THE END OF THE THAW TRIAL IS HAPPILY NEAR AT HAND

Only a Little More Evidence to be Heard, Addresses by Counsel, and the Show Will be All Over

NEW YORK, April 6.—Now that District Attorney Jerome has decided that he will not apply to the appellate division of the Supreme Court for a writ of prohibition relative to the report of the commission in lunacy as to Harry K. Thaw's sanity, it is almost certain that the trial of this remarkable case will proceed to its end. There will be no more interruptions, it is said, and by Monday, when the proceedings are resumed, both sides will have prepared themselves fully for the final effort. It is understood that some rather perfunctory procedure will take place before the summing up begins. It is said that counsel for the defense may call one end perhaps two or three witnesses to the stand on Monday morning. Who these witnesses may be could not be learned.

It is presumed that Dr. Allan McLane Hamilton will be one, but it is not anticipated that he will be on the stand at any great length. Other witnesses may be called to correct certain discrepancies in their testimony. As soon as the last one of them has left the witness chair, Delphin M. Delmas will announce: "The defense rests," and the last phase of the trial will be entered upon. Jerome announced that he will call no more witnesses. It is almost certain, however, that to justify his position Mr. Jerome will make a brief but probably characteristic protest against the confirmation of the report of the lunacy commission. He will do so with buoyant hope of success, however, for it is believed to be a foregone conclusion that Justice Fitzgerald will announce on Monday that he confirms the commission's report.

PREVENTED FIRE, BUT WAS PAINFULLY BURNED

Leslie Chappell's Plucky Action at Moncton—Pair of Old Rubbers Cost Waiter Two Months.

MONCTON, April 6.—A young man named Sanders, arrested at Sydney for stealing a trunk from the I. O. R., was before Magistrate Kay in the police court this morning. A. C. Sherwin appeared for the railway and Sanders had no counsel. A number of witnesses are being examined. George E. Newhall, a clerk named Melanson tried in vain to extinguish the flames, having one hand badly burned in the attempt. Chappell was passing and picking up the can threw it into the street having his hands, eye-brows and mustache badly singed. The damage by smoke was very slight.

Miss Agnes Peters, daughter of George C. Peters, had her hands severely burned in the Central Telephone office yesterday afternoon. A fire caught fire while she was working with it.

Herbert N. Dean, son of R. N. Dean, the well known roller skater, who recently went to Montreal to live, won a race this week against one of the best men there.

London, Ont., Advertiser: J. T. Hawko, editor and proprietor of the Moncton, N. B. Transcript, arrived in London Saturday night, on a flying visit to his brother-in-law, J. R. Hewer, the well known piano man. He left on the G. T. B. Sunday morning for Ottawa. Mr. Hawko is one of the best known figures in Canadian journalism. Rev. W. O. Raymond, Jr., who has been visiting relatives in the city, returned to McAdam yesterday.

UNWISE TO START CAR WORKS HERE UNDER PRESENT UNCERTAIN LABOR CONDITIONS.

D. McNicoll of the G. P. R. Says There are Too Many Strikes in St. John—Otherwise the Industry Would Prosper—He Complains of the \$7.50 License Fee

D. McNicoll, vice-president of the C. P. R., accompanied by Superintendent Downie, called at the mayor's office this morning. A short discussion between Mayor Sears and the two C. P. R. officials was held. Mr. McNicoll informed his worship that he had visited different points along the harbor yesterday on board the C. P. R. steamer Cruiser, and he was glad to have been able to visit the various berths.

Mayor Sears during the conversation asked Mr. McNicoll if the car shortage had yet been overcome and the vice-president stated that new cars and engines were being turned out of the shops as fast as they could be made. Twenty-five large engines have been ordered for this division. Mayor Sears asked Mr. McNicoll if he thought St. John would be a desirable place for a car building plant to be located, and the latter replied that as St. John was a seaport city the material could more readily be obtained than at an inland place, but he thought the attitude of the labor market would be against the advisability of starting such a plant here. Strikes occur too often and these are great hindrances to any industry.

TEN WORKMEN KILLED BY RUSSIAN STRIKERS

Ambassador Denies That the Czar Will Abdicate—Villagers and Police in a Fatal Fight.

LODZ, Russian Poland, April 6.—Ten workmen were shot and killed by strikers in the factory district here today because they attempted to resume work. The managers of the factories have begun to re-engage men but the socialists are bitterly opposing the resumption of work.

INVESTIGATED MIRACLES PERFORMED BY THE POPE

ROME, April 6.—Mgr. Baldassare, Bishop of Imola, was received today by the Pope and Papal Secretary Merry del Val to whom he reported the result of inquiries he had made relative to miracles attributed to the late Pope Pius IX., for use in his beatification.

The bishop pointed out the political and religious influence which the canonization of the Pope, who was deposed for temporal power, would have throughout the world. Pope Pius, before being created Pope, was bishop of Imola. Imola is a town of Central Italy near Bologna, picturesquely situated on an island in the river Sarnano. It has been the seat of a bishop since the Middle Ages and has a population of about 35,000.

DENIES THE ENGAGEMENT OF PRINCESS VICTORIA

LONDON, April 6.—Major James E. St. Martin, controller and treasurer of the household of Princess Christian, Charles Johnson, worthy associate, J. D. MacNutt; Recording Serje, James MacMurtry; Asst. R. S. Miss Rennie MacQuarrie; Fin. Scribe, Thomas A. Clarke; Treas., James Falconer; Chaplain, Rev. H. C. Rice; Conductor, Miss Evelyn Williamson; Assistant Con., Miss Sadie Smallwood; Inside Sentinel, Havelock Ingram; G. S., Clyde Rundle.

NEWCASTLE, N. B., April 5.—At last night's session of Newcastle Division No. 45, Sons of Temperance, the following officers were elected for the ensuing quarter: Recording Patriarch, Charles Johnson; Worthy Associate, J. D. MacNutt; Recording Serje, James MacMurtry; Asst. R. S., Miss Rennie MacQuarrie; Fin. Scribe, Thomas A. Clarke; Treas., James Falconer; Chaplain, Rev. H. C. Rice; Conductor, Miss Evelyn Williamson; Assistant Con., Miss Sadie Smallwood; Inside Sentinel, Havelock Ingram; G. S., Clyde Rundle.

Mr. Hazen: I think that it is quite proper but I hardly feel like pressing an amendment of this kind so hastily. It is necessary to grant such power it can be done by another bill which may be introduced later.

The bill to amend the St. John Street Railway was next taken up for consideration of certain amendments which had been suggested and approved by the St. John city council. The principal one was with reference to carrying the street railway across the Suspension bridge.

Mr. Robertson explained that the bridge had recently been inspected by an expert on behalf of the government and his report was that it was good for some years yet with the traffic as at the present passing over it, and that with an expenditure of about \$45,000 it might be so altered and strengthened as to permit of a railway being carried over it. The district of Carleton was expanding so rapidly that the desirability of the railway company being enabled to run their cars through the city without breaking connection was becoming more pronounced every day and the result would be an enormous increase in the traffic. He would like to see a new bridge on the Cantleaver principle capable of accommodating the railway and worthy of the city.

