C.N. CONTRACT HAS BEEN LET

One Hundred Teams Start Work on Disley Hill-Steel is Waiting on Side Track-Heavy Engines

As announced in The West recently the Canadian Northern will rebuild the Prince Albert line this summer and fully equip it for the fall traffic. This information came direct from the C.N.R. management and they are not losing any time in implementing their plans, for on Monday this work was let to Contractor Mackenzie, a relative of the railroad's president. A hundred teams have been hired, mostly farmers, who will go to work at once on the Disley hill which is being cut down so as to lower the grade. About half way up the hill the line will follow a new survey this giving a good grade and cutting off a loop. The contractor expects to have the work done in good time as he has no difficulty in getting men and teams. The farmers along the branch are anxious to get some ready money after seeding and they are only too glad of the opportunity to gather in a few shickles.

Contractor Mackenzie was over the work a few days ago, with Supt. Wilcox. Some of the new steel for the road is on the side track at Clark's Crossing. It is the intention of the company to put 110 per cent engines on between here and Saskatoon as soon as the road bed is in shape. It is very material to Regina that the company undertakes to complete the reconstruction of this branch before long as we have a large wholesale trade with the north country and this has been embarrassed at times during the past season through interrupted traffic.

C. N. R. passenger trains are now running on time and freight is moving freely. There is no complaint along the branch except that the residents of Kenaston are protesting against the withdrawal of the agent from there until the crop begins to move.

The company has put in the spur track to the H. W. Laird Co. and Garr Scott Co. warehouses.

PROCURING EQUIPMENT

Toronto, May 16.—The Canadian Northern Railway Co. are making arrangements to send over two thousand cars for immediate use on their western divisions today that orders had been placed for as many as 200 locomotives, to be delivered just as rapidly as the manufacturing companies could make them.

The orders have all been placed with Canadian companies in Montreal, Kingston and Toronto.

In Montreal three engines can be turned out a week.

Kingston has promised seven a month and Toronto will manufacture at the rate of five a month.

It is less imperative at the present time to secure cars than engines, though railway companies are ordering cars as rapidly as they can be turned out.

Contract for Eleven Hundred Acres—Big Improvements

John A. Roberts, of Carthage, Ill. steamed out to Richardson on Friday with his thirty horse power outfit to break and backset eleven hundred acres of prairie for Miller and Black of Carthage, who purchased two sections in the Richardson district last year, and who will commence farming operations next season. They are spending six thousand dollars in improving the land. Mr. Robertson will start work at once and will complete his contract in good time. He has his threshing outfit here also and will be in business in the fall.

Scotch Whisky Manufacturer sends son to Regina to size up Business—May Locate

Cecil F. Sanderson, son of the well known Scotch whisky manufacturer, is in the city sizing up the business situation to decide on the establishment of a distributing house for this province. Mr. Sanderson will visit other points before coming to any definite conclusion, but he is favorably impressed with the city and its future prospects, and he will no doubt decide to locate among the other big concerns centering their

business here. Mr. Sanderson's father came to the Canadian west with the Scotch curlers and was so impressed with our trade prospects that he sent his son out here to look after the firm's interests and they will handle their Saskatchewan business from the most convenient point obtainable.

Cecil F. Sanderson has been in Winnipeg about two years and has become quite accustomed to the west and likes the country so well that he would not return to the old country for any consideration. He is a football enthusiast and played with the Winnipeg Shamrocks up to the time of his coming to Regina a few days ago. Mr. Sanderson will remain in the city for a few days longer before going to other points, but being well satisfied after making enquiries as to the establishment of his business here, we look for his return at an early date.

RACING EVENTS

Program for Big Regina Fair Lasting Four Days

The following racing program has been drawn up for the Regina Industrial fair extending over July 30 to Aug 2nd. The schedule was fixed by W. M. Williamson and G. C. Lawson.

First Day
2.15 pace or 2.10 trot, \$300.
Running race, 7 furlongs dash \$200
Boy's pony race, 14 hands running, half mile heats, \$25.
Indian pony race \$10.

Second Day
An important and unique event on the second day will be a dash by members of the Sixteenth squadron C.M.R. The race will be open to members of the squadron only and must be run with regimental horses. There will be catch weights and owners up.

2.25 pace or trot \$300.
Pony race, 14 hands, half mile heats, catch weights \$100.
Gent's road race, four wheels trot or pace, owners up, silver cup.

Fivefurlong dash for members of the C.M.R., silver cup.
Novelty race, one mile, \$50 a quarter, \$200.
Indian pony race \$10.

There will be two free-for-all trot or pace races. The first as usual will be mile heats, but the second will be an innovation, in the shape of half mile heats.

2.30 pace or 2.25 trot, \$250.
Running half mile heats, two in three, \$300.
Free for all trot or pace, \$500.
Running, 11 mile dash, \$250.
Saddle race, green horses, and amateur riders, silver cup.
Indian pony race \$10.

Fourth Day
2.20 pace or 2.14 trot, \$300.
Pony race, 14 hands, half mile heats, two in three, \$100.
Free for all, half mile heats, \$200.
Running, five furlong dash \$200.
Indian pony race \$10.

DEPUTATION GOES EAST

City will Procure Evidence as to most Suitable Base for Pavement

There was a lengthy discussion at the council board last evening over clause two of the works report, to send a delegation to Toronto to enquire into the question of bituminous base for the bitulithic pavement.

Ald. Cowan took strong objection to spending money on ascertaining the best base for the west.

Ald. Gillespie supported the report equally strong, and urged that the delegation should go on the mission of enquiry.

Ald. Peverett was emphatic in his objections to the expenditure. He would go so far as to say, that if we cannot get bitulithic except on bituminous base, then we do not want it. He was confirmed in his observations at Winnipeg that the concrete base is what is needed.

Ald. Gillespie made a forceful reply, and the motion was put and carried. Ald. Peverett, Cowan and McDonald voting in the negative.

The report of the board of works was adopted and Ald. Wright and the city engineer will go east to enquire into the question of suitable base for bitulithic paving.

The city hall plans with regard to the electric wiring do not meet with the approval of the underwriters, and it is proposed to make certain changes. A number of switches must be added. A coal cellar to be reached by a subway will also be added to the present plan.

We have the largest and most up-to-date Stock of Carriages and Vehicles On exhibition of any house west of Winnipeg. You are personally invited to call and inspect them

SWEEEPING DEMANDS

Grain Growers' Convention Deal With Many Affecting the A circular has been received and sub-committees of patriots and associates of growers throughout the Manitoba. This circular contains a survey of the situation and conditions of the grain industry. Briefly summarized in the first part of the business of the conference: Gentlemen—At the request of the Executive of the Manitoba Grain Growers' Association and commendation of the conference of the agriculture of the province of Manitoba at a conference of the representatives and others to situation surrounding handling, sale and transport of grain and make such recommendations as may be required by the government of the province in matters dealt with by the federal government in matters under consideration: 1. Dealing in options. 2. Amendments to code in respect of commodity trade, boycotts. 3. Government ownership of elevators, boats and lines. 4. Reciprocal demurrage. 5. The employment of a Grain Exchange Commission. Sweeping demands are regarding the amendment of the charter of the Winnipeg change, of the members is said 132 do not reside in the United States. It is doubt that the powers change as a monopoly will be attacked and the convention be asked to take strong making recommendations earnest.

