CHOP STUFF

Attend Theford Fair Sept. 28-29. It's always good. s7-3t

Alvinston tax rate this year is 85 mills. This is 2 mills higher than last year.

Dunwich council has appointed Bert McCallum collector at a salary of \$125.

Mrs. W. G. Jenny, 2nd con., Bosanquet, had the misfortune to get a needle broken off in her hand some time ago. Medical aid was required to extract the piece and later the hand became swollen and very painful. The trouble is now overcome and the hand will soon be alright again.

During the heavy electrical storm Mrs. Jas. Campbell of Thamesville, was injured when lightning entered her home. Mrs. Campbell was using an electric iron at the time and the bolt came through the wire connected with the iron. One side of her body was rendered partly useless for a few days.

Quick thinking by Mrs. Manley Miner, of Kingsville, saved her from being robbed of her jewelry when two highwaymen attempted to hold up a car in which she and her husband were driving near Jackson's Corners. Mrs. Miner steered the car into a ditch to pass the bandits' car which was drawn across the road.

Fred Wray, Corunna, paid a fine of \$1 and costs \$5 into the Sarnia police court coffers recently when a conviction was registered on a charge of operating an automobile with an illegal marker. Police said the marker was made of paper and that the owner of the car had advised the police of the loss of the legal marker and had been advised that it would be all right to operate for a few days until a new one could be secured but that the few days had stretched out to nearly a month.

Several very violent thunder storms occurred recently in Wyoming. Several houses were struck but fortunately no serious damage was done. The hydro lights were disarranged and plaster broken in the home of Mr. Geo. Borrowman. The home of Mr. Case and also of Mr. J. Crabb were also struck. Several persons received slight shocks. One afternoon a very heavy hail storm came and some damage done to plants and windows. The home of Mr. Jas. Fraser had thirteen panes of glass shattered.

The death of nine young cattle on the farm of W. L. Moore of Shedden last spring, has been investigated at the Dominion Government laboratory in Ottawa, and is believed to have been due to the water they had been drinking, which was stagnant and highly charged with organic matter. The cattle were pasturing in a sweet clover field and it was suggested at the time that the clover might have caused the deaths. The cattle were found wandering around the field, frothing at the mouth. They died within a few hours.

Lightning struck Herbert Richardson's barn on the Charles Sellers old farm, in Malden, on the 2nd of Sept., and set fire to the place, consuming the horse and cow stable and general barn, all of which were under the one roof. In addition the season's crop of grain and hay were burned, together with some pigs and chickens. Neighbors who were alarmed by telephone soon gathered and assisted Mr. Richardson to save some implements, wagon and harness. Shifting of the wind saved the house and the implement shed.

Probably the oldest pioneer resident of Plympton passed away on Friday, 8th inst., in the person of Jane Lang, relict of the late John Cairns, who died at the home of her son, Jas. L. Cairns, 12th line, after a long illness. She was born in Glasgow, Scotland, Oct. 13th, 1828, and came to Canada in early girlhood. She married Mr. Cairns in 1847, and spent 75 years of her long life on the farm here. Mr. Cairns died in January, 1898. She is survived by one son and one daughter, Jas. L. Cairns, Plympton, and Mrs. Harry Smith, Victoria, B.C. The funeral was held on Sunday afternoon, at the McKay cemetery, the service being held in the McKay church, by the Rev. John Murray, of Forest. The bearers were Newton Cairns, Alex. Andrew and Jos. Lang; Sherman McRoberts and Sherman Symington. An unusually large gathering of relatives and friends were in attendance many being present from Detroit, Grand Rapids, Port Huron, Sarnia, Petrolia and other places.

NOTE AND COMMENT

Now we'll see what the provincial fuel controller can do to prevent price extortion.

M. Clemenceau warns the United States that he will attend none of their banquets. He can get no French wine there.

About the saddest plight we can imagine these days is to have a blowout and a minister riding in a car.—Simcoe Reformer.

The first carefully prepared advertisement was the Rainbow, announcing that the flood was over. It was printed in colors.

The difference between an evil person and a flapper is that the evil flees when no man persueth and the flapper stands her ground.

Alberta is said to have many millions tons of coal. If we had a few tons of it in our bin it would give us more satisfaction than owning twice the amount in the Rockies.

