The copy filmed here has been reproduced thanks to the generosity of:

Ralph Pickard Bell Library  
Mount Allison University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Ralph Pickard Bell Library  
Mount Allison University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

All the calculations in this Almanac have been adapted to "Mean Time" at St. John, except the Sun's Declination and the "Equation of Time," which are for Mean Noon, Greenwich.

"Mean Time," is that shown by a well-regulated clock, and differs from "Apparent Time," or that exhibited by a Sun-dial by what is known as "The Equation of Time." When the Sun is *slow* this is to be subtracted from "Mean (or Clock) Time," and when the Sun is *fast*, to be added to "Mean Time" to get the "Apparent Time."

## Time for Going Through the Falls.

The Falls are level or still water at about three and a half hours on the flood, and about two and a half on the ebb, so that they are passable four times in twenty-four hours, about ten or fifteen minutes each time. No other rule can be given, as much depends on the floods in the River Saint John, and the time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

The Time Ball on Northern Tower of the Custom House Building, will be hoisted half its elevation each day (Sundays excepted) at fifteen minutes before one o'clock. At one minute before one o'clock it will be hoisted its full length; and at one o'clock, mean time, the Ball will be dropped. A Chronometer, keeping correct Greenwich time, should then show 5h. 24m. 15s., and the difference between this and the time shown by a Chronometer, is its true error on Greenwich time at the moment. As the above hour of one o'clock, when the Ball drops, represents 5h. 24m. 15s. at Greenwich, the error of a Chronometer may be ascertained no matter where the ship is lying. Masters of vessels arriving at St. John should compare their Chronometers by the Time Ball, as it will enable them to get the sea rate, which frequently varies from harbor rates. Latitude 45d. 16m. 42s. North; Longitude in time 5h. 24m. 15s. West of Greenwich.

The barometer standing at 29.50 inches, a rise foretells decreasing wind or a change of it N., or less wet. If at 29 inches, a fast first rise precedes squalls or strong wind from N. W., N. or N. E.; afterwards, a slow rise with falling temperature or S. or S. W. wind will follow, and this especially the case if the barometer rise has been sudden.

## TABLE FOR FORETELLING THE WEATHER.

This table, and the accompanying remarks, are the result of many years actual observation; the whole being constructed on a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the Moon into any of its quarters, and that so near the truth as to be seldom found to fail.

If the new moon, the first quarter, the full moon, or the last quarter happens	IN SUMMER.	IN WINTER.
Between midnight and 2 in the morning,	Fair	Hard frost, unless the wind be S. or W.
2 and 4 morning,	Cold, frequent showers.	Snow and stormy.
4 and 6 "	Rain.	Rain.
6 and 8 "	Wind and Rain.	Stormy.
8 and 10 "	Changeable.	Cold rain, if wind be W., snow if E.
10 and 12 "	Frequent Showers.	Cold and high wind.
At 12 noon and 2 P. M.	Very rainy.	Snow or rain.
Between 2 and 4 P. M.	Changeable.	Fair and mild.
4 and 6 P. M.	Fair.	Fair.
6 and 8 P. M.	Fair, if wind N. W.	Fair and frosty if wind N. or N. E.
8 and 10 P. M.	Rainy, if S. or S. W.	Rain or snow, if S. S. W.
10 and midnight,	do do do	ditto.
	Fair.	Fair and frosty.

OBSERVATIONS.—The nearer the time of the Moon's change to noon or midnight, the more nearly will the result accord with the prediction.

The space for this calculation occupies from ten at night till two next morning.

The Moon's change, first quarter, full and last quarter, happening during six of the afternoon hours, i. e., from four to ten, may be followed by fair weather; but this is mostly dependent on the wind, as is noted in the table.
