West Lorne Milling Co.
West Lorne, Ont.

FOR SALE
50 bushels choice onions, Yellow Danvers; also 200 bags choice potatoes.—Walter Hallstone.

ELEVENTH
of the series dealing with the establishment of the
BANK OF MONTREAL at representative points in CANADA
and elsewhere

THE PARIS subsidiary of the Bank of Montreal is situated in a quarter rich in historic interest. From a lofty column in Place Vendôme the statue of Napoleon looks out upon an imposing square the construction of which began in 1686 under authority of Louis XIV.—a square which has witnessed many of the city's greatest demonstrations and which now mirrors the social and business life of Paris.

Here, in the heart of the capital of France, the Bank of Montreal in 1919 established a subsidiary office in the Ritz Hotel Building. In February, 1922, the business of this office had become so extensive that enlarged quarters were opened near by at No. 6 Place Vendôme.

BANK OF MONTREAL
Established over 100 years
Total Assets in excess of \$650,000,000

PRICES ARE DOWN!

5 x B. C. Shingles, Barn Lumber, Cement, Coal, Cedar Posts, and all Building Materials.

A Low Price on Hardwood Flooring during July and August. Special Price on Anthracite Coal for immediate delivery.

RUSSELL QUICK
ELECTRICIAN

RESUME AGRICULTURAL PROBE
London, Sept. 30.—J. G. Lethbridge, M.L.A. West Middlesex, left last night to join the other members of the agricultural inquiry committee in a further week's tour of Eastern Ontario. Sitings are to be held this week at Trenton and other points in Hastings.

During the following week the committee will be in New Ontario and it will be necessary to leave Toronto on the night of Sunday, October 5, in order to open the first sitting at Dryden on Tuesday. Complaints and suggestions from agriculturists will be heard also at Emo, New Liskeard, Cochrane and elsewhere and it is expected that the committee will divide in order to cover the ground in a week.

Mrs. Lethbridge is ill in London at present and Mr. Lethbridge spent the week-end here.

Fred Lockwood, of Delaware, purchased the property known as the John Lockwood farm, situated on the Longwoods Road, Caradoc, near Christina, which was recently offered by auction.

THE PARIS

One of the oldest residents of Brooke township passed away on Monday, September 15, in the person of James Lett, in his 89th year. He was born in Lanark county and as a lad of twelve came to Brooke township with his parents.

Frank Hamilton, a former Alvinston boy, now manager of the Columbus Club ball team at Saskatoon, had the little finger of his right hand amputated at a hospital as the result of being hit on the digit by a foul hit in a recent ball game.

Rev. S. V. R. Pentland, of Strathroy, while digging potatoes in his garden, found a tuber of extraordinary size. It weighed one pound and seven ounces. Potatoes, from present indications, are going to turn out a most bountiful crop this year, after all.

The third issue of 25-cent paper bills, commonly known as "shin-plasters," to appear in the fifty years since the first bills were issued, is now being put into circulation. The new bills are considerably neater and more artistic in design, and show a decided improvement over the old type of bill.

A new fraud is being perpetrated on the citizens of surrounding towns by a young woman who is going from house to house accompanied by a boy. The woman is selling cloth. Her plan is to approach the door and make a sale of cloth of seven yards length. When she is gone the customer, it is alleged, finds that by some sleight of hand method she has received only three yards of cloth.

An elaborate scheme for the illumination of Niagara Falls by night with vari-colored lights at an estimated cost of \$60,000 annually has been approved. The cost will be borne by Niagara Falls, N.Y., to the extent of \$40,000, and of the balance, \$20,000 by Niagara Falls, Ont., and \$15,000 by the Ontario Government. The cost of maintenance annually will be allocated in the same ratio.

The death occurred at Strathroy Friday of Louis Letts, a well-known and highly respected citizen. Mr. Letts underwent a minor nasal operation recently, and, failing to take proper precautions, developed septicaemia. He conducted a market garden and a few months ago inherited a considerable fortune from a brother in California who was a multimillionaire. He was an Englishman by birth, and is survived by a widow.

DISTRICT AND GENERAL

Slot machines are now prohibited in Alberta.

Three tanks of oil have been shipped from the Cowal oil field.

The Elgin County Plowmen's Association will hold their third annual matches in the vicinity of Dutton on October 29.

The township of Brooke is having an audit by government officials of the business transactions during the past five years.

John Brown, one of Alvinston's oldest residents and for many years a councillor and public man of the village, is dead.

Miss Violet Bachard, aged 16 years, of Wallaceburg, received fatal injuries when she jumped from a moving motor truck in that town a few days ago.

Norman McWilliams, three-year-old son of A. A. McWilliams, of Campbellton, got his hand fast in a washing machine and had three fingers badly crushed.

Eva Bonnoen, aged 17, lost her life in a fire which destroyed the farmhouse of her father, near Leamington. The girl went upstairs to assist in rescuing younger members of the family and was overcome by smoke.

A meeting of the creditors of the London Motors, which has made an assignment, was held on Monday. It is stated that more than \$300,000 had been raised by London workers and Western Ontario farmers for the company.

The death occurred at Strathroy Friday of Louis Letts, a well-known and highly respected citizen. Mr. Letts underwent a minor nasal operation recently, and, failing to take proper precautions, developed septicaemia. He conducted a market garden and a few months ago inherited a considerable fortune from a brother in California who was a multimillionaire. He was an Englishman by birth, and is survived by a widow.

The semi-final event of the men's singles tournament resulted as follows:—E. A. Mayhew defeated Rev. D. G. Paton by 6-3 and 6-1, and G. A. Dickson defeated C. Bechill by 6-1 and 6-0. Keen interest was taken in the final event, when Mr. Mayhew and Mr. Dickson displayed unusual skill in hard-fought games. The first round was a draw, the score being—1st set, 7-5 in favor of Mr. Dickson; 2nd set, 6-4 in favor of Mr. Mayhew; 3rd set, 10-10. In the second round Mr. Mayhew defeated Mr. Dickson by 6-4 and 7-5, and won the 1924 championship medal presented by the club.

A ladies' doubles and men's doubles tournament is scheduled for this week. Each member was given an opportunity to choose a partner.

FAIR A SPLENDID SUCCESS

Large Crowds and Good Exhibits at Glencoe Exhibition

Weather conditions that were ideal and excellent exhibits in all departments characterized the forty-ninth annual fall exhibition of the Mosa & Ekfrid Agricultural Association held at Glencoe on Wednesday and Thursday of last week.

The attendance exceeded the average, although not quite so large as last year. It certainly would have been much larger had not the lateness of the season kept many farmers busy seeding and doing other outdoor work that demanded every moment of fine weather to be taken advantage of.

Glencoe fair always does better than it deserves, and this year was no exception to the rule. Particularly was this noticeable in the live stock exhibits, and the fact that the directors had recently prepared new and convenient pens was a matter favorably commented upon. Then the prize list was one of the most attractive that has ever been offered for competition. Added to this were splendid amusement features, which included music by the recently re-organized Glencoe brass band, and pipers and dancers from London, not to speak of that delight of the young people, a merry-go-round.

Especially meritorious among the exhibits might be mentioned the general purpose and heavy horses. Light horses were not so well represented, but the standard was high. The quality of the sheep and hogs showed improvement. Poultry was also good and the judge said he had never encountered keener competition.

In the hall the grain and roots samples, were exceptionally good. There was also an attractive display of fruit, but it was noticed that the apples were not so highly colored as usual, no doubt owing to the limited amount of sunshine during the summer months. The display of ladies' fancy work averaged up fairly well. Probably the largest display in their several departments in years was in the dairy and domestic science classes.

Viewing the fair from every standpoint it was well above the average as local fall fairs go and was a decided credit to the fair board. The officers and directors this year are as follows: Officers—President, D. W. Gillies; 1st vice-president, A. B. McDonald; 2nd vice-president, Chas. Willey; secretary-treasurer, R. W. McKellar; directors—Dan McKellar, J. D. McKellar, John C. Gillies, Munro Leitch, H. McTaggart, J. McRae, J. L. Tait, George Walker, F. I. Abbott, F. M. Siddall, N. McKellar, J. A. McLachlan, Peter Duncanson, T. Henderson, Wm. Coulthard.

There were four entries in the 215 class and this race proved to be the best on the program. The result was: William Brino (A. J. Martin, of Chatham) 1 1 1; Mack Darian (D. McLean, of Chatham) 3 2 2; Pilot Unco (M. Pierce, of Bothwell) 2 4 4; Odeen L. (James Wallace, of Alvinston) 4 3 3; Time—2:34, 2:19, 2:19.

In the 250 class some excellent racing was shown, but in all it was not equal to that of the other class, stated the judges. The result was: Hal Unko (J. Snickenburger, West Lorne) 1 1 1; Bell Boy (J. Wilson, of Wardsville) 2 2 2; Maudie Mitchell (D. Laugh-ton, of Appin) 3 3 3; Time—2:24, 2:20, 2:25.

The races were carried out under the supervision of the Ontario Racing Association, with Ed. Douglas and Robert Douglas acting as judges. W. Tolmie was starter and J. A. McLachlan acted as timekeeper.

The Prize List

Horses—Heavy Draft: Brood mare with foal—D. D. Johnston, D. J. McKellar, D. P. Campbell. Foal of 1924—D. D. Johnston, D. P. Campbell.

Gelding or filly, 3 years—P. Johnston. Gelding or filly, 2 years—Geo. Vosburg, Neil McLean.

Colt or filly, 1 year—D. D. Johnston. Span, mares or geldings—Thomas Kerr, Peter Duncanson, Clifford Graham.

Agricultural: Brood mare with foal—Thos. McDonnell, Webster Bros. Foal of 1924—Thos. McDonnell, D. J. McKellar, Webster Bros.

Gelding or filly, 3 years—Nelson E. Whitlock, Walter Hallstone, Neil McLean.

Gelding or filly, 2 years—David (Continued on page 8)

ALEXANDER MCGOUGAN DEAD

Professor in Saskatchewan University, and Former Glencoe Boy

Word was received at Glencoe on Monday of the death at his home in Saskatoon, Sask., of Alexander G. McGougan, B.A., Ph.D., professor of physics in Saskatchewan University. Deceased was in his usual health up to Saturday last, when he was stricken with paralysis, passing away on Sunday.

Dr. McGougan was a son of the late Malcolm McGougan, of Ekfrid, and of Mrs. Euphemia (Brodie) McGougan, now of Vancouver, and was the youngest of a family of six boys. He was born on his father's farm in Ekfrid township, near Glencoe, and received his primary education in the public school of S. S. No. 7, Ekfrid, and the Glencoe high school. He graduated at McGill College with first-class honors and gold medal after which he was engaged on the staff of New Haven University, leaving there to accept the position of professor of physics in the University of Saskatchewan, which position he held at the time of his death.

Dr. McGougan is survived by his widow, his mother and four brothers. The brothers are Angus, Archibald and Rev. Edward, of Vancouver, B. C., and Malcolm, of Okotoks, Alberta, former manager of the Traders Bank at Glencoe, and recently nominated to represent Okotoks in the Alberta Legislature. The eldest brother, Dr. Hugh, of Thamesford, died a few years ago.

The funeral is being held at Saskatoon.

FIELD AND TRACK MEET

Preparations for the athletic event of the year—W.O.S.S.A. field and track meet—are completed, and an immensely interesting time is looked forward to on Friday. The sports, 25 events in all, will be held on the agricultural grounds commencing at 10 o'clock. In the Methodist school room in the evening there will be a banquet and presentation of medals, etc.

Schools participating in the sports will be Alvinston, Glencoe and Rodney.

The occasion is bound to be one of great interest and should attract a large gathering.

THANKSGIVING SERVICES

Harvest thanksgiving services were held in St. John's church on Sunday, September 28th, the special preacher at the morning service being Dean Starr, of St. George's Cathedral, Kingston. His text was Deut. 8: 2: "And thou shalt remember all the way which the Lord thy God hath led thee." After a brief description of some salient points in Canadian history leading up to Confederation and the late war, he traced the growth of the Anglican Church in this Dominion, the beginning and gradual expansion of its missionary enterprise, concluding with an appeal for a wider vision and increasing realization of needs and responsibilities. Special harvest hymns were sung at both services. In the morning the anthem "The Earth is the Lord's and the Fulness Thereof" was well rendered by the choir, and in the evening the choir sang the anthem "Make a Joyful Noise Unto the Lord." The church was beautifully decorated. The offertory exceeded \$87.

On Tuesday evening, in connection with the harvest home, the ladies of the church served one of those splendid dinners for which they are noted. The dinner was served in the school room and was largely patronized by the Glencoe public.

DEATH OF WM. NETHERCOTT

The death occurred at the family residence in Mosa on Saturday of William Albert George Nethercott, in his 70th year, after a short illness of pneumonia. Mr. Nethercott was born in Darlington township, Hampton, near Toronto, and resided in Mosa practically all his life. He leaves, besides his widow, five sons and five daughters—Mrs. John Webster, of Dutton; Mrs. David Snyder, of Glencoe; Mrs. Mortimer Wilson, of Aldborough; Mrs. Hill, of London; William, of Ekfrid; Fred, of Mosa; Lorenzo, of Aldborough, and Benjamin, Percy and Carrie, at home; also one brother and one sister—Alfred Nethercott, of Mosa, and Mrs. John Cooke, of Detroit.

Funeral services were held at his late residence on Monday afternoon, with interment in Oakland cemetery. The pallbearers were Joseph Simpson, Jack Simpson, Harper Robinson, William Atkinson, Jack James and George Foy.

SCHOOL FAIR AT GLENCOE

Attractive Display and Exhibits a Great Credit to the Young

Words of encomium were not lacking from the large crowds who attended the school fair held here on Thursday by the Department of Agriculture in connection with the Mosa & Ekfrid Agricultural Exhibition. All schools taking part had a full complement of entries in the exhibition classes and the tables in the big tent where the exhibits were housed were full from end to end.

School work was the outstanding feature, the writing, pictures, and weed and seed collection being excellent. The greatest number of entries were in the vegetable and home cooking sections. The cooking showed considerable ability in the culinary art by its youthful exhibitors, and the vegetables were uniformly of good standard. The flower show, which was considerable, consisted of phlox, zinnias, asters, cosmos, calendula and table bouquets (all home grown) and did much to add a brightening air to the general atmosphere of cheerfulness evident throughout.

The further story of the fair is told in the prize list, which follows: Oats, 1 qt.—Munro Campbell, D. N. McCracken, C. McCracken, Jack Roycraft, Duncan Gould.

Oats, sheaf—Malcolm McVicar, Willie Hallstone, Jack Roycraft, Leland Innes, Willie and Alfred George, Chas. McCracken, Duncan Gould.

Barley, 1 qt.—Munro Campbell, James Mitchell.

Barley, sheaf—Jack Roycraft, Jas. Mitchell, Douglas Cornfoot.

Corn, Golden Bantam, ears—Misa Purcell, Albert Squire, Sarah Campbell, George Blacklock, Zehla Munro, Dorothy Diamond, Douglas Davidson.

Corn, Golden Glow, ears—David A. McRae, Lloyd Little, Gertrude Purcell, Jimmie Grover, Janet McMurphy, Duncan Crawford, Munro Campbell.

Corn, Golden Glow, sheaf—Lloyd Little, Gertrude E. Purcell, Munro Campbell, Janet McMurphy, Duncan Campbell, Jimmie Grover, Norman E. Squire.

Potatoes, Doonleys—Ellen Berdan, Duncan Gould, D. N. McCracken, Willie Hallstone, Alfred Sharp, Donald Calderwood, Kenneth Gillies.

Potatoes, Irish Cobbler—Kenneth McRae, J. Brand, Bertha Hills, Miriam Smith, Marjorie McRae, Mildred Blacklock, Alice Pole.