THE STEADY GROWTH OF SOCIALISM IN FRANCE

PARIS, April 6.—The electric light strikes in the city of Paris, the throwing out of work of hundreds of thousands of people, the throwing of this city of light into utter darkness has called attention to the underlying causes in connection with the political and Socialist agitations which have been going on and which may naturally be said to be causing considerable anxiety. For years past there has been a steadily rising tide of Socialism in France. Bit by bit the doctrines of Karl Marx have invaded the body politic. Little by little the Socialist party has increased in power in the Chamber of Deputies. When M. Waldeck-Rousseau took M. Millerand into his cabinet Socialism entered by the breach. For M. Millerand was not a mere follower of the Socialist doctrines. He was one of the apostles. His famous speech at the Socialist banquet at Saint Mandé in which he defied Collectivism, its aims and its methods of action became the Magna Charter of the party. With him in the Waldeck-Rousseau cabinet this clever trait is across the Atlantic at the present time, having been a member of a jury at Pittsburgh. His study of the Seine as well as his hinterland landscape are deeply interesting. The "Epiant" really constitutes an artistic event which is year by year attracting more attention here as well as abroad.

PARIS, April 6.—The limitation of armaments will be the subject of an interpellation of the government at the reopening of the chamber of deputies, when M. Depressat (Socialist) will ask Foreign Minister Flicheux to explain the instructions given to the representatives of France, who are to attend the peace conference at the Hague, and also to announce what attitude France will adopt at the conference relative to the discussion on the questions of disarmament, demilitarization and the protection of neutralities.

PARIS, April 6.—The movement toward the Left has continued and in the Clemenceau Cabinet have been found once again two Socialists M. Viviani, Minister of Labor, and M. Briand, Minister of Public Education. It is claimed by the enemies of Socialism that these recognitions on the part of the "powers that be" in France have been accompanied by a servitude of the revolutionary spirit, it has encouraged the more militant followers of the Socialist leaders in the belief that without any great efforts they can sweep away the bourgeoisie, and establish their dream, the Socialist Republic.

The various syndicates which in France are all political and Socialist organizations have developed great activity, and have become more and more aggressive. Strikes and labor movements were decreed by the Central Committee which is purely political under the mask of labor organizations and the question is being everywhere asked as the result of the excitement growing out of the strike of the electricians as to where it will all end.

Since Sir Conan Doyle made Brigadier Gerard cut a fox in two with his sword when he went out with the hounds Frenchmen have smarted under the aspersion that they know nothing about hunting.

Accordingly such a hunt as Englishmen have never dreamt of has been arranged at Satory, near St. Germain. To avoid the trouble of drawing covers the foxes have already been caught in the Ardennes, and are now possibly receiving lessons in decorum.

SMOKELESS POWDER THAT HAS NOT ANY FLASH

BERNE, April 6.—It is stated that the British Government are in treaty for the purchase of a smokeless powder which is also flashless, invented by a Swiss chemist and successfully tested. To the military and naval services the importance of such an explosive will steadily appeal as the use of an explosive that gives no visible flash means impossibility of location of guns and ships during action.

RUMOR THAT EMPEROR OF RUSSIA WILL ABDICATE IN FAVOR OF GRAND DUKE MICHAEL

LONDON, April 5.—The Daily Mirror claims to be in a position to announce upon the "highest authority" that the Emperor of Russia purposes to abdicate within a month and that Grand Duke Michael will be appointed regent during the infancy of the Czarvitch. For the past three or four weeks, the paper says, the events in this direction

CZARINA AND CZARVITCH.

have been proceeding with lightning rapidity in St. Petersburg, but the secret has been well kept.

Continuing the Daily Mirror says: "Lately the emperor's mind has given way even more completely and he has become himself incapable of performing the smallest duties of his rank."

The lower house of parliament is to be abolished and there will be former military dictatorship with the object of stamping out revolution and putting an end to anarchy in Russia.

CZAR OF RUSSIA.

The paper declares further that a marriage has been arranged between Grand Duke Michael and Princess Victoria of Schleswig Holstein, and that the Emperor of Russia was chiefly for the purpose of negotiating this marriage.

BONILLA STILL TRYING TO KEEP UP THE FIGHT

Is Gathering His Scattered Forces and Will Occupy New Positions

PUEERTO BARRIOS, Guatemala, April 5.—After the battle of Namsaque in which the forces of Bonilla were defeated by the Nicaraguans, President Bonilla's forces occupied Amapala which place is fortified and defended by a strong force of Hondurans.

President Bonilla's forces were weakened by forces being sent to Generals Barahona and Christmas, who were defeated after eight days fighting at Namsaque, and a mutiny occurred in the marion at the capital.

President Bonilla sent instructions from Amapala, authorizing General Saturnino Medalla to evacuate Tegucigalpa if he were unable to defend it and save the city from bombardment and looting. The city was evacuated.

The forces of president Bonilla and General Medalla are now uniting with the army of President Figueroa, of Central America, on the frontier, where the combined armies are being massed for continuing the war.

General Solomon Ordenez, the Honduran minister of war, arrived at Puerto Cortez today and has taken command of the coast defenses.

President Bonilla's forces occupy all the cities and towns on the north coast of Honduras, except Trujillo and the principal ports of the coast.

President Bonilla's line of defence extends from Amapala to the frontier of Salvador, thence north to San Pedro Sula and Puerto Cortez. He will establish his new capital at Camaguey.

CYCLONE IN SOUTHERN STATES CAUSED MUCH DAMAGE

Houses Blown Down, and Several Lives Lost in Yesterday's Storm

MONTGOMERY, Ala., April 6.—Specimens from the Southern and Western parts of Alabama tell of death and devastation from the cyclone which swept through the southern and eastern portions of the state yesterday.

At Bradley's home of Hugh Farrier, a prominent planter, was blown down, instantly killing Mr. Farrier and his six year old son, and fatally injuring Mrs. Farrier. The storm tore up the tracks of the Atlantic Coast line for several miles.

At the plantation of J. G. Moore, a banker of Marion, a row of houses was blown down. During a storm last evening lightning struck the jail at Salama, knocking down a part of the wall of the prison and terrifying the prisoners.

A magistrate and several policemen visited the cave, and on penetrating to the interior found a man with long, matted hair and beard, who said his name was Andre Faure.

The cave contained an electric generator and was brilliantly illuminated. Faure was fitting up shelves to accommodate some thousands of volumes which were stacked in the cave.

A novel race will take place at the Queen's Rollaway tonight, in which all the fast ones will take part. When the gun is fired none of the starters will know just how far they have to skate. The distance has been put in an envelope and the judges after the start will open it and for the first time learn the distance, but the skaters will not know until the gong rings on the lap before the last. This will test the speed and judgment of the racers.

The first of a series of discussions on the duties of boards of health took place last evening before Pioneer Lodge, L. O. E. P. The discussion was opened by Hon. C. N. Skinner. Others who took part in it were Dr. Jas. Christie, Dr. A. D. Smith, H. E. Coaker and Charles Fowler. The address took the form of preliminary discussion on the subject of the enforcement of sanitary laws. The conditions prevailing in the city and others were mentioned and the efforts of boards of health to better the conditions commented on. Premier Pugsley's suggestion that a sanitarium be established was also alluded to, but as the prevention and not the treatment of disease was the subject before the meeting the matter was not gone into fully. The discussion will be continued next Friday night.

WENT WITHOUT HER BAGGAGE.

