

speculators would be tolerated in Germany or any European country, not even England.

# NICE FAMILY QUARREL **ON SIR WILFRID'S HANDS**

Some Liberal Politicians Have Decided That it is Time for Hon. Frank Oliver to Quit and he Refuses to See Eye to Eye With Them.

OTTAWA, April 29 .- (Special.)-The chief of the family troubles of the Liberal party is the situation regarding Hon. Frank Oliver, minister of the interior. It may be summed up by the statement that a number of more or less prominent Liberals want Mr. Oliver's scalp, and he objects to the unpleasant proceedings. What makes the scalping process difficult is that the flowing-moustached westerner is a born fighter, to whom a conflict is

The vendetta originated at the time the Alberta Rutherford goevrnment had its troubles over the Alberta and Great Waterways Railway, and the attitude of Mr. Oliver may fairly be attitude of Mr. chive position assumed surmised from the position assumed by his newspaper, The Edmonton Bul-letin. The Bulletin supported the letin. The Bulletin supported the Rutherford administration just as long as it decently could, and when that government reached the end of it. usefulness to the Liberal party, The Bulletin came out against it. To-day Mr. Oliver's paper supports the Sifter

of the interior. This, however, was not to his liking, and he succeeded in financing a newspaper venture in Cal-gary, The Clagary News. His career there was a failure and he found that

he could not inspire enough confidence

to command further capital when his

every respect the best ever.

We could not have finer spring weather than we have been getting for the past three days now; the only flaw is the smoke in the atmosphere caussmoke in the atmosphere caus-ed by burning grass and the ab-sence of rain. There has been only one stimulating shower so far this spring, and another badly needed. Nevertheless, the buds of the trees are swelling, and the fall wheat in the freids is greening, and shows a rervid growth. One shower will bring about great transfiguration in nature, and that shower is about due; in fact, for some reason or other it has been de-terred, but only deterred. The World asked the weatherman what was holding back the rain

and he said. "There has been a depression from the southwestern states moving slowly towards the lake region, which made it look like rain. We will get it in Toronto on Saturday night and Sunday. The southwestern parts of Ontario got rain Saturday morning and Friday night."

HOUSE

OF HOMES

With the coming of May, moving and housecleaning will be the chief pastime of thousands of homekeepers and this store will play the usual star part in providing new pieces of furniture, rugs, draperies, etc., to replace worn out and discarded onesthe Adams' store is the logical choice for home buyers when new home things are required.

The stocks in the various departments this season are a joy to behold. We have never shown so many new designs of furniture at one time-so many pretty patterns of rugs and carpetings-such a really delightful display of draperies and curtainings-so many new things for comfort and utility about the home.

Prices are, as a matter of course, the lowest the market offers because of our unequalled buying facilities, and when it is remembered that anything may be bought on our generous "Charge Account" Plan, it removes every vestige of excuse for anyone going without the necessary comforts or luxuries that the home calls for.

# **A Tempting Feast of Underpriced Home Needs for Monday**

a train of speculation as to what strange succession of happenings brought it here to be sold side by side with the relics of crime and shame. Then there was the comedy. A baby carriage and a nursing bottle went to ; young man for \$1.25. A baseball mask and three horseshoes went to another for 30 cents. A bracelet of defaced

nickles went for 20 cents. There were statement replied that he had nothing five of them. A Bible and a pack of to say at present. went for five cents. A pair of top boots In the house yesterday, Sir Wilfrid and a hammer went for 50 cents. A said he would leave the question with bunch of keys and a street number parliament. Favor Movement to Cut Them Down-Good Enough as They Are for the Methodists.

"It will not come in our generation," remarked the Rev. Canon A. W. Mac-nab, M.A., of St. Alban's Cathedral, m. discussing with The Sunday World the movement in the Anglican Church in the United States to shorten the ten commandments. Even if such a step were taken in the United States, he did not think that it would affect the Anglican Church in Canada, "We would follow their example only

after the prayer book is revised. Noth-ing could be done until the revision BELL BOY IDENTIFIES JAMES B. M'NAMAR

Dangerous to Tamper. 'It must be remembered that it is a dangerous business to tamper with the prayer book after having had it in its prayer, book after having had it in its present form for three hundred years. There are some things we would like to change, but if we did, we would not know what would happen. This ques-tion is an old one, and has been before the church year after year. We could not here in Canada speak of change until it is done in England, for we use the same service as there." Rev. Lawrence Skey, rector of St.

Anne's Church, one of the largest Ang-lican churches in the city, and of the evangelical branch, saw dangers ahead should an attempt be made to shorten the prayer book "We are a little afraid of tampering

with the prayer book on account of the two sets of the church. One party vould want one thing, the other party something else, consequently serious dangers would be ahead of us." Shortened in Communion Service.

In the American Anglican church, ontinued Mr. Skey, the ten commandments were shortened to two in the dommunion service, namely: "Thou shalt love the Lord with all thy might, with all thy soul, and with all thy mind, and thy neibhbor as thyself." These were the Lord's own words. At present there were only little differbetween the services in the United States and Canada. They were a little more elastic in the States, he thought. "We would all be in favor thought. of a little classic ong." present is pretty long." Methodists Affected. of a little elasticity. The service at

Rev. S. P. Rose of Sherbourne-st. Methodist Church, does not see how the movement in the States will have any connection with the Methodist Church in Canada. Methodists would not be at all affected. They are satis-fied, as far as he knew, with the commandments as they were. No move-ment to shorten them was in the

Now seven years of age, Jack Atkin has raced almost continuously, winter and suumer, and a more consistent and suumer, and a more consistent racer never wore iron. Always the ap-ple of his owner's eye, he reached the summit of his racing career by win-ning the \$10,000 Dominion Handicap at Fort Erie. True, the company which he met did not call for extended de-lineation, but the fact that the son of Sain successfully negotiated one and one-quarter miles after having been condemned as a sprinter pure and simple, was more balm to Owner Schrieber and Trainer Powers than the lucrative purse. Shortly after that race the horse developed a spread hoof, which was aggravated at Juarez the past winter to such an extent that he was thrown out of training and this precipitated the decision of Mr. Schrie-

#### per to retire him permanently. His last victory was in the Tampico Handicap last December at Juarez, when, with 128 pounds on his back, he

meeting ladies' needs.

master of the winning troop, who are members of that troop on the 30th September, having served at least six months with the troop, will be pre-sented by the headquarters with a badge of merit. In case of equality of numbers of king's scouts or any other difficulty, the allocation of the prize will be de-cided by the chief scout for Canada. All troops should get busy and work for the shield. Efficiency is necessary in every corps, but work for the max-imum amount of efficiency. It is no empty honor to be termed the "King's troop of scouts of Canada," and ev-ery troop should be after the trophy. Scoutmasters Mest. Scoutmasters Meet. This is indeed a unique

Scoutmasters Meet. On Wednesday evening, the Scout-master's Association held their regumaster's Association held their regu-lar meeting at 792 College-street. Mr. Kirkwood read a paper on the slec-tricians' badge, which was followed by a general discussion. The meeting also discussed camp prospects. The idea of a common camp was advanced, but the general trend of opinion was that a number of scontarts common with easy marching

CORNER FOR BOY

SCOUTS

The provincial headquarters' council for Ontario of the Baden-Powell Boy Scouts have received information from the headquarters' council in England that His Majesty King George has generously contributed to the funds of the organization and it has been de-

the organization, and it has been de-

cided to devote a portion of that amount to inaugurate an efficiency

competition. With that object in view it has been decided to present a challenge stand-ard to the troop of Canadian Boy Scouts, of not less than 24 lads which

scouts, of not less than 24 made has the largest percentage of king Scouts on the 30th September, in each Year, commencing 1911. Each king's scout must have been a member of

Soth September. The winning troop will be called the "King's troop of Canada" for the year. The scoutmaster and assistant scout-master of the winning troop, who are

separate camps with easy marching distance of each other, so that the troops might work in conjunction, and yet be separate, would serve the best interests of the movement.

Presentation to Taylor Statten. The 5th and 9th troops made a pre-sentation of a gold thanks badge to Taylor Statten, the popular boys' sec-retary at Central Y.M.C.A. on Thursday evening, in appreciation of the interest he has taken in the troops, and his many services to the scout orps in general.

5th Troop.

In conjunction with the 6th troop, the 5th troop met at Birchcliff Satur-day afternoon to practice first-class tests, and to judge distance in the competition for the marksmen's badge. A most enjoyable outing was spent.

Outdoor Display. The 5th troop is making arrange-ments for an outdoor display of scout work to be held at Birchcliff in about month's time.

THE TORONTO WORLD

The Inside of Our Coats

## **A Visit to Thorncliffe** Youngsters That Look Good and Older Horses That Have Seemingly Improved With Age-A Stable That Appears Especially Strong in Two-Year-Olds.

Matters are beginning to look a little more like racing down at the Wood bine and in the neighboring country. The delightful weather of the past week did wonders in drying up the track and helping things forward cenerally. Trainers are decidedly more hopeful and from now on can be de pended upon to rush their preparations. Already a few interesting sprints have taken place, and real work is now al-most due. Up at Mr. Robert Davies tak at Thorncliffe, Johany Walker has been able to move his charges along for some time and has put them to is certainly maintaining his reputa-tion. A better kot of two-year-olds the tax and if they only perform as well as they look there will be a few dollars to not al there will be a few dollars to pay for the bin. Thorobrets owne high and take a lot of keeping al would therefore he pleasant to be able to record the Thorncliffe stable.

they look there will be a few dollars earned to pay for the bin. Throrobred come high and take a lot of keeping it would therefore he pleasant to be able to record the Thorncliffe stable as about the top of winning owners. Of course the King's Plate candidate Sanderling, was on view and he is booking and moving well. His stable will his stable will take some companion Chapperal, the disappoint-ment of last year, is sound on his dicky ing up to date, but whether he will remain so is a doubtful problem. If he stands up, the stable will take some beating for His Majesty's Guineas, for the is a very fast horse. Horse, how-ever, are uncertain and Chapparal must be set down as beyond doubt one of that case. His speed and willinguess is at ot be be produced at the post. Still the Davies stable has a chance of whining and there is less likeling things all their own way than appear-dolars at fail, when the representatives of that confederacy as two-year-olds a race that is all over but the shouthy, as tather appeared then, it begins as taff when the representatives of that confederacy as two-year-olds a race that is all over but the shouthy, as taff when the representatives of the valley Farm stable having things all their own way than appear-will be more than one contender, were in their case will bring its re-ware. Kas indeed might be expected in the work that a well-known bar toke no d. as indeed might be expected it in deades will worship her, but the booked they don't do some theas draw the uproaching meeting. Patience, how-wer, in their case bas is an all beat-er, but handsome is as handsome does is of nothing ture than of horse flesh is us on serve alo on against his pros-pocts, first money probably amounthy to \$3.300. But if the Davies represent atives should not snatch the guines to two-year-olds have an excellent town of a stard well see what we shall see. In the uncertainty of would probably beat her to a stand-ting at the tow-year-olds he wo is a case of a bey down and an anagement. The are three or

to \$3.300. But if the Davies represent-atives should not snatch the guineas the two-year-olds have an excellent chance of pulling a few plums out of the fire. A list of the horses in Training. A list of the horses in training at Thornellife follows: Fair Annie, (third in the Ontario Jockey Club cup, 214 miles last fall), br. m. 5, by hup. Hawkswick (son of St. Simon)-Fair Annette. CONTRE SIN

A Review of Exhibits and Judgments With Some Com- have I to support my view My own mendation of the Praiseworthy Devotion of the Gentlemen Forming the Executive.

Also a Suggestion or Two Which, Being Adopted, Might Lead to Betterment so Far as the Spectators are Concerned-The Greatest Function of the Kind Yet Held in Toronto.