Mangolds, Yellow Leviathan—John D. Mitchell, George Berdan, Duncan Leitch, Allan Purcell, Marion Tait, Hugh McCracken, Virginia Clarke.

Turnips, Purple Top Swede—Willie Hallstone, Eugene Gould, Douglas Allan, Archie McKellar, Jean McTavish, Florence Hills, George Smith.

Beets, Detroit Dark Red—Glenn Waterworth, Willie Hallstone, Allan Wilson, Leah Tomlinson, Evelyn Siddall, Clarence Ford, Willie Eddie.

Carrots, Chantenay—Willie Hallstone, Harley Lease, Bessie Hills, Sarah Campbell, D. M. Stevenson, Edwin Gould, Eugene Lamont.

Onions, Yellow Globe Danvers—Willie Hallstone, Faye Waterworth, Edwin Gould, Vera Diamond, Hugh McAlpine, Katharine Gillies, O. Van Pottelberge.

Parsnips, Hollow Crown—Jack Roycraft, Willie Hallstone, Viola Munro, Helen E. Clarke, Ronald Whitehall, M. E. Coad, Katharine Gillies.

Asters, Giant Comet—Bessie Hills, Jean McTavish, James Smith, Margaret Dobie, Anna Belle Gates, Norman Innes, Grace Graham.

Zinnias—Geo. Blacklock, John McMurphy, Campbell Miller, Mary A. Dobie, Munro Campbell, Cecelia Calderwood, John A. Dobie.

Cosmos—Lillian Hagerty, Marie Hyndman, Campbell Miller, Helen McKellar, Lloyd Munford, Helen E. Clarke, Grace Graham.

Marigolds—Kenneth Davidson, James Mitchell, Jean McTavish, Viola Diamond, Douglas McIntyre, Vera Munro, Munro Campbell.

Verbenas—Bertha Hills, Katharine Gillies, Misa Purcell, Mae Blacklock, Rena Whitehall.

Table bouquet—Douglas Davidson, Douglas Livingston, Kenneth York, Sarah Campbell, Roy Munford, Marion Tait, Jack Roycraft.

Cockered, bred-to-day Barred Rock—Florence Hills, Marjorie McRae, Leland Innes, Bertha Hills.

Pullet, bred-to-day Barred Rock—Bertha Hills, Jimmie Grover, Florence Hills, Marjorie McRae.

Pen, from 1924 eggs—John D. Mitchell, Jimmie Grover, Duncan McMurphy, Bertha Hills.

Pen, from 1923 eggs—Florence Hills, Jimmie Grover.

Calf, beef—Kenneth Miller, Duncan McMurphy, Jimmie Grover.

Lamb, ewe or wether, short-wooled—Bruce Brown.

Apples—Douglas Livingston, Mary (Continued on page 4)

Dominion News in Brief

St. John's, Nfld.—The hunt for fur is extending northward each year, according to officials of the Hudson's Bay Co. and Revillon Freres. These have already despatched their steamers on their annual tour of the northern ports which each season are being located farther and farther north as the field of the pelt hunters is extended into the Arctic. The Hudson's Bay Co. now has a numerous chain of posts in Baffinland and other areas north of Hudson Strait. Two years ago the company undertook to establish a herd of reindeer in Baffinland with a view to augmenting the meat supply of the region.

Halifax, N.S.—One thousand tons of gold arsenical concentrates left here during the week for Antwerp. This shipment, the first of any volume to be made from Canada, was purchased from the Clark Gold Mines Corp. for the English Government and will be used in connection with a new English process in the manufacture of dyes. The consignment is bound for a large plant at Antwerp recently erected by the British Government.

Montreal, Que.—With eighty-seven tramp steamers now chartered to load grain here for Europe in the near future, seventy-six of them during the present month, active preparations are in progress at the port of Montreal for the biggest rush of grain ever known on the St. Lawrence. The number of steamers now chartered constituted a record for the period.

Toronto, Ont.—The Canadian National Exhibition crossed the million and a half attendance mark for the first time in history. The figures for the closing day were 148,000, bringing the 1924 total to 1,519,000 as compared with 1,403,000 in 1923, the previous high record, showing a gain of 26,000. Financially the fair was a success. Receipts are expected to be about \$1,100,000 and it cost about \$750,000 to stage the great fair and operate it, the prize list alone reaching the total of \$85,000.

The Pas, Man.—An area of approximately 10 acres of Crown land, situated at either mile 137 or mile 185 on the Hudson Bay Railway, is to be placed under cultivation as a demonstration farm by the Federal Dept. of Agriculture. The object will be to demonstrate growth and maturity of all garden vegetables, grains and grasses which may prove commercially practicable.

Saskatoon, Sask.—It is the belief in Saskatoon that the ranching venture of the Prince of Wales must be a paying proposition. The Saskatoon industrial board has just mailed a cheque for \$501 to the E.P. ranch, this being the amount won by the prince's exhibits at the 1924 Saskatoon fair.

Lethbridge, Alta.—In this the first year of the operation of the Lethbridge Northern Irrigation district, some 30,000 acres out of the total of 105,000 acres possible of irrigation have been put under the water. Several farmers irrigated upwards of 200 acres.

Vancouver, B.C.—If Vancouver develops as much in the next two years as officials of the Imperial Oil Co. of Canada, with headquarters at Toronto expect, the company will erect a modern ten-storey office building here to cost in the neighborhood of half a million dollars, according to information received from Toronto by the local manager of the company.

Here is one of the many beautiful rural scenes on the Prince of Wales' ranch in Alberta.

PRINCE OF WALES ARRIVES AT CALGARY

Sleet Storm Sweeps Prairie City as Royal Train Pulls Into Station.

A despatch from Calgary says:—With a driving sleet storm sweeping the city, Edward, Prince of Wales, arrived in this city at 8:29 o'clock on Thursday night. The royal special stopped here forty-six minutes, afterward proceeding to High River, where the royal rancher spent the night on board his train. On Friday he motored to the E. P. Ranch.

The Prince is suffering from a slight cold which he contracted on his trip across the continent. There was only a handful of people to greet him at Calgary, for the movements of the train had been shrouded in mystery and the public put off the scent by the announcement that the train would not come to the depot, as it did.

There was no official welcome although the Prince was informally greeted by Mayor Webster, Inspector Spalding of the R.C.M.P., and Senator Loughheed.

Foreign Minister Dr. Edouard Benes of Czechoslovakia submitted to the disarmament committee of the League of Nations recently the draft of a protocol which is designed to outlaw all war and insure a reign of peace throughout the world.

Monday, November 10th, "Day of Thanksgiving"

A despatch from Ottawa says:—The King's proclamation declaring Monday, November 10th, (Armistice Day), "a day of general thanksgiving throughout Canada," is published in this week's issue of the Canadian Gazette.

An outstanding feature of the Dominion's field production this year is the fact that every grain in Ontario shows an increase over last year, and the province has one of the best all round crops in some years.

Mr. Asquith, aged Liberal and former premier of Britain, celebrated his 72nd birthday recently at his country home near Abingdon, England. He is shown with Mrs. Asquith on the grounds of the estate.

CHINA DESIRES SEAT ON LEAGUE COUNCIL

Viscount Ishii Pleads for Foreign Nationals.

A despatch from Geneva says:—Indications that the Far Eastern countries, especially China and Japan, will stand together in insisting upon all their rights before the League of Nations, Japan came out squarely in favor of granting China a seat on the Council of the League as a great Asiatic power, thus giving expression to Anglo-Chinese solidarity. Persia also backed China's insistence that the great geographical divisions of the world, the principal races and the chief sources of wealth should all be represented in the distribution of Council seats, and urged that China be given a seat because Asia is the largest country in the world, containing half the human race.

Through the unanimous adoption of a resolution favoring the allocation of seats on the basis of geographical divisions, it would seem likely that the present number of non-permanent seats, which is six, will be increased, so as to include China and perhaps some other countries.

Another feature of Thursday night's session of the Assembly was an address by Viscount Ishii, on the question of equitable treatment of foreign nationals in the domain of international commerce, upon which the permanent Economic Commission of the League submitted a preliminary report. Viscount Ishii declared that Japan attached great importance to this question, for she considered that it was one of the most important tasks of the League to see to it that "no member of the League is subject to any unjust discrimination in its international activity in the field of economics."

"In order to facilitate peace and insure the progress of the world," he continued, "it is necessary that the peoples should respect one another. The question of the equitable treatment of foreign nations is a gauge of the evolution of the League of Nations. In the last month the dawn of a new era of peace and mutual understanding has been rising in Europe."

Canadian cheese has found a splendid market directly through the British Empire Exhibition, according to one of the Dominion's trade commissioners. Eight thousand pounds of cheese per week is used in the grounds by the caterers and they have also introduced it in all the London cafes. A Canadian dry milk dealer has just sold his output for the next five years to a British firm, an output valued at \$800,000. The Canadian fruit display, he stated, had brought European orders for more than 1,000,000 boxes.

BRITAIN ATTACHES GRAVE SIGNIFICANCE TO TURK RAIDS IN IRAK

A despatch from London says:—Apprehension is expressed in British official circles that grave consequences may ensue because of alleged Turkish incursions into Iraq. Lord Paolucci brought the controversy before the League of Nations and it is now a subject of correspondence between London and Ankara.

The Turkish and British claims are mutually contradictory and wholly divergent. Consequently, long parleys may take place before the atmosphere is cleared. The British fear that in the meantime an incident may occur involving the loss of human life, thereby precipitating a crisis of the first order.

The British view is that under the

terms of the treaty of Lausanne, Turkey promised to abide by the status quo prevailing at the time the treaty was signed pending settlement by the settlement by the Council of the League of the frontier dispute.

The Turks dispute the British interpretation of the Lausanne treaty regarding the boundaries between Iraq and Mosul, and declare that Turkey has never ceased to maintain her rights in the Mosul territory, which her troops have entered. This claim, if justified, would vindicate Turkey's incursions into the disputed territory. As neither nation, however, at this juncture is disposed to concede the other's position with reference to the Lausanne treaty, the controversy may be prolonged.

The Week's Markets

TORONTO.
Man. wheat—No. 1 North, \$1.68 1/2; No. 2 North, \$1.49 1/4.
Man. oats—No. 2 CW, 64 1/2c; No. 3 CW, 63 1/4c; extra No. 1 feed, 68 1/4c; No. 1 feed, 62 1/2c; No. 2 feed, 60 1/4c.
All the above c.i.f., bay ports.
Am. corn, track, Toronto—No. 2 yellow, \$1.30.
Del. Montreal freights, bags included: Bran, per ton, \$27; shorts, per ton, \$29; middlings, \$35; good feed flour, per bag, \$2.05.
Ont. oats—No. 3 white, 48 to 50c; No. 2 white, \$1.16 to \$1.18; No. 3 winter, \$1.14 to \$1.18; No. 1 commercial, \$1.11 to \$1.15, f.o.b. shipping points, according to freights.
Barley—No. 2, 79 to 82c.
Buckwheat—No. 2, 90c.
Rye—90 to 93c.
Ont. flour—New, ninety per cent. pat, in jute bags, Montreal, prompt shipment, \$5.75; Toronto basis, \$5.75; bulk, seaboard, \$5.50.
Manitoba flour—First pat, in jute sacks, \$8 per bbl.; 2nd pat, \$7.50.
Hay—No. 2 Timothy, per ton, 19 1/2c; No. 1, 20c; timothy, 21c to 22c; clover, 23 to 24c; twine, 24 to 25c; triplets, 25 to 26c.
Butter—Finest creamery prints, 38 to 39c; No. 1 creamery, 35 to 37c; No. 2, 34 to 35c; dairy, 28 to 30c.
Eggs—Extras, fresh, in cartons, 45c; extra, loose, 43c; firsts, 35c; seconds, 30 to 31c.
Live poultry—Hens, over 5 lbs., 20c; do, 4 to 5 lbs., 17c; do, 3 to 4 lbs., 15c; spring chickens, 2 lbs. and over, 25c; roosters, 12c; ducklings, 4 to 5 lbs., 18c.
Dressed poultry—Hens, over 5 lbs., 26c; do, 4 to 5 lbs., 22c; do, 3 to 4 lbs., 18c; spring chickens, 2 lbs. and over, 30c; roosters, 15c; ducklings, 4 to 5 lbs., 25c.
Beans—Canadian, hand-picked, lb., 6 1/2c; primes, 6c.
Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal.; maple sugar, lb., 25 to 26c.
Honey—Clover, 13 1/2c; alfalfa, 14 1/2c; 10-lb. tins, 12 1/2c; 5-lb. tins, 14 1/2c; 2 1/2-lb. tins, 15c.
Smoked meats—Hams, med., 27 to 29c; cooked hams, 40 to 42c; smoked rolls, 18 to 20c; cottage rolls, 21 to 24c; breakfast bacon, 23 to 27c; special brand breakfast bacon, 29 to 31c; backs, boneless, 33 to 38c.
Cured meats—Long clear bacon, 50 to 70 lbs., \$17.50; 70 to 90 lbs., \$18.50; 90 lbs. and up, \$19.50; lightweight rolls, in barrels, \$33; heavyweight rolls, \$27.
Lard—Pure, tierces, 17 1/2 to 18c; tubs, 17 1/2 to 18 1/2c; tins, 18 to 18 1/2c; shortening, tierces, 16 to 16 1/2c; tubs, 16 1/2 to 17c; tins, 17 to 17 1/2c; prints, 18 to 18 1/2c.
Export steers, choice, \$7 to \$7.50; butcher steers, choice, \$5.50 to \$6; do, good \$5 to \$5.25; do, com. to fair, \$3 to \$4.75; butcher heifers, choice, \$5.25 to \$5.50; do, good, \$4.75 to \$5; do, com., \$3.50 to \$4.25; butcher cows, choice, \$4 to \$4.50; do, fair, \$3 to \$3.75; do, canners and cutters, \$1.50 to \$2.50; butcher bulls, good, \$3.50 to \$4.25; do, fair, \$3 to \$3.50; do, bologna, \$2.50 to \$3; feeding steers, good, \$5.25 to \$5.50; do, fair, \$4.50 to \$5; stockers, good, \$4.50 to \$5; do, fair, \$4 to \$4.50; calves, choice, \$10 to \$11; do, med., \$8 to \$10; do, grass-fed, \$4 to \$5; milch cows, choice, \$7.50 to \$9; springers, choice, \$8 to \$10; plain cows, \$4.5 to \$6; good light sheep, \$7.50 to \$8.50; heavies and wicks, \$4 to \$5; culls, \$2 to \$4; good ewe lambs, \$1.50 to \$2; bucks, \$9.50 to \$10; culls, \$3 to \$5; hogs, fed and watered, \$9.50 to \$10.10; do, f.o.b., \$9.25 to \$9.50; do, country points, \$9 to \$9.25; do, off cars, \$10.25 to \$10.50; do, select, fed and watered, \$10.85 to \$11.10.

MONTREAL.
Oats, Can. west, No. 2, 70c; do, No. 3, 69 1/2c; extra No. 1 feed, 68 1/4c. Flour, Man. spring wheat pat., 1st, \$8; seconds, \$7.50; strong bakers', \$7.30; winter pat., choice, \$8 to \$8.10; rolled oats, bag 90 lbs., \$3.55 to \$3.65. Bran, \$7.25. Shorts, \$9.25. Middlings, \$15.25. Hay, No. 2, per ton, ear lots, \$16.50 to \$17.
Cheese—Finest west., 17 1/2 to 17 3/4c; finest eastern, 17 to 17 1/4c.
Butter—No. 1 pasteurized, 36 1/2c; No. 1 creamery, 35 1/2c; seconds, 35c.
Eggs—Storage extras, 42c; storage firsts, 36c; storage seconds, 30c; fresh extras, 48c.