County Councils have now received the same power as the Provincial Minister of Public Works, to appropriate land for the purpose of opening up, altering or widening county or provincial county roads.

The London Advertiser will change hands on October 1st, having been purchased by Wilberforce Hermon, owner of the Border City Star and other newspapers. Changes are predicted in the most unexpected executive positions.

Church union is no doubt very desirable, but the outlook for its consummation does not seem to have improved much recently. This was one of the burning questions it was predicted the war would help to settle, but the prophecy remains unfulfilled.

Some of the Doukhobors are traveling around in British Columbia without a hanged thing on them, and people are shocked. The only chance for the Douks to get away with that form of parading is to invade the art galleries.

Vancouver Province:—The German Government has ordered the withdrawal of postage stamps bearing symbols of the old regime. The mail-clad figure of Germania has been pierced in so many places that she is now only a tattered remnant of her former haughty self.

If the Justice Department of Quebec believes the Abbe Delorme to be insane, and therefore incapable of standing trial for murder, it should lock him up securely where he will not be able to make a nuisance of himself by writing letters about the failure of justice in his case.

Barely does this newspaper go in for style predictions, observes the Kansas City Star, but it seems likely that, unless the anthracite miners get to digging coal pretty soon, there's going to be an awful rage in old-fashioned flannel night-gowns along about the last of November.

Guelph Herald: The glorious months of September and October are upon us and from a climatic standpoint autumn is invariably Canada's crowning glory. The bright sunshine and crisp air stimulates the average Canadian to be proud that the hot summer days are over and the beautiful days of autumn are upon us.

Woodstock Sentinel-Review:—Some esteemed contemporaries are hurrahing for the old box-stove, the buck-saw and the woodpile. Yes, but where are they? In Ontario we have allowed ourselves to contract the anthracite habit, and it would mean a painful wrench to break away from it. The coal men, however, are doing their best to cure us of the habit. Perhaps in time they will succeed. But the box-stove has probably gone to join the candle-mold and the hand-loom.

Waterford's third pool room will be opened on Saturday by Mr. H.R. Colver who will have two pool tables and a snooker table. The room is above the newly fitted-up confectionery store and ice cream parlor and is modern in every way. Many people object to pool rooms but the main objection can only be what the name implies. In each of our three pool rooms there are lady attendants who serve ice cream and soft drinks when desired and are an assurance of the elimination of any semblance of rough house or vulgarness.—Waterford Star.

Saskatoon Star:—Obviously the lessons of the Dardanelles rankles in the mind of strategists. The strait is relatively unimportant so long as Russia is blockaded. If the only aim is to preserve the neutrality of the zone it does not seem that Canadian troops will be needed. If the allies are planning a war of aggression against the Mohammedan world, Canada might well wait until the 1,000,000 unemployed men in Great Britain are absorbed into military service before launching her own men against a front 6,000 miles away. Canada is ready to bear her share of the empire's burdens, but that does not mean that she is willing to provide a Cook's tour for shiploads of ardent militarists every time a strategic point at the ends of the earth is threatened.

A CONCESSION TO HOME INVESTORS

In offering to renew the five and a-half per cent. Canadian Government bonds maturing December 1st at the same rate of interest as is carried by the maturing bonds, and allowing a bonus of one month's interest, the Minister of Finance is making a material concession to the Canadian investor, as this rate is higher than was paid on the recent Canadian loan in New York. The high class of the security, which is the very best that can be offered in Canada, and the liberal rate of interest should lead to large investment in these Dominion bonds. Attention is directed to the official advertisement giving details.

Everyone reads the "Guide-Advocate Want Column" on page 4.

PALE AND SICKLY GIRLS AND BOYS

Need All the Strength That Rich, Red Blood Can Give Them. Youth is the time to lay the foundation for health. Every girl and every boy should have plenty of pure, red blood and strong nerves. With thin, impure blood they start life with a handicap too great to win success and happiness. Rich, red blood means health, full growth, strong nerves, a clear brain and good digestion. In a word pure blood is the foundation of health.