The only man is the judge. He may sometimes see the best of the game, or mistaken. It is not given to any think they do, but even the merit of a Then again horse cannot be satisfactorily passed hat have you upon by merely gazing at the animal mere man to be infallible. Then again he may be right. And what have you got to set against his verdict. Your from afar off. A Case in Point.

His opinion is expert; yours A case in point is the decision of the what, All the same funny things occur th judging horses. Popular acthings judges in the hunt team contest at claim is nothing. It is merely the horse show. Mr. Emilius Jarvis opinion of favoritism, founded maybe won with three well-matched, well put wish and founded maybe on spec- up greys. The performance of his cularism. In the horse show just squad was perhaps hardly the equal sed there were decisions that of one or two other squads, but both of his tacularism. In elicited adverse comment. There are horses and appointments counted. For always men who violently differ with real work I would hardly like to take always men who violently differ with real work I would hardly like to take judges and frequently impute false Mr. Jarvis' three against one or two motives. There are blased judges of of the other combinations. At the same time I may be wrong, for what the there were a number of enterts porses probably but lookers on may

placing of the timber for the jumps, not the dam of exhibits wherever pos there was an air of business and a lack of fuss and flurry that was resible, especially in the breeding and special classes, such as the Governor-General's cup. arkable. Still the spectators could doubtless have done with a little more of the rattling chain, champing bit and

idea, and that of others who had no better oppertunity to judge than my-self. That Mr. Japuis' action myyet there was plenty to entertain. The Cumberland Stables, by the way. left no doubt as to which side the pro-prietor was on in the reciprocity ques-tion, with his Cumberland Free Trade and his Cumberland Reciprocity. Hon was not faultless is possible, but that on the whole de was fairly entitled to the pride of place is more than likely, even the bavies-Taylor-Maccabe outfit gave the best example of real hunt riding. The marvel of it was that after such an exhibition they were counted out of the running altogether. two teams of the Eng isclare Hunt, and Hume Blake's triplet from the Toronto Hunt, as well as Mr. Jarvis' toupe, securing awards ahead of them. However, altho disappointed, they accepted the course of events in a decidedly sportsmanlike spirit, cheerfully keeping their own counsel and saving nothing. Next time they will doubtless pay more heed to appoint-

ments. The Attendance. If any doubt lingers in men's minds s to Torontonians' love of the horse love of the horse as to Toront st have been dispelled if the sors of those same minds had the pleasure of gazing night after night on the large, brilliantly arrayed gatherings that assembled in the Armories from Tuesday to Saturday. Notwithstanding that there was no military tournament attachment, alng, amusing and interesting military questrian events, the attendance was equal to last year, when the soldiers ormed half the attraction. The harem kirt did not put in an appearance, or int did not put in an appearance, or least had not up to Friday night, it there were many rich, fairy-like ad quaint gowns some in exquisitely ainty taste and some extremely outtful in artistic effect. But what natters it when faces are bright and bretty and people are happy. It is a justion if any city could show a greater array of beautiful women and men. It was wonderful, and what was more satisfactory than all

said, the whole affair from first to last went off without a hitch. The Exhibitors.

If the vomen were fair and the men horses were both excellent in quality. gallant, the numerous and the fact that George Pepper, virtually the father of horse shows in Canada, instead of being the principal exhibitor and largest winner, contented himself with presiding over the destinies of the ring and seeing to the marshalling of things, and Hon. Adam Beck, the power minister, who with his gracious better half, has always hitherto been well to the fore, contented himself with sitting in true democratic style in the eastern gallery, where the real practical horse spirit gathered in force, and from which point the best view was obtainable, there was a better showing than ever efore, thanks to the enterprise and liberality of such comparatively new-comers as Hon. Clifford Sifton, Hon. R. Stratton, Emilius Jarvis, Mrs. Warren, Sir Henry Pellatt, E. D. Wilmore of Belleville and others

clare's Vicercy from Cork coming second. combined with such older but still generous exhibitors as Miss K. L. And now we come to the big factors Wilks, Joseph Kilgour, H. C. Cox, J. J. Dixon, Hume Blake, Allen Case, in the success of the she

ment to Sir Wilfrid Laurier in the naming of his magnificent pair My Pride and Premier. Dr. Gordon Mac-pherson affected the newspapers in his nomenclature and Sir Henry latt. who was hardly as success might have been expected, went in for triplets with his Casa Loma Squire and his Casa Loma Matchless. Harry A. Taylor, the prince of a peaceful trade, was inclined to be warlike with his Conqueror and Conquest, who made a brave showing in the carriage divis-

High Steppers.

The high-steppers were numerous and of merit. In class 13 there were no fewer than 27 entries and Hon. Robin New York for the international Beith earried off the honors with a dashing and sparkling bay gelding well named Fireworks. Sir Henry Pellatt's Storm King, a New York win-ner, ran him hard, but Fireworks had the flourish and vim. Fireworks and Flourish won the pairs with Miss Wilmatches, recently spoke of the great interest His Majesty the King is taking in the outcome of the trip. Before leaving His Majesty wished the team every success and Captain Lloyd was kes cross pair, Black Princess and All favored with a long audience. Speak-Ablaze, second. A. Yeager rather un-expectedly captured the King Edward challenge cup, running first and sec. "I do not know that we are strikchallenge cup, running first and sec-ond with Earl Grey and Eye Opener, ingly confident of success, but T think ond with Earl Grey and Eye Opener, two particularly handsome bay geld-ings, J. J. Dixon twice a winner, only being awarded third and fourth with Dublin and Flourish, a namesake of Senator Beith's high-stepper. Altho he would naturally have fixed to win Mr. Dixon satisfingly accepted the verdict and was the first to congratulate Mr. Yeager, who, as he promised to do, certainly put up the freatest array of quality of the life. The Senator also won with his tandem, but the Hon. J. R. Stratton gave him a grand argu-ment. Miss Wilks also made a good showing, as did Messis. Smith and Clancy, of Gait. The four-in-hands were dissappointing, only two showing we have an exceedingly good chance of winning the cup. I feel sure that the team which will represent England this year will prove stronger than that which was vanquished two years ago. I am the only member of that team in the present combination, but where-as the side of two years ago was more or less a scratch team, the whole of the players now in America have an intimate knowledge of each other's play. All the officers have had exper-tence in India, and that should be of immense value to us. The grounds immense value to us. The grounds here are harder than in England and were dissappointing, only two showing up, the Ennisclare Farms beating Mr. Yeager's quartette. Hon. Clifford Sift-

consequently the player has greater quickness and agility. "It is only a personal opinion, but I assume that the game will be playon, Hon. J. R. Stratton, and Dr. F. C. Grenside were in front in the combin-ation classes, the apti-reciprocity gentleman winning with Florham Filination, a big impressive mare in the ourse 15 2 classes differences of the Dr. Grensides ed very fast, and our team will be able to do that, because of their train. ing on the Indian polo grounds. were beaten two years ago because of the speed of the Americans. They are all clever racquets players-ind they play most ball games, and to this gelding, second. In the under 15.2 class Mr.Stratton's None Nicer landed I ascribe their exceptional quickness of eye and hand. They will hardly be from Mr. Yeager's Day Dream and Mr. Allen Case's La Belle. None Nicer also won in the saidle class, Crow any better mounted than we are among our 35 ponies are a large number of splendid animals-we could not and Murray's Lounsborough Madge, separating her in this instance from have better, altho a number of them are very young."

Lost the Cup.

Standard of English Polo. Flirtation also won the blg saddle class, the Ennisclare Stable's Purvis "Do you think the general standard f English polo has varied much in unexpectedly relegating Metropolitan to third place. Sir Henry Pellatt scored with Indian Chief, a grand big gelding in saddle class 27, the Ennisent years?" Capt. Lloyd was asked. "I do not," was the emphatic reply, and Capt. Lloyd proceeded to say that he thought it was quite as good, if not better, to-day than it ever had been. "It is essentially a military officers' game," he added, "and the experience gained by the officer in India is of the utmost value. Moreover, my fellow w-the hunters

Prospective purchasers of any class of horses will do well to visit our stables before buying elsewhere. We are guaranteed for next week horses of every possible class and price, and can furnish any buyer with the horses he requires to his own entire satisfaction. We have also a few special lots for Monday, to which we would call your attention :

- MONDAY NEXT-

Bush Horses! Bush Horses!

TUESDAY 350 HORSES

THE BEST SELECTIONS OF ALL CLASSES: Heavy Draughts, General Purpose, Express, Delivery, Farm Chunks, Workers, Wagon, Horses, Drivers and Carriage Horses.

We will have a big run of horses next week and buyers of any class cannot benefit themselves more than by attending our Tuesday sale. We sell as Commission Agents only, and the commission is our only interest in the sale of any horses. All horses sold under any warranty and not as represented are returnable up to 12 o'clock noon of the day following

We have been favored with instructions from a city gentleman to sell on Tuesday next his Brougham, T-Cart and Harness. These are in excellent shape, having had the best of care, and they are to be sold on Tuesday. They are the finest of goods.

We are also selling on Tuesday, the 2nd, a consignment of

## **Contractor's Horses**

These have been at hard work in the City of Hamilton for the past few months, are first-rate draught horses and are now being consigned to us for absolute sale.

We have instructions from the well-known liveryman.

# **Robert Bond, Esq.** Sheppard Street, Toronto

to sell on Tuesday next a consignment of his Horses, Vehicles and Harnes The horses 'are all in good condition, and have been used in the City ( Toronto. The vehicles consist of Broughams, Victorias, Coupes, Buggie etc. and all are in good condition. The harness is in good shape, an there will be many sets of single as well as double harness. Mr. Bon has one of the best established livery businesses in Toronto, and is making this consignment as the City of Toronto has expropriated a portion of hi land on Sheppard Street that a street, extension may be put through. These goods will be put up at 11 o'clock sharp, and if you'll bid you'll big

opinion it is not the amateur who has, declined, but the dealer. The former, on the contrary, is stronger than ever. Speaking to this Point one of the most pleasing features was the fact that the gentlemen named were not content with being exhibitors but also took an

of riding and fencing in the hunt event on Friday night; H. C. Cox, Master of the Ennisclare and another clever and true rider; Hume Blake and Emilius Jarvis, both of whom took command of their own hunt teams. Other gentlemen who contributed grandly to the sport were first and foremost, Hon. J. R. Stratton, who confined himself to the driving classes; R. W. Davies; T. J. Macabe, Gordon Miles, Allen Case, Frank Proctor-in fact all the riding members of the Toronto Hunt. The true sportsmanlike sense was over a.11 It was in the air, it was in the men. it was in the ladies, it was in the horses and the result was a huge suc-

cess and the height of enjoyment. The Classes. Something still to be specially desired is a time limit. By eleven o'clock at the latest everything should be thru. As matters stand more often than not, was midnight before the strains of "God Save the King" could be heard. one way in which greater promptness could be assured is by the judging of the horses for conformation in the morning. It would entail harder work. or rather longer hours, on the judges, ut it would be a great accommodation

and young to have to wait until near

The judges were agreed that as a general thing the quality of the horses at the Toronto show has improved, al-tho the gentlemen from abroad say <sup>8</sup> "Tour standard has always been of a generally high order." In the show closed in some of the harness the entries were not numerous. ut the exhibits were high in quality. Stratton was in special evi-Hon. J. R. dence, his horses all being we'l mannered and good to look upon, while his were particularly good, but the appointment classes were neither large nor prominent. There was regrettahly an absence of the rattling of chair and the manoeuvres and posturing

Dixon, Hume Blake, Allen Case, in the success of the snow-the numers Senator Baith, John Macdogald (Cum-berland Stables), Geo. W. Beardmore, M.F.H., E. Langdon Wilks, Dr. Gordon M.F.H., E. Langdon Wilks, Dr. Gordon Macherson, A. Yeager, Crow & Murray and so on. It was pleasant to note that enterprise was rewarded and that to the gentiemen named the largest share of the prizes fell. Previous to the show somebody deployed the fall-ing off of the amateur. In my humble is doubtful if on this continent a bet ter aggregation of timber toppers has ever been seen at any show outside probably New York. It is also note-worthy that the Canadian breds had the imported Irish fellows beaten in surmounting the rails and bars. But the with being exhibitors but also took an active part in the proceedings, riding and driving their own horses. A Suggestion, In this connection may be especially A Suggestion definition of the artMery at the fictitious but artistic stone wall. "Jimmy" Miln's Foxglove, a winner at New York, masterly ridden by R. W. Davies, cut Canadian-breds would persist in firing

In fact abc the whole show, from the greatly im proved style of decoration down to the of the horse to have the sire given if Malodi, 2.14%, and Poolstick, 2.13%.

players and myself have all played together, and that is why I am hoping we shall succeed. Practically all the ponies used by America are imported from Ireland, where nearly all the best ponies are bred, but I do not fear fallure thru, any deficiencies(s)in) our nounts."

