#### Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

|              | Coloured covers / Couverture de couleur  |          | Coloured pages / Pages de couleur  |
|--------------|--|----------|--|
|              | Covers damaged / Couverture endommagée   |          | Pages damaged / Pages endommagées  |

#### Commercial Summary.

Werchants, Manufacturers and other business men should bear in mind that the "Journal of Commerce" will not accept advertisements through any agents not specially in its employ. Its circulation—extending to all parts of the Dominion—renders it the best advertising medium in Ganada—equal to all others combined, while its rates do not include heavy commissions.

ALL KINDS, FOR ALL BUYERS.

#### JOHN FORMAN,

644 Craig Street. - - - - MONTREAL.

-Tickers bought in Canada for steamship passage on boats sailing from U.S. ports must bear the war tax stamp.

—IN 1896 there were 33,653,574 barrels of beer consumed in Great Britain, the average contents being 9 gallons. The spirits distilled were 54,622,706 gallons. In the matter of British spirits alone, Ireland consumes nearly half as much again per head as England and Wales, and Scotland more than twice as much. Scotland's present average is a gallon and a-half, that of Ireland just under one gallon, that of England and Wales under three-fourths.

—The offer of the Canadian sealers to sell out their business may be reasonable, but it is not nearly so cool as the general design of the Alaska Commercial Company. Who is to compensate the hundreds of Canadians and the hundreds of Indians who now make their living by the seal industry? The vessel owners are not the only interest nor by any means the greatest Canadian interest involved. To allow a corporation to pull international wires and close an ocean to the world's productive industry is something new under the sun. Such is the Globe's verdict on the proposal to sacrifice our sealing rights in order to smooth the way for reciprocity, such also is ours as we have already stated.

-Among the natural sources of wealth existing in Cuba timber is an important one. There are 17,000,000 acres of virgin forest which contain upwards of forty species of valuable hard wood. The first lumberman to exploit these forests will find, it is argued, a mine of wealth. It is calculated that about \$220,-000 a year represents a small fraction of the possible exports of hard wood. The wood which comes to market in largest quantities from Cuba is cedar. Other woods which largely come from Cuba are mahogany and lignum vitae. They are both plentiful. The common mahogany of the island is considered the best there is and sells in the States and Europe from \$110 to \$180 per 1,000 feet. Another kind, called figured or birdseye, sells from \$400 to \$600 per 1,000 feet. In some instances this wood has been known to sell as high as \$1,250. The Cuban lignum vitae, the finest known, is much in demand, bringing from \$25 to \$40 a ton; the extra quality \$45. There are other woods which would be valuable if they were only brought to market.

—No soener have the last rumblings of the great mining strike in Britain died away, than the portentious threatening comes of another bitter labor war to break out among American miners, so soon as the Chicago contract expires in the early part of next year. It is said if, as contemplated, a reduction be made in wages, there will commence the greatest coal strike this continent has ever seen.

—The customs returns at Ottawa for July and August of 1898 show a large increase over those for the same months of previous years as follow:

| July, 1896   | \$19,295.43  |
|--------------|--------------|
| August, 1896 | 25,140.35    |
|              |              |
| Total        | \$44,485.79  |
| July, 1897   | \$25,265.61  |
| August, 1897 | 33,826.64    |
|              |              |
| Total        | 58,592.25    |
| July, 1898   | \$55,445.32  |
| August, 1898 | 48,621.86    |
| M-4-3        | 9104.000 10  |
| Total        | \$104,067.18 |

-THE American Steel and Wire Company of Chicago, is stated by The Tribune to have been organized last April by the consolidation of companies controlling 75 per cent of the production of wire rods and barb wire in the United States, has received formal overtures to become a party to the great iron and steel combination now being consummated in New York. In response to telegrams received from leaders of the big deal now in the East. President John Lambert, of the American Steel and Wire Company, together with four directors and principal stockholders of the company-L. L. Eldwood, William Edinborn, Alfred Clifford and S. H. Chisholm-have left to attend the conference now pending in New York, at which they will be prepared to present terms on which their company is willing to join in the deal with the Illinois Steel, the Minnesota Iron, the Lorain Steel Steel and the Elgin, Joliet & Eastern Railroad Company, which, together, are to make up the new "Federal Steel Company." The American Steel and Wire officials, before starting, stated that their acceptance of the proposition to become a party to the new steel company would be contingent of the stock of that company being allowed to come in on a basis by which it could share fully and fairly in the prospective benefits of consolidation. The participation of the American Steel and Wire Company in the combination with the companies that mine and transport iron ore and convert it into steel will add enormously to the scope of the new corporation, and it will give it an almost complete command of all the diversified branches of one of the greatest industries of the United States. The new company's business will include the various processes of production and distribution from the mining of ore in the Lake Superior ore region to the manufacture of armor plate for war vessels and of barbed wire for the fences of farmers throughout the lands.

Agents for Canada,

LEMOINE ST., MONTREAL.

-THE U.S. Navy Dept, has delivered over the "New York," "Paris," "St. Louis" and "St. Paul" to their original owners, and these four vessels will at once be dismantled of their warlike appurtenances and employed again in the paths of peace.

-An effort will be made by the members of the American Lake Carriers' Association to have the International Conference on the resumption of its sittings at Quebec, consider the abolition of tolls on the Welland and other canals. It is said the chief opposition will come from the Canada Atlantic Railway.

-CANADIAN butter, it is said, shipped to the Old Country from Montreal in boxes and tubs, finds its way to China and Japan across the Continent, on the Canadian Pacific, this time done up in hermetically sealed tins.

-In consequence of their steadily increasing business with Canada, Furness Withy & Co. the West Hartlepool, Eng, steamship firm have opened an office in St. John, N.B., under the management of S. Schofield, who has been the representative of the firm there during the past fourteen years.

-ATTENTION has already been called to the success of the Ottawa & Parry Sound Rly, in diverting grain traffic from Duluth and the west. Corroboration is now forthcoming in the decrease of U. S. canal grain, traffic which is much behind

CABLE advices have been received from Havana to the effect that shipments to that port should be suspended because it is difficult to make ends meet as long as the Spanish authorities have control of the Customs. The present duties are materially higher than those in force before the war, the Spaniards having recently restored the maximum tariff and in addition advanced its schedules by 20 per cent.

-RECEIPTS from the sale of war tax stamps in the district of New York for month of August were nearly \$1,500,000 against \$232,000 same month last year. Incident to the local bearing of this tax, the Commissioner of International Revenue has revoked a former ruling that steamship passage tickets issued in Canada and used upon vessels sailing from United States ports need not pay the war revenue tax.

-THE unabashed ingenuity of the average importer to whom "Business is Business" when it comes to passing customs entries, is well known. A unique illustration of this is noted in a Chicago appraisers decision. The article was soap made in fancy shapes, fruits, etc. The importer felt aggrieved that his declaration "artificial fruit" failed to carry.

-Representatives of British West India agricultural and commercial interests in session at Bridgetown Barbadoes recently. decided to memoralize the British government to give sugar growers adequate relief against the system of European bounty sugar in the English market. This appeal is becoming as notorious for delay and want of settlement as the celebrated Dickensonian chancery suit "Jarndyce vs Jarndyce."

-A MEETING of the creditors of the insolvent estate of Yerxa & Co., grocer, Frederictou, N.B., was held Saturday last. The assignee reported liabilities of \$3,186 and assets to be \$1,542. Six hundred and seventy dollars of the latter are book debts, many of them worthless. The assignee was instructed to close up the estate. It is said this will pay about 25 cents on the dollar.

-The exchange and stock broking firm of Lownsbrough & Co., 22 King street, Toronto, have suspended payment. The business was managed by Mr. Thomas Lownsbrough, but was in reality owned by his wife, who is understood to have furnished the capital for the business. Besides his stock-broking and exchange business he did some private ranking on a small scale. There is general regret felt among brokers in Toronto over his difficulties, and in all probability an effort will be made to reach some satisfactory settlement. Liabilities will amount to between \$25,000 and \$30,000, but no statement of assets has been prepared as yet. Mr. Lownsbrough has been in business for himself for about fourteen years. The firm was formerly Forbes & Lownsbrough, but they failed in 1884, with liabilities of \$53,000 and assets of nominally \$19,000. The trouble was not entirely unexpected in the "street," as it was pretty generally known among the brokers that the firm had not been recently financially sound, and in fact it was expected that an assignment would have to be made. He is not a member of the Toronto Stock Exchange.

JOURNAL. Prices and workmanship Guaranteed right.

-During the month of August the land department of the C.P.R. disposed of 19,448 acres of land for the total sum of \$64,-390; more than double the sales of August 1897, when 9,640 acres were disposed of for \$30,209. It is expected that the present month will see a continuation of land activity in the North-West.

-A FEW weeks ago Messrs. A. L, Stares and William Cook, who were in the retail furniture business in Hamilton assigned to G. J. Burkholder, the assignment subsequently being transferred to F. Il. Lamb. Furniture men in Toronto, Goderich Guelph and other places suffered severely by the firm's failure, concerning which all was not right. As a sequel to this view Messrs. Stares and Cook have been arrested. The charge against them is stealing certain documents and titles to goods.

-THE introduction of lasting machines into the boot and shoe factory of Geo. T. Slater & Sons, Montreal, has caused a strike of the operatives. The machines were adopted, not altogether from reasons of economy, but for their ability to do the work better than by hand in accordance with the known rule of the Messrs. Slater, to keep constantly improving their well known shoe. It is mooted, as a result of this friction and others of a similar nature which may lie ahead, that the firm will probably remove their factory to the West, where labor is less arbitrary.

-THE responsive pulse of the markets of the world helped by the cable and the cheap rates of freight between distant points across sea, is forcibly shown in a shipment of New Zealand butter to London which was reshipped back because of higher price ruling at home than in England. More remarkable still is the fact that despite the long voyage through torrid climes the butter arrived back in good condition-thanks to refrigeration.

-THE new piers being built on the North River (N.Y. harbour) for the White Star and Cunard lines will be in use beginning of new year. The White Star will pay a rental of \$168,750 per annum, and the Canard \$117,088 for two piers each. All the piers will be connected by continuous bulkhead sheds, two stories high. In these will be the power, lighting, pumping and other machinery necessary for conducting the unloading of cargoes. It is of interest in this connection to note that electric power will very likely be used instead of steam if experiments now being made prove satisfactory.

-THE following, according to Prof. Robinson, the Canadian dairy Commissioner, is a list of the temperaturess at which it seems desirable to hold the different products in their best conditions :

| •   | Degrees<br>Fahr.           |
|---|----------------------------|
| Butter (for long periods). Cheese (for long period). Tender fruits, such as early apples, pears, peaches, tomatoes (for long periods). Dressed beef, mutton, pork and poultry Eggs. | 36<br>38 to 34<br>32 to 30 |

-THE number of passengers carried on the American railways during the year ending June 30, 1897, as reported, was 489,445,-198, there being a decrease of 22,327,539 as compared with the year ending June 30, 1896. The number of passengers carried 1 mile during the year was 12,256,939,647, a decrease of 792,067,-586 being shown in this item as compared with 1896. The number of passengers carried 1 mile per mile of line-that is, the average indicating the density of passenger traffic during the year ending June 30, 1897—was 66,874, a decrease of 4,831 in this item being shown. The number of tons of freight carried during the year was 741,705,946, which is 24,185,439 less than for 1896. The number of tons of freight carried 1 mile was 95,-139,022,225. This item also was less than for 1896, the decrease being 189,338,053. As in the case of passenger traffic the density of freight traffic is shown by the number of tons of freight carried 1 mile per mile of line, which was 519,079. This amount is 4,753 less than the similar item for the preceding year.

