THE WALTHAM CONVERTIBLE BRACELET WATCH

IS easily the first favorite with the ladies. Why? Because of its dainty beauty and abiding accuracy. But that is not all. It appeals to the ladies also because of the many different ways it can be worn. On the case is a little "eye" that folds back snugly against the case when it is desired to wear the watch on chain, brooch or ribbon. You really ought to see this beautiful watch and we shall be pleased to show it to you at any time.

Full many a flower is born to blush unseen,
Full many a flower may do the same I ween,
If higher jumps the price of gasoline.

Rather than answer to a charge of intoxication under the O. T. A., John Majurey, farm laborer of Lanark, borrowed his brother's shotgun under the pretence of shooting ground hogs, went behind a nearby hill and shot and killed himself.

The black squirrels are safe here and elsewhere in the province at least until 1923. An order, province-wide, has been issued that prohibits the shooting of squirrels. This is contrary to the opinion of local sportsmen who have been taking it for granted that this is the open season for squirrels.

George Wright of the Walker House, Toronto, stated on the completion last Thursday of four years' prohibition in the province that the hotel business is now more pleasant as there is more freedom in operating and that he would not care to go back under the old license system under any circumstances.

An act came into force on September 1st giving Division Courts increased jurisdiction as follows. An action on a claim or demand of debt, account or breach of contract or covenant of money demand whether payable in money or otherwise where the amount or balance claimed does not exceed \$200. Previously the limit was \$100. The act also provides that a note or signed contract up to \$400 can now be entered in the Division Court.

Labor Supply Above Demand.

Employment agencies in Chicago, which practically went out of business during the war when any sort of laborer could pick his own job and name his own hours and salary, are now flooded with applications for positions. They say there is a marked falling off in the demand for labor, both skilled and unskilled, and that the supply now far exceeds the demand.

Everywhere there is a tendency on the part of the public to dispense with luxuries and many necessities, under the hope that a readjustment is at hand and the prices of everything will take a decided drop. Merchants also are buying in limited quantities and manufacturers report many cancellations of orders. As a result, large numbers of men are being laid off in factories and stores until conditions improve.

There has also been a flood of men drifting in from the East, seeking employment. There is very little building, and contractors say they do not care to undertake any work at the present prices of materials and labor, and the danger of daily strikes.

CARGILL MAN FINED

Ben Neil, a trapper and hunter of Cargill, was fined \$200, and costs in Walkerton on Tuesday afternoon by Magistrate Tolton of town and Parish of Paisley, for an infraction of the Liquor Law. Neil, it seems ordered from a Buffalo club a 45 and 48 bottles of the same, done and went with a car Saturday evening to the Formosa brewery where the sods were manufactured and brought the booze in triumph to Cargill. It is claimed that the car stalled at the outskirts of the enterprising burg, and that the booze was carried through the mill yard home.

At any event an anonymous letter reached Inspector White here to the effect that carousing had been going on amongst certain parties in the village on Saturday night and Sunday, and asking him to get busy and investigate. The result was that the Inspector and Constable Ferguson made a trip to Neil's house on Thursday last, and asked about the booze. According to their story, the wife, who was alone in the house, maintained that only the keg of beer had come to their home and showed them where it rested in the cellar. She denied they state, that any bottles had come to the house and on their taking a search-light they couldn't locate any.

As it was up to Neil to show where the bottles were, if not in his home, a charge was laid against him for having liquor in other than his private dwelling house. At the trial, however, Mrs. Neil denied telling the officers that the bottles were not in the house, but on the other hand she maintained she pointed out the glassware to them on a shelf and that one of the officers had touched one of the bottles with his hand. A neighbor woman, who claimed to have been in the house at the time corroborated Mrs. Neil, and also claimed she had met the two men as they ascended from the cellar, a thing which both officials denied as they claimed they had neither met the woman nor believed at all that she was in the house. A stout forensic battle was waged between Mr. D. Robertson, K.C., for the prosecution and Lawyer Klein for the defence, the outcome being that the magistrates concluded that the bottles weren't in the house at the time the officers called and that Neil was guilty of having had liquor in other than his private home, and accordingly assessed him as above.

Canada's Overseas Trade is \$2,351,000,000

Sea-borne \$1,046,000,000
Land-borne \$1,305,000,000

More than half this land-borne trade is ultimately sea-borne—but in Foreign Ships.

Every pound of Canadian products shipped from a port outside Canadian territory retards our maritime growth, weakens our national prosperity and places control of a part of our sea-borne commerce in the hands of a competitive nation.

The Navy League of Canada.

ONTARIO FARM AGENCY Palmerston, Ont.

We have for sale Thirty-five (35) of the Best Farms in the Counties of Wellington, Perth and Bruce, from Fifty to Two Hundred Acres each, well situated on good roads, with First-class Buildings, priced from Four Thousand (\$4,000) to Eighteen Thousand (\$18,000). If You Have High Blood Pressure You Must Be Careful

When the Blood Pressure is much above normal there is always the danger of rupture of a blood vessel, most frequently in the Brain and producing a stroke, or in the Kidneys, producing Bright's Disease. One should guard against over-exertion or excitement and take

HACKING'S HEART AND NERVE REMEDY to dissolve the Uric Acid deposits that form in the Veins and Arteries, making them hard and brittle. This remedy is a wonder; it builds up the entire system by Purifying the Blood, Strengthening the Heart and by producing a normal and healthy condition of the Nerves.

