Unlike the host of perulcious quackeries which hosst of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and couptain neither Mercury, nor Antimony, nor Armenic, nor any other mineral, in any form whatever. They are enuirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the costs of the stomach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleause these, and leave such collected masses behind to produce habitual Costiveness, with all its train of evils, or sudden Diarrhea with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after death; and hence the prejudice of these well informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleause the kidneya and the bladder; and, by this means, the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a cleau stomach, courses freely through the veins, renews every part of the system, and tremphandly meants the banner of health in the blooming cheek.
