

# A SUMMARY OF FINANCIAL AND COMMERCIAL NEWS.

Vol. 1. No. 114.

MONTREAL, SATURDAY, OCTOBER 15, 1898

Price 3 cents.

# Montreal Stock Market.

# MONTREAL STOCK EXCHANGE.

Hours of Board-10.45 to 12.30; 2.15 to 3. Saturdays-10.30 to 12 noon.

3 p.m., October 15, 1898

MARKET IRREGULAR.

PACIFIC STRONG ABOVE LON-DON PARITY.

# Toronto Railway and War Eagle Decline.

This mornings market was erratic. Some shares which were expected to be strong declined and Pacific which was very weak in London advanced. Trading was narrow and confined chiefly to C.P.R. Cotton stocks were strong. No Bonds nor Bank shares were sold and the general feeling was one of easints.

## TORONTO RAILWAY.

A decline of nearly one point was establi hed in Rails and this on a small business. 185 shares were dealt in the initial t ade being made at 103§, the closing one at same price, the stock selling in the interim down to 103§ and to 103 for a small lot. Its close was steady.

## WAR EAGLE.

The declinc in Eagle to 283 was due doubtless to the fact that it was so neglected that a small offering caused an unwarranted change in the quo-tation. Only 3500 shares sold and at the close 283 was bid with 284 asked.

#### SUNDRIES.

Commercial Cable was steady at 181. Montreal Street was over a point down. Royal Electric sold at 157. Dominion Cotton brought 99 Merchants Manufacturing Co., 147 2 American Lotton 152 and Montreal Cotton 152.

## CANADIAN PACIFIC.

An effort made by the New York Central and the Pennsylvania Rail-roads to deprive longer lines of differentials has failed. This deci-sion was largely influenced by the arguments made by the differential lines. This should be rather encour-aging news to holders of Pacific as there appears to be a feeling in some quarters, at least, in the United States that differentials are just and by this dicision the Chicago arbitra-States that differentials are just and by this dicision the Chicago arbitra-tors may be influenced. As the stock sold at 85 in London it was surprising what strength was shown here, in the stock. It opened at 85<sup>3</sup>/<sub>2</sub> and on heavy trading sold up to 83<sup>3</sup>/<sub>8</sub> which is a full point above London equivalent. Fourteen hun-dred and seventy-five shares sold and it closes steady at 83<sup>3</sup>/<sub>8</sub> bid. and it closes steady at 83% bid.

# NEW YORK EXCHANGE,

# TONE EASIER-TOBACCO BREAKS.

## MARKET VERY DULL.

OUTSIDERS LEAVE MANIPU-LATORS IN CONTROL.

## MONEY EASY.

## New York Oct. 15.

The market is dull and tone easier. Tobacco was the point of attack to-day. Manipulation is rampant but on declines commission houses keep on declines commission houses keep picking up the standard shares for investors. Sugar opened steady, but soon sold down to 110½ from which point it reacted to 112, receded to  $110\frac{3}{4}$ , but closed steadier at 111½. The rest of the market with one or two exceptions closed lower than vestor exceptions closed lower than yesterday

#### GOSSIP.

Sugar refining assumed a promi-nence which excited fears that mani-pulation might be<sup>\*</sup> actively renewed in it to the determent of the senti-ment on the general list especially as the stock showed unexpected weakness in the matter of stop loss orders when a vigorous bear blow was struck against it in the late aft. r-noon. noon.

Investment purchases continue to be in evidence in the Bond depart-ment and among the high grade stocks.

stocks. The investment enquiry is a factor to be counted upon notwithstanding. Purchases are encouraged by the reaction downward in the money market from the temporary Sept.

squeeze. The price of money in New York has shown a remarkable indifference to the lifting of the discount level in Europe, and now that the Govern-ment war Loan has been successfully financed the money market shows optime option

entire ease. The confidence of bankers in gen-The confidence of bankers in gen-eral does not seem to have been dis-turbed in the least by the violent fluctuations, and the heavy decline in values, which have marked the operations in Sugar and American Tobacco in the last few weeks.

## LONDON.

In response to the lower prices recorded in our market, quotations i. London this morning showed declines of from  $\frac{1}{3}$  te  $\frac{1}{2}$  p.c., Union Pacific common having suffered the greatest decline in that market. For several days past London has been a seller of stocks in our market to a moderate extent, their operato a moderate extent, their opera-tions have been small and can hardly be accounted a factor in determining the caurse of prices.