At the annual meeting of the Canadian Automobile Association it was announced that outside of Ontario there remained but a solitary link to connect up a Dominion transcontinental highway, and that contracts for the completion of this connection which was in the Rockies has now been let by the British Columbia Government.

H.R.H. PLEASED WITH RANCH IMPROVEMENTS

Will Spend Six Days on Farm and Visit Several Western and Eastern Cities.

A despatch from High River, Alta., says:—Complete satisfaction with the condition of the ranch buildings and live stock was expressed by the Prince of Wales, when he made his first inspection trip over his ranch Friday. Although somewhat fatigued by his four-day train journey, and suffering from a severe cold in the head, the Prince, accompanied by Gen. Trotter, Sir Walter Peacock and Prof. W. L. Carlyle, inspected the buildings, paying particular attention to the new barn now in course of erection, and after the live stock had been inspected, he rode the range for a couple of hours. He returned to the ranch house shortly after 5 o'clock and enjoyed a hearty dinner.

The Prince spent the remainder of the evening reading and smoking his favorite pipe. He also tuned in for the special radio concert from Calgary, and before retiring he wrote several letters. No visitors were received on the first day of his holiday.

Cutting his visit to the ranch this year down to six days, the Prince of Wales leaves here on Wednesday evening for Vancouver, arriving there on October 4, and crossing the next day to Victoria. He returns to Calgary on October 9, and then proceeds immediately to eastern Canadian points.

The main thought now of Grand Duke Cyril, cousin of the late czar of Russia, is to gain the throne of his country. He says he will rid the country of the Communists and allow religious liberty.

Australia and Canada Conclude Trade Treaty

A despatch from Ottawa says:—It was announced by the Prime Minister on Thursday that the negotiations with Australia which have been carried on for several months by the Hon. James A. Robb, Acting Minister of Finance, and the Hon. Thomas A. Low, Minister of Trade and Commerce, have resulted in the conclusion of a trade agreement between the two Dominions. The agreement is of a reciprocal nature, granting the Dominion of Canada preference in many lines of export, in return for which Canada agrees to extend equally favorable treatment to various Australian products.

London-Paris Planes Every Half Hour Soon

A despatch from London says:—Half-hourly aerial services between London and Paris will be inaugurated as soon as a sufficient number of sixteen-seater air expresses have been built for Imperial Airways, a British concern. Americans, who constitute four-fifths of the air passengers between the British and French capitals, will be able to fly without making reservations, completing their journey in two and one-half hours from terminus to terminus.

Experts consider frequent services of this sort best for short distances, while bigger machines, carrying fifty passengers, should be used on trunk lines to Moscow, Constantinople and Egypt.

RICH TREASURES IN ISLANDS OF ARCTIC

Resources of Far North Disclosed by Intrepid Explorer, Capt. Bernier.

A despatch from Quebec says:—The long discussed question as to whether the Dominion of Canada will ever benefit materially from the mineral riches of the northern islands in the vicinity of the Arctic Circle, many of which have been claimed for Canada in recent years by Captain J. S. Bernier, noted adventurer and Arctic explorer, would appear to be more or less definitely settled with the arrival of the "Arctic" at this port.

That there is every reason to be enthusiastic over the almost limitless possibilities in regard to the mineral development of the far north country, was the keynote of statements made by members of the expedition to the Canadian Press, the information being given out that, perhaps, in a short period of time, the agents of the Federal Government will take steps to open up and develop what are considered to be huge treasures in mineral ore.

F. M. D. Henderson, of the Northwest Territories and Yukon branch of the Federal Department of the Interior, stated in the course of an interview, that although it would be a little premature to speak with exactitude as to the wealth of the northern islands, he and all concerned were strongly of the opinion that the resources there might prove to be of such a vast and wealthy nature as to astonish the civilized world.

The "Arctic" went as far north as Kane Basin, on the northeastern coast of Greenland.

Dependent Children.

Home-finding as a method of providing for neglected and dependent children is now fully recognized as being in the best interests of both the child and the community. The child is placed under normal conditions with the opportunity of forming life-long attachments, while for the community there is the gain in social adjustment and economy. No child philanthropy can be considered progressive and efficient which does not aim to secure for the homeless child a safe place in some family circle. Taking this for granted it follows naturally that there must be a complete and comprehensive plan of supervision.

On this point Mr. J. J. Kelso very truly says: "Too much importance cannot be attached to this branch of child-protection work. If it is carefully done and correspondence relied upon for information instead of a personal visit, the home-finding movement will be brought into disrepute and the happiness of many a child completely wrecked. Visiting should be done, but in such a tactful way as to ensure the protection of the child and at the same time retain the good will of the foster parent."

When it is clearly established that the child has become deeply rooted in the affections of the foster parents, provision is made for legal adoption and once that is accomplished all supervision ceases and the child becomes an integral part of the family. This excellent law should be more generally known to those who have opened their homes to a friendless child, for it gives them a protection not always possible in past years.

Building.

When a house is reared, each brick laid, each nail driven, each rafters in place finds its position on the basis of all that was done up to that moment. There must be a solid underpinning that the superstructure may be substantial. It is impossible to derive a rock-bottom stability from a quick sand foundation.

The structure of society depends on the performance of each man in his place through the generations. Age builds on age; and as we come on the scene we inherit the fruit of the toil and travail of civilized mankind before us. In our turn we are bound to leave "a going hence some immemorial thing." All we can do is to live our lives as well as we know how to live them and leave the issue with the Master-BUILDER whom the stars obey.

A good name, like the inferior fortune that is money, is a matter of accretion. The good neighbor and useful citizen is known to-day by what he has been consistently for many years. In rare instances, which headlines seldom fail to emphasize, the pillar of church and state topples suddenly to ruin; and there is grief, with general amazement. When we see such a collapse, we must remember the infinitely small proportion measured with the number of those who continue to justify the affectionate general confidence.

That public esteem is worth a man's ceaseless effort to acquire; and it is better to uphold such a reputation than to rear the most colossal of the houses made with hands.

The Difficulty.

Poultry Farmer—"You'd be surprised what a difference these incubators make. We can hatch out two or three hundred chicks every week."

Dog Breeder—"Good Gracious! How ever do you manage to find names for them all?"

Sincerity and common sense make a passport anywhere.

Dr. Fridtjof Nansen explorer and Norwegian representative at the league of nations, who has left for Berlin to try to persuade Marx and Stresemann to request admission to the league on behalf of the Vaterland.

USED FLAGGED MAP TO SHOW ROYAL ROUTE

Canadian National Agents in Britain Cleverly Exploiting Trip of the Prince.

A despatch from London says:—The Canadian National Railways publicity department is cleverly exploiting the Prince of Wales' journey over the National Railways. In the windows of over three hundred agents in England and Scotland a large map is placed, flagged along the route to indicate the chief points through which the prince's train passes, a large flag is waved daily to indicate the location of the prince's train.

Crowds are to be seen continuously outside the windows studying the representation with interest and incidentally acquiring a knowledge of Canadian geography.

Sea Weather Maps Made by Experts on Liner

On arrival at Liverpool in the Cunard liner Carmania from Canada, Sir Napier Shaw, professor of meteorology, Imperial College of Science and Technology, South Kensington, said that on the way out to Canada, from the decks of the Caronia, and by means of wireless, a meteorological map of the northern hemisphere was made.

He added that this is the first time such a thing has been done on board ship at sea.

Sanguinary Battle is Raging in Honduras

A despatch from Tegucigalpa, Honduras, says:—A sanguinary battle between the Government forces and the rebels has been raging for the past 24 hours around Comayagua. No details have yet been received as to the exact situation of the contending armies.

Government troops have recaptured Santa Rosa, Copan and La Esperanza from the rebels.

On the North American continent the British possessions are larger by nearly 100,000 square miles than those of the United States.

CANADA'S LIVESTOCK INDUSTRY

After the various vicissitudes experienced of recent years, and the being buffeted between the United States and British markets according to the vagaries of tariffs and embargoes, Canadian livestock producers would seem to have reached a realization that it is a poor policy to remain dependent upon a single source for the disposal of their produce, and are seeking a remedy for periodically recurring ills in a wider expansion of markets. In the movement to go farther afield in the vending of their products, which is markedly evident at the present time, may be foreshadowed brighter and more staple times for Canadian livestock producers.

In the first six months of 1924 Canada exported 32,179 cattle to Great Britain and 40,955 to the United States, as compared with 30,029 head to Great Britain and 23,659 head to the United States in the same period of 1923. The total shows an increase amounting to 18,991 in favor of the present year, an increase of 35 per cent. The number of livestock marketed in England and Wales during the first 26 weeks of the year amounted to \$9,148 fat cattle and 95,934 stores as compared with 163,867 fat cattle and 234,804 offered during the corresponding period of last year.

Beef, Bacon, Pork and Mutton.

In addition to these live exports there were exported 10,838,500 pounds of beef, of which 2,314,000 pounds went to Great Britain and 6,307,500 went to the United States; 51,510,200 pounds of bacon, of which 50,929,400 pounds went to Great Britain and 228,800 to the United States; 4,632,100 pounds of pork, of which 2,335,600 pounds went to Great Britain and 482,600 pounds to the United States; and 79,200 pounds of mutton, of which 20,300 pounds went to the United States. Some progress has been made in the co-operative marketing of livestock, and the year ending in June of the operation of the co-operative cattle pool of the United Grain Growers, Ltd., was a successful one from the standpoint of the producer. For the twelve months the profits of the cattle pool amounted to \$20,870, which made possible a distribution of one per cent. on the value of their cattle to be paid to shippers in addition to the market value which they had already received. Since the pool was inaugurated in February, 1923, it has sold more than 100,000 head of cattle with a value of \$3,200,000.

Prairie Provinces Developing New Markets.

Western Canada, particularly the Province of Alberta, has become very interested in endeavoring to develop new markets for its livestock, and in this connection shipments have been made to Japan, Belgium, and to California. The Grande Prairie and Peace River Country have been furnishing a large number of winter-fed cattle for the Old Country markets, and shipments of carefully selected cattle have moved from Central and Northern Alberta with a successful outcome which would seem to augur a profitable future trade.

The Alberta Government's experimental shipment of beef cattle to Japan is especially significant. Japanese livestock dealers came from all over the country to view the stock, and were well pleased with the beef. They are anxious to have another shipment made as soon as possible, and it is believed there is possibility of a voluminous and profitable trade developing in this connection between Western Canada and Japan.

Co-operation.

It ain't the "catcher" or the "pitcher," Nor the individual play, Nor close co-operation That makes them win the day. It ain't the individual, Nor the "big league" as a whole, But the everlasting team work Of every bloomin' soul!

"Bootlegging is in its infancy." "Well, considering the kind of stuff it's being brought up on, do you think it will live to grow up?"

Autumn Dusk.

I saw above a sea of hills A solitary planet shine, And there was no one, near or far, To keep the world from being mine.

Apple-Packing School.

Instruction courses in modern methods of grading and packing apples are to be given to fruit growers at the up-to-date applepacking station shortly to be opened by the ministry of agriculture at Ottenham, Cambridgeshire, England.

Protection of Sea Fronts.

In England wood blocks set in cement, with the end grain exposed, have proved successful in resisting the grinding action of wave-driven gravel.

RED ROSE TEA "is good tea"

Fine, brisk flavor! Best of all in the ORANGE PEKOE QUALITY

Surnames and Their Origin

HOPPER
Racial Origin—English.
Source—An occupation.

The "hopper" or "hoppers" of medieval England was nothing more or less than a dancer, a professional dancer. The proof is not hard to find. It is found in passages which make its meaning quite clear. "Le Hoppers" appears coupled with "le Danseur" in accounts of the great fairs which played such an important part in furnishing amusement to the people of that age. The terms appear to have been used interchangeably.

In the English Prayer Book Version of the Psalms there is still to be found the passage "Why hop ye so, ye high hills?" and Chaucer, who gives such a good "close-up" of the life of the ordinary people of his day, says of the merry "prentice, one of his characters, that "at every bridle would he sing and hope"—that is, dance.

The "dancers" and "hoppers" of those days, however, were as hard a working crew as any professional dancers of to-day doing their two and two turns a day on the vaudeville stage. They did not have booking agencies to arrange their tours, but traveled in bands on their own initiative, staging an entertainment, which consisted of starting their dances in whatever public place they happened to be as often as they believed they could draw a generous crowd of villagers. Often they would get engagements for an evening's entertainment at the local castle.

THE PASHAH AND THE MOON

A Little Lesson in Living.

Abdul Ben Tewfik was thoroughly convinced of his own great wisdom. He bore himself with the dignity that a Pashah should, and looked down upon the creatures of his rule with a proper contempt.

It was his belief that they had been created by Allah to serve him, and, indeed, that all the beauties of the garden province of El-Har-Nazar—color, perfume, bird-song and spangled sky—existed for his joyance.

But as Abdul reclined upon his silk couch in the cool of the evening he was not happy. The sherbet tasted out of tune; even his favorite dancer seemed to lack her usual grace and abandon.

The truth is that one of Abdul's cherished plans for his own pleasure and enrichment had struck an obstacle which Abdul had, thus far, been unable either to remove or to surmount. It always pestered the Pashah when he could not get what he wanted without delay.

There being no comfort for his disturbed mind in any of the entertainment which his devoted slaves provided, he demanded the dancers, commanded the chief musician to be headed, and threw what was left of his sherbet in the chief butler's face.

His feelings somewhat relieved by this self-created diversion, he retired to his sleeping apartment.

But the soothing magic of sleep was sought in vain. He tossed restlessly. It was intolerable that circumstances should balk his will. And yet he could think of no way to overcome them. The thing he wanted lay beyond his reach, but would not be forgotten.

Hot and uncomfortable, he rose from his pillows and wandered out into his garden. He paced the paths between the fragrant shrubs and under spreading palms.

Presently he halted with an exclamation of anger. Some underling had left a great cistern uncovered. He vowed he would have the head gardener executed.

Presently he halted with an exclamation of anger. Some underling had left a great cistern uncovered. He vowed he would have the head gardener executed.

Presently he halted with an exclamation of anger. Some underling had left a great cistern uncovered. He vowed he would have the head gardener executed.

Presently he halted with an exclamation of anger. Some underling had left a great cistern uncovered. He vowed he would have the head gardener executed.

NORRIS.
Variations—Norric, Norreys, Nurse.
Racial Origin—English.
Source—Geographical and occupational.

There is no doubt that in a good many instances family names in this group originated from the occupation of nurse, or, as it was spelled in the days when family names were forming, in the days before the dominating Norman race and language had become entirely merged into the English "Norrice."

The nurse was not necessarily a woman, though most often so. Again, while women's names and occupations did sometimes give rise to family names, they did not, of course, do so generally as men's. Both of these points make it likely that only in a minority of cases, even where the modern family name is "Nurse," did the name come from this source.

All the evidence points to "le Norreys" ("The Nurse") or "le Northern," as the origin of most of these family names. Any man coming into any part of England from a more northern place would be likely to be called "le Norreys" or "le Northern," though the term also had a distinct racial meaning as indicating a Norwegian or Norseman. There was rather lively communication, too, between the two lands even in those days, when the difficulties of transportation are taken into consideration.

There are many English family names which are traceable to the other three points of the compass, too.

In the morning. Stopping over at the cistern, he looked in—wondering as to its depth—and his chance of surviving had a misstep carried him over its edge.

What he beheld brought from him a gasp of dismay.

There—floating on the placid surface of the water—lay the Moon, fair goddess of the night sky. "By Allah and the beard of the Prophet here is calamity!" he exclaimed. "The fate which might have befallen me has befallen the Moon!"

His first thought was to summon the palace guard, marshal his slaves and set all his retainers to the task of rescuing the imperiled queen of the starry heavens.

But on second thought he decided to attempt the rescue alone. Success would bring to him the greater merit, and, perhaps, so win the favor of Allah as to gain for him the removal of all barriers now frustrating his cherished plan.