Aprine Edward Island woman who sailed on the Empress of Britain yesterday, was obliged to leave for England without her baggage, through the misunderstanding of a U. S. Immigration Official. Yesterday morning the lady arrived in the city enroute to Boston where she was to take passage for England on a steamer. She was detained here for several hours by an immigration official and missed the train to Boston. The steamer was to sail on the arrival of the train, so she knew that she could not make connections. Being anxious to leave for the old country at once, the woman engaged passage on the Empress of Britain. Her baggage proceeded to Boston and will be taken to England on the steamer she had intended taking.

THAW DID NOT WANT TO SEE A DOG KILLED

PARIS, April 6.—A story of Harry Thaw's dread of witnessing the death of a dog has just been made public here. During a visit to Paris, Thaw, who is a great lover of dogs, presented to the Genevieve's home for lost dogs its first apparatus for the painless extinction of hopelessly diseased or injured animals. The authorities invited him to see the apparatus in use. Just as the manager was about to throw a dog into the "death chamber" Thaw turned pale and stopped. "I would rather not see it," he said and excusing himself hurriedly left the building.

REGENT DEATHS.

SAMUEL JOHNSTON.
Samuel Johnston, a well known painter, died at the home of his mother, 104 Winter street, on Friday. Deceased was in his 22nd year and had been in poor health for the past few months. Besides his mother, Mr. Johnston is survived by four brothers, Messrs. William, Fred, James and Joseph Johnston, all of this city, and two sisters, Mrs. Chas. Boyce of Penfield, Charlotte county, and Mrs. Arthur Towill of this city. Many friends will sympathize with the family in their bereavement.

MRS. CATHERINE CONWAY.

The death occurred at Boston on Saturday last of Mrs. Catherine Conway, formerly Miss McKeever, of this city. She leaves to mourn two sons, two sisters, Mrs. Jane Mullin and Mrs. Matilda Gallagher of North End, and two brothers, Bernard McKeever of Montserrat, and John McKeever of Roxbury, Mass.

THE RANGE, QUEEN'S CO., N. B.

There died at the Range Queens Co., N. B., March 29, of consumption, Frank L. McLean, aged 35 years. For some time he was engaged in the mercantile business. He was much respected as a straight-forward man—a man well informed in many questions. He leaves a father and five brothers and one sister. His brothers are: Manning and John, of the Range, Q. C.; Leant of St. John, N. B.; and Captain Ward of St. John, N. B., and Adlie of the Range. His funeral was held at the Range Baptist Church on the 31st ult., conducted by the Pastor, J. H. Puddington. It was one of the largest funerals ever seen in these parts.

MRS. CHARLES BARTON.

CHIPPAN, Queens Co., N. B., April 5.—Mrs. Charles Barton of Cumberland Bay died March 29th, aged 79. After the stroke which came on March 21st, she never to any extent recognized anyone. Mrs. Barton will be much missed, as she was active in church work. She is survived by two sons and three daughters. Her funeral was held at the Range on the 31st ult. and was conducted by Pastor J. H. Puddington.

SELLS WIFE FOR \$60, BUT SHE OBJECTS

Disappointed Buyer Brings Suit Against
the Husband for Breach of
Contract.

PARIS, April 5.—The court of the Haute Loire has before it a case brought by a peasant who claims \$600 damages from another peasant for the non-fulfillment of a contract for the sale of his wife.
The man who brought the action bargained to buy the wife of a neighbor for \$60. When the woman heard of the transaction she not only refused to leave her husband's house, but told the two men strongly what she thought of them.
The buyer was furious at not being able to obtain the execution of a contract duly drawn up and signed, and he determined to seek legal redress.
It is stated that sales and purchases of wives have taken place in the district several times during recent years.

FOUR MEN ARE SHOT BY RUSSIAN PRINCE

His Ear Cut Off by Official's Sword, He
Has a Terrible Revenge on
Assailants.

ST. PETERSBURG, April 6.—A remarkable tragedy occurred at the Hotel de Europe on Thursday night, in consequence of which Prince Nijarade, a well-known member of St. Petersburg society, shot four men who had dined with him.
The guests were M. Kontala, a marshal of the nobility, who escaped injury; Colonel Golovin, a relative of the President of the Duma; Count Komarovsky, Captain Koroff and Lieutenant Mollas.
A dispute arose over the political situation, and Captain Koroff, drawing his sword, attacked Prince Nijarade, cutting his ear off.
Thereupon the prince drew a revolver and fired six shots, mortally wounding Captain Koroff and seriously injuring Count Komarovsky and Lieutenant Mollas, while Colonel Golovin was slightly wounded.
The wounded men were conveyed to different hospitals.

AIRSHIPS TO BE USED AS MILITARY TARGETS

German War Office to Carry on Series of
Interesting and Important
Experiments.

BERLIN, April 6.—Imperial Councillor Martin's recently published book on battles in mid-air gives peculiar interest to some experiments which the German War Office has decided to carry out.
Balloons and airships are to be made the targets of gun and rifle fire, to throw light on the important question of the damage that may be done to them, and also on the effectiveness of balloons and airships to inflict destruction on fortifications and camps and troops on the march in time of war.
The experiments will be made in the vicinity of Danzig. Small balloons of the capacity of 250 cubic feet will be let loose and, after travelling a certain distance, rifle fire and guns will be trained on them as long as practicable.
Other balloons will be held captive by cables 200 feet in length, attached to warships, which will tow them within range of the coast batteries at ranges varying from three to nine miles.
The experiments will be witnessed by officers of the general staff, artillery officers, naval officers and officers of the balloon department.

PITTSBURG THREATENED WITH A BEER FAMINE

PITTSBURG, Pa., April 6.—Pittsburg is threatened with a beer famine as the result of the strike today of 1,500 workers employed by the Hazelwood Brewing Company and the Independent Brewing Company, two of the largest breweries in the city are completely tied up.
The brewers agreed to give the men shorter hours and more pay if they would agree to submit the other questions to arbitration, but this was refused and the men went out today.
The Liberty Brewing and the Hazelwood Brewing Company, two of the independents signed up this morning and are working.

FAMILY QUARREL ENDS
IN MURDER AND SUICIDE

CHICAGO, Ill., April 5.—Adam C. Rhein, 50 years old, residing on Lowe Avenue, today shot and fatally wounded his father-in-law Wm. Rommel and his mother-in-law Mrs. Minnie Rommel, and then killed himself by firing a bullet into his brain.
Yesterday Rhein and his wife quarrelled, and she left him, going to the home of her parents on 28th street. It was reported to Rhein that she had commenced proceedings for a divorce and he decided to kill his wife.
He placed three revolvers in his pockets and went to the house in which the Rommels lived and kept a confectionery store. Mrs. Rhein saw him enter and ran out the back door. Rhein fired at her twice, but missed her.
He then shot Rommel through the left lung and shot Mrs. Rommel through the body, the ball striking her just below the heart. Rhein then killed himself.
At the hospital to which Rommel and his wife were taken it was said that both will die.

THE MODERN IMMIGRANT.

Mrs. Simpson Hayes, described as an agent of the Canadian Government, is in England making an appeal for a better class of female emigrants for Canada. She urges that well bred, well spoken, well mannered and enthusiastic women should come here.

COMING AT LAST.

Premier Pugsley's intimation that he is strongly in favor of the establishment of a sanatorium for the treatment of tuberculosis, and that he believes the province to be now in a sufficiently healthy financial condition to warrant the necessary expenditure...