The signs of weak, watery blood are unmistakable. The pale, irritable girl or boy, who has no appetite or ambition, is always tired out, short of breath and does not grow strong, is a victim of anaemia—the greatest enemy of youth. There is just one thing to do for these girls and boys—build up the blood with Dr. Williams' Pink Pills. You can't afford to experiment with other remedies, for there must be no guess work in the treatment of anaemia. Dr. Williams' Pink Pills act directly on the blood, giving it the elements it lacks, thus developing strong, healthy girls and boys. Mrs. R. Kinch, Hepworth, Ont., tells as follows what these pills did for her daughter:—"I think it a duty to let others know the benefit which Dr. Williams' Pink Pills have been to my daughter, and I hope this may be the means of inducing some other sufferer to try them. She was weak, nervous and badly run down. She took medicine from the doctor but got no benefit, and finally she was not able to walk to school. I was advised to give her Dr. Williams' Pink Pills, which I did, and after taking them for a time she was restored to perfect health. I cannot speak too highly of these pills."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh. m

Keep Money Working

You wouldn't keep a strong, healthy horse in the stable "eating its head off" and doing no work. That wouldn't be profitable.

Then why keep surplus money idle about the house when it could be earning interest in a Sterling Bank Savings Account. In addition to being absolutely safe and profitable, it gives you the benefit of Sterling Bank Service in financial matters as well.

THE STERLING BANK OF CANADA

DOMINION OF CANADA VICTORY LOAN BONDS

MATURING 1ST DECEMBER, 1922.

THE BANK OF MONTREAL, under authority of the Minister of Finance, is prepared to effect, without charge, exchange of the above bonds for

5 year 5 1/2% Bonds
Maturing 1st November, 1927,
OR
10 year 5 1/2% Bonds
Maturing 1st November, 1932.

FULL PARTICULARS are obtainable upon application to any branch of the Bank of Montreal in Canada.

To Holders of Five Year 5 1/2 per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5 1/2 per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmaturing coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

SARNIA PRESBYTERIAL W.M.S.

The autumn meeting of the Executive committee of Sarnia Presbyterian W. M. S. was held in St. Andrew's church, Sarnia, on Monday with a good attendance and was conducted by the President, Mrs. Aitken of Centre Road. After Devotional service a number of items of business were brought forward. Mrs. Dawson of Parkhill sent in her resignation as 4th Vice Pres., and Miss Margaret McLeay of Watford was appointed to the office. Mrs. McDougall, Strathroy, was appointed Mission Band Secretary, Mrs. Cameron of Forest, having resigned. The Auxiliaries are urged to observe W.M.S. Sunday and bring the work before the congregations and to use every effort to wipe out the deficit that is facing the society. The splendid gift of an organ to one of the Home Mission Fields was made by Mrs. McCrae, Sarnia. Miss Margaret McPhail, Alvinston, was the representative at the Summer School, St. Thomas.

Next Meeting 2nd Monday in January.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

KEEP CHILDREN HEALTHY

To keep children healthy the bowels must be kept regular and the stomach sweet. Nine-tenths of the ailments which afflict little ones are caused by derangements of the bowels and stomach. No other medicine can equal Baby's Own Tablets in guarding either the baby or growing child from the ills that follow a disordered condition of the bowels or stomach. They are a mild but thorough laxative and never fail to give results. Concerning them Mrs. W. B. Coolidge, Sarnia, Ont., says: "I have used Baby's Own Tablets for over three years and have found them the best medicine I have ever used for my children. I never have any trouble giving them to my little ones and they have saved me many a doctor's bill. My advice to all mothers of little ones is to keep a box of the Tablets in the house."

The Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

CATARRH

Catarrh is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the system, HALL'S CATARRH MEDICINE restores normal condition and allows Nature to do its work. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Happy Thought Ranges Make Happy Homes

You—the woman with a family—know what it means to have a range that is so easy to regulate, that is a good cooker and a dependable baker. There is no single fixture in your entire house that is as important as your range. Every woman who does her own cooking knows what it means to have even heat and plenty of room in the oven. She realizes what a large cooking surface means and the benefits of regulators and little labor-saving attachments. Three hundred thousand Canadian women know the dependability of Happy Thought ranges from actual every-day experience. They have found them consistent and satisfactory, economical in fuel and easy to operate.

ITEMS OF MORE THAN PASSING INTEREST

The Ontario Agricultural College will resume for the fall and winter session on the 29th of September.

