate is to be increased. When the autonomy bills were passed in 1905 establishing the provinces of Alberta and Saskatchewan, it was provided that each province shall be represented in the senate by four members provided that such representation may, after the completion of the next decennial census, be from time to time increased to six by act of parliament.

The government will carry out the provisions of the act and at the same time will also provide for the representation of British Columbia and Manitoba in the senate by six members each. British Columbia now has only three senators and Manitoba four.

The new senate redistribution will give to C. A. Magrath, the defeated Conservative candidate in Medicine Hat and McLeod, respectively, and L. G. McCarthy, M. P. for Calgary, as suggested.

DR. B. C. HYDE SAYS COURT OFFICER SAID HE COULD FIX JURY

Asked Accused Murderer for \$1500 to Arrange a Disagreement, or \$3,000 for Acquittal.

Kansas City, Mo., Oct. 12.—"There's a fellow on that jury that can be bought. Leave it to me and I'll fix it."

In the foregoing words, according to an affidavit made by Dr. B. Clarke Hyde, Harry Hoffman, a deputy county marshal, sought a bribe from the physician on May 6, 1910, during his first trial for the alleged murder of Col. Thomas H. Swope.

The affidavit was introduced in the criminal court room to his cell. Hoffman was the appellant of Dr. Hyde's attorney for the appointment of Elmore to take charge of the jury at the physician's second trial. Charges of attempts of jury bribery by the friends of Dr. Hyde were made in affidavits presented by the prosecution. The second trial of Dr. Hyde will begin Oct. 23, one week later than the date originally fixed.

CHINA IN THE THROES OF A REAL REVOLUTION

Rebels Declare a Republic

Whole Province Secedes and Establishes a New Government—Cities Fall Into Their Hands—Leader an Exiled Revolutionary—Missionaries Safe.

Hankow, Oct. 12.—The revolution which has been hanging over China for months past and of which the rising in the province of Sze-Chuen was only a small part, has begun in earnest. It is a concerted movement to take the empire and declare a republic.

WOMAN SUFFRAGE WINS IN CALIFORNIA

Later Returns Show Suffragettes Have a Safe Majority—Initiative and Referendum and Recall, Including the Judiciary, Carried by a Sweeping Vote.

San Francisco, Oct. 12.—Woman suffrage has triumphed in California. Returns late today wiped out the majority previously recorded against the amendment, and made this time the margin in favor of the amendment has increased steadily. Totals early tonight were:

IMPERIAL FREE TRADE

The Liberal party in Britain have always been accused of favoring a loose confederation instead of a well-knit Empire; but it may well be that a party which insists upon unity arrived at through local freedom with diversity, may do more to bind the Empire together than all the contrary plans that have been proposed.

AN ANCIENT CHRONICLER

There is no end to the making of books and no limit to the weariness some of them produce among their readers. Skill in joining words is not lacking; the writers forge forward with smooth pen and ink, but they arrive nowhere.

A PICTURE OF SEA POWER

All of the great nations watch one another closely in naval matters, and just now there comes from Washington a detailed report regarding the unqualified success that attended the tests of the new 13.5-inch guns mounted on the new British Dreadnought battleship, which tests have

just been completed off the English coast. The story of these trials gives the average layman a somewhat astonishing impression regarding the terrific striking power of this latest word in big guns.

At first half charges were fired, the guns being discharged singly, then in pairs and fours. Although the ten guns comprising the broadside were fired during the trials, discharging a total of five and a half tons of steel, there was always an interval, almost imperceptible, between the discharges.

IS AMERICAN LITERATURE DYING?

A thoughtful writer in the Boston Transcript, who the other day picked up an old copy of McClure's, published in June, 1894, has compared the contributors of that year and month with those of the present day, and he asks more rather awkward questions regarding the literary situation in the United States in this year of grace.

PRACTICAL MORALITY

The questions, "Is it ever right to tell a lie?" "May a lawyer defend a client when he knows he is guilty?" and others of like nature, which were so warmly discussed by Dr. Johnson and his friends, are still of vital interest. Casuistry has been popular from the earliest age. The Greeks used to play off one duty against another or duty in general against self-interest, leaving the doubter in the alternative of neglecting the one and being a knave, or neglecting the other and being a fool.

A GREAT MAN'S WORK

One of the pathetic things about the death of Sir Robert Barr, was his final realization that the Chinese did not appreciate the tremendous service he had

done them. And perhaps the Chinese are not alone in this matter, for great as is China's debt to Sir Robert Barr, it must not be forgotten that civilization owes him much. In the London Times recently there appeared a very thoughtful article, a part of which is quoted here: "It was in May, 1896, that Barr received final and convincing proof that, however much his services had been used by the Chinese government in the past, there was nothing of gratitude or even of consideration in their appreciation of his labors.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Shipping, Outside of Regular Liners, Practically Barred Out. AGITATION BEGINS FOR A CHANGE. Subways for Montreal Are Now Talked-of—Merger of All the City's Trolley Lines is Now Under Way, and is Being Financed by American Capital.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Montreal, Oct. 9.—One of the few grievances which the progress of the last few years in connection with the St. Lawrence route has not removed is the fact that the powers that be, Lloyd's list insist on a discrimination in insurance rates, which practically shuts out all outside British tonnage, beyond the regular liners, from the half per cent. per annum and for two and a half per cent. per annum, trading to the United States, regular lines to Canada have to pay as high as four to six per cent.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Major George Washington Stephens, the indefatigable chairman of the Montreal Harbour Commission for Montreal, has now carried the agitation a step further by publishing a book on the subject in which the facts are very clearly set forth. Major Stephens' book, in short, states that since the obnoxious rates were introduced above was in fact the conditions of St. Lawrence navigation have been almost revolutionized by improvements to the channel, lighting and other facilities, at the large cost of more than \$85,000,000. That the ship owners of insurance rates to respond to these improvements must have a prejudicial effect upon the St. Lawrence trade goes without saying.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Major Stephens enters fully into the details of the present condition of affairs. In his view the result as shown above, to drive away from the port dependent on the St. Lawrence, and he considers that this practice of the underwriters, if persisted in, will have the effect of driving away from Montreal to points where there is adequate free tonnage to convey it away.

things are not expedient." It is the way the Jewish philosopher states it. But it is difficult for men to stay on this high level. Law is a very much more satisfying guide than vague, elusive charity or the difficult question of expediency; and laws in general have been forthcoming by both church and state. We have even sought to create by law what can only be accomplished by morality. Among an ancient people a man who proposed a new law did so with a rope round his neck—signifying his willingness to be hanged if it worked badly. If that rule prevailed with us the multitude of public executioners would enforce, as no other experience could, that wise custom.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

After everything is said a man must take common sense as his guide. There is no better advice than that of Cicero to his son: "Hear what the philosophers have to say, and then decide for yourself." The rising tide of common sense is sweeping away and will ultimately sweep away completely the refuge of casuistry. Ethics is recognizing today that its business is to investigate what moral conduct is, not to lay down laws of what it ought to be. It is increasingly felt, too, that ethical judgments do not depend on reason alone, but involve every element in character. The real problem of practical morality is to establish a harmonious balance between the intelligence and the feelings—to make with his, "I feel that is so." Whether our education is doing much to make that harmonious balance a matter of attainment is another question.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Montreal, both those who have land beyond the mountain and those landed on the south shore, the Canadian Northern looks like being a fairly good mother. The Montreal movement for town planning, to which some reference was made in these columns a few weeks ago, received a further impetus at the recent annual gathering of the Royal Architectural Institute of Canada, held in this city. The architects devoted part of their time to a conference with the Quebec Association of Architects and the Montreal City Improvement League to a consideration of the problem of town planning, and passed unanimously a resolution urging on the respective provincial governments the necessity of providing without delay parks, playgrounds and housing commissions for such large city under their jurisdiction, with the object of preventing excessive mortality, and making better provision for the health, comfort and recreation of the masses.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Those behind the scheme, however, are very much alive to its importance and propose to make another effort in this direction at the next session. One of the speakers at the architects' conference aptly cited the well known fact that the true Londoner—the real "Cockney"—becomes extinct in four generations. It is probable enough that the facts in London in other large cities where slum areas breed an unhealthy and decadent population.

ST. LAWRENCE INSURANCE RATE MUCH TOO HIGH

Some of the aldermen appear to be under the impression that the city can go ahead with work of this kind itself, irrespective of the powers granted to the Harbour Commission. As a matter of fact, the Montreal Street Railway Company secured powers a few months ago to construct a general survey of the city within three years. There is as yet no sign that this piece of legislation was anything more than a mere precautionary measure, designed to "keep the other fellows out" of the island, until the new financing has been got out of the way successfully, something more may be heard of the matter.

It does not cheer us greatly to reflect that in the meantime the pictures are pretty and the advertising pages flourish.

INTERESTING AGRICULTURAL FEATURES FOR OUR COUNTRY READERS

POULTRY

DUCK CULTURE

Not Hard to Raise and Will Be Found Profitable.

Poultrymen who are just launching out into waterfowl culture seem to get the idea that geese require an enormous amount of feed. Chickens, turkeys and ducks do not require much more than geese through the summer season will live, and do quite well on grass alone. Ducks, however, will require more feed than geese, but better judiciously they will not consume half the amount of feed some poultrymen seem to suppose.