Mrs. Wm. Morley, of Palmerston, used quite a number of boxes of Hacking's Heart and Nerve Remedy and they benefited her so much and she was so pleased with them that she recommends them to all her friends who have this trouble or who are all run down and Nervous. She says "you must be sure to get Hacking's."

Constipation is one of the aggravating causes of High Blood Pressure and it is advisable to use Hacking's Kidney and Liver Pills to drive out the Poisons that generate in the system. These two preparations go well together and you should buy a few boxes from your dealer to-day. Hacking's Limited, Listowel, Ont.

(To be continued next week)

The Match as a Deadly Toy

The use of matches as a plaything is a very dangerous habit. In the Province of Ontario, during the year 1919 one fire in every eight originated through children playing with matches; and they thus wantonly destroyed more than \$300,000 worth of valuable property, besides sacrificing several innocent lives. Even in the hands of careless men and women many fires are caused by thoughtlessly throwing a match in a waste paper basket, or pile of rubbish, before it is quenched. A good plan is to break the stick in two and then you will be sure that there is no fire in it.

Government Help for Widows

On October 1 next there will come into force a very important Act of the Ontario Legislature, by which every mother with children under 14 years of age dependent upon her, who lost her husband by death or whose husband has been permanently disabled or confined to hospital or asylum and who has been a resident of Ontario for at least four years previous to her application, is a British subject, continues to reside in Ontario, and is a fit and proper mother to take care of her children, will receive an allowance sufficient for her maintenance from the government. It has been proved by actual experiment that dependant children can be supported cheaper in this way than by placing them in institutions. In the home, the mother, who receives no salary, does the work which a paid matron, housekeeper and cooks do in the institution. Fuel and food bills are also less in the home, and, most of all, the children have the care of a mother, which is the one thing an institution can never supply, no matter how well conducted.

When to Buy Flour

Now is the time to lay in a stock of Flour made from old wheat, and Flour that has been milled two months ago makes the Best Bread. Flour made from new wheat should be three months old before using.

I have a small quantity of old Flour on hand, and first come, first served.

Also Feed of all kinds at Right Prices.
Cash paid for Butter, Eggs, Dried Apples, etc.

GEO. LAMBERT.

For Fall and Winter

You will want a new Suit or Overcoat for Fall and Winter. This is the place to get them. We have just exactly what you want—the very latest in samples and style books just in. Come in and see them

Dress Swell Clothes
We have also taken the agency for the Dress Swell Clothes, a high class tailoring concern who also send us a large range of samples of the newest patterns for Fall and Winter. Remember that these are not ready-made, but made to your measure.

Your Choice
You can have your Suit or Overcoat made up in any style you wish, either with us or with the Dress Swell Tailors. This is left entirely to yourself.
A perfect fit guaranteed or your money refunded.

T. A. MISSERE, - MILD MAY
TAILOR AND GENT'S FURNISHER.

The Road to Independence

Trouble comes to all of us at one time or another. The man with a snug bank account, is fortified against the "slings and arrows of outrageous fortune". It is the duty of every man to lay aside something for the inevitable rainy day. Open a Savings Account today—and take your first step along the road to Independence.

THE MERCHANTS BANK
Head Office: Montreal, OF CANADA Established 1864.
MILD MAY BRANCH, A. C. WELK, Manager.
HANOVER BRANCH, J. H. ADAMS, Manager.
WALKERTON BRANCH, W. A. BURROWS, Manager.

Roy Gratton, Trench's fast race horse will give an exhibition of speed at the Teeswater show.

Suing G.T.R. For Damages
An interesting case will be heard at the next sitting of the Division Court when Mr. James B. Miller, of Arran Tp., will endeavor to secure damages to the extent of \$100 from the Grand Trunk Railway. On the seventh of June last the plaintiff's cattle strayed on to the defendant's track at lot 20 in the half mile strip in the Tp., of Arran, and the train ran into the cattle killing a heifer valued at \$75 and injuring another cow, reducing her value by \$25. The plaintiff claims that it was the duty of the company to keep the gateway in repair so the cattle could not stray on to the track. The case will be tried before Judge Greig, at the next sitting of Division Court here on November 10th.—Tara Leader.

Mary Pickford Loves to do Great Things
The famous star of Sunnybrook Farm says: It is one of her best photo plays. I have enjoyed every minute of this production because I ran around in short dresses and act the little kid I always wanted to be. I have been on the stage and screen so long that I never had much time for playing. The days we gave the circus in the barn, the whole studio stopped work and came over to play with us. It was all I could do to keep D. W. Griffith, Henry B. Walthall, Lillian Gish, and some of the others from getting in and playing like the rest of the children.
This attraction along with Charlie Chaplin in "The Floor Walker" will be seen here on Friday, October 1. Over 8,000 feet of film.
Will be shown here with special. Doors open at 7.30, starting 8.15.

