Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Library,
Geological Survey of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque,
Commission Géologique du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

LETTERS OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
WASHINGTON, D. C., *June 15, 1892.*

SIR: I have the honor to transmit herewith the manuscript of a Catalogue and Bibliography of North American Mesozoic Invertebrates, which has been prepared by Dr. C. B. Boyle, of this division, in accordance with the plan approved by you at the time it was undertaken.

Very respectfully,

C. A. WHITE,
Geologist in Charge.

Hon. J. W. POWELL,
Director U. S. Geological Survey.

U. S. GEOLOGICAL SURVEY,
DIVISION OF MESOZOIC INVERTEBRATE PALEONTOLOGY,
WASHINGTON, D. C., *June 15, 1892.*

SIR: I herewith transmit to you the MS. of a bibliography and catalogue of the known North American Mesozoic invertebrates, upon the preparation of which I have been engaged, together with other pressing work, for the past several years. I have encountered the usual difficulties that attend a work of this kind, and am quite prepared for the discovery of errors by those who are familiar with the subject and who shall examine this work. Mr. T. W. Stanton, of the Survey, has been of the greatest assistance to me, especially as regards foreign publications, and to you, sir, I am largely indebted for whatever of value the work may possess.

Very respectfully,

C. B. BOYLE.

Dr. C. A. WHITE,
Chief of Division.

PREFACE.

This work is divided into two parts, Part I being devoted to bibliography and Part II to a catalogue of species and genera.

Part I is intended to embrace a notice of every work, wherever published, that contains the systematic publication of any invertebrate species which has by any author been referred to the Mesozoic. All works containing only lists or mere mention of species by name are omitted, but those containing names accompanied by figures, even if without descriptions, are included.

In the case of serial publications both the title page date and the date of actual issue are given if the latter is known. In other cases the title page date is given as the true date of issue, even though within the compiler's personal knowledge it is wrong.

Some difficulty has arisen from the fact that in some of the earlier publications of species authors have referred certain formations to the Tertiary that are now assigned to the Cretaceous; and it is possible that some of these publications have been omitted from the list, but the republication of the same species as Cretaceous will appear in the proper place.

Part II consists of a catalogue of all the names that have been applied to the genera and species of invertebrates obtained from North American rocks and referred by any author to the Mesozoic. The arrangement is alphabetical and chronological. The entries contain the generic and specific names as they have been used by authors, no attempt having been made to correct erroneous spelling.

The specific name is repeated in each entry which is required by every separate publication of the species, but a separate entry for the generic and subgeneric name is not repeated. Names of groups higher than genera are omitted.

The localities mentioned are in all cases those given by the respective authors. Because of subsequent changes in state and territorial boundaries the reader may find difficulty in recognizing them. In such cases he is referred to Bulletin 13 of the U. S. Geological Survey, in which the successive changes of those boundaries are recorded.

3345

In referring species to their respective formations the subdivisions mentioned by certain authors are not given. This omission is thought to be necessary because of the great number of local names that have been applied at different times, many of which have become obsolete. This is especially the case with the Cretaceous formations. In some cases the reference of species by authors to the Cretaceous is changed to Tertiary and in others from Tertiary to Cretaceous. In doing this the author has followed to a great extent the correlation of Dr. C. A. White, as published in Bulletin U. S. Geological Survey, No. 82, Washington, 1891. As in that work, the Laramie is provisionally included in the Cretaceous, together with certain other formations that are regarded as transitional.

Sixth Ann. Rep. U. S. Geol. and Geogr. Sur. Terr., p. 495. Wash., 1873. F. B. Meek.

Formation: Cretaceous.

Location: Bear River city (Sulphur creek), Wyoming.

— annosa (Con.) Whitfield. (1885.)

Mon. U. S. Geol. Sur., vol. 9, pp. 26, 27, pl. 2, figs. 2-4. Wash., 1885. R. P. Whitfield.

Formation: Cretaceous.

Location: Near Washington, Middlesex county, New Jersey; Sayre and Fisher's brick and clay yards, near Sayreville, New Jersey; near Woodbridge, N. J.

— augheyi n. s. White. (1882.)

Proc. U. S. Nat. Mus., vol. 5, p. 95, pl. 4, figs. 4-6. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: Valley of South Platte river, northeastern Colorado.

— augheyi White. (1883.)

Third Ann. Rep. U. S. Geol. Sur., p. 438, pl. 21, figs. 4-6. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: Valley of the South Platte river, in Northern Colorado, east of the Rocky mountains.

— berthoudi n. s. White. (1882.)

Proc. U. S. Nat. Mus., vol. 5, pp. 94, 95, pl. 4, figs. 1-3. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: Valley of South Platte river, northeastern Colorado.

— berthoudi White. (1883.)

Third Ann. Rep. U. S. Geol. Sur., p. 438, pl. 21, figs. 1-3. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: East of the Rocky mountains in Colorado.

— cardiniaeformis n. s. White. (1878.)

Bull. U. S. Geol. and Geogr. Sur. Terr., vol. 4, No. 3, pp. 911-912. Wash., 1878. C. A. White.

Formation: Cretaceous.

Location: Valley of Crow creek, fifteen miles above its confluence with Platte river, northern Colorado.

Corbicula—Continued.**— cardiniaeformis White. (1879.)**

Eleventh Ann. Rep. U. S. Geol. and Geogr. Sur. Terr., p. 169. Wash., 1879. C. A. White.

Formation: Cretaceous.

Location: Crow creek valley, Colorado.

— cardiniaeformis White. (1880.)

Twelfth Ann. Rep. U. S. Geol. and Geogr. Sur. Terr., pt. 1, p. 73, pl. 25, figs. 5a, b. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: Valley of Crow creek, fifteen miles above the confluence of that creek with Platte river, northern Colorado.

— cleburni n. s. White. (1878.)

Bull. U. S. Geol. and Geogr. Sur. Terr., vol. 4, No. 3, p. 711. Wash., 1878. C. A. White.

Formation: Cretaceous.

Location: Crow creek, Colorado, about twelve miles north of its confluence with South Platte river.

— cleburni White. (1879.)

Eleventh Ann. Rep. U. S. Geol. and Geogr. Sur. Terr., pp. 168, 169. Wash., 1879. C. A. White.

Formation: Cretaceous.

Location: Crow Creek valley, Colorado.

— cleburni White. (1880.)

Twelfth Ann. Rep. U. S. Geol. and Geogr. Sur. Terr., pt. 1, pp. 73, 74, pl. 23, figs. 1a-c. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: Valley of Crow creek, northern Colorado, about fifteen miles above the confluence of that creek with Platte river.

— cleburni White. (1883.)

Third Ann. Rep. U. S. Geol. Sur., p. 437, pl. 20, figs. 7-9. Wash., 1883. C. A. White.

Formation: Cretaceous.

Location: Valley of the South Platte, Colorado.