We do not feel competent to offer what would be termed "scientific methods" for handling ducklings, but rather prefer to give in plain, simple language what has been our experience in raising ducks. Duck culture is one of the easiest ways of getting into the waterfowl business, and we find we still have a desire to handle water fowls if circumstances would permit; but owing to pressure of other business matters, we are compelled to forego the growing of any variety of waterfowl.

The methods we found most satisfactory in handling ducklings, subject to the usual precautions, was to keep everything clean about their quarters, and to have a clean, dry, open range, and to feed them on small troughs. A small pan was used for the first day or two, after which we fed together in little troughs made for the purpose. Water was supplied before them at all times. This we found was very essential to successful duck growing.

Another very important point to observe was to not allow food to accumulate and sour. Keep the feed and feed troughs absolutely sweet. As a rule, after three days we allowed our ducklings to run out in the open range. We found they would grow and develop much faster on open range, with plenty of water to drink than when confined to small troughs. It is necessary re-financing completed a large section of suburban roads throughout the island will be undertaken, and this, in conjunction with the programme of electric railways in the neighborhood now being planned by the Grand Trunk Railway as a development of a south shore electric line they control, will mean the building of a very extensive network of new lines around Montreal for a radius of from twenty to thirty miles within a comparatively brief period.

In connection with this street railway financing, N. W. Harris & Co., of Boston and New York, have purchased \$10,000,000 of 7 per cent. gold bonds of the new tramway company. This is the largest amount of money that has ever been made between an American financial house and a Canadian corporation, in the usual way, Canadian financing of this kind is arranged in London. The completion of the deal also will have some bearing on the financial situation since it will release a very large amount—several millions—of borrowed money, by means of which control of the street railway has been carried for considerable time and make it available for new borrowings.

THE PSALM OF LIFE. "Learn to labor and to wait," says the wisest—Chicago Record-Herald. Well, well! And we had the impression was Longfellow.

AND GOT RUN IN. Marks—Ever run over anything in your automobile? Paris—Yes, once, I ran over the speed limit.

Doctor—"So you're feeling perfectly well again, and never touched the medicine I gave you, eh? You made a grave mistake, my little fellow, in not taking this." "How so, doctor?" Doctor—"Why, if you had taken my medicine you would have known what cured you. As it is, you won't be the least wiser."

ABE MARTIN

When you do find a boy that's tryin' to get an education he seems 't think 'er hard in th' world ought to help him, it's a hard world, but th' energy it's 't get back in th' harness.

sat, and dreamed of some fair maid, and grinded the poor man's face; he creeps his eyes a region fair and bright roamed the skies, his wife the dreamer gets some fine but their kind, who picture him as and. But when it comes to shed his coat and takes the man who's wide awake in the mart to make the price of the worth his cheese who loafs in sweat in soap and suds and in cloudland, on a dream, in give the knock-out punch; for kneek the bunch.

WALT MASON

POULTRY

POULTRY MANURE

Its Worth as a Fertilizer—How to Preserve.

Fresh poultry manure has approximately twice the fertilizing value of cattle manure. A comparison of the two products is based upon their nitrogen content. The nitrogenous compounds contained in poultry manure, however, are very unstable and decompose readily into ammonia and volatile ammonium compounds. Consequently, unless proper care is taken, large quantities of nitrogen which might be used for fertilizing are lost.

Several methods have been suggested for retaining this nitrogen. They consist in adding to the excrement either an absorbing substance or an acid compound which will certainly combine with the ammonia as fast as it is formed.

Experiments carried out at the Maine Experiment Station showed that poultry manure, untreated, as well as that mixed with sawdust lost half of its nitrogen in the course of six months. Where the manure was stored with half of its weight of gypsum (land plaster) it lost a third, while that mixed with an equal weight of sawdust retained all of the original nitrogen. Equally good results were obtained by using from one-third to one-half of the weight of the manure of either sulphuric acid or acid phosphate.

From the standpoint of the mechanical condition, the mixture with land plaster gives the least desirable product, although the addition of sawdust aids materially in preventing the formation of hard cakes.

When the manure is to be kept only a few days before applying, good results may be obtained with dry loam or peat as an absorbent.

The absorbent used should be sprinkled daily, in the required quantity, on the floor of the hen-house, from which, in combination with the excrement, it may be removed when desired.

The difficulties experienced in spreading poultry manure, on account of its sticky consistency, may be obviated by mixing with loam, peat or common stable manure. For economical use, it should be spread in relatively smaller amounts than other manures.

The admixture of lime or wood ashes is not advised, since decomposition is suddenly rapid without their use.

It should be borne in mind that each of the absorbents suggested is in itself of value as a fertilizer; the least valuable being the sawdust. Consequently, the elements of the soil should give to some extent the choice of the absorbent used.

Rodney M. West, University Farm, St. Paul (Minn.)

EGG PRODUCTION

Essentials That Are Necessary—Individuality, Proper Care and Food.

Three things are necessary for the production of eggs. These are: the individual, the proper care and the proper food. The individual must be a healthy, vigorous bird, and the proper care must be given to her. The proper food must be given to her.

EGG PRESERVATION

Should Be Practiced in All Homes—How to Do It.

The primary principle to be observed in the preservation of eggs is the protection of the interior from contact with the exterior air. This is done by placing the eggs in a cool, dry place, and by covering them with a material which will prevent the air from reaching them.

The primary principle to be observed in the preservation of eggs is the protection of the interior from contact with the exterior air. This is done by placing the eggs in a cool, dry place, and by covering them with a material which will prevent the air from reaching them.

The primary principle to be observed in the preservation of eggs is the protection of the interior from contact with the exterior air. This is done by placing the eggs in a cool, dry place, and by covering them with a material which will prevent the air from reaching them.

HORTICULTURE

PICKING AND HANDLING OF STORAGE—Proper Methods of Packing.

The proper time for picking apples is very important. Too early picking sacrifices color and quality and also fruit loss, while picking too late results in loss of keeping qualities and often in loss from rotting. The best time for picking most apples, therefore, is when they are "hard ripe," i. e., when they have developed their full size and redness, but have not begun to soften nor to show the yellow color of decay.

DAIRY

THE BABCOCK TEST

How to Operate It in the Factory and Farm Dairy.

Not much is written nowadays about operating the Babcock test. It is taken for granted that every maker knows all about it. And so he should. The maker who does not know how to successfully operate a Babcock test does not know his business. There are, however, many who either through ignorance or a desire not to know, are far from being experts in this line of work.

GENERAL

FALL PLOWING

Does it pay to plow in the fall? That depends on the soil and climate. If the soil is of a firm texture fall plowing will do it good where the winter is severe enough to keep the ground frozen until the spring. It separates the soil and makes it friable. But where the winter is not so tough, clay texture and the winters are mild, not freezing the ground solid for a foot or more in depth, the plowed ground will freeze and thaw and together again and be as firm in the spring as though not plowed. If any good comes from fall plowing it must be weed destruction.

CANADIAN WOMEN AND THEIR WORK

CANADIAN WOMEN AS TEACHERS

By MARJORY MACMURCHY

(Copyright Publishers Press Limited.)

Canadian women have taught successfully in such large numbers that the story of the Canadian woman teacher has become a commonplace. No one apparently has recognized what an interesting part has been taken in the development of Canada by the Canadian woman who has taught. Many interesting types of women teachers have been evolved in the short history of the teaching profession in Canada. There is the type of woman teacher of long ago in the Canadian towns; and the woman teacher of long ago in the country. There is the private school mistress and the public school teacher, both of yesterday and today. There is the college graduate who becomes a teacher. The native born school mistress and the school mistress from Great Britain are two distinct types. There are all the traditions of the ladies' colleges

material, is a native of the Niagara peninsula. She is as heavily interested in life today as she was when she began teaching. Her teaching brought out the individuality of her pupils. In the same way Miss How, principal of the Elizabeth street school in Toronto, which is well known locally and popularly as "The Hattie How School," is an admirable example of the strong individuality of a teacher. Miss How has accomplished more practical work for social reform than, perhaps, any other Canadian. Her chief aim is to "make the best of every boy and girl who passes through her hands. She does not merely mean to make the best of them; she makes the best. The biographies of these two women are examples of the splendid story of the Canadian woman teacher.

There are a number of Canadian women who have achieved a national reputation as teachers. Miss Harriet Johnston, on the staff of the Toronto public schools, has been elected more than once at the head of the Advisory Council to the Minister of Education for Ontario. Mrs. James L. Hughes, wife of Mr. Inspector Hughes, of the Toronto public schools, who came from the United States to be head of the public school kindergarten in Toronto, was elected president of the Dominion Teachers' Association as representative of the kindergarten section. Miss Eliza Ritchie, of Halifax, was instructor in philosophy, Wesley College, Massachusetts, and then associate professor of philosophy in the same institution, until her emigration in 1900 when she returned to Canada. Many Canadian women teachers hold responsible positions in the schools and colleges of the United States. Dr. Annie Marion Maclean, professor of sociology in Adelphi College, Brookline, Massachusetts, is a Canadian. Miss Florence Keys is at Bryn Mawr and Miss Cummings on the staff of Vassar. Miss Laird is at Mount Holyoke. In Montreal Miss Carrie Derick was made assistant professor of botany at McGill University in 1906. Miss Maribeth is warden of the Royal Victoria College for women in connection with McGill. Miss Cartwright is the dean of St. Hilda's, the women's college in connection with Trinity College, Toronto. Miss Addison is the dean of Annesley Coll, the residence for women in connection with Victoria College, Toronto. Miss Addison is the head of the domestic science department of the University of Toronto. In every instance named, as well as in the case of Miss Laird, to be mentioned, the Canadian teachers who hold these positions are women of character, ability and high attainments.