The coal famine emphasizes the importance of the farmer's woodlot. The supply must be maintained by planting.

The Governor-General is proclaiming the week of October 9 to be Fire Prevention week. This propaganda seems to make no headway whatever. Each year our fire losses increase. Something more effective is needed to arouse the public.

Great interest was shown by the general public in the exhibit of wild mushrooms and toadstools at the Canadian National Exhibition. Sixty-two different species were on exhibit of which only two were of the poisonous variety, the rest being of high food value with few exceptions.

Explaining why he is not a smoker Premier Drury recently said: "My father in his younger days was quite a regular smoker. When I was a boy, however, he gave up the habit rather than risk my acquiring it from him. It meant quite a sacrifice for him, and I always feel it would be a low down trick for me to start the habit now that he is dead. And of course, not knowing the joys of tobacco, I don't miss them."

A man bought from a well-known nursery a tree of supposedly choice variety of apple. After husbanding it carefully and waiting ten to fifteen years for it to bear fruit he was rewarded to find that it was only a seedling that had never been budded. He was glad that he had not set out a whole orchard; nevertheless the law should provide for adequate redress in cases of fraud of this kind.

An organization exists in Owen Sound of a truly generous, Christian character. A number of people owning cars offer to take anyone to the churches and see them home again who is unable to walk or otherwise incapacitated. They are asked to let their inability be known to a central office. Now then, while so much is being said of cars injuring Sunday observance, score one on the other side of the question.

What a long list of exemptions there are of those ineligible to act as jurors! Firemen, millers, telegraph operators, editors and reporters, teachers, municipal officers, seamen, soldiers, druggists, doctors, lawyers, priests, ministers, sheriffs, jailers, magistrates, judges, members of the House of Commons, Senators and officials under the control of Parliament, persons over 60 years of age and all women.

When it comes to heating a house by use of water and crude oil, Kingston takes first place, although dispatches sent out from New York last week give credit for discovery of water gas as a heat producer to that city. Henry Wood, jeweler and inventor of Kingston, heated his home in Kingston last winter by water and crude oil, and found it most successful. He states that he was able to keep his furnace going 15 hours by use of 9 cents worth of oil, and his house was kept warm. The cost of installation for producing the gas from water and crude oil was \$25.

Ontario is out to sweep the boards once more in the apple section of the Imperial Fruit Show, which is held in London, England, at the end of October. Last year the Province's apple exhibit captured the shield emblematic of having won the most prizes in all the various classes of competition. Fruit growers throughout the Province are co-operating to make the exhibits high-class ones. A new venture this year in connection with the Ontario exhibit will be the distribution, through sale, of a carload of Ontario apples. Among the prize winners at last year's Imperial Fruit Show was W. N. Langell of Point Pelee.

By Royal Proclamation, His Excellency, the Governor General of Canada, has designated October 9th as Fire Prevention Day. During the week preceding lectures on fire prevention will be held in many of the larger cities, towns and villages, and owners and occupants of property everywhere throughout Canada will be counselled to give special attention to the removal of fire hazards from their premises. Canada's fire loss in 1921 reached the unparalleled total of \$45,000,000 not including waste caused by forest fires. Over 350 lives were also lost. 90 per cent. of these fires, it is said, can be prevented.

The Rural Mail Contractors' Association of Canada wants the contract system abolished and a salary system of paying rural mail carriers substituted therefor. The association also wants indemnities paid to the mail carriers who, it is stated, carried out their contracts during the war and post-war period at a loss to themselves in consequence of the abnormally high cost of maintenance. Resolutions calling for these reforms were passed at the association's annual meeting in Toronto. A resolution of censure of the postoffice department was passed in connection with a circular that was alleged to have been issued with a view to blocking the association's efforts to secure reforms.

How Zam-Buk Saved My Leg!