Apropos of King George's interest in the contest for the America Cup, it is interesting to recall that he was him-self an enthusiastic player, in Malta, at the time of his attachment to the Alexandra as flag-lieutenant. In 1909 he and Queen Mary (then of course, Prince and Princess of Wales), were present at the second international match at Hurlingham, and Queen Mary, handed the America Cup to H. P. Whit-ney at the conclusion of the game. Recently, too, His Majesty sanctioned the name of "The King's Coronation Polo Cup" for a trophy to be competed

law, Captain H. H. Wilson, played for some years with him in the famous Rochampton team, and is a son of the late Sir Samuel Wilson, the Australian millionaire. He won the D.S.O. in the Yeomanry. The remaining mem-bers of the British team have achieved the 15th Hussars, Captain Cheape to the 1st King's Dragoon Guards, Mr. Palmes to the 10th Hussars, and Noel Edwards to the 9th Lancers.

Mr Palmes was in the 10th Hussars secured blues or reds all along the team that won, for the fifth year in succession; the Indian Inter-Regimental Polo Tournament. His regiment and that of Mr. Edwards were really the pioneers of the game in England. The selection of the English players was a matter to which the Hurlingham Committee devoted themselves with the utmost selrousnes, and there is no doubt that they have got the cream of British polo talent. "No keenbetter, fitter, or smarter players, could have been chosen," remarked a Hurlingham, member the other day. To the America Cup Recovery Fund a sum of nearly £6500 has been subscribed, and with this money fourteen of the best ponies procurable were bought. The other twenty-one were lent by Captain Herbert Wilson, Cap-tain Lloyd, H. Gardner, Lord Ashby St. Ledger, the Duke of Westminster, Clarence Wilson, Evelyn de Roths-child, and Lord Dalmeny.

. The first match will be played on May 31, and the second will be decided on Saturday, June 3. Should a third game be necessary to decide the "rubber," it will take place on Wednesday, June 7.

#### Or!cffo Mares and Americans.

Russian horse breeders are having marked success in crossing American trotting stailions with Orioff mares. In this way they bred Proste, 2.08, the champion trotter of Europe. She gained her record in a race in which she defeated Kriepich, 2.081/2, the fastest of all the Orloffs. Proste's sire was Passe Rose, 2.14%, a son of Patron, 2.14%, and Secret, 2.201/2, by Strathmore. Proste trotted in 2.08 the ice last winter and went two miles in 4,281/2. Another crossbred trotter in the first flight is Lamysiel, by Quarter

A CARLOAD FROM The Spanish River Lumber Co. This is a carload of extra fine workers, with the weight and size. They are right out of their work, in fine condition, and a team of them can pull anything that is loose. They are consigned to us for positive sale on Monday. MR. R. H. LEARY, Pieterboro', Ont., is consigning to us the following three high-class horses :-Chestnut Mare-5 years old, 15.3 hands, four white stockings and strip in face. Size is sired by "Attraction," an imported Hackney, and her dam is a Wilkes mare. This is a show mare, having the best all-round action, being able to step to her chin. She is consigned with instructions for immediate sale. "Gay Boy"-A Bay Gelding, 4 years old, 15.3 hands, weighing 1,125 lbs.; sired by "Muckle Wilkes." dam by "Frank Ellis." This is a good-going geiding, perfectly city broken, kind and quiet, and a first-class saddler. 'Harry Swell''-A Brown Gelding, 5 years, 15.2 hands, weighing-1.075 lbs., sired by at Hackney, dam a standard-bred mare. He is thoroughly broken to all harness and city sights and sounds, and is a first-class roadster.

These three will be sold on Monday without the slightest reserve.

MR. J. E. CERSWELL, City. is consigning to us his pair of BLACK PONIES, IMPORTED SHETLANDS. They are a mare and gelding, and positively the finest team in the Province, and can road nine or ten miles an hour. We will also sell their entire outfit, consisting of a buggy (pole and shafts), and set of double pony harness, all in high-class condition. They are consigned for positive sale.

CONSIGNED BY ME. G. W. CONSIGNED BY MR. J. P. WATT, City, his fine little pony, THOMAS, City-"Equina," a bay "Sugar Billy," 14 hands high. pony mare, 14.1, and kind and kind and quiet and an ideal children's pet. He will be sold with- quiet for children. This is a out reserve, the only reason be- first-class pony, but she is too ing that the owner's daughter, small for the owner, who is purwho erclusively used him, is leav-ing town for the summer. chasing a larger horse. turn.

way as not to abridge freedom of in-vestigation and research in new fields of fact and truth, there is no question. There can be no objection to educational efficiency all along the line. But anything like a step toward a cen-tralized control of educational institutions, especially colleges, which have a history of religious denominational interest, and are regarded as included in church enterprises, is sure to raise a

tude of patronage and a habit of med-

peculiarly interesting to denomination-al institutions, which may wonder

now how the foundation got its au-thority to take this point of view and to proceed to investigations, criticisms"

According to feev. Dr. Bryan a num-ber of denominational colleges want to-come back to their former state "in sood and regular standing," and it is thought that a big fund raised by durches in competition with the Car-negle fund will help to bring to these colleges "the glad day of their re-turn."

According to Rev. Dr. Bryan a num-

ant-whether tho

storm of protest. It may be that President Pritchett in view only some such work as an efficiency engineer does for an industrial plant for the good of all concerned, but his idea of colleges as "in truth public service corporations," and therefore by suggestion in need of re-gulation, perhaps, by the Carnegle Foundation, raises a question for sober thinking. Certainly denominational

Table Cloths ...... from \$1.15 HEMSTITCHED LINEN CAMBRIC Prices per doz. \$.73 colleges, or those endowed privately, do not rest on the basis of a public service corporation as ordinarily understood.

The Garman Empress on The Im-perial Prize. This is the text of the speech made by the German Empress in launching the new battleship Kaiser at Kiel: "By order of his majesty, the ship which is thus launched on his fete day (his patron saint's day), will be called Kaiser! "Kaiser! This word is, as it were, surrounded with the dreams of great-ness and the aspirations of Germany. An emperor has been the prize of the bloody struggles of forty years ago,

and the emperor is the man who has endowed Germany with a fleet. "Fidelity to the emperor shall be thy compass, and in the hearts of all Germans abroad thou shalt confirm the love of their native country. Proud, thou shalt go holding thy head aloft in thy struggle with the elements just as the emperor among us holds his head above ephemera: disturbances. May the god of battles guide thee in danger, and may thy crew remember even to thy last hour the name that

thou art to bear. "It was the appeals of the women that in the remotest epochs of our his-tory aroused the courage of our ancestors. May there escape similarly from the heart of the empress, who now baptizes thee, good fortune and benediction for all thy voyages."

Spring Knowledge. An inch of rainfall represents 100 tons of water to the acre.

### ITALY'S DEMOCRATIC KING.

The acceptance of the premiership of Italy by Signor Giolitti, with reliance. mainly on the radical groups in the parliament for his working majority,

is said to be due almost entirely to the persuasions of King Victor Emmanuel. The king first of all overcame Giolitti's reluctance to taking the leadership of the country on any terms by an appeal to his patriotism. Then came the question of parliamentary support. Two

courses were open. Glolitti might have made a deal with the moderate and some of the conservative elements of

him along for some time. But appar-finances, and the program of legislaently the king thought he would be opposing the real tendencies of the coun-

new ministry. Universal suffrage and POTATO HILL PHILOSOPHY. restriction of army and navy expenses were leading points, and these Giolitti accepted, as his inaugural statement The trouble with modesty is that half he time if you don't butt in you don't the get in

accepted, as his inaugural statement to parliament indicates. It does not follow because he has ac-cepted Socialist support that the new premier will attempt the realization of any specific socialistic plans. In Italy socialism has developed a quasi con-servative element, not unlike that re-presented by Briand. Millerand and Viviant in France, whose hopes are in evolution rather than revolution. It is quite likely that the effect of his new combination on Giolitti's policy will in practice be hardly discernible. **Spanish Debt Paying.** Despite the other program of legisla-tion for the present session of the enter include a bruce attend on the program of the spanish to the program of the spanish to the program of the present session of the provide the other program of the present session of the provide the program of the program of the present session of the provide the program of the program the program of the program the program of the program the program the program the program the program the program to the program the program to th to parliament indicates. The Gablonz district in Bohemia is one of the most important jewelry centres in the world for certain classes of goods manufactured, especially cheap jewelry, imitation precious stones, glass beads, millinery ornaments, artistic buttons, etc.

This district has been engaged in perfecting work of this nature for a length of time that may be counted by centuries, until now a genius and de-gree of perfection has been reached that is difficult to equal. There have been established schools devoted ex-clusively to the teaching of every branch of the trade, from the most general class of work to the graduat-ing of highly skilled designers and kind and character.

DISTANT

UXEDO PARK is a splendid restricted residential subdivision occupying a broad plateau on the commanding heights of the North Hill, the scenic spot of Calgary. From this elevation a magnificent view of the snow-capped Rocky Mountains in the West can be seen, in addition to a splendid panorama of the river valley. Understand, Tuxedo Park is not a far-outlying farm land subdivision, but is one and one-half miles inside the city limits, and located on the two-mile radial circle from the centre of the city.

111

The topography of the land is ideal for residential purposes, and, with the civic improvements projected and in course of construction, with the added features for beautifying the property in the nature of wide boulevards, landscape gardens, etc., it is safe to state that all of it will be rapidly occupied, at the rate at which Western cities consistently advance.

The extension of the Municipal Street Railway into the property, as well as water mains, is now under course of construction. Thousands of dollars are being made in real estate investments in the West. A few hundred dollars invested to-day, in our judgment, will, in a few years, mean thousands.

A Toronto man dropped into our offices in the Kent Building this week and purchased four lots, with instructions that the title be made in the name of his five-year-old son. This father is far-sighted-by the time his son has reached his majority these four lots, costing \$1,200, will represent -, who dares place a limit on the possibilities ?- it may run into the thousands. For example : in the subdivision directly adjoining Tuxedo Park lots were sold four years ago at \$75.00 each which have since been resold as high as \$2,500.00 each. Are you getting your share of the profit of the West? This Tuxedo Park is an opportunity for a test of Western profits. Only one-third cash, no more for a year-a sufficient time to resell the property at a splendid advance without an additional dollar invested.

We guarantee every statement made in our advertising regarding the merits of this property and solicit the most thorough investigation of its advantages. There are big opportunities in the West-investigate them all. Through such investigation you will choose Tuxedo Park, Calgary. Call or write us to-day, or to-night, and complete literature will be supplied substantiating our statements and proving the merits of the investment.