MISS CARRIE DERICK,
Professor of Botany McGill University.

from Halifax to Vancouver, such schools as the Halifax Ladies' College, Edgemoor in Windsor, Nova Scotia; the Ottawa Ladies' College; private schools in Montreal, such as that kept by Miss Edgar and Miss Cramp; a school of the new type; Havergal College for girls in Toronto and Winnipeg; Miss Gordon's school for girls in Vancouver; and scores of others which might readily be named. Toronto's population is considerably increased about the middle of September every year by the coming of hundreds of girls from all over Canada to attend one of ten or fifteen successful schools for girls. New ladies' colleges are being established all over Canada. One of the most recent is a ladies' college at Regina. Miss Bollet, a native of Guelph, until her appointment a member of the staff of Columbia University, has been chosen as head mistress of the new ladies' college. The sole occupation of the public school mistress used to be training little Canadian boys and girls. Now in the cities one of her chief duties is to teach foreign boys and girls what it is to be a Canadian. The history of Canada would be a different story if it were not for the Canadian woman teacher.

MISS ELIZA RITCHIE,
Late Professor of Philosophy, Massachusetts.

Standards have advanced rapidly and are still advancing. To be at the head of a girls' college, or to be a residence for women in connection with a Canadian university, means that the woman who holds the position stands high in her profession, not merely in scholarship, but in character.

MISS JANET CARNOCHAN,
President Niagara Historical Society, one of the oldest teachers in Canada.

Three women teachers were elected to the senate of the University of Toronto in the last session. These three, Miss Balmer and Miss Lawler, of the Harbour Collegiate Institute, Toronto, and Miss Charlotte Ross, of the Margaret Eaton School of Expression, are representative graduates of the University of Toronto. They are native Canadians and received their early training in the Toronto schools. Miss Outlette, head of Westboro school, Toronto, and Miss Riggs, who with Miss Cramp has charge of a girls' school in Montreal, are also typical instances of the Canadian woman teacher who has been trained in Canada. Miss Knox, head of Havergal College, Toronto, and Miss Jones, head of Havergal College in Winnipeg; Miss Hurlbatt, of the Royal Victoria College, Montreal, and Miss Smith, lady principal of the Church School for Girls, Edgemoor, Windsor, Nova Scotia, are instances of the woman teacher in Canada who have been trained in England. Girls' schools and colleges all over Canada are engaged in fitting Canadian girls for domestic and social life. Some of these schools are introducing the ideals of social service to their students. Canada has always been potentially a woman's country. But in a few years the graduates of these schools will have opportunities given to them whether they will or no of filling such positions. The girls' college has been planned to train girls who will be able to fill such positions. On the other hand, the public schools, high schools and collegiate institutions are more or less designed to train girls who will become teachers or who will fill business positions. The training of the public secondary school is for use in the business world. It is impossible to name the out of every type of the Canadian woman teacher at the moment. The graduates of girls' colleges may become a teacher, and the girl who is trained in a collegiate institution in a few years may be one of the leaders among the women of a new private society. Generally speaking, the public school training is more rigorous and the private school training more decorative. It would be impossible to name one out of every ten private schools and colleges for girls in Canada and it would be more impossible to name the women of the public and secondary public schools of Canada.

MISS HURLBATT,
Late Principal Royal Victoria College, Montreal.

ave such women as Miss Harmon of Ottawa and Miss Haight of Toronto, naming two of the number of women who were once heads of girls' schools in Canada. Numbers of other names will readily come to the recollection of any Canadian. One may be mistaken in thinking so, but surely the old system of education used to allow of the growth of stronger individualities. A strong individuality is a fine quality in an instructor. There are two such individualities which can be taken as types of the Canadian woman teacher at the moment. One is the woman teacher who is engaged as a teacher in the primary

schools. She is as heavily interested in life today as she was when she began teaching. Her teaching brought out the individuality of her pupils. In the same way Miss How, principal of the Elizabeth street school in Toronto, which is well known locally and popularly as "The Hattie How School," is an admirable example of the strong individuality of a teacher. Miss How has accomplished more practical work for social reform than, perhaps, any other Canadian. Her chief aim is to "make the best of every boy and girl who passes through her hands. CAMPBELLTON PAIR
ARRESTED YESTERDAY
AT ST. GEORGE

Thursday, Oct. 12. Chief of Police Hughes, of Campbellton, arrived in the city last evening from St. George, having in charge John R. Campbell and Mrs. Ellen Deman, middle-aged persons, who are wanted in Campbellton on very serious charges. Mrs. Deman's husband is living and, according to the warrants on which they were placed under arrest, Campbell is charged with stealing the woman's affections. The woman is also charged with giving to Campbell on August last a gold watch belonging to her husband. They are said to have left Campbellton together for St. George, where yesterday they were placed under arrest by Chief of Police Hughes. They were lodged in cells in central police station last evening, and this morning will be taken to Campbellton to appear before Magistrate Mathewson.

Glamor of the First Night—All Women Are "Sisters" Up There in the Wilds—The Woman in the Tent.

DR. WALKER, BEFORE THE CIVIL WAR, WEARING A VELVET SHIRTEE.

One of the world's unique women is Dr. Mary Walker, of Oswego, N. Y., now living in what might be called retirement when her past prominence in the public eye is considered. Attired in a man's frock coat, man's trousers, wearing a man's silk hat, and carrying a man's cane, Dr. Mary Walker was once a leading topic of discussion when she was touring the country and lecturing upon the proper dress for women. Dr. Walker did not dress for ostentatious sake. She dressed as she did because she believed that such was the proper way for women to dress and she followed in her own mind. She had the courage of her conviction and was willing to pay the cost. It has been many years since her name first became famous, and it has also been many years as bright as ever, and she continues to take the keenest interest in all progressive affairs.

DR. WALKER IN HER FIRST PRINCE ALBERT COAT.

"THE MIST THAT'S OVER IRELAND."

All the latest journals contain obituaries of Katherine Cecil Thurston, who was found dead in bed in a hotel in Cork. Death was due to asphyxiation in a fainting fit. Mrs. Thurston's books are well known on this side, John Chilton, M. P., being the first to win for her a given rank. It was followed by The Gambler (1908), The Fly on the Wheel (1909), and May (1910). I think she was separated from her husband, E. Temple Thurston, who wrote a number of novels and plays and translated John Galsworthy, M. P. His latest book was The City of Beautiful Nonsense (1908), and The Greatest Wish in the World (1910), and Patchwork Papers (1910). Much praise is given to Mrs. Thurston's books and much regret expressed at her sudden and too early death. She was only thirty-seven. Her first book, The Circle, was published in 1903, two years after her marriage to Mr. Thurston. Her second book, The Fly on the Wheel, was published in 1909. Her third book, The Gambler, was published in 1908. Her fourth book, The City of Beautiful Nonsense, was published in 1908. Her fifth book, The Greatest Wish in the World, was published in 1910. Her sixth book, Patchwork Papers, was published in 1910.

STOP MOUTH-BREATHING
The Nose So Built to Offer Greater Safeguards Against Infection

"The habit of mouth-breathing must be stopped absolutely," writes Dr. William Lee Howard in *Murray's Magazine*. "Only by the air being filtered through the nose can you remain germ-proof. Remember this."

"The main channel through which poisonous germs enter the body is the breathing apparatus—the nose and mouth. The present state of civilization calls for constant care and watchfulness in methods of breathing and in the hygiene of throat and nose. Automobiles and trams running along the city streets keep in motion millions of germs. Heaps of dried manure are churned into dust; its hidden germs are turned out and sent through our window-panes, and on to our pillows, for us to breathe in, unless nose and throat are germ-proof.

TWO SAW MILLS
BURN AT MILLTOWN

James Murchie & Son's Plant Totally Destroyed—Loss About \$12,000, Covered by Insurance.

St. Stephen, N. B., Oct. 10.—Two large saw mills and an occupied house, the property of James Murchie & Son, at Milltown (N.B.), were destroyed by fire to-night. The loss has been estimated at \$12,000, but the insurance will about cover it.

MEN, DRESSES AS MAN

WOULD ABOLISH ST. JOHN CABINET INDUSTRIAL SCHOOL

County Secretary Kelley and Other Delegates Favor This at Union of Municipalities Meeting—The Boy Problem Discussed—Members Favor Government Constructed Highway Through Province and Provincial Detective Bureau—Reports of Officers.

Newcastle, N. B., Oct. 11.—The sixth annual convention of the Union of New Brunswick Municipalities opened here this afternoon before a large number of representatives.

Hon. John Morley, chief commissioner of public works, officially opened the convention and referred to many important questions that would engage the attention of the convention.

The executive comprising President Sterling, Secretary-Treasurer McCready, Ald. Wallace, Mayor Reilly, Ald. Hitt, Councillor Cochrane, Mayor Thomas, Mayor Pedina, Councillor Siddall and Ald. Potts met at noon and arranged for the details of the programme.