Women of Canada Testify

Dacono, Ont.—"I am more than pleased with Dr. Pierce's Favorite Prescription. I was run-down and so nervous that I could not even stay in the house alone in the day-time and tried every kind of medicine I heard of but got no result. One of my friends advised me to take 'Favorite Prescription' and it would cure me, and it did. After taking four bottles I felt like a new woman and it is also the very best medicine for a woman bringing up a family. I will recommend 'Favorite Prescription' to any one suffering like I did."—MRS. JOSEPH BEAUDRY, R. R. 2.

WEAK AND NERVOUS
Tillsburg, Ont.—"I found Dr. Pierce's Favorite Prescription an excellent medicine for the ailments of women. I had become very weak and nervous. I was just miserable when I began taking the 'Favorite Prescription' and it proved most beneficial. It so completely restored me to health that I have never had any return of this ailment. I do advise the use of 'Favorite Prescription' by women who suffer with womanly trouble."—MRS. GEO. WALKER, P. O. Box 490.

Dr. Pierce's Favorite Prescription is made of lady's slipper root, black cohosh root, unicorn root, blue cohosh root and Oregon grape root. Dr. Pierce knew, when he first made this standard medicine; that whiskey and morphine were injurious; and so he has always kept them out of his remedies. Women who take this standard remedy know that in Dr. Pierce's Favorite Prescription they are getting a safe woman's tonic so good that druggists everywhere sell it, in liquid or tablet form.

The Mayor of Winnipeg says that the people of that city are tired paying the exorbitant prices asked for apples and the Municipality has decided to purchase a supply direct from the fruit growers and dispose of them to citizens practically at cost.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Buying and Feeding Feeder Sheep.

Success in buying and feeding lambs depends upon the man who buys and feeds them. A year ago I was talking with a feeder who was in the yards looking for some lambs. He told me that he bought a car-load the year before just before they started down. He waited until they struck the bottom and then purchased another load to offset the loss on the first. He didn't like the idea of just breaking even, so he bought a third load and made money on the operations. The profit would have been three times greater had all three loads been bought right.

To have success in feeding sheep the feeder must know how to select his sheep and the best kind to select. He should be acquainted with the market conditions and the different market classes.

The first thing to look for in buying lambs is thrift. If the lambs are very thin, make sure that their condition is due to hunger. The lambs should carry their heads up and their ears alert, and show a bright look in their eyes. They should carry a heavy, compact fleece. Long, loose, shaggy fleeces do not protect the lambs from the cold rains. The best weight is from fifty-five to fifty-eight pounds. In from sixty to ninety days such lambs, if properly handled, will weigh from seventy-five to ninety pounds.

Some people think that the thinner a feeder lamb is, the faster will be the gain. That is a false understanding; don't be misled. The thin ones do not get so quick a start and the loss is likely to be great. The feeder in medium flesh is the one that will win out.

If you are properly equipped and have plenty of time and patience then you may consider buying ewes to carry over. In this case, examine the ewes closely; watch their teeth and their udders. Many ewes have teats clipped off when being shorn. Such ewes should be sorted out if they are to be used as breeders.

If ewes are bought for carrying over, mate them with purebred bucks of the mutton breed. There should be at least one buck for every fifty ewes. The gestation period for ewes varies from 145 to 154 days.

With a large flock it is advisable to "flush" the ewes. This consists in giving an extra allowance of nutritious, highly palatable food for two weeks or so before the desired date of breeding. The ewes will then be rapidly gaining in flesh. Not only is the ewe then more certain to produce a vigorous lamb, but she is a more reliable breeder and more likely to drop twins. Also the flock will all breed within a shorter time if flushed, thus shortening the lambing period with its anxious hours.

Rams should not run with the ewes

all the time, but at night only. To determine whether a ewe has been bred and at what time, the ram should be painted on the brisket so that he will leave his mark on the wool of the ewe.

Suitable feeding troughs should be provided for hay and grain. Light portable racks prove most satisfactory.

Pure drinking water should be supplied in abundance; it is the cheapest part of the ration and often is the most lacking. Each sheep should have from four to six pounds of water daily. Sheep will not take so much unless it is available at all times.

Salt should be kept before them constantly, for an irregular supply induces scours. For the first two or three days they should not be allowed all the salt they will take, but at first it should be dissolved in water and the brine sprinkled on their hay.

There are several precautions to observe in shipping sheep and starting them on feed.

If the sheep have lice or ticks they should be dipped before they leave the yards. They should not be shipped the day they are dipped, as the cold night air fanning on them will develop colds and a loss will result. Feed them hay and allow them to rest in the yards overnight. Give them plenty of fresh water. They will then be in better condition to ship.

When driving sheep from the local yards to the farm let them take their time and eat along the roadside. They will not overeat if they are driven slowly. They will be very thirsty and should not be allowed to drink all they want until the second day. The first night they should be kept in a yard and fed clover or alfalfa hay. The next morning after they have had another feed of hay, turn them out to graze for three or four hours. If they are to be fed in a dry lot, start the grain the second day and increase it gradually. Feed twenty pounds of corn, thirty pounds of silage and 1.5 pounds of clover or alfalfa hay a head a day. Gradually increase their feed and in two or three weeks have them on full feed. If the feeding period is to be short, get them on full feed in about two weeks. Sheep have a better appetite on a bright clear day so it is best to make increases in feed on such a day.