Near-by, he spied a long pole which he had sometimes used for poking ripe figs from the higher boughs. Seizing it, he bent over the cistern and thrust it down into the water close to the edge of the shining disc.

Certain that its end was now under the Moon, he leaned back with all his weight, as if he would pry the celestial body from the aqueous setting and propel it upward to its place in the zenith.

The next moment he bit the turf violently with head and shoulders, and lay sprawling and breathless—a startled, pained and most undignified Pashah!

A riot of stars danced before his closed eyes! Then, as the pyrotechnics faded, he opened his lids.

His vision rested on the distant dome of heaven, and there, sailing serenely in her accustomed place was the Moon!

Pulling himself together, he rose to his feet, assumed his normal bearing of self-satisfied chestiness, and exclaimed: "Behold, O Allah, how great a work has been well performed by thy son!"

Whereat he returned to his bed—and to sleep.

And now, having smiled at the foolish vanity of the Pashah, consider, friend, how many there are no wiser than he, and whether, in some matters, you may not be among them. For this is a parable of waste motion—of waste motion prompted by conceit and ignorance.

And the world is full of it—full of self-important little people running around in circles, traveling far but getting nowhere, expending much energy but achieving nothing worth while. They mistake activity for utility and perspiration for performance.

Conceit and ignorance are the parents of futile effort. The wise man's appreciation of his own capacity is balanced by a sense of his own limitations, and the direction of his energies is governed by a knowledge of the world in which he lives, an understanding of the nature of the task to which he sets them.

He believes in vocational guidance and vocational training—in choosing the job for which he is fit, and in fitting himself the better to do the job. He plans his work, and works his plan.

He can distinguish between appearance and reality. He is not misled by reflections of the moon.

If he blows bubbles for the fun of watching them, he wastes neither time nor labor in chasing them. Conceit is a self-cheater. It fools no one but the man who indulges it. Ignorance is an unpardonable sin when unconfessed. Beware of both. You might be less fortunate than Abdul Ben Tewfik—you might fall into the cistern—S. J. Duncan-Clark in "Success."

Premature Burial.

Fears of premature burial have resulted in the formation of a society to effect reforms in the law of death certification. There is, however, nothing new in these fears.

The Egyptians kept the bodies of the dead under careful supervision by the priests previous to embalming, and until satisfied that life was extinct. The Greeks were aware of the dangers of premature burial and often cut off the fingers of a person believed to be dead before cremation.

In modern times, the fear of being buried alive has haunted many. Willie Collins had this fear, and always left overnight on his dressing-table a note solemnly enjoining that, should he be found dead, his supposed death was to be very carefully tested by a doctor.

Hans Anderson always carried a note in his pocket to the same effect. Harriet Martineau left her doctor ten pounds to see that her head was amputated before burial. Edmund Yates left twenty guineas with the provision that his jugular vein was to be severed.

Lady Burton (the widow of the famous traveller, Sir Richard Burton), who was subject to fits of trance, desired that her heart be pierced with a needle.

Premature burial is of the rarest occurrence, and it is doubtful if any authenticated cases could be brought forward.

DAWN OF WOMANHOOD

A Time of Difficulties When Watchfulness is Needed.

Some girls upon the threshold of womanhood drift into a decline in spite of all care and attention. Even strong and usually lively girls become weak, depressed and irritable, and listless. It is the dawn of womanhood—most important in the life of every girl—and prompt measures should be taken to keep the blood rich and pure. If your blood is not in a healthy condition at this stage, the body becomes ill-nourished and other ailments develop. If the health is not maintained by a sufficiency of rich, red blood, all sorts of weaknesses are likely to arise. Remember this, Dr. Williams' Pink Pills have saved thousands of girl and woman from being long invalids, because of their wonderful blood-making properties.

The value of Dr. Williams' Pink Pills to young women whose health was failing has been proved over and over again. These pills are the most reliable blood builder, fortifying weak nerves and creating the liberal supply of red healthy blood which a girl needs to sustain her strength. You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

First Turtle—"He's a pessimist, isn't he?"
Second Turtle—"Yes, a regular croaker."

The Perilous Organ of Other Days.

There was mention a little while ago in a provincial paper of the discovery of an old "church barrel organ," said to have been in the possession of one family for over a hundred years. If it is a genuine specimen of the mechanical organ which in far-off days did duty in village churches, we have reason to believe that the congregations of those churches were in considerable danger of musical confusion.

For note that while this church barrel organ was perfectly in order by reason of three hymn-tunes, it also could give out "Jim Crow," and "Penny Jones," not to speak of "Scots wha hae," and "Home, Sweet Home." What happened in those moments when the organist's attention strayed presuming that the aforetime organists were susceptible to a weakness not entirely unknown to organists of now—can be imagined. A congregation rising in its place to sing a hymn, and hearing at the organ the strains of "Jenny Jones," might reasonably be excused for unchurchlike hilarity, while the excitement of the organist can easily be imagined. Clearly, to be in command of such an instrument had its trials. Then, as now, to press the wrong button meant disaster for the organist.

Cultivating Seaweed.

Japan is the only country where seaweed is cultivated for human consumption.

Minard's Liniment for Rheumatism.

Boyhood Dreams.

Oh, boyhood dreams are very fair, The building of the castles where The sea-sands strew the shore, Or, canvass filled, before the wind, The lighthouse fading far behind, To skim the far sea o'er.

The rhythmic rise and fall of deck With ne'er a thought of gale or wreck, And youth to hold the helm, Strange seas, and stranger lands to find, And may the Fates be ever kind In distant lonely realm.

The tender mother left to weep Will there get thoughts more near and deep Than if he were on shore. For hearts may cleave through spaceless space When nearer they would spurn embrace, And leave the sheltering door.

The boy in dreams will shake the world, With banners for crusades unfurled, And stout hearts in the making, So, let him go his glorious way, His ship will come to port some day, With many dreams abreaking.
—Lorette Ballantyne.

NOTHING TO EQUAL BABY'S OWN TABLETS

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus banish indigestion, constipation, colds, colic, etc. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

1st Dog—"I saved nine lives to-day."
2nd Dog—"How was that?"
1st Dog—"Rescued a kitten from drowning."

Doing It Thoroughly. The enthusiastic girl was thrilled when she was introduced to the famous author at a dinner party. She lost no time in starting a conversation and letting him know that she was one of the keenest admirers of his latest book.

"You have no idea how very helpful I have found it, Mr. Brain!" she gushed.

"Indeed," replied the author. "In what way, may I ask?"

"Oh, it has taught me to concentrate!"

"To concentrate? That's very nice. Now tell me, what are you concentrating on at the present time?" asked the author.

"Oh," replied the girl, "lots and lots of things!"

A Farming People.

Approximately 60 per cent., or 1,252,604 of the population of Western Canada live on occupied farms. Of the balance, 474,516 live in its twenty cities and towns of over 2,500 and 228,962 in 3,309 small towns and villages of 2,500 or under.

The Motorists' Saint.

Some hundreds of French motorists recently assembled in a little village near Argentan, in Normandy, to do honor to St. Christopher-le-Jaquet, a half-forgotten saint, who is now being claimed as the patron of all who use the road.

According to legend, St. Christopher-le-Jaquet, who was of giant stature, crossed the river Jordan one dark night, when the waters ran strongly, bearing the Divine Infant on his shoulder.

Over 100,000 motorists, cyclists, air-men, and others are said to have formed themselves into a brotherhood of sportsmen whose spiritual home is the ancient church of this little Norman village, where rests a glided reliquary containing the bones of the saint.

No Difficulty At All.

Pat Macree was in search of a new house, and at last, after many weary months of unsuccessful search, he found one which he thought would be just the thing.

Accordingly he went off to see the agent.

That gentleman at once gave him the key and accompanied him on a tour of inspection.

Looking out of one of the back windows Pat remarked that the railway ran rather close to the house.

"The trains do make rather a noise," the agent admitted. "They may interfere with your sleep at first, but you'll get accustomed to that after the first two nights."

"Ah, ah, shure, O'll not want to get accustomed to it at all, sir," answered Pat, "cause O'll can easily go an' slape in me aunt's house thim couple o' nights!"

TIRED OUT ALL THE TIME

Nerves Gave Little Rest

Relieved by Lydia E. Pinkham's Vegetable Compound

Harrowsmith, Ontario.—"I took your medicine before my baby was born and it was a great help to me as I was very poorly until I started to take it. I just felt as though I was tired out all the time and would take weak, fainting spells. My nerves would bother me until I could get little rest, day or night. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and I only took a few bottles and it helped me wonderfully. I would recommend it to any woman. am doing what I can to publish this good medicine. I lend that little book you sent me to any one I can help. You can with the greatest of pleasure use my name in regard to the "Vegetable Compound" if it will serve to help others."

—MRS. HARVEY MILLIGAN, R. R. No. 2, Harrowsmith, Ontario.

In a recent canvass of purchasers of Lydia E. Pinkham's Vegetable Compound over 100,000 replies were received, and 98 out of every 100 said they had been helped by its use. This medicine is for sale by all druggists.

Before furnaces and stoves are lit for the winter, steps should be taken by all householders to have the flues and chimneys inspected and thoroughly cleaned. This is a precaution against fire that is being urged by the Dominion Fire Commission.

Public school pupils in Ontario will be relieved of much of their home work by the issue of new regulations governing the curriculum in provincial schools. Some subjects that have been criticised as being fads or frills will be eliminated also or made optional. These regulations will be made effective during the present school term.

The man or woman who smuggles, no matter what the article, is as much a lawbreaker as a person who robs a bank. He or she has taken away from the public treasury.

The question of payment of town councillors comes up frequently, and many who give fifteen minutes and thought to such matters sometimes think that some remuneration should be given. If all officers of public institutions demanded pay for service rendered, such as councillors, school trustees, members of boards of health and public libraries, the people would be taxed to death. Municipal management depends largely upon the co-operation of its citizens, and the success of our present municipal government is largely due to the feeling that to serve the public is an honor that reflects much to the credit of those engaged.—Newmarket Era.

THE FLIVVER PLANE

The "flivver" aeroplane has arrived. It is only fifteen feet long and has a wing spread of forty feet. The motor is of twelve horsepower and the little machine can get up a speed of seventy miles an hour. It will rise and land in comparatively narrow space and "take off" when going only ten miles an hour. The pilot, a Frenchman, says that the aeroplane can be built in quantity for \$400 each and that they will fly 125 miles on a gallon of gasoline.

It's the Basic Industry

When the farmer gets \$1.20 for his wheat it is good news for the cities. The man in town has learned by a very real experience that he can't go ahead one bit faster than the man on the land.—Advertiser.

THE SITUATION REVIEWED

Plebiscite Arguments, Wet and Dry, Thoughtfully Dealt With

(An address delivered by Rev. D. G. Paton Sept. 23rd at a united meeting under the auspices of the W. M. Societies of the local churches.)

In October of this year the people of Ontario are having the opportunity to express their opinion upon the future policy of Ontario in the control of intoxicants. When the vote was last taken a large majority of the votes cast were in favor of the Ontario Temperance Act, a prohibition law. Opposition to the Ontario Temperance Act then and now comes from four quarters. Taking their stand and voicing their arguments against prohibition there are four classes among the electorate:

(1) The brewers and distillers and others who have made it their business to manufacture and sell intoxicating liquors and naturally in the interest of their "business" want a more free sale of their products.

(2) The people who like "to drink" and wish to be able to have a "drink" when they want it.

(3) The people who, perhaps not drinkers themselves, feel that there are other people who like "to drink" and that they should have the liberty to indulge their desires.

(4) People who, opposed to drinking and drunkenness, have seen or heard of the Ontario Temperance Act being broken, and in discouragement say, "Things are bad under the Ontario Temperance Act. Let us try Government sale. It may stop some of this drinking that is going on."

Of all arguments against prohibition there is none less reasonable and with so weak a foundation as this last: "There is too much drinking going on now. Let us try Government sale. It may stop some of the drinking." If they would stop to think and to face the facts they would find what has been abundantly proven—that drunkenness and drinking increase in direct proportion with the opportunities for drinking. If it is easy to procure intoxicating beverages there is more drinking done. When it is difficult to procure drink there is less drinking and less drunkenness.

The official figures of commitments to gaol for drunkenness are worth noticing. During the last three years of license in Ontario there were 21,051 commitments to gaol for drunkenness. If during the next six years there had been as much drunkenness proportionate with population, there would have been 43,782 gaol commitments. But during those six years Ontario had prohibition and there were only 22,473 commitments to gaol. Under prohibition drunkenness decreased 50 per cent. It would be good if it had been decreased 100 per cent., but a 50 per cent. improvement is surely better than no improvement at all. But these figures do not tell all the story, for when we compare conditions then and now it is the observation of many that there is not one-quarter of the drunkenness now that there used to be.

But some one says: "That is a comparison of the open bar and liquor stores with prohibition. How

about a comparison of prohibition with Government sale?" Such a comparison is possible in the case of British Columbia. That province had prohibition from October 1st, 1917, to June 15th, 1921. It has had Government sale from June 15th, 1921, to the present time. During the last six months of prohibition in British Columbia the liquor sales through legitimate channels amounted to \$99,376, approximately \$100,000. During the six months ending September, 1923, the liquor sales there amounted to \$5,717,624, an increase of approximately 5,700 per cent. How can one talk about there being less drinking done under Government sale than under prohibition?

This should also be noticed about British Columbia, that the yearly average of prisoners sent to Oakalla gaol under prohibition was 511. The yearly average under Government sale has been 1,565—three times as many gaol commitments under Government sale as under prohibition. There is also reported by statistics a penitentiary prisoner increase of 85 per cent. To believe that Government sale will lessen drinking, drunkenness and crime is to believe contrary to the evidence of a province that has tried both prohibition and the other.

The argument of those who, not drinking themselves still feel that those who drink should have a chance to satisfy their desires, is the much-talked-of argument for "personal liberty." In reality no citizen in any civilized land has full and absolute liberty. There are hundreds of things in which we do not possess liberty. For instance—the liberty of a man to enter or leave his own home is surely British and just. Yet, if smallpox or diphtheria or some such disease breaks out in our home we are not at liberty to leave even our own home or to invite people in or let them out. The liberty of our own home is curtailed by law. You are not at liberty to drive your car beyond certain speeds without danger of breaking the law. Surely your children are yours, but you are not at liberty to do with them as you wish. You have to feed them, clothe them, shelter them and educate them. The law curtails your liberty even with your own family. All these and the thousand other restrictions upon our liberty are on the statute books because it is in the best interests of the state. So why, since it is an acknowledged fact, proven by science, taught in our schools, commonly known, that drinking is harmful, should there be all the qualms about restricting one's liberty. The law mentions a great many things wherein we have no liberty. Why stop at what is an ancient and well-known evil in national life?

As for the opposition to the O. T. A. of those who frankly confess that they like "a drink" and want to have it—their argument has at any rate the virtue of frankness. It may be in this coming plebiscite that there will be some of these "who will be big enough and true enough in their citizenship to remember with an open mind the trail of woe left by the liquor traffic in the days of the past and to compare those days with conditions under prohibition, and in spite of personal preference vote for

what they can see to be the more reasonable policy.

To consider the first mentioned class of those opposed to the Ontario Temperance Act—brewers, distillers and others engaged in the traffic—this small though influential section of the provincial population are the only ones who would benefit materially by taking the backward step of opening up the sale of liquor. In hundreds of homes, thousands of homes, where a weakness for drink exists, men, women and children would lose—lose money, comforts, home life, happiness. If the province "goes wet" in October communities would lose—would lose the peace and quietness of sober times, would lose much of the safety on the roads which is now enjoyed. It is to be remembered that the automobile traffic now is different from the horse and buggy traffic of the "wet days" some years ago. If the province "goes wet" in October, business men, manufacturers and employees would lose. Most people have no more money than will meet the ordinary expenses of life and it follows that if some of that money goes for drink there will be that much less for spending on food, clothes, home comforts and luxuries and other commodities. But if the province "goes wet" in October, those engaged in manufacturing and selling "drink" will suffer no loss—what is loss to the great bulk of the people of the province is gain to them. Whose interests are more important, the interests of the many or the interests of the few?