The delegates in attendance are: J. W. McCready, secretary-treasurer, Mayor Thomas, Ald. Farrell, St. John; J. B. Biss, Frederick; Warden Rogers, Conn. Hills; Mayor Reilly, Conn. Hills; York county; Mayor Reilly, Ald. Rand, Ald. Rich, Moncton; Ald. Siddall, Riv. Egan; G. A. Taylor, Dorchester; Ald. Anderson and Thomas, Murray; Ald. Warden of Sackville; Ald. Potts, County Secretary J. King Kelley, St. John; Conn. Cochrane, St. Martins; Mayor Pedina, Ald. East, St. John; Mayor Castle, Conn. Hills; Conn. Forsythe, Conn. James Johnston, Northumberland; Ald. Cassidy, Chatham; Ald. Polley and Conn. D. W. St. Stephen; Ald. Warden, Sussex; Warden, McLeod, Little Bidestown; Conn. Hitt, Milltown; Conn. Johnston, Charlotte; Conn. Alexander, Campbellton; Conn. Hickey, Bathurst.

The Boy Problem. In discussing Mayor Thomas' paper, Secretary Kelley of St. John county, said that the confinement of external force turns children into conditions they may never escape. He would close down the St. John Industrial Home and put children into private homes. Juvenile courts were absolutely necessary, and there should be provincial organization to see that bad children were placed in good homes.

He said more crimes were committed against criminals than by criminals against society. To work out the boy problem the municipalities must tax themselves. He said the confinement of external force turns children into conditions they may never escape. He would close down the St. John Industrial Home and put children into private homes. Juvenile courts were absolutely necessary, and there should be provincial organization to see that bad children were placed in good homes.

CABINET MINISTERS HUNTING FOR SEATS

Hazen, White and Rogers May Have to Wait Till House Meets

Members Cannot Resign Till Speaker is Chosen Without They Accept Some Office—New Minister of Marine Starts for St. John—Ottawa Journal (Tory) Advocates Fielding for Strathcona's Position.

Ottawa, Oct. 11.—The new cabinet ministers spent today trying to find their bearings as executive heads of their respective departments of state and in getting acquainted with their staffs and with the accumulated contents of the ministerial "black."

It is apparent therefore that until parliament meets these four ministers cannot be provided with seats, unless action is taken before then to create vacancies by the process of appointing some of the members elect to the senate, to judgeships or to some other fitting reward.

Hazen Off to St. John. Hon. J. D. Hazen left for St. John this afternoon. Premier Borden is characteristically endeavoring to show every possible courtesy to the ex-premier Sir Wilfrid Laurier. The office of the opposition leader in the west wing of the parliament building, now vacated by Mr. Borden, is being renovated and made more comfortable in readiness for Sir Wilfrid's occupancy. The latter returned from Montreal last night and has been confined to his residence today with a slight indisposition. Premier Borden is himself badly in need of a rest and change in order to recuperate after his strenuous and unremitting labors of the past ten months.

Wants Fielding to Succeed Strathcona. The Evening Journal (Conservative), editorially today advocates the appointment of Hon. W. S. Fielding to succeed Lord Strathcona as Canadian high commissioner at London.

"No doubt," says the Journal, "some of our Conservative friends will hold up their hands in holy horror at the idea of Mr. Fielding being offered the position. And the Liberals choose to provide a seat in the dominion parliament for Mr. Fielding and he is willing to accept it, we cheerfully admit that he is likely to be even more valuable to Canada in our own parliament than in London. But Mr. Fielding is no longer the robust man he was. It is possible that he fears further parliamentary work, which in his case would undoubtedly be strenuous. If so, our opinion is that few Canadians could represent this country at the capital of the empire more creditably or more ably than Mr. Fielding."

Some Bye-Elections Nov. 1. An order in council was also passed this morning fixing the dates of the bye-elections of the new ministers, necessitated by the acceptance of portfolios. In the case of Hon. Messrs. Borden, Reid, Nantel, Doherty, Crothers, Hughes, Bellenger, Monk, Roche and Foster the nominations are fixed for Oct. 25, with polling, if necessary, on Nov. 1.

The date for Mr. Burrell's re-election in Yale-Caribou will be fixed later. He has not yet been sworn in and a longer interval will be necessary in his case. In the case of Hon. Messrs. Rogers, White, Cochrane and Hazen, for whom seats will have to be found, nothing can be done at present.

The only way in which a vacancy can occur is by the resignation of the minister, handed in to the speaker when parliament meets or else by his appointment to an office of emolument under the crown.

objections to their representatives in the assembly and to properly review the proposed legislation. The secretary then gave a comprehensive report of the proceedings of the Canadian Union of Municipalities at Quebec, at which he was present, and presented his financial statement for the year.

Mayor Thomas led the conference on the boy problem in a helpful address in which he touched upon the causes leading to punishable crime in youth, attributing much of the waywardness to neglect by parents and of the proper enforcement of laws requiring children to be kept off the streets. In making his recommendations he summed up as follows:

"We have as an example the experience of a number of cities in the United States and elsewhere, that have handled the boy problem in a very successful manner. The first and most essential movement is the establishment of a juvenile court and a place of detention. In establishing a juvenile court such as our police or supreme courts with all their formalities and dignity, but a room with simply a few chairs and a table, not open to the public, but only to those directly interested in the case. And the court presided over by a judge who will be sympathetic but not sentimental, with a quality of firmness which will give the child resolution, so often needed in the absence of parental firmness at home and which is responsible for much serious delinquency. The probation officer should have an outlook sufficiently broad to comprehend the need and nature of the child and make the most of them and never ceasing in his endeavor to mold the child's character. The detention home is where the child is taken when arrested instead of the police court and is held there until taken before the judge.

Reformatory institutions are needed for the incorrigible and dangerous to be sent there for different periods, the chief purpose to be accomplished being the sublimation of authority and the enforcement of discipline.

I think the boy problem is one of the subjects that should receive the consideration of the municipalities and be represented to our legislature in such a manner that some action will be taken by them to assist in the promotion of this very important work.

A substitute for a cheval glass may be provided in a little house by fastening an ordinary looking glass to the inside of a closet door where there is a good light, so that the lower edge of the glass shall be almost level with the bottom of the door. In this mirror one may see very well how a skirt hangs.

Paint your garbage can the same color as the house. You will prolong the can's usefulness, and if it must be stood outside the back door it will be less conspicuous.

Before laundering curtains measure the width and keep it for reference. Lace curtains in particular are often torn by being stretched beyond their original width.

Of interest to Women

Metal fringe is much employed on evening dresses and head fringes are also seen. The little frock of silk, satin, taffeta or chamois has enjoyed wonderful popularity this season.

Two millinery styles that are being strongly featured for early fall are the soft white and light-colored felts and the colored and black velours.

A decided taste is expressed for black and white, or, rather, for white and black combinations, in fall costumes. This is especially true of robes.

Some new effects are being shown in marabout feathers, notably in delicate combinations of black and white and pale pink with a shadow of black.

Most of the elegant afternoon dresses have trains. These are of irregular shape and sometimes are formed by no more than a scarf end of the floating draperies.

The new "clam" frocks may be square, perfectly round or full and irregular in shape. A handsome imported model had a full "tam" crown of chamomai attached to a trim of ash-brown velvet.

A little borax and ammonia added to water for cleaning painted walls will greatly expedite the work. Wash a small part at a time and wipe it perfectly dry with a clean cloth.

Two measuring-cups kept in the kitchen will save rinsing out one a great many times. Keep one cup for dry ingredients, the other for liquid. Have both the same volume over a level white baking never leave the door open, but cool it by the drafts, or removing one of the plates over the oven.

New gloves which are being treasured against the time of being worn should be wrapped in paraffin paper. It will keep them from changing color.

Dark cloths may be kept odorless by having a solution of soda in a marmalade jar beside the sink and placing the mops in this when they are not in use.

When beating eggs observe that there is no grease on the whisk, as it will prevent the eggs from frothing.

A glassier's knife will be found an excellent thing with which to scrape and clean the bottoms of tin and kettles.

Where lamps are used in a box of sand should be kept every floor to be ready in case of accident. Sand extinguishes burning paraffin, water spreads it.

Always keep flum in the house. It checks bleeding wounds, and for bleeding of the mouth or tongue a wash in cold water in which alum has been dissolved is very effective.

Ink spots on mahogany may be removed by being touched with a feather dipped in oil of vitriol diluted with twice its quantity of water. The spot should be well and quickly rubbed.

To prevent a baby from rolling off a bed spread a large cotton quilt or piece of denim between the springs and the mattress, letting it hang over the sides to a depth of 20 inches or more; sew strong tapes firmly to each corner of the quilt or cloth, turn upward and then tie securely to the bedposts.

It is sometimes difficult to understand how clothes come from the wash spotted with iron rust. This may be caused by the chemical action of a bluing that contains iron, with the soapless. There are two ways to prevent it—through rinsing and another brand of bluing.

BRITAIN'S TERPINC SEA POWER

In October last it was announced in the London Daily Telegraph that the naval authorities had decided to abandon the familiar 12-in. gun in favor of a far more powerful weapon of 13.5-in.—that the new gun had been tested with satisfactory results for some time it had been selected in process of manufacture, and that it would be carried by the six battleships and battleship-cruisers then in an advanced stage of construction, and by the five vessels of the programme of 1911-12. It was further prophesied that the admiralty would be found to have gained a lead over all other navies of the world as unexpected as it would prove gratifying to the British people.