Government Elevators The circular deals in a manner with the question of ownership of both line elevators and their and the distribution of demurrage. The clause dealing with it is as follows: It is proposed to add to act a clause which shall always shall supply a one week of the day order which, they shall deduct freight charges one dollar per car for each day of expiration of the week allowed; if the order is not filled; they shall deduct one dollar per day after the expiry of forty days from the finishing of load which the car remains at the siding at or near the which it was loaded; and also in addition deduct one day per car for every day the car takes to reach its rate it would take if more than forty miles per day.

QUEEN OF THE GOLDEN

"KILLING THE GOOSE THAT LAYS THE GOLDEN EGG"

The Royal Commission proposes to limit security purchases to a narrow circle of Canadian bonds. The Canadian companies alone have to find investments for about twenty-five millions yearly, and there would not be enough of these securities to supply even them, to say nothing of the investing public.

WILL THE NORTHERN COUNTRY BE PEOPLED?

Canadian Naturalist Goes on Important Trip of Research—If Trees and Cattle Thrive Country Will Support Man

Ernest Thompson Seton, famous as a writer of stories dealing with the lives of hunted wild animals, is in the west on a visit of great moment, as he will complete arrangements for the most important trip of exploration which he has ever made.

One of the primary objects of my trip to the barren lands," he said, "is to obtain typical pictures of the wild animals which are found there. For this purpose I am carrying with me two of the best cameras obtainable. I wish to study especially the caribou and the musk ox.

"The extent of the country it is difficult to conceive. I should say that at a low estimate there are one million square miles. There is a tract two thousand miles in length and five hundred miles wide. The conditions under which men can live there has not yet been determined, but men will live there in the future as surely as men continue to seek sustenance in the world. Norwegian people could go into that country and create another empire."

IRISH WON'T ACCEPT BILL

Big National Demonstration Veto Government Measure—They Want Home Rule

Dublin, May 22.—The Nationalist convention called today to decide whether the Irish bill introduced in the House of Commons by Mr. Birrell, was acceptable to the people of Ireland, assembled at noon today in the Mansion House. It became immediately known that the measure, as a result of yesterday's meeting of the Irish leaders, would be rejected, and a resolution by John Redmond setting the fate of the bill had been prepared. It was as follows:

NOT GUILTY OF CONSPIRACY

Judge Phippen Decides That There Was No Case Made Out Against Grain Men Under Criminal Code

Winnipeg, Man., May 21.—The decision in the now famous grain conspiracy case, which has agitated the minds of western farmers and grain men for months, was handed down by Judge Phippen at the court house here this morning, when the justice declared that Messrs. Love, Gage and McHugh members of the Winnipeg Grain Exchange, were not guilty of the charge of conspiracy to restrain trade.

The case is the most important from the standpoint of grain interests that has come before a western court for years. The complainant, who was president of the Manitoba Grain Growers' Association, charged the three members of the grain exchange with conspiracy in restraint of trade in connection with the workings of the grain exchange.

Magistrate's Decision. Magistrate Daly, after a long hearing in which interesting facts regarding the grain exchange were brought out, gave a finding of facts. He said certain conditions existed, and said it with the government to say whether or not the case should be taken to the higher courts.

Reserved Case. The decision this morning is to the effect that Mr. McQuail's original charge of conspiracy is without foundation, but it is understood the grain growers of the west will take the case to a higher court. Farmers all over western Canada have contributed money to the prosecution of the case, and it will certainly be taken if necessary to the court of last appeal.

Winnipeg, May 21.—At the court house this morning Judge Phippen delivered judgment in the alleged grain conspiracy case declaring defendants Love, Gage and McHugh members of the Winnipeg Grain Exchange, not guilty of conspiracy to restrain trade in grain. A reserve case will be argued at a later date.

RED HAT FOR CANADA.

London, May 20.—The Paris Figeo publishes the following from Rome: "The Bishops of the United States and Canada have assured the pope of an annual offering of five million francs, composed of collections from among the Roman Catholics, and a percentage on diocesan revenues. The Pope will probably create a cardinal from Canada."

WEDNESDAY, MAY 22, 1907.

DEBRIS OF PUBLIC LIFE

Abraham Ruef, once a respected and influential citizen of San Francisco, is another of those wrecks that mark the crooked course in public life.

Politics in the United States got to a low ebb, but there has been a revision of public sentiment and justice has lately been camping on the trail of the hoodler with good results.

In Canada we recently have seen men driven from public life and there are others on both sides of the House who should follow them, and although they are hiding behind the mantles of their leaders for the present, the time must come when the leaders must either shake them, or go down with them.

Exposure will facilitate the cleansing of politics and the withdrawal from the lime light of men who cannot stand the pointed finger, shows that some of our public men have not failed to gauge the sentiment of the people.

In Canada we recently have seen men driven from public life and there are others on both sides of the House who should follow them, and although they are hiding behind the mantles of their leaders for the present, the time must come when the leaders must either shake them, or go down with them.

a similar advance by the mills. The manufacturers claim that there has not been any advance in the price of coast lumber since last December and while the prices of logs has increased to the mills they have not added this to the wholesale price to dealers in the prairie provinces.

The coast manufacturers say the advance by the Manitoba, Saskatchewan and Alberta dealers as a hold-up of a couple of dollars per thousand and they do not hesitate to say so.

The Saskatchewan dealers have advanced the price similar to that of the Manitoba lumber merchants but they have attributed the cause to the advance by the Mountain association.

The latter organisation has as yet made no statement for publication and it is assumed that they have made the advance attributed to them, thus necessitating the advance by the local dealers. Should, however, the Mountain association make a similar statement to that of the Coast manufacturers, then the Saskatchewan dealers will be up against the same proposition as the Manitoba retailers who are proved guilty of holding up the consumers.

DEMAND THE LANDS

In our last issue we published a verbatim report of the discussion in the House of Commons during the last session when Mr. Lake moved as an amendment to one of the provincial subsidy resolutions, the lands plank of the Provincial Rights platform, but which was ruled out of order by the Speaker at the instigation of the prime minister.

Mr. Lake took the ground so often taken by The West with regard to the immigration returns and urged that the reason for withholding the public lands from the province, has, according to the figures of the immigration department, been removed and now Saskatchewan should be placed in possession of her rightful heritage.

If we are given our lands we will be in a position to endow our university, establish our agricultural college and other necessary institutions and carry on our public improvements without resorting to direct taxation.

The land question is not settled for all time any more than the school question is settled, and these issues will arise until they are disposed of in the best interests of the people of this province and by the free will of the provincial electorate.

Sir Wilfrid Laurier through technical procedure may be able to keep the principles of the Provincial Rights party from finding a place in Hansard, but he cannot remove that issue in this country until this province gets justice from Ottawa.

STORING COAL

A Brandon dispatch announces that the coal dealers of that city have decided to amalgamate and build monster sheds in which they will store a two years' supply of fuel.