## EUROPEAN POLITICS.

The various political disturbances on the other side and the rumors of a plot to overthrow the French Government together with the approaching elections have no doubt made the foreigners a little distrustful and has caused this disposition on their part to lighten their holdings of American securities.

## MANIPULATION.

Speculative attention was largely speculative attention was largery absorbed in yesterday's market by two stocks Sugar and American Tobacco. There was very little real business, and a large portion of yes-terday's trading was between tra-ders and for account of manipulation.

## SENTIMENT.

Bullish sentiment, so noticeable on Thursday, decreased yesterday. More disposition to consider election possibilities and absence of commission buying, together with weakness in good stocks, produced an unfavorable impression.

## GENERAL MARKET.

There were heavy dealings in Federal Steel in the outside market yesterday. Buying good. Movement in Sugar reflected effort to reduce short interest. Late selling was on report of cut in Refined Sugar.

## ERIE & WESTERN

Interests connected with Erie & Weste n do not believe that div. on Pfd. stock will be passed. A reduction is possible, not certain. It is possible Erie & Western is likely to become a more important factor in thorough business.

## SUGAR.

The erratic fluctuations of Sugar were accompanied by a number of Board rumors. In the early trading there was a determined effort to drive the shorts to cover and this effort was in part successful. It took however, about 8,000 shares to ad-vance the price about two points and in the later dealings the stock broke three points.

The reason attributed for the decline was a rumor to the effect that considerable refined Sugar had been sold quietly at 47 c.

## RUBBER.

Rubber insiders advise purchases of rubber stocks.

## TOBACCO.

Operations in American Tobacco continue to mystify the Street gener-ally, but a prominent commission house is thought to have sold during last week some 60,000 shares.

## New York, Oct. 15.

Market opened weak on lower quotations from London. Sugar nervous Traders are both buyers and sellers. American Tobacco decidedly weak on renewal of selling pressure.

Shorts covering caused advance in Sugar. Not much stock offered till 112 reached.

## BUYING AND SELLING.

Walsh and Traders bidding up Southern Ry. Pfd.

London sold Union Pacific. Housen as large seller of Sugar. Traders sold B.R.T. at the opening. Flower brokers bought 300. They appear to be supporting the stock without buying much. Housman bought B.Q. Burrill

C

M

N

sold.

## NORTHERN PACIFIC.

Nor. Pac. declined yesterday more on account of a lack of buying power than on any decided pressure to sell.

## ATCHISON.

It is understood that Atchison will begin paying dividends on Preferred stock in January.

# THE EXCHANGE NEWS.

THE ONLY DAILY FINANCIAL PAPER PUBLISHED IN CANADA.

# OF INTEREST TO INVESTORS.

What Prominent Stock Brokers think of the "Exchange News."

## C. MEREDITH, ESQ.,

# Messrs. C. Meredith & Co., Stock Brokers, Montreal:

"I think the idea of a daily publication, giving the transactions of Stock Exchanges, both home and foreign, is a very good one. The "Exchange News" gives this information in a very clear and concise form, and comes before the public at a time when a journal of the kind is very much needed. "The tabulated form of quotations is so clearly arranged, and the information in its columns so well put, that the paper must prove of the

greatest value to all who are interested in Financial matters."

## MESSRS. W. J. TURPIN & CO.,

## Stock Brokers, Montreal:

"We have much pleasure in stating our opinion of the 'Exchange News.' It is a journal giving information to investors and the public generally, on all matters connected with the financial world, that is needed, and which has not hitherto been attempted in the daily papers. The information given is very valuable. The paper is filling a long felt want, and is bound to succeed."

## MESSRS. BURNETT & CO.,

## Stock Brokers, Montreal:

"The investing public have for a long time felt the want of a journal of this kind, in order to obtain the fullest and latest information daily, and this want is admirably filled by the 'Exchange News.'"

"We heartily wish the proprietors of the 'Exchange News' all the success they deserve, in bringing before the public a daily journal especially devoted to the interests of investors and operators in stocks.

## MESSRS. L. J. FORGET & CO.,

## Stock Brokers, Montreal:

"We are very much pleased with the 'Exchange News,' the great advantage of which is its daily issue. It fills a long felt want and must prove very valuable to all interested in finance and investment. The arrangement of the tables, showing the prices for several days, on the Montreal and New York Exchanges, is original and extremely useful. The pointers given about stocks, so far, have proved very correct, and the paper taken as a whole is most useful."