Two of these eleven ships will pass into active service almost immediately, to be followed by another four in the early spring. The sanguine hopes which they prompted in the autumn of last year are now shown by event to have been well founded. The two vessels now completing—the Orion and Lion,—and their sisters are beyond question as superior as fighting machines to the original Dreadnought as that vessel was to those built before her advent. It is furthermore known that they are unique in their concentrated power and will carry with them when they beat the pennant the most complete justification of the armament policy pursued by the board of admiralty.

Other powers endeavored to out-Dreadnought the Dreadnought by adding to the number of big guns, even though they could not be effectively employed simultaneously. The latest German battleships, the Hoegaard, Thüringen, and Ostfriesland, now completing for entry into the high sea fleet mount twelve 12-inch guns, in the immediate successor to the British Dreadnought. But only eight of the twelve German guns can bear at once on either broadside, while in the new British ships which have lately joined the home fleet the whole armament can be thus employed.

The model gun-ship is the one which can bring all her battle guns into action against the enemy at once. British vessels conform to this rule.

WORLD'S MOST POWERFUL SHIP. The Orion is the Lion's less speedy sister. She is more powerful than the Lion—indeed, she is the world's most powerful man-of-war. Her main belt is 21-in. thick, and she carries two more 13.5-inch guns than in all—disposed on the centre line, and capable of being fired through the angle from the bow to the quarter. The Orion also carries twenty-four more anti-torpedo weapons of the 4-inch type. How does she compare in gun fire with the Dreadnought it may be asked. The Dreadnought could fire a broadside of 6,800 lb.; the Orion is 12,500 lb., an increase of nearly 100 per cent, at a really 10 per cent increase in cost of construction.

These two ships belong to the ship building programme of 1908-10 and constitute the first quartet of the Home Fleet. Colossus having been already commissioned. The "continent" Dreadnoughts are due in the spring. Germany is just commencing the construction of her new programme, which will join the High Sea Fleet about the same time as the Lion and the Orion enter the British Home Fleet with the strength of the Home Fleet ships of the Dreadnought type completed or practically completed for sea, is now as follows:

GREAT BRITAIN. Dreadnought, Indomitable, Indefatigable, Invincible, Bellorophon, Temeraire, Superb, St. Vincent, Collingwood, Vanguard, Neptune, Indefatigable, Colossus, Hercules, Orion, Lion.

GERMANY. Nassau, Westfalen, Rheinland, Posen, Von der Tann, Helgoland, Ostfriesland, Thüringen.

So far we have held our own owing to the splendid organization of our ship-builders and gun designers, and our ships of the largest size are being built in the last detail of construction in twenty-four months, and thereby the Admiralty has been able to hold a lead in comparison with rival fleets. The secret of the attainment of the present standard of two to one in Dreadnoughts in contrast with the next standard is to be found in the shipyards and gun and armor factories. This in itself is proof of the efficiency of these allied British industries.

The rate in naval power is not ended; there is a keen struggle still ahead; but so far, thanks to a healthy public opinion, we have held "our place in the sun."

will make an ideal washbasin to use instead of a bucket or pan. In case your icing is too soft, try using a band of stiff wrapping paper a little higher than the cake, and see how nicely it sets the icing. If you need another help for this band: If left on my cakes and stood in the cake-box they are just as moist a week or two later as the first day baked.

One wise girl, before spreading, always wrings an old napkin out of water and pinning the ends of the linen around her head, makes a most effective filter for dust which would otherwise fill her lungs.

The cloth hangs loosely over her nose and mouth, not interfering with her breathing in the least. Miss object to camphor, which if put in places frequented by them will drive them away completely.

If the cellar stairs are not well lighted, paint the bottom step white. This will have many an unfortunate misstep. Grease on a wall can generally be eradicated by covering with clean blotting paper, and then passing a warm iron over it.

Brass bedsteads can be cleaned by rubbing with a cloth dipped in sweet oil. Afterward polish with a soft, dry piece of leather. To bleach handkerchiefs, after washing, let them soak overnight in water in which a bit of cream of tartar has been dissolved.

Very quickly the baby's dresses become too snug for comfort. Did you ever try trimming out the neck, armholes, and putting in new sleeves? This will enlarge the little dress enough to insure comfort, until the material shows signs of wear and the dress must be discarded.

A gate between two rooms has proved a blessing in one house. It is fastened in the doorway, between the nursery and "mother's room." There are times when the mother likes to relax, and the children without being right among them. Often sewing or writing may be done more easily with the gate between the mother and the little ones.

GREAT FRENCH NAVAL DISASTER IN WHICH MORE THAN 400 WERE KILLED DESCRIBED PICTORIALY

WRECK OF THE LIBERTÉ. WRECK SHOWING TURRET AFTER THE EXPLOSION. HEREWITH ARE PRESENTED THE FIRST PHOTOGRAPHS TO REACH AMERICA SHOWING SCENES FOLLOWING THE EXPLOSION OF THE FRENCH BATTLE SHIP LIBERTÉ IN THE HARBOR OF TOULON. THIS DISASTER WAS THE WORST IN THE HISTORY OF THE FRENCH NAVY. FOUR HUNDRED AND TEN MEN WERE KILLED AND MANY INJURED.

STOP MOUTH-BREATHING

The Nose So Built to Offer Greater Safeguards Against Infection

The habit of mouth-breathing must be stopped absolutely," writes Dr. William Howard in "Mouth Breathing." "Only the air being filtered through the nose in you remain germ-proof. Remember the main channel through which poisonous germs enter the body is the nostrils. Apparatus—the nose and mouth; some of the germs of tuberculosis, diphtheria, meningitis, tonsillitis, run the body through the nose and mouth.

The present state of civilization calls for constant care and watchfulness in the nose of breathing and in the hygiene of the throat and nose. Antiseptics and disinfectants are used in the streets and in the houses to destroy germs. Heaps of dirt and manure are carried into dust; the germ and dirt are carried into the nose through our window-creases, and on to our faces, for us to breathe in, unless some filter is placed in front of the nose.

They can be made germ-proof only by salinities and right breathing. See that there are no growths—adenoids—in the nostrils. Have the breathing channel perfectly clear of all foreign substances. Wash the nostrils, however, and then only to clear of dust. In perfect condition, the nose is germ-proof. Salt solutions and other similar "home remedies" are dangerous, because the salt, or alum, or other irritant is used, irritates the sensitive membrane, and it is this slight irritation which sets judgment to germs.

Hot alum water, in the proportion of one pound of alum to three quarts of water, applied to crevices where ants and other insects abound, will effectively drive them away.

Is your Rheumatism following, Sprains, Lameness—relief for you in ISON'S DYNE MENT. ISON'S DYNE MENT. ISON'S DYNE MENT. ISON'S DYNE MENT.

CASTORIA For Infants and Children. The Kind You Have Always Bought. Bears the Signature of J. C. Ayer & Co. GUARD ROOM.

Thursday, Oct. 13. A wedding that had an almost tragic aspect was performed in the guard room in Central Police Station at seven o'clock, when, in the presence of a few police officers, Thomas R. Ferris was united in marriage to Bertie Ready. The ceremony was performed by the Rev. Father Conners, pastor of the Mission church, Paradise Row, and was the outcome of a bitter romance. The young pair for the last few years had been intimate friends. Recently the young man was placed in jail on a serious charge. Realizing that trial might result seriously for him, the girl, came to his rescue, and in order to win his release, agreed to marry him. The guard room was chosen as the place, and it was decided to have Father Conners perform the ceremony at 7.30 o'clock.

LEAVES \$25,000 TO ACADIA COLLEGE Dr. Charles F. Myers, of New York, Also Bequeaths \$1,000 to Church at Brookline, Nova Scotia.

New York, Oct. 10.—The will of Charles F. Myers, M.D., D.C.L., who died August 22, last, filed in the Surrogate's office, today, bequeaths an estate, the principal amounting to more than \$100,000 real property and more than \$100,000 personal property.

William W. Myers, of Boston, a brother of the testator, left \$1,000, and Margaret E. Baker, of Brookline (Mass.), \$1,000, the same amount being left to several nephews and nieces.

To the Acadia University of Nova Scotia, he left \$25,000, "or any part of it that has not already been given to establish and for all time support a professorship known as the Professorship of Biology and Zoology." The Newton Theological Institution is left \$1,000, the income of which is directed to be used yearly to help students.

To the church of St. John the Baptist, in Boylston (N. S.), \$1,000 is left.

Norton, Oct. 9.—The village of Norton secured the services of the Rev. P. G. Goodson in a revival movement which has laid hold upon the whole community. The meetings commenced last Sabbath morning with all the churches taking active part.

One great feature of the present revival is the large choir made up of the choirs of the different churches under the leadership of Rev. John Leonard. It is said that there never was such enthusiastic singing heard in Norton in all its history, and what added zest to the music was the "Goodson choir" of all the boys and girls singing from the platform under the leadership of Mr. Goodson.

The Rev. P. G. Goodson is a man of personal magnetism, with a burning enthusiasm which has laid hold upon the whole community. He is a man of personal magnetism, with a burning enthusiasm which has laid hold upon the whole community.

There is no mistake but Mr. Goodson has captured the people of Norton. The large attendance of the meetings is a convincing proof of the power of his message. Meetings at Norton will continue throughout the month.

WANTED—An experienced housemaid, with references. Mrs. T. B. G. Armstrong, 27 Queen Street, St. John, N. B.