THE VOICE.

A sound rose out of the South (Sweetest was never heard!) Like the rain song after drought From the mouth of a bird.

SATURDAY SERMONETTE.

LITTLE THINGS. We have all heard sermons from the above text and tremors enough the meat of them were, but this one will not be tedious as it is tiresome for there are no divisions and sub-divisions and seventeenthly to it.

TIME FLIES.

Methuselah was walking in his garden. "My goodness," he exclaimed, suddenly, "there's another flower on that century-plant! Why, it seems but yesterday since I plucked a blossom from it!"

IN HARD LUCK.

A Chicago physician was one day called to attend a sick child in a "shabby genteel" quarter of the Windy City.

IMPOVERISHED FAMILY MURDERED BY FATHER

A Pathetic Tragedy in Dresden—Only One Daughter Was Found Alive.

BERLIN, April 6.—A family tragedy of a particularly distressing character has just been enacted at Dresden. In that city lived a man named Wildorf, fifty-two years of age, who had been in the Royal service as chief forester, but who had retired on the exigencies of pecuniary distress to such a position and occupied a modest flat with his wife and six children the youngest of whom was only three years of age.

It was then discovered that with the exception of the oldest daughter who still manifested faint signs of life the whole family had been shot dead. The corpses of the mother, three sons and two daughters lay on the beds, while that of Wildorf, whose hand still grasped a revolver was extended on the sofa in his work room. Everything pointed to the tragedy having been carried out with the consent of the victims excepting the oldest and still living daughter, who had apparently engaged in a fierce struggle with her father, and had not been finally overcome until several bullets had been lodged in her body. Two of the murdered boys were twins, twelve years of age. It is believed that worrying or parental difficulties alone was the cause of Wildorf committing this terrible act.

When leaving port last evening the Empress of Britain parted her bow line and swung across the harbor, just barely scraping the S. S. Cassandra. For a few minutes a collision seemed inevitable.

GERMANY SEES POSSIBILITY OF AN ATLANTIC RATE WAR

Belgian Expedition to the Antarctic Being Organized—A Statue of William of Orange for England.

BERLIN, April 6.—The question is everywhere being asked as to whether there is to be a renewal of the North Atlantic rate war in the not far distant future. Such an eventuality seems by no means distant of realization in the light of statements contained in the annual report of the Hamburg-American Company. Since the long continued conflict of a few years ago which resulted in the carriage of passengers across the Atlantic at almost nominal fares the position of the Cunard Company has been one of practical independence. The previously existing agreements have never been renewed, despite the efforts of the combine acting in co-operation with the German lines to re-establish them. The Cunard Company has adhered to the agreements in principle, but it is claimed that when this is said it is about all that can be said. Moreover, the Cunard Company's close relations with the Austro-Hungarian Government in regard to the carriage of emigrants from the Mediterranean have always been a source of annoyance to the German lines while the "all-British" company's share of the Scandinavian emigrant traffic is not a little begrudged in Teutonic shipping circles.

Bonn to his box and said: "I admire in particular the courage wherewith you have dared to express certain truths in this play. I now understand what opposition you have been obliged to overcome here."

KING ALFONSO AN ARDENT GOLFER

MADRID, April 5.—King Alfonso, who is looking forward to the joys of fatherhood, is as fond of sport and exercise as ever, but it has been noticed that since the Queen of Spain and her children he has given up the sports which took him long distances away from the palace, such as horse-back riding and automobilism. He has become very fond of golfing and is quite an expert with the clubs. In the snapshot shown here, taken just as he is going to make a drive, one will notice in his left-hand play.

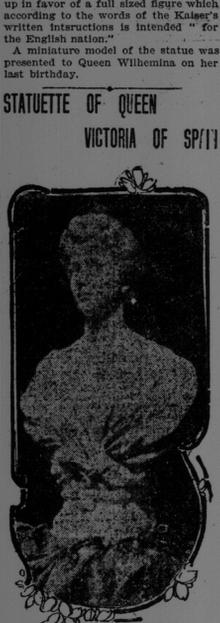

companies have outlined an expensive campaign, but the results of the last passenger war are declared to have been so disastrous to everybody concerned that there are those who regard its repetition as highly improbable. In that contest the Cunard Company is always supposed to have come off the best, but now what appears to be a contingency in a fight in the interests of the combine proper and the Cunard Company would be identical. The peculiarity of the position would be that the combine would be guaranteed by agreement 6 per cent. dividend on certain proportions of the shares of the two great German lines with which it is in conflict. This would appear to be such an obvious absurd situation that it almost seems to predispose of the idea that matters will be carried to extremities.

BENGALESE CAMPAIGN AGAINST BRITISH NOT A SUCCESS.

CALCUTTA, April 6.—Compulsory education is being introduced in Orissa in the Mohammedan state over which she rules the schools which owe their existence to the enlightened energy of herself, her mother and her grandmother have not met with the support she requires from the nobles and high officials. As the prize distribution of the Alexandra Bible School her Highness spoke her mind freely on the subject. She condemned the eyes of the education and the scholarships of the classes and compelling her to go outside in order to find men qualified to carry on the business of the state. She pointed out that for the sake of example she had kept her own son at these schools instead of sending him to one of the colleges outside the state, and that scholarships were numerous. But these inducements had failed. "All my warnings and injunctions have proved futile in this direction, and I have given orders that a part of the income of the students and their parents should be cut off. If former unreasonably absent themselves from the school, and the money thus obtained may be spent towards the education and the scholarships of the promising students. If even after this the people, and especially the Jagirdars do not pay sufficient attention to education I shall be compelled to adopt the same strict measures that the Emperor of Japan has done for the weal of the people."

A BRITISH REVIEW OF RECENT FINANCIAL DEVELOPMENTS IN AMERICA

Bank of England's Effort to Stop Shipments of Gold—Vanderbilt Horses for Exhibition at the Olympia Show Attract Some Attention.

LONDON, April 6.—"The Thunderer," "The London Times," has the following to say editorially in a leader upon the subject of American stocks: "The New York Stock Exchange has recently been in a condition of extraordinary excitement. The prices of the numerous speculative securities which though not entirely without precedent has not often been equaled during the last twenty-five years. Probably the majority of men now in active business and most of those who have to chronicle market events have no clear recollection of the fall of prices which convulsed the Wall Street market in 1854 and many have forgotten the year 1853 when the obstinate refusal of the Senate to repeal the Sherman Silver Act reduced the Treasury's stock of gold to a dangerously low level and brought the New York business community to a degree of embarrassment verging on bankruptcy. The decline in prices in 1854 was a long drawn agony which in some respects is worse than a sharp fall. In May, 1891, there was a formidable panic, caused by a corner in Northern Pacific stock, but the pressure was soon over, and there was no further trouble until the autumn of 1893 when another violent fall took place. In neither of these two comparatively recent periods were the falls in prices as severe as that of 1897. Probably the severity of the pressure to sell was partly due to the fact that the fall was 'overdue.' Experienced observers were of the opinion that the condition of the American stock markets was a dangerous one as far back as last August. But as has often been the case in the past, the market was so obscured by marvellous activity and highly profitable results of the industry, agriculture and commerce of the United States, and especially very shrewd people by no means lacking in experience were quite convinced that although the conditions were somewhat excessive, there was a fair probability that grain and cotton, or rather the proceeds of their sale abroad would enable these commitments to be quietly liquidated to the necessary extent. There can be no doubt however, that those who took this favorable view of the position of the stock markets were consciously or unconsciously assuming that the general public would not later become free buyers of a large proportion of the 'magnates' and the absence of buying of this kind on the part of the public appears to be one of the principal reasons for the collapse.