Keep the feed troughs and the lots clean and fresh. When sheep are fed in dry lot they should be fed at the same hour each day. Feed twice each day, once in the early morning and again in the cool of the evening. If you have the range for the sheep it is more economical to let them gather a part of their roughage. If they get off feed, reduce the grain part of the ration.

Do not allow dogs nor strangers to enter the pens or frighten the sheep; for they will lose weight if frightened.

Financial Notes

Tenders are being called up to Sept. 21st on a \$3,000,000 bond issue of the Province of Saskatchewan. The announcement presents two alternatives; the first request is on the \$3,000,000 6 per cent. 10-year bonds, dated Sept. 1st or Oct. 1st, 1920 at the option of the purchaser, the principal and interest payable in Regina, Toronto, Montreal and New York. At the same time alternative bids are asked on \$3,000,000 6 per cent. 20-year debentures dated optionally as in the previous instance, and the principal and interest payable in Regina, Toronto and Montreal.

The success of certain Ontario municipalities in the marketing of their debentures "over the counter" to their own people, is attracting a good deal of attention throughout Canada. The latest city to come into this category is Brantford, reported to have sold over a half a million debentures to its citizens, since the first of the year. Others of the smaller Ontario towns and cities have also been trying out this method of interim financing and have found it to work out well.

While this method of financing will not likely do for the big issues, which can best be placed through firms with wide organization, it has been found satisfactory for odd lots and small blocks placed in between the bigger issues.

The Shawinigan Water and Power Company have now under construction at Shawinigan Falls, extension to plant that will cost over \$3,000,000 and take some two years to complete.

It is the purpose of the company to considerably augment the 333,700 h.p. electrical and hydraulic development now being generated at Shawinigan Falls and the Laurentide Company. Present plans take into consideration the eventual adding of 310,000 h.p., with 100,000 h.p. at Shawinigan as the first step; 60,000 h.p. at Laurentide as the second unit; and later, 150,000 h.p. at Gres Falls. Present demand for power is expected to readily absorb projected increases in plant.

A Long Distance Layer.

As a rule, hens lay two or three eggs and then miss a day. Some good hens will lay more before they take a day off and we have known individual hens to lay five and six dozen eggs and not miss a day, but a record in long distance laying without a miss has, as far as we know, been established by the Experimental Farm, Poultry Division at their Kentville, N. S. Station, where a Barred Plymouth Rock pullet laid 104 eggs in 104 days.

This Barred Rock whose leg band No. is 63, did not start to lay very early. In fact her first egg was laid on the 25th of January. She laid two eggs and missed a day, laid five eggs and missed a day, four eggs and missed a day, one egg and a miss, then two eggs, but on the 13th of February she got down to business and laid every day for the rest of the month, every day in March, every day in April, and every day in May up to the 27th when she took two days off. After this time she took an occasional day off until the 20th of June when she became broody. When she went broody her total record was 136 eggs in 147 days.

Cord or Fabric.

Chance never drew a neat picture nor built a fair house.

In the making of Partridge Tires nothing is left to chance—detail perfection is secured by craftsmanship scientifically directed, and rigid inspection insures outstanding quality.

Partridge Tires are all that good Tires can possibly be.

PARTRIDGE TIRES

Game as Their Name

THE SUNDAY SCHOOL

LESSON I.—OCTOBER 3.

Birth and Childhood of Jesus, St. Matthew 1 and 2. Golden Text, Matt. 1: 21.

1: 1-17. The Book of the Generation. The author of the gospel set himself the task, which seemed to him exceedingly interesting and important, of tracing the ancestry of Jesus back to Abraham, the founder of the Hebrew race. This was made possible by the family lists and records which had been carefully preserved by many families, especially after the Babylonian exile. These, it seems, did not always agree. In the Gospel of Luke (3: 23-28) there is another and independent list. Matthew makes only nine generations between Zerubbabel and Joseph, but Luke has seventeen. Many of the names are different. The matter is not one of great importance to us and need not occupy our time. Both evangelists intend to show the descent of Joseph from David. Wesley, in his Notes on the New Testament, referring to the differences, says that "The difficulties rather affect the Jewish tables than the credit of the evangelists."

2: 1-15. The Child of Bethlehem. Herod, commonly known as "Herod the Great," was king under the Roman sovereignty from B.C. 37 to B.C. 4. It is quite evident, therefore, that our Christian era has been made to begin several years too late. Jesus must have been born in B.C. 5 or 6. Herod was an able but unscrupulous man,

who was guilty of many crimes. His wife, the beautiful Mariamne, was a descendant of the Asmonaeans kings. She and two of Herod's sons were murdered by him. The man who could commit such brutal crimes in his own household might well have been guilty of the murder of the Bethlehem children. The teacher should consult Matthew's History of New Testament Times in Palestine, or Riggs' History of the Jewish People in the Maccabean and Roman Periods, for an account of Herod's reign.

"Wise Men." Just who they were and from what country they came we do not know. The wise men, or magi, of Persia are mentioned by Greek writers, and the Chaldean wise men, in the Book of Daniel. An early Christian tradition represented them as kings, and regarded their coming as a fulfillment of the prophecy of Psalm 72: 10-15. Herod was troubled when he heard of their coming, for he knew that the expectation of a great King and Saviour, which was based upon ancient prophecy, was cherished by many of the people, and he feared that this might mean the end of his own kingdom. He had come to the throne and had held it by fraud and violence, and his guilty conscience may have been stirred by dread of a coming judgment.