WANTED IMMEDIATELY—A table and for the Mathematics School, 1413-L.A.W. 1211-4f

WANTED—Competent general girl, small family. No washing. Wages \$15 or more, depending on experience. Mrs. H. F. Puddington, Rothney, 8336-10-14-aw

WANTED—Girl for general housework; must furnish references. Apply Mrs. G. W. W. 14 Alexander street, St. John, N. B.

WANTED—By Sept. 8th, a girl for general housework in family of three. References required. Address, Mrs. W. J. Davidson, Rothney, 1211-4f

WANTED—A second or third class female teacher for North Colon school, district of Peterborough (district rated No. 1). Apply, stating salary, to W. L. Polley, secretary, Queen's College, N. B. 238-11-aw

AGENTS WANTED REPRESENTATIVE wanted at once for work in your locality. Will guarantee \$200 to \$250 per day. Opportunity to advance rapidly. Will pay liberally for spare time. Work not difficult. Experience not required. International Bible Society, Toronto, Ont.

RELIABLE representative wanted to meet the tremendous demand for fruit trees throughout New Brunswick at present. We wish to secure three or four good men to represent us in local and general agents. The special interest taken in the fruit-growing business in New Brunswick offers exceptional opportunities for men of enterprise. We offer the best position and liberal pay to the right man. Stone & Wellington, Toronto, Ont.

"A GOOD POSITION" offering \$5 to \$100 monthly, awaits every man who is willing to work for a few hours in his spare time. Write for circulars explaining particulars. C. T. P. SCHOOL OF TELEGRAPHY & RAILROADING, Fredericton, N. B.

MAINE JOURNAL PORT OF ST. JOHN. Arrived. Monday, Oct. 9. Sch'r Jeanne A. Pickett, 295, Richards, from St. John's, Antigua, A. W. Adams, Montreal.

Sch'r R. Rogers, 374, Nelson, from Eastport, R. C. Ellis, bal. Monday, Oct. 9. Sch'r W. E. & W. L. Tuck (Am), 385, Mer, from Bar Harbor, A. J. Gregory, bal. Coastwise—Sch'r S. S. 38, Merriman, Port George; Emily R. 70, Sullivan, Wilcox's Beach; Arzelle, 10, Hines, fishing and oil; stmr. Grenville, 45, Collins, Anna, Piquette; Grand Manan, 180, Ingersoll, Wilson's Beach; sch'r Flora, 24, Brown, Grand Manan; Dorothy, 49, Turner, Bridgetown; Rowena, 84, Alexander, Pointe-a-la-Peine; Becka, Harris, 18, Kierstead, Wilson's Beach; Alma, 70, Naves, Apple River; Lena, Mand, 88, Ellis, Pointe-a-la-Peine; L. 21, Lord's Cove, 238-11-aw

Tuesday, Oct. 10. Coastwise—Sch'r Lizzie McGee, 13, French, Back Bay; Hartley, 44, Hill, Walden; Sch'r E. H. 72, Hersey, Connamore; Bear River, 70, Woodworth, Clarendon; Astaire, 77, Young, Parshboro; Graville, 49, Collins, Annapolis; Hartington, 46, Rowell, River Herbert; Margareteville, 57, Baker, Margareteville; Valinda, 60, Gesner, Bridgetown; gasoline sloops Conqueror, 22, Pendleton, Lord's Cove; Reliance, 15, MacNeil, Lord's Cove.

Wednesday, Oct. 11. Sch'r Minnie, Slawson, 271, Whelpley, Boston. Sch'r Francis, 101, Granville, Boston. Sch'r D. W. B. 96, Holder, Rockport (Me). Sch'r Annie M. Parker, 389, Rafuse, New York. Sch'r W. H. Waters, 126, Gale, Boston. Coastwise—Sch'r P. Colgate, 25, Hicks, Westport; Viola Pearl, 23, Wadlin, Beaver Harbor; Little Annie, 18, Richardson, Lord's Cove. Cleared.

Monday, Oct. 9. Sch'r Wanda, Williams, for Hanstport, J. W. Smith, to load for United States. Sch'r Irma Bentley, Hilton, for Noel, R. Sch'r Yolanda Forestry, for Hanstport, J. W. Smith, to load for United States. Sch'r Nellie Eaton, Hatton, for Quincy (Mass), Stearns, Oulter & Co. Sch'r Leonard C. Christophers, for Hopeville, Cape C. M. Kerfoot. Coastwise—Sch'r Abbie, Lord, Chance Harbor; Nellie, Baraboo, Halifax; Maland, Howe, Maland; Dorothy, Puppert, Bridgetown; Flora, Brown, Grand Harbor; Jennie L. Lord, fishing; Bessie Anderson, Greenlaw, Grand Harbor; Ella and Jennie, Ingles, Grand Harbor; Emma S. Oscar, Stuart, Leppanau.

Tuesday, Oct. 10. Sch'r Abbie & Eva Hopner, 276, Ingalls, for City Island. Sch'r Lizzie McGee, 13, French, Wilson's Beach; Fannie, 8, Tucker, Campobello; Rowena, 84, Alexander, Anna (N. B.); Mildred K., 28, Thompson, Dun at Liverpool; Grand Manan, 180, Ingersoll, Wilson's Beach; Brunswick, 72, Hersey, Canning; Graville, 49, Collins, Annapolis; Harbinger, 46, Rockwell, River-Herbert; Flora, 70, Woodworth, Digby; Margareteville, 57, Baker, Margareteville; sloop Relia, 8, Adams, fishing.

REV. DR. SPRAGUE ON CHURCH UNION. Eloquent Methodist Divine Speaks at Ecumenical Conference in Toronto—Part of His Address.

On the second day of the great Ecumenical Conference of the Methodist Church, held at Toronto, Rev. Howard Sprague, D. D., dean of the Theological Seminary, Allison University and former pastor of Centenary, gave a very eloquent address. After outlining the growth of the Methodist church in Canada in the ten years since the last conference was held, Dr. Sprague spoke with fine inspiration on the subject of church union. He reviewed the steps taken towards the organization of the union between the Presbyterian, Congregational and Methodist bodies in Canada, these steps as follows on the part of the union:

"Those among us who favor union prize the Methodist name, history and associations. To abandon them as far as the present is concerned would be to make the only sacrifice worth making. It is only for the sake of a greater good, the greater power when the three move as really one in the living God, for the sake of the Kingdom and of the name that is above every name; that the question is entertained and the sacrifice may be made. The problem of the West of the polyglot multitudes coming into our land; of our country's future, its religious life and Christian citizenship; this and the problem of union cannot be solved. The tremendous insistence of the one makes it a duty to provide for the other.

"If the union takes place we shall feel the loss of some things we cannot take with us, and our severance in name and organization—though never in heart—from the fellowship of Methodist Communions represented here today. But we shall by God's grace, carry into the union all the Methodism we have, except the name and the forms, our working theology, our evangelistic spirit, our type of experimental religion.

"If union does not come we shall have been blessed all around by the communion we have had, by the discovery of 'our own' in all that really matters, by our seasons of grace and sweet delight. And we shall go forward as if nothing had happened; we may rather more zealously and more faithfully, more lovingly and helpfully toward each other for what has happened, allies in a common warfare for a common cause. Congregational in the open order to clear to Presbyterians, moving mightily in compact formation of which we have lately heard so often; and we, as great a host as they, in organization as solid as they, and with a discipline that improves every four years, our name 'Methodists,' our standard the cross, our motto 'in hoc signo,' our only rivalry to do the most and the best to win and keep Canada for Christ and to spread in the earth the glory and the empire of His name, union or no union.

"May our hands perform His bidding. May our feet run in His ways. May our eyes see the glory of His face. May our lips speak forth His praise."

RUSSELL'S SUIT AGAINST GREENSHIELDS TO BE TRIED SOON. Action for \$1,125,000 to be Tried in Ottawa Either Oct. 23 or in December.

Ottawa, Oct. 11.—The defence in the case of Russell and Greenshields has been filed at the office of the local master. This is the case wherein David Russell is suing James N. Greenshields, the well known Montreal lawyer, for \$1,125,000. The claim is for breach of agreement in connection with the sale of northwest lands to the Canadian Northern Railway and for an accounting by the defendant for moneys alleged to have been received by him as an inducement to release the plaintiff's rights to the Canadian Northern.

The defendant for over a year endeavored to have the action removed from Ontario to Quebec but was unsuccessful and it will be tried in Ottawa, either on Oct. 23, or at the December sittings of the High Court. The defence in its statement denies all the statements made by Russell in his claim and says that Greenshields had been released by him from all liability.

SEARCHERS FOR MISSING WORKMAN FOUND HIM AT HOME. Herbert Oakes Disappeared from Fort Fairfield and Walked to Bath, N. B.—Had Shot Himself on the Journey.

Fort Fairfield, Me., Oct. 11.—One hundred men today scoured the woods in search of Herbert Oakes, a farm hand who disappeared Monday from Charles A. Johnson's farm, where he was plowing leaving the horses in the field. They found him at his old home in Bath (N. B.), thirty-five miles away, where he had walked. He had shot himself seriously on the way, and it was feared he had become temporarily deranged.

A SERIOUS BUSINESS. American Dinner—Say, waiter, does anybody ever laugh here? Waiter—Well, we do get complaints now and then, sir—London Opinion.

"Now" is a syllable constantly ticking from the clock of time. "Now" is the watchword of the wise. "Now" is on the banner of the prudent.