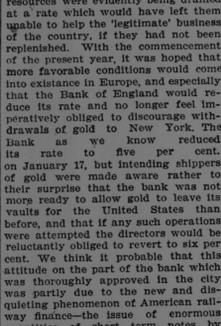

At Red Hill Farm, Edgware, part of the team of American trotting horses which Mr. Alfred Vanderbilt intends to show at the International Horse Show which is to be held at Olympia on June 7 and the following days, have just been inspected by a number of visitors at the invitation of Mr. Charles W. Wilson, who brought over the horses from the United States, and who has entire charge of their preparation for the exhibition at Olympia. As they were seen the horses, which with one exception—a Kentucky bred saddle horse—are all trotters, looked well considering their long journey and the fact that not one has been in harness since the show at Madison Square Garden last November, but to men who are accustomed to see the best type of English horses in the show ring or even in the streets of London, the bulk of Mr. Vanderbilt's team appeared to be coarse. In harness their fallings cannot be noticed so much as was the case during the inspection when they were shown quite in the rough, and after their preparation during the next two months an improvement, no doubt, will be made; but two of the English directors of the show—Mr. Walter Lloyd and Mr. John Kerr—together with other men who are admitted to be good judges, expressed disappointment at the all round appearance of the team. The horse which pleased the visitors the most—for he is of the English type, was Alert, a pure bred American trotter standing 15.1 hands in height, and some winner of a second prize in the "run about" class at New York. In color he is dark bay, he is smaller in head than the remainder of the team, but he is beautifully arched in neck, and he is perfectly placed shoulders, fine racing

SELLING CHILDREN TO PAY TAXES

LONDON, April 5.—First portrait published of Sultan Ahmed Mirza, chosen Crown Prince of Persia on January 25. He is the Shah's second son and nine years old. Children, by the way, are paying a levy for some of the new reforms in Persia. It was stated in the parliament at Teheran that the people have had to sell their children to Turkomans in order to pay the taxes. All the members of the house and the visitors in the strangers' gallery were moved to tears at this declaration.

quarters, and possesses plenty of bone. Although by far the smallest horse in the team he shows more quality than any of the others. The saddle horse, Lucille, a washy chestnut in color by Rex MacDonald, the sire of the best saddle stock in Kentucky was also admired. In general appearance she is just what a hack should be, but of course there was no opportunity of testing either her manners, temper of pace during the hurried inspection. A pair of 12.2 hands brown barouches horses, King James and King Edward, by a French coaching stallion out of a hunting mare and three parts thorough bred mare respectively, were other horses among the collection. tion which attracted attention which attracted attention. They appeared to be possessed of really good manners and in make and shape, especially behind the saddle, they were nearer the English ideal than any of the horses which made up the one road and two park teams were paraded. The last named were bays and grays, beautifully matched, the leaders of the better of the two teams, Rustling Silk and Primrose stepping well together, and in color and conformation they made a splendid match. The wheelers, Gibson Boy and Full Dress were not seen to such advantage, but one of the extra leaders, the Flying Dutchman, a winner in the pace and action class at New York, seemed to be a likely horse to travel a long journey at a high rate of speed, his 2 min. 12 sec. The Duke, another of the "extras" and Cobby, the last named, a powerfully built gray trotter which Mr. Wilson bought out of the shafts of a cab at Syracuse Fair were also shown.

IS ENGAGED IN LAWSUIT WITH SPANISH ROYALTY

MADRID, April 5.—It is alleged that H. M. Schar, whose photo is here shown, is the brother of the King of Spain, and that he and his relatives are bringing a lawsuit against the Spanish royal family. It is claimed that Alfonso XIII. has not fulfilled the terms of his father's will, which stipulated that a life pension should be paid to the famous opera singer, Elena Schar, and to certain of her descendants while they were minors. There was friction between the parties to the action a year or two ago.

SUE'S TROUSSEAU

"I don't suppose that there is anything more to be said," Sue whispered, looking up into Lambert's face. "There is a lot more to be said," declared Lambert. "Uncle Jim is guardian of my inheritance until I am twenty-five, but he is not to prevent my marrying you."

"I can wait," she declared. "I would rather be poor and work for you, than have the income and be at Uncle Jim's mercy. He wants the money for himself, and it goes to himself if I marry without his consent, so he won't give his consent."

"I can wait," she suggested. "It is only three years. There will never be any one but you dear. I won't not want to feel that in marrying me, you had destroyed your prospects."

SOME PLAY-FROCKS FOR THE SMALL CHILD

ACQUIRING EMPIRE LINES

HOWEVER it may have been in the days when "little Nany" was hated or adored by the civilized world, it is the exceptional woman today who has a figure that looks well in a vest...

NOTES OF THE FASHIONS

DIRECTOIRE coats are much seen, both in plain and striped effects. In cloth suits seen recently the lines of the jacket ran perpendicularly while those on the skirt were diagonal.

Did you ever as a small child watch with longing eyes a party of young ragamuffins romping in a mud-puddle from which you were debarred by the frowny of your dothes? If you did, you will remember just how you hated your frills and furbelows, and how intense was your envy of the dirty faces and ragged frocks of the little outsiders.

MIRACULOUS ESCAPE
OF CHICAGO ENGINEER

Fell From the Top of a 200 ft. Smoke-Stack but Managed to Catch a Plank on His Way Down.

CHICAGO, April 6.—John Nagel, a constructing engineer, fell from the top of a 200 foot chimney at the Standard Steel Car Works at Hammond yesterday, but in his fall he struck a projecting scaffold on the outside about 25 feet from the top which enabled him to grasp a plank, thus saving his life. Nagel was in charge of the building of the giant smoke-stack and in order to see the progress he ascended to the top of the structure in a drop-bucket. When the bucket neared the top, the man in charge of the hoisting engine below failed to perceive Nagel's signal to stop and the engineer was thrown over the edge of the narrow aperture above. His fall was witnessed by hundreds of working men on surrounding buildings, whose attention was drawn to the towering chimney by Nagel's cries. He escaped practically unhurt, but the other men on the smokestack were so unimpaired that they could not work for some time afterwards.

Aeronaut Predicts That the Passage Will be Made at 250 Miles an Hour.

LONDON, April 6.—Mr. Jose Weiss, the latest inventor of an airship, interviewed upon the subject said: "Within fifteen years New York will be twelve hours distant from London at a speed of 250 miles an hour being achieved with flying machines of the fixed bird-wing type gliders."
Mr. Weiss explains in detail the experiments he is making with gliders and his future plans so far as these can be foreseen.
His first step toward the conquest of the air will be to obtain the mastery over the balance of the simple glider. This consists essentially of a hollow bird with two fixed outstretched bird wings curving upward at the tips. The aeronaut kneels inside the body part, and by moving his body slightly backward and forward he is expected to learn to adjust the centre of gravity of the contrivance so that it coincides with the centre of the air pressure—the essential principle of aerial flight discovered by Mr. Weiss. The glider is steered to the right or left by slightly raising a small part of the right or left wing.