"For years I could hardly walk," writes Mrs. Jeffrey, of 81, French St., Methuen, Mass.: "I was treated by doctors for an ulceration which started in my ankle and extended to the knee. Though sceptical when I read of other legs being healed by Zam-Buk, I gave the balm a trial. "Whilst Zam-Buk didn't put my leg right in a day or two, it did ease pain and inflammation wonderfully. Persistence soon convinced me that, thanks to Zam-Buk, I was at last on the sure road to recovery, and in time the terrible sore thoroughly healed. For three years now, I've had no leg trouble." In obstinate sores, old wounds and ulceration where destruction of the tissues has occurred, Zam-Buk displays extraordinary healing power. Sufferers marvel at the way it soothes pain and inflammation, purifies diseased parts and stimulates the growth of new healthy tissue. Whereas ordinary ointments simply cover over surface trouble, Zam-Buk healing is permanent for it leaves no trace of disease to break out. Zam-Buk proves equally effective in eczema, ringworm, salt rheum, piles, poisoned sores, abscesses, burns, scalds, etc. All chemists and dealers 50c.

WATFORD FOURTH SCHOOL AND COMMUNITY FAIR

It is safe to say that never has the Armory presented a more beautiful appearance than when the exhibits were all in place on Friday morning of last week for the School Fair.

They were excellent in all classes and as the pupils had been given permission to bring any special work done by themselves during the year even if not mentioned on the prize list the judges had some pleasant surprises.

The exhibit of flowers surpassed all others. The Aster seeds distributed free to Public School pupils by the Horticultural Society and the prizes given to each Grade by the Society made the competition very interesting.

The program of sports carried out so smoothly by a committee of men of the town added a great deal to the day's enjoyment and the concert in the evening furnished a long but happy day for the boys and girls.

Mr. John Farrell filled the chair in the evening in his usual happy style.

The Institute wishes to thank a host of kind friends who worked so energetically and faithfully to make the Fair a success.

Until the prizes and other expenses are paid it will not be known how the Institute stands financially but it is hoped that there will be a small surplus. Suppose there is not—was it not still worth while?

I Want to Put Dollars In Your Pocket

There is no need to make a special trip to town for a load of chop if you have a Toronto Farm Engine and Grain Grinder of your own. And besides, it will save you a few cents on every bag.

Coarse or fine chop—for cattle or hogs—I would recommend the Toronto Grinder for efficiency and economy on your farm.

A Toronto Farm Engine, too, is a great labor-saver. Attach it to your pulper, pump, cutting box, cream separator or fanning mill.

Think of the labor saved! It pays for itself in one winter.

I'll put dollars in your pocket if you'll come in and discuss Toronto Farm Equipment with me.

HER AILMENTS ALL GONE NOW

Mrs. Sherman Helped by Lydia E. Pinkham's Vegetable Compound

Lake, Michigan.—"About one year ago I suffered with irregularities and a weakness and at times was obliged to stay off my feet. I doctored with our family physician and he finally said he could not understand my case, so I decided to try Lydia E. Pinkham's Vegetable Compound. After I had taken the first bottle I could see that I was getting better. I took several more bottles of the Vegetable Compound and used Lydia E. Pinkham's Sanative Wash and I am entirely cured of my ailments. You may publish this letter if you wish."—Mrs. MARY SHERMAN, Route 2, Lake, Mich.

There is one fact women should consider and that is this. Women suffer from irregularities and various forms of weakness. They try this and that doctor, as well as different medicines. Finally they take Lydia E. Pinkham's Compound, and Mrs. Sherman's experience is simply another case showing the merit of this well-known medicine.

If your family physician fails to help you and the same old troubles persist, why isn't it reasonable to try Lydia E. Pinkham's Vegetable Compound?

A Few Helpful Hints for Youthful Exhibitors.

Bear the Ancestors in Mind—Pick Tidy Animals—How to Feed and Handle Colts, Calves and Lambs—Boys Are Making Good as Exhibitors.

(Contributed by Ontario Department of Agriculture, Toronto.)

Calves that have been fed liberally and judiciously will develop as the factors which we call heredity determine. It will be all calf, but its perfection of form is determined by its parentage. Feed cannot make a square beef calf out of a three-cornered dairy calf. So to begin with the feeder should select the young calf largely on the individuality of the parents. Get a calf that will feed out to be as good or better than its ancestors—something that is worth while spending time and money on—and then take care of it. The breed score card gives clearly what is desired in breed type. These should be studied along with the animal that is being selected for exhibition. Calves should be halter broken when young, and handled gently that they may be quiet and docile at exhibition time. If in proper flesh to look well, rub and back sweat covered. It is comparatively easy to complete the work of preparation. Prospective exhibits should be kept in the stable for several weeks previous to the fair, where they can be washed, groomed and blanketed in order that their handling qualities may reach a desirable in exhibition calves. When exhibiting before the judge see that your calf is standing on level ground, quietly, and with feet well placed so as to present a good appearance. Don't let the other exhibitors crowd too closely and hide your exhibit from view.

