Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/
Couverture de couleur
- Covers damaged/
Couverture endommagée
- Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- Cover title missing/
Le titre de couverture manque
- Coloured maps/
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- Bound with other material/
Relié avec d'autres documents
- Tight binding may cause shadows or distortion along interior margin/
La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure
- Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/
Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments:/
Commentaires supplémentaires:

- Coloured pages/
Pages de couleur
- Pages damaged/
Pages endommagées
- Pages restored and/or laminated/
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/
Pages décolorées, tachetées ou piquées
- Pages detached/
Pages détachées
- Showthrough/
Transparence
- Quality of print varies/
Qualité inégale de l'impression
- Includes supplementary material/
Comprend du matériel supplémentaire
- Only edition available/
Seule édition disponible
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image/
Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

The National-Revenue Question.

The actual amount of revenue accruing to the Dominion Government from the liquor-traffic in every form for the year ending June 30th, 1896, is set out in the following table:

EXCISE DUTIES.

On Canadian spirits	\$4,029,359	
On malt liquors	6,748	
On malt	775,354	
		\$ 4,811,461

LICENSE FEES.

Distillers' licenses	\$2,500	
Malsters' licenses	6,200	
		\$ 8,700

CUSTOMS DUTIES.

On imported ale, beer, wines, and spirits of all kinds	\$2,242,763	
On imported malt	8,391	
		\$ 2,251,154

Total revenue..... \$ 7,071,315

This amounts to about \$1.37 per head of our population. It is estimated that about 32 cts. per head is for spirits used for medicinal, mechanical and scientific purposes, and that the revenue from the liquor-traffic for beverage purposes is about \$5,400,000, or about \$1.05 per head of the population.

In leaflet No. 1 of this series, it is shown that consumers of liquor pay for it the sum of \$39,879,854, and that the country is impoverished by the full amount of the money paid for liquor. If this traffic is stopped, the people at large will be richer at the

end of a year by \$39,879,854 than they would have been if the traffic had continued. In ten years the change will make a difference of more than \$400,000,000 in the wealth of the community.

Here lies the answer to the question "What about the revenue?" It is hard to collect money from people who are poor. We make revenue-raising easier by making people better off. The Toronto Globe of May 19th, 1897, states the case forcibly in the following paragraph :--

Taxation paying power depends not on the number of items in the tariff, but on the number and wealth of the people. Consequently the fiscal result of Prohibition is to be judged by the answer to this question: "Will it increase or diminish the taxable wealth of the people?" If wealth is increased, the expense of Government, as of everything else, can be more readily borne

The liquor traffic robs us of much more than the amount which the liquor consumed costs. It has been shown that through intemperance we lose yearly more than \$100,000,000 additional in various indirect ways. Prohibition would enrich our country, and the richer country would yield a richer revenue.

Much of the money saved from drink would be expended for other goods that pay duties, and here would be new revenue at once. An English Parliamentary Report shows that in the years of the Irish famine when the Government closed the distilleries, the people of Ireland bought more tea, sugar, clothing, hardware, etc. than in the years of plenty and a greatly increased revenue was collected on these goods. When the great Father Matthew temperance revival reached its height the yearly revenue from liquor was vastly reduced, but the total yearly revenue collected was £90,000 sterling above the average.

It might be needful for Parliament to plan to meet the revenue deficit for a year or two, but soon we would find a rising revenue flowing in from a happier and wealthier people. It is easy to pay taxes when there is plenty of money to pay with.

Various methods have been suggested by which the revenue now derived from the liquor traffic may be at once replaced when prohibition is enacted. It is not the purpose of this tract

to advocate any special plan. Parliament may be relied upon to adjust its revenue-raising so as to make it as effective as possible, and at the same time as easy as possible to the people. Some of the suggestions that have been made are however, here submitted as information :—

The whole amount might be raised by direct taxation, in which case people would have to pay about one-sixth of the amount they now pay for liquor, retaining the remaining five-sixths and leaving them as a whole more than \$30,000,000 better off than they are under the present plan, a new \$30,000,000 being added to their wealth each year. Direct taxation is however, only one of the available methods of revenue-raising.

A tax of one half-cent per pound on sugar, seven cents per pound on tea, coffee and cocoa, and sixteen cents per pound on tobacco, levied on the quantities of these articles now used, would make up the amount named, \$1.05 per head, or \$5,400,000 on the whole.

The Government might take over the liquor-traffic remaining for permitted purposes, carry it on and retain all the proceeds. It is estimated that this would give a revenue of about \$4,000,000. It would be the safest way of supplying pure liquor for medicine, etc.

If the plan just mentioned were adopted, the balance of \$3,000,000 to make up the whole temporarily displaced revenue, could be secured by an extra excise duty of thirty cents per pound on the quantity of tobacco now consumed.

The same amount could be secured by a special customs duty of four and one-half per cent. on the value of all imported goods that now pay duty.

On the preferential duty plan it could be obtained by an extra duty of seven and one-half per cent. *ad valorem* on the quantities now imported of all other than British goods, leaving the duty on all imports from Great Britain unchanged.

As it is clear that the deficit would only be temporary and that a richer country would soon make up the missing revenue, the temporary deficit might be met by a special loan as in the case of some other national emergency.

All that has been said to the effect that under prohibition our people would be richer and our national revenue really

helped instead of hindered, is forcibly corroborated by statements made by many of the world's ablest financiers. The following paragraphs are taken from speeches made by two eminent British Chancellors of the Exchequer.

W. E. Gladstone. Gentlemen, you need not give yourselves any trouble about the revenue. The question of revenue must never stand in the way of needed reforms. Besides, with a sober population, not wasting their earnings, I shall know where to obtain the revenue.

Sir Stafford Northcote. If the revenue diminishes from increased habits of temperance the amount of wealth such a change would bring to the nation would utterly throw into the shade the amount of revenue that is now derived from the spirit duty; and we should not only see with satisfaction a diminution of the revenue from such a cause, but should find in various ways that the Exchequer would not suffer from the losses which it might sustain in that direction.

Sir A. T. Galt, Sir Leonard Tilley, Hon. Geo. W. Ross, Hon. Geo. E. Foster and many other Canadian statesmen have as forcibly expressed the same views. The last named gentleman on one occasion, after setting out the vast drain that the liquor-traffic had made upon the country during a number of preceding years, added these words:

The wonder is that with such terrible waste our country enjoys any prosperity. If this waste could be made to cease, Canada in ten years would not know herself, so prosperous and wealthy would she have grown.

Speaking on another occasion of the probable results of Prohibition upon the national revenue, he said:

Although direct receipts from this traffic would certainly be expunged from our revenue, still the improvement in the general commerce of the country, the improvement in the general welfare and well-being of our community, would be so great that the receipts in all other branches of our revenues would be increased correspondingly, and there would practically, after the first year or so, not be any diminution whatever in our revenues from our tax-payers.

PROHIBITION PAYS.