SWEDISH EXPLORER
IN AN UNKNOWN LAND

Sven Hedin, Travelling in Tibet, Sends a Glowing Report of That Country.

CALCUTTA, April 6.—Sven Hedin, the Swedish explorer has succeeded in getting through the region to which he says under a Shigatse date line: "The country between the Ngalang-tso and the Brahmaputra is one of the most interesting portions of Tibet. The plateau stretching to the south, hitherto unknown, is one of the highest on the earth. The water abed between the Ngalang-tso and the Brahmaputra is situated further north than has been believed, and the country consists of the most complicated labyrinth of ranges and ramifications of rivers. Big rivers flow from this district to the Brahmaputra. The Shigatse here visits great villages, with temples and gardens low down on the north side of the river."
From Shigatse the explorer travelled by boat. The river was full of floating ice, and there was a constant stream of boats with pilgrims on their way to the festival at Tsah Lempo. Dr. Sven Hedin met with a very hearty welcome. The Tsah Lama who was there overwhelmed him with presents of food and provisions and allowing him to sketch and photograph everywhere. He writes the Tsah Lama as a most wonderful and sympathetic man.

THE FINEST LIGHT WEIGHT
WRESTLER IN THE WORLD

Eugene Tremblay Defeats Bothner in One of the Hardest Matches Ever Seen in Montreal

MONTREAL, April 6.—George F. Phelps, who has been in the fight trade here for half a century, is dead, aged 72; buried at Pittsburg, N. B., yesterday. The miners of Shinghills have wired the Ottawa department that they are not out on strike but have simply quit work.
In one of the finest and hardest matches ever witnessed here, Eugene Tremblay, of Montreal, retained the title of lightweight champion wrestler of America, by defeating George Bothner, of New York, at Solmer Park and third falls in the respective time of 34 and 23 minutes. The second fall was won by Bothner in 5:15. At the conclusion of the match, after Bothner had been the under man for fully twenty minutes, the former American champion spoke briefly to the press and the referee announced that Bothner declared himself quite satisfied that Tremblay was the finest lightweight wrestler, not in America only, but "in the world."

MILITIA NOTES

FOR CITY AND ELSEWHERE

The British reviews and magazines for March and April have been filled with articles on Mr. Haldane's scheme for reorganizing the British army. There has been both praise and denunciation for the latest proposals for military reformation, as there has been for every similar scheme ever launched. The salient part of the Haldane proposal is to restore to the lords lieutenant of the English counties the ancient powers they formerly held in connection with the militia and to make the latter body more local in character. Local associations are to be formed in each shire which will oversee and control the militia of the county. Mr. Haldane claims that in the old days before Charles II. laid the foundation of the regular army, the militia under county organization, was always able to control the militia of the county. Mr. Haldane's scheme is a return to the original system until under the system instituted by Lord Cardwell and received in the present time the militia battalions have become mere recruiting

regiments. Another argument offered in defense of the new scheme is that the better class of men, who at the present time prefer to enlist in the yeomanry or volunteers, will be attracted once again to the militia. Critics of the proposed Haldane system say that the widening of a gulf between regulars and militia will result in recruiting for the line falling off to such an extent that a new problem will arise in connection with the regulars. At present it seems that time alone will show the merits and demerits of the scheme.

As far as the regular army is concerned practically the only change made in it by the reorganization is to do away with army corps organization and to substitute organization by divisions.

Last Saturday announcements concerning the 1907 brigade camp at Sussex were issued from Ottawa. The camp will be for the usual twelve days, from June 25th to July 26th. The St. John corps ordered to attend the camp are the 19th Field Battery, No. 8 section Ordnance Stores Corps, No. 7 Co. C. A. S. C., No. VII. Field Ambulance, and No. 8 section of the Signaling Corps. Whether or no the 19th Battery will go to Sussex is a question. At present the corps is non-existent. A full complement of officers appears in the militia list, but according to information received at the district office all the gentlemen appointed to commissions in

BOOK BY A ROTHSCHILD
COST BIG FORTUNE

Member of Famous Family Spends \$100,000 in Producing "Extinct Birds"

LONDON, April 6.—The Hon. Walter Rothschild, M. P., whose natural history museum at Tring has a world-wide fame, is to publish through Messrs. Hutchinson, a volume on "Extinct Birds." The book represents many years of labor, and has cost its author something like \$100,000 to produce.

For Messrs. Hutchinson also the production of this work has been a very expensive business, for the reason that the firm has been experimenting for several years to the order of Mr. Rothschild to obtain an absolutely imperishable paper. Among the illustrations will be forty-five colored plates, and the blocks alone have cost more than \$5,000.

Mr. Rothschild, it was said, had stipulated that his book should be turned out in imperishable form, because it was improbable the subject would ever be done again, and he wished the work to endure for all time.

Difficulties arose at once in connection with the three-color process of printing illustrations, for it was known that paper which has been coated to give it the fine surface necessary to take this color printing properly loses its durability and perishes after comparatively few years.

Messrs. Hutchinson, therefore, have for some years past been experimenting with paper, ink and machinery on an account of Mr. Rothschild's tireless efforts, and have now obtained a paper so pure that it will take the color and give a perfect result. But the cost of this imperishable paper is no less than is a penny.

Mr. Rothschild calls his book "an attempt to write in one volume a short account of birds which have become extinct in historical times—that is, within the last 600 or 700 years; to which are added a few which are almost extinct, or which may be considered extinct."

The colored plates (which of course, were executed from the wonderful collection of specimens at Tring) were awarded a first-class diploma at the last International Printers' Exhibition. The price of the work will be \$125, only 200 copies for private circulation, will be printed in English; but many foreign editions are to follow, and the book will find its way into all the leading museums and scientific libraries. It is interesting to note that Messrs. Hutchinson have received orders for the book from most of the colonies.

Owing to the permanent nature of the book, it is a work which will increase greatly in value, and Messrs. Hutchinson are confident that their great expense of time, labor and money will

PREMIER FAVORS A SANITARIUM

Matter Considered in the Legislature Yesterday

FREDERICTON, April 5.—The house met at ten o'clock. After routine the house went into committee of supply.

On the item of \$1,000 for the forestry convention Mr. Hazen inquired if the government had considered the recommendation of the convention with regard to a chair and a department of forestry in connection with the university.

Hon. Mr. Pugsley—The government recognize the great importance of this matter and are giving it their consideration.

In view of the increased revenue which we will receive it may be that the government will be in a position to do something in this direction.

Whatever is done will be by a special bill.

Hon. Mr. Hill—Has the government given any consideration with reference to the recommendations of the convention to prevent lumber cut on crown lands being exported for pulp wood?

Hon. Mr. Pugsley—This matter will be seriously considered by the government. The time has been too short to take up a question of such enormous character.

On the item for hospitals Mr. Robertson inquired if the government had taken into consideration the desirability of establishing a sanitarium for consumptives somewhere in the northern part of the province.

Hon. Mr. Hill expressed himself as rather of the opinion that the value of a sanitarium as an agency for the cure of tuberculosis is overestimated.

The gathering together in one place of a large or comparatively large number of persons suffering from consumptive tendencies, he said, to impregnate the air with germs and to cause a spread of the disease. In his opinion it may be that pneumonia is almost a greater source of danger to the people than is tuberculosis.

Mr. Ryan drew attention to the fact that Hon. A. R. McClean is willing to assist in the establishment of a sanitarium in an Albert county site should be chosen for the institution.