But some one says: "The Government reaps the benefit and taxes will go down." It should be remembered that the Government under Government sale merely sells—it does not manufacture. It acts as an agent. Getting from the brewers and distillers, it retails to the public, making a little on each bottle, but the bulk of the price paid to the Government goes not into the treasury but to those from whom the Government bought. In Quebec for the year ending April 30, 1923, the dispensary sales amounted to \$19,698,773. Of this \$13,409,339 was paid out by the Government for liquors purchased. \$3,211,174 was paid out in administration expenses, and out of about 20 millions spent by the people of the province, a little over 3 millions was left for the provincial treasury. For Quebec to add 3 millions to its treasury it cost the people of Quebec over 19 millions. Poor business!

No argument against prohibition seems so unanswerable as the "bootlegger" argument. The bootlegger, who is now getting rich under prohibition, will be put out of business. It may be true that some bootleggers are now making fat incomes out of their criminal practices, but the remedy does not lie in Government sale. Such at any rate is the experience of British Columbia, which under Government sale is spoken of as

"the bootleggers' paradise." H. H. Stevens, M.P., has stated in a public address in Vancouver that never in the history of the country was bootlegging comparable in magnitude and murderous results to what it is today. Presumably he was speaking of his province, where bootleggers are saved the necessity of manufacturing their wares by simply buying from the Government stores and re-tailing throughout the province. For Ontario to "go wet" in October would be a sad step. The times have been bad and economic conditions not favorable (though the conditions of Ontario when compared with world conditions have been singularly fortunate). But granted that Ontario has debt and some of the people have poverty, can a province drink itself rich?

GORE CONCESSION, EKFRID

"Your 'Ealfr, Mr. 'Arris!"

"Mr. Harris was in a bad temper, and when an acquaintance met him one morning on the street with the question, 'Ow is your 'ealth today, Mr. 'Arris?' he waxed wrathful. 'My name is not 'Arris,' he snapped.

"Well," said the other, "if a haitch, a hay, two hars, a hi and a hes don't spell 'Arris, what on heath do they spell?"

Progress or Reaction Ontario Electors Must Choose

THE issue of the Plebiscite of October 23rd is: Shall the sale of intoxicating liquor as a beverage continue to be prohibited, or the traffic be re-established and conducted by the Government? ¶ Since September 16th, 1916, the legalized sale of liquor for beverage purposes has been prohibited. During eight years the Ontario Temperance Act has wrought a moral, social and economic transformation, gradual but real. ¶ A new generation knows nothing of the evils of the liquor traffic before the O. T. A. came into force. Older generations may have forgotten. ¶ Think of it! There is not a man or woman 29 years of age who has legally seen the inside of a bar-room or liquor shop in the Province of Ontario. ¶ Booze is banned! It is a discredited and dishonored outlaw. Now, it wants to come back. It seeks not only re-instatement, but that the Government itself shall be an active partner.

Do You Remember?

The old-time Bar-Room and Liquor Shop, with their disgusting sights and sounds and smells;

The staggering, cursing, drunken men who jostled us on the streets and on the cars—particularly on holidays or at public demonstrations—and who filled our jails;

The poor, battered, bedraggled hulks of men and women—God's children, our brothers and sisters, every one of them;

The destitution, misery, wretchedness, squalor, filth and disorder in many hovels that might, and should, have been homes;

The vice, the immorality, the crime, the debauchery, incited by liquor, that appalled good citizens.

The O.T.A. Has Made Good

Contrast those conditions with the situation today. The Ontario Temperance Act has brought immeasurable improvement. Drunkenness has decreased. Crime has been lessened. Homes are happier. Children have been given a better chance. Savings Bank deposits have increased. All down the line, PROGRESS has been written into the history of Old Ontario!

OFFICIAL RECORDS PROVE ALL THIS! The following table shows that, in Ontario under the O. T. A., there has been a substantial decrease in the offences that are usually associated with drink:

Assaults	1914	1922
Cruelty to Animals	1,627	756
Vagrancy	1,172	256
Keeping and Frequenting Bawdy House	4,703	1,507
Loose, Idle and Disorderly Drunkenness	802	352
	6,411	1,736
	17,703	10,063

NOTE THE OPINION OF OUR MANUFACTURERS:

"Does Prohibition, under the O. T. A., result in more comfortable homes and better supplies of food and clothing for wives and children?"

When this question was asked of leading Ontario manufacturers by the Ontario Board of License Commissioners, 1,165, or 82 per cent., answered "Yes", while only 239, or 17 per cent., said "No".

All Systems of Government Sales Have Failed

So-called "Government Control" has proven a dismal failure wherever tried. Drinking, drunkenness and bootlegging have reached appalling proportions. Every Canadian Province that has tried any form of "Government Sale" has already learned a hard lesson.

Take BRITISH COLUMBIA: Hon. H. H. Stevens, M.P., in a public address in Vancouver recently, declared:

"Never, in the history of the country, was bootlegging comparable in magnitude and murderous results to what it is today.

Or, MANITOBA: Figures furnished by the Chief of Police of Winnipeg show an increase of 45 per cent. in the number of

For the Honor of Old Ontario mark Your Ballot thus:

Are you in favour of the continuance of The Ontario Temperance Act?	☒
Are you in favour of the sale of a beverage of beer and spirituous liquor in sealed packages under Government control?	☐

drunk and disorderly cases in the first five months under Government Sale, as compared with the corresponding five months of the previous year under Prohibition.

And, finally, QUEBEC: The following resolution was unanimously adopted by the Presbytery of Montreal, April 15th, 1924:

"That we regard it to be a patriotic duty to make it known that the drug traffic flourishes here as never before and is on the increase, bootlegging flourishes in and from this Province as never before, that drunkenness is on the increase and that the Quebec system of Government Control is socially injurious and not a success."

Ontario Must Hold the Line

If a majority vote for "continuance," it means that we will have a better law more effectively enforced, with correspondingly improved results. The Government, through the Prime Minister, has definitely pledged itself to "strengthen" the Act and "give it active and vigorous enforcement."

If a majority vote for "Sale," it means the re-establishment of the old, discredited Liquor Traffic, in the guise of respectability under a system that makes the Government the bartender and every citizen a partner, acting as sales agent for the brewers and distillers and making profit for them out of the destruction of life and happiness.

The Ontario Plebiscite Committee, uniting the temperance forces of Ontario, calls upon all who love their Province and wish its continued and increasing prosperity and the happiness of its people to VOTE FOR THE LAW that has accomplished immeasurable good, and not for a return of the traffic that has wrought such havoc in the past, and would do it again.

The Ontario Plebiscite Committee

Card of Thanks

Mrs. Wm. Nethercott and family desire to thank their friends and neighbors for their kindness and sympathy shown during their recent sad bereavement, also for the beautiful floral tributes.

TOWN AND VICINITY

This is the second day of Wallace town fair.

Thanksgiving Day, November 10, is the next holiday.

The fall fairs are about over. Now for the tax collector.

The Wednesday half-holidays are no longer in vogue for this season.

The ever popular Melbourne Fair will be held next Thursday, October 9th.

October 5th to 11th has been set for "fire prevention week" in Canada.

Farmers are receiving \$1.20 per bushel for wheat and 45 cents per bushel for oats this week.

Bert Henry has bought the 100-acre farm of T. J. Thornton at the northern limits of Glencoe.

Rev. Dr. McCrae, of London, is recovering from the effects of a paralytic stroke which he suffered last week.

A concert company, combining the sale of stated cures for human ills, is holding forth at the town hall these evenings.

Mrs. W. A. Currie and Arnold Aldred have been appointed deputy returning officers in Glencoe for the liquor plebiscite.

The children's story hour will be resumed at the public library next Saturday afternoon. The hour is from two to three.

The annual meeting of the West Middlesex Teachers' Institute will be held in Strathroy on Thursday and Friday, October 9 and 10.

Foundation work on the Lambeth-Deleware highway, a distance of 13 miles, has been completed by the Ontario Farmers' Drainage Co.

C. G. York, principal of the Glencoe high school, will address the Sunday School at Woodger on Sunday, October 12, at 3 o'clock.

Mr. and Mrs. John Tait are moving into the caretaker's rooms in the post office building and have rented their home to Arnold Aldred.

Some 35 appeals have been entered with the clerk of Glencoe to have names put on the voters' list at the sittings of the revising officer to be held today.

Mrs. R. M. MacPherson was a winner in a weight guessing contest conducted by a London manufacturing firm, for which she received a refrigerator.

Russell Quick has moved his electrical shop from the McKellar House to premises at the north end of Main street where he has also taken up his residence.

The next meeting of the Battle Hill U.F.W.O. will be held at the home of Mrs. Hugh McCutcheon on Wednesday, October 9th. Rev. A. S. Whitehall will give an address on Temperance.

The second of the series of united prayer meetings will be held in the Presbyterian lecture hall on October 7th at 8 p.m. The Women's Auxiliary of St. John's church being responsible for the program.

Anniversary and reopening services will be held in Appin Methodist church on Sunday, October 5th. Rev. Wm. Sterling, of Cedar Springs, and Rev. Isaac Couch, of Strathroy, will preach. Music will be provided by the Maple Leaf Quartette, of Galt.

The annual meeting of the Glencoe branch of the Western Ontario Bible Society will be held in the Presbyterian lecture hall on Friday evening, October 3rd, commencing at 8 o'clock. Rev. R. J. Bowen, district secretary, will address the meeting.

The ditching machine has been busy a town for the last few days, and has finished excavating for new tile on the east side of Main street from the Presbyterian church to the outlet drain. The machine is now working on the excavating for the Siddall-Wright drain.

The readers of the October issue of Rod and Gun in Canada, published by W. J. Taylor, Limited, Woodstock, are introduced to the intimate haunts of the elk, the red fox and the moose. Then there are fishing stories and partridge hunting yarns, and many other worth while articles.

The Epworth League of the Methodist church will hold their first meeting of the season next Monday night when a rally program will be carried out. The theme will be Racial Goodwill, featuring a pageant to be given by members of the League. All the young people of the church are invited.

Dr. Woods, of Mt. Brydges, returning officer, has issued his proclamation for the plebiscite to be taken on October 23rd on the liquor question. D. C. McKenzie, of Strathroy, is acting as his clerk. The proclamations have been posted up and the deputy returning officers for the different polling divisions sworn in.

Mrs. McKillop, of West Lorne, wife of Hugh McKillop, M.P., is to take charge of the community singing which will be an attractive feature of the program at the annual convention of the Western Ontario Women's Institutes, in London in November. Mrs. McKillop, who is a talented vocalist, has also promised to sing.

A meeting of the Presbyterian Young People's executive was held on Monday evening. Arrangements were made to hold the opening meeting next Monday night with the following social committee in charge: Lorna Luckham, Jean Irwin, Molly Tait, R. D. McDonald and Martin Abbott. It is earnestly requested that all the young people of the congregation come out and take an interest in the work of the Young People's Society.

Omitting to place the gears in neutral before cranking his car a few nights ago nearly cost A. B. McDonald his life. The car bounded forward with the throttle wide open, jumped the curb, ran over the sidewalk and across the ground once occupied by the McAlpine house. At the end of the lot the car encountered a tree, which put a stop to its flight. The radiator was smashed and other lesser damage done to the car. Mr. McDonald cannot explain how he escaped with nothing worse than a slight lameness caused by a wheel running over his toes and the bumper striking his leg.

PERSONAL AND SOCIAL

Miss Florence Hurley was home from London over the week-end.

Charles Stinson, of St. Thomas, was a Glencoe visitor on Thursday.

Miss Effie Mitchell, of Francis, Sask., is visiting her cousin, Miss Minnie Mitchell.

Mrs. I. J. Foster, of Brooke, is spending a week with her sister, Mrs. D. J. Campbell.

Miss Margaret Wood, of Croton, was a guest last week of her sister, Mrs. Mac M. McAlpine.

Miss Gladys Bechill, who is teaching school near Merlin, was home for the week-end.

Charles Mitchell, of St. Thomas, is visiting at the home of Mr. and Mrs. D. K. McKee, Jr.

Miss Fern Graham, of Clinton, motored to Glencoe and spent the week-end at her home here.

Miss Kathleen Charles, of London, spent a few days last week with her sister, Mrs. (Dr. J. McIntyre).

Mr. and Mrs. C. O. Smith have returned from a two-weeks holiday in Preston, Guelph, Belleville and Port Elgin.

Mrs. P. E. Lumley and daughters, Margaret and Dorothy, have returned home after spending a couple of months in the West.

Mr. and Mrs. Samuel Davidson and Alex. Cran and daughter, Miss Anna Cran, of Watford, spent the week-end at D. J. Campbell's.

Earl McDonald, who has been spending some time at his home here, left on Monday to resume his studies at Toronto University.

Mr. and Mrs. W. G. Christner and daughter Rheta and Misses Annabel McKee and Mayne Grant motored from London and spent Thursday in Glencoe.

Mr. and Mrs. Arthur Rodger and Mr. and Mrs. Harrison Link, of London, motored to Glencoe and spent the week-end at the home of Mr. and Mrs. John A. McCracken.

Mrs. Annie Lyons and sons and Mr. and Mrs. Bristol Essery and daughters, of London, motored to Glencoe and spent Sunday at the home of Mrs. Lyons' brother, Richard Singleton.

Mr. and Mrs. John Patterson, of Walkers, announce the engagement of their daughter, Margaret B., to Clifford J. Morrow, son of Mr. and Mrs. Stewart Morrow, London, the marriage to take place quietly in October.

Among former residents of Glencoe who attended the fair here on Thursday were noted the following: John A. Campbell, Detroit; A. D. McEachern, St. Thomas; Archie Finlayson, London; Archie Campbell, Swift Current; Chas. Stinson, St. Thomas; Daniel McKee, Port Huron; Mrs. W. W. Gordon, Port Huron; Rev. George Weir and Dorothy and Stewart, Ridgeway; J. V. McDougald, Strathroy; Wm. Dobie, Mrs. Dobie and Miss Annie Dobie, London.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenantable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

Many a boss at the office helps to wash dishes at home.

All must be sold regardless of cost for cash.—L. L. McTaggart, auctioneer.

Here and There

More than one hundred and fifty traders from the Far North arrived in Edmonton, Alta., recently bringing with them fur sales to the value of approximately \$500,000.

Tarzan Second, the largest wooden scow in the world, was launched recently at the Wallace shipyards, Vancouver, B.C. She is 1,000 tons burden and has 300,000 feet of British Columbia lumber in her make-up. The scow is to be used as a carrier for a great pile-driver for Sydney E. Junkins Company.

Two dinosaurs have been located in the Red Deer Valley, Alta., near the Canadian Pacific Railway line this summer, by the University of Toronto expedition, composed of four scientists who prospect for several weeks in the gorge and are packing up the prehistoric monsters for shipment to the Royal Ontario Museum. Another skeleton has been located by the Geological Survey of Canada.

One of the outstanding features of Canadian trade with the Orient during the past year or so has been the remarkable increase in wheat flour exports. Imports of Canadian wheat flour into Hong Kong in 1923 were the largest on record, showing an increase of 109 per cent in volume over those of 1922. The figures and values were: 1922, 79,585 barrels, valued at \$126,060; 1923, 191,821 barrels, valued at \$249,014.