Handling the Colt.

The colt selected for competition at the fair should meet the requirements of the class in which it is planned to exhibit. It should also be typical of the breed that it represents. As with the calf, the colt can only be what its ancestors make it. Colts may look very much alike when only a day old, but they certainly do not develop alike, even if the care and feed are the same. So get your start by selecting your exhibition prospect from good type parentage—exhibition stock if you can. Liberal feeding from the beginning on a comparatively narrow ration to develop all the bone and muscle possible should be the aim. After breakfast and careful schooling to develop courage and tractability should be practiced from the beginning. The colt's feet should be trimmed frequently enough to keep them in proper shape. Teaching the colt to move attractively at the exhibition time. The lamb's fleece to permit handling of its feet is very essential in the general training of the animal. Such training is also a great aid on exhibition day. The colt that has had liberal treatment from birth and developed well, needs but little exhibition fitting. Good feeding will put a bloom on the colt that cannot be attained in any other way. Protection from the hot sun and flies, blanketing and grooming are material aids in developing a desirable coat condition, and should be practiced during the month previous to the exhibition. Ribbon and straw decorations while very attractive to the average good horseman do not carry very much weight with the high class judge, and are not likely to be of influence except in very close competition.

Shaping the Lamb for the Fair.

Lambs presented for exhibition at school or other fairs should first of all have been born early enough in the spring to be well grown by exhibition time. The lamb's fleece should be kept free of ticks and lice, burrs and dirt. During the season, a washing can be given, if necessary, at least two weeks previous to the show. Lambs that are kept up and fed in covered pens will show a better fleece than if they had been running out on pasture up to the last minute. The fleece should be neatly trimmed one week or more after washing, if washing is practiced, and care taken to keep the fleece free of chaff and dust until the exhibition is over. In feeding for exhibition, variety in feeding stuffs should be sought in order to open up the lamb's appetite, using oats, corn wheat, bran, cracked peas, barley meal and oil-cake meal for the grain portion of the ration and good alfalfa or red clover hay, and swede turnips as roughage. These feeds if mixed to give a ration with a nutritive ratio of 1 to 6 or 1 to 7 will take care of the growth demands and fatten the lambs. Should it be desired to feed the lambs while running on pasture, the grain ration given can be used. The lambs should be handled sufficiently to make them tame enough to stand when being exhibited. If more than one lamb is called for in a class, all individuals should be uniform in size, type, condition of fleece and body fleshing. Getting the Pig Ready.

Pigs presented for exhibition at school or other fairs should first of

all be of the proper type and weigh for the class in which it is planned to exhibit them. The exhibit should be clean. This condition is best accomplished by an application of warm water, soap and the scrubbing brush. The crate or pen should be well bedded with straw or shavings to make it comfortable and attractive. It should also be free from nails, old wire, broken bottles or any other material likely to injure the exhibit.—L. Stevenson, Sec., Dept. of Agriculture, Toronto.

SEDWICK—LINDSAY

A profusion of white asters, feathery ferns and palms together with the stately dignity of cathedral candles, formed the setting Saturday night, at the bride's home, "Linfors Lodge", for the wedding of Miss Margaret Mae Lindsay, daughter of Mrs. Mae Lindsay, Port Huron, to Mr. Leo Murray Sedwick, son of Mr. and Mrs. William Sedwick, 116 Queen street, Sarnia, Ont.

Before an altar erected in front of the fireplace, Rev. Ralph M. Crissman, pastor of Highland Park Presbyterian church, Detroit, read the ceremony.

As the wedding march from Lohengrin was played by Miss Ruth Lindsay, sister of the bride, the bridal party passed down an aisle formed by ribbons held by Miss Marguerite Schweitzer and Miss Elizabeth Wilkinson, cousin of the bride. Preceding the bride, who was given in marriage by her uncle, Mr. Roy Lindsay, walked the matron of honor, Mrs. Melville Foster, the maid of honor, Miss Marion Cameron, and the bridesmaids, Mrs. Alex. Holland, Detroit, and Miss Rose Sturmer, Port Huron.