-THE world's wheat production for 1897 credits the United States with 330,149,000 bushels, followed by France with 251,-203,000, Austria-Hungary with 133,370,000, and Germany with 107,000,000 bushels. All other continental European countries with their enormous population to support produced 600,000,000 bushels, and the United Kingdom only 54,527,000 bushels; Argentine, which is so often quoted as being such a great wheatproducing country, could furnish only 32,000,000 bushels. The totals for the world in the last seven years are as follow:-

| 1807 | 2,214,030,000 |
|------|---------------|
| 1896 | 2,426,000,000 |
| 1895 | 2,546,000,000 |
| 1894 | 3,676 003,000 |
| 1893 | 2,563,000,000 |
| 1892 | 2,482,000,000 |
| 1891 | 2,432,000,000 |

#### GROCERY NOTES.

The Acadia Sugar Refinery, Halifax, has advanced sugar 1-16c all round. This makes a total advance within the past month of 3-16ths.

In consequence of dearer raw markets, some cocoa manufacturers in the States have advanced prices 1 to 4c per pound on sweet chocolates and breakfast cocoas, the largest advance being in the latter.

California seeded raisins are expected to open high, owing to the fact that a raisin combine exists on the coast. Moreover a recent disastrous fire at Fresno, Cal., destroyed several of the packing houses together with a large stock of the raisins suitable for seeding.

Prices on Fraser River salmon have advanced at the coast 10c per dozen, within the past week.

Bosina prunes, in casks, 1898 crop, are being offered at 11s 9d, cost and freight, New York, which is equal to 4 7-10c duty paid

Cables from Sicily quote shelled almonds for early shipment at 66s 6d.

A consignment of 979 packages pingsuey tea was rejected by New York examiners Friday last. During August 645 packages pingsuey were condemned and 1,183 packages entered. The disparity between one day and one months record is suggestive of the fact that new pingsuey tea must be rank quality.

The Arbuckle Refinery N.Y., the pioneers in the package sugar business, before noted in this column, commenced delivering the new style last week. Deliveries were limited to one car for each buyer, each carload to contain twenty-five barrels of soft sugar and 175 cases of package sugar. The price of the latter was 51/2 cents per pound for both two and five pound packages.

A lighter with a cargo of 2,000 bags of rice sank in New York harbor last week.

American refiners stocks of granulated sugar are 500,000 barrels less than at this date last year, and as heavy consumption has now set in, the immediate course of the market there is towards an advance.

One of the principal reasons for the upward tendency to prices for coffee in Santos, noted of late, is said to be the demand from exporters to cover sales for August-September shipment to the N.Y. market.

The British ship Lucipara, which cleared for Liverpool from San Francisco on August 23, had on board 33,553 cases of canned fruit for that city. It also had in canned fruit for Bristol 1,305 cases, Birmingham 275, Sheffield 110, Plymouth 110, Preston 50, Edinburgh 75, Glasgow 1,100, Belfast 210 and Dublin 100. It is manifest from this scattered distribution that Old Country folk are taking to the canned products of the western world in no uncertain way. Canadian packers by this showing, it would appear should go and do likewise.

Unless heavy losses are entailed by storms or continued heavy rains the present Louisiana rice crop will be quite double that of 1897.

Present indications point to an increase of 725,000 bags in the world's visible supply of coffee when August figures are made up which is larger than was expected. This is explained by the fact that the deliveries were considerably smaller than for the same month last year, the difference being about 150,000 bags. The increase in the world's visible supply during the month of August last year was 922,272 bags. The increase during the same month in 1896 was 899,032 bags.

The following statistics of the entire imports of teas with the United States for the years named and obtained from Government records is of interest to the trade for comparisons: 1892-93, 89,461,281 lbs.; 1893-94, 98,518,717 lbs.; 1894-95, 97,253,458 lbs.; 1895-96, 93,998,372 lbs.; 1896-97, 113,347,175 lbs.

A Smyrna letter of late date regarding figs states that news "all in" reduces still further the output of figs to 22,000 camel loads (the estimate in June was 34,350 loads) and says: "Tho above estimate was made by one of our staff who went on a trip of inspection to the producing districts. There is no doubt that high prices will rule this season. We do not expect prices to decline as the season advances; firstly, because the crop is decidedly small, and secondly, because it is when the fruit will be coming down to market and the shortness of the crop will be ascertained and admitted by all concerned that prices will be pushed up gradually. Contrary to what happened in previous years, we now think it would be prudent this year to go into purchases early in the season."

For shipment on the "Melville," the first steamer from Greece to sail for New York, new crop currants are offered at 13s in barrels for Provincials and 13s 6d for Amalias.

MONTREAL FRIDAY, SEPTEMBER 91H, 1898.

#### THE HARBOUR IMPROVEMENT PLANS.

Although the necessity for more berths for ships in the harbour is becoming more urgent as time passes, the commencement on the new work still lags. Why this is so-and on whom the responsibility rests-will some day have to be explained. The Government has provided the money and has urged the commencement of the work; yet it does not go on. The indications are that one if not more new lines purpose entering into competition for the future greater trade of the St. Lawrence route, and these will want wharf accommodation which cannot be given without displacing old existing lines.

Various reasons are affoat accounting for the present apparent block in the way of progress. From the report of last Tuesday's meeting we are inclined to think the principal reason is the inaction of the City Council in the matter of showing that the City may be able and willing to provide the money for its share of the cost of the general improvement. That question is undoubtedly one of great importance, but as has before been stated in these columns, that is not a good and sufficient reason for delaying the commencement of the work of enlarging the wharf space. In so far as the business of the harbour is concerned—in being mixed up with the city's affairs—the only question is that of high or low level. The plan that has been agreed upon will suit equally well for either. No reasonable person who will think and reflect upon the amount of work to

be done in building the first pier, in a restricted space, without interfering materially with the trade in the upper part of the harbour, can expect—now that this season is drawing to a close—that it (the first pier) can by any possibility be brought up to the level of the present wharves before the end of next year. Until that level is reached the co-operation of the city does not come in at all unless it is desired to construct the sewer to divert the tunnel that now empties into the harbour at the Custom House which work ought to be done at once in any case.

Why, then, wait for the city?—is a question that people will naturally ask. We notice that the Mayor, with his usual energy, is endeavouring to urge the Commissioners to act. He is always sanguine—a valuable trait in the character of a public man. He should know the City Council's intentions if any one does, but he may possibly be disappointed. Anyway he is right in his desire to have the work begun without any more loss of time.

There seems to be considerable interest in certain quarters as to the selection of a site for the proposed dry dock. Tenders were advertised for suitable ground for the site and, as might be expected a number of offers were sent in. These when opened were kept back from the public, and, as a consequence, all kinds of rumours soon got into circulation. There was a natural curiosity on the part of the proprietors of the lands offered, and of real estate agents interested, to know the result. It was not long before the prices at which all the fifteen different properties offered were known by those concerned despite the effort made to keep the matter secret. Until human nature is totally regenerated these things, we suppose, must always happen so that the prices might as well be officially given out at once. No harm could come now from the publication.

This question of the selection of a site for the dry dock is a very important one. A distance of two or three miles away—or in the harbour—is not the important question; neither is the first cost of the land. There is primarily the quality of the soil at the great depth to which the work will have to be carried. In this respect a low-priced lot might possibly cost vastly more in the end than a higher priced one. The question of easy approach to the dry dock naturally comes into the calculation: Some places will require a greater outlay for dredging than others, and this will doubtless have an important bearing on the selection. It is a very proper precaution to have these matters examined into, as has been ordered by the Harbour Board, and, as La Patrie informs us, the Hon. Mr.

Further information supplied by any of the Managers, General or Special Agents in the U.S., Canada, Great Britain or Europe.

Home Office, Muiual Reserve Building, - NEW YORK CITY.

Tarte is afterwards to have the local engineer's reports on these vital points examined into and verified by the engineers of the Public Works Department. Within the last few years that department has had considerable experience in the construction of Dominion Dry Docks, and in the end, doubtless the best, and in all respects the most suitable location will be selected.

From defective soil the new U. S. naval dry dock in Brooklyn has cost nearly as much this year and last to stop the leakage and prevent a total collapse as the original cost; and the authorities are not yet over sure of it.

#### THE CZAR'S PEACE PROPOSAL.

A circumstantial story is current which traces the recent action taken by the Emperor of Russia to the inspiration of the Queen of England. This story in brief is to the effect, that for some time past the aggressive movements of Russia in China have been most offensive to the British Foreign Office, but those movements have not been resisted, or vigorously protested against because the Queen intervened to prevent war between Great Britain and Russia. Hence the weakness charged against Lord Salisbury, whose hands were held under the Queen's control. The bold declarations made by Mr. Chamberlain and Mr. Goschen regarding the gravity of the situation, and the necessity for increased armaments to meet those of Russia showed the country how close it was to the brink of war. The subdued roar of the British lion was heard in the land. Bye elections were adverse to the government because Lord Salisbury's alleged weakness in dealing with Russia in China was an offense to British pride. The democracy of Great Britain hate Russia with passionate intensity, the very name of that empire is a synonym for everything evil in government and in social arrangements. Lord Salisbury knows this well as he voiced it in his early days and he knew that any further sign of truckling to Russia would arouse such general indignation as would ruin his government and precipitate war. He is said to have told the Queen that as a crisis had arrived he must now take a bold stand in resisting Russian aggression even to the point of declaring war. Her Majesty thereupon is said to have written a strong appeal to the Emperor of Russia, which was conveyed to him by the Princess of Wales. In this the Queen pointed out the terrible responsibility of those whose policy caused such a calamity, and implored the Czar in the name of humanity to place himself on the side of peace. This appeal was supported by the DowagerEmpress, and the Czarina who is known to be a power, not behind, but aside the throne.

The situation recalls a parallel one in ancient days. When the Romans and Sabines were about engaging in a battle, the women on both sides interposed with tears and entreaties, by which mutual slaughter was prevented, and the threatening combatants were, by female influence, united in a lasting peace. He is an optimist indeed who expects a similar denouement to the present drama.

To understand how such a revolutionary proposal as national disarmament could be made by one of the most powerful of rulers we have to bear in mind that under the Russian system of government the Czar alone can propose, and he alone can carry out any reform. Peter the Great thought he could by an edict change the Russian national and race character. There is not a statesman in that Empire who is known to the people. There is no public opinion swayed by political leaders.