Zane Grey, the famous novelist, recently caught a 758 pound tuna fish, constituting what is believed to be a world's record. The sea monster was successfully conquered after three hours and ten minutes of grilling endeavor off the Nova Scotia coast, and towed into Liverpool harbor. Mr. Grey's prize is a species of the blue fin family. The record before this catch was held by J. K. L. Ross, the well-known Montreal sportsman and financier, who caught a 710 pound tuna.

One of the most remarkable achievements in art printing yet produced in Canada and one which finally disposes of the idea that such work cannot be satisfactorily handled by Canadian firms is found in the new booklet issued by the Canadian Pacific Railway dealing with the forthcoming 1925 Round the World cruise of the company's steamship "Empress of France." The booklet contains 40 pages of text and color illustrations, the latter exquisitely combining many brilliant hues in a number of highly imaginative designs.

EKFRID COUNCIL

The council of the township of Ekfrid met in the town hall, Appin, on Thursday, September 18. All the members were present. The minutes of the last meeting were read and approved, and signed by the Reeve.

A by-law was passed imposing a percentage of two per cent on all taxes of 1924 unpaid on the 15th day of December, 1924, and an additional three per cent, on all taxes of 1924 unpaid on the 1st of January, 1925.

The Reeve and clerk were appointed to adjust all outstanding accounts between Ekfrid and Metcalfe.

A grant of \$50 each was made to the Mosa & Ekfrid Agricultural Society and the Melbourne Agricultural Society.

The council adjourned to meet in the town hall, Appin, on Thursday, October 16th.

BY-LAW No. 791

A By-law for Stopping Up the Highway on Lot 17 in the 3rd Range South of the Longwoods Road in the Township of Ekfrid.

WHEREAS an application was made by the Municipal Council of the Corporation of the Township of Ekfrid to the Ontario Railway and Municipal Board for an order relieving the said corporation from the obligation to rebuild the bridge over the creek on the River Road through lot number seventeen in the third range south of the Longwoods Road in the Township of Ekfrid in the County of Middlesex;

AND WHEREAS on the 18th day of September, 1923, the said Ontario Railway and Municipal Board made an order granting the said application upon payment by the said corporation to Thomas Brown, the owner of the said lot number seventeen, of the sum of one hundred dollars and the conveyance to him by the township of the road in question;

AND WHEREAS it is desirable to stop up the said highway and to convey it to the said Thomas Brown in pursuance of the said order;

THEREFORE the Municipal Council of the Corporation of the Township of Ekfrid enacts as follows:

1. That that portion of the road through lot number seventeen in the third range south of the Longwoods Road in the said Township of Ekfrid, which may be more particularly known and described as follows, that is to say: All and singular that certain parcel or tract of land and premises situate, lying and being in the Township of Ekfrid in the County of Middlesex and being composed of part of lot 17 in range 3 south of the Longwoods Road, which said parcel or tract of land is used as a road allowance and may be more particularly described as follows: i.e., a strip of land one rod in perpendicular width on each side of the below described centre line and shown colored red on the attached plan; commencing at a point in the north-easterly limit of said lot 17 and 29.5 feet south-easterly from the north-easterly angle of said lot; thence south 47 degrees and 53 minutes west 295 feet and 6 inches; thence south 56 degrees and 35 minutes west 270 feet and 6 inches; thence south 40 degrees and 18 minutes west 303 feet and 3 inches; thence south 37 degrees and 54 minutes west 395 feet and 2 inches; thence south 35 degrees and 03 minutes west 345 feet; thence south 33 degrees and 57 minutes east 190 feet; thence south 33 degrees and 03 minutes west 90 feet; thence north 67 degrees and 33 minutes west 180 feet, be and the same is hereby stopped up.

2. That the said hereinbefore described portion of the said road be conveyed to the said Thomas Brown.

3. That the Treasurer of the said Corporation of the Township of Ekfrid be and he is hereby authorized to pay to the said Thomas Brown the sum of one hundred dollars in pursuance of the order of the said Ontario Railway and Municipal Board.

4. That the Reeve and Clerk be and they are hereby authorized to execute on behalf of the Township of Ekfrid the annexed deed of the said road and to deliver the same to the said Thomas Brown upon execution thereof by him.

5. That barricades be placed at both ends of the portion of the said road hereby closed as aforesaid, in order to enforce the due observance of this by-law.

6. That this by-law is to take effect from and after the passing of a by-law of the Council of the County of Middlesex confirming this by-law.

READ a first, second and third time and finally passed this 22nd day of May, 1924.

Bernie Galbraith, A. P. McDougald, Reeve, Clerk.

HUSBANDS WHO LACK AMBITION

A girl said to me: "I am engaged to a man who has but one fault. He is utterly lacking in energy and initiative. He has got plenty of ability, but for years he has been in the same position, where he does just enough work to hold his job."

"His motto is, 'Never do anything to-day that you can put off until to-morrow.' He never answers a letter under three weeks, and when I am going anywhere with him he is always late, and I have to wait and wait, and wait, until I am in a red-hot temper when he does arrive."

"What he needs is somebody to keep continually behind him, and push and prod him into making a success of himself."

"My dear," I said, "don't undertake the job. In the first place, it can't be done. When a man is born tired the do-nothing sign is set on his forehead at birth, and no wife can eradicate it."

"Whether indolent and slothful people are afflicted with some disease that paralyzes their energies, I do not know. But I do know that laziness is an incurable vice, and that you can do nothing with people to whom no achievement is worth the effort it costs, to whom labor is the ultimate curse of the world, and whose only desire is to loaf through life."

"That kind of a man never loves a woman well enough to work for her, and no wife can supply him with the power he needs to make him a success. Many optimistic women have attempted this feat, but they all fail."

"As for a woman making anything of a man by trying to keep him jacked up all the time, that is another faulty idea. The only effect of a wife keeping continually after a husband and trying to spur him on is to make him hate her. She becomes a thorn in the flesh. She is the outward and visible sign of the thing he loathes most. She is the nagging of his conscience. She is a perpetual reminder of his own shame in being too weak and inert to do a man's part."

"No man's love survives having his wife tell him of his faults. A man may suspect that he cuts no important figure in the outside world, but his vanity demands that his wife shall admire him, that she shall believe in him, that he shall measure up to her standard of manhood."

"Therefore you cannot picture a man finding much comfort in the society of a wife who is a spur in his side, urging him to take hazardous jumps. Nor can you imagine a man yearning to come home at night to a wife who is always asking him if he has done this and why he hasn't done that, and throwing up at him the achievements of other men."

"Being a man's inspiration is something that appeals to the feminine love of meddling in other people's business. But in real practice it is neither as diverse nor as interesting as it is promised to be. Putting aside the difficulties of the task and its boomerang rewards, women find that they soon lose interest in the undertaking."

"For women do not love long where they do not respect, and no woman respects the man who has not strength

"When Hearts Command"

By ELIZABETH YORK MILLER

"When hearts command,
From minds the wisest counsellors depart."

CHAPTER XXXV.—(Cont'd.)

"How did you manage it?" Gaunt asked.

Hugo twisted uncomfortably. Why were people so curious? Wasn't it enough for them that he had fallen and nearly been killed? "I didn't manage it," he said crossly. "It just happened."

"Did you lean over and lose your balance?"

Hugo shrugged his shoulders.

"I just fell," he said.

Gaunt gave up cross-questioning him. Hugo's stubbornness was becoming proverbial.

Gaunt hung about hoping to see Jean and announced his intention to Maddyne of staying to lunch. While Hugo was taking a short nap he strolled into the garden and down by the memory-haunted pool. But sunshine is different from moonlight. Last night he had been miserably sentimental, and now when he tried to remember all the things Jean and he had said to each other some of them seemed rather foolish. He had kissed her, held her in his arms.

"Oh, well—they had their lives to lead, Jean and he, and Hugo also. One must put a good face on it."

He lit a cigarette and leaned against Hugo's sheltering palm-tree, his puzzled gaze turned towards the sea. Should he go to sea again and take poor Hugo with him? He felt restless for the first time in many years, and a yearning to be up and doing took possession of him. It was because of Jean, no doubt. The world might call him an old man if it chose, but the blood ran hot and strong in his veins. He could still be tormented by the pangs of love.

The toe of his boot struck something and he looked down, then stooped and picked it up, examining it curiously. Hugo's pipe. The one he complained of having lost when he fell over the balcony. How came it here?

Gaunt made no pretence at being clever, but in this instance he had a veritable brain wave. He realized at once how it had happened. Hugo had been stalking him and Jean last night, and the accident had occurred by his trying to climb back into the house.

Life lit a cigarette and leaned against Hugo's sheltering palm-tree, his puzzled gaze turned towards the sea. Should he go to sea again and take poor Hugo with him? The toe of his boot struck something and he looked down, then stooped and picked it up, examining it curiously. Hugo's pipe. The one he complained of having lost when he fell over the balcony. How came it here?

Gaunt made no pretence at being clever, but in this instance he had a veritable brain wave. He realized at once how it had happened. Hugo had been stalking him and Jean last night, and the accident had occurred by his trying to climb back into the house.

Life lit a cigarette and leaned against Hugo's sheltering palm-tree, his puzzled gaze turned towards the sea. Should he go to sea again and take poor Hugo with him? He felt restless for the first time in many years, and a yearning to be up and doing took possession of him. It was because of Jean, no doubt. The world might call him an old man if it chose, but the blood ran hot and strong in his veins. He could still be tormented by the pangs of love.

But at the bottom of that seemingly placid stream there were rocks and a dangerous under-current.

Ardeyne's friends got to suspect it in some mysterious way. How, without a spoken word or visible sign, do people divine a lack of seeming harmony of other's lives? It was revealed, perhaps, in the Ardeynes' rather too deferential treatment of each other. They were on affectionate but not familiar terms, and between those two attitudes lies a great difference.

The little bride was still a young girl. In her soft brown eyes there dwelt no worldly knowledge. And Philip allowed himself to be too thoroughly submerged in the demands of his profession for a recently wedded man.

"He treats her as though she were a saint and an inaccessible niche," somebody remarked.

Somebody else—a woman—said drily: "If you ask me, there's some mystery about that marriage."

On their return to London, Philip plunged deeply into his work; fairly drowned himself in it. There was a great deal to do, and as much more as he cared to shoulder. He sent his partner for a holiday, and his own days were crowded, sometimes one beginning when the other ended. He worked on his lectures at nights. Week-ends they went down to Maidenhead, where there were always guests, but often Ardeyne, himself, had to rush back to town and leave the entertaining to Alice.

On one of these occasions he found himself in town on a Saturday night with nothing special to do for several hours. The French scientist whom he had come to meet had missed a train connection somewhere, and in consequence the evening was practically wasted.

It was a hot, airless night, and the young doctor was suddenly seized with a sense of restlessness that amounted to sheer torture. Should he go back to Maidenhead and let Monsieur Carre take care of himself? But that seemed scarcely polite. Foreigners are easily offended, and Monsieur Carre was not even an acquaintance who might excuse the informality of a note and follow on to Maidenhead as best he could by himself.

There was the lecture, of course. Philip regarded the closely written sheets of manuscript distastefully. He had laid them aside for the week-end, and was in no mood to take up his writing on the spur of the moment.

It meant getting out reference books which were all neatly put away. It meant changing his clothes again, for he had dressed with the intention of taking the French savant to dinner at Claridges, and he could only sweat over the lecture in the ease of a soft shirt and his old golfing coat.

Well, anyway, he must dine, himself. He went to the Savoy instead of Claridges and afterwards watched the dancing for a little while. Then he strolled up to the foyer in a thoroughly bored frame of mind and ran into Carrie Egan.

She had changed in appearance very much, and as he found himself shaking hands with her and exchanging greetings was conscious of an uncomfortable sense of shock. What had she done to herself? Perhaps it was her hair. Last winter at Bordighera she had worn it short, in a grotesque mop that gave her a frisky, juvenile air. And now—apparently—it had grown amazingly. Anyway, it was bunched up in a conventional fashion, and she had on a black dress which made her look sallow and years older. This was by no means the same Carrie Egan who had shocked and delighted the knitting brigade of the Mimosa Palace.

"Are you quite well?" Ardeyne asked, surprised into a question which sounded somewhat professional.

"No—not so well as I might be," Mrs. Egan replied. "And I could say the same of you." She had not lost any of her frankness. "You look like a screwed-up rag, Phil. What is the matter?" She turned the tal on on

Soils and Woods

OLD EARTH CELLAR BEST FOR APPLES.

One of the problems of the householder each year is what quantity of apples he can store economically, and another question, "Why did not my apples keep well last winter?" or "Is there any way by which I can keep them better this year?" This does not apply, of course, to those who are fortunate in having the old-fashioned cellar without a furnace, which was cool but frost-proof, and moist without being damp. It was and is in such a cellar that apples can be kept to the best advantage and where they will best retain their flavor. The nearer the conditions approach those in this old earth cellar the better the results will be. First, the fruit should be kept as cool as possible without freezing. If the temperature can be kept between 35 and 40 deg. F., this would be best. The higher the temperature the shorter the life of the fruit.

Next in importance is retaining the moisture in the fruit. If the individual specimens are exposed to a very dry atmosphere they will wither, hence the desirability of keeping them in such a way as to retain the moisture as much as possible, even though the air of the storage room be dry. This can be obtained, to some extent, by keeping the fruit in a closed package and, better still, in addition, by wrapping each individual specimen in waxed or oiled paper, which will do much to preserve the moisture in the fruit, and to keep disease from spreading from one specimen to another. It is also desirable, if one has nothing else in storage that will be adversely affected, to keep an open vessel with water in it in the room.

A careful choice of varieties should be made if one is going to lay in several barrels, or more than the family can use in a month or so, as notwithstanding favorable conditions for storage, the length of the season that any variety will remain in prime condition is limited.—W. T. Macoun, Dominion Horticulturist.

MULCHING OF SMALL FRUITS AND PERENNIAL FLOWERS.

Although the mulching of small fruits and perennial flowers is useful in the attaining of several objectives, its chief use is for winter and spring protection. Ordinarily, our common hardy species do not suffer much harm from freezing, but are usually killed by alternate freezing and thawing. By the use of a good safe mulch, properly applied, the plant, after freezing will, as a rule, stay frozen during the winter and early spring thaws, and when it finally thaws out,

severe weather, and the danger of its again freezing will be over. It frequently happens that a few quite warm days will occur during early spring and the high temperatures not only thaw out unprotected plants, but induce growth as well. Such unseasonable weather may be followed by severe cold which will damage or kill the newly started growth and often kill the plant itself. It is, therefore, evident that a mulch for winter protection is not so much a protection against cold as it is against unseasonable heat by preventing premature thawing and too early growth.

Nature's protection, or mulch, is ideal, although unsightly. The stems of herbaceous plants, after dying, remain upright and catch wind blown leaves and later snow. As the season advances these stems break down and form a protection in the early spring for the crown of the plant. Shrubbery holds leaves that are blown into it, and anywhere necessary, leaves and litter collect to form an efficient mulch. It is, however, usually desirable to clear up fall litter of this sort, as it has an untidy and unsightly appearance, but if this is done, artificial protection, of a similar nature, in the form of a mulch should be given the plants. Generally speaking the best material for a mulch is coarse straw or very straw horse manure. Close lying or dense material, such as well rotted manure, is not satisfactory, as heating may often start and kill the plants. The mulch should be applied to a depth of two or three inches as soon as the ground is frozen, in the fall, and removed when danger of severe cold is past the following spring.

Practically all of our common perennial flowers are benefited by a mulch two to four inches in depth of straw, leaf mould or straw horse manure.

Many follow the practice of digging this material into the soil and the litter at the same time. Strawberries are best mulched with coarse straw spread evenly over the rows to a depth of two or three inches. The canes of blackberries, tender varieties of raspberries and grapes should be laid down and covered with four to six inches of soil. Currants, gooseberries and hardy raspberries are benefited by mulching around the roots with ordinary barnyard manure, which can be worked into the ground by cultivation during the late spring. As a rule, many plants will survive and even appear to thrive without it, but experience has shown that mulching, if properly done, will benefit practically any variety or species of small fruits and perennial flowers.

