certaines pages blanches ajoutées lors d'une  
restauration apparaissent dans le texte, mais,  
lorsque cela était possible, ces pages n'ont pas  
été numérisées.

# Dominion Printer.

PUBLISHED BY THE DOMINION TYPE-FOUNDING COMPANY.

Vol. I.

MONTREAL, SEPTEMBER, 1874.

No. 3.

## TO THE TRADE.

WE desire to call the attention of Printers to the series of *Antique No. 5, Light Face Celtic, Title No. 2, and Clarendon*, which we are now manufacturing, and for which we have already a great many orders. By referring to the specimens shown in the present number, it will be seen that they equal in finish and style the best English or American types, whilst as regards price, they are lower than anything of the kind ever offered in British America. In this we are adhering to the promises made at the commencement of our business eighteen months ago, and in so doing feel sure that we shall command the sympathy and support of all those who desire to see an increased development of the manufacturing industry of this country.

We have also in different stages of advancement some new *faces* of Gothic, Clarendon and Antique, specimen sheets of which will appear in the *PRINTER*. They will all be offered at the same reasonable prices, and will thus come within the reach of Printers of the most moderate means. Even the gentleman who wrote us—"I am the smallest and poorest printer in ——" will now be able to replenish his *bureau*, and give that variety to his work which he said it so much needed.

We have now seven casting machines in operation, two of which are worked day and night by a change of hands; but these are insufficient for the constantly increasing demands upon our stock, and we have been obliged lately to order a large quantity of additional machinery. Two new casting machines with all the latest improvements have just been received, one of them casting up to Four-line Pica.

We have still on hand a number of those fonts of Fancy Type which we advertise elsewhere, at *greatly reduced prices*. Specimen catalogues are in preparation, in which are marked those fonts which still remain in stock. They are chiefly of the "Johnson" styles, and are in no way defective; but we are clearing them out to make way for our own make, and the many new faces exhibited in our Specimen Book just issued. This is a capital opportunity for acquiring some excellent job fonts at less than prime cost. Catalogues on application.

THE demand for Fieldhouse, Elliott & Co.'s "Reliance" Wharfedale machines continues unabated. We have no less than six under order from the makers, for the Canadian market, and the continued enquiries respecting them show the growing favor in which they are held. They are substantially, honestly and well built presses, and cost less than half the price of American machines of the same size and weight.

We are expecting to receive before the close of navigation a *News size*, 46 x 36, complete with self-delivery and steam gear,—price \$1,500, laid down in Montreal.

## DETRACTION.

A good deal has been said lately by parties who hope to advance the sale of their own type by the disparagement of ours, about the alleged inferiority of the metal used in this Foundry; but we would ask Printers to pause before they accept such representations as true. The amalgam known as Type Metal is, as most people are aware, an admixture of lead, antimony and tin; with a small proportion of copper. These, when melted together at a proper heat, and in the right proportions, have the peculiar property of *expansion at the instant of cooling*; and this expansion, together with the great force with which the liquid metal is delivered into the mould, tends to give great additional hardness and solidity, and to produce that fineness and sharpness which is indispensable to the face of good type. It is necessary, therefore, to so proportion the ingredients that the maximum of expansion should be attained. This is arrived at by a comparison of the specific gravity of different combinations before and after casting, and is simply a matter of careful experiment. It is the object of the type-founder to produce the hardest metal compatible with the safety of the hair-lines and the projecting parts of kerned letters, which, if the metal were too brittle, would be fractured and spoil when placed under pressure. The greatest toughness is obtained by the presence of tin and copper, so that, when properly blended, the alloy is as hard and dense as unhammered copper, and with unlimited wearing qualities. This desideratum having been attained,—and we claim to have attained it,—it only remains to see whether we have the best metals, lead, antimony, tin, &c., at our command. The well-known firm of Cookson & Sons, Newcastle-on-Tyne, supply our regulus of antimony; an agent in London selects for us the finest Banca tin, imported direct from Malacca; and all lead is rejected by us which exhibits the least trace of the presence of zinc or other deleterious metal.

Further, we have the services of men of large experience in the best Foundries, and whose knowledge of the quality of type-metal and its preparation is far more to be trusted than the assertions of itinerant type-vendors, who possibly were never in a type-foundry in their lives.

However, we thank our friends for so kindly reporting to us the incessant disparagement\* above alluded to, but they need not have taken the trouble. We are content to leave our type and type-metal to speak for themselves, believing that our largely increasing business is a safe guide to the verdict that the printing community are giving upon the subject.

\* One little type-man was good enough to take great interest in our prospects of getting paid for a newspaper outfit which we had recently supplied—and he hadn't—in Ontario, and even expressed his warm anxiety on the subject to many of our friends in Montreal and elsewhere. We got our pay, however, and still live. The proprietor of that paper wants to see him.

## NEW SPECIMEN BOOK.

OUR new Specimen Book is now ready for delivery to printers, and will be forwarded on application.