From the experiences of the past winter it is only reasonable that some such precaution be taken to prevent a fuel famine such as existed last winter, but it is doubtful whether it is necessary in view of the strike settlement to tie up so much capital for two years as that proposed by the Brandon coal merchants.

If consumers order a fair supply early in the season there is no reason why there should be a shortage. There is adequate fuel guaranteed for two years at least under existing contract between the miners and the operators, and with this summer's output available for fall delivery, consumers should have no difficulty in getting lots of coal.

Of course the Regina district did not see the worst of the fuel famine last winter, for although the supply ran short at times, few farmers who ever came to the city for fuel went home without enough to keep them from freezing. The coal supply from this province is practically controlled from Regina, and we fancy that without the distributors here carrying

ing a two years' stock, if the country dealers will take precautions a few months ahead, and if the consumers will also look after their winter's supply early in the season, with all the mines in operation, there is no reason why last year's experiences should be repeated.

PRESS COMMENTS

It is very interesting to read of the millions that have been "made" in the wheat gambling that has caused and accompanied the movement in wheat for a few days. It is remarkable that we hear nothing of the millions that have been lost, which the people are called upon to pay.

True, the farmers will be benefited to some extent—but their profits will not be great.

The gambling is being carried on almost exclusively in futures—and it is very unlikely that the shorts are doing very much covering by buying at present from the farmers.

The present market being a gambling market, pure and simple, based on no present shortage of wheat, but on the unpromising weather—there is nothing to prove that it will hold.

The shorts who sell December wheat at a dollar are not in a rush to cover. Cash wheat is not being bought in any such quantities as legitimate speculation in futures to the extent that the present gambling in futures would warrant.

Sellers of cash wheat report that the demand at present prices is not keen. The shorts seem to be prepared to wait for fine weather to have its inevitable effect on the enthusiasm of the bulls.

The wheat growers, therefore, are getting the minimum of profit with the maximum of excitement, and the great masses of the people are already paying heavily for the games of certain adventurous people in Chicago, Winnipeg, and other centres of gambling on the food of the world.

The bull movement was scarcely started when the price of flour jumped ten cents a sack. Then, as the gamblers succeeded in keeping the game going another ten cents a sack was quickly struck on.

Someone must pay that increase. That someone is the public. The bull market may become a bear market tomorrow. Will the flour prices go back to the old standard? Probably not—yet, if those increases remain the people of Canada will pay, ten times over all the losses that will be made by these gamblers during this gambling movement.

With the wheat manipulators and the public, it is always a case of heads I win, tails you lose—with the manipulators always playing the part of I.

In the United States they have tried to get a law enacted that will make it a punishable offense to gamble in futures in a food product, a necessity of life.

The Grain Growers' association of Manitoba advocates such a law. It is time that parliament took up this question and dealt with it in a thorough manner.

The Grain Growers' association should instruct the western members to introduce such a measure at the next session. By taking such a stand they will command the support of every man, not interested in wheat gambling, who has to pay for bread.

(Butte News)

The Gillman-Cory wedding is not without its parallels. The president of the United States Steel Corporation has done that which many a millionaire has done before and many will do again as long as money is plentiful and skirts are made short.

When William B. Leeds, the "fin-palke king," made his millions, the plain little wife who had helped him make them was discarded and the Leeds-Worthington wedding given as much publicity as the Corey affair.

For four years Antonio Terry fought in the divorce courts that he might marry Sybil Sanderson, the beautiful grand opera singer. His desire was scarcely attained when death claimed him. His widow did not long survive him.

Harry Flagler proved that there

ARTISTIC OTTAWA

It is fitting and right that the capital of the Dominion should in some respects be regarded as the social and artistic centre of Canada. To Ottawa are attracted the best brains and talents of our musicians, and the city has long been noted as being foremost in culture and refinement.

SUNSHINE FURNACE

NO BENDING DOUBLE AND POKING AROUND THE ASH-PIT WITH A SHOVEL TO GET THE ASHES OUT OF THE SUNSHINE.

The Sunshine is furnished with a good, big ash-pan. All you have to do is to grasp two strong, firmly attached, always-cool, bale handles and the large, roomy ash-pan easily comes out.

A minute or two is all it takes to perform the operation. All the ashes are in the pan, too.

Because they are guided into it by means of ash-chutes attached immediately below the fire-pot. Sunshine is the simplest, easiest-managed, cleanest kind of a furnace. You don't have to wear overalls and a smock when attending to the Sunshine.

If your local dealer does not handle the "Sunshine" write direct to us for FREE BOOKLET.

was no fool like an old fool when he married a "foot light favorite" 38 years his junior. To do this he induced the Florida legislature to pass a law making insanity grounds for divorce and his first wife, broken in mind and health, from constant brooding, was set aside.

From Weber & Peltz, Allan W. Wood, Pittsburg's millionaire took the Goldie Mohr for his wife, then obligingly died and left her his millions.

About all that can be said to the credit of Harry Thaw when he married Evelyn Nesbit is that he did not discard another wife to do so.

(New York Tribune)

The last of the great herds of buffalo is about to appear from the American territory. For several months President Roosevelt has been making every effort to round up the famous herd on the Flathead reservation. It consisted of some two hundred head of the largest and finest in the country. Despite the president's watchfulness, however, and his earnest effort to keep the herd in the United States, the buffalo have been driven off their reservation, so to speak, by the Canadian government to make a permanent home in Canada.

The price paid for the buffalo herd was about \$150,000. So disappears from the country a famous reminder of the past.

Keep Minard's in the house. REGINA ROUTE APPROVED

Ottawa, May 15.—The deputy minister of railways heard in his office this morning the application of the Grand Trunk Pacific for the approval of the entrance of its line into Winnipeg from Portage la Prairie, F. W. Hubach, of Winnipeg, with A. L. Smith of Ottawa, opposed the entrance as located. They represented the interests of certain property owners, Mr. Tate, solicitor, with Mr. Kellher, represented the G.T.P. The G.T.P. branch from Brandon to Regina was approved. It runs between the Arcola branch and the Wolsley-Reston section of the C.P.R. The C.P.R. wanted the line kept further away from them, but the G.T.P. were able to show that the formation of the country was such that this could not be done.

Mr. Turill, M.P., appeared on behalf of the settlers south asking that this line be extended further south, but this could not be done. Mr. Turill also complained of the Canadian Northern paralleling the Wolsley-Reston branch to the north.

Piles get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made alone for piles and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-capped glass jars 50 cents. Sold by the Regina Pharmacy Stores.

HAS HE GONE?

Brandon, May 15.—The city assessor, Mr. Marrow, who is also publicity commissioner, after handing in his rolls on Friday evening to the council left on Saturday for Winnipeg, and has not been heard from since, with the result that all kinds of rumors are afloat, some to the effect that he will not return to the city.