PUTTING UP PICKLES AND RELISHES

BY FLORENCE TAFT EATON.

There is nothing that glids the home table more than the liberal appearance upon it of the various delicious homemade relishes and appetizers.

A fine piccalilli or zesty chow-chow converts a plain hash into a tempting dish; a tart, spiced-fruit catchup or relish increases the flavor and appeal of a platter of cold meat; a fine mustard or tangy chili sauce seems the almost necessary complement of the Saturday-night baked beans or the Sunday-morning fish balls.

There are so many good things in this line that can be made at this season of the year that it is very hard to pick and choose. Housewives are, however, usually interested in trying something a bit different, as sometimes the family tires a bit of the same old stand-bys, however tempting.

Peaches serve as a foundation for numberless delectable concoctions. Pickled Peaches—Make a syrup of four pounds of brown sugar and one quart of vinegar, and boil ten minutes with a loose bag of mixed spices—stick cinnamon, cassia buds, allspice and one teaspoonful of cloves; half a cupful in all.

Skim and add eight pounds of whole peaches which have been scalded and skinned. If large and firm they may be halved if preferred. Cook about ten minutes or until soft but not mushy; remove carefully into a cork, boil the syrup a few minutes longer and pour over the fruit.

Next day drain off syrup and boil until thick and rich, then pour over the peaches. Do this three days in all; keep in a stone crock, retaining the bag of spices. Ripe Seckel pears may be done the same way.

Peach Conserve—Scald, peel and cut up six pounds of ripe peaches; add an equal quantity of sugar, the shredded kernels of six or eight pitted, dried oranges put through the meat chopper and the juice of a small bottle of maraschino cherries. Cook, stirring frequently, until well blended, adding a few minutes before taking up, the cherries cut in small pieces. Store in jelly glasses or in half-pint sealed jars.

Watermelon Balls—Cut the pink

but firm part of the melon—near the rind—into marble with a potato scoop. Soap over night in weak alum water—half an ounce to two quarts water. In the morning take out into cold water, rinse thoroughly and put into a boiling syrup made of three-quarters the weight of fruit in sugar and enough water to just cover the fruit; add half each of a thinly sliced lemon and orange to each pound of fruit, and one ounce of ginger root in small pieces to each three pounds.

Cook until clear, skim out the fruit, boil the syrup until thick and rich, reheat the fruit and can all boiling hot. Cubes of the melon may be used instead of cutting into marbles.

Cucumbers—Select Cucumbers at least one and a half inches in diameter, pare, cut in halves and remove the seed portion with the apple corer. Then slice into half-inch thick slices. Simmer for a couple of hours in vinegar and water—half and half—to cover, salting to taste; drain. Make a syrup of one pound of brown sugar and three cupsful of vinegar and boil five minutes with a small bag of mixed spices; skim and pour over the cucumber rings.

Stand overnight; repeat two days more. On the third day pack in jars, cover with the boiling syrup and seal. Grape Conserve—Pulp four pounds of wild or Concord grapes, cook and strain the pulps, add to the skins and boil eighteen minutes, stirring carefully. Then add two and a quarter pounds of sugar, half an orange and half a lemon put through the meat chopper, three-quarters of a pound of small seedless raisins washed and dried, and cook, stirring, three-quarters of an hour.

Andover Conserve—Put in a large preserving kettle eight pounds of hard pears put through the meat chopper, eight pounds of sugar, two lemons, one orange and a quarter pound of preserved ginger, all put through the chopper. Pieces of ginger root cut in small pieces will do, but the preserved ginger is nicer. Set over very moderate heat until sugar is melted and juices flow, then cook, stirring occasionally, about two hours, or until thick and clear.

Polly's Conserve—Three pounds of plums, three pounds of pears and

Although only fifteen years old the Duke of Norfolk, shown above in court attire, has inherited approximately \$85,000,000. Since his father died seven years ago, it has taken all that time to complete the valuation of the estate which the boy inherits.

three pounds of apples. Stone the plums and boil the stones in two cupsful of water forty minutes. Peel, core and chop fruit; add one orange or lemon put through the meat chopper, six pounds of sugar, the strained stone water, and cook, stirring occasionally, until as thick as you wish.

Green Tomato Marmalade—Green tomatoes, sliced, in such quantity as you wish. Place in good-size kettle and fill two-thirds full with water; then add two-thirds the weight of the fruit in sugar and two thin slices of lemon for each pound of fruit. Cook slowly a long time until thick and rich.

Plum Conserve—This is a fine way to use the abundant windfall plums. To six pounds of pitted plums, add the same quantity of sugar, three oranges and one lemon put through the fine knife of the meat chopper, and one and a half pounds of seeded raisins. Boil slowly until the consistency of jelly and put in hot sterilized glasses.

Piquant Apple Jelly—Cut up crab apples or any early tart apples, pack them in a large kettle; add a cupful of vinegar, a bag of mixed spices and enough cold water to just appear between the fruit. Boil, covered, until broken and mushy, stirring and mashing, and strain through a jelly bag.

Next morning measure the fruit, boil hard with the bag of spices ten minutes; add an equal measure of hot sugar and boil three to five minutes, skimming carefully. Put in glasses.

English Chutney—Uncooked. One pound each of ripe tomatoes and tart apples, four medium-size peppers, eight medium-size onions, half a cupful of chopped mint leaves, one and a third cupsful of seeded raisins, one heaping teaspoonful of dry mustard, one and a half teaspoonfuls of salt, two cupsful of granulated sugar and three cupsful of vinegar. Chop tomatoes, add salt and mix. Chop other ingredients. Scald and cool vinegar; add sugar and mustard; combine everything, mixing well, and let stand two weeks before using, stirring occasionally.

Harlequin Pickle—Ten large green peppers, ten large red peppers, twelve onions. Chop peppers coarsely, pour boiling water over them, let stand ten minutes; then drain, again cover with boiling water, and let stand five minutes. Drain thoroughly, add onions, chopped, two cupsful of light brown sugar, two tablespoonfuls of salt and one quart of vinegar. Bring to boil, cook fifteen minutes and can in jars.

Meriton Pickle—Uncooked. Slice five dozen unpeeled green cucumbers about four inches long. Sprinkle liberally with salt in layers and let stand overnight. Drain off brine, add one and a half dozen small onions sliced thinly. To five cupsful of vinegar add

one large cupful of best salad oil, three teaspoonfuls of celery salt, half a teaspoonful of white mustard seed, and best vigorously; pour over cucumbers and onions and put in pint jars and seal. This makes six jars.

Veribest Chowchow—Peel and slice one peck of ripe tomatoes and one quart of onions—less of onion if you prefer—and four green or red peppers. Sprinkle over the mixture half a cupful of salt. Let stand two or three hours; drain, saving juice. Boil one hour in a large kettle and add one pint of good vinegar, two cupsful of brown sugar, a saltspoonful of cayenne, two tablespoonfuls of ground mustard, a tablespoonful each of cinnamon and whole cloves, a teaspoonful of celery seed, and boil another hour. Can, boiling, in quart or pint jars. Delicious with fish balls, baked beans and cold meats.

Fruit Chowchow—To half a peck of green tomatoes put through the meat chopper, add half a cupful of salt and let stand overnight; then drain. Add three pints of vinegar, two and a half pounds of brown sugar and a bag of mixed spices; cook twenty minutes after it begins to boil, then add half a peck of apples or Seckel pears put through the meat chopper. Apples must be pared; pears need not be. Cook until tender, boil hard while boiling. If not moist enough add one cupful each of vinegar and sugar while boiling.

What is a Bacon Hog?

Pamphlet No. 40, New Series, will explain what constitutes a select bacon hog, and also the various other grades into which hogs are classified under the government grading regulations. Hog types are clearly explained and the advantages of grading are clearly set forth. The pamphlet referred to "The Bacon Hog and Hog Grading" is obtainable on request from the Dept. of Agriculture at Ottawa, and should be in the hands of every farmer who raises hogs for market.

To kill garlic, try late fall plowing, followed by an intertilled crop the following year. Corn in check-rows is a good crop to plant. To get rid of the garlic in pastures, if the plants are not too numerous, dig each plant and destroy it. Sheep eat the tops of the plants, and close grazing for a few years often kills the pest out. Coal-tar creosote oil applied to each plant at the rate of about four thumbfuls is effective in killing both the plant and the ungerminated bulbs.

How time changes! The very ones who used to demand the full dinner pail are now shouting for more parking space.

The bronze figure of Evangeline has been erected at Grand Pre, in honor of Henry Wadsworth Longfellow, well-known American poet, who made Nova Scotia famous with his poem "Evangeline."

Home Education

"The Child's First School is the Family"—Frederick

Making and Filling of a Terrarium—By Emma B. Dashley

And Nature, the old nurse, took The child upon her knee, Saying, "Here is a story book Thy Father has written for thee."

The possession of a terrarium is ever a source of delight, because of the difficult plants and berries which appeal to the eye; and also because of the bugs and other creatures which show active life.

To make a terrarium, first of all, a berry crate with a cover is needed. Saw or cut out the middle slats from near the corners on the four sides, leaving the top and bottom slats for support. If the slats run up and down, saw them from the top slat to the bottom slat. Cover the top and two short sides of the inside with wire screen. Use glass in the front and back, the entire length of the crate, to provide light and heat; also to make it possible to observe readily what is inside.

Paint the crate and wire screen dark green to harmonize with the plants inside; and set the crate in a low window or upon a pedestal stand low enough to allow the children of the family to observe the growth of the plants from day to day.

On the bottom of the terrarium, place a pan about three or four inches deep and the length of the crate, or a galvanized pan made. To a depth of three inches fill the pan with soil preferably from the woods. Then you are ready to select the plants you find most pleasing. As a lover of nature and the woods, I prefer to have plants from the woods. The partridge or squaw-berry vines with their bright berries may be gathered at any time in the fall and will last all winter. Wintergreen roots and berries usually grow near the partridge-berry vines and are attractive. Ferns are

always pretty and keep green until Christmas. Select small plants of a hardy nature. The rock ferns or small woods ferns are best.

If you can find a pitcher plant in the swamps, it will add greatly to the beauty of your terrarium. The wild flowers, hepatica, blood-root, pack-in-the-pulpit, and trillium, if planted in the fall, will blossom in the spring.

In addition to plants in the terrarium, cocoons on their twigs can be suspended from the cover. These cocoons may be found on lilac bushes and grape-vines, or in trees. Great will be the delight of the little folks when in the following spring, beautiful moths or butterflies come out of the cocoons.

If you can find some snails living in their shells, in a damp place, put them in the terrarium also and let them wander among the plants. At times the snails will hide away and then reappear when you least expect them. Children always enjoy watching snails. And the chirping of the cricket gives much pleasure to some people. With the grasshopper, the crickets may be housed for the winter, affording additional entertainment to the children.

Filled with these flowers, vines and insects, your terrarium will prove an interesting feature during the long winter hours.

In the spring an entire change of plants can be made, or the box filled with wandering Jew. This vine grows luxuriantly and is very ornamental.

Fortunate are the children, mothers and teachers, who are so placed that Nature's story book is close at hand; for Nature, the old nurse, is loving and bountiful, and will re-write many a page in her wondrous book, the terrarium.

Dangerous Farm Wells.

The Dominion Chemist in his annual report again calls attention to the precautions that should be taken in establishing a farm well. For more than thirty years the Division of Chemistry of the Experimental Farms, over which Dr. F. T. Shutt presides, has been analyzing well waters and issuing warnings with respect thereto. In his latest report Dr. Shutt points out that there are yet many farmers who do not realize the gravity of the question. By the continuance of the work he expresses the belief that more and more the farming community will be brought to understand more completely the bearing that the quality of the water supply has on the health of the family or on the health and thrift of the live stock.

The chief fault in the present condition of affairs, he states, is found in the location of the well. Too often safety has been sacrificed for convenience. The most innocent-looking well may carry dangerous contamination. Where an analysis confirms the suspicion that the well is receiving drainage of a dangerous character, the Dominion Chemist recommends filling up the well and sinking another on a safer site at least fifty yards from a possible source of contamination.

As it is assumed that only suspicious water is submitted for analysis, the results of the tests made by the Dominion Chemist do not represent the true condition of the average well. During the year for which the report is made but 17 per cent. of the samples of water analyzed were pure and wholesome, while 36 per cent. were shown to be seriously polluted. The remaining 47 per cent. were either suspicious or saline in character.

Samples of water for analysis should not be submitted for examination until the proper form is received from the Dominion Chemist and filled out respecting the well and its surroundings. With the information thus given the water should be sent in a thoroughly clean bottle for examination.

Art in a Hall Bedroom.

Mr. Neighborly—"Say, my friend, I'm the man that lives across the light shaft and I want to ask you if you can't close your window when you play that trombone. The noise is fiendish."

Mr. Tootler—"Sorry, old pal. Can't do it. Gotta hav room to slide the horn."

To get beeswax from the comb, put the comb in a stout sack, submerge in boiling water and with a strong paddle press out the melted wax through the sack. As the wax hardens it can be skimmed off the water.

Running silage cutters at a high speed wastes power. On a large machine, the capacity is as great when the speed is 650 or 600 revolutions per minute as when it is much higher; in some cases the capacity is greater with the lower speed. Besides, the lower speed saves power.—U. W.

PLANT BULBS FOR SPRING FLOWERING

Bulbs for flowering outdoors next spring must be planted this fall. The kinds most commonly grown are tulips, narcissi, hyacinths, snowdrops, crocuses and scillas. These bulbs should be planted early enough to develop a good root system before winter. Very often the cause of poor flowers in the spring is lack of roots. If planted during the latter part of September or early in October, the bulbs will have ample time to get well rooted.

Bulbs do best in loamy, well-drained soil. A sandy loam is better than a clay loam. Dig the soil to a depth of 12 to 16 inches and mix with it well-rotted manure. See that the manure is buried below where the bulbs will be after planting, as when pure manure comes in contact with the bulbs they are apt to rot or become diseased. Bulbs are liable to rot also in soil that is not well drained.

The proper depth to plant is determined largely by the size of the bulb and the character of the soil. Tulips are best planted four or five inches deep, measuring to the bottom of the bulb; hyacinths and narcissi, five to six inches, and about the same distance apart. Small bulbs, such as crocuses and snowdrops, may be planted only two or three inches deep, and same distance apart.

Bulbs may be planted deeper in light soil than in heavy. The depths suggested are for medium or loamy soils. If the soil is very heavy or if it contains much manure near the surface, it is advisable to put a little sand under each bulb for safety against rotting.

For best effect, avoid planting in straight, single rows. Plant in masses or clumps in beds, or among the perennials in a border. Nearly all kinds of bulbs are effective also set in turf, where they will usually come up every spring without further care; by this treatment, however, one should not expect as fine quality in bloom as when planted in prepared beds or borders. For grass planting, cut and raise a small piece of sod, plant the bulbs in the soil and replace the sod firmly.

All bulbs planted in cold climates should be covered for winter protection, especially as a preventive against heaving, due to alternate thawing and freezing during warm spells in winter and early spring. This mulch is especially useful where there is no snow on the ground. It should be removed quite early in the spring to prevent rotting of the bulbs, which usually is early and rapid.

In florists and seedsmen's catalogs, there are many beautiful species and varieties of bulbs listed and described. It is difficult to choose a few to recommend which will combine all the desired characteristics and be acceptable to the flower lover in all parts of the country. As a few varieties are less hardy than the majority, persons who are unacquainted with varieties should consult florists or experienced amateurs of the neighborhood concerned.

Agricultural Conditions in Peace River District.