\$.00 8.03 7.97

The first Roman journal published over 2000 years ago, appeared but once a year. This paper, intended to be read by the public, was known under the title of "Annales MaxIma." The editor of the paper was the Ponti-fex maximus, whose duty it was to chronicle all the important events of the year. The news was written on while wooden tablets and attached to the resi-derces of ettizens. It must have been a curlous sight to see the old Romans crowding around these tablets to get a glance at the latest news. But the curlosity of the people grew rapidly, and in such a measure that the government, the only issuer of a journal, found itself obliged to issue a daily. It is interesting to know that some of these journals, having reached the age LIVERPOOL. April 29.-Closing: Wheat-Spot, dull, No. 2 red, western winter, no stock. Futures, steady, May 6s 9%d; July 6s 9%d; Oct. 6s 9d.

Flour: Winter patents, quiet, 27s. Hops in London (Pacific coast), firm, £4

It is interesting to know that some of these journals, having reached the age of 2044 years, are still in existence. The name of the first daily journal was "Acta" Populi Romani Diurni." Doubt-less, it will interest some of our readers to peruse a verbal translation from the oldest journal extant, issued 168 years before the birth of Christ: Ocnsul Sicinius was the acting judge to-day. There was a heavy thunderstorm and Beef-Extra India mess, casy, 928 6d. Pork- Prime mess, western, dull, 81s 3d. Hams-Short cut, 14 to 16 lbs.,

to-day. There was a heavy thunderstorm and the lishtning split an oak at the foot of the Hills of Vell. In a hostelry at the foot of the Hill of Janus there was a fight in which the landlerd was badly wounded. Sicinius punished some butchers on ac-count of their selling meat which had not been inspected. The broker Ausidius fled from town to-day taking money with him belonging to

The gram is already on the statement that Cripple Creek for the gram. The gram is already will produce ore bodies. And, from the only official weight in all the what I have been able to see of the Latin countries, and in Germany; while Porcupine district in general, I am also in the United States it is universally willing to say that there will be as recognized for scientific process. Its good paying ore bodies in Cripple value is unchangeable. A rain of Creek as there are in Porcupine, for gold is worth \$0.66½ cents, 3.44 French outside of Whitney and Tisdale, the frances, 2.79 German marks and 2.49 values are yet to be proven." Austrian kronen.  $\Lambda$  "gold gram" D. J. Waikinshaw, also one who has should, therefore, be the monetary spent several years prospecting in the unit adopted in all civilized states. northern Ontarlo districts, and is well This could be effected without at known to mining men, came in from all raising the difficult question of an Cripple Creek last Thursday. Cripple Creek last Thursday. "I was amazed to see men wash from coinage, however, offers no insuperable "I was amazed to see men wash from coinage, however, offers no insuperable the set in pans." sud ultimate difficulties. France, Belgium, Lultimate difficulties. France. Belgium, Itaty, Switzerland, Greece and other minor European states have already a unitary coinage; and the money of each (except small change coins) is recog-ilized in the dominions of all the rest. But the money of the future, the "gold Stam." need not be coined at first. It can be used merely for purposes of in-ternational trade. All that is neces-sary is for the governments and PORCUPINE chambers of commerce to recognize the "gold gram" as useable in the form of checks and bills of exchange on international accounts. Special Letters carrying the most re-liable opinion and the best expert in-vestigations are ready on the following: HOLLINGER No Existence as a Coin. By far the greater part of internat-PORCUPINE COLD ional trade does not require any cor-responding transfer of money from one PORCUPINE NIAGARA state to the others. Accounts are merely booked and squared off against **REA MINES** one another. The "gold gram" would, therefore, merely appear in account DOME EXTENSION PORCUPINE MERGER will be supplied on request. claims: Samples of quartz and schist were assayed with the results as fol-lows:, Lowest amount, \$224; highest, \$367. Six assays were made at two different assay houses. Practically no values in the rock showed to the naked eye and the min-eralization was merely nothing. One would ordinarily discard the rock as FRED. R. JONES & CO. Established 1904. Maritime Exchange Bidg., New Also 50 Broad Street. Toronto: Traders Bank Bidg. U. S. Trade With Canada Grows Rapidly

Our Trade Relations With Great Britain and Uncle Sam Contrasted.

Trade relations between Canada and Great Britain, contrasted with those existing between the Dominion and the United States are discussed by Richard Grigg the British Theorem Canada and Union Pacific Balley Cobalt Lake Gould Grigg, the British Trade Commissioner for Canada in a recent report. The Great Northerp .... report covers the periods from July 1. 1906, to March 31, 1910, but is accom-pained by statistics extending much further back. These latter show that McKinley-Darragh ..... further back. These latter show that Silver Laf. that of Great' Britain. Foster

For the three years 1893-5 the per- Crown Reserve . 59.65 per cent. Since that time, with Nipissing the exception of the United Kingdom Hudson Bay has been an improving one, and the Tota's ....

has been an improving one, and the percentage for the three years 1908-10 was 25.79 and that of the United States 58.68. An important point made in the re-port is that the greater portion of all comes from the United States. It represents about 25 per cent of the total imports and has little bearing on the question of competition between Holdinger

the question of competition between Hollinger Great Britain and the United States in Coronation Decompose

Canadian trade. In the domain of actual competitive trade the share of Great Britain stood trade the share of Great Britain stood Gold Reef during the past five years at from 35.8 Standard Standard ..... Percupine Canada ..... Pearf Lake ...... Crown Chartered ..... Nor. Ont. Exp...... to 38 per cent, and shows no sign of declining. In the portion of the competitive trade liable to customs duties, which includes the general field of Dobie manufactured goods, the British share Rea is ever larger. During the five years out. Gold Dev.....

referred to it was from 40.7 to 41.4 per cent, and seems to be increasing, and the inference is drawn that the pre-

cent, and seems to be increasing, and the inference is drawn that the pre-ferential tariff, which has no applica-tion to goods of free import, is a con-tributory factor to this result. Altho British trade with Canada in manu-factured goods may thus be said to be holding its own, and even gaining ground against its American rivals, the tables given show various classes of goods in which this is not the case. **Ultimate of Happiness.** "How has that match between Daisy Green and Tom Haddaway turned out?" asked Blithers. "Fine," said Dobby. "Still madly in lows with each other?"

"Still madly in love with each other " asked Blithers.

asked Blithers. "Better than that," said Dobby. "They've got to a point where they can "They we got to a point where they c Just pay the Easter bill this year tolerate each other."-Harper's Weekly. Get something for your money.

A PASSOVER WEEK CELEBRATION AT A CENTRE-AVENUE HOME.

T takes two to eat a salad, just as it takes two to make love or to get the best out of any of the rarer and more estimable experiences of life. A salad in a large company, where the salad dishes distribute to a score what was meant for a couple, merely tantalizes by the suggestion of what might have been. Buried amid potages, fish, joints roast and boiled, entrees, entremets, vegetables, eatables and potables of all sorts, a salad has no chance to distinguish itself. It is like the vox humana in a full organ passage. The salad is a solo stop. On which, to get the best effect, one must play a duet.

rom left to right

Oranien Bridge,

ion-one of the

vhile the cos-

and beauti-

ntish Town.

the Palais de

According to the early record when notice to quit was served on the dwellers in Eden who had up to that time lived exclusively on extemporised salads, the dish went out of favor, and Cain got into trouble by his partiality for fresh greens and fruit. It is a correct instinct however that would carry us back to the primeval diet, and the springtime of the year revives the appetite for a dinner of herbs. Evolution has produced a wonderful change in the appearance of a salad since the first woman gathered strawberries in a cabbage blade, as anyone may judge in a tip-top restaurant.

By the way, are there any tip-top restaurants? This does not imply the biggest building, or the biggest scale of prices, or the longest bill of fare, but a place where everything is perfect of its kind and of its degree. I doubt the new world is falling into the old world error of making things do, instead of making them the best possible. And this touches the dressing of a / salad most intimately. In that craft anything will not do. And in nothing is dis- right minded. crimination, selection and the finest taste more necessary than in the choice of the other partner in the salad duet.

There was a certain Gotham restaurant, by no means the largest or most expensive, where the salad cult reached a level of Epicurean philosophy, and after the manner of Gotham a double portion was served with each order.

There is profound suggestiveness in

this custom. Does it sonvey delicately the culent onion, the stolid cucumber, furnish idea that it is not good for man to be alone? Or it it a delicate way of concealing the rapacity of some customers? Or is it merethe ingenious host's method of collecting twice from the single men who iniquitously abound in, great cities?

It was over one of these Gotham double portions that the appetizing effluence of a salad first broke over the alimentary consciousness of one salad devotee. That crystal disk with its various tints of green, its reds and pinks and yellows, its pearly and ivory morsels, its luscious tingling fluids, endures as à standard.

There are beings who call themselves men and even cooks, who will place two blades of lettuce on a .plate surmounted with two slices of an immature tomato with a niggardly dab of dressing and announce it as a salad. Conduct of this sort contributes middle of a huge field, and it had the clearto the spread of infidelity. A real salad is est water one could wish to see, and it was generous as spring, and satisfying as sum-

The world has been ransacked for salad materials, but the eliminations of experience have left only a few of the best ingredients to survive the experiments of the past. Land and sea have alike contributed to the richness of the repast which might go far to regenerate the race. And yet simplicity is its essence, and at the same meal there must be only one salad for the

It is not profitable to attempt an analysis of character according to preferences for chicken salad, or lobster salad, or turkey salad or crab salad, or yet shrimp salad, or tomato salad or fruit salad, or nut salad.

But the true salad needs no admixture of bird of the air or creature of the sea to fulfil its uplifting mission. The crackling lettuce, the crisp radish, the tender cabbage med in by masonry, the water that turned

all the variety and more than sufficient to constitute a round of richly diversified meals, always adding the oil and the vinegar and the condiments in due order, and supplementing with wheaten bread, and butter on a lordly dish.

It is not for anyone to lay down for another what the right ordering of a salad shall be. It is the creation of personal genius, whose idiosyncrasies cause infinite diversity, but never deflect from dietetics perfection. Yet is it well to hesitate before the subtlety of the onion.

Early tastes were developed and the foundation of the salad appetites laid by childish experiences in country places. The discovery of a good stream for water-eress was a triumph. There was a well in the always cool, and the pretty leaves and grasses drooped and dabbled round its brim. It was always overflowing, and the bed of the runlet that carried the water to the brook at the foot of the field was choked with cress. And the fresh taste of that cress will ast into the Elysian Fields. Then there was a leaf that grew on certain ditches which furnished a most delightful acidulous mouthful, and there was the sorrel with similar floor. And there was the seed capsule of the violet which was "butter and eggs" in the child world, and there was the pith of the bramble which was rare good eating, but not so abundant as the heart of a kale runt. And all these things contributed to the salad appetite.

There was a garden across the old town street, and by the wall of the garden flowed in a channel three paces broad, hem? heart, the juicy tomato, the subtle and suc- a mill. And on the bridge which crossed

the stream we stood and considered our little world. A frowning portal of two centhries earlier stood across the way, but in the garden were nasturtium-leaves and tongue-grass or pepper-grass, and when in the town the salad appetite was fed and nourished.

There is a rare skill to be expended in the compounding of a noble bowl of salad We'are too hurried in our electric atmossalad, to achieve the success of the European experts, and to mingle oil and vinegar in correct proportions and not to curdle the oil, and to have the hard boiled eggs of the right consistency, and cut in perfect circles, and to have the exact flavor of mustard, and the dressing to the Queen's taste; these things come by grace.

One of the mysteries of the salad world is mayonnaise. What mere outsider could ever understand its golden secret, or declare the chemics of its thickening? . Yet mayonnaise is part of the daily maryel and joy of life. The large leisure of the European peoples gives them a mastery in saladry which we may envy, but cannot hope to rival while we still prize grosser pursuits.