His prolonged absence was the topic of discussion on the streets today, and it was also currently stated, and it was currently stated, that he had realised a considerable amount by cashing notes endorsed by friends and by obtaining credit from merchants. In addition he had in his possession between \$500 and \$600, the proceeds of a minstrel show given last week under the auspices of the 20,000 club. It was intended that this money was to be distributed through Mr. Marrow's hands for publicity purposes. It is hoped that he may return and straighten matters out satisfactorily.

CONDUCTOR IS SENTRY ON DUTY

Severe Arraignment of Railway Conductor Thomson by Judge Riddell—Three Years' Sentence

In sentencing Conductor Joseph Thomson, of Guelph, to three years in the penitentiary, Judge Riddell, said:

"The sentry in front of an army set there to watch over the safety of his comrades is in no more responsible position than you, who were placed in charge of the passengers at large. The sentence of the court and the two train crews. If the sentry sleep, no excuse is accepted. The penalty is death. What is to be said of you? You have caused the death of three men, and your only excuse is that you fell asleep, and so were not able to see to it that the engineer did put in at Hespler. According to your story, you were awakened from sleep by a crash which told of death to your fellow workmen. Provisionally, no passengers were injured, but that was due to no care of yours."

"I have reserved judgment thus long that I might carefully consider what the penalty is to be. I invited representations from all quarters, and I have been waited upon by several of your former fellow-employees and by those on behalf of organizations of men in like employment. Some have advanced an argument which is, in effect, that accidents will happen, that men will be careless, and that no punishment even the most severe, inflicted upon you would prevent the like recurring again. That argument to my mind, defeats its own object. The railways must perhaps, by inevitable accident produce casualties; dangerous they are, dangerous, to some extent, they must continue to be; but it is the duty of all to reduce to the very lowest ebb the fearful toll of life and limb exacted. And I am of the opinion that if men in charge of dangerous engines are taught that if negligence on their part result in death or injury, punishment must inexorably follow, we shall cease to hear of so many horrors which could and therefore should have been averted. The people must be protected. Men doing their duty in reliance upon their safety being secured by those placed on guard must be protected, and the sentinel must recognize his responsibility."

"It has been told that I may exact a fine. I refuse even to consider the exactation of a fine or to do anything which could even suggest that the stain of blood that is on your hands can be washed out with money. And this is no prosecution with which the railway company has anything to do, so that I should consider their loss in even the slightest way. You were prosecuted by the crown for the protection of life."

"I shall direct your imprisonment. The length of that imprisonment will depend to a certain extent upon your own conduct. The term of imprisonment could in no case be nominal—it would be intolerable if men in your position should think such negligence, resulting as this did a mere trifle. I have again and again considered the facts, and have given much thought to the recommendations made to me, as well as the recommendation of mercy of the jury. It is hard to see any circumstances of mitigation, to discover anything which justifies me in reducing the punishment below the term mentioned in the act, but I am inclined to be merciful. I remember that you

have not before been guilty (so far as appears) of any similar offence, and I may be wrong, but I think it sufficient, both as regards yourself, and as a warning to others, to inflict the punishment I am about to award. I can only trust that it may have some effect in checking the carelessness which is horrifying our country at large. The sentence of the court is that you be imprisoned in the provincial penitentiary for the term of three years, and that you then be discharged."

Telegram Comment

Commenting on the above address and sentence, the Toronto Telegram says:

"If the conductor who stays on duty sixteen and twenty hours a day should get three years in the penitentiary the officials who allow him to work such hours should get six years, and the process of punishment might go further back and higher up until even Mr. C. M. Hays is called upon to explain his responsibility as the creator and preserver of a system of over-driving railway men."

It is unfortunate that reform should start with one of the humble products of the system, while the exalted authors of that system are spared. But reform must start somewhere. Conductor Thomson tried to run a train when he should have been at home asleep. The Grand Trunk railway saves its higher officials by a system of certificates which compel the poor dupe of an overworked conductor to testify that he has had sufficient sleep and is fit for duty.

"The railway workers of Canada are a most powerful branch of organized labor. They submit to conditions under which men are compelled to work when they are told to work. Not only are men driven to go out on trains when they should be in bed, but they must certify that they are fit for duty. This written lie protects the superior officials of the railway from criminal responsibility for their share in the system of driving railway men to 'take chances.'"

Once the inevitable tragedy happens and the conductor is asleep when he should be obeying orders, there is no certificate to protect him from the criminal responsibility that has been unloaded on him. He must go to jail. Hon. Justice Riddell had to mark the state's abhorrence of the murderous consequences of disobedience of orders on the part of railway men. The state should go higher and punish the employers, who throw dice with human lives by compelling men to run trains when they should be in bed. Meantime, working railway men should realize that they at least are on the firing line. The batteries of the law can open fire on their liberty when the responsibility of their employers is beyond attack. The lesson for working railway men is to unanimously refuse duty when they are not fit for work. Scores of lives are sacrificed on Canadian railways every year through disobedience of orders. Justice Riddell has taught working railway men that disobedience of orders is a crime. Now let the state go higher up and teach the employers of railway men that they are criminals when they overwork train crews so that obedience of orders is impossible."

what was required was a force which would have worked efficiently during the incipient stage of the trouble.

Permanent Army

It is intended to withdraw from the police 400 men who shall be converted into a standing military force, and to reorganise the existing force on the lines of the Cape Mounted Rifles. It is proposed to replace the four hundred police men by native constabulary.

It is understood that advantage is being taken of the presence in London of the South African premiers to discuss the matter of common interest including the question of the establishment of a general South African defence force. It is proposed to reorganise the forces in the various states so as to have for mutual defence a force sufficiently strong to deal with any internal trouble. This, it is felt, would be a practical step towards federation.

English-Dutch Army

General Botha, in the course of an interview which he granted to a representative of Reuter's Agency, said: "The idea that I intended to propose the establishment of a Boer Army is ridiculous. I have great weight with my people but with all my influence I could never get them to agree to the adoption of such a course. What we are striving for is the adoption of an army for the defence of the whole of South Africa, in which the Dutch and English would serve side by side. The sooner the newspapers drop the idea of distinguishing between the Dutch and the British the better. I have tried to show that there is no longer a question of English or Dutch. We are one people, having one idea and one aim, and we ought to be called South Africans."

RUEF MAKES CONFESSION

Noted Politician has Fallen Low and will be Imprisoned—His Plea and Warning

San Francisco, May 15.—Abraham Ruef, acknowledged advisor of Mayor Schmidt, and once the dictator of municipal affairs in San Francisco, pleaded guilty today on the charge of extortion in Judge Dunne's department of the superior court. Sentence will be pronounced on him two weeks hence.

After a conference with his four attorneys in Judge Dunne's private chambers this afternoon, and after they had withdrawn from his case because of his resolve to change his plea and avoid trial, Ruef, to the utter astonishment of the prosecution, arose in court and announced in a dramatic address that after long and earnest consideration he had determined to withdraw his plea of not guilty, and to enter a plea of guilty. He then asked that the jury be dismissed and the trial abandoned.

Ruef read his statement from a manuscript which he had prepared in the presence of his attorneys a few moments before Judge Dunne's chambers opened. He showed by his voice his expression, by his gestureless attitude, and by the tears that began and again flowed down his cheeks, the great emotion and utter humiliation that he suffered.

