Great St. James Street,
MONTREAL.

H. HOGAN,.....PROPRIETOR.

T HIS First-class Hotel, the largest in Montreal, and which has long been regarded by the Travelling Public as the most popular and fashionable resort, is situated opposite the Post Office, and contiguous to the Banks, French Cathedral, or Church Ville Marie, the Champ de Mars, where the Troops are reviewed, and other Public Institutions. It has been under the charge of its present Proprietor for over fifteen years. A large part of the Hall was engaged by the Government for the Suite of His Royal Highness the Prince of Wales on his visit to this city. The Proprietor would take this opportunity of thanking his numerous friends for past favors, and to inform them that he has during the past winter built a large addition to the Hall, and hopes in future to be able to accommodate all who may favor his establishment.

Telegraphic communication from the Hotel.

RAILWAY TRAVELLERS.

You will save money by purchasing your Tickets before entering the cars.

CHECK YOUR BAGGAGE and the Company will then be responsible for it. Baggage in Passenger Cars is a source of anxiety to the owner: causes inconvenience to others; and is unsightly and altogether out of place.

Baggage can be checked *through* from places in Canada to the United States and *vice versa*: but in such cases the law requires each Passenger to point out his Baggage to the Customs' Officer at the Frontier Station, in order that it may be examined.

The following is a list of Custom House Stations:—

Avoid altercations with Conductors or other Employés of the Company. If you have a grievance make it known by letter to the Managing Director at Montreal and you will obtain redress. Conductors have very responsible and arduous duties to perform on the journey, which require the utmost diligence on their part, and they have not time to enter into long discussions.

IT IS DANGEROUS to stand on the platform of cars or move from one car to another, or attempt to get on or off whilst the Train is in motion. Heads and arms are safest when they are *inside* the car windows.