A potato salad is acceptable to some, but a potato salad is not a salad proper. whose chief constituents must have flourished in air and light and sunshine. The tomato is the member of the potato family which most nobly ministers to the salad palate. But there are salads other than the crisp and crackling foliage salads, for the enthrone the salad queen.

whole nut family enter into a right noble alliance with the celery tribe to produce a glorious union which entertainers should know with the intimacy of social success. And may they be careful to make the celery, base of the best material. The skinny, stringy celery is a blot on life.

Another distraction from earthly woe is to be found in the wide range of fruit salads. Truly these are of the daintiest of all human foods. Take two or more of the following ingredients in equal or inequal parts, as taste may dictate, and from orange. apples, bananas, peaches, cherries, stand berries may be concocted such delight/ss bees and butterflies alone can estimate.

But what avails all such delicacies when they must be partaken of amid jarring sentiments, the exchange of false or profitless opinions, in that mad rush which accompanies the desire to be doing something else? To enjoy the salad worthily it must be partaken of in the solitude of two; with phere to spend the necessary time upon a sthat wide leisure which is full of inward contemplation rather than outward expression, wherein one may eat slowly but comprehensively. One mail consume a salad in mixed company, but the spirit of sacrifice cannot properly belong to it there.

She who can appreciate the majesty, of the crystal bowl filled with the kindly fruits of the earth in due season, mingled A in true salad proportions, and who is in- ? spired with a true conception of their im-, portance is a precious creature, and her price is above rubies. In the springtime our greatest laureate assured us the young . man's fancy most frequently turns to her. If she be perfect in salad philosophy his wisdom will be crowned with a vast reward There is health in that most excellent diet, and happiness in its slow and careful consumption, while the quick mind delves for knowledge and the answering intelligence responds from kindred stores. The communion of the salad bowl may revolutionize society, may regenerate the failing family dominance in the nation, and

ME. CAVALIERI gives valuable advice of a timely nature in to-day's article on "Summer Care of the Hair." She explains the method of the German specialists, who use a burning-glass to stimulate lazy scalps, but advises moderation in its use. She describes also the severe, but, in some cases, successful treatment by alternate applications of hot and cold towels, or of ice.

Mme. Cavalieri also fully describes the best method of massaging the scalp, and recommends certain cleansing and tonic lotions, for which she publishes the formulae.

nervousness, which causes the defective circulation. Once the thin hair has progressed to baldness and that state in which the scalp is bare and the skin tight and shining, there is no cure. But in the early stages good results follow intelligent treatment. of the day.

For instance, be sure to give the roots of the hair exercise by gently pulling it at the ends. Be sure to give it plenty of ventilation by letting it hang after brushing, so that the air can reach the scalp and roots. Paris maids, and even hair specialists, supply this need of the hair by gently fanning it after the hair has been brushed. They do not fan it vigorously, because this would cause cold and neuralgia. But a gentle fanning for five to fifteen minutes every day will

without, fresh air

The hair must be kept absolutely free from dust, and to this end it must be carefully brushed every night. Never retire without brushing your hair, giving it, if possible, one hundred strokes, to free it from all of the collection of dust

The hair should be washed whenever it is unusually dusty or the scalp is other than pure white or pink. If the scalp is overlaid with brown dust it is high time for a shampoo, else the hair will begin to fall Ordinarily once a fortnight is enough. But after a journey by train or /automobile, or any other exposure to the dust, it should be cleansed by a shampoo. Use a nonacid soap, and rinse in many waters. A flat pan with one side cut down to fit the neck, so that give the scalp what we ourselves the head may rest easily in it, is so greatly need, and cannot live a new German device for hair

words:

"We may possibly look upon ourelves at the present moment as being at the zenith of a female oscillation, and as time progresses, helped probably by a saving of infantile life, a more numerical equality of sex will be established." Here is an interesting statement of the present position of the sex

balance:

At birth, the ratio of males to females is about 1,030 to 1,000; at the fifth year, owing to deaths

"Dip a soft, old towel into hot water, another into ice cold water before pressing them on the scalp."

often headache-bringing, necessity of leaning forward. In this the head rests comfortably back. The eyes are closed and a nap may comfortably be taken while the work of washing and rinsing the

pan, colander-like, lets the water through, so that washing the hair in this case is a process of pouring the water over the hair, and rubbing the scalp with the palms and fingers. Carmen Sylva recommends hair goes on. The bottom of the drying the hair by leaning the head

Powdered borax, 1/8 ounce. Glycerine, 1/4 ounce. Camphor water, 1/2 pint. I always advise my readers to avoil any preparations that choke the pores, as most whiteners do. But since some readers insistently ask for formulae for whiteners, I have given this one, advising you not to use it "too often." You yoursolves must be the judge of how often when I have advised you never to use whiteners.

How can Pthin lanolin, which I find is rather stiff to apply to the face? writes a Boston girl.

It should not be so in its pure state Try heating it a little over a lamp or the stove before applyng it By the addition of a little olive oil it will be more easily appled.

### Women. Getting Rid of "Superfluous

in politics.

years the births show a preponder-

ance of boys. In other words, the younger the mother the more likely teeth. washing. It rids one of the painful, among the males, the balance is are her children to be girls.

This, as Dr. Ewart argues, provides the clue to the "self-regulating balance" by which nature adjusts these numerical differences.

For when women are in the man jority. as at present, they are in less demand for wives and marry at more mature ages-the result being that there are more baby boys than girls, and a consequent adjustment of the sex balance in the next generation. The tendency is enhanced by the effect of moders education, which is all in the direction of deferring the age of marriage.

Dr. Ewart thinks that the relationship of the age of the father to the sex of the child is much the same as the mother, and where disparity in age occurs the influence may neutralize each other, "so that with a mother of about twenty and a father of about thirty the chance of a boy or a girl should be about as equal as nature can make such . problem

The marriage age is steadily rising, and Dr. Ewart adds the opinion that an average marriage age of between twenty-seven and twentyeight "should produce a population in which the males are at all periods in excess of the females." And then the "superfluous woman" would be a dream of the past.

Fair Warning "the female oscillation has reached seTT is reported from New York," says The Mirror, "that Mrs. Smith H.

He produces figures showing that her husband last August, will sail for young mothers, of ages below England next month for the purpose of thirty, have more girl' than boy marrying Mr. A. G. Vanderbilt." After children, but that in their maturer this it will not be possible for Mr. Van-derbilt to complain that he was not warned

**BIG REORGANIZATION OF** 

# AUTO TALBOT TIPS

Don't suddenly apply the brakes; a gradual application retards

- the Don't forget that you have a hand brake as well as a foot brake. Don't over lubricate the magneto; a few drops every 500 miles are sufficient.
- Don't turn the steering-wheel when the car is still, without getting someone to assist by putting the wheels around.

Don't run the car for days at a stretch without looking over it. Don't forget to grease the springs between the leaves occasionally, Don't pull anything to pieces out of mere curiosity. Don't forget to screw down all grease caps a few turns occa-

sionally.

Don't use a chisel where a spanner will do. Always pump your tires up hard to about 80-lbs. per sq. inch. Always keep the platinum points of the distributor clean and

Always keep the water in the radiator well above the tubes. Always grease the sliding tube of change-speed lever where it is see to the atmosphere. Clean well with paraffin, and oil slide thru hole in top of tube occasionally.

See that all joints are tight and do not blow; if a joint is heard to leak, it can be found by putting a little oil round the joint and turning the engine

See that the gear box has a good mixture of oil and grease, of the consistency of cream, up to the level of the bottom shaft. See that there is only about half a millimetre space between the

ends of the valves and the valve plungers.

See that the air valve spring on the carburetter is of correct ten sion. If popping takes place in the carburetter, it is too weak; if the engine is sluggish and does not pick up quickly, it is too strong. The spring should be adjusted to just prevent popping in the carburetter. The air valve should be kept quite clean.

See that the clutch is adjusted properly. If it slips, tighten up the clutch spring. If it is fierce it should be well dressed with castor oll, and propped out all night; slacken out the buffer spring nuts half a turn. Don't forget to replace the split pins.

See that the brakes are adjusted properly. Wash them out with paraffin occasionally. If they do not work quite smoothly, oil them thru the holes provided.

See that the steering gear is kept free. Stiff steering is dangerous

See that the hub caps are screwed in tight, especially the back hub caps.

When standing for some time, turn off petrol tap behind filter. This will save petrol evaporating thru the carburetter.

.sured.

As an indication of what Mr. Neal is accomplishing it might be stated that the Cadillac, which is one of the most popular and best-made cars of its price on the market, has limited its output of cars instead of building all that the traffic would bear. The same policy, it is said, also will be pursued in the Buick line, while every effort will be made to make the Rainier car the best car that money can buy and mechanical skill produce. The General Motors Company also two of the largest commercial owns truck factories in the world, which produce the Reliance and the Rapid vehicles

Mr. Neal thinks, with other farseeing men, that the future of the industry will lie in the commercial ve-hicle end of the business, and believes that up-keep and integrity of service will play a prominent part in building up a growing demand for motor trucks.

As an illustration of Mr. Neal's nzeeting this week, at which time character and the new business methods which he has introduced into the General Motors Company, it might be a day, and in every respect they will having his employes write evasive let-be operated as if they were running ters to his customers. Mr. Neal said, for some mercantile house. This sort of a demonstration is what leave the Reliance factory. Not only will install a new and satisfactory

four-cycle motor in place of the old one at our own expense Change Cost \$200.000. This was, or is now being done, and the total cost will be close to \$200,0000.

but, as Mr. Neal says, "We are not in the business for to-day or to-morrow, but for all time, and those in-

effective motors in use would injure not only the Reliance company whole motor truck industry, and for this reason outside of common honesty it was not only our duty, but

good business policy, to replace them with efficient motors that would run, no matter what the cost. This Reliance incident apparently gave Mr. Neal food for thought, as the has organized an engineering de-

a pound of coal, and the average steam engine delivers in mechanical work the This advisory board, which will r

tomers to complain of them.

SPARE TUBES.

