FROM THE COUNTRY.

News from the Districts About Us
As Reported by Our Active Correspondents.

Accidents, Personal Intelligence, and Things in General.

NASHWAAK.
The Experience of some Boatmen in Fishing and Fishing-General News.

NASHWAAK, Oct. 9th, 1888. Messrs. Hines and Arthur Brownell, of Boston, arrived here on Sept. 10th, by Northern & Western train. These gentlemen came to New Brunswick with the intention of having a hunting and fishing cruise at Cain's River. On the 11th inst., they started for Cain's River, accompanied by Jim who filled the office of guide. Jim thought it necessary to take Nell and the wagon, as the equipment was too much of a lug for a small party. All ready now of their go up the hills. Now in sight of Zionville, which place the party had to leave. Jim says nothing but keeps his eye on Nell and the wagon. Now to the head of the settlement road, and over for dinner. Arthur seconds the motion. Dinner over, six miles more to travel through mud and water, which is a part of the programme of sports. Nevertheless all simple manner. Lunch may be a party of twenty people, but whether twenty or two, there is no ceremony. The ladies walk into the room, and by themselves, the men struggle after and find their way to such seats as suit them. The talk is as easy as if you were sitting about a fire, or more so. If the lunch is a small one, the talk ripples about the table; if large, you have to take your chance with the two fellows creatures next you—men or women, as chance, you or superior strategy may have determined. Society does not object to serious topics, or even to the serious treatment of them; what it objects to is pedantry, pretension, dullness, or that which is distinguished from that which is serious. It has preference and strong preference, but it will endure much. What it will not endure is the solemnities of the lecture room, or the man who arrives with a mission—D. W. Sweeney in New York Tribune.

A Gang of Greeks.
It was pleasant to look at the gang of Greek immigrants that had been brought to Castle Garden by a steamer from one of the Mediterranean ports. They came from the vicinity of ancient Athens to try their fortunes in New York. It was evident to any one who looked at their garb as they fed upon their shores and meandered through Battery park that they were very poor people whose lives had been very hard, but you could not find on this globe finer specimens of any race of mankind. They would have made models for a sculptor. Their figures had been cast in an antique mould, worthy of the time of Pericles; their limbs were lithe, their features classical; they bore themselves proudly as they glanced around at the novel scenes of the daily life. The immigrants from Greece who landed at Castle Garden last year numbered over 400 men and women.—New York Evening Sun.

A Short and Tough Lesson.
The lot of our criminal classes seems demonstrably to be a short one and a tough one. It has actually no amelioration. Out of 60,000 prisoners, more than one-half are between the ages of 17 and 30. It takes but three generations to use up a stock that runs to waste. The average life of vicious people is less than one-half that of people of virtue. A recent writer complains that seeing certain coils of morals that consist in health. It is not precisely why we so deeply imbibed to science that it is enlarging and lengthening the span of life and at the same time teaching us what valuable things life can achieve.

France's Schools.
In France there are 22,818 national schools for girls and 27,824 for boys. The first named are conducted by female teachers and the last by males.

Telling Facts.
"Did Wesley make any good points in his speech?" asked Bagley of Bailey.
"Yes, quite a good many. What did they mean?" asked Bagley of Bailey.
"You called him a liar. What did he call you?" asked Bagley of Bailey.
"I called him a liar. What did he call you?" asked Bagley of Bailey.
"I called him a liar. What did he call you?" asked Bagley of Bailey.

Technical.
First Jeweler—Understand you are going to be married, Fredward. Max Crossen's Second Jeweler—Yes.
First Jeweler—A very nice girl, open face, neat hands and all that, but I can't say much for her beauty.
Second Jeweler—Ah, but you must remember she is full jeweled.—Burlington Free Press.

And He Was Married.
"So you want a situation in the editorial room?" Seems to me you've got it. You must be near 50."
"I'm 55."
"What is your special line of work?"
"Writing up 'Bright Spangles of the Calendar.'"
"—Noblesville State Journal.

The Last Man Who Ought to Complain.
Bald Headed Man—Here, waiter, this is an infernal outrage. Here is a hair swimming around in the soup.
Waiter—Well, don't make such a fuss about a trifle. Hair is what you need most, ain't it?—Texas Siftings.

Life of an Iron Horse
"The iron horse does not last much longer than the horse of flesh and bone," said an old New York Central engineer to a reporter recently. The ordinary life of a locomotive is about thirty years. Some of the most parts require rearing every six months; the boiler lasts from six to seven years; the side frames, axle and other parts, thirty years. An important advantage is that a broken part can be repaired, and does not condemn the whole locomotive to the junk shop, while, when a horse breaks a leg, the whole animal is only worth the flesh, fat and bones, which amount to a very small sum in this country, where horse flesh does not find its way to the butcher's parks.—New York Mail and Express.