The pathos of the scene commuted itself to the crowd that thronged the court room. Tears sprang to the eyes of veteran reporters, who have been Ruef's hearers in countless instances, and whose papers have conducted against him and his political associates a long and bitter campaign for the purification of municipal affairs.

Ruef was several times all but overcome with emotion. When he got to the final words of his address: "I desire to withdraw my plea of not guilty and enter the contrary plea," his voice sank to a whisper. But so tense was the silence that it was

NEWTON NEWS

The seeding is about completed in this district. Another week of favorable weather will see all the wheat sown and most of the oat crop. Our assessor's local improvement district No. 8-N-2 had the district assessed and the notices sent out before he received the notices from the department of public works to levy a tax of one cent an acre under the supplementary Revenue Act. means that the whole assessment will have to be done over again.

Rev. Mr. Freeman of Moose Jaw, preached at Newton School last Sunday.

Mr. Sam Morton had the misfortune to lose one of his best horses recently.

There will be a meeting of the councillors of L.I.D., 8-N-2 in Kron on Saturday, June 1st. All complaints will be heard and due consideration given.

The C.N.R. have run their last survey about 54 miles south of Balgonie. The grade stakes have been set and grading will soon commence. It is reported that a townsite has been located on the farm of Mr. T. D. Kemp.

Cure Women's Weaknesses.

We refer to that born to weak nervous system, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John Fyfe, one of the Editorial Staff of THE ECONOMIC MAGAZINE, Review says of Unions root (Hemorrhoid Disease) which is one of the chief ingredients of the "Favorite Prescription":

"A remedy which invariably acts as a uterine invigorator, and makes for normal activity of the entire reproductive system." He continues "The solution we have a need of, which more fully answers the above purpose than any other, is Dr. Pierce's Favorite Prescription. In the treatment of diseases peculiar to women, it is the only remedy which does not present some indication for the remedial agent. Dr. Fyfe further says: "The following are among the leading indications for Unions root (Hemorrhoid Disease): (1) Painful conditions of the reproductive system, associated with chronic diseases of the reproductive organs of women; (2) Menstrual irregularities, due to a weakened condition of the reproductive system; (3) Menstrual irregularities, due to a weakened condition of the reproductive system; (4) Menstrual irregularities, due to a weakened condition of the reproductive system; (5) Menstrual irregularities, due to a weakened condition of the reproductive system; (6) Menstrual irregularities, due to a weakened condition of the reproductive system; (7) Menstrual irregularities, due to a weakened condition of the reproductive system; (8) Menstrual irregularities, due to a weakened condition of the reproductive system; (9) Menstrual irregularities, due to a weakened condition of the reproductive system; (10) Menstrual irregularities, due to a weakened condition of the reproductive system; (11) Menstrual irregularities, due to a weakened condition of the reproductive system; (12) Menstrual irregularities, due to a weakened condition of the reproductive system; (13) Menstrual irregularities, due to a weakened condition of the reproductive system; (14) Menstrual irregularities, due to a weakened condition of the reproductive system; (15) Menstrual irregularities, due to a weakened condition of the reproductive system; (16) Menstrual irregularities, due to a weakened condition of the reproductive system; ORGANISER BUSY

J. W. Whiteley provincial organiser for the Loyal Orange Association was in the city on Monday after a three months' campaign through the north country. He states that the wheat seeding is all done from Warman to Battleford, but around Lashburn and Lloydminster seeding is much later owing to the heavy fall of snow this spring. The country to the east of the C.N.R. branch has the most of the wheat in and the acreage will be about the same as last year. Mr. Whiteley found the new settlers more hopeful during the last few days. During the cold spell they certainly had the blues.

A NEW MOTOR TRACTOR

The first Universal Motor Tractor, driven from common coal oil, and which is being introduced into western Canada by Rev. Mr. Coard, president of the Northwestern agricultural college, Regina, to be used in all farming operations for which hitherto horses and steam have been utilised, arrived in Regina, Tuesday, Monday evening where he joined his wife who recently came up from the east.

ALBERTA HAS SHIELD.

Ottawa, May 20.—Every province in Canada has now a coat of arms. Alberta was the last to receive an emblem. Word has been received from the Herald's College that a design has been approved for that province and that the same will reach Ottawa in a few days.

GLOOMY DEAKIN.

London, May 20.—Premier Deakin, interviewed prior to his departure today for Australia, was asked if the results of the conference had come up to his expectations. He replied: "If you mean by the results, the resolutions which have been unanimously passed at the conference, I should be obliged to say no, because a several important subjects we not only failed to induce acceptance of our proposals, but even to secure a definite approach to them. Something, it is true, was done in nearly every case, but that something could have been accomplished by correspondence. Whatever friction may have occurred during our visit, was but individual and transitory. It is forgotten already and will not be recalled."

LETTER CARRIER SOAKED

Winnipeg, May 20.—W. M. Caudine a letter carrier, was charged in the police court this morning with stealing registered letters. He pleaded guilty to six separate charges and was given three years in the penitentiary on each charge.

AMERICANS RETALIATE

Washington, May 21.—From the present outlook there is going to be a sort of unpleasant retaliatory struggle between Canada and the United States post office departments. Postmaster General Lemieux has notified the department here that Canada will not accept second class mail matter by express or freight to be mailed in Canada at the Canadian rate which is lower than the second class rate in the United States.

that as soon as a specific case of the Canadian government refusing to handle American second class matter is brought to his notice, he would be forced to issue an order declining to handle Canadian publications in this country.

LOOKS GOOD TO WILLIAM

Winnipeg, May 21.—Sir William Mulock, chief justice of the supreme court of Canada, arrived in the city this morning on his way east from Fernie, where he had been engaged in the settlement of the coal strike. Sir William was interviewed by a reporter at the Royal Alexandra, but declined to discuss at any great length, the Lemieux Labor Bill or any feature of the strike. He felt confident that the agreement reached in the settlement of the strike would be agreeable to all sides, at least until the expiration of the agreement. The utmost good will prevailed among the men and they were very reasonable.

Additional Locals

Hon. J. H. Lamm returned to the city yesterday. Contractor Gagnon of Moosemound, is the city today. The season is evidently suffering from the spring-hail. J. N. Meers and J. L. Sullivan of Arcola are guests at the Clayton. R. F. Manley went to Winnipeg making the trip in his new auto. J. Spight and wife of New Castle-On-Tyne are guests at the Lansdowne. The buffalo herd at Banff has been increased by five fine calves during last week. Chas Wright has resigned as caretaker of the exhibition buildings and grounds. J. F. Bole, M.L.A., has offered his residence property for sale as a fire ball site for \$15,000. Rev. Mr. Mellick, Baptist pastor, preached his farewell sermon on Sunday evening last. Ed. McCarthy will make the trip across the water this summer on business and pleasure. Mrs. J. McDougall went to Arcola last week to visit Mrs. P. Victoria at the Metropolitan hotel. Farmers should look up the Capital Loan Company's advertisement for money on easy terms. Chief Harwood who has been ill for some time is now on duty again. Another man has been added to the force. G. M. Annable, of Moose Jaw was in the city on Monday returning home from the north line. He celebrated his 49th birthday on that date and received the congratulations of his Regina friends.