Many motorists do not take sufficient care of spare air tubes when these are carried on the car. Quite a number of times recently we have seen spare lessness or rocknessness may entail an old of their history, which is yet to be unprotected from oil, grease, and the wages. A car is an expensive piece written, makes it possible to call upon sharp edges of loose tools. Spare tubes of machinery, and just as a careless or the law of probability to forecast a should be carefully rolled up flat, the brilliant future for the automobile type interior valve parts having been re-"I understand, says the lattice, orimant luture for the automotions the moved, so that all the air may be forced a loss of many thousands of dollars, so

worth while to draw further attention to it. When he first had his 38 h. p. ear he had the usual equipment of five wheels complete with tires, but on the recommendation of his chauffeur, who had carefully watched the wearing of the tires. he bought a sixth wheel and tire so that his equipment in this di-rection consisted of two plain rubber tires for the front wheels, two metal-studded tires for the back wheels when the roads were bad, and two ribbed-rubber tires for the back wheels when the roads were good. This equipment, combined with the readily detachable wheels, enabled him to suit his tires to the conditions of the day. On a mudwheels. enabled him to suit his tires to the conditions of the day. On a mud-is day, when the roads are likely to be sreasy, one or both wheels with stud-ded tires are taken from their brackets and put into use, and the rubber-tired wheels carried as spares. On a dry day the procedure is reversed. The result has been to effect economy in all ways, as every motorist knows that they are less efficient tractively, so that the car runs better and uses less proving the metal-studded varlety. The mat-ter does not end here, however, for little as they may damage the roads there is no question that studded tires, so that the matter may be summed up in the statement that six wheels are better than five, and that if a metal-studded

away. The wheels they were hewn from the statement that six wheels are better than five, and that if a metal-studded tire be used it is better to have it on trunk of a tree The creaking I cannot the spare wheel and only to bring it into use when actually required. In-edentally we may mention that, on the And, picturing this, four we find it better to have one studded tire on the inside back wheel and the other on the outside When I picture the charlot taking its front wheel, rather than to have two And used by, Patri 

A question which deserves much more attention than has hitherto been accorded it by motor car designers is the proper location of the radiator. The advantages of water as a cool-ing medium are admitted. Just what heatten tands not only to because that Tor the consideration of a proposed new highway to provide a direct tour-ing route over good roads between New York City and Montreal, Canada. Provisions for the construction of the new York end of this highway were embodied in the Emerson-Trombley bill before the New York legislature. The bill provides for the construction of an international highway from New York City to Rouse's Point on the Canadian border, where it would con-nect with a similar road between Montreal and Rouse's Point. The proposed road will leave New York on the east bank of the Hudson River, will pass thru Albany and Sara-toga, and will reach Plattsburg by t, and Au Sable, and will then go on to mines further, into Montreal. An appropriation of \$1,200,000 has been passed by the state senate for the construction of that section of the route lying between Schroon Lake and Rouse's Point. An appropriation of \$1,200,000 has been passed by the state senate for the construction of that section of the construction of the section of the construction of that section of the construction of the section of the construction of that section of the construction of the section of the construction

when that saving is accomplished at the expense of making his product look vas Enoch?" cheap or shabby. Such a reputation

of the air as a cooling factor decreas-ed by applying it in a roundabout way rather than directly? I cannot see that dt is, and my experience with types like the Renault bears out my assertion. In both locations the air enters the radiators at the same speed and temperature, and the only differ-ence is in the manuae in which it is and temperature, and the only inner-ence is in the manner in which it is disposed of after it has performed its function of cooling. A further matter to consider is the

location with reference to the distri-bution of weight. The theory of pro-per body design is to place the car weight between the front and rear axles. With the rear location of the radiator that is accomplished; with the front location, however, we find that the weight is over the axle, in fact, frequently forward of it, and in a position most conducive to rough and jerky riding, which is then attributed to poor spring action.-(Car Wicke in Motor.)

### NEW DETROIT FACTORY.

Detroit gets still another automobile actory and the latest addition to the list is one of the largest organized in the past year. It is the King Motor Car Co., and the capitalization is at

\$500,000, of this one half is paid in and the stockholders are some of the biggest business men in Detroit. The company gets its name from the man

who designed its product. King is best known in automobile circles as the designer of the "Silent Northern"—a two-cylinder opposed car which time has proven to be one of the best cars of its day. After the Northern Company was sold to the E. M. F. Company, King spent two years in Europe, devoting his entire time to a tharo study of the best foreign cars, at the same time working on ideas of his own as the preliminary steps in the development of the present King car. Upon his re-turn to the United States two years ago, he spent the ensuing year in designing and building the new car. It signing and building the new car. It took a year to build it because each part had to be especially designed. The car is not a composite of the different products of the various parts of manufacturers, but a DESIGNED CAR thruout. The past year was spent in test-ing and refining the car and in secur-

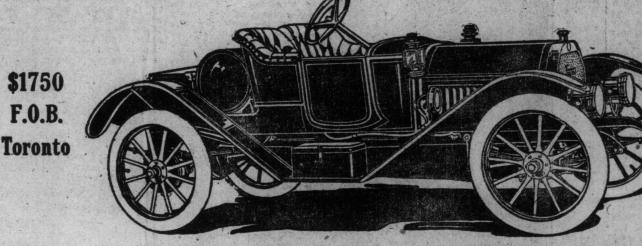

ing patents upon the distinctive feat-ures embodied in this car. In the opinion of automobile experts the King car embodies the most advanced ideas of both American and European designers, occuping a field entirely its own. Some of the interest-ing features of the car are a long stroke four-cylinder motor with 3 13-16 inch bore and 5 1-8 inch stroke, developing 35 H. P. under the brake; the two-bearing crank shaft is 2 1-8 inch

in diameter, and, the valves have 1 15-16 inch diameter in the clear. The valve springs are enclosed in pockets ensuring silence. The cooling is by the thermosyphon system. Clean cut simplicity marks the designing of the transmission: it is of three speed setransmission; it is of three speed selective type with center control and left hand steering wheel. The wheel base is 115 inches, the car being hung low on a new patented spring suspensecretary and treasurer. sion. This is one of the features which shows the infinite care taken in designing the car. The principle is similar to that used on Pullman coaches-the flat spring working in a

trunnion eliminates the shock usually

Just

rival nation only, seldom ill-naturedly, generally indeed, in such wise that the victim could laugh at the portrait of his own type. Mr. A. E. W. Mason is primarily a novelist, and I have read most, in not quite all, of his books. Very delightful, indeed, are his stories, and, altho it is a new experience for me to meet his work as drama, which I did, for the first time, last week, when I saw Miss Margaret Anglin and her very clever company play his "Green, Stockings," I found that, contrary to the usual, he was not less expert. not less convincing from behind the footlights; with living characters, than he had been only, heretofore, to me, as expressing himself on the printed

as well as of

The story, which unfolds itself as naturally as a rosebud does, on the play is as difficult to account for as is the unfolding of the rose leaves Let me premise that there is an ancient legend, I do not know its birthplace, that when an elder sister attends the wedding of her younger sister, the clder sister must wear, wereen stock-ings." Hence the title of the comedy. So when it comes to just before the time that the youngest sister of the four, Phyllis, is to be married, and Celia has again to don the verdant hose, she gives a very womanly kick. To quietly accentuate said kick. she takes a short, otherwise unnecessary trip to fown, and coming back, toward the close of the preparations for the nearly-lue marriage of Phyllis, an-

nounces her own engagement to oneproud. Cella, to prove her assertion, miral Grice has a strong build and fawrites to her imaginary fiance, letting cial make-up resemblance to "Char-her sisters see her do it, a passionate lie" Beresford, and Mr. Widdlcombe letter, and having become wet thru in as James Raleigh (I hated to hear evher walk from the station, bides it. eryone call him "Rawley") made an and goes to change "her things." So far all is going well for her, but, while the is away the but, while

the healthful comfort of the really short skirt. For, unless it be so short as to completely clear the ground, and be safe from any possible contact with

ground, and be sate from any possible contact what dust or mud, it is positively more undesirable and dan-gerous than the admittedly long skirt, whose trailing folds must needs be held up out of harm's way This is one of the cases in which there is no "happy

medium," but in which only one of the two extremes can be considered as entirely desirable. There is a noteworthy and satisfactory absence of

ADY DUFF-GORDON, the famous "Lucile" of London, and foremost creator of fashions in the world, writes each week the fashion article for this newspaper, illustrating it with sketches and photographs of her own original models.

Lady Duff-Gordon has just opened a new establishment in Paris, thus putting her in even closer touch with that centre of fashion.

#### By Lady Duff-Gordon ("Lucile")

This HERE are a number of odds and ends that I want to speak about this week. While each of them is really important in its way, none of them alone Latest would justify my devoting a whole article to it. Parisian And now let me give you just one or two "or little hints concerning the novelties, of which women are always anxious to have early news so that they may be among the first to display the actual—and presumably attractive—things. If you have "It any such desire, you must then make all haste to secure Creation Illustrates one of the latest and longest lace veils (their exact are drawn around the hat, and tied in a big and most decthe orative bow, rather toward one side at the back, or else New "just across there and brought round the neck for tying in an equally piquant position at one side. They are much more easily arranged than the ordi-rell nary veil, as, though of this extra length, they are only Straight and twenty-four inches wide, and as their central patterning is quite light, they are consequently very becoming, too. They are available in various colorings, such as and gray, blue, brown and green, as well as in black, and Square are an exceedingly smart finish for the hats of medium size, which they are specially designed to accompany and complete. Such a hat is the new "flower pot" Effect model shown on this page. Next you must know that you can match your broidered toque or sabretache bag, or coat, with a sun-shade whose variously colored satin is deeply bordered with tapestry, which blends half a dozen different and worth topdings and is all closely embroidered with gold Which Is soft shadings, and is all closely embroidered with gold or oxidized silver soutache. Surrounding the tall to Be handle, too, there is a big round plaque formed of the embroidered tapestry rimmed with gold, the whole thing, indeed, being excellently well carried out. a Feature Black and white lace are also blended in still an-other and white-handled sunshade, whose striking efof Summer fect is enhanced by a border of cerist satin ribbon. The Directoire note, which was first, but only faintly, struck last season, is to be made more insistent during Gowns, the next few months, and principally by means of wide, square.cut reveres, which will often be faced with the striped materials so charmingly characteristic of this particular and picturesque period. For the rest, these coats show little, if any, sign of a waist curve, being cut with double side seams, so that the still much-desired straight and square effect is secured and emphasized. There is to be a good deal of latitude, however, and, in addition to these simple and

almost severe styles, there will be more fanciful coating effects in general and boleros in particular, the dividing line between tailoring and dressmaking being, indeed, so very faintly defined that in many cases it will be

overstepped, almost unconsciously. The skirts, which are the destined companions of these coats, are practically of corselet form, being often cut so high that they fall from bust to hem in a straight and Empire-like line. They are perhaps just a triffe longer than their very abbreviated predecessors of last season, though this is a tendency which we must all strive to check if we want to enjoy a continuance of

Crowns. The Theoretical Mother

Newest Wide-Brimmed Hats

Designed for Those Who Cannot Stand the High

### By Haryot Holt Dey.

HERE are several kinds of mothers: Real mothers, other-mothers, step-mothers, god-mothers, grandmothers and theoretical mothers.

Theoretical mothers are the newest; a product of an overcivilization; they work out their theories on their children, organize mothers' clubs, conduct motherhood campaigns, attend mothers' congresses, write books for mothers, edit mothers' magazines, furnish statis tics and all kinds of propaganda for the further spread of motherhood and the perpetuation of the human species, and have more re-sponsibility than anybody. They have the facts.

The wee victim of the theoretical mother is the person you have to feel sorry for, though. Last Summer his mother came to visit me in the country, and brought him He was only a tiny chap of along. two or thereabouts, and his mother was the assistant editor of a magazine that told mothers how to bring 'em up. He was a wide-eyed scrap of humanity with dangling legs, a puny little face dimly lighted with a wan smile, and he had a wail that bespoke theoretical feeding. He looked like a little wrinkled old man, and he smelled of carbolic. She said his clothes always had to be disinfected on account of germs. He wasn't at all like the baby pictured on the cover of the magazine.

The Theoretical Baby Is Fed Malted Milk Tablets.

As soon as the theoretical mother arrived she retired to her room to write an article on "How to Travel with a Baby," and as soon as she got it off by mail she fed him eight ounces of modified, certified, pasteurized milk brought from town, and then wired the fact to the editor-in-chief of the mag-azine. Twice a day Solon-his name was Solon-was undressed and allowed to run about the room naked. She crid it was an in beth naked. She said it was an air bath, and that it closed the pores, and prevented cold. She ad written exhaustively about it in the magazine,

But Even a Theoretical Baby Likes Bread and Sugar.

and had received letters from mothers from all over the world. When we sat down to dinner, she placed a bottle of malted milk tablets at Solon's plate, and while the rest of us stowed away a comfortable dinner, Solon ate the tablets. But on the third day 1 made friends with Solon, and while his mother was upstairs reeling off edi-torials about the "Value of Barley Water for Children," he and I were having a party in the pantry with the door shut. We fixed bread and milk to suit us with sugar in it, and then and there Solon dis-covered what life was for, and he was amazed. Bread and milk with sugar and bacteria filled little Solon to the very eye-brows. It was a great day for Solon, and after that experience, he was my sworn friend.