Sir Henry Thornton's remarks regarding agricultural prospects in the Peace River District will naturally direct attention to that section of Canada. More information will be sought, and probably no better way of obtaining it is forthcoming than that supplied by the reports of the Dominion experimental sub-stations there located. Principal of these is the report of the superintendent at Beaverlodge, Alta. Mr. W. D. Albright, who goes fully into the conditions prevailing in the Peace River District in 1922, the year that the publication covers.

Relative to the keeping of live stock, to which Sir Henry especially referred, Mr. Albright says "Initial experimental work with 24 cattle and 88 hogs confirmed the dictum of experience, that, with proper methods, Peace River conditions are well adapted to the economical feeding of both these classes of animals. Cattle fattened well in an open-front pole and straw shed. Those receiving silage made a little more efficient use of their feed, that twelve that had finished on the staple roughage, sheep oats, with a very small meal ration and a very little hay at the last, also registered a performance that would compare creditably with results in any climate or almost any fodder. Mr. Albright adds, "The busiest live stock on the station was a colony of bees, which built up from forty-two pounds in the latter part of July to seventy-three pounds in August."

Most encouraging results have been experienced at the sub-station in the economical production of suitable feeds for live stock, such as sheep oats, legume hay, rye pasture and feed grains.

The report, it might be added, is not confined to 1922, but contains seasonal notes on preceding years, as well as results obtained in the cultivation of all kinds of cereals and vegetables, and several varieties of flowers and fruits.

Two Things Necessary.

Two essentials: To succeed, common sense. To be happy, a sense of humor.

Mayhew's---"Exclusive But Not Expensive"

Compare Our Values!

"You can do Better at Mayhew's." That's what Women are finding in their Fall Shopping. Mayhew's Coats for Women are always Smart, always Up-to-date and always Moderate Priced.

Coats

Exclusive, Fashionable, Moderately Priced, \$15.00, \$25.00 and \$35.00. Materials of Velour, Duveltyne, Marvella, Camel's Hair and Teddy Bear Cloth and Gersona. Sizes to fit Women and Misses. Every one a Real Value at its Price.

It's a Special Selling—Men's Suits and Overcoats

Right at the height of the season with stocks at their best, we're offering Men's Suits and Overcoats so low that no man will overlook them. Priced at \$14.50, \$17.45, \$19.50 and \$25.00.

Real Savings for the Thrifty Ones

Boys' and Girls' Heavy Chinchilla Reefers, 1 to 8 years, at \$6.95.

Penman's Merino Shirts and Drawers for Men, a good weight, reg. \$1.25 for 89c.

8 MEN'S HANDKERCHIEFS FOR 99c Here is a good bargain. They are a good size and 50 per cent Pure Linen and worth 25c. Sale Price, 8 for 99c.

36-inch Chintz for covering Comforters, nice designs, to be sold this week 4 yds. for 99c. Ladies' Winter Weight Cotton Vests, with V necks and short sleeves, full size, Turn-bull's, reg. 75c, on sale this week, 49c.

E. A. MAYHEW & CO.

To whom and for what sum did Judas sell his Lord and Master?—Matt. 26: 14-16.

NEWBURY

Mrs. Hugh Callan has returned to Toronto after visiting Mrs. Lamb.

Roy Babcock and family and Mrs. Merritt, of Louisville, spent Sunday at C. Babcock's.

Mrs. Wm. Glennie is visiting her daughter in London.

Mrs. Wm. Chittum, of Walkerville, visited her sister, Mrs. Wm. J. Martin, last week.

Richard Perks has returned from Glencoe.

Dean Starr, of Kingston, preached in Christ church on Sunday.

J. A. Armstrong, of Strathroy, and brother, T. E. of London, called on friends here Sunday.

James H. Bayne, of Detroit, spent the week-end with his brothers here.

John Stephenson and daughter Donna, of Walkerville, and Mrs. J. Whitaker and Mrs. Carrie Gay, of Windsor, spent the week-end with Miss L. Gay.

George Smith left on Saturday for Norwich, having taken a position for two months in an evaporating factory.

WARDSVILLE

Misses Spence and Saunders, of Fort William, are guests at the home of Miss Spence's sister, Mrs. F. Radcliffe.

Mrs. G. Cornelle is visiting her daughter, Mrs. Ward, in Windsor.

Misses Maud and Violet Murphy left Monday for Toronto, where Violet will enter Toronto University and Maud goes into the third year.

Miss Isabel McCracken, of London, was a week-end visitor with her cousin, Miss Janet Elliott.

Mr. and Mrs. Chas. Banning, of Detroit, are visitors in the village.

Mrs. Taggie and two sons, of Detroit, spent the week-end with Mrs. J. Sloan.

Arthur Murphy, of Toronto, spent the week-end at his home here.

Miss Muriel Willis went to London on Monday, where she will enter second year at Western University.

Mr. and Mrs. J. Sloan and Victor attended Elderton Fair on Friday.

Malcolm Elliott left on Monday for Toronto, where he will enter University.

Special service was held in the Anglican church on Sunday afternoon for the M.S.C.C. Rev. Mr. Starr, of Kingston, Dean of Ontario, was the preacher.

Friday was field day for the Wardsville schools. In the high school the different events were run off and the following are the winners of the medals: Junior girls, Madeline Fisher; intermediate girls, Marion Reid; senior girls, Lorine Henderson; junior boys, Albert Bridgette; intermediate boys, Clarence Scott; senior boys, Brerton Woods.

A dance was given by the W.H.S. students on Friday evening in the music hall here which was a decided success from all standpoints and a credit to the committee who were in charge.

The regular meeting of the Young Ladies' Auxiliary of the Presbyterian church will be held on Saturday at 2:30 p.m. at the home of Miss Atkinson. Besides the regular topic Mrs. O. J. Glenn will give an address on Health. All the young ladies are welcome.

CASHMERE

Mrs. Chas. Tunks is visiting her daughters, Mrs. Emery Kelso and Mrs. J. T. Brown, in Pontiac, Mich.

Mrs. Earle Tunks and son Glenn and Miss Jean Tunks motored to Chatham on Monday.

We are sorry to hear of the death of Mrs. Bloom, of Orford, and extend sympathy to the bereaved ones.

A number from here attended the Glencoe Fair on Thursday.

Wed. Dark had the misfortune to sprain his ankle last week.

Miss Elsie and George Thompson spent the week-end at their home here.

Miss Hazel Bobier, graduate nurse, of London, is visiting her sister, Mrs. Hugh Taylor.

PRATT'S SIDING

The September meeting of the Book Club was held at the home of Mrs. Thomas Gardiner, with an attendance of twenty members and eight visitors. The president presided and after the business part of the meeting was discussed a splendid program was given. Miss Mary Hodge delighted the gathering with her recitals, and the piano solos by Miss Carrie Gardiner, Mrs. Siddall and Mrs. A. Gardiner were much appreciated. Collection amounted to \$2.35. The next meeting will be held on October 8th at the home of Mrs. Wm. Reycraft. A paper on "Temperance" will be given by Mrs. Annie Walker. The attendance of all members is requested as this is the annual meeting.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eucalypti Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

KILMARTIN

Mrs. Fallick, of Middlemiss, has returned home after visiting her sister, Mrs. Alex. M. Leitch.

Mr. and Mrs. Alex. McCallum, of Cleveland, spent last week with his parents, Mr. and Mrs. Hugh McCullum.

The sacrament of the Lord's Supper will be dispensed in Burns' church next Sunday morning. Preparatory services on Friday at 11 a.m. and 8 p.m.

Mr. and Mrs. Wm. Robertson and family, of Ottawa, left on Tuesday after spending a couple of weeks with his parents at the manse.

Mrs. Ann Fulker, of Windsor, is visiting at Neil L. McKellar's.

The Ladies' Aid met at the home of Mrs. Neil McKellar on September 24, with a good attendance. A quilt was quilted and part of one pieced. The devotional exercises were in charge of the president. Lunch was served. The meeting closed with the National Anthem. Collection, \$7.95; fees, 75c; total, \$8.70.

Mr. and Mrs. Dan Robertson and son Donald, of Chatham, called on friends here last Wednesday.

Tom Williams and Will Baisey, of Detroit, spent a few days at Thomas Williams'.

Miss Anna Dewar and Mrs. Ray Tyrell have returned to Detroit after spending some time at the home of their parents, Mr. and Mrs. Alex. Dewar.

CAIRO

Mrs. Isaac Misner, of Orford, is spending a few days with her mother, Mrs. Carran.

Mac. Smith and Bert Badder, of Windsor, spent a few days with relatives here.

Mr. and Mrs. Gordon Smith, of Windsor, and Mrs. Taylor spent Sunday at Cairo.

Miss Gladys Murray spent the week-end at her home here.

CAIRO

Mr. and Mrs. G. L. Smith and son Douglas attended the Cairo anniversary on Sunday.

Wilfred and Miss Thelma Nash, of Bothwell, and Miss Viola Shortt, of Shelburne, spent Sunday with Miss Jean McKeown.

Miss Anna Murray spent the week-end at her home in McCready.

Mrs. Roy Downie and daughter Helen are visiting in Strathburn.

Mr. and Mrs. Calvin Burr and son Jack and wife, of Detroit, visited at the home of Alex. Armstrong recently.

Miss Beatrice Prangley returned to Detroit on Sunday after spending several weeks at her home here.

Fred Macaulay and Vincent Curran are visiting in Detroit.

Miss Alice Treastin, of Strathburn, spent last week with her sister, Mrs. Roy Downie.

NORTH EKFRID

Miss Ellen Cobban, of Saskatchewan, has been calling on friends in this vicinity.

Miss Emma Klemm, of New York, is the guest of Mr. and Mrs. Henry Roemmel, sr.

Miss Irene Ramey returned home Sunday after holidaying in the United States for the past six weeks.

Silo-filling is the order of the day here. Henry Pettit started the machine humming last Thursday. He is first this year.

Mr. and Mrs. Will Clark, of London, spent Sunday with Mr. and Mrs. Henry Roemmel, jr.

Mrs. Rachel Ann Snelgrove, of London, spent the week-end calling on relatives in this vicinity.

Will Cobban has returned home from the Strathroy hospital, where he underwent an operation for appendicitis. We are pleased to hear that he is doing nicely.

A number from here attended the Glencoe Fair last week and report a good exhibition.

A large number attended the miscellaneous shower which was given to Mr. and Mrs. Herb Klemm last Wednesday evening. They received many beautiful and useful presents.

The evening was spent in a social way and lunch was served at midnight.

Mrs. Foster returned home last Tuesday after an extended trip to London and other points.

We are pleased to learn that Miss Emma Klemm is improving nicely after undergoing a serious operation in St. Joseph's Hospital, London.

Born — to Mr. and Mrs. Henry Howe, of Carleton Place, a son.

Mr. and Mrs. Alfred Webber and sisters have returned to their home in Newark after spending a few weeks in this neighborhood.

PARKDALE

Mr. and Mrs. Harry Fisher went to Windsor on Thursday last to attend the funeral of his brother, John Fisher, whose death resulted from a fall when a scaffold gave way while working on the construction of the new filtration plant in that city.

George Campbell, Merlin, spent a few days last week at the home of his parents here.

Edythe Thompson returned home on Saturday after a pleasant visit with relatives in Adelaide township.

Mrs. W. Chittim has returned to her home in Windsor after a visit with her sister, Mrs. Wm. Martin.

Chas. Nichols, who has been quite ill for the past month, is convalescing at the home of his sister, Mrs. Martin.

EKFRID STATION

Rev. Mr. Stevenson, of Appin, will address the ladies of the Eureka Club Thursday afternoon, October 2, on the plebsicite. The ladies are requested to bring their donations for the bazaar.

APPIN

Mr. and Mrs. Arthur Belbaek and daughter Pearl, of Jarvis; Mrs. Hayes, of Brantford, and Mr. and Mrs. Geo. Tuffin, of Riverside, spent Monday with Mr. and Mrs. Orville Hathaway.

Misses Ada and Ida Tannor have returned after visiting relatives in Hamilton, Port Dover and Jarvis.

An interesting meeting of the Appin branch of the Women's Institute was held at the home of John Fletcher, with a large attendance, forty ladies being present. Splendid reports were given by the various officers. The school fair report was especially satisfactory. Many items of business were discussed and settled. An address on the temperance question was given by Mrs. Jas. Lotan, sr., after which a splendid discussion on the subject was held and many points of interest brought out. After the program a splendid lunch was served by the girls of the institute, who had charge of the social hour.

The decorator's work on the Methodist church here is completed, and the excellent work done by Mr. Moffatt, of London, is being remarked extensively. The ladies have had been putting down the carpet and preparing in general for the reopening next Sunday, which is to be held morning, afternoon and evening and is looked forward to with great anticipation.

Miss Gertrude Lofan, nurse-in-training at Victoria Hospital, London, is spending her holidays at her home here.

Mr. and Mrs. E. V. Thornicroft and family spent Tuesday with relatives in Arkona.

There will be no service in the Presbyterian church next Sunday on account of the reopening of the Methodist church. The Sunday School will also be dispensed with.

The date for the Presbyterian anniversary services has been set for October 26th. Further announcement later. There will be no tea meeting this year and the managers are asking for a special thank offering so that the books may balance this fall.

Russell Gray returned to Detroit on Sunday.

Roy Lawrence and Wm. Nicholson, of Detroit, spent the week-end with Shetland friends.

George Newlove, of Detroit, spent Sunday at Fred Jeffery's.

Miss Willa Elliott and Miss Florence Simpson, of Windsor, spent Sunday at James Elliott's.

Mr. and Mrs. James Jeffery spent Sunday at Fred Jeffery's.

SHETLAND

Mr. and Mrs. Showers, of Royal Oak, spent the week-end at William Bolton's.

Miss Maisie Pace, of Detroit, spent a few days with Mrs. Robert Gray.

Miss Bessie Jeffery, of Detroit, spent the week-end at her home.

Russell Gray returned to Detroit on Sunday.

Roy Lawrence and Wm. Nicholson, of Detroit, spent the week-end with Shetland friends.

George Newlove, of Detroit, spent Sunday at Fred Jeffery's.

Miss Willa Elliott and Miss Florence Simpson, of Windsor, spent Sunday at James Elliott's.

Mr. and Mrs. James Jeffery spent Sunday at Fred Jeffery's.

RIVERSIDE

Miss Margaret McCallum has returned to her home at Drayton after spending a few days with friends here.

J. R. Campbell is visiting friends in Drayton.

Mrs. M. A. Campbell, who has returned from Strathcona, Alberta, after spending several months there with her daughter, Mrs. O. A. Brown, is the guest of Mrs. N. Mullins.

Miss Margaret Murray has gone to London to attend Normal School. Glad to know that Gordon Lucas is recovering from injuries sustained while attempting to drive a herd of cattle out of a field of standing corn recently. A passing freight train frightened them and they trampled over him, fracturing his collarbone and causing other minor injuries.

STRATHBURN

Mr. and Mrs. George LeBeuf and Edward Cleere motored from Detroit and spent a recent week-end with friends here. They were accompanied by their daughter, Mrs. Edward Cleere, and children, who have been spending a couple of weeks with her sister, Mrs. Major Grover.

MELBOURNE

Rally day was observed in the Methodist church on Sunday morning by holding a special service, the superintendent presiding. Several of the children took part in the services, and the pastor gave a very instructive talk. The S. S. classes and teachers occupied the front seats. The altar was decorated with flowers.

Blank oil leases for sale at the Transcript office.

Many Women Use Glycerine Mixture

Women appreciate the quick action of simple glycerine, buckthorn bark, etc., as mixed in Adlerika. Most medicines act only on lower bowel but Adlerika acts on BOTH upper and lower bowel, and removes all gases and poisons. Excellent for obstinate constipation and to guard against appendicitis. Helps any case of gas on stomach in TEN minutes. H. I. Johnston, Druggist.

FAIR A SPLENDID SUCCESS