No pains or expense have been spared to make it thoroughly complete, and if its issue was later than we anticipated, the delay mainly arose from our anxiety to incorporate in it everything that a first-class Printer would be likely to require. It contains all the standard-Roman and job-faces made by us, as well as a fine collection of the latest Fancy Type, Scripts, &c., obtainable from American foundries.

The Book also exhibits new Combination and Ribbon Borders, Initial Letters, some handsome Corners for Brass Rule, together with a complete Price List of Type and Printing Material generally. Attention is invited to the list of Printing Presses,—comprising the Wharfedale, Universal, Gordon, Fairhaven, &c., for which we are Agents in Canada.

In commending our Book to the favorable attention of Printers, it only remains for us to request them *not to cut out* Specimens when ordering, but to carefully copy *in full* the name and number (when one is given) of the Type required.

## OUTFITS FOR PRINTING OFFICES.

THE best experience in connection with the printing business is at the service of intending purchasers. Judicious care in the selection for an office will prevent the accumulation of surplus material.

Write us what is required and we will mail estimates, &c., of the cost of a well-appointed office, as well as give useful information in regard to the purchase of second hand machinery and material when it is desired.

WE beg to draw attention to the advertisement on our last page of the "Fairhaven" Country Press, for which we are Sole Agents in Canada. We have already sold several, and they are giving the most perfect satisfaction. The machines are strong, durable, and easily worked, and have the advantage of not readily getting out of order. As regards cheapness, the prices speak for themselves.

MANY a first-rate Printer has come to grief, on first starting in business, by not having had sufficient experience in making estimates. Such need no longer be the case, however; De Vinne's "Printers' Price List" giving all necessary information to new-beginners, as well as being an excellent refresher of the memory to the more experienced. We have it for sale at \$4 per copy; by mail, \$4.24.

OUR friends will please bear in mind that, in sending old type to us, the packages should bear the name of the sender. In this way no mistakes can arise by crediting to wrong parties on receipt of several invoices at one time, as is frequently the case.

WE beg to inform our customers that a sheet containing a variety of Specimens of Calendars for the year 1875 will be mailed to them in a few weeks.

## UNIVERSAL JOB PRESS.

THE "UNIVERSAL" JOB PRESS—These machines are manufactured with improved machinery, under the best facilities. The manufacturers claim that they are the strongest press made: compact and very simple in construction. THE FRISKET FRISKERS are of an improved construction, which allows both to be used on a narrow margin. The Bed remains stationary, and inclines backward, so that the form rests upon it, and can never lag or the type work out of place; at the same time it is always in view and in reach of the pressman. The chase is secured to the bed by a strong and simple device, which can be adjusted from the front of the press. THE CHANGEABLE INK FOUNTAIN allows a change from one colour or kind of ink to another in a few moments of time, without waste. The gauge can be speedily set to feed any required degree of ink, or to entirely cut off the supply at any number of points, allowing a feed of ink from any part without binding the fountain roller.

**PRICES:**

Half-Medium, 13 x 19, inside of chase, \$450.00  
 Quarto, 10 x 15, " " 350.00  
 Eighth, 7 x 11, " " 250.00  
 Ink Fountain, \$25.00 extra.  
 Boxing—Eighth, \$6.00; Quarto, \$7.00; Half, \$10.00. Steam Fixtures, extra, \$15.00.

With each Press are included three Chases, one Roller Mould, two sets Roller Stocks, Wrenches and Treadle.

AGENTS FOR CANADA:

DOMINION TYPE-FOUNDING COMPANY, MONTREAL.

## HOE'S PATENT WASHINGTON HAND PRESSES.

No.	PLATE.	DB.	PRICE.
1	13 x 17	17 x 31	\$180
2	15 x 10	20 x 25	210
3	19 x 24	24 x 29	240
4	21 x 29	26 x 34	275
5	23 x 37	29 x 42	320
6	27 x 42	32 x 47	365
7	30 x 46	35 x 51	425

The above price includes one Screw Wrench, two pairs Points, one Brayer, one Slice, and extra Frisket. Boxing and Carting, \$7.50.

AGENTS FOR CANADA:

DOMINION TYPE-FOUNDING COMPANY, MONTREAL.

## CORDON'S FRANKLIN JOB & CARD PRESSES.

These Presses are all built with the latest improvements, and of the latest style introduced by the Inventor. In the Quarto and Half Medium, in combination with the Ink Distributing Table above the form, are used a Cylinder, a Vibrating Feed Roller, and a Fountain, below the form.

**REDUCED PRICES.**

Eighth Medium, 8 x 12 inside of chase, \$250.00  
 Quarto " 10 x 12 " " 350.00  
 " Fountain, etc., \$25.00 extra.  
 Half Medium, 13 x 19 inside of chase, 450.00  
 " Fountain, etc., \$25.00 extra.  
 Boxing, Eighth, \$6.00; Quarto, \$7.00; Half, \$10.00. Steam Fixtures, extra, \$15.00.