Hon. Mr. Sweeney spoke of the beneficial results to consumptives of open air treatment taken under the direction of Dr. Heston.

Hon. Mr. Pugsley expressed his concurrence in the opinion that a sanitarium would be of much benefit and said that for himself he believed the time has come when the government can rightly take into serious consideration the advisability of establishing or aiding in the establishment of the suggested institution.

The cost of erecting the buildings and the expense of maintenance would be very heavy, but as the provincial revenue has been increasing this question of expense is less serious than it has previously been.

Mr. Hazen also spoke favoring the establishment of a sanitarium.

THE MODERN WOMAN IS NOT A FAILURE

English Speaker Predicts a Great Future for Her Sex.

LONDON, April 6.—"A woman may have manners and no mind, or mind and no manners; but the complete woman will have both."

This remark was made by Mrs. Boutwood at the Woman's Institute at the last regular monthly meeting during the course of a lecture upon the subject, "Is the Modern Woman a Failure?"

"The epithet 'modern woman' is generally applied as a term of opprobrium," said Mrs. Boutwood. "There is no reason why it should be except the Anglo-Saxon's antipathy to adapt himself to changes and because it is easier for him to 'label' than to comprehend.

The modern woman is really something neither new nor monstrous. She is like Eve, only seen under modern conditions. Women will become living realities, instead of pale, distorted reflections.

"Man's objection to the modern woman is quite easy to understand and appreciate. He dreads the unknown. For centuries woman has been the slave, and man has suddenly sees the race he has wronged let loose on society. The clock cannot be put back. Women will go far but it will be upward.

"Man needs to the full the sympathy and the sacrifice of woman and he dreads to lose it. "Man may consider modern woman a failure, but we are not crushed by that because one day man will understand and become our ardent supporters."

SWISS PRISON IS CONVICTS' PARADISE

Life So Luxurious There That No Inmate Has Ever a Thought of Leaving.

GENEVA, April 6.—By the arrest of two escaped convicts named Grunder and Gerber, at Kandersteg, amazing revelations have been made regarding convict life at the prison of Thurnberg, near the town of Wassen.

In this penal paradise the convicts did as they liked. They fared sumptuously, liquors being one of their luxuries, and the accommodating wardens allowed them to visit cafes and places of amusement in the town.

Grunder and Gerber were the "favorites" at the prison because they had money, which they spent freely in wines and tobacco, sharing them with the other prisoners and the wardens. Finding their resources diminished, however, they secured leave of absence from the prison in order to obtain funds by highway robbery and burglary.

CAPTURED WITH BOOTY.

They "worked" the entire Emmenthal valley, and were returning to Thurnberg with their booty when arrested. Both convicts denied vehemently that they intended escaping, declaring that they were never so comfortable as in prison.

In his defence Grunder related a remarkable story of life in the prison. In proof of his honesty he recalled that one occasion the chief warden allowed him to go to Wassen, where he bought five gallons of wine, tobacco, chess, etc. On his return he was censured for not buying schnapps for the coffee as well, and early the next morning he went back to the town and purchased two quart bottles.

He afterward met some fellow-convicts who went out for a morning stroll, and they emptied one of the bottles. Grunder gave the second bottle to the head warden.

Grunder added that he would never have left the prison to rob houses and travellers if he had not lost all his money gambling with the other prisoners.

ELABORATE MENUS.

Here is the daily routine in Thurnberg Prison, as Grunder and Gerber described it to the examining magistrate:

7 a. m.—Rise; receive hot water from a warden; clean cells.

8 a. m.—Breakfast, consisting of coffee, milk, hot rolls and a liquor.

9 to 12 a. m.—Cards; games of bowl in the prison yards; other recreations.

Noon.—Dinner, consisting of soup, a roast, with vegetables; plain sweet coffee, with liquor; wine.

Afternoon.—Walk through the town, visit to the cafes or an excursion into the mountains.

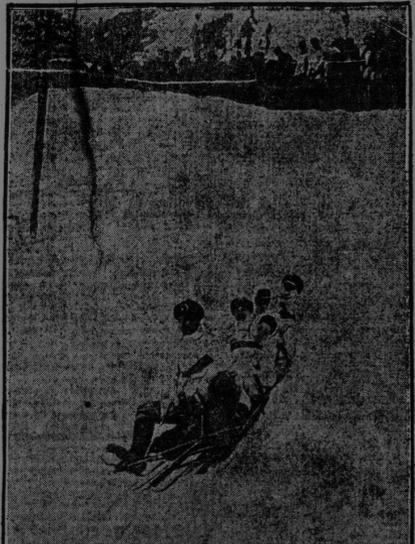

6 p. m.—Supper, followed by a smoke and more games of cards.

9 p. m.—Retire.

Some of the prisoners objected to retiring so early, but the chief warden pointed out apologetically that it was necessary for the prisoners to make some concessions to discipline. The convicts held a meeting, and after a bitter debate it was voted to adhere to the 9 o'clock rule.

Grunder and Gerber are to be tried next week for "escaping," and further interesting revelations are expected.

PASSENGER STEAMER BURNED AT DOBBS' FERRY

Fire Broke Out While Vessel Was Eight Miles from a Wharf, But Passengers All Got Ashore

DOBBS FERRY, N. Y., April 5.—The steamer City of Troy, of the Citizens Line, was burned to the water's edge here tonight. All the passengers, some sixty-five in number, were landed safely. The steamer was completely destroyed with its large cargo of freight and thirteen horses.

Edwin Gould's dock to which the City of Troy tied up when it was found impossible to control the flames was also destroyed.

The City of Troy left New York at 6 o'clock tonight bound up the river for Albany and Troy. The fire was discovered at about 8 o'clock when the boat was about eight miles below Dobbs' Ferry. It broke out in the hold amidships and rapidly gained headway.

The crew fought the flames for some time before the boat was turned shoreward, but it was seen they could not control them, the captain turned his boat for Dobbs Ferry. When she tied up at the Gould dock the fire had gained such headway that little attempt was made to extinguish it, and every effort was bent toward landing the passengers successfully. When it was thought that everyone had been landed safely, it was discovered that a woman passenger was asleep in her berth, and it was not until she was rescued that the fire was extinguished.

An effort was made to rescue a number of horses on board but the flames had gained such headway that it was found impossible to reach them and they perished.

The dock to which the City of Troy tied up took fire and was destroyed. It was with some difficulty that the flames were prevented from taking hold of the Manilla Anchor Brewery, which is very near the dock. The passengers from the City of Troy returned to New York on the 11:30 train.

The fire started either in the kitchen or in the hold. Reports say that the fire was discovered early but its location

was such that it could not be mastered by the crew and with all speed the steambot was headed for this side of the river. All those of the crew and attendants who were not actually needed in the engine-room and in the pilot house were sent about arousing the passengers and helping them to prepare to go ashore quickly. There was no sign of fire aboard the steambot except a cloud of smoke trailing off to the stern as she ran shoreward and her calls for help did not seem justified to those who saw her approaching. There was no panic aboard. All hands were ready to leave as quickly and quietly as might be. It appeared later that one woman had been overlooked in the excitement and was still asleep in her berth. She was found later before the fire was near her by two men from Dobbs Ferry who went through the cabin to make sure that there were none left. At that time the City of Troy had drifted away from the dock and the woman was lowered into a rowboat and brought ashore.