"Into Egypt." The words of Hosea quoted in verse 15 in the original passage referred backward to the deliverance from Egypt (Hos. 11: 1). Here, by a curious change of direction, they are made to look forward to Christ.

"See? There isn't even a tiny bit of Lantic left at the bottom of the cup! Every crystal dissolved immediately—So OF COURSE it takes less!"

Lantic "Fine" Sugar brings concentrated sweetness to all beverages (hot or cold)—

because it's fine!

buy Lantic in original packages—2 & 5 lb. cartons 10, 20 & 100 lb. bags

Poultry

Of all domesticated poultry, turkeys are probably the most difficult to rear. From the time they are hatched, up to that period of their life when the red shoots into the head, they are more or less delicate, and must receive special attention. After that they are probably the most rugged of all fowls.

The turkey chick has a very small crop and should be fed every two hours for the first week. For the first three or four days hard-boiled eggs, mixed with bread crumbs or coarse oatmeal, can be given; but after that period the egg part may be dropped from the diet, although it generally is advisable to continue feeding it for a week, at least. Onions are highly relished and they are very good for the poults. The onions should be chopped up fine and kept constantly before the poults. Meat is another essential, as well as green food, of which tender lettuce is best.

A gobbler may be mated to ten hens. Pulletts in their first year should be mated to a male in its second year, while hens over a year old are best mated to a vigorous cockerel. The turkey cock reaches maturity after the molt in its third year, and from then on is not reliable as a stock bird.

The hen prefers choosing her own nesting place, and usually where she lays her first egg she will drop all succeeding ones. After laying from fifteen to twenty eggs she generally becomes broody.

Interbreeding must be avoided. Nothing will claim more weak and ill-conditioned stock than close relationship, and the offspring naturally become prey to disease.

There must be strict cleanliness—clean roosting places, clean feed, and pure, clean drinking water. The young must be kept out of the rain; a sudden shower is generally fatal to them.

Smut takes large toll from the wheat crop every year. Be forehanded and prevent this loss by sprinkling on the cleaned seed a solution made by adding one pound of formalin to forty gallons of water. Use about one gallon of the solution for each bushel of seed. Get every kernel wet. Cover the grain with a blanket for several hours, then uncover and stir occasionally until it is dry, when it is ready for seeding.

Hogs

My neighbor asked me once to look at his pigs. I was about to step into the pen when he cautioned me: "Better take a stick with you, the sow is pretty cross."

This I found to be exactly true. The mother sow was in no humor to tolerate visitors. I soon saw that I would enter her pen at the risk of my life. As a natural consequence I kept out.

I have often contrasted the wildness of my neighbor's sows with the gentleness of my own. I am fully convinced that it pays to have gentle sows. At farrowing time I have no difficulty in caring for my sows; they do not mind in the least if I handle their pigs. As a result, I do not have to fight with the sows to get them to do as I wish. I do not need to go armed with a club; my sows have no fear of me and I have no fear of them.

A tame sow will look after her pigs much better than one that is wild. Because of her fear, the wild animal imagines danger to her young ones. As a result she frets and worries and uses up vital energy. Her pigs acquire the same fear and are hard to manage. Naturally they are harder to confine and invariably strive to break through the fences. The pigs from tame sows grow up tame, as a rule, and give a great deal less annoyance with respect to fences. In addition to all this, a tame hog fattens more easily than a wild one.

Queen Victoria visited Ireland on four occasions. In 1849 she landed at the "Cove of Cork" which was renamed "Queenstown" in honor of her visit.

Perhaps the most vital reason for using agriculture in the education of the country child is that it is in strict accordance with that recognized principle of educational psychology which demands that education should be built upon past experience. If this be accepted the daily experience of the farmyard and the farm home will furnish the groundwork of the teaching in the rural school; it will be the common stock from which other subjects grow, and the extent to which they grow will be limited only by the age and capacity of the pupil and the interest and the enthusiasm of the teacher.

HIGH COST OF LIVING APPEARS ON DOWN GRADE IN UNITED STATES

Two of Largest Mail Order Firms in the World Announce Reduction—Authorities Believe Peak of Prices Has Been Passed.

A despatch from New York says:—Business men are wondering if Henry Ford started something to bring down prices, or whether he made his celebrated "slashing" announcement at the most dramatic time. Reports gathered here indicate that a good many more articles besides Ford motor cars are coming down.

General belief that the peak of high prices has been passed and that the direction of the curve is now downward was expressed by businessmen in many cities of this country.

The H. H. Franklin Manufacturing Co., makers of the Franklin automobile, was the first of Mr. Ford's competitors to follow his lead, and announced cuts in the price of its cars from 17 to 21 per cent.

Two of the largest mail order houses in the world, Sears, Roebuck & Co., and Montgomery, Ward & Co., both of Chicago, announced substantial reductions in many lines of merchandise. The list included men's and women's clothing, shoes, furniture and a few staple foodstuffs.

How soon the consumer might expect to benefit directly and the high cost of living cut to the average citizen was a matter of speculation. There was a general agreement that the consumer would benefit eventually, but could not expect to get the full advantage of the wholesale reductions at once.