The Czar, out of the millions in that vast Empire, is the only man whose thoughts, speech and actions are free, the rest are his instruments, or echoes, with a scattering of nihilists. The Emperor Nicholas by his word released over 22 millions of his subjects from serfdom. The Emperor Alexander III on his accession in 1881 threw out hints of its being his intention to give the country constitutional government; to abandon the hereditary policy of national aggrandizement; and to establish and keep his kingdom in peace.

A form of government which centres all the initiative and practically the whole executive power in one man creates a condition which is very apt to develop dramatic surprises in the policy of its chief ruler. Being untrammelled by a Parliament, or a body of Ministers responsible to the country, he is exposed to influences from the pressure of which a constitutional ruler is free, and there is nothing to prevent a Czar manifesting the effect made by such influences upon his mind. It is no novelty for woman's influence to be exerted in politics, the salons of Paris, and the drawing rooms of London, have long been centres of political intrigue. It is however something new for a great ruler to issue a manifesto under the inspiration of women calling on the nations to revolutionize their military policy, and reduce their armaments in the interests of peace. Such an event is enough to make the bones of the Empress Catharine turn in their sepulchre. It is however eminently meet and right for woman to plead for peace, for upon woman falls the cruellest sufferings of war, while she shares in none of its glories or rewards.

While we honour the humane sentiments of the Czar's manifesto we regard its proposal as utterly impracticable. Schiller, in William Tell. says, peace is the blessing of the peaceful, but he also says, in a later passage, that the most peaceful have their peace disturbed by unpeaceful neighbours. When all men are honest we can abandon locks and policemen, so, when all nations abandon aggression and ambition, the world's armaments may be disbanded and abolished. The Czar's proposal supposes conditions which neither exist, nor are likely to exist until the millenium, one sign of which will be, that "nations shall learn war no more."

At present the entire frame of the civilised world is held together by force of arms. France is craving to recover Alsace and Lorraine; Germany is seeking a

foothold in Asia; Italy is anxious for a foreign possession; Russia is pressing on to the seizure of part of China, and Constantinople is still held to be a Russian goal; Norway, Sweden, and Denmark are in dread of absorption by Russia or Germany; Great Britain is advancing its power in Africa and in China; and the United States, which have so far stood aloof from foreign complications, are now an Imperial power which will have to be defended by a strong navy, and a standing army, both rivalling those of first class European nations. In the world of national interests there are a number of Gordian knots which will have to be unravelled by a sword cut. The nations have no supreme tribunal to appeal to for justice, or protection. They must settle their quarrels, like two lawless toughs, by a fight. Until such a tribunal is established endowed with power to enforce its judgments the nations cannot disarm. The more possessions they have to defend and the more trade interests they have to protect and promote, the stronger must be their armaments. The most peaceful nation must guard its peace and properties against the dangers caused by an unpeaceful, aggressive, ambitious neighbour. Every nation must be its own judge what armaments it needs for defence just as every man decides how strong shall be the bolts on his door. Great Britain, said Mr. Goschen, "must have a navy equal to any two others," because her only danger would be from two powers acting in concert as her foes, and the British Empire needs more for its defence than any single nation.

While the questions now agitating, or promising in the future to disturb the nations of Europe, remain as ? factors in the political situation, mutual distrust will be too prevalent to allow of any armaments being abandoned, or materially reduced. If a Conference of the great powers would settle all those questions, and arrange and fix once for all the metes and bounds of each power, and establish a permanent International Tribunal to decide all disputes between nations, so as to compel obedience to its decisions, then the growth of armaments would cease and they would gradually decline in extent as confidence developed in such a Tribunal as a guardian of the world's peace. Such a scheme may seem Utopian, but it is more practicable than one for disarmament on the mere grounds of national As that is the basis of the Czar's proposal humanity. we regard his manifesto as a brilliant philanthropic meteor the flash of which will add no permament light or leading to the world.

#### AN ANNEXATION MANIFESTO.

When some infatuated man persists in forcing his solicitations upon a woman whom he desires to "annex," in spite of her indignant protests, she can secure protection against his annoying attentions by appealing to a police magistrate. It is to be regretted that some such form of restraint cannot be applied to the agitator who keeps up the issue of perpetual appeals to Canadians to become annexed to the United States in language which is grossly insulting to us. Were these appeals merely made by one individual they would be offensive enough to provoke resentment, but when they are really issued by an American propaganda devoted to the cause of Canadian annexation, and distributed throughout the length and breadth of the United States, these appeals are highly

calculated to foment discord between the peoples of the two countries. At the present time when a spirit of amity is abroad, when old-time prejudices are giving way to enlightened mutual respect, it is crime for documents full of the seeds of ill-will to be sown broadcast. One such is before us, and as our opinion upon it is invited we give it freely.

The paper is issued in the form of a letter protesting against the friendship which is being mutually manifested by the States and Great Britain; appealing to Canadians to abandon their association with the British Empire; and warning them and the mother country that Canada will be coerced into annexation, which is impiously declared to be a Divine decree. The writer is the notorious person, ex-member of the Canadian Parliament, who, some years ago, "left his country for his country's good." Against Canada he has ever since shown a fanatical hatred, as is usual in such cases. One reason for our objecting to annexation to the States would be that by such an event we should be again fellow-citizens with the traducer of our and traitor to his own country. We should decidedly object to such an association. He declares that the pressure upon the political gauge in favour of political union with the States, is so intense that "the bursting point is not far off." In the same paragraph he asserts, that Sir Wilfrid Laurier has notified his supporters that "if he is successfull in negotiating a treaty of reciprocity with the States he will dissolve Parliament and appeal for a new 5 years' lease of power." This political genius in one breath declares Canada is "bursting" with a desire for annexation, and in the next breath he declares that Sir Wilfrid contemplates being Premier of Canada at least for the next five years! The "bursting" explosin is thus said to be both imminent and yet impossible to occur for a number of years. The failure of Sir Wilfrid to negotiate a reciprocity treaty with the States he then declares, " means the overthrow of his administration," and the accession to power of the Conservatives. What a jumble we have in these predictions. The Canadians are first depicted as "bursting" for annexation, then the Liberal leader is declared to be playing his cards to get a new five years' lease of power, and then his failure to secure this by securing reciprocity is declared to mean the establishment of a Conservative government. Where is the evidence of the "bursting" spoken of in either of these alternative events? If the Liberals stay in will they hand over Canada to the States? Will Sir Wilfrid immolate his native country, the new "nation," he is credited with creating, on the altar of American jingoism? His administration and his reputation would be blown up as disastrously as was the Maine if he moved one step towards annexation. His name would be a popular synonym for traitor to all future generations in Canada. If the Conservatives came into power would they show a "bursting" zeal for Canada's severance from allegiance to the British Crown? They would-quite as much as the Liberals and no more.

The ex-M.P. writes; "Canadians are in a state of coma." Now "coma" means the sleep of stupor, which is a peculiar condition for a people to be in who are "bursting" with a passionate desire for a political revolution. Canadians will appreciate the insolent slander implied in their being spoken of as in a stupid sleep. Last year we sold the States goods for \$41,122,-556 and bought from them others for \$86,587,484.

which was a miraculous business to be done by traders "in a state of coma." After this compliment to us Mr. ex-M.P. emphasizes it by saying:

"The States are expelling Spain from this hemisphere because she maintained a nuisance at our doors. We shall expel Great Britain unless she withdraws from our northern boundary."

So Canadians are not only in a stupid sleep, "in a state of coma," but Canada is "a nuisance" like Cuba was, and, says this ex-M.P., Great Britain must either withdraw the "nuisance" by handing Canada over to the States, or she will suffer the fate of Spain. That no mistake may be made about this it is further declared.

"This hemisphere will become all Republican or all Monarchical, between them there is an irrepressible conflict which will continue until one destroys the other."

We have hitherto regarded Bombastes Furioso as the supreme, the ideal type of a swaggering, insolent braggart, but his proverbial fame is eclipsed by this "ex-member of the Canadian Parliament."

He winds up his appeal to us to commit national suicide by declaring that the republican form of government was "begotten of God, and conceived in Paradise." Leaving the profanity aside, we may remark, that the Creator throughout the Scriptures bears the title of "King," not "President," and His rule is declared to be over a "Kingdom" not a Republic.

The letter under notice condemns the association of the States with Great Britain in any form of friendly alliance. It is avowedly an appeal to the baser passions of the American jingoes, whose active hostility against Canada it endeavours to excite. It grossly insults Canadians by describing our country as "a nuisance," and ourselves as being "in a state of coma," or sleep of stupor, and by warning us, that unless we voluntarily become annexed to the States we shall be compelled to by force of arms.

Such a manifesto in a time when anti-British feeling was running high in the States might do infinite mischief as a fire brand thrown into combustible materials, but now the two peoples are rejoicing over the prospects of enduring peace and international good-will, such a document will be regarded as equally offensive to the people of America, of Great Britain, and of Canada.

Annexation is a "nuisance," it is a political corpse; it will not answer to any galvanic shocks; the sooner some friendly buzzard picks its bones the sooner will the international atmosphere be sweetened.

#### THE CORNWALL BRIDGE DISASTER.

An accident occurred at Cornwall on the 6th inst. by which 14 men were killed, or drowned, and 17 seriously injured. The catastrophe was caused by one of the piers giving way sustaining the new International Railway bridge over the St. Lawrence, by which collapse two of the spans were thrown into the river. The victims were workmen engaged upon the iron superstructure. The work of constructing this bridge was very similar to that of the International Bridge between Fort Erie and Buffalo. In both cases the piers had to be built in deep water where the current was strong. The builders of the Buffalo bridge however had an even greater difficulty than a swift current, for

when an easterly wind arises the Niagara river at that point is liable to rise suddenly six or more feet, to the imminent peril of those engaged in the work. Caisson after caisson was carried away down stream, but at last the piers were built up from the very uneven bed rock, and have remained for many years without injury or any sign of weakness. The Victoria bridge is another illustration of marvellous engineering skill in building piers in deep water where there is a strong current.

With these standing as models of structures of this class, the whole details of the construction of which are in the hands of every civil engineer, there was nothing experimental in the Cornwall bridge. The builders had but to follow precedents to achieve success. It was known to an ounce what weight was to be placed on the piers, and known also the bearing strength necessary to support the superstructure they had to carry. There is nothing mysterious or uncertain either about the capacity or incapacity of concrete to resist the pressure of such enormous weights as the iron spans of a bridge like that at Cornwall. It is alleged that the pier which collapsed had a concrete base, built up to within a few feet of the surface, and upon this was placed masonry work. One of the most difficult of structural engineering works is the provision of a solid, level base for piers when they have to be built on the bed of a river which is very uneven. This problem caused extreme anxiety, delay and difficulty to the engineer of the Buffalo bridge. It is obvious that piers intended to bear the strain of several hundred tons must be especially solid at the base, they ought indeed to be so built as to be practically a part of the rock on which they rest. When an investigation takes place we believe it will be found that the pier which collapsed was defective in this vital feature, but why defective, especially whether from concrete being relied upon instead of masonry, will be a most important question. It is reported that as there are known to be quicksands in that district, this may afford an explanation of the disaster, but we cannot believe any engineer would build a bridge pier on a doubtful foundation. The piers were regarded in the locality as unusually slim.