Kenneth Sedwick of Sarnia attended his brother as best man, and the ushers were Mr. Frank Beckton and Mr. Glen Caulkett.

A wedding supper was served after the ceremony. The bride's table had as centerpiece a mound of pink roses, and bows of pink tulle adorned the corners of the table, which was lighted by tapers.

Late in the evening Mr. and Mrs. Sedwick left by auto for New York and other eastern points. Upon their return to the city they will take up their residence in Louis Terrace Tenth avenue, where they will be at home after Nov. 1.

The groom is a former Watford boy. He is now a member of the firm of Godley & Sedwick, druggists, Port Huron.

MADAM SLOAT

PERRY JUNCTION, N.B., Jan. 22nd, 1920

"For many years, I was a great sufferer from Indigestion, Constipation and Rheumatism. My Stomach was weak and gave me constant distress, while Rheumatism in my joints made me almost a cripple. was treated by two different doctors but their medicine did me no good.

Then I tried "Fruit-a-tives" and at once that fruit medicine helped me. Soon the Constipation and Indigestion were relieved and the Rheumatism began to go away, and in a few months entirely disappeared. For twelve years now, my health has been first class, and I attribute it to the use of "Fruit-a-tives" which I take regularly."

Why the Fall is the Best Time to Paint

1st—Because your house will be much drier, after the summer heat, and a dry surface is essential to best results. The paint will take better hold of the wood and will dry harder.

2nd—Because the flies, gnats, bugs and other insects which so often spoil the appearance of the newly-painted house, will not trouble you now, and the weather is ideal for painting.

3rd—Because your house needs protection as well as beauty and

needs it more in the winter than any other time. The paint will keep out dampness and decay, which cause far more loss than fire.

4th—Because LOWE BROS. HIGH STANDARD PAINT is perfectly adapted to Fall work. It will save you money, time and trouble. Its quality is your best assurance of long wear, protection and economy. It goes farther than most paints and takes less to make it go.

PLUMBING ON THE FARM

Running Water Not a Luxury, But a Necessity.

Practical Hints on Home Installation—The Water Service Pipes—The Fixtures—Have a Good System of Drainage for Waste Water.

(Contributed by Ontario Department of Agriculture, Toronto.)

A plumbing system consists of three main parts: Water service, fixtures, and waste pipes.

The Water Service Pipes. The duty of these pipes is to convey the water from the supply to the fixtures. They should be galvanized iron of first-class quality, and the size for the house is 1/2-inch, except the one that connects the hot water boiler to the kitchen range or furnace, which is 3/4-inch in size.

Pipe is bought by the foot in small quantities and by the 100 feet in large quantities, and the price for galvanized iron pipe at the present time is 10 cents per foot for the 1/2-inch, and 12 cents for the 3/4-inch. The amount required for a house is about 120 feet, but it varies with the size of the house and the layout, particularly the location of the bathroom in relation to the kitchen, also whether soft water is on tap as well as hard water. Sections of pipe are joined together by threaded couplings, and red lead or a special paste is used on the threaded parts to make the joints tight and preserve the threads from rusting and becoming permanently set. The water in these pipes is usually under 30 to 50 pounds pressure, and all joints must be positively water-tight, particularly so if the pipes are laid under floors.

Test the Pipes for Leaks. After they are installed and before they are covered up either under floors or in partitions, and before they are covered up for good, the water should be turned on under good pressure and a thorough test made for leaks, not only at the joints but all along the pipe line, as a small hole or split would cause a serious leak.

Be sure the man operating the threading tool knows his job and does it properly. It is very essential that the water pipes be located safe from frost, and that they are highly advisable to keep them away from the outside wall of the house or stable, if possible.

It is particularly imperative to keep the pipes connecting the hot water boiler to the kitchen range or furnace, and the pipes for the water supply to the boiler, from freezing, as a stoppage in this line would cause a blow-out upon the fire being started in the morning, and serious loss of life or property would likely occur, and lastly it is very poor economy to install anything less than the highest quality of galvanized pipe, never use wrought iron pipe for water, galvanized always.

