## HOTEL AND LIVBRY.

THE proprietor thankful for past favors conferred on him since commencing business, would now inform the travelling public that he is better prepared to suit their wants than ever, as he has refitted his stock of Horses, and Rigs,
Geod Single or Denble h.igs for Commercial Men.
Good Liquors kept at the Bar and Meals at all bours.
JOSEPH WILSON, Proprietor,
CARLETON PLACE.
JULヌ.

## Appleton House.

THE proprietor of the above honse wishes to intimate that he has moved to a new and commodlous building, corner of Bridge and Water streets, where he will be found ready to accommodate the travelling public at all hours. Good Liquors at the Bar. A stage from the hotel connects with trains at Carleton Place, forenoon and evening. There is also a first class Livery attached.

## M. BRENNAN, <br> PROPRIETOR.

## Tho Grogorian Calondar.

To restore the civil year to a correspondence with the astronomical, Gregory XIII, ordered that the 5th of October, 1582 , should be called the 15 th . To prevent the intrusion of the same errors in the measurement of time in future ages, and to secure the recurrence of the festivals of the church at the same period of the year, he further decreed that every year whose number is not divisible by four should consist of three hundred and sixty-five days; every year which is so divisible, but not divisible by one hundred, of three hundred and sixty-six days; every year divisible by one hundred, but not by four hundred, of three hundred and sixty-five; and every year divisible by four hundred, of three hundred and sixty-six. A more perfect correspondence of the civil and astronomical years will probably never be obtained. After the lapse of four thousand two hundred and thirt -seven years the error will be less than one day. In the preparation of this rule every source of disagreement is estimated, and as far as possible corrected. The allowance of an extra day every fourth year is indecd a small excess; but this is not allowed to accumulate, for at the commencement of every century the centennial year is not to consist of three hundred and sixty-six days, or in other words, is not to be counted a leap-year, unless its number can be divided by four hundred. Thas the ycar 1600 was a leap-year, and the year 2000 will be the same : but the ycars 1700 and 1800 contained, and the year 1900 will contain, only 33 , tays.

## A Fow Statisticol Tivetin and Figures.

A legal stone is fourteen pounds in Fingland, sixteen pounds in Holland. A fathom, six feet, is derived from the height of a full grown man. A hand, in horse measure, is four litches, An Irish mile is 2,240 yards; a Scotch mile is 1,984 ; a German, 1,806; a Turkish, 1,626. An aere is 1,810 square yards, 1 foot and $3 \frac{1}{2}$ inches, each way. A square mile, 1,760 yards each way, contains 610 acres. The human body consists of 240 bones, 9 kinds of articulations orjoinings, 100 cartilages, or ligaments, 400 muscles or tendons, and 100 nerves, besides blood, arteries, veins, \&c. Potatoes below three feet do not vegitate; at one foot they grow quickest, and at two feet they are retarded two or three months. There are no solid rocks in the Arctic regions, owing to the severe frosts. The surface of the sea is estimated at $150,000,000$ square miles, taking the whole surface of the globe at $190,006,000$ square miles. Its greatest depth is supposed to be equal to the height of the highest mountain. or four miles.

IF you want a Crst ciass Carriage, buggy, wagon, slelgh or cutter, you will consult your own interests by calling at Glover's Carriage Factory, where you will find a large and varied stock of above articles, at prices to suit the market, made by first class workmen, best material and latest styies. Glover's carriages are unsurpassed for elegance and durability.
N. B. - He has removed to his new blacksmith shop, opposite Gillis \& MeLaretis kawmill, where every attention will be paid to horse-shoeing and gencral jobbing of every description.
Orders from the country promptly attended to. Carriage painting and trimming done as usual.

> Wm. Temploman, Publisher and Proprietor, Almonte, Ont.