Don't haw, and blow, and spit, but see Dr. Sugi's Catarrh Remedy.

These gentlemen came to New Brunswick with the intention of having a hunting and fishing cruise at Cain's River. On the 11th inst., they started for Cain's River, accompanied by Jim who filled the office of guide. Jim thought it necessary to take Nell and the wagon, as the equipment was too much of a lug for a small party. All ready now of their go up the hills. Now in sight of Zionville, which place the party had to leave. Jim says nothing but keeps his eye on Nell and the wagon. Now to the head of the settlement road, and over for dinner. Arthur seconds the motion. Dinner over, six miles more to travel through mud and water, which is a part of the programme of sports. Nevertheless all simple manner. Lunch may be a party of twenty people, but whether twenty or two, there is no ceremony. The ladies walk into the room, and by themselves, the men struggle after and find their way to such seats as suit them. The talk is as easy as if you were sitting about a fire, or more so. If the lunch is a small one, the talk ripples about the table; if large, you have to take your chance with the two fellows creatures next you—men or women, as chance, you or superior strategy may have determined. Society does not object to serious topics, or even to the serious treatment of them; what it objects to is pedantry, pretension, dullness, or that which is distinguished from that which is serious. It has preference and strong preference, but it will endure much. What it will not endure is the solemnities of the lecture room, or the man who arrives with a mission—D. W. Sweeney in New York Tribune.

A Gang of Greeks.
It was pleasant to look at the gang of Greek immigrants that had been brought to Castle Garden by a steamer from one of the Mediterranean ports. They came from the vicinity of ancient Athens to try their fortunes in New York. It was evident to any one who looked at their garb as they fed upon their shores and meandered through Battery park that they were very poor people whose lives had been very hard, but you could not find on this globe finer specimens of any race of mankind. They would have made models for a sculptor. Their figures had been cast in an antique mould, worthy of the time of Pericles; their limbs were lithe, their features classical; they bore themselves proudly as they glanced around at the novel scenes of the daily life. The immigrants from Greece who landed at Castle Garden last year numbered over 400 men and women.—New York Evening Sun.

A Short and Tough Lesson.
The lot of our criminal classes seems demonstrably to be a short one and a tough one. It has actually no amelioration. Out of 60,000 prisoners, more than one-half are between the ages of 17 and 30. It takes but three generations to use up a stock that runs to waste. The average life of vicious people is less than one-half that of people of virtue. A recent writer complains that seeing certain coils of morals that consist in health. It is not precisely why we so deeply imbibed to science that it is enlarging and lengthening the span of life and at the same time teaching us what valuable things life can achieve.

France's Schools.
In France there are 22,818 national schools for girls and 27,824 for boys. The first named are conducted by female teachers and the last by males.

Telling Facts.
"Did Wesley make any good points in his speech?" asked Bagley of Bailey.
"Yes, quite a good many. What did they mean?" asked Bagley of Bailey.
"You called him a liar. What did he call you?" asked Bagley of Bailey.
"I called him a liar. What did he call you?" asked Bagley of Bailey.
"I called him a liar. What did he call you?" asked Bagley of Bailey.

Technical.
First Jeweler—Understand you are going to be married, Fredward. Max Crossen's Second Jeweler—Yes.
First Jeweler—A very nice girl, open face, neat hands and all that, but I can't say much for her beauty.
Second Jeweler—Ah, but you must remember she is full jeweled.—Burlington Free Press.

And He Was Married.
"So you want a situation in the editorial room?" Seems to me you've got it. You must be near 50."
"I'm 55."
"What is your special line of work?"
"Writing up 'Bright Spangles of the Calendar.'"
"—Noblesville State Journal.

The Last Man Who Ought to Complain.
Bald Headed Man—Here, waiter, this is an infernal outrage. Here is a hair swimming around in the soup.
Waiter—Well, don't make such a fuss about a trifle. Hair is what you need most, ain't it?—Texas Siftings.

Life of an Iron Horse
"The iron horse does not last much longer than the horse of flesh and bone," said an old New York Central engineer to a reporter recently. The ordinary life of a locomotive is about thirty years. Some of the most parts require rearing every six months; the boiler lasts from six to seven years; the side frames, axle and other parts, thirty years. An important advantage is that a broken part can be repaired, and does not condemn the whole locomotive to the junk shop, while, when a horse breaks a leg, the whole animal is only worth the flesh, fat and bones, which amount to a very small sum in this country, where horse flesh does not find its way to the butcher's parks.—New York Mail and Express.

Don't haw, and blow, and spit, but see Dr. Sugi's Catarrh Remedy.
