Guelph Evening Mercury

TUESDAY EV'NG, MARCH 25, 1873. Opposition would have Resulted in Defeat.

The Government, of which Sir John is the head, can not actually glory in its strength. Several times since the House met it had to put its best foot foremost in order to maintain its po-sition. In the Senate on Monday the Government had to submit to the dictation of their opponents to an extent scarcely less humiliating than in the Commons in the matter of the Centre Toronto election petition. Hon Senator Christie moved for copies of all correspondence between the Government and Sir Hugh Allan, or any other person, re the Pacific Railway, also copies of any agreement entered into with Sir Hugh or any other person; also other particulars relative to stock list and shareholders necessary to a full under-standing of the relations between Sir Hugh and the Government. The motion was yielded to very reluctantly by Senator Campbell for the Government, after having discovered that opposition would have resulted in defeat. Not even in the Senate can the Government feel assured of unfailing allegiance.

Defeat of the Government.

Our readers are aware that it is a standing order of the House that protested election petitions require to be presented within fourteen days after the House meets. The rule is so plainly laid down that no person ac tuated by honest motives would raise an objection. But when some people get into tight places, they would swear black is white, and such has been the conduct of the Government on the petition against the return of Mr. Wilkes, member for Centre Tor-onto. The petition was not presented until the fifteenth day, and, of course, was objected to on the ground that it was contravening the establish ed rule. Sir John, and others, argued ed rule. Sir John, and others, argued that the fourteen days should run from the presentation of the Speaker to the Governor-General and organization of the House for business, and not from the day for which it is summoned. The speaker, in accordance with a previous ruling, held that the petition should be received. The House was appealed to, which overruled the Speaker and defeated the Government by a mojority of 4 votes, the number being yeas 72, nays 76.

wotes, the number being yeas 72, navs 76.

We record with pride the fact that there are men in the House, who, having supported Sir John until he has dragged them well nigh to the slough of despond, have determined to be be no party to futher acts of injustice, and have the manliness to tell the Premier so to his fface. We begin to feel interested—the Opposition are ascending—the country may yet be saved from one the most extravagant Governments that ever sat upon the Freasury benches.

DOMINION PARLIAMENT.

Among the petitions presented were several for the prohibitory liquor law, and one presented by Mr. Young (Waterloo) from the executive of the Canadian Press Association, praying for abolition of the pestage on newspapers sent from the office of publiction.

The argument adjourned from Friday on the reception of the petition against the return of Mr. Wilkes for Centre Toronto was resumed.

The Speaker, after reviewing the arguments, gave it as his opinion that the petition should be received.

Mr. Cauchon asked if the question was one of order, and therefore an appeal from the Speaker's decision.

Sir John Macdonald said it was to a certain extent an appeal from the petition was the fore the peaker's words, to the effect that he had merely given his opinion, not with the intention that it should have an undue weight with the House. The question was therefore simply on the 1-veption of the petition.

The House divided when 72 voted for the petition.

was therefore simply on the reception of the petition.

The House divided when 72 voted for

the House divided when 72 voted for the reception of the petition, and 76 against it. The result was received with cheers by the Opposition.

Mr. Bodwell moved to refer the petition paying for the passage of a Prohibitory Equor Law to e. Special Committee. After a long and able speech, in support of his motion he named the Committee to whom the petitions will be referred.

The motion was cirried.

Board of School Trustees.

The Board met on Monday evening. Mr. Newton in the chair. Present-Messrs. Kennedy, Mitchell, Murton, Inghs, Bell, Raymond, Stevenson, Knowles

The Secretary read a communication from Mr. Charles Walker, asking for a check for the amount of his salary; also SOMETHING GOOD. a streament showing the studies pur-suel, and the number of pupils in the BOOTS and SHOES

Considerable discussion took place in reference to the advisability of the erec. tion of a commodious Central School .progressive people, and as such should not be backward in providing the school acc mmodation necessary.

Mr. Raymond said that so soon as the Town knew exactly its financial position, in tegard to the Municipal Loan Fund

and the Surplus, it would be well for the Board to take action in reference to the erection of suitable school buildings Mr. Stevenson had no doubt the Town

was prepared to spend six or seven thousand dollars, or ten thousand, for the accomplishment of the object.

Mr. Knowles stated that the requisite number of desks had been ordered.

the desks were going to cost?

Mr. Knowles said the desks would cost more than five dollars each.

Mr. Raymond, that the building Committee be instructed to take action in reference to the erection of a new Central

School, and report at next meeting of the Board.—Carried.

Mr. Raymond gave notice of motion to the effect that Miss Eliza Walker be requested to take the position of assistant teacher in the Senior Girls' School. Board adjourned.

THE BANK OF ENGLAND FORGERY .- The police proceedings against the Bank of England forgers have been carried to a triumphant close. Nearly—if not all— the plunder has been traced and secured, and the case is likely to terminate with-out serious loss.

ANOTHER NATHAN TRAGEDY .- The Ne York Tribine says that the murder of a well-known and estimable citizen of Brooklyn adds another ghastly tragedy to the daily-increasing list. Mr. Goodrich was foully murdered in his own house amstances which im under circumstances which immediately recall the Nathan tragedy. That mys-terious affair has not yet been explained satisfactorily. Will the so-called detec-tive force be able to follow up the slander clue left them in this case, and find the

I not only area with the writer that the top ought to be trimmed sufficiently to "preserve the relative proportion with the root," but I would go further and say that I have found it best to cut the openinely off, at the point where you want your tree to branch, thus leaving only a straight pole. You will have a better looking tree, and in less time that if the limbs had been left on; and the chances of the tree's living are much favored by this method. Another very important matter is the time of transplanting, and consequently trimming, should not be done while the sap will run, else, as is often the case with the grape vine, the tree will "bleed to death." I think the best time is when the leaves are just beginning to open, which is just after the flow of sap, and before any new MARKET SQUARE, GUELPH. eise, as is often the case with the reaves vine, the tree will "bleed to death." I think the best time is when the leaves are just beginning to open, which is just after the flow of sap, and before any new growth has been made. In taking up the tree, preserve as far as possible all the fine fiberous roots; a long large root, destitute of fibers, is of very little account, and may be ent off, if troublesome to get out of the ground. All broken roots should be smoothly ent off before setting; and one other matter, very generally neglected but highly haportant, is to cover the roots with wet straw immediately on taking them from the earth, and to keep them so covered during transportation, and then taking out only so fast as you are ready to put them in their places. I would give very little for trees which had been carted several miles with the roots exposed to the sun and wind for a half day or more. The soil may adhere to them, but should be kept, just as nearly as possible, in their natural condition, neither frozen, dried nor washed. It is best, if possible, to select trees that have not grown m dense thickets, but have had considerable exposure to the sun. Some recommend setting the tree out with its points towards the same points of compass as they were originally, thus exposing the same side to the heat of the sun; but I do not know that it is essential. They should be put at about the natural depth in the earth, and I think should be mulched slightly with some material that will allow the rain to pass through freely, but prevent the ground about the roots becoming too hard and dry. No manure should be need.