CONSTIPATION IS THE ROOT OF MANY FORMS OF SICKNESS AND OF AN ENORMOUS AMOUNT OF HUMAN MISERY. Dr. Morse's Indian Root Pills, thoroughly tested by over fifty years of use, have been proved a safe and certain cure for constipation and all kindred troubles. Try them. 25c. a box.

DEATHS. CONWAY—At the residence of her daughter, Mrs. E. Beck, 18 White street, on the 7th inst., Mrs. Elizabeth, widow of Charles Conway, in the 70th year of her age, leaving four sons and two daughters to mourn.

OCTOBER WEDDINGS

Manzer-Rideout.
The home of Frank F. Rideout, Peel (N. B.), was the scene of an interesting event on Oct. 4, when the eldest daughter, Flora M., was united in marriage to Charles W. Manzer, agent of the C. P. R. Woodstock. The ceremony was performed by Rev. J. B. Daggett, of Centerville. Only the immediate relatives and friends of the contracting parties were present. The happy couple left on early morning train the following day, en route to Boston and New York. On their return they will attend the Provincial Sunday School Convention at St. John.

Ferris-Cox.
Whites Cove, Oct. 9.—A very pretty wedding took place at the home of Edward Cox, McDonald's Corner, when his daughter, Mabel, was united in marriage to Ira D. Ferris, formerly of this place, but now employed with the St. John street railway. The ceremony was performed by the Rev. A. B. McDonald, in the presence of about thirty invited guests. The bride, who was prettily attired in a dress of white silk with veil caught up by lilies of the valley, entered the parlor on the arm of her father to the strains of the wedding march played by Miss Cora Ferris, and was attended by Miss Della Barnes, of McDonald's Point, who acted as bridesmaid, while the groom was supported by his brother, Carroll Ferris.

McAvity-McLaren.
A wedding of great interest to the community was celebrated with unusual brilliancy in St. Stephen's Presbyterian church yesterday afternoon, when Ronald Armstrong McAvity and Miss Edna Frances McLaren were united in marriage. In keeping with the brilliant nature of the event, the church was handsomely decorated with palms, potted plants and white chrysanthemums, affording an appropriate setting for the solemn ceremony performed by the Rev. Gordon Dickie, pastor of the church. Miss Wilson presided at the organ during the musical part of the service, assisted by the full choir of the church.

Wednesday, Oct. 11.
A wedding of great interest to the community was celebrated with unusual brilliancy in St. Stephen's Presbyterian church yesterday afternoon, when Ronald Armstrong McAvity and Miss Edna Frances McLaren were united in marriage. In keeping with the brilliant nature of the event, the church was handsomely decorated with palms, potted plants and white chrysanthemums, affording an appropriate setting for the solemn ceremony performed by the Rev. Gordon Dickie, pastor of the church. Miss Wilson presided at the organ during the musical part of the service, assisted by the full choir of the church.

Richardson-Grantham.
The home of Abraham Grantham, Aroostook Junction, was the scene of a quiet event, on Wednesday, October 4, when his youngest daughter, Annie E., was united in marriage to Jas. S. Richardson, of the C. P. R., in the presence of a large number of relatives and guests. Rev. G. B. McDonald, of Andover, officiating. The bride looked charming and carried a bouquet of white carnations and maiden hair fern. At the close of the ceremony a dainty lunch was served, after which the happy couple left on the afternoon express for Toronto, Niagara Falls and other Canadian cities.

Barnes-Rayworth.
Moncton, Oct. 11.—(Special)—A pretty wedding was solemnized at the home of Mr. and Mrs. J. S. Rayworth, Weldon street, this evening, when their daughter, Miss Ruby Augusta, was united to Earnest Barnes, of Amherst. The ceremony was performed by Rev. W. G. Lane, pastor of Wesley Memorial church, in the presence of a large number of friends. The bride was attired in a gown of ivory satin with pearl trimmings, and carried a bouquet with orange blossoms, and a white ribbon bouquet of bride roses, lily of the valley and maiden hair fern. She was attended by her sister, Miss Hazel, while the groom was supported by his brother, William Barnes, of Amherst. The house was elaborately decorated for the occasion. After the ceremony luncheon was partaken of and the young couple left on the afternoon express on a bridal trip to upper Canadian cities. The bride was the recipient of a valuable array of presents. The groom's present was a gold watch and chain.

Wood-Trueman.
The wedding of Rev. George Wood, pastor of St. Andrew's Presbyterian church in Chatham (N. B.), to Miss Mary Alice Trueman, daughter of Mrs. Trueman and the late Hon. A. I. Trueman, of this city, was solemnized at 4.30 o'clock yesterday afternoon in St. Stephen's Presbyterian church, which had been attractively decorated in honor of the occasion.

Wednesday, Oct. 11.
The wedding of Rev. George Wood, pastor of St. Andrew's Presbyterian church in Chatham (N. B.), to Miss Mary Alice Trueman, daughter of Mrs. Trueman and the late Hon. A. I. Trueman, of this city, was solemnized at 4.30 o'clock yesterday afternoon in St. Stephen's Presbyterian church, which had been attractively decorated in honor of the occasion.

Thursday, Oct. 12.
The wedding of Rev. George Wood, pastor of St. Andrew's Presbyterian church in Chatham (N. B.), to Miss Mary Alice Trueman, daughter of Mrs. Trueman and the late Hon. A. I. Trueman, of this city, was solemnized at 4.30 o'clock yesterday afternoon in St. Stephen's Presbyterian church, which had been attractively decorated in honor of the occasion.

late relatives and friends of bride and groom. After the ceremony a wedding breakfast was served at the bride's residence in Union street, at the conclusion of which Mr. and Mrs. Ryder left on a honeymoon trip to Halifax and Nova Scotia. On their return they will take up their residence in the city. Both the bride and groom were the recipients of many handsome presents of cut glass, silverware, etc.

Richardson-Grantham.
At the home of Abraham Grantham, Aroostook Junction, on Wednesday, the 4th, his daughter, Miss Annie E. Grantham, was united in marriage to James S. Richardson, of the C. P. R. Rev. G. B. McDonald, of Andover, officiated. Mr. and Mrs. Richardson left for Toronto and Niagara Falls on the afternoon express.

Hewitt-Borden.
Halifax, N. S., Oct. 11.—(Special)—Elizabeth, elder daughter of Sir Frederick Borden, ex-minister of militia, and Mrs. Borden, was married at the residence of her parents, in Canada street, at 10.30 o'clock this forenoon, to Gordon Hewitt, of the department of agriculture, Ottawa.

James McConnell.
The death of James McConnell, of 74 Waverley street, took place at his home yesterday morning at 11.30 o'clock, after an illness of about four weeks, in the 66th year of his age. He was a well known man. He leaves one son, James McConnell, of this city, and four daughters, Misses Addie, Lida and Laura at home. The funeral will take place Thursday afternoon, the services commencing at 2.30 o'clock in Cedar Hill Cemetery.

Mrs. Thomas Driscoll.
Woodstock, N. B., Oct. 10.—The friends of Thomas Driscoll, of the N. B. Telephone Co., will sympathize with him in the death of his wife, which occurred this evening at her home in Maple street, after a lingering illness of consumption.

Lawrence Murphy.
St. George, N. B., Oct. 10.—The community heard with regret of the death of Lawrence Murphy, of St. George, N. B., who was 64 years of age. He was born near the Lake and always resided here. In his younger days he was engaged in the lumber business and on the decline of that industry he turned to general business, working for years in the mills here.

Mrs. Caroline Coster.
The death of Mrs. Caroline Coster, of 12 St. George street, took place at her home yesterday morning at 11.30 o'clock, after an illness of about two weeks, in the 78th year of her age. She was a well known woman. She leaves one son, James Coster, of this city, and four daughters, Misses Addie, Lida and Laura at home. The funeral will take place Thursday afternoon, the services commencing at 2.30 o'clock in Cedar Hill Cemetery.

Alexander Burr.
The death of Alexander Burr took place at 9 o'clock yesterday afternoon at his residence, 38 Pitt street, after an illness of ten weeks. Mr. Burr, who was fifty-two years of age, leaves his wife, former Miss Catherine Burr, and two sons, F. G. Burr, manager of the Bank of New Brunswick in Hantsport, N. S., and Master Moffatt Burr, at home. He was a well known man. He leaves one son, James Burr, of this city, and four daughters, Misses Addie, Lida and Laura at home. The funeral will take place Thursday afternoon, the services commencing at 2.30 o'clock in Cedar Hill Cemetery.

Mrs. Sarah Rowley.
The West Side lost one of its oldest residents yesterday when the death of Mrs. Sarah Rowley occurred at the home of her son, 62 Guilford street. She had attained the advanced age of eighty-two and had lived in the West End for nearly the whole of her life.

Miss Agnes Lawlor.
St. Stephen, Oct. 9.—News of the sudden death of Miss Agnes Lawlor, of Boston was received here this morning. Miss Lawlor was spending a few weeks with her sister, Mrs. Fred Lanning, in Boston, and yesterday afternoon when on a street in that city she was stricken with heart failure and expired in a few moments.

Mrs. James Burns.
Harvey Station, Oct. 10.—The death of Mrs. James Burns, which occurred last week, cast a gloom over this community, where she was so well and favorably known. She was Miss Josie Donohoe, daughter of Mr. and Mrs. Donohoe, of 64 month street. She was a young lady of a bright, amiable disposition and was held in high esteem by all classes throughout the community, and her early death is greatly deplored. Many sympathies for her bereaved husband and her sorrowing parents besides those who leave three brothers and sisters, among which

is Rev. Father Donohoe, of St. Mary's. The funeral took place last Thursday and was conducted by Rev. Father Cormier and Donohoe. Interment was at Cork.