If there had been any departure from methods which had stood the severest tests, methods which have been adopted by the most eminent engineers, from motives of economy, or for experimental purposes, or incapacity to master the problem involved in building piers in deep water running swiftly, those who adopted such a course incurred a responsibility the criminality of which cannot be exaggerated, as had the pier collapsed when a train was on the bridge there might have been handreds of passengers killed, or drowned.

—Prof. Robertson, Agricultural and Dairy Commissioner is engaged in the promoting exportation of Canadian butter in tins. The English market appears to be glutted, but there is a splendid market for Canadian butter in the East. The butter requires to be wrapped in wax paper and placed in hermetically sealed tins, and in this way will keep good in any climate. Prof. Robertson has had a number of tins made in Montreal and finds they are quite equal to those made in France. A shipment of butter in tins has already been made from the dairy station at Calgary to the Yukon district. Later on consignments will be forwarded to China and Japan. Prof. Robertson is displaying an energy in this matter which guarantees that Canadian creamery men will be provided with good markets.

#### ANOTHER GOLD MAKING SWINDLE.

Boston, the cultured, was recently the scene of a gold making swindle on a large scale. The scheme was worked by an ordained clergyman who organized a company to carry on the enterprise of extracting gold from the sad sea waves. He was highly successful, but the gold came out of the shareholders' pockets, not out the realm of Neptune, who, we understand, was not asked for a permit to work his alleged aqueous gold mine. Having secured his pile, the schemer decamped and his victims were left lamenting.

With the jealousy so characteristic of American cities, Chicago determined not to be outdone by Boston; it would have its local gold making factory, a Klondike in its own borders, where gold would be turned out by machinery as easily as sausages. The enterprise took shape in the National Metallurgical Company the business of which was to be the transmutation of crude antimony into pure gold. Now this metal produces gold no doubt, but only after such manipulation as converts it into tartar emetic, which druggists are believed to buy by the barrel for so much, and to sell by the ounce at the same price-clearly therefore it is a producer of gold. But, that is not the only ground for antimony being regarded as a source of gold, for in the chemical process of making a well known medicine from this metal, there is a sediment left known as "golden sulphide of antimony," but the "golden" feature merely indicates its colour, which makes it useful in preparing yellow paint. It is however known to contain traces of silver, lead and copper, so that probably the promoter of the Chicago Metallurgical Company might have supposed that if antimony contained silver, it was 16 to 1 that it also contained gold, especially as one of its by-products was "golden." Such a conclusion was fully as reasonable as the "crucified on a cross of gold" theory which swept a Chicago Conference off its feet two years ago like a cyclone, and by the very same power-the force of wind.

That any man could believe in gold being manufactured like whisky by distillation would be incredible did we not know that a presidential candidate had persuaded millions of Americans that a piece of silver worth 35 cents was convertible by legislation into equal value to a dollar's worth of gold. A Mr. E. C. Brice having noticed the widespread credulity prevailing saw the opening it gave for a grand swindle. He collected \$75,000 to erect gold-making furnaces, and the stock of his company, which was issued at \$10 per share, went up to \$400 per share. This beats the South Sea Company bubble, the £100 shares of which only went up to £1000, or ten times the par value, whereas some Chicago speculators paid forty times the par value of the gold-factory shares. The scheme recalls the alleged feats of that prince of charletans, Cagliostro, who gulled Europe, a century ago, by pretending to exercise miraculous powers. He, however, was rather a medical and fortune-telling quack than an alchymist, his chief source of popularity and of wealth being the vending of a magical water by the use of which beauty was secured by the most comely of women, who paid fabulous sums for the chance of transformation.

The ancients, having very crude ideas about chemistry and metallurgy, quite naturally imagined that by mixing certain metals they could produce gold, as they found that combinations of metals in a furnace resulted in one quite different to any of those of which it was composed. As the possible combinations of metals and other materials were infinite, there was an endless scope for experiments made to obtain gold by alchemy, or by metallurgical processes, conducted without any scientific knowledge of either chemical analysis or synthesis. These rude and crude efforts, though they failed to produce gold directly, were successful in creating it indirectly, as the alchemists' experiments led to the discovery of various very valuable chemicals. In the same way the Chicago gold-factory operators, and the Boston schemers, though they have failed to produce gold, except for their private use, have given those whom they deluded a very valuable product that is often worth a mint of money, and which is called "experience." If the subscribers to the National Metallurgical Company, Chicago, had possessed a few grains of that kind of metal they would have been \$75,000 in pocket, but having none of it, the promoter used his experience to transmute their simplicity into \$75,000 worth of hard cash, which process is a form of alchemy that the progress of chemical science has failed to stop.

The Inter-Ocean gives a long narrative of the inception and development of this swindle which went on until \$400 was given for a \$10 share. Then came the flight of the schemer and with it the flight also of the hopes of his victims. Our Chicago comtemporary winds up its report by remarking sarcastically in regard to the despair of those who were gulled: "Fainthearted men are always to be found in every new undertaking, men who are not satisfied unless a stream of gold is tapped for their special benefit, and their weakness of heart increases when the chief wizard hies himself to parts unknown and leaves a valuable plant, cold, dark, and unproductive." Probably the schemer has gone to fresh fields and pastures new, where he will find another gold mine in such ignorant credulity as leads men to believe in silver theories and metallurgical miracles.

## THE DANGER OF MINING VENTURES TO BUSINESS MEN.

Our last issue contained a notice of the failure of a large lumber firm which owes its collapse to operations wholly apart from those of its ordinary business. Not content with the anxieties of lumbering, partners took upon themselves the extra and the extraneous ones arising from mining speculations in connection with a gold mining company with which they became closely identified. This company's prospectus gives the usual glowing description of the outlook of the enterprise. All mining companies are boomed by statements of this class, the calculations of anticipated profits being all made on the same model. In the case of this company the capital was to be \$100,000, and the net profits were expected to be \$100 per day, or about 33 per cent yearly on the whole capital. To catch subscribers to the stock a specimen of the quartz was on exhibit, which we always regard with suspicion as it is impossible for even an expert to judge what the yield and the cost of working a mine will be from a lump of quartz taken from it, and there is nothing to prevent such a specimen being shown which was taken from another locality, as we have known done. Anyway the gold mine enterprise turned out to be a wild-cat scheme, and the lum-

bermen who had been drawn into it have paid a heavy penalty for their indiscretion in devoting time and money to a speculative venture that has led them into insolvency which, by being given to their legitimate business, would have sustained their reputation in the business world.

#### A LICENSED VICTUALLER'S TROUBLE.

A curious case has arisen out of the sale in the city of a liquor which is sold as a non-intoxicant. Of course for the retailing of such an article no victualler's license is required. A complaint, however, was made to to the authorities by the Licensed Victualler's Association that this alleged non-alcoholic beverage was being sold under false pretences. It was affirmed that the liquor was a light class of beer of the lager class, which though a non-intoxicant in the ordinary sense was really a beverage which contained alcohol, and therefore only vendable by those having a lienese. Acting on this complaint seizures of this liquor were made all over the city on so large a scale as to require a disused church for the storage of the casks and bottles. When the case was heard at the Police Court, there being several dozen defendants, it was alleged that this liquor when seized contained no spirit, but, that it had fermented while in the hands of the police, and an innocent beverage, fit indeed for prohibitionists, had been converted, while stored into one at which their souls would revolt, and the stomachs of beer drinkers rise in indignation at such imposture. What could the authorities do? The tables were turned upon them They stood accused of having been the prime agents in the production of an alcoholic beverage out of a temperance drink. The prosecution was stopped, and the Licensed Victuallers were robbed of their lawful prey.

A deputation representing the Licensed Victuallers' Association waited on Mr. A. Brosnan, controller of Provincial Revenue, on the 6th inst., to protest against what they considered the injustice the trade suffered at the hands of the Provincial authorities. The deputation used strong language condemnatory of the action of the Marchand Government in suspending the prosecution of vendors of the beverage known as "temperance beer." It was mainly through the efforts of the Association that the Revenue police took action, and they were incensed that the Government should interfere when convictions had been secured in the Police Court. Mr. Brosnan was finally notified that any interference in future with the course of the law would be vigorously opposed.

We have news items of supreme moment this week, we have been making history wholesale, but such items have had to pale their ineffectual fires before such a tremendously important issue as is involved in this dispute. In the old country a similar question has arisen. An English contemporary commenting on the sale of beverages alleged to be non-alcoholic, writes:—

"The spread of tea-houses in London is a notable feature of the day, and they supply a distinct public want; but when they develop, as they all do, into cheap restaurants, they supply their customers with the strangest, not to say most filthy, substitutes for light beer in the shape of so-called temperance beverages. These mysterious concoctions are not extremely

popular, but it is wonderful how any full-grown, responsible, intelligent people of either sex, particularly men, can prefer such sickly rubbish to plain milk or water. It is also wonderful how the same people, mostly responsible citizens, and taxpayers, can sit down patiently under a licensing system which is only fit for babes and sucklings. The liberty, on the hand, to sell light beer and on the other hand to call for it, pay for it, and drink it, ought to be at once demanded at all these places in a voice that no weakkneed sympathetic Government could afford to treat with contempt. People who can be trusted to pay rates and taxes ought to be equally trusted with drink as an adjunct of food. Frenchmen, Germans, Russians, and Italians and such supposed inferior people, are trusted. And so say all of us."

[ABut, as the vote on the 29th may stop the consumption of all beverages which are not agreeable to many persons, it is probably hardly worth while worrying over the above question. If however temperance drinks can be got which will develop alcohol when stored, as is alleged to be the case, the prohibitionists will be confronted with a difficulty they have not provided for.

#### TRADE WITH THE WEST INDIES.

Our neighbors are busying themselves over the value of their acquisitions, resulting from the late war. Of one thing they leave little doubt, and that is the payment of the enormous cost. The stamp system seldom or never yielded such returns, and every employe is as industrious in affixing the little label, whether worth one cent or even half-a-cent, on tickets, cheques and other forms as though he or she received extra wage for the trouble involved, often very considerable. It is estimated that the imports into Cuba and Porto Rico have averaged \$60,000,000 a year during the last decade. Of this about one-half was from Spain, about onethird from the United States and the remainder from England, Germany, France and other nations. This average of \$60,000,000 is probably considerably below the normal consuming capacity of the islands, the imports of the past two or three years having been greatly reduced because of the war. The large percentage of the imports of Cuba and Porto Rico which Spain was able to retain for her own people was due both to Spanish influence among the merchants and importers, and to the discriminating tariff in favor of goods coming from that country.