Home Made Yeast.-Take a handful of loose hops (a pinch only of pressed ones), and tie in a bit of muslin; boil twenty minutes in a quart of water; take them out and throw in four sliced potatoes, and boil till soft ; strain all through a sieve, and add half a tea cup of salt, and the same of brown sugar ; scald these and let it stand till lukewarm ; add sufficient yeast to rise it. When quite light, or when it ceases to bubble up, put it in a jug or covered jar, set it in a cool place, and it will keep good a fortnight in hot weather, and a month or more in cold.

To Preserve Eggs.-The most convenient and satisfactory way to keep eggs fresh that we have ever tried, is to punch numerous holes in a tin pail, fill it with fresh eggs, lower the pail with the eggs into a kettle of melted tallow, which is as hot as can be without burning one's fingers when thrust into the liquid; then lift the pail out quickly and the melted tallow will flow out, leaving a thin quoting over the egg. Let the eggs be removed as soon as possible from the pail, and placed on the end of a keg or barrel, which should be kept in a cool cellar until wanted for use. As the eggs are so much colder than the melted tallow, a thin pelicle of cold tallow will be formed almost immediately, which will render the shell almost impervious to air.

Cane Botroned Charrs.--To clean cane bottomed chairs, turn up the chair bottom, and with hot water and a sponge wash the canework well, so that it may become completely soaked. Should it be very dirty you must add soap. Let it dry in the open air, if possible, or in a place where there is a thorough draft, and it will become as light and firm as when new, providing that it has not been broken.

Apple Marmalade.-Peel and core two pounds of subacid apples, and put them in an enamelled saucepan with one pint of sweet cider, or half a pint of pure wine, and one pound of crushed sugar, and cook them by a gentle fire three hours or longer, until the fruit is very soft, and then squeeze it, first through a collander, and then through a sieve. If not sufficiently sweet add powdered sugar to suit your taste, and put away in jars made airtight with a piece of wet bladder. It is delicious when eaten with cream or milk.

## D. S. McKINNON,

Carleton Place, - Ont.
1)EA:..1? IN

Pianos, Organs Melodeons,
Sewing Machines, \&c.

## 

## Its Advantages.

1st. It has an Extention Leaf so constructed that when it is needed it can be drawn out for use, and when not needed it acts as a cover for the box containing the attachments, and when the cover is on the machine it locks the leaf, box and machine by means of one lock on the cover.

2nd. A department on the left for the purpose of a work basket to keep the work safe and clean under lock and key.

3rd. It has an adjustable treadle so arranged that the operator ca. work the machine in the ordinary way or can change the position of the leg when tired and work it with a straight leg.

4th. It has a pincushion so arr nged at the right hand that needles, pins, \&e., are convjniel hay and this article acts at the same time as a rest.

5th. It is so placed on rollers that a child can move it from place to place.

6th. The bobbins for the machine can be filled without running the machine, by simply running the whesk and treadih

7th. On the spooler is a small emery wheel for the purpose of sharpening needles, or even knives, scissors, \&e.

8th. The running wheel is so placed out of the way that it cannot soil or mess a lady's dress.

9th. It is made portable so that it is convenient for transportation and can be taken to piecee for packing to ship, so that it can be carried about without being damaged.

10th. It is an ornament to any room as well as useful in the nureery and eowing room.

RHE Sewing Machine business has been worked up to such a pitch that it is difficult to get a poor Sewing Machine now-a-days, and it is difficult to know which machine is truly the best. Every agent -6 claims he lias the very best; every manufacturer the same. But to come down to the fine thing, although a machine will do its work in a different way and by different movements they all do the same work and do it equally well, if properly operated on, and as for durability we find yery old ntachines of every desoription doing as well as when new, and we also find new machines of all sorts used up in a very short time. It is generally are wainted, and not ateel, when a Sewing Machine now-adays will not do well.

This new and useful stand is adapted for any kind of a Sewing Machine.

This stand is truly a novelty and a useful article and is sure to be a favorite with the ladies, and especially mothers, for they can sit at the machine and sew, and at the same time-by means of an attachment-keep the orndle in motion, and not let the darling wake up. It has several other very important points whioh will make it a general favorite and desirable for the housedold.