Mr. Barrett came down from Lumsden on Monday evening to meet his wife and child who came in from Creelman.

FOR EVERY WOMAN ACCORDING TO HER NEEDS

THE PRACTICAL GIRL and HER FAIS

She Remodels Her Sleeves

NOT every girl can afford a new gown each season. On the other hand, there is no girl who can afford - from the standpoint of her looks - to wear a last year's gown unaltered.

After all, it is not such a difficult matter to remodel an old gown. For the girl who can go to her modiste or tailor for renovations, the thing is simplicity itself; but even the home dressmaker will find herself repaid many times over for her trouble when she wears a dress that is so rejuvenated as to prevent its recognition as an old and true friend.

Often a few simple alterations will transform the whole character of a gown. Usually the skirt, especially if it was well cut and of late model when new, need not be touched. As a rule, the most radical changes lie in the sleeves; if that is refashioned and made modern and the trimmings of the blouse freshened up a bit, the entire gown will seem like new.

Never has there been a season when sleeve remodeling was more necessary than this spring; and never, happily, have the possibilities of that remodeling been stronger or more easily managed.

True, except in point of length and even now there are whippers that the long sleeve will soon have its inning over - more the sleeve of 1907 is very different from that of last year. The new shapes all tend to the Japanese or kimono effects; namely, small at the shoulder and broadening toward the elbow. As for the trimming, it literally means the sleeve itself, so befrilled and fluffed is the up-to-date arm covering.

MUCH DRAPERY IS SEEN - Much drapery is seen, and often combinations of several kinds of material. Take one of the so-called simple sleeves of the fancy blouse; as it falls flat from the shoulder, where it is slightly full, it spreads considerably in width to a band cuff, over which it droops in "bell" effect. But both the sleeve and cuff are as elaborately covered with lace, tucks and embroidery as the front of the waist itself.

For afternoon and evening gowns the double sleeve model has a cap matching the material of the gown. The shape of this varies. One very new form is exactly like the long flowing sleeve of a regular little cape, the length of which is split to the shoulder. Even evening sleeves follow these same lines. One lace model has a

long-pointed outer sleeve, twice the length of the under one.

It is on this undersleeve that the hope of the remodeler must rest. Here she can add all those new touches that will turn a hopelessly old-fashioned gown into one thoroughly good style. The undersleeve has but one fixed rule - it must be soft and fluffy, usually transparent. The greatest liberty of material and cut is permitted. It may be of lace, tulle, lingerie, net or chiffon to match the gown, though the white, cream or semi materials are prettiest. This sleeve can be tucked or puffed or be formed of a dozen little ruffles. This last is probably the favorite form of the moment. A charming undersleeve of this kind which would freshen the most hopelessly out-of-date gown, is to form a puff of the thinnest kind of chiffon or net, adding to it a half dozen ruffles of two or three inch lace, so put on as to slightly overlap.

EASY TO REMODEL

Take a rather full puff of last year's broadcloth afternoon gown in light color. Cut it from the band, remove some of the fulness from the top, slash it sharply up the centre, pipe the edges with velvet or satin of a contrasting shade, drape it over one of these ruffled undersleeves, and you will have a thoroughly modern and easily remodelled sleeve.

Instead of having this lace sleeve end as in the picture, the puff may descend a little below the last ruffle and be caught in a twist of ribbon. A pretty French touch is to make this twist of pale pink or blue ribbon, quite irrespective of the trimming or color of the gown.

If one has a waist of several seasons back, with a full, baggy puff at the top, rip it out, steam and press it flat, then invert it and cut into one of the new "bell"-shaped caps, put in nearly plain at the top. Trim with bias-stitched folds of the material, add a double row of buttons, and wear over a tucked undersleeve of chiffon.

The striped silk model shows a very easy and most attractive way to cut a new cap from an old sleeve. The combination of bias and horizontal stripes, with the stitched bands around the armholes, makes it possible to evolve this sleeve out of small scraps of material, as the joining can be hidden under the stitching. The piping of velvet and trimming of velvet buttons can be repeated on the waist with a surprisingly good effect. The undersleeve of tulle net, with a baby Irish cuff, is very simple and easy to make.

A small braid-trimmed cap of crepe de chine over a double-puffed dotted net undersleeve shows that even the quaintest materials may be utilized. There are few old sleeves from which one could not cut such a shallow "bell"-shaped cap. If one has a lingerie or crepe de chine sleeve too small for the present-day styles, it can easily be widened

with lengthwise bands of insertion into a very effective model of the much-trimmed sleeve of the hour.

A very pretty lace sleeve to an evening gown can be made from a small, long puff by cutting it up the middle, shirring its length into a short mousquetaire and joining the pieces under a broad lace ruffle that outlines the bottom of the sleeve and runs to the shoulder. Or the puff can be shortened and made to appear fuller by an added ruffle of lace over the shoulder. Folds of liberty satin brought around the bottom of this sleeve crossed and fastened at the back with a chou makes a charming garniture.

The old-time drooping puff can be easily recut into a modern double puff, with a band of braid between the puffs, if of heavy materials, or, if of a light silk or cotton goods, it can be cut into four rather flaring and lace-trimmed ruffles sewed to a narrow foundation.

The skeleton waist fashion makes feasible many recuttings of an old sleeve. Often, if there is not enough to make an upper part, small straps or bands or shield-shaped open cuffs of the dress material can be added to the blouse sleeve. Another treatment of the bell-shaped cap slashed up the centre can be made by having each

An Easy Way to Remodel a Sleeve

A Sleeve Widened by Lace Insertion. An Inverted Sleeve with Chiffon Cuffs

side a series of four small cape-like pieces overlapping each other about two inches apart. Each of these pieces should be piped or trimmed with braid or insertion.

One old-fashioned short puff to an evening gown was given the modern long-shoulder effect by the addition of a shaped piece of the material covering the entire band of the sleeve at the elbow, brought up over the puff to cover the shoulder seam, and tapering to a

rounded point at the edge of the square neck. This piece was trimmed all around with a narrow accordion pleating of ribbon. A fall of lace finished the bottom of the sleeve.

Even the light coat sleeve need not cause despair, as it can have wedge-shaped pieces inserted, the seaming covered with braid or stitched folds. One interesting restoration of the plain small leg o mutton sleeve was made by cutting the upper part from the bottom

of the armhole gathers on each side leaving sloped edges to the elbow on each side, and cut up again at the back of the arm in two narrow tabs. A full puff, gathered at the middle and edge, of some extra material to match the gown was inserted in this opening. The edges of which were finished in double rows of stitching.

Indeed, there is no end to the way the ingenious girl can make over a last year's sleeve.