Pretty soon Solon's eyes came out from their sunken depths, he ceased wailing, his cheeks puffed

out, the little old dangling legs grew firmer, his smile shone aloud, and then the theoretical mother mother wrote another article about the "Value of Country Air for Chil-

would excuse her crying, but the baby kept her awake so much at night that she was a shattered wreck.

Then I suggested the janitress who had eight or ten, and we sent for her. The janitress was a large motherly woman, and hers was the practiced eye, the practiced hand, and—oh, me—the practiced heart. She had never heard of child culture nor psychology, but she gath-ered up the little unbleached, earlyspring baby to her ample bosom, and the young mother took courage and looked hopeful, and we all stopped crying.

Then she took off her own red flannel petticoat, and wrapped the baby in it. It was such a big warm. petticoat: it had a white cotton band. and on the band a large bone but-ton; it was very homely and very' red and very warm, and it fitted. the baby as if it had been specially the baby as if it had been specially designed to wrap a baby in. It cov-ered the baby all up, ears and feet, and all, and the baby fell asleep directly in the arms of the motherly janitress. Then she laid it on a pillow, and covered it up all warm, and when the professor came home and when the professor came home the baby was asleep. The baby slept all night, and when the professor went away in the morning the baby was still asleep; it slept all day and when the professor came day and when the professor came home at night it was still asleep. Then they thought it was dead, and sent or the janitress. With an ex-perienced eye the janitress ex-anined the baby and said it was all right, and that the red fiannet petticoat had saved its life. The near little thing had been cold and poor little thing had been cold, and no one knew what the matter was. The rules forbade them to cover up its head, and not a rule had mentioned the virtue and charm of a large, warm and cozy red flannel petiticoat belonging to a mother. The professor said he should make a special note of warmth when no wrote his book on "Hygiene and Sanitation."

quisette, which, especially in its shot effects, is certainly lovely enough to make us reconciled to the change; especially, too, as the cost is practically the same, and the marquisette can, moreover, add extra durability to the list of its advantages.

The Practised Heart Is Better Than Untried Psychology.

dren." She said children were like orchids. And all the while Solon and I held clandestine bread and milk feasts behind the pantry door, and life grew daily more and more th while to Solon. He followed me everywhere, and by the time he went away he was about as untheoretical as any normal child need to be.

The young college professor and his wife had a baby come to them not long ago, and the other day I called. The professor has recently published a book on the "Psychology of Childhood," and his wife, is the author of a book called "Mother's Ideals." It seemed splendid for a young couple so preeminently equipped for realizing the best from parental experiences, to have a child of their own. But the mother instead of the stalwart, self-reliant young person I expected to find, looked very wan and frail, and was red-eyed from weeping. On her lap was lying a little baby. It was a very unbleached specimen of hu-manity, not in the least like the pictures of the babies we see in advertisements.

the appearance of her offspring, and said something seemed to be the matter with it. Then she cried. She said she had all the books about babies, and she and the pro-fessor had read them all from cover to cover, to find out what ailed their baby, but they could get no" light on the subject. She hoped I

# **TORONTO MUST PLAN FOR MILLION POPULATION REAL ESTATE**

# Toronto A City of Home Owners

Toronto as a city is in its most healthful period of growth, a period that no one who looks at all ahead doubts will continue for years to come.

Many causes have contributed to its prosperity and its still brightprospects. One may be mentioned "A city of homes," this queen city of ours is called, and deservedly so, for probably no other place on the continent under the half million mark has such a number of home owners as Toronto. In large letters, this spells prosperity, for the future of a city is bound up in the rank and file of its people, and their prosperity is Toronto's proudest boast

More money is being invested in this city in real estate than in any other undertaking, for the people are believers in the future of a city that they have created, and are making greater day by day. A glance thru lists of sales shows a satisfactory state of affairs-the buy-ers for the most part are home-seekers and home builders, who with their accumulated savings are staking a share in Toronto's weal.

The opening of the spring season has again demonstrated the ability and willingness of the workingmen of Toronto to absorb all the houses that builders have been able to put on the market. Those who have cried "wolf" and sneered at the city's development have been silenced. The fear that there had been overbuilding has been dispelled, this same fear that is raised each year by those who cannot peer into the future, and see what fate has in store for the premier city of the country.

Nor have men with large capital been wanting in this same faith. Each day has told of thousands and hundreds of thousands of dollars being paid for tracts of vacant land, and more thousands being invested to render such land suitable for the erection of houses. The surveyor is a well employed man in Toronto. The acres thus put on the market and divided into building lots pass day by day to thousands From Weston in the west to long distances out on the of buyers. Kingston-road, from the northeast, north and northwest there comes up one tale-the building of a Greater Toronto.

Nor is this a mushroom growth. The steady increases in the price of land, justified by larger revenue returns, show nothing in the nature of the speculative boom, but the healthful and steady growth that has been due to this city, in view of its many advantages. Those lots which are being sold are being quickly covered with homes, owned by the men who live in them and who seized time by the forelock. Toronto's greatest drawback has been the unwillingness of those who should be more far-seeing in grasping the need of the big undertakings that have from time to time been undertaken. Not so have the masses of the people acted.

Not alone in the suburbs has activity been shown. In more centrel portions of Toronto large sums of money are being passed from hand to hand in real estate investments.

# Purchase of Chorley Park Will Boom North Rosedale

accelerate the growth of North Rose-accelerate the growth of North Rose-traine This district, which is a natural North of Summerhill-avenue and traine This district, which is a natural North of Summerhill-avenue and

terest.

The selection of Chorley Park for covered with large trees, as yet, the residence of the lieutenant-govern-or of Ontario will undoubtedly greatly the government house would be diffi-

uale. This district, which is a natural annex of Resedale proper, has been during the past few years going ahead at an unusually rapid rate, when it is considered the prices at which land there is being sold. A glance at the general outlay of the district is of in-terest tracks of the Canadian Pacific RailVIEW OF SOME OF THE RESIDENCES IN THE DISTRICT NEAR AVENUE-ROAD.

The growth of the Avenue-road Hill district during the past two years has been very rapid. The section is being populated by a well-to-do class of business men, who are erecting a class of houses that are a credit to Toronto. It is also in this section that many high-class apartment houses are being erected.

# THE ROOMING-HOUSE PROBLEM

The problem of the young man or of Queen. A house of this kind would The problem of the young man or of cuccin including taxes and local improve-young woman from the country who ment rates, about \$12,000. Twenty comes to the city to work is becoming rooms at \$2.50 average per room each increasingly difficult each year in the week, totals \$2500 for the year, of matter of securing proper acccommo- which amount it would be safe to allow \$500 for rooms that are vacant, roomers who forget to pay, cost of advertising for others, etc. Out of the

Necessity requires that a down-town com be obtained. This saves car- \$2000 balance, there must come at a year for maid, telephone, linen, in fare and time, two important considerations for those on the first rung of the ladder. As the factories continue to break into the residential sections, rooming houses down town become necessarily more scarce, and those that still remain do so under heavy invest-

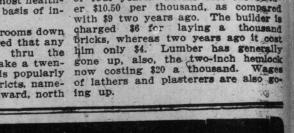

lation

ments, which in turn must come from Down town houses were built when it was not customary to make a large wardrobe do for a bedmake a large wardrobe do for a bed-mom, consequently it is growing more and more usual to make one room in a down-town house serve two people. This, in a district that contains big factories is not always the most health-ful way of living, but on a basis of in-come is often necessary. With heavy demands for rooms down town it must not be supposed that any great fortunes are made thru the rooming-house method. Take a twen-ty roomed house in what is popularly known as the rooming districts, name-

known as the rooming districts, namely, from Church-street eastward, north ing up.

kind go up \$100 every year, announc-ed a builder in conversation with The Sunday World. This statement is ar-

LOCAL TREATMENT FOR WOMEN'S DISORDERS

**IENT FOR WOMEN'S DISORDERS**The health we enjoy depends very largely upon how the blood circulates in our bodies; in other words, if we have perfect cliculation we will have perfect health. There is a constant wearing out of the tissues in every part of the body. The blood flowing through the blood coming from the heart through the arteries brings the fresh new living tissue, the essence of the food we have digested, to replace what has been carried off. This constant wearing out and expelling of the dead matter and the replacing of it with new matter, atom by atom, goes on day and night, until in about 7 years a complete change has been effected. Thus every particle of it from what he or she had years before.
It sometimes the blood becomes congested in certain portions of the body. This means that the blood vessels in these parts become weakened, and the circulation in that section of the body becomes sluggish and stagmant. The consequence is that the dead matter is inroduced there to build up and strengthen the tissues.
This condition invariably exists in all cases of femilies disorders. The dead matter retained in the ord.

THE TORONTO WORLD

#### APRIL 30 1911

### CASUAL COMMENT

Eight hundred educationalists wer assembled in Toronto, recently, and they said quite a lot of things, principally pointing out the superiority of Canadain pedagogues over those of other nations. "Gie us a guid conceit of o'orsels." I fancy however the statement that the tuition of English in Ontario High Schools is better than in the High Schools in England and Scotland is perhaps a little rash. There are quite a few acknowledged masters of English who had not the fortune to be educated in Canada, and whose work, journalistic, oratoricai, dramati work, journalistic, oratoricai, dramatic or fictional is thought by several mil-fions of people to have some perman.mcy as high specimens of our tongue. Col. Sam Hughes produced an example of English in his speech which, so far as my small acquaintance with our lan-guage goes, hardly justifies the proud boast as to, at any rate, HIS marked elegance in diction. He protested against exceeding the speed limit, so to speak, in teaching. His contention is that education, properly regarded. is that education, properly regarded meant something more than "mere shoving it in." "Whaur's yere Wullte Shakspere the noo"?

There is a characteristic vehemene There is a characteristic vehemence in Father Bernard Vaughan which leads one occasionality to question whather be, religionist the he be, has not failed to assimilate the teaching that "charity" is after all the basis of his profession. Immoderation both in language and deed has been re-sponsible for most of the set backs suffered by his creed—especially his branch of it—but the knowledge of this does not tame his tongue any. Probably many people think that the Mormon theory is all wrong— pos-sibly many think it is worse than that the Mormon theory is all wrong pos-sibly many think it is worse than that —and possibly there may be some who believe with Father Vaughan that the whole Mormon community should be dropped into the sea. I have no opinion because I have title more no opinion because I have little more to base one on than has the Revd. Father -but even if I had I would think it impolitic in the interests of the Christisn faith to attack any community with a ferocity which amounts, if the priest really meant what he said, to advocacy, futile the it be, of plain murder. That, if one may judge by happenings in the past is the sort of way to lay Christianity open to the charge of intolerance rather than to get it recognized for what it is, when unadulterated, the religion of "charity which suffereth all things." . . . The three most popular sports just at present seem to be killing or being kil-led, either, you may take your choice,

The Musical Incas

In the remains of the vast Indian nation shattered by Pizzaro, the empire of the Incas, every man and boy, almost from the sige where he can walk, is an adopt on the simple reed flutes and Pandean pipes. They are a musical race; there are songs and airs for each season, for the planting, for the harvest, for the valorous deeds of vanished caciques, for their gods of old, to whom a new significance has been imposed by a pious church, and the long-drawn chants by means of which, at their yearly gatherings, they pass down the history of their race. As there is no written language, there is no written music; it is handed down from generation to generation by the ear alone. Their national instruments are but three in number: The flute, a d about, eighteen inches in length, with six holes, and a square slit at the end for a mouthpiece, played after the manner of a clarionet; the Pandean pipes, a series of seven reed tubes that, in the large ones, are four feet in length, and in the 'smaller ones scarcely as many inches; and the drum. The last is the universal instrument of all peoples; there are few races so low in the scale of human society as not to possess it.-Harper's Magazine.