The consumer was expected to benefit first in lower prices for clothing and other manufactures of textiles, as the reductions in the textile trades have been more marked than in any other. Lower clothing prices are not looked for until next spring. In other manufactured textile goods further retail reductions may be looked for earlier.

Despatches from the larger cities of the country showed that substantial retail price reductions had taken place or were expected, the tendency toward lower prices having been in effect in some cities for several months, because of an increasing tendency on the part of the public to refuse to buy anything but necessities.

DELEGATES TO THE NINTH CONGRESS OF CHAMBERS OF COMMERCE OF THE EMPIRE IN TORONTO
Group of the British delegates taken on lawn at Queen's Hotel, Toronto. From left to right: Mr. Chas. F. Selfe, Aldershot; Mr. Chas. E. Musgrave, London, Honorary Secretary and Convenor of the Congress; Mr. Stanley Machin, J.P., London; Lord Desborough, K.C.V.O., London; Mr. Albert J. Hobson, J.P., L.L.D., Sheffield, Vice-Chairman of the Congress; Mr. E. J. Bruce, J.P., Huddersfield; Mr. Arthur H. Smith, President of the Aldershot Chamber of Commerce; Mr. J. A. Darraott, Aldershot.

Canada From Coast to Coast

Vancouver, B.C.—S. Johnson, a Wyoming rancher, who runs 16,000 head of cattle on his home ranch, has purchased 730 acres on Annacis Island, in the Fraser River, and proposes breeding pure bred Holsteins. He paid \$520 a head for the initial herd. A Manitoba farmer, H. House, who went to Australia some years ago, has returned to this province and bought a forty-acre ranch at Milner, convinced that Western Canada ensures greater future prosperity for him.

Calgary, Alta.—A manufacturing business which promises considerable developments has just been established in this city for manufacture of hats and caps. All classes of hats for both men and women are manufactured and business has prospects of becoming a flourishing industry.

Regina, Sask.—"The field of the cloth of gold" is how one delegate of the Imperial Press Conference describes Western Canada, moved with enthusiasm over the rich golden prairies of the western provinces. All were deeply impressed with the indications of agricultural wealth in the vast granary of the world.

Winnipeg, Man.—The investment of a large amount of American capital in Western Canada is expected from the reports of members of the special farmers' touring car which travelled from here to Prince Rupert. The train to which this car was attached bore about 150 land seekers and tourists from North and South Dakota, and all were favorably impressed and contemplated heavy investment.

Toronto, Ont.—Beet sugar acreage

in Canada in 1919 was 24,500 and the average yield an acre 9.80 tons, compared with 18,000 acres and an average yield of more than 11 tons in 1918. The 1918 crop of 204,117 tons sold at the factories for \$2,593,715, or \$12.22 a ton.

Montreal, Que.—The Canadian Pacific Ocean Services announce that their new steamer, the "Empress of Canada," was launched in England on August 17th. She is the speediest and largest vessel in the C.P.O.S. fleet. The big liner is scheduled to make a tour of the world before taking up her regular run on the Pacific route. Her speed is 22 knots.

St. John, N.B.—The Cuban Consul, St. John, announces that he is in receipt of advice from the Cuban Consul General at Ottawa that the Gulf Navigation Co. of New Orleans has inaugurated a steamship service between Canada and Cuba. The head office for Canada will be in Toronto. The first steamer to be placed in the service, the S.S. "Gonzaba," 2,500 tons, recently launched from the Dominion Shipbuilding Co.'s yards, is now in Cuba. The regular ports of call will be Toronto, Montreal, St. John, Halifax, and Cuban ports, with Halifax and St. John as the Canadian terminals in the winter months.

Dartmouth, N.S.—The Imperial Oil Company, whose daily output of oil is 16,000 barrels, are making such additions to their plant as will enable them to increase their output to 23,000 barrels. The Oil Company is ordering entirely new machinery throughout, and sufficient tank material for storage purposes.

America Expected to Make Up German Crop Shortage

A despatch from Berlin says:—Two million tons of breadstuffs must be imported by Germany, chiefly from America, as the 1920 crop will be considerably short of the country's requirements, says an announcement by the president of the Imperial Grain Department.

The rye crop has been a disappointment and this year's harvest of breadstuffs is calculated to yield only 7,000,000 tons, while land devoted to breadstuff production has diminished more than 7 per cent.

Germany Pays Cost of Occupation

A despatch from Paris says:—Frederic Francois-Marsal, the Finance Minister, replying to a question submitted to him by a member of the Senate, said that the expenses incurred through the Rhine occupation were estimated at the end of March to have reached 18,000,000,000 fr. The amount paid by Germany on account was 13,088,000,000 marks at the end of July, the equivalent of 402,000,000 francs, M. Marsal added.

Weekly Market Report

Wholesale Grain.
Toronto, Sept. 28.—Manitoba wheat—No. 1 Northern, \$2.73 1/4; No. 2 Northern, \$2.70 1/4; No. 3 Northern, \$2.65 1/4; No. 4 wheat, \$2.49 1/4, in store Fort William.
Manitoba oats—No. 2 CW, 77c; No. 3 CW, 76c; extra No. 1 feed, 75c; No. 1 feed, 75c; No. 2 feed, 69c; in store Fort William.