The steambot was laid alongside the dock and before this had been done, the crew had knuckled out the fore-and-aft and had a gang-plank ready to run out. It took but a couple of minutes to get the passengers ashore and on to the tracks of the Central Railroad. The

fire broke out just as the last of the passengers were ashore.

Fire alarms had been sounded and the firemen were soon on the shore but the fire swept through the boat within a very few minutes.

NEW YORK, April 6.—Seven passengers and a score of the crew of the steambot City of Troy, which was burned in the Hudson river at Dobbs Ferry, arrived here early today. The passengers looked little the worse for their experience, but it was different with most of the crew. They were asleep in their bunks when the fire was discovered and as the quarters were close to where the fire started they had no time to get together their belongings. Several of them, when they got to New York, had on only an undershirt, overalls, shoes and a blanket.

All agreed that Captain Bruder had acted wisely in the crisis. The skipper, they said, was the bravest man on the boat and it was not until the last person had been safely landed that he made his way through the smoke to the pier at Dobbs Ferry.

There were 65 passengers and a crew of 48 men on board the City of Troy and every one, according to the officers of the boat, escaped in safety.

CARNEGIE GIVES \$6,000,000 MORE TO PITTSBURG INSTITUTE

Will Establish a Pension Fund for the Staff

PITTSBURG, Pa., April 5.—W. N. Frow, president of the board of trustees of the Carnegie Institute, made public a letter today he received from Andrew Carnegie, in New York, announcing that Mr. Carnegie has made an endowment of \$6,000,000 to the institute. This gift is in addition to the \$4,000,000 given by Mr. Carnegie some time ago.

The previous endowment provided \$2,000,000 for the departments of fine arts and museum and a like sum for the Carnegie schools of technology.

The endowment today provides \$4,000,000 for these three departments. Mr. Carnegie also established a pension fund for the benefit of those connected with the institute which, after the death of the recipient is to be continued to the widow in all cases where needed.

WORLD'S LARGEST WARSHIP TO BE BUILT FOR JAPAN

LONDON, April 6.—It is reported here that the largest battleship in the world to have a displacement of 23,000 tons is to be built in England for the Japanese government, and that a commission already is on its way here from Japan for the purpose of placing the contract with one or another of the great British ship builders. It was believed that Japan would, in the future, build all her own warships, but it is now thought that a vessel of this size would be too great an undertaking for her, and it is known that the Japanese admiralty has a full programme for its home yards. The cost of this new battleship will be about \$11,350,000.

Fire broke out just as the last of the passengers were ashore.

Fire alarms had been sounded and the firemen were soon on the shore but the fire swept through the boat within a very few minutes.

OXFORD MEMORIAL TO CECIL RHODES

LONDON, April 5.—Above is shown the Rhodes memorial, which is to be unveiled at Oxford by Lord Rosebery. The tablet bears the words: "This tablet commemorates the foundation, A. D. 1892, of the Rhodes Scholarships by the munificence of the Right Hon. Cecil John Rhodes, M. A., Hon. D. C. L., some time of Oriel College."

RIGHT NOW.

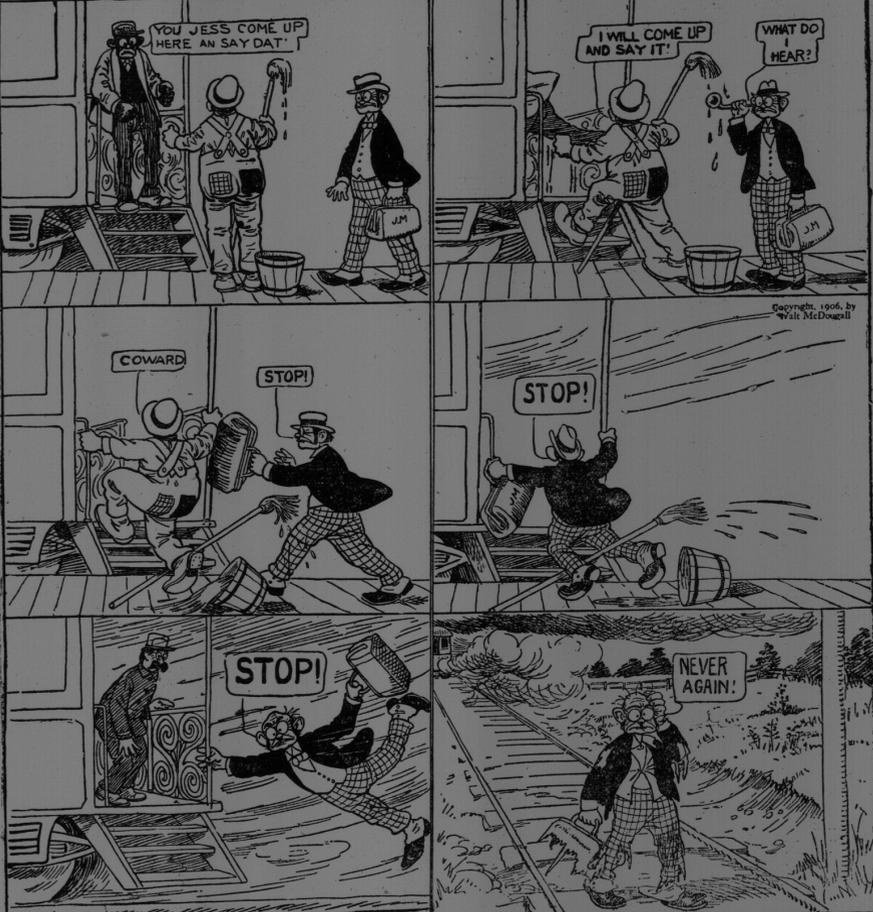

The master of a large southern plantation would fire off a small cannon every evening at 6 o'clock as a signal to the people living on his land. One evening at the time for the usual boom the master was away. Two of his colored men, John and Jim, had long desired to fire the cannon, but had never had a chance to do so. They decided to make the trial on this afternoon, but thought that it would be best for them to have the cannon make no sound. It was decided that Jim should hold a water bucket over the mouth of the cannon while John did the actual discharging. Soon there was a great boom, and John looked up, to find that his friend was gone.

When the master returned, John was very busy in the field. "John," said he, "where is Jim?" "He went down to the spring at the bucket o' w'atsh, sah."

"When is he coming back?" "Well, sah, ef he come back like he went, he's sure due heah now."—Lippincott's Magazine.

THE CONTROL OF OYSTER BEDS

Matter Considered in the House Yesterday

Money Voted for Marine Department—Hon. Mr. Templeman's Knowledge of Strange Department Surprising

OTTAWA, April 5.—The commonsense spent the day talking about fish and voting money for the marine department.

W. MacPherson (Vancouver) urged on the government the desirability of encouraging as far as possible the building industry on the Pacific coast.

A. A. McLean (Queens, P. E. I.) on the vote of \$7,000 for oyster culture devalued that owing to the conflict of jurisdiction between the Dominion and provincial governments oyster beds were being depleted and federal money was being wasted.

Mr. Templeman said the question of dual jurisdiction was a large one, which would have to be taken up at some later date.

UP RIVER MILLS ARE GETTING READY FOR WORK

GIBSON, N. B., April 5.—The Rabbit mill started sawing this morning for the season. About twenty-five hands are employed. The prospects for a good season's cut are of the brightest.