Death Means a Separation. To-night it shall be my effort to show you that death does not mean annihila-tion, the cessation of consciousness,-extenction of being, but a separation of two existing principles, body and spirit, and that the spirit is conscious between death and the resurrection. While I pay my respects to the mortal soulists to-night. I hope to reach the fire and brimstone people next Sunday night. I propose to let the mortal soulists speak for themselves on this question and so I read: "That the extinction of their being will be the ultimate punishment of the wicked is evident from such plain assertions of the scriptures as that the wages of sin is death." Romans 6, 2, 3). This is taken from Jones in Thanatopsis; page 30 and 31. You will notice the Bible quotation does not read "the wages of sin is torture," but death. Mr. Jones here voices the senti-ments of Miles Grant, Mr. Williams, Pastor Russell and a number of other brilliant men on the side of the mortal soulists. In a discussion held a few years ago

nve

for them. It was a system of hyporisy, but even in this town certain people have to moan and cry for so long, ac-cording to their religious creed. You see how silly a thing it is, but no more silly than your putting on deep morning for so many more days, and by-and-by, before you have paid for the mourning for so many more days, and by-and-by, before you have paid for the mounment you have incurred the ex-pense of a new wedding dress. There is as much hyprocisy about the average funceral as there is about anything. People who have been waiting and wish-ing for some folks to die in order to be in the swim must feel terrible and they show it by sobs and sighs and solding tears. Jesus really wanted to put an end to this kind of hyporisy and so He said to the young man. "Let the dead" (those who are dead in trespass and sin, swallowed up in the frivolities and tinsel show, the froth and foam of society) let them put on airs at the funeral but you go about your more im-portant business and preach the gospel. That is all there is to that." In Romans 6, 23, we read, "The wages of sin is death." This is where Mr. Russell grows eloquent. He repeats it over and over again in nearly every semon. "The wages of sin is death," and yet he says they want you to be-leve that when a man is dead he is more alive than when he was alive, and he makes a big argument of it and he bedead and alive at the same time." And he propounds this question over and he wages of sin is death, not annihi-

ARE THE DEAD?

SERMON BY BISHOP R. C. EVANS

The Bible.

The Bible. Now I shall show you from the Scriptures that the word 'death' really means a separation. Matthew 8, 21-2, telis the story of a young man called to the ministry. He is about ready to leave home on his mission of merby and love when his father dies. He approached Jesus and said: "First permit me to go and bury my father," and Jesus replied, "Let the dead bury the dead. Follow thou me." You would not have me be-lieve that Jesus tried to teach that young man that it was the duty of some corpse in the grave yard to jump up,

points.

George thinks, to ask the branch firms of John Bull & Co. to meet the combin-ed forces of the United Kingdom. He

suggests that better competition would be seen if the executive, asked Eng-land, Scotland, Ireland and Wales to send separate teams. The interest he is of the opinion would be greater and the step might lead to an annual international meeting among the four sections of the United Kingdoms With the latter we have no concern and as for the former, well, we would just as

soon be beaten by a united team as by an individual British one, for the greater the conqueror the less the shame of defeat. Sportsmen in Britain are particularly interested in the approaching visits of Patching of South Africa, Woodger of New Zealand, and

Ryan of the United States. The performances of the first two clearly show that they will trouble the British sprinters at distances up to a "quarter," particularly as the old land

by no means well off for cracks at present. If McMillan, of Cambridge, can be prevailed on to compete, the visitors will meet a worthy rival, but other British sprinters are not great. Ryan will find the English Marathon runners harder to beat than was the case when little Johnnie Hayes woh the Olympic Marathon three years ago. Since then Britian's long distance cracks have had experience, and at least one really good man' (Sims) has been discovered.

Physical Culture at the Festival. A striking commentary on the in-cerest being taken in the festival is furnished by the fact that immediately it was announced that displays of physical culture would be made from London alone two thousand applications for permission to compete were received. ### Here's Your Home Built Within Six Days

No matter where you live-all you have to do is to choose from our Booklet the kind of Sovereign "Readicut" Home you want and you can be living in it from 2 to 20 days after delivery. You can put it up yourself.

Everything Needed Is Cut And Packed At Our Mills - You Pay Mill Prices Only!

Sovereign "Readicut" Homes are for busy people who haven't time to wrangle with builders and arch-itects—who want a good home quickly—without itects—who want a good nome quickly—without paying four or five profits to get it. Sovereign Homes are just as good as the best houses near you—are just as warm, as serviceable, as durable— yet you save \$100 to \$1,000 or more on the deal!

### Houses, Summer Houses, Garages, etc., From \$180 Up

Sovereign "Readicut" Buildings come to you with every piece cut, fitted and ready to nail. No skilled labor needed. Full plans and instructions show the way. Prices include all lumber, shingles, doors, windows, glass, plaster, board, interior trim, paint, nails, locks, hardware and everything complete. Four profits saved and you get just what you want!

Get Our Booklet, and choose your Home. Our prices include every-thing. No extras. Write to-day for the Booklet.

ing societies and at bridge parties and criticise other ers get together at public meetings and point out the vices and faults of others. Even ministers, whose trade it is to be charitable, are often more inclined to rail at the mote that is in the eyes of other men than to take thought for the beam that may happen to be in their own. The human race seems to consist largely of careful hunters for defects in other people.

ogether you will find them

Fault Finding Soon Becomes a Habit

Now intelligent criticism, as everybody knows, is both useful and necessary. Life consists of a series of experiments. Everything that is to be accomplished must be done Becomes a over and over again before it can be done right. Those who, out of their wisdom and experience, can point out to the beginner or the bungler his mistakes are of great value-PROVIDED THAT THEY ALSO CAN MAKE CLEAR THE WAY THAT THE MIS. TAKES CAN BE CORRECTED.

Unfortunately most criticism is destructive instead of constructive. The critic of the drama announces that an actor is a bad actor, or that a play is a bad play. He does not tell the Subject for actor how to become a good actor; he does not explain to the author of the bad play how he may write a good play.

In most cases he is neither an actor nor a playwright, and is quite as much interested in calling attention to his brilliancy as a writer as he is in crying down the performance he has just witnessed.

The critics of art and of literature write on much the same principle. The men who criticised the work of Kipling when he first began to write did not tell him how to write better: they merely solemnly declared that he did not know how to write at all, and that he had better go back to India and stay there. They were astonished when a year or two later they discovered that Kipling did know how to write, and that they did not know how to criticise.

Mark Twain, when he first began to write books and newspaper articles, was made fun of by many learned gentlemen hailing from Boston, who said that he knew nothing of English, that he was merely a literary clown, and that as soon as the curiosity aroused by his freak writings had subsided he would pass into oblivion.

Mark Twain will be remembered as long as Americans live and read. There is no one living to-day who can remember a single sentence written by a single one of his critics.

It is so easy to find fault. The old man coming home from a walk in the park watches two small boys playing marbles in the gutter. He observes that one of the boys does not shoot straight, and pauses to inform him that he had better mend his aim if he hopes to win any marbles. The boy says something disrespectful and continues to do the best he can. He knows that the old man could not shoot at all and that his criticism is merely the idle expression of a fault-finding nature.

But let a man come along who really knows how to play marbles; let him kneel there in the dust or mud of the cutter and teach these

and Very Easily Vice-The Best and Most Profitable **CriticismIs** One's Self.

they did not know before, and their small souls can scarcely contain their respect and admiration for him. Useful criticism is always appreciated.

Particularly vicious is that habit of criticism which is forever finding flaws that cannot be corrected. The dramatic critic who makes fun of the appearance of an actor, of the length of his nose or chin, of some trick of speech that is not to be eradicated, is simply needlessly cruel; he is not a critic at all." The man who laughs at the ungrammatical speech of another man who has never had the opportunity to learn to speak correctly, or at the foreigner who can no more change his accent than he can change the imprint of his nationality that may be stamped upon his face -such people ought to be made to feel that they are as boorish and unmannerly as the boy who throws stones at every passing stranger. In most European countries a stranger may speak the language never so badly and he will not be laughed at. In this respect the countries of the Old World have something to teach Americans.

Criticism for its own sake never helps anybody. When the great science of teaching becomes recognized as it deserves to be recognized there will be no instruction by finding fault. Teachers will never be permitted to irritate and antagonize their pupils by nagging or by sarcastic references to stupidity that is often the result of some physical defect.

Punishment such as "keeping after school," which wrongfully increases a child's already long school hours, and public humiliations before other members of a class will be abolished and every mistake will be criticised constructively; every pupil who falls into one will be taught how next time to avoid it. Could such a system be introduced to-day

done in one, and the things that children are taught would be far more firmly impressed on their minds than they are at present. To bring about such a condition of affairs will take many years of patience; for teachers to-day are underpaid, their services are undervalued and instead of being encouraged to do their best work they are continually harrassed by the fear that they will lose their places and too often bullied by carping and fault-finding principals, school superintendents and members of school boards. But when such a time comes, as it will, one of the first ideas imparted will be the conviction that self criticism is important and that the criticism of others is wasted time.

There are those in the world whose business is to criticise, and who to earn their livings must look out for defects in others. The foreman in charge of a gang of men, the superintendent to whom many foremen report, the manager who is responsible for the work of the superintendent, all must in turn be critical, for they will be judged by the mistakes that other men make.

To such people the business of fault-finding is hard enough. Few there are who would not rather find merit than defects. The man who employs large numbers of men would naturally rather secure efficient employes than in-efficient ones, for the plain selfish reason that he makes more profit out of the efficient men. When he has to find fault he does it reluctantly, and counts it one of the greatest among the many disagreeable things that come with control over others.

This being true, why should men and women, under no necessity of finding fault with others, but under a very great necessity of

look for defects in others? We confess that this is a question we cannot answer. Speculation and meditation alike reveal no explanation. It must be put down to "human na-ture," that curious affair which accounts for all the good there is in the world as well as all the bad and which all the scholars and philosophers ever born have not been able to analyze.

#### John Smith, the commuter, moves into the country for the benefit of his children's health and establishes a little garden patch for his own amusement and exercise.

John Brown, who lives in the country and has always lived there, sees Smith at work in his garden. Neglectful of the weeds in his own door yard, he comes and leans on Smith's fence, smiles at him and informs him that he

is doing everything wrong. Smith asks Brown how things ought to be done, and Brown tries to tell him. But Smith notices that Brown's own garden is going to the dogs and he does not set much value by the criticism.

Mrs. Brown, who has always lived in the country, sees the Smith children dressed in city clothes and criticises them and the way they are brought up. Mrs. Smith sees the Brown children, accounts them a parcel of future country louts and finds fault with them and with their mother's idea of child rearing.

### Brown, of course, by directing his criticism to himself might have had a tidy and profit-

learned something about children from Mrs. Smith, and Mrs. Smith might have learned something on the same complicated subject from Mrs. Brown.

But the whole party is engaged, each in criticising the other, and the profit that results is always on the wrong side of the mental ledger.

Brother and sister, mother and child, man and wife, can always gain by self-criticism. The husband who is continually complaining that he is misunderstood and abused presently comes to be such a terrible creature that he deserves the persecutions that he fancies he suffers from.

Often the wife who imagines that her hus. band is not doing enough for her could secure all the attention she craves by considering her own difficulties a little less and her husband's a little more.

Sometimes the mother who thinks that her Sometimes the mother who thinks that her child does not appreciate the sacrifices she has made for him could by making a few less sac-rifices do more to keep from building up sel-fishness in him and incidentally make her own load easier to bear. And the boy-well, ne boy ever thinks a tenth part enough about his mother and the debt he owes her and it is

not likely ever will. Fault-finding any man will find a splendid habit—if directed only at himself. Expended thus, it will correct his faults, eradicate his vices, give him a tremendous advantage over the thousands that are sure to be entered in the race with him. Directed at others, it will get him nothing but enemies, and enemies are