Many Former Russian Nobles Work to Earn Living

A despatch from Paris says:—Many of the Russian nobility who fled from Bolshevism to France now meet its chief requirement, that all must work with their hands that they may eat.

The roster of deposed royalty is long, but every few days there comes to public knowledge the situation of another Russian person of prominence whom adversity has not conquered.

A large dairy farm has been established near Paris by Count Paul Ignatieff, where members of that family and some of their noble friends are reconstructing another fortune.

The Duke of Leuchtenberg-Beauharnais is farming near Tours. The Prince Lyszczyński is a bank clerk. Prince's Mestcherky and a number of others are commercializing their knowledge of art, doing interior decorating. Prince Goudacheff, once Russian Ambassador to Spain, is a farmer. Gen. Nicolajeff drives a truck and many Russian officers are mechanics and some are taxicab chauffeurs.

PREMIER'S APPEAL REJECTED BY MINERS

Government Proposals for Independent Tribunal Are Turned Down.

A despatch from London says:—Premier Lloyd George made another appeal on Thursday to the miners to accept the Government's proposal and refer the question of an increase in wages to an independent tribunal, or, as an alternative, to meet the owners and agree upon a scheme increasing the output, which the Government believes would give the miners more wages than they are demanding.

But the Premier's appeal was futile. The miners insisted that their demands for a two shillings increase should be granted immediately, and passed a resolution refusing to withdraw the strike notices, which expire Saturday.

Thus, unless the Government retracts within the next forty-eight hours the miners will, after the last shift on Saturday, lay down their tools, and the mines will be idle Monday.

At a meeting of the miners' representatives during the day, Robert Smillie reported on the position taken up by the Premier and his offer. He said the committee could not recommend the acceptance of either of the Government's proposals. A lengthy discussion ensued as to whether the Government's proposal to submit the question of wages to an impartial tribunal should be referred back to the districts and a vote taken.

Mr. Smillie, as president, submitted a resolution to do this, but on a card vote it was decided that nothing had happened that required such reference back. Telegrams were sent to the various districts, calling on all workers necessary for the maintenance of the pumping and coking plants and other machinery and the care of the horses to continue working until further notice.

CANADIAN WHEAT BEING SHIPPED

Western Farmers Are Rushing Grain to Lakes Before Navigation Closes.

A despatch from Ottawa says:—So far as officials of the Department of Railways have been informed, the movement of grain over the railway lines on the prairies is progressing satisfactorily. There is known to be an immense demand for wheat cars now that thrashing is well under way, this demand arising from the fact that all the farmers who have finished their thrashing are attempting to get their grain down to the head of the lakes before the close of navigation. However, every effort was made before the opening of the grain movement to marshal a supply of grain cars at Western points, and there are, it is thought, still considerable cars on hand. It is pointed out, however, that complaints of car shortage on any of the various lines serving the wheat-growing districts would be handled by the Canadian Railway Association, and these matters would not come before the Railway Department to any extent.

Supply of Canadian Shoes Greater Than Demand

A despatch from Montreal says:—The Canadian demand for shoes has been satisfied, and the warehouses are filled up with all styles and grades

Heads Soldier Settlement Board.
Major John Barnett, who has just been appointed Chairman of the Soldier Settlement Board in Canada in succession to Mr. W. J. Black, who has become an organizer for the National Liberal-Conservative party in Ontario. He was overseas with the 50th Battalion and was wounded at the front. Since returning home he has been general counsel for the S.S.B. in the West, with headquarters at Calgary.

New President of France
Premier Alexandre Millerand, who succeeds M. Deschanel as President of the French Republic.

Deliveries of German Coal Proceeding Satisfactorily

A despatch from Paris says:—Coal, coke and lignite to the total of 1,975,000 tons was despatched by Germany to France, Italy, Belgium and Luxembourg during the month of August, according to official information issued by the Reparation Commission. Four-fifths of the amount was allocated to France and about equal shares of the remainder to Italy and Belgium, except for 90,000 tons, which went to Luxembourg.

Sixty-three per cent. of the fuel despatched was coal, 29 per cent. coke and the remaining 8 per cent. lignite.

A detailed programme for the delivery of 2,000,000 tons of fuel during September, in accordance with the Spa protocol, has been fixed, and deliveries are proceeding satisfactorily.

"REG'LAR FELLERS"—By Gene Byrnes

Take a KODAK with you

Your speedometer tells you how far you went—a Kodak tells you where you went and what you saw. The pleasure of the trip can never fade with clean-cut Kodak pictures to refresh a laggard memory.

Better take along a generous supply of film. We have a complete assortment, autographic and non-autographic, and it is all kept under proper conditions.

Twilight Soliloquizing

A young married man sat in the twilight soliloquizing, and these were his words:

"Backward, turn backward, oh time in thy flight, feed me on gruel again just for to-night; I am so weary of sole-leather steak, petrified doughnuts and vulcanized cake; oysters that sleep in a watery bath, and butter as strong as Goliath of Gath; weary of praying for what I can't eat, chewing rubber and calling it meat. Backward, turn backward, for weary I am! Give me a whack at my grandmother's jam; let me drink milk that has never been skimmed; let me eat butter whose hair has been trimmed; let me once more have an old-fashioned pie, and then I'll be willing to curl up and die."