The Old Sleeve May Be Cut Into a Cap

Time and Money Saving Hints

Neater Than a Darn or Patch

THEY can hardly detect it if court-plaster is used instead of thread. The goods should be laid upon a smooth, flat surface and then a pin should be firmly stuck in perpendicularly so as to bring the edges together, but not to interfere with the rent, say three-quarters of an inch away from each side. Court-plaster which has been well moistened and allowed to stand a second or two so as to be sticky rather than wet, should be applied. It should be rubbed and pressed, pressed and rubbed, until every particle of the surface has adhered. The spot should then be pressed with a moderately hot iron, a piece of muslin between. Finally the rent should be examined for any frayed threads, which should be clipped carefully away if discovered.

No More "Stroking" of Gathers

THEY are monotonous, nerve-trying, work-wearily stroking gathers or "laying" them, as it is sometimes called, may be entirely done away with by the following method. Use a long slender needle and fine thread. Fill the needle with gathers almost as full as it will hold. Squeeze these hard together, pressing toward the eye of the needle. When well compressed, hold firmly in one hand and pull with the other. When the gathers have passed from the needle, they will be found as nicely laid as if done with a pin.

If the gathering has been put in by machine (and none are nicer and more even), a little gentle pulling will make them set like hand-made gathers.

Purchasing for Another Season

MEN desire women's craps for "bargain hunting," and many are the gulls that are hurried at the heads of the just and unjust. For "just" bargains there are, in plenty, if women only know where to find them and how to deal with them.

One woman whose little daughter was always dressed in materials that would seem beyond her mother's means, and yet were in no wise conspicuous for their elegance, managed in the following sensible way: When September came and even in the latter part of August, she kept an eye on the "let-overs" in her own or pretty prints. These could often be purchased at one-half the price of earlier in the season, and if the quantity was a remnant, it could be had for a mere song. She was always careful, of course, to buy nothing that would look out of place the coming summer. If a conspicuous pattern happened to be the rage, large plaids or aggressive spots, for instance, she rigorously turned her back upon it. She would, however, really sleep they might be. A dainty flower, a little speck, a pin stripe, or a broken, inconspicuous

Machine-Made Draw-Work

HOW many women know that they can make a good machine imitation of draw-work? To the busy woman this will, indeed, prove a boon, as it can be done on any machine, without making any change of parts, in a fraction of the time required for hand-work. It makes a dainty finish for children's clothes, underwear and shirtwaists of silk or cotton. A belt with hems done thus, made of a remnant of black silk, was as handsome as the expensive ones on sale. To make the edges are placed in position, with thirty thicknesses of paper between, and stitched through. The paper is then pulled out, the narrow hems turned and stitched close to the edges, and the work is done.

For Dull Scissors

HAVE you ever been annoyed to find that just as you had made up your mind to do some special piece of work your scissors seemed suddenly to have grown dull? This is often the case, and is something that no one can satisfactorily explain. Anyway, the immediate remedy is very simple and is always at hand. Open the scissors around the neck of a small bottle and work them vigorously for a few seconds, say a half dozen times. The scissors will then be found to cut very well. The glass acts as a sharpening stone, and while the edge given is what is known as a "wire edge" and will not hold for any large amount of work, it certainly is a great convenience and will last for two or three days sometimes.

To Adjust Gathers

WHEN gathering anything to go in a band or the top or lower edge of a sleeve, run two rows of thread and draw them from opposite directions. It will be found almost as effective in arranging the gathers as "brushing" them.

PACKING the SCHOOL HAMPER

DID you ever go to boarding school? If you did, you know who was for the time being the most popular girl in the dormitories; it was she who had a birthday - therefore a box from home. Oh, those home goodies! A well-filled jewel casket in after life gives not half the joy that comes to a schoolgirl with a homely wooden box filled to overflowing with cakes, big and little, fudge, nuts and -bliss of bliss-fat, green pickles!

Especially if such luxuries are forbidden - if sweets are tabooed, if cocoa must be smuggled and midnight spreads be held in deadly fear of a sudden raid of a disapproving teacher - is that joy enhanced. While girls are in girls, and home boxes are home boxes, the girls will have the boxes despite rules, and teachers might as well make the best of it.

There was once a very clever woman who was principal of a large boarding school for girls. She was known far and wide as a rigid disciplinarian. She was privileged to write her name, but she had not forgotten her own youth. One day her head teacher came to her with the report that "nice" were everywhere in the dormitories, and all that remained from the

spread, that was always in order as soon as the hamper was opened, was stowed away in a convenient place for future use. Wardrobes and bureau drawers had more than their share of crumbs; occasionally, and the plague of mice was on the increase. "You give the girls plenty of good, wholesome food," Miss W., the lady concluded, "why not forbid anything being sent from home?"

"Most of my life has been spent in a boarding school, either as pupil or teacher," said Miss W., shaking her head, "and I know that nothing ever takes the place of the school hamper - tuck boxes we call them in England, you know. I cannot forbid my girls their supply of home goodies, neither can I risk following in the footsteps of the Bishop of Bingen. I must think of some way of meeting the difficulty."

That very day she sent for a carpenter, and in a short time a pantry was built in the dormitories. The key was put in the hands of the housekeeper, who saw that the door was kept locked until a clock in the afternoon, when the dinner hour was comfortably past. Between 8 and 9 the key was left on the lock, and the girls were at liberty to help themselves to the hamper. Her interest did not end there. She called a little meeting of her boarders and housekeepers, and suggested about the contents of future hampers

and the methods of packing them. Often provisions arrived in bad order, glass was broken, soft cakes and tarts were smeared over other articles, and all of this might be avoided with a little care.

She suggested that preserves and dainties of a like nature would best be sent in small jars with sawdust tops. These tiny jars hold just enough for one feast, and there is no danger of a little being left to rot. The same rule applied to olive pickles and the cream cheeses that are dear to the heart of every schoolgirl. In packing these jars safety requires that each one should be wrapped in several layers of soft paper and that more soft paper should be stuffed in every possible crevice and corner, thus making it impossible for them to be displaced.

Crackers ought to go in their own packages. Home-made candy is better boxed, and the thoughtful housekeeper will save all the discarded candy boxes in the pantry in anticipation of just such occasions. Pie is a favorite delicacy with most school children, but pie does rarely arrive at the end of a railroad journey in good condition. Instead make little pies, "turnovers" for the school hamper. Wrap each one in oiled paper and put them on the thin wooden planks which come for the purpose at a trilling cost. If possible, the pie is packed in a tin at a safe distance from anything that might be spoiled by dripping syrups.

Receiving a Box from Home

of tissue paper between the pie and the other contents of the hamper, and pack it at a safe distance from anything that might be spoiled by dripping syrups.

All layer and soft cakes travel best in tin. The filling must be perfectly hard before packing. Instead of putting it on a plate, which is heavy and makes

The Proper Way to Pack a Cake

extra expressage, ice the cake on a flat square of stiff pasteboard, or on a tin sheet of exactly the right size. Wrap the cake with oiled paper, and set it on a layer of heavy paper which will reach well up beyond the sides of the box. This enables the cake to be easily lifted out without being lightly around it to prevent moving.

Small cakes are really better for the school hamper than loaf cakes, though, perhaps, they do not keep so long. Bake gingerbread, chocolate, and cookie always make acceptable contributions. Bread is not supposed to be particularly dear to young appetites, but something like a housewife's counterpane has a yearning for some special brand of home roll or biscuit, or even for a loaf of home-made bread. All these travel comfortably in tin.