The following tables show the chief articles exported to Cuba and Porto Rico in 1895 and 1896 from Spain, the value being given in Spanish posetas, the value of the peseta being about 20 cents:

| CUBA,                       |            |            |
|-----------------------------|------------|------------|
| Articles.                   | 1895.      | 1896.      |
| Bricks, tilings, etc        | 1,307,321  | 141.854    |
| Earthenware                 | 768,835    | 389,266    |
| Iron bars                   | 909.742    | 883,595    |
| Pirearms                    | 4,014,090  | 9,301,200  |
| Oils and paints             | 782,765    | 587,710    |
| Soap                        | 3,367,380  | 3,170,846  |
| Wax and stearine            | 1,739,402  | 9.361.200  |
| Plax and homp, mfrs. of     | 5,582,909  | 3,700,087  |
| Silk goods                  | 533,140    | 371,030    |
| Smoking paper               | 1,406,222  | 1,885,231  |
| Packing paper               | 1,407,632  | 1,420,235  |
| Wood, mfrs. of              | 2,477,337  | 2,257,840  |

The figures may be of interest to some of those seeking export markets.

#### THE C.P.R. DIFFERENTIAL QUESTION.

The Inter-State Commerce Commission after long consideration has declined to recognise the claim made by the C.P.R. for a "differential" in its through passenger rates. This term is used to indicate a mutual arrangement amongst railways that work under uniform rates, under which agreement some one, or more, as the case may be, are allowed to charge lower rates than the others are bound to observe. This concession, is granted as a special privilege to companies whose roads are so conditioned as to be handicapped in the race of competition. Three lines for instance may run between two points with variations in their course and equipments which give exceptional attractions to one or two of them. The third is thus unable to secure a fair share of the through traffic, as it is not equally matched with its competitors. If the advantages enjoyed by the two lines were sufficient to stop all chance of the third one competing at all, they-would not be concerned about their rivals being wholly shut out of the traffic. But when the handicapped railway hows that it can secure through business, in spite of its disadvantages, by cutting rates, the other two lines are apt to suffer by this rivalry, as low fares will always draw traffic. Such being the position the railways have either to abandon the uniform rate system, and so open their business to unrestricted competition, or those lines which are handicapped by their extra length, or poorer equipment, have to be granted some privilege in their rates, which is styled a differ-

As absolute uniformity is impracticable, and open competition is undesirable, a limit is fixed beyond which rate-cutting must not go. The principle on which this arrangement is based is analogous to that observed in races and games in which allowances of distance, or time, or points are made to put all contestants, as far as practicable, on an equality. The C.P.R. contended that it was entitled to what we may call differential treatment because it was not equally placed in regard to passenger traffic between eastern points and the Pacific coast, with some of its American rivals. The Inter-State Commerce Commission, having investigated this claim, has decided against it being recognized. From the terms of its judgment, we infer, that the Commissioners suspect the C.P.R. of having depreciated its service in order to secure the differential desired. The Commission thinks it might make better time than it has done, but by doing this, by giving the travelling public better service, its claim for any concession would be nullified. Indeed it is reported in railway circles that some of the other roads are proposing to lower the quality of their passenger service in order to establish a claim for differentials. The Inter-State Commission "has no power to allow or disallow the differential in dispute," but a hope is expressed that its verdict will lead to an early settlement of the rate-war. A strong hint is thrown out that unless the railways settle their disputes at an early date there will be steps taken to restrain the existing conflict. Since writing above there is reported to have been an arrangement arrived for adjusting those differences which caused the rate-war, which is likely soon to cease.

#### RAILWAY ACCIDENTS ON AMERICAN RAILWAYS.

The total number of casualities to persons on account of railway accidents for the year ending June 30, 1897, was 43,168 as reported by the Inter-State Commerce Commission. Of these casualities 6,437 resulted in death, and 36,731 in injuries of varying character. Of railway employees, 1,693 were killed and 27,667 were injured during the year. According to the three general classes these casualties were divided as follow: Train men, 976 killed, 13,795 injured; switchmen, flagmen, and watchmen 201 killed, 2,423 injured; other employees, 516 killed, 11,449 injured. The casualties to employees resulting from coupling and uncoupling cars were, killed, 214; injured, 6,283. The corresponding figures for the year ending June 30, 1896, were 229 killed and 8,457 injured. The casualties from coupling and uncoupling cars were assigned as follow: Train men, killed, 147; injured, 4,698; switchmen, flagmen, and watchmen, killed, 58; injured, 1,325; other employees killed, 9; injured, 260. The casualties resulting from falling from trains and engines were as follow: Train men, killed, 325; injured, 2,726; switchmen, flagmen, and watchmen, killed, 32; injured, 357; other employees, killed, 51; injured 544.

The casualties to the three general classes of employees mentioned caused by collisions and derailments were as follow: Train men, killed, 250; injured, 1,327; switchmen. flagmen, and watchmen, killed, 11; injured, 74; other employees, killed, 42; injured, 251. The total number of passengers killed during the year under review was 222, injured 2,795. Ninety-three passengers were killed and 1,011 injured in consequence of collisions and derailments. Other than employees and passengers the total number of persons killed was 4,522; injured, 6,269. Included in these figures are easualties to persons classed as trespassers, of whom 3,919 were killed and 4,732 were injured. From summaries showing the ratio of casualties, it appears that 1 out of every 486 employees was killed and 1 out of every 30 employees was injured during the year. With respect to trainmen, including enginemen, firemen, conductors, and other trainmen, it appears that one was killed for every 165 employed, and 1 injured for every 12 employed. One passenger was killed for every 2,204,708 carried, and one injured for every 175,115 carried. Basing ratios upon the number of miles travelled, it appears that 55,211,440 passenger-miles were accomplished for each passenger killed, and 4,385,309 passenger-miles for each passenger injured.

#### A TEACHER CORRECTED.

A Toronto contemporary gives us almost daily, "A Lesson in Economics." These lessons show familiarity with Free Trade literature but a total lack of such knowledge as is derived from the observation of facts. The teacher of these lessons lives in an atmosphere of theories. He turns them round and round like a squirrel in a revolving cage without ever touching the firm ground of experience. A recent lesson tells us: "The prospect of an output of cheap goods from China has given English protectionists an opportunity to advance the old but discarded claim based on the belief that imports can deprive people of work." The phrase "old but discarded claim" is excellent fooling, for upon this very claim is based the present tariff of Canada which was adopted to prevent imports depriving people of work, and which tariff the teacher of these lessons supports. He seems indeed to be leading a Jekyl and Hyde life, as in one column he teaches the rankest, most uncompromising Free Trade phan-

tasies, and in other columns he gives as uncompromising a support to a protective tariff. Can imports deprive people of work is a question as sensible as asking can a quart of liquor go into a pint pot? If the people of a country are engaged in the work of making certain goods, and by a fiscal change these goods are imported to be sold at prices which stop the demand for the native goods, then those who are engaged in making them must be deprived of work by such imports. Such a result is not the result of, a theory but of irresistible circumstances, and we regard circumstances, conditions, palpable facts as incomparably a better school in which to learn lessons in economics than the one kept by a pedagogue who dreams the happy hours away in a secluded world wherein facts are not factors, nor actualties of any moment.

#### SALE OF BOISBRIANT.

Mr. E. S. Clouston, general manager of the Bank of Montreal, has purchased the property at St. Anne's (Bout de l'Isle) known as "Boisbriant," from the estate of the late Sir John Abbott. The ornamental grounds, consisting of about 15 acres on the margin of the Lake of Two Mountains, are of ideal beauty, and, with the villa, may challenge comparison with some of the choicest country seats in Great Britain. His many friends will wish Mr. Clouston length of years to enjoy occasional relaxation at his exquisite summer residence.

#### HIGH CHIMNEYS.

At Denver, Col., is a brick chimney which is exceeded by but four in the world in height or size. This is the stack of the Omaha and Grant Smelter, which serves to carry away the poisonous fumes and gases generated in the process of smelting the precious ores at this extensive plant. The works here cover nearly fifty acres of ground, and before the panic of 1893 about 550 men were regularly employed. At present about 350 men are employed. After stacks of the ordinary size had been used for many years it was decided that it would be better to erect one stack of great height, having sufficient size and draft to answer for all needs. The present chimney has the following main dimensions: Height above the stone table at ground, 352 feet 7 inches; size at base, 33 feet square; size at throat, 20 feet in diameter; thickness of outer shell at base, 481/2 inches; at top, 18 inches; thickness of core at base, 26 inches; at top, 9 inches; diameter of flue, 16 feet; foundation, 56 feet square by 16 feet deep. In building, the ground was first excavated to the depth deemed sufficient, when about two feet of water stood in the bottom. The material in the bottom was coarse sand. Then eight feet of cement concrete was put in, in which was placed a grillage of steel rails laid nearly together and crossings at right angles. These beams were used only in the masonry under and outside of the rings of masonry supporting the shell and core of the chimney: On top of the concrete was laid eight feet of brick work, stepped in about one inch at each course. On this was laid a stone footing two feet thick, reaching above the ground level, and on this was built the chimney.

The four chimneys which exceed the Omaha and Grant chimney in height, according to Kent's "Pocketbook for Mechanical Engineers," are at Hutte, Saxony, 460 feet; two at Glasgow Scotland, 454 and 485 feet, and Bolton, England 367½ feet. The highest chimney in Canada was that erected by the Montreal Street Railway Co. in 1806. It is 255 feet high, 30 feet diameter at base, with flue of 12 feet in diameter.

#### REVOLVING TOWER.

The tower projected for the Paris Exposition of 1900 is hectagonal and 350 feet high divided into 25 storeys. It will be covered on the outside with rich ornaments of nickel plate, aluminium, glazed tiles and glass in curious designs. It will be illuminated with 2,000 are lights and 20,000 incandescent lamps in most varied colors, and so applied that the architectural lines will be plainly visible at night. Near the top there will be chimes comprising 64 tuned bells, and a powerful organ worked

by compressed air. The tower is to be crowned with a weather-cock 15 feet high, and covered with about 1200 incandescent electric lamps. The entire building will revolve by means of hydraulic apparatus in such a manner that it will take one hour to rotate once around its axis. Thus the visitors of the tower can enjoy from one point a changing panorama of the Exposition and of the city of Paris and its surroundings.

#### DRY GOODS NOTES.

The tendency to employ piece silks in millinery this fall is creating dullness in the importation of novelty ribbons.

The demand for plaids in dress silks in American centres is reported very promising for a large consumption of this material for the fall wear.

Buyers continue to complain of the lack of novelties in imported silks says the N. Y. "Journal of Commerce." What are

claimed to be new styles are only a revival of the old styles in vogue a few seasons back. What may be classed as strictly novel are few and far between.

Cable advices report Dundee and Calcutta markets rather dearer for jute and burlaps,

... In the new spring styles in cotton dress goods woven fabrics will be given a precedence over printed styles and a large demand for both white goods and goods of the gingham order is predicted. Pique and welts will again prove strong, with woven zephyr styles expected to show good results.

A Plauen correspondent writes that the change in fashion as regards laces, which has been impending for some time and which was made quite apparent at the Grand Prix in Paris, has now clearly declared itself in favour of Schiffli laces. Net top lace and net top Schiffli lace are at present neglected, with the exception of the point de gaze, which the Americans do not reckon among the net top. But the pure Schiffli lace has come to the front. This applies to Irish laces with large open effects, and also to all other kinds of Schiffli fabrics.