One Roller Mould, two sets of Roller Stocks and three Chases are included with each Press.

## MINERVA PAPER CUTTER.

Patented November 23rd, 1869.

Cuts Thirty Inches.

The Cheapest and Best Machine in the Market.

PRICE, \$275. Fitted for Steam, \$25 Extra. Boxing, \$7.

THE superiority of this Machine is in its *great power* and the rapidity of its operation. The cut is clean, smooth, and true. The knife having descended to a given point *rises immediately, without reversing the motion of the Machine.* There are both back and side gauges, the former is moved by a hand wheel placed in front of the table.

The Best Plow Cutter in the Market!

## FRANKLIN PAPER CUTTER.

PRICE, 30 Inch, IRON FRAME, \$60.

THIS Machine is far superior to any other low-priced Paper Cutter in the Market, from the facility with which paper is cut to any size, after being placed upon the cutting table, without moving it. As soon as the paper is properly squared, and one cut is made, the head (A) is raised by the wheel, as in the ordinary cutter, and may be moved backwards or forwards, parallel with the cutting board, by turning the small crank handle (B) without disturbing the paper.

Another great improvement is the use of a lever (C) and a spring to hold the head (A) in position when raised, instead of the treadle.

## LEAD CUTTER.

Price, \$1.50. With additional Gauge, \$5.

THE advantage of this Gauge is, that it can be adjusted so as to enable the Printer to cut leads to any length, from Nonpareil upwards, without bending or breaking, and with perfect accuracy.

## IRON MITRE BOX.

Price, \$6.50.

THIS very useful and convenient article is well adapted to country offices where the more expensive Mitreing Machine cannot be afforded. It is simple in construction, and with ordinary care first-class mitres can be produced.

THIS is the same Machine formerly supplied by S. P. Ruggles and the "Power Press Company," well-known in the market, and in general use for many years.

**THE DOMINION TYPE-FOUNDING COMPANY,**

MONTREAL, CANADA.

# THE BULLOCK PRINTING PRESS.

These Great Machines continue to grow in favor with publishers of newspapers, who begin to see that the days of all Hand-Feed Printing Machines for fast work are numbered, whether for printing one or both sides of a sheet; for where is the sense of feeding by hand, when it can be done better by machinery, and without cost?

## THE BULLOCK SELF-FEEDING AND PERFECTING PRESS

Feeds itself from rolls of paper miles in length, and prints both sides of the sheet at one operation, thus saving the whole cost of feeding by hand.

FORTY BULLOCK SELF-FEEDING AND PERFECTING PRESSES are now in operation—some of them daily for the past seven years—in the following establishments:—

GOVERNMENT PRINTING OFFICE, WASHINGTON, D. C.

DAILY TELEGRAPH, LONDON, ENG.

WEEKLY JOURNAL, LONDON, ENG.

SAN FRANCISCO EVENING POST.

The BULLOCK is the first invention of its kind that was brought into practical and successful use. It is entirely original in design, arrangement and operation, and is not borrowed from English or French inventions, as some new machines are. As it is, there is nothing abroad or at home that the BULLOCK can borrow, being in all respects better than anything there or here.

The BULLOCK is not only the BEST but the CHEAPEST Press in the world. For further information,

Address

**THE BULLOCK PRINTING PRESS CO.,**

**No. 737 Sansom Street,**

WILLIAM H. WILLIAMS, Manager.

PHILADELPHIA.

# THE "RELIANCE" WHARFEDALE

Newspaper, Book and Job Printing Machine.

THE RELIANCE WHARFEDALE now offered to the trade by The Dominion Type-Founding Company, agents in this country for its sale, possesses the following advantages over other Wharfedales, and which Printers intending to purchase would do well to note :

- 1st. The arrangement for the tapes is such as to allow of their adjustment immediately ; in others there is much time lost in making tapes ready.
- 2nd. The fly can be instantly detached when the press has to work posters or awkward forms which require to be taken off by hand ; in others it is a fixture.
- 3rd. Its immediate delivery of sheet without waiting for next impression to complete movement.
- 4th. Its advantage for extra rolling ; its distribution is double that of other Wharfedales.
- 5th. It is strongly built, and in every sense of the term a first class English machine.

The following are standard sizes :—

	SIZE.	PRICE.		SIZE.	PRICE.
Crown .....	21 x 16 .....	\$600	Double Demy .....	36 x 24 .....	\$1100
Demy .....	24 x 18 .....	700	Double Royal .....	42 x 20 .....	1350
Royal .....	26 x 20 .....	800	News .....	48 x 36 .....	1500
Double Crown .....	30 x 20 .....	900	Large News .....	50 x 39 .....	1600

Complete with fiers, pointing apparatus, moulds and two sets of roller stocks.