Herbert Johnson.
Deer Island, Oct. 8.—The many friends of Herbert Johnson will sympathize with him in the death which occurred on Friday morning last at his home at Chocolate Cove. He was ill less than a week and the death came as a surprise to all who knew him. He was a well known man. He leaves one son, James Johnson, of this city, and four daughters, Misses Addie, Lida and Laura at home. The funeral will take place Thursday afternoon, the services commencing at 2.30 o'clock in Cedar Hill Cemetery.

James McConnell.
The death of James McConnell, of 74 Waverley street, took place at his home yesterday morning at 11.30 o'clock, after an illness of about four weeks, in the 66th year of his age. He was a well known man. He leaves one son, James McConnell, of this city, and four daughters, Misses Addie, Lida and Laura at home. FLEMING NEW PREMIER!

OTHER MEMBERS OF CABINET TO BE ANNOUNCED MONDAY

The resignation of Hon. J. D. Hazen as cabinet member was placed in the hands of Lieutenant-Governor Tweedie at 8.30 o'clock last evening, as scheduled, and following the advice of the late premier, Hon. J. K. Fleming was called upon to form a new government. The new premier was in conference with the lieutenant-governor at the Royal Hotel, and arranged to meet Monday to submit the names of his ministers. Until then no authoritative announcement can be made as to the make up of the executive.

The programme was carried out yesterday exactly as mapped out beforehand. In the afternoon the government led by Mr. Hazen met in the Church street rooms and Mr. Fleming called at 8.30 o'clock and was presented the resignation of the lieutenant-governor. Mr. Fleming recommended that Hon. J. K. Fleming be called as his successor.

Mr. Fleming, acting on this suggestion, summoned Hon. Mr. Fleming to meet him at 9 o'clock. Hon. Mr. Fleming accepted the task of forming the new ministry, and arranged to meet the lieutenant-governor on Monday to present the names of the new heads of the provincial departments.

Interviewed after the conference, Hon. Mr. Fleming said that he could give no intimation of the personnel of the cabinet or make any statement as yet as to the policy of his administration. It was also too early to make any predictions about either the by-elections or the holding of a general election.

The government which gave up the seals of office last evening came into power following the provincial elections on March 3, 1908, and was sworn in on March 24, 1908. There has been no change in its cabinet since that date, the make-up being as follows:

Premier and attorney-general, Hon. J. K. Fleming.
Provincial secretary, Hon. J. K. Fleming.
Chief commissioner of public works, Hon. John Morrissey.
Surveyor-general, Hon. W. C. H. Grimsey.
Minister of agriculture, Hon. D. V. Lanning.
Solicitor-general, Hon. H. F. McLeod.
President of council and member with out portfolio, Hon. Robert Maxwell.
Hon. J. Kidd Fleming, the new premier, was born in Carleton county in 1869, and is therefore forty-three years of age, the youngest member of the present government with the exception of Hon. H. F. McLeod.

He first contested his native county in the provincial elections as a member of an opposition ticket in 1895, but was unsuccessful, as he was in 1899. The next year, however, he was elected in a by-election, and has been one of the representatives of Carleton county in the legislature since that date. When he first entered the legislature he was the youngest member in that body. He has been a general merchant and a lumberman.

Speaking last night about the possibilities of a local election Hon. Mr. Morrissey said to a reporter for The Telegraph, that he did not think the government would make an appeal to the people before another year.

Mr. Morrissey also made the prediction that there will be another democratic election within a year, and that when it comes Mr. Borden will be appealing to the country with reciprocity as his platform. "We must have reciprocity," he said, "and we undoubtedly will have it within a few years."

STILL OPPOSED TO ORGANIC CHURCH UNION

(Continued from page 1.)

Home, afforded opportunity of emphasizing some very practical truths relating to family life. The first speaker declared that children came into the world as members of God's Kingdom, and the gospel of provision should be applied to them. The conference accepted this position, with practical unanimity. Forty years ago there would have been strong opposition to any such statement, but now it is quite evident, from the descriptions given by the English delegates, that poverty and wretchedness exist in great cities of the land, to an extent that is unknown in America. The American delegates, however, have the great problem of the foreign element to deal with, which complicates the situation and adds not a little to the work of home evangelism.

The discussion yesterday and today revealed the fact that churches on both sides of the ocean are addressing themselves very earnestly to religious work in the cities, and are preaching practical religion. As Rev. Ensor Walters said: "Methodism is right down among the slums and is lifting the people up."

An Advisory Commission.
Canadian Press.
Toronto, Oct. 12.—A Methodist international advisory commission was established by action of the Ecumenical Methodist Conference in this city today. With a membership of 100 of the present delegates, to be appointed later, it will act during the absence of the Ecumenical Methodist Conference, while its function will be chiefly advisory in such church and denominational matters as may come within its scope. It will also attempt to do the business of the 20,000,000 Methodists it represents in the forwarding of certain world movements for peace and justice.

The work of the church with relation to young people was discussed at tonight's session. A paper on The Conditions and Needs of Young People's Societies, by Bishop J. F. Berry, of Buffalo, who was unable to be present, was read. Prof. D. J. Jordan, of Kitchener (N. C.), spoke of Special Work of Young People in the Church, and Rev. J. Hudson, of the Methodist church of New Zealand, considered the Church and the Recreation of the Young People.

The general subjects assigned for tomorrow's session are: The Larger Use of Lay Agencies and Women's Claims and Responsibilities.

J. P. MOSHER'S AFFAIRS

At a meeting of the creditors of J. P. Mosher of Saint Martins on Tuesday afternoon in the office of D. King Hazen in this city a statement was presented by Mr. Mosher showing his liabilities to be \$11,850 and his assets \$10,000. This statement does not include certain other liabilities for which security has been given. The latter amounts include \$5,000 due W. H. Mackay, secured by a deed to certain land; \$3,500 due Alex. Watson, secured in the same way and by lien on logs and \$5,000 to E. P. Raymond, as trustee, secured by mortgage on certain land. It is stated that the creditors will receive will not be as large as the statement would indicate owing to the losses incidental to closing out the property in this way and at the same time when the lumber market is not in the best position.

C. W. deForest was appointed permanent assignee and W. C. Cross and C. E. Inches were appointed inspectors. Mr. deForest left yesterday for St. Martins to look into the affairs of the estate.

Aside from that one he pitched a beautiful game for a win. It was not a last power or speed, but just a man on second base tip off, a perfectly legitimate quick work on the part of the pitcher so hard that he beat them at this game, signals as soon as they get on base, and when I pitch, that I pitch some to get behind it, he walks in, expecting one thing and miscalculates all the rest of it. It is easy for almost any signals with a man on base, cause most teams use the Jack Warner system, and to give signals with a runner showing his teeth for a keeping his lips tight for a try, but any man who see the signal, that ball is the crisis of the game. The teams are now even get a new start, but the ball was what cost us the

SKIN TROUBLES GROW WORSE

Eczema, Psoriasis, and other skin troubles are caused by myriads of germs at work in the skin. Unless these germs are promptly destroyed they rapidly multiply, gnawing their way deep into the sensitive tissue. This is what causes the itching and itching, and what seemed a mere rash may grow worse and develop into a horrid and torturing skin disease with its years and years of misery.

Don't take any chances! Destroy the germs at the beginning of the trouble with that soothing and cleansing wash, Dr. D. D. Prescription for Eczema, Psoriasis, and other skin troubles. It is quite a simple matter for you to find out for yourself whether or not Dr. D. D. will cure you. Simply send your name and address to the D. D. D. Laboratories, Dept. T. W. W., 49 Colburne Street, Toronto, and get by return mail a free trial bottle of the remedy. It will give you instant relief of the very best application.

Mathewson Tells

Team Was Downe

Mistake of Ma

Connie Mack Do

Field.

(By Christy Mathewson, 6 p.m.)

Philadelphia, Pa., Oct. 11.—Pitched to Frank Baker in his home today cost the Giants a curve, the result would be different.

The sixth inning was the one that one ball and Max Mathewson's wrong prescription for a minute that he pitched the ball over the plate for it and this cost the Giants. All the trouble started out and everything looked Collins doubted that he could get it exactly right. Collins took only a second base, standing alone with the evident intention of getting a signal from the pitcher to throw a curve, as a hit meant a run, a curve and a fast one, coming up to the plate to speed that the pitcher could be evidently through the pitcher's signals. But Collins had broken a curve over the plate which the umpire could not see that when it comes Mr. Borden will be appealing to the country with reciprocity as his platform. "We must have reciprocity," he said, "and we undoubtedly will have it within a few years."

Outgassed Marquard

I don't for a minute guard meant to put the ball of the plate in a pinch like he did not get it exactly right. Collins so hard that he beat them at this game, signals as soon as they get on base, and when I pitch, that I pitch some to get behind it, he walks in, expecting one thing and miscalculates all the rest of it. It is easy for almost any signals with a man on base, cause most teams use the Jack Warner system, and to give signals with a runner showing his teeth for a keeping his lips tight for a try, but any man who see the signal, that ball is the crisis of the game. The teams are now even get a new start, but the ball was what cost us the