Bread is beloved by young and old, and almost every family has its own cherished recipe. Be sure that it is cooked enough and beaten as that it is smooth and not sticky. Or, why not

add to the school hamper the necessary materials for making it? For the average school boasts more than one chafing dish among its inmates. Chocolate and sugar are easily packed. A tiny bottle of vanilla, well wrapped in paper, will travel safely in an odd corner. Small pans of butter wrapped in the thin pieces of cheesecloth that are familiar to any one who has ever poked around a dairy will remain intact if packed in a tin box or one of the small jars with a screw top that come filled with marmalade or cheese.

A real loaf is sure to arouse much enthusiasm. Wrap it carefully in oiled paper and pack in a long, narrow box that exactly fits it.

Deviled eggs - provided the distance is not too great and the weather too warm - carry well if the halves are joined "nearly" after stuffing and the whole egg wrapped in oiled paper. Pack them in an upright tin canny box.

Where there is no prejudice against canned goods, sardines and potted meats make a very desirable addition to the store. Get the smallest cans possible, however, and use them for the most delicate. Against leaving anything in the can for "next time." Carelessness in this respect is at the root of many an illness from "eating canned goods."

Provide the hamper with an unexpected instrument as well as with oranges and lemons. When they are sent, wrap each one in tissue paper as well as with oiled paper. There is a charm about eating an olive from the end of a hamper, but the same instrument has its inconveniences when used as a butter spread or a cake knife.

PUBLISHERS' NOTICE.

Owing to the new postal regulations which provide for the payment by publishers of one cent per four ounces on papers going from Canada to the United States, thereby increasing the cost to the publishers fifty per cent., the Subscription price of The West to points in the United States from this date will be \$1.50 per year.

THE WEST CO., LIMITED.

Mr. and Mrs. Morris, of Somerset, Eng., arrived in the city yesterday. They were accompanied by Miss Bowerman from the same place.

G. H. Fawcett customs officer at Ottawa was in the city Saturday and spent a short time with the local officer, S. B. Jamison.

C. R. Morden will leave shortly for London, Eng. to place a block of Saskatchewan lands with English capitalists, through his cousin, W. Grant Morden a well known financial agent at the great metropolis.

S. J. Porter, homestead inspector, has resigned his position with the Dominion government. He is undecided as to his future, but will probably go into business for himself.

Mr. and Mrs. Noguchi, Japanese, are in the city looking for a location to start a restaurant. They are thinking of going to Prince Albert, not being favorably impressed with the prairie country.

Mr. and Mrs. Geo. Love and child of Antler were in the city on Monday en route to Lacombe where they will make their home in future.

Hon. J. A. Calder went to Winnipeg on departmental business Thursday, returning Monday.

Dr. Coard's motor tractor has been unloaded. The machine is not very large for a 25 horse power motor.

Robert Barclay died a few years ago at Winnipeg. He came to this country some years ago, but was somewhat out of joint till fortune smiled on him from home, when one of his relatives left him a fortune.

Dr. Charlton provincial bacteriologist has been called to the Eagle Lake country about ninety miles west of Hanley where a homesteader is suffering from small pox. In the absence of Dr. Seymour Dr. Charlton is doing the work of the provincial health officer.

W. F. Luxton, founder of the Winnipeg Free Press, died at Winnipeg on Sunday after a stroke of paralysis the day previous. Mr. Luxton has not been associated with journalism for some years and has been inspector of public institutions for the province of Manitoba. During late years his life has not been particularly pleasant owing to domestic troubles. Deceased was a noted editor and politician. The public will remember with what vigor he fought Joe Martin on the graft clause of the N.P. charter which resulted in a libel suit.

R. F. Scradar of Bethune, has been committed by Magistrate McCausland to stand his trial charged with theft from the Independent Lumber Co. He was agent at Bethune and it is alleged failed to remit to the company. There are several charges against him amounting in all to nearly \$3000. Mr. Scradar is yet in jail. His wife and two little children are in the city and will probably return to Bethune and stay with her brothers for the present.

The raging torrent of the Wascana the mighty Pile-o'-Bones, came near claiming Jim Fody and party a few days ago. Jim and Mr. and Mrs. Misselbrook, with two wagons, attempted to ford the river, when both wagon boxes were washed away. Jim splashed ashore and Mr. and Mrs. Misselbrook sailed down to the bridge. As the wagon box floated on its way to the sea, they reached up and catching the frame work of the bridge drew themselves up to safety. —Spidey Tribune.

ELECTION OF PUBLIC SCHOOL TRUSTEE, 1907

Public notice is hereby given that a meeting of the electors of the City of Regina will be held in the City Hall, Regina, on Friday the 31st day of May, 1907, from 11 O'CLOCK A. M. until NOON for the purpose of nominating a candidate for the office of Trustee for the Regina Public School Board to fill the vacancy caused by the resignation of Mr. W. G. Pettigell, one of the Trustees of said Board.

Given under my hand this 22nd day of May, A.D. 1907.
J. KELSO HUNTER, Returning Officer.

ELECTION OF HIGH SCHOOL TRUSTEES, 1907

Public notice is hereby given that a meeting of the electors of the City of Regina will be held in the City Hall, Regina, on Friday the 31st day of May, 1907, from ELEVEN a. m. until NOON, for the purpose of nominating candidates for the office of Trustee for the High School Board of the City of Regina.

Given under my hand at Regina, this 21st day of May, A.D. 1907.
J. KELSO HUNTER, Returning Officer.

A Claim and the Proof

DO YOU KNOW whether the Paints you use are the best your money will buy? Have you anything to go by except the seller's say so?

It is easy enough to "claim" that a certain brand of Paints is the best. It is quite another proposition to "substantiate" the claim.

The basis of our claim for "ENGLISH" LIQUID HOUSE PAINTS is the fact that the only White Lead used in their manufacture is BRANDAM'S B. B. GENUINE, for close on to two centuries the world's standard WHITE LEAD.

Our customers have used these paints both for inside and outside use, and they keep on using them because they give perfect satisfaction, which fact further substantiates our claim.

TRADING COMPANY STORE NEWS

CHINA AND GLASSWARE SALE

Four large cases of
China and Dinnerware
Just arrived the other day in spite of Cancelled Orders.

Splendid
English China Dinner and Toiletware
To be Sacrificed at **Half Price**

WE are not in the China and Glassware business. At our recent Clearance Sale we announced our intention of closing out this department and the crowds that came on the advertised day and hour helped us to quickly live up to our promise. Just the other day there arrived four bulky cases of English China and Dinnerware. These goods were either shipped in spite of cancellation or the cancellation was too late. Anyway these elegant goods are here. What can we do with them? There is nothing for it but to sacrifice the entire lot and that at once.

AT our previous sale many were the regrets expressed by those who came just a little late. Now MONDAY, May 27th is Your day. Be here sharp on the tick of the clock--1.30 p.m.

Beautiful English China
DINNER and TOILETWARE
positively going
MONDAY, May 27th