A ribbon importer who is in touch with the foreign markets reports that prices abroad are tending upward.

Among the recent introductions in New York in braid garnitures is the new besa cord, which is of a high satin finish, giving a bright lustre to the design that materially enhances its richness. This cord is employed in a number of the new season's novelties, both in revere and military effects.

Combinations of steel and turquoise ornaments are the leading fall style features at present being imported from Saxony and Bohemia, where most of this class of goods come from.

PERSONAL—T. R. Billet, accountant of the Bank of Commerce Winnipeg, has been appointed manager of the new branch at Fornie, B.C.

#### GRAND TRUNK RAILWAY SYSTEM.

Earnings 22nd to 31st Aug. :

There is a considerably stronger feeling in the market for California prunes. Recently sales of Santa Clara fruit were made for early forward shipment at 3½ to 3½c f.o.b., but today 3½c f.o.b. seemed to be the inside price for shipment, and holders appeared to be indifferent sellers at that figure. It is too early yet to obtain any definite information as to the size of the crop. It was expected early in the season that, in view of the favorable conditions then existing, and the large increase in the acreage coming into bearing, that the output of 1898 would be one of the largest on record, but in the interim the unusually

dry weather has caused a heavy drop, and from all reports the crop promises to be even less than that of last year, with a small percentage of large sizes.

-Cable advices give the following estimates of the stocks of lard held in Europe and afloat on the 1st inst.:

—The Richelieu & Ontario Navigation Co. have placed a contract with J. R. Weir, Nazareth street, Montreal, for new boilers for the steamer "Quebec." The Company will soon ask for tenders for a sister ship to the "Toronto," (just finished) to cost \$250,000. Also will increase size of hotel at Tadousac by 110 rooms, and enlarging existing ones. The directors have agreed again to co-operate with Mr. Geo. Warren in erecting a large summer hotel at Murray Bay. The hotel will contain 58 rooms, and will be ready for next season.

—United States tea importers are vigorously protesting against a recent ruling made by the Treasury Department regarding toa samples imported in tin. These samples are held to be dutiable and not only this, but they must also pass the examiner. We might have something to pick at in the Canadian tea regulations as they are, but we have not to contend with an absurdity of this sort.

—A PHILADELPHIA physician asserts that in 85 per cent of the patients he had treated for nervous ailments he could trace the origin of the trouble to the use of foods treated with some preservative preparation having salicylic acid for its base. Canadian grocery stores are not destitute of this acid in the shape of many bottled goods on their shelves.

—A. T. Sussex, general store, Bothwell, Ont. has assigned to T. B. Escott, wholesale grocer, London. Liabilities are said to be in the neighborhood of \$5,000, and the estate will show a surplus of about \$300. The reason assigned for the failure is the degeneration in late years of Bothwell as a business place—Sussex has been plodding along for a number of years, but the Rip Van Winkle atmosphere of the oil district proved an insuperable difficulty to remaining solvent.

—Mr. George Johnson, Dominion statistician reports that on January 1st last, there were 35 electric railways in operation in Canada, with a total mileage of 583. The number of passengers carried in the year was 80 800,000, as compared with 16,170,000 by the steam rallways on their mileage of 13,000. The paid-up capital of the electric railways in Canada is \$18,700,000.

—A. LORDLY & Co., spice mfrs., St. John, N.B., have suspended payment. At a meeting of creditors held the other day the firm showed liabilities of \$2,600, and assets about \$1,500. The co-partnership was formed in 1895, prior to which the business was carried on alone by A. Lordly, who was originally in the furniture trade, and failed in '71, compromising at 25c in the dollar.

—The Richelieu & Ont. Co. proposes to erect a large hotel at Tadousac especially equipped for summer visitors. As we recently pointed out an attractive hotel draws traffic, and this will no doubt bring a large accession of tourists to the Saguenay. The company will build another steamer to run between Kingston and Toronto next season, when a daily service will be established.

—Samuel Siggins, carriage mfr., Woodstock, is reported to be in financial difficulties. He commenced this business at Woodstock in 1888, and during the decade built up a large business. The rumor, it is desirable to say, lacks full confirmation, and it may be disclosed that affairs are not so bad as to involve assignment.

—The British troops under General Kitchener, achieved a spiendid victory over the Dervises at Kartoum on the 5th inst. The enemy lost from 15 to 20 thousand men, and the British only a few hundred. This victory breaks up the power which obstructed the settlement of Egypt and northeast Africa, and will open a vast district to trade.

—The Imperial government has accepted the offer of the Elder Dempster Co. to carry the mails from Bristol to Canada without charge. It is reported that their offer to carry mails free from Canada to Bristol has been declined by the Canadian government.

—A. J. Grey, men's furnishings, Woodstock, N.B., has suspended payment. He shows liabilities of about \$2,000 and assets \$1,600. Grey is quite a young man, or rather a youth, having scarcely attained his majority. The business was started early in last year.

—P. LANGLOIS & Co., retail shoes, Quebec, in a small way is in financial difficulties. P. Langlois who is the only partner commenced business on his own account in November '96, previously to which he was of the firm Veilleux & Langlois. Liabilities are small.

—WRIGHT & COWPER—Archibald Wright and Hugh B. Cowper—bicycle dealers, St. Catherine street, Montreal, have assigned owing \$2,800. Lack of capital is held to be the chief reason, as their store was well situated for the business and both principals were active and energetic.

—W. T. WILLIAMS, grocer, Sandon, B.C., is financially embarrassed—D. H. McEwan, general store, Morrel, P.E.I., is of foring compromise 75c cash—Hector Lescadres, grocer and milliner, Grand More, Que., has assigned—A winding up order has been granted in the matter of the Kentville Lumber Co., Kentville, N.S.

—A. Lemieux, jobbing confectioner, Quebec, has assigned. He started in the summer of '96 previous to which he was employed with his father P. T. Lemieux in the bookbinding business. (Note—T. Lemiex, bookbinder, is reported assigned).

-Mrs. Wilfrid Ouellette, shoes, Montreal, who assigned recently to Bilodeau & Renaud, since offered to compromise at 25c in the dollar, but creditors refused to accept, holding that the composition was not enough.

—G. T. ALLARD, general store, Rimouski, Que., who assigned for the benefit of his creditors a month or so ago, has now offered to compromise at 70c in the dollar, half cash, and balance 60 days.

—Li-Hung-Chang the leading diplomatist of China has been dismissed from office under pressure from Great Britain owing to his intrigues against British interests in favour of Russia.

—MR. B. B. STEVENSON, for the past year manager of the Quebec Bank at Pembroke, has been appointed assistant to Mr. H. V. Noel, the manager of the same institution at Ottawa.

—The Bank of Ottawa anticipates having its office and other arrangements all complete and ready for opening its branch in this city on 1st prox.

—J. E. TREPANIER, dry goods, Quebec, whose failure has already been reported will hold a meeting of creditors on the 16th inst. The statement shows liabilities of \$32,000.

-Reports from growing sections indicate a fair crop of cranberries particularly from Cape Cod and New Jersey, but there is still room for considerable damage by scald, insects or frost, and the extent of the crop cannot be estimated at so early a date. Receivers are looking for good prices and a good trade a little later on, especially owing to the light apple crop.

#### LEGAL RECORD, &c.

Week ended Sept. 9, 1898.

The following is a record of transactions and cases in our Canadian courts of law, comprising Writs Issued and Judgments Rendered for sums of \$300 and upwards, (Montreal, from \$175, and upwards), and Chattel Mortgages and Bills of Sale for sums of \$550 and upwards), as taken from the public records. It will be understood that the actions or items do not necessarily affect the credit and soundness of the persons or concerns named, as they may have been paid or otherwise settled, and that good defences may exist in cases of writs. &c.

#### TRADE OPPORTUNITIES.

There are two million acres of pine forest on the island of Anticosti and it is likely Menier will establish two pulp factories.

Forest, Ont. will soon have an evaporating factory. Mahler Bros, are making preparations to start up one.

Strathroy citizens wants waterworks, and are petitioning that town's council to put in the same.

It is said that the contract for building the new Baptist church at Windsor, N.S. has been given to Joseph Taylor & Co. of that place. The building is to be of wood.

A co-operative store is among the near possibilities in the capital city under the auspices of the Workers Industrial League.

Mr. English, London, Ont. is building a residence in that city. Thos. Janes, grocer, South London, has purchased a property there, and next year will build a grocery store upon it.

At a recent drawing of the Victoria, B.C. Building Society, appropriations were won by Capt. William Meyer, and Sergt. John Hawton of that city.

Mr. Nash of Aylmer, Que. is building three houses in that town.

A scheme is under discussion in Ottawa for the building of an electric railway to the new rifle ranges. The road will be outside the corporation limits and by connecting with the Ottawa street railway at Rockliffe and at the head of Rideau street a complete belt line will be formed.

The following building permits were issued last week in Ottawa: Mrs. M. A. Turner, brick addition to two houses, \$1,000—A. E. York, two frame dwellings, \$2,000—Dr. Cousens, alterations to house, \$1,200—A. Sparks, double tenement brick veneered house, \$800.—F. C. Clemow, solid brick dwelling, \$5,000—E. Erikson, frame dwelling, \$600—John D. Barber, double tenement brick veneered house, \$1,500.

The new hotel proposed for McKenzie avenue, Ottawa, is not likely to be built this year. Mr. Jos. Boyden is endeavoring to finance the scheme, and form a stock company to take over the hotel. The matter will probably rest in abeyance until next year.

Plans have been prepared for a dynamite factory to be built near Billings Bridge. The factory when completed will not cost more than \$2,000, as all that it will include will be a nitroglycerine machine, an engine and boilers, and the soda mill:

City Engineer Barrow of Hamilton, says the Toronto Globe correspondent, is becoming tired of waiting for W. E. Gower of Montreal to sign the contract for the building of an incinerator for the city. Mr. Gower's tender, \$4,000, was accepted several months age.

Some Quebec parties have a crew of men at work gathering sea-weed at Richibucto from the flats at low water. It is cut down with scythes and placed in scows and taken to shore and spread out. After it is dried it will be pressed and shipped to the United States to be used in the upholstering business.

Tenders will soon be called for the heating of the St. Johns, N.B. almshouse by steam or hot water.

The N. B. Telephone Company have begun the extension of their metallic circuit from Moncton to Amherst. When this link is completed the company will have a copper wire extending from Fredericton to Halifax.