Plumbing Fixtures. These comprise the kitchen sink, laundry tubs, bathtub, lavatory sink, and closet. There is a considerable variety in the style and quality of these articles, and naturally a large range in prices. You should insist on a good quality of enamel coating on the fixtures, this is very important. The standard dimension of some of these fixtures are as follows: Kitchen sink, 20 x 30 inches. This sink should have a back, and one drain board, at least, of wood or enamelled iron should be provided for, two are better. The sink should be located at the most convenient height above the floor for the woman using it; not too low, else undue stooping has to be endured. A 5-foot bathtub is the standard size. It should be placed far enough from the wall to make easy cleaning around it possible. The lavatory sink may be secured in a shape either for side wall or corner installation. In the installation of a closet insist on a stopcock on the feed pipe to the tank, so that if the tank needs repairing the water can be turned off just below the tank. Any standard type is satisfactory.

The cost of a standard outfit is about as follows: Lavatory sink, complete with trimmings, \$24.50. Closet complete, \$35.00. Kitchen sink, 20 x 30 inches, with bibbs and trap, \$23.35. Laundry tubs, \$55.00. Bathtub, 4 1/2 or 5 feet, \$66.50, or total of \$204.35. The cost of the soil pipe, water pipe and connections including labor for installing them and the fixtures is about \$195, making a total of about \$400.00.

A Drainage System. This part of the plumbing system consists of the soil pipe or stack that extends from the sewer up through the house and out beyond the roof. All the wastes drain into this pipe and by it are carried to the sewage disposal system. Each fixture is connected to this main drain by a smaller pipe having a trap to keep bad odors from coming back from the sewer. The stack is 4-inch cast-iron pipe made in 5-foot sections, and the joints are caulked with oakum and lead. The other pipes are 2 inch and 1 1/2 inch, either iron or lead. Installing this part of this work, also the water service lines, is commonly

Few gardeners realize the importance of pulverizing the soil as deeply as it is ploughed. No matter how perfectly the surface is prepared, if the soil is coarse and lumpy below, the plants will not thrive. Large air spaces in the soil are a detriment, but a large number of very small air spaces in the soil are a benefit.

MADE NAME BY ONE SPEECH

Bonar Law's First Essay in Parliament Established Him as a Man of Mark.

It is typical of Mr. Bonar Law, whose resignation from the British government created so much regret, that when he first entered the house of commons in 1900, he remained a silent and unknown member for some time. One night, however, he decided to make his maiden speech. It was a reply, curiously enough, to an attack which Mr. Lloyd George had made on the government. The speech gripped the house, and in half an hour Mr. Bonar Law had made a parliamentary name for himself.

Coupled with a charm and kindness, which have made him popular with men of all parties, is a quiet sense of humor. One of his favorite stories concerns an election meeting at which a speaker observed: "It is wise, and indeed imperative, that great public questions should be submitted to the sober judgment of the people."

"Sober judgment be blowed!" growled a man to his neighbor. "That means robbin' us of our beer!"

Why "Undershaw?" Sir Arthur Conan Doyle, the novelist, is about to sell his house, standing 800 feet above sea level, at beautiful Hindhead. Can any amateur Sherlock Holmes discover why the house is called "Undershaw?" The answer shows that Sir Arthur is a humorist and a philosopher as well. Years ago he had a parliamentary ambition, and put up as a candidate for the Hawick district of Scotland. His opponent was "Tommy" Shaw, whose reminiscences are just now delighting the reading public. On the declaration of the poll Sir Arthur found himself defeated. He was, in fact, "under Shaw" by nearly 700 votes. He took the matter good naturedly, so much so that in naming his new house at Hindhead, he called it "Undershaw."

Mrs. Frank Gustin, Lake Valley, who was taken to the Sarnia Hospital several weeks ago in a critical condition has wonderfully improved following an operation. She is making steady progress.

Police Magistrate Graydon of London on Thursday convicted Moore and Manning, Westminster township threshers, of operating an engine with a defective spark arrester at the farm of Del Wood, where barns, crops and implements were burned with a loss of \$15,000. Fines of \$5 each were imposed. Deputy Fire Marshal Burnett, who laid the charge pointing out that it is the desire of the department at Toronto to call the attention to the farmers and threshers generally rather than to inflict a heavy penalty on the men in this case, who lost their own separator with no insurance.