Shingles. We are unloading a car of XXXX Arrow Brand B. C. Shingles and if you are in need of any you will be wise to place your order with us at once, as they are likely to go higher in price on account of the increased freight rates. Geo. Schwalm & Son.

Satisfactory dealing guaranteed.

LIVE STOCK MARKETS TORONTO.

With around 4000 cattle on sale yesterday, the demand was weak for all classes excepting choice steers and heifers and heavy finished steers. We would quote the market 80c to 75c off from last week's close.

The trade for feeding cattle was slow, owing to the dry weather. For milch cows and springers there was a good trade for the better class.

The bull market was dull, but choice choice butcher bulls would sell. The outlook is not too good, excepting for choice cattle showing weight and quality. Quite a large percentage of the receipts were left unsold.

The run of sheep and lambs was exceptionally heavy, more than 8000 head all told. In view of the heavy offering the market held fairly steady from 13 1/2c to 14c, and one bunch at 14 1/2c. The sheep market ran around from 7c to 8c a pound. The calf trade was little affected by the decline in cattle, selling around 19c.

The hog market was unsettled, packers in some cases quoting 19 1/2c and 20 1/2c fed and watered, with the commission houses holding out for the 19 1/2c and 20 1/2c.

Farm For Sale

Two Hundred Acres, consisting of Lots 19 and 20, Con. 8, Kinloss. 7 miles from Lucknow and 2 miles from Holyrood. 20 acres hardwood bush, 140 acres excellent workable land. Good bank barn, concrete stabling. Comfortable frame house. Drilled well and never failing spring creek. Will be sold at a very reasonable price, and on easy terms. Owner is unwell. Apply to John Robb, R. R. 4, Holyrood, or J. A. Johnston, Mildmay.

A Real Man.

A real man never talks about what the world owes him, the happiness he deserves, the chances he ought by right to have, and all that. All he claims is this: right to live and play the man.

A real man is just as honest alone in the dark of his own room as he is in public.

A real man does not want pulls, tips or favors. He wants work and honest wages.

A real man is loyal to his friend and guards his reputation as his own.

A real man is dependable. His simple word is as good as his oath.

A real man does a little more than he promises.

A real man does not want something for nothing, so the get-rich-quick people cannot use him.

A real man honors a woman, any woman. He cannot hurt a woman, physically or morally. He sticks to his wife. He can be loyal even if love is impossible. He is patient and charitable to them: to himself he is strict.

Vegetables For Medicine

Watercress is an excellent blood purifier.

Lettuce has a soothing effect on the nerves and is excellent for sufferers from insomnia.

Tomatoes are good for a torpid liver, but should be avoided by gouty people. Celery and onions are nerve tonic.

Spinach has great aperient qualities and is better than medicine for constipation.

Beets are fattening and good for people who want to put on flesh, so are potatoes.

Parsnips possess the same virtues as sarsaparilla.

ADDITIONAL LOCALS.

Mrs. Jane Carnegie of Walkerton has purchased a farm near Cargill, and with her son, Archie Paulds, will move to the place in the spring.

Miss Frieda Dippel, of Walkerton, who is to be married shortly to Mr. R. Trench of Teeswater, was given a china shower on Friday night.

Raymond Young met with a painful accident last Monday while loading logs in Schwalm's bush; one of the logs rolled on to his foot, and he is now suffering with a sprained ankle and injured foot.

Mrs. G. McDonald of Strathcona, Alta., daughter of Mrs. N. Vollick of Mildmay, has been sick for several months with throat trouble. Several operations have been performed but her condition is not much improved.

George Illerbrunn, of Deemerton, is home on a visit from Kitchener, where he has been working in the Dominion tire factory. He was laid off by that Company, but will start working in the sugar factory next Monday.

Jos. Hundt, who has been working in the Dominion Tire Factory at Kitchener is home on a visit. He says the firm has cut their employee's time down to 30 hours per week, so he decided to lay off for a time. Joe says he used to put in nearly as many hours as that in one day when he worked a farm in Carrick.

Helwig's Weekly Store News...

Northway Garments Style Information Fall 1920

Suit coats are no longer in accord with the prevailing idea as to smartness. The coat is the chief feature, skirts being fairly plain with novelty pockets and belts. Pin tucks and silk braid and buttons are principally used for trimming. The collars are mostly of the convertible type.

Skirts are all made on slender graceful lines with a tendency to be fuller and relying somewhat on pleats to dispose of the width. Plaids promise to be much in vogue.

Dresses are given their style character in many cases by the simple lines of a drop waist line known as the sweater effect. For tailored styles full length sleeves will dominate. The three quarter sleeve which usually flares at the elbow will be shown in dresses for afternoon wear. Sash effects and pleated skirts are likely to be popular. The materials mostly used are satin, taffeta, wool tricotine and serge, with lace collars, embroidery and braid for trimming.

Coats may be worn belted or loose. One of the most prominent features will be an extremely large cape collar. Silk twist stitching, furs and fur fabrics will be largely used for trimming. Owing to the prohibitive price of furs, plush and other fur fabrics, made in three-quarter length coats after leading fur models, are likely to be much in demand. Very large collars will top these elegant appearing coats and when worn open cling close to the shoulders giving a slender drooping shoulder line.