A vast undertaking is on the tapis at Rossland, B.C. It is projected to build a tunnel from the Columbia river to tap Red Mountain. Those interested are J. B. McArthur, Chas. R. Hosmer, H. S. Holt of Montreal. The undertaking contemplates the construction of a tunnel some five miles long, starting from the Columbia river to a point above Trail, and ending underneath the California mineral claim, west of the town. The tunnel would re adapted not only to drain the mines of the camp, but it would also ventilate them. furnish them with light and power and afford an economical means of extracting their ore. It is one of the most gigantic undertakings in the west and in size would be even longer than the famous Sutro tunnel in Nevada. Owing to the hardness of the rock in this district, the cost of the enterprise would be even greater proportionately, than that of the tunnel on the Comstock. As yet no details for the construction of the tunnel have been elaborated, but it is expected that it will cost between \$2,000,000 and \$4,000,000. Even on this enormous outlay, however, the promoters, so the "Rossland Miner" says, feel that a good investment would be made possible by the royalty which the mine owners would be glad to pay for the economical extraction of their ore by means of the tunnel.

The Dill & Hill Co., general merchants of Wolseley, Assa., are building a store at Chickney. Assa., where they will open a branch.

It is reported that J. C. Robinson, Wawanesa, Man., will open a branch general store at Treesbank.

The Northern Elevator Co., Somerset, Man., have material on the ground for the erection of a 2,000 bushel elevator.

Elevator buildings to be erected in the North-West comprise the following this week:—R. C. Ennis, of Neepawa, is building an elevator at Arden—Mr. Waddell will establish a flour mill at Dominion City, Man.—The Dominion Elevator Co. will erect an elevator at Greenway, Man.—Brady, Love & Tryon, grain dealers, Winnipeg, are erecting an elevator at Myrtle.

Tenders will be received to Sept. 10 for the erection of a school house near Cypress River, Man.

The Winnipeg City Council is calling for more tenders for street pavements and boulevarding.

#### FIRE RECORD.

The details of the losses in the Bertram Ship Yards fire at Toronto show the loss to have been \$59.700, covered by insurance, divided among the following companies:—Lloyd's Underwriters, United Dutch Underwriters, Royal Exchange, Canton Triton, Thames and Mersey Marine Insurance Company, Insurance Company of North America, New York Fire Insurance Company, Erie Fire Insurance Company, London, Liverpool & Globe, Scottlah Union, Norwich Union, Atlas, Perthutual and the Gore District. The loss is confined to the buildings, machinery and material in the yards, the various vessels under construction escaping completely.

The C.P.R. stock yards at Hochelaga (Montreal) were gutted by fire this week. Loss \$4,000.

#### Tinancial.

Thursday E'vg. September 8th, 1898.

Peace seems to be the note of the day. The Spanish war is over, the war cloud in China has disappeared; the Czar-wants everybody to be good friends; now the railway rate war is declared to be practically at an end. The latter change has resulted from the decision of the Interstate Commerce Commission referred to in another column of this issue. The effect on the stock of the C. P. R. was a sudden rise by several points, and heavy transactions at the advance. This stock has jumped this week from 87 to 901/4 mainly owing to the anticipations of earnings largely increasing now the rate war is over and the freight from the North West is on the eve of becoming heavy. Some believe that C. P. R. will reach par this year. Toronto Street has kept on advancing from the cause we alluded to last week, the large

receipts from exhibition visitors. The quotations have reached 103½, with a tendency still upward. Richelleu has been sold at 104; Bank of Commerce at 140; Molsons Bank 202; Montreal Street 280. In New York a bear movement has been a success, and heavy sales have been made under its pressure. American lines having a through western business have been improved by the expectation of a settlement of the rate-war. There being now a certainty of heavy wheat and other crops, there is an assurance of money being plentiful for all purposes of business and investment.

The U.S. Treasury having issued bonds for doub le the amount needed for the war and the war taxes yielding an enormou revenue, it is piling up what promises to the largest balance held for manyo years. This surplus will be used probably to cancel outstanding legal tenders, and assures there being no new bonds issued for a length of time. The local money market remains as last week.

## D. M. LONG, Carpenter and Builder,

104 Cathedral Street, MONTREAL.

Estimates given for Buildings of Every Description, including Dwellings, Stores, and Hotel and Barroom Fixtures.

#### MONTREAL WHOLESALE MARKETS.

Montreal, September 8th, 1898.

The condition of trade at Montreal has undergone little change in the week under review, but as an aid to the distribution of fall supplies, the emptying of the summer resorts is a factor becoming perceptible. In dry goods circles the feature of the week is furnished by an arrangement between certain Canadian Cotton Co's to bind themselves not to sell gray cotton in the Dominion but to export it out of the country, the effect of which will be a monoply of the colored cotton trade of Canada. Groceries are getting brisker sympathetically with heaviest buying season, but in this connection fall trade is only a shadow of its former self in other years. Coreals are slow, and inclined to easiness. Butter and cheese, eggs, feed and smoked meats are firmer. For paint and subsidiary lines the movement is fair, but without special prominence. Turpentine has advanced 2c at 47c Hides and leather unchanged.

BUTTER AND CHEESE.—August creamery butter is bringing 18c in quite a few instances, but the general quotation ranges around 17%c. Tub butter is also firmer at 17%c to 17%c. Dairy butter is quoted at 13%c to 14c. Business in a local way is healthy on the whole, but for sea shipment, prices block free sales. The cheese market discloses little change in the situation from a week ago. It is noted however that for white cheese there is a growing disposition to purchase this more freely than formerly, in fact the British demand is strikingly strong for this grade, and it is very certain colored goods are loosing their attraction there. Prejudice nevertheless is hard to break down, and it will be a slow revolution, if a certain one, to convice buyers that colored cheese is not the "fuller" or richer because of its golden

Western colored is quoted between 81% to 81%c, with some favored foctories bringing 1/2 to 1/2 per lb more when a particular purchaser is concerned. White cheese rules from 8c to 81%c.

CEMENT. -Arrivals this week were 4,900 barrels German; 1,785 brls, Belgian; and 565 brls. English, with 33,000 fire bricks. The demand is of the same character as when last writing, and values are unchanged.

DRUGS AND CHEMICALS. - A hand-tomouth policy seems still to be the popular temperament in the drug line. Latest foreign advices as to opium report markets quiet and without important change in price. Investments in Quinine are styled "extremely modest," by manufacturers, and the same "dropping out of sight" is characteristic of the consumption on spot. The N. Y. Journal of Commerce notes an advance in the following in that centre:—Salol Antifebrin, Hemo Galol, Hemol Ich-Saioi Antitebrin, Heino Gaioi, Reinoi kerthalbian, Ichthyol, Iodole, Pyoklannin and Tannanlin. Since the expiration of the patent on antipyrine, the latter part of July, there has been considerable competition in the article, and the price has declined in New York from \$1.40 per ounce to 19 cents. The chemical market is quiet. Saltpetre is somewhat unsettled and irregular in primary markets with weakish undertone. other chemicals and acids show nothing new. Manchester circular advices reviewing the English chemical market for August say. "The month was dail, but a better tone is noted at the close. Bleaching powder is steady on spot, but a little easier forward; some buyers consider the present opportunity favourable for contracting forward; some buyers consider the present opportunity favourable for contracting and are covering their requirements over next year. Caustic soda continues quiet, and values are practically unchanged. Ammonia alkali is quite firm, and Bicarbonate of soda crystals are steady. Chlorate of potash has been advanced by arrangement amongst home and Continental manufacturers, and is firm. The exports of alkali continue to decline, the ports of alkali continue to decline, the returns for the seven months ended July 30th last showing a decrease of 35,823 tons of £189,722 as compared with those for the corresponding period of 1897; bleaching materials show an increase of 1,775 tons in weight, but a decline of £14,044 in value."

FEED .- Values placed upon bran at first hands are too high for any extensive trad ing to occur, but in a secondary way a good movement is in progress. We quote Ontario winter wheat bran \$11.50 and Ontario winter wheat bran \$11.50 and shorts \$14.50 to \$15 per ton in bulk. Maritoba bran \$11 to 11.50 shorts \$15. Stocks are in comparitively small compass. Hay is similarly in reduced supply, but this is only an ephemeral feature, and doubtless will quickly give way to the other extreme. There is a fairly active consumption. Lots on track range from \$7 to \$8 for choice grade, No. 2 at \$5 to \$6 and shipping hay \$4 to \$5.

FLOUR AND MEAL,-The demand for both flour and meal is at low ebb, and little is heard of business for export. In Manitobathe month opened with a decline of 40c per barrel on flour,-old wheat flour-40c per barrel on flour,—old wheat flour—and this augurs a reduction here in the near future, particularly as present quotations contrasted with prices of new wheat are high. This pending decline is evidently expected by local bakers who for a week or so past have been informing customers of a reduction in bread to come in October, and that this is a very probable movement is substantiated by bakers holding off buying meantime. We quote winter wheat patents \$3.90 to \$4.10 straight rollers \$3.60 to \$8.75 and \$1.75 to holding off buying meantime. We quote winter wheat patents \$3.90 to \$4.10 straight rollers \$3.60 to \$3.75, and \$1.75 to

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Tubular
Boilors for the Western Block, Ottawa," will be
received at this office until Tuesday the 6th of
September, 1898, for the supplying and placing of
4 tubular boilers, in the Western Block, Ottawa,

\$1.85 in bags. Manitoba patents \$4.50 to \$4.60 strong bakers \$4.80 for 1st quality. Oatmeal is selling at \$3.50 to \$3.55 in barrels, and \$1.60 in bags.

GROCERIES .- London cable states raw market is firmer all round, and cane is strong at an advance. Java quoted at 12s. and fair refining, 10: 71/2d.; beet was firm and rather dearer with present month quoted at 9s. 814d and next month 9s. 9d. The stock of beet in United Kindom is 101,000 tons. In New York refluers, though willing to buy raws, are unable to obtain supplies there being no sugar held by importers on offer, and no supplies in port. Locally the market is firm at the last advance, and business doing is considerable. In teas, there is rather more inclination to pick up small parcels, the country demand having recently shown signs of accelera-tion. Foreign advices are uniformly dis posed to point out advancing tendency, and posed to point out advancing tendency, and this, together with the promised series of tea standards soon to be adopted, would imply a sound market during the winter months. New season Japan teas have gone fairly freely into retail hands, and so far as can be learned these give satisfaction. The new crop Pingsuey tea, which, as before intimated in this review, would be of disappointing quality, would seem to be of disappointing quality, would seem to be affirmed by the "hard knocks" parcels now arriving in the U.S. are receiving at the hands of the tea inspectors. Only a moderate volume of distributive orders are moderate volume of distributive orders are coming in for coffee, considering the season, but jobbers show no disposition to force sales, and prices at noth Rio and Santos are above parity of values of grades here. Spices are in steady request. Cable advices from Havre report Telicherry pepper advanced to over 11c. The demand for rice continues on a small scale, and without quotable change. A firmer tone dominates the market for molasses, with jobbers requotable change. A firmer tone dominates the market for molasses, with jobbers reporting quite a number of single puncheon orders coming in agreeably with the advent of cooler weather. Dried fruits are slow and without any feature aside from the import one. Emyrna cables a sharp advance in Persian dates. New crop of figs per first steamer to arrive at New York are offering there at 12½c. According to late advices the new crop of Grenoble walnuts promises to be about 12,000 to 13,000 bales, against 25,000 bales, last year, and high opening prices are looked for. The California prune market is in an unsettled confornia prune market is in an unsettled condition. All advices from the coast indicate a much smaller crop than was anticipated owing to the heavy drop caused by the het and dry weather of the past two months. Coast cost is stated to be 34 cf. o. b. at present. The first direct steamer from

at least 10 Years.

