Newcastle, Dec. 2, 1873.

PRINCE WILLIAM STREET, OPPOSITE CUSTOM HOUSE

T. T. RAYMOND, Proprietor.

Dec. 22nd, 1874. 24 1y " Wilbur House."

Bathurst, Gloucester County, N. B.

This House, which has been enlarged and thoroughly repaired, repainted and re-arrished, will be open to the public on Monday next, 12th June.

ation, it is located in a very As regards situation, it is located in a very pleasant town, and being in close proximity to the Baie des Chaleurs, is one of the very best summer resorts for tourists and families who leave the heated cities to seek the invigorating air of the North. The County excels in beautiful scenery and excellent fishing grounds. The hotel is within easy reach of the Intercolonial Railway, and every effort will be made by the Proprietor to secure the comfort and pleasure of all who may patronize the establishment, which will be conducted in the very best style. H. WILBUR, Proprietor.

CAS WORKS FOR SALE. HILL COAL. SPRING THE

SPRING HILL MINING CO'Y

HAVING now fully developed their mines at Spring Hill, and having reached a depth where Coal of a superior density and purity is obtained, can now offer to customers along the Intercolonial Railway a fuel unsurpassed in quality, and which, in consequence of the late reduction in freight, must take the place of all other fuel along the line of Railway between Truro and St. John, and at least at the Moncton end of the line. between that town and Riviere du Loup.—Wood stoves are fast giving way to coal Wood stoves are fast giving way to coal stoves between the first named points, and it is probable that the same fact will be observable so soon as this superior coal can be introduced along the line between Moneton and Riviere du Loup.

ely for all locomotives and stations The coal is mined in the most approved The coal is mined in the most approved manner to insure its freedom from stone and fire-clay; the round coal is then put over a screen, which separates from it all the dust and small coal; the latter is then put through an elaborate steam rotary screen, which produces two sizes of small coal, known as "Stove" and "Nuts," which are perfectly pure coals and entirely free from dust. The superior quality of the "Round" coal being fully established, attention is particularly drawn to the "Stove" and "Nuts," which

superior quality of the "Round" coal being fully established, attention is particularly drawn to the "Stove" and "Nuts;" the former may be used in grates alone, or mixed with the "Round," many prefer it alone; the latter is unsurpassed for cooking stoves, or for small engines. The coal ignites very quickly and burns freely, thereby insuring a quick heat with but a small consumption of fuel, which is particularly desirable in summer; in winter, and when large rooms are to be heated, you have simply to add to the quantity used in summer for heating the boiler or the pot, and a lasting and economiboiler or the pot, and a lasting and economical fire is the result.