Denia with Valencia raisins-" Escalona" Denia with Valencia raisins—" Escalona"—is due to load there 10th inst., and will arrive at Montreal about Oct. 5th. First arrival at New York—" Alesia"— with 15,000 boxes, left Denia Aug. 29th and is due next week. The canned goods market still "hangs fire," and negotiations in a wholesale way are absent. American brands of corned beef are strengthening in accordance with Chicago shortage of stock.

LEATHER AND HIDES .- The wants of manufacturers still appear to lack urgency, consequently slowness in placing orders for supplies is the prevailing feature. Still buyers are giving a fair amount of attention to the situation, and it is generally expected that towards the close of the month business will show material improvement. The hide market is unchanged purchases are on the slow side, but full values are being obtained. Chicago advises "Packers are indifferent sellers of hides, as the volume of business transacted nuces, as the volume of business transacted latterly has reduced their holdings, prices are hence firm at 11% of for native steers; 10% c. Texas; 10% c to 10% c butt brands, 9% to 9% c Colorados; 9% c to 10c. branded cows; 11 %c. heavy native cows, and 11 %c to 11 %c for light ditto."

METALS AND HARDWARE.-Busifiess in iron and metals is improving. Mills and foundries are well employed on their various specialities. Pig tin is a shade firmer in sympathy with better London advices. In tin plates, large consumers having

covered their wants for some time ahead, there is little spirit to existing demand, but prices are quite steady. Hardware lines are kept moving well, and for shot and sporting articles there is a good demand. Arising out of the difficulty to get skate supplies, which was an incident of last fell there is already enquiries of last fall, there is already enquiries passing for these and it is to be presumed the "early worm" will derive the usual reward, as there is expected to be a similar outlook ahead this year, everything at this date promising well for an exceptional business.

PAINTS AND OILS .- About the usual business for the season is being effected in white leads, and in the absence of any disturbing feature values remain steady. Turpentine has advanced 2c at 47c The visible supply of turpentine at New York, Wilmington, Charleston, Savannah and three other Southern centres is 60 per cent. less than at same date for the past four years. Despite the fact that this has been a year of phenomenal production, the statistical outlook at the moment is strong. There is no change in linseed oil, and demand is only moderate. Linseed oil is steadler in the States due to a temporary scarcity of oil on the part of the mills which have made large con-tracts for September and October delivery. Beyond this, however, is the confidence in values on seed, which has been in-spired by the readiness of the foreign markets to absorb offerings a little under present Chicago quotations, and this con-dition is likely to prevail at least so long as lake and canal navigation is open. Glass is firmly held at \$1.50 as formerly, nothing having so far eventuated as a result of the stronger tone in the Belgian market.

PRODUCE.-New laid stock eggs are tending higher, and grocers quantities are difficult to be picked up at under 17c per dozen. No. 1 candled sell at 13c to 131/2c, No. 2 candled 9c to 10c. No change has transpired in the bean market, and the demand is only moderate at \$95c to \$1 for hand picked and \$5c to 90c, for primes. Honey is in somewhat more active demand. We quote white clover comb 7½c to 8c, dark 6c to 7c, white strained 6c to 7c, dark 5c to 6c. Maple products evince little life, but as supplies are scarce, values are maintained at 51/2c to 6c for sugar, and for syrup in tins 40c to 45c.

Provisions.—Barreled pork has declined 50c a barrel, and is now worth \$15.50 for Canadian mess. There is a good demand passing for smoked meats, bacon particularly, and as this last is none too particularly, and as this last is none too plentifully offered, dealers are getting ½c a 1b more for choice cured, viz. 12c. Following are current quotations of a leading packer. Hams 10½c, breakfast, and rolled bacon 12c, Wiltshire bacon 11c, backs 10c. Selected heavy Canadian barrel pork (reputed to be \$2 to \$3 better than ordinary brands) \$18. Liverpool cables states lard declined 9d at 25s, all other lines steady.

secured a contract for 2,000 tons, and the Utah mines received additional orders. When the price fell, these mines continued work, and it is now claimed that they can be worked at a profit at the prices which prevailed before the war,

The English hop crop will, it is expected only yield half as much as last year.

S. W. Royse & Co. Manchester, Eng. say of the trend of the metal market. Affairs in pig iron markets moved well during August. Prices advanced about 10d per ton at Glasgow, and nearly 2s. per ton at Middlesbrough. Shipments from the latter port were very heavy indeed, and the resition at a present is near estimated. position at present is very satisfactory; stocks in maker's hands are only small, stocks in maker's hands are only small, and buyers are covering their requirements quickly, fearing a further good advance. In the Midlands Manufactured Iron trade makers are well supplied with orders, and plenty of new business is coming forward, and the outlook is satisfactory. The higher priced metals have been moving well during this month. Copper has advanced strongly and is almost £2 per ton higher. Tin also advanced strongly during the first fortnight, then cased a little, and is now firm at an increase of £2 10s per ton. Spelter is 12s 6d dearer. Lead has been steady and is practically unchanged. unchanged.

TORONTO WHOLESALE TRADE.

TORONTO, Sept. 8, 1898.

The Exhibition, in full swing this week, brought with it the expected impetus to wholesale business--a successful merchants excursion in fact-for which this centre would be better off, were the same thing to occur oftener. Commercial activity was also ably seconded by a "flush" stock market, and transactions have been fairly large. Big crops and generally prosperous times are beginning to make themselves felt in financial circles, and choice investment stocks are not likely to remain very long as low as they are at present. Richelieu, Assurance, War Eagle and Te ephone and Western Assurance have sold higher. Toronto Electric and Telephone are in better demand, 172 being

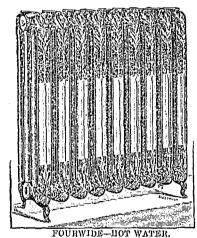

paid for the old stock of the latter, and 168 for the new. War Eagle firmer. Cable continues heavy. The local money market still quotes call loans at 4 per cent and prime commercial paper 6 to 61/2 per cent.

Burren, &c .- Considerable dairy tub is moving and the market is firmer at 14 to 15c for good, with 11 to 18c for medium. Creamery butter is being picked up freely at 18 to 18 1/2c packed, and 19 to 20c prints.

Provisions .- Farmers loads of dressed hogs are a slow selling quantity at \$6.00 to to \$6.25 per cwt. on street. Smoked meats are generally firm. Hams, heavy, 101/2c; medium, 11c; light, 111; breakfast bacon, 11 to 12½c; rolls, 9c; backs, 11 to 11½c; pienic hams, 8½ to 8¾c. Lard, tierces, 7¼ to 7½c; tubs, 7¾ to 8c; pails, 8 to 81/4c; compound, 6 to 61/2c.

New for

#### HAMILTON RADIATO 1898

FOR HOT WATER and STEAM.

Hamilton Radiators are the productions of the Best Mechanical and Engineering Ability that modern science has enabled us to procure.

Manufactured by

The GURNEY, TILDEN CO., Limited, Hamilton, Ont. The GURNEY STOVE & RANGE CO., Ltd., Winnipeg, Man. H. R. IVES & CO.,

Montreal, Oue.

Note.-We will be pleased to supply Catalogue and quote Prices on Application.

GROCERIES-Sugars are in better request, preserving season wants calling for steady replenishing, but there is little disposition to embark largely in supplies, most retail buyers being content with 3 to 5 brl. lots. Teas are moving moderately with holders "clipping" margin in order to effect sales—a species of bait for exhibi-tion visitors which produces results in capturing orders for general lines.

FLOUR AND GRAIN-Local demand for flour is fair, but millers cannot do much business east, views there being too low. Cars of choice straight roller in barrels are quoted at \$3.35 Toronto freights and odd cars of ordinary brands in barrels are cars of ordinary brands in barrels are quoted at \$3.15 west. The grain market is quiet and steady at 67 to 68c for red and white, north and west. Manitoba No. 1 hard 89 to 90c Toronto and West. Offer ings of both are small. Peas sell at 50c, north and west. Oats 22½c north and west. Barley tends firmer at 35 to 38c for No. 1 west as to quality.

Live Stock - Consequent on weaker cables, market Tuesday was 10c lower. Choice cattle sold at \$4 to \$4.40 per cwt. and selections brought \$4.50. Sheep \$3.25 to \$3.45. Calves firm at \$4.70 to \$5.00

PRODUCE-Eggs firmer with sales of selected in single cases at 131/2c, other grades bring from 8c to 12c, the outside figure representing "good choice," Potatoes are rather firmer at 60 to 65c per bag out of store. Dealers are paying 31/2c for dried apples delivered and small lots resell here at 4 to 41/2c. Evaporated are firm at 9 to 91/2c.

## The SYMPHONY, A Home Orchestra.

#### Operas, Waltzes, Nocturnes, etc.

The Symphony is an instrument which will reproduce automatically any piece of music. You simply insert in the opening over the key board the roll of music you want to hear, draw the stops, which are toned like flutes, clarionets, violins, etc., and immediately the music pours forth in a manner beyond conception. The time is governed by a stop also, leaving nothing to be desired. You draw the stops according to your own taste, thereby becoming the conductor, so to speak of your own orchestra.

Thousands are in use giving constant pleasure to as many happy owners.

Any piece of music can be obtained and nothing is too difficult for the Sympnoxy to execute in the most surprising manner. You can also use the key-board.

PRICES, \$175.00 TO \$890.00.

-An extraordinary usury case was lately before the Hull, Que, courts. An illiterate farmer borrowed from a resident of Buckingham \$25 the interest upon which accumulated at such a rate that after making several payments, Nailon on February 13, 1895, gave Lapierre his note for \$125 bearing interest at \$2 per week, upon which note Lapierre brought action March 2nd, 1895, and judgment was rendered by default for the \$125 with interest, the costs \$25.60, and sub-costs \$8.25. To a seizure effected by Lapierre, Nailon filed an opposition claiming he had overpaid Lapierre, and in fact he had paid him \$217.05, besides other sums from time to time for interest and so on, which opposition was maintained by the Superior court, but Lapierre appealed to the Court of Queen's Bench, which reversed the judgment on the opposition, sustaining the judgment of the Superior court in the original action, for the \$125, upon which the interest accrued till the 13th of February, 1898, amounting to the sum of \$338.03, the Court of Appeals' judgment also condemning Nailon to pay the costs of appeal and the costs of the Superior court on his opposition, which amounted to \$292.70 additional, making the whole debt for the origidal loan of \$25 amount to \$779.60, the interest on the \$125 still accumulating at the rate of \$2 per week.

-THE Ontario Bureau of Mines has just issued a report on the metalliferous mines and works of the province for the first half of 1898, and for 1897. The figures are as follow:—

| Gold—                                | 1898<br>6 mos.       | 1897<br>12 mos.      |