## J. TRY DAVIES, ESQ.,

## Stock Broker, Montreal :

"The investing public have long been in want of a daily journal in which they would have a record of every day's doings on the different Exchanges. We are glad to see that this want is so fully filled by the 'Exchange News,' which gives a fund of the required information, so arranged as to be seen at a glance. Everyone wishing to know what is going on in the Monetary and Commercial world should be in possession of this medium, which I think is most valuable."

## HARTLAND S. MACDOUGALL, ESQ.,

# Messrs. MacDougall Bros., Stock Brokers, Montreal:

"I think the "Exchange News" is a most valuable paper and one that is of great value to investors. Those of my clients who are acquainted with the paper speak very highly of it."

## ALEX. PATERSON, ESQ.,

# Messrs. MacDougall Bros., Stock Brokers, Montreal:

"The information given in the "Exchange News" is most reliable. I find that my clients refer to it quite constantly. The paper is bound to succeed."

## A. F. RIDDELL, ESQ.,

## Stock Broker, Montreal:

"No investor who studies his own interest can afford to be without the "Exchange News." Up to date information is evidently the feature of the paper, I have not noticed a stale piece of news in it for the past three months."

The foregoing, a few expressions of opinion from the leading Stock Brokers of Montreal, speak volumes. Many more could be published but we think these are sufficient for the purpose. As an investor, and being interested in "Canadian Finance," can you afford to be without it ?

MINING NEWS. 

During the past week there has been a marked decline in nearly all active stocks, Monte Christo suffering most, having taken a drop of several points. A small block sold in Toronto on the 10th at 13 cents as against 241 cents on the 4th. This has had the effect of weakening the market and all stocks have suffered accordingly, particularly the low priced shares, as Monte Cristo has been a general favorite and is largely held in Eastern Canada. The cause of this sudden decline in attributed to the shutting down of all work pending a thorough examination of the property to determine its present actual value and to outline a policy for the future. It is rumored that a new manager will be appointed and mining men who are familiar with the property predict that under energetic and capable managment the mine will justify the confidence placed in it by its supporters and the stock will regain its old popularity.

Cariboo (Camp McKinney) is attracting considerable attention and there are numerous enquiries for the stock, but it is not likely that the public will get many chances to purchase until the property has passed entirely into the hands of the Canadian Company and is regularly listed on the Toronto and Montreal exchanges. It should then become very active as its dividends are regular and the latest reports are that the property is better than ever.

Giant continues to improve although the stock is a shade lower than a week ago, one reason for this is the general weak state of the market, and another is that there is considerable of the stock in the hands of holders who are not financially able to carry it. This should not alarm holders, as all reports from the property are most encouraging.

There is no apparent cause for the decline of Fern shares as a report of a rich strike has been made within the last few days, and the Treasury of the Company is in excellent condition. The only reasonable conclusion is that some holders have been compelled to realize and have thrown their stock upon the market, a block of 10,000 was offered last week at 55c.

was responsible for the change. The output of the mine continues to be most satisfactory, although it is expected that the installation of the new machinery will affect the shipments for the next few weeks. The annual meeting will be held on the 25th November, at which it is expected a very favorable report upon the past year's work will be presented. It has been suggested that it would be more economical and satisfactory to have quarterly, instead of monthly dividends, although we do not think that the Directors have taken such a change, as yet, into their serious consideration. The delays in connection with the new plant may postpone for some little time any change in the amount of the dividends, although ultimately, the same must be substantially increased.

Shipments from Rossland camp for the week ending October 8, were: Le Roi, 3,280; War Eagle, 750: Iron Mask, 70; Total, 4,109 tons. The total shipments since January 1, 1898, are 79,109 tons.

Blast furnace No. 2 of the Le Roi Smelter of Northport was blown in on October 8th and the plant from then on will be run at its full capacity. Many improvements are being inaugurated, among the latest being a pug mill and the gravity tramway. The latter is for the purpose of transporting the lime rock from the quarry to the smelter and thereby reducing the handling of same to a minimum.

The Montreal Red Mountain Company has been merged into the Montreal Gold Fields, Limited, each share in the old company being equivalent to one and one-halfshares of the new company. To-day's quotations are for the new stock.

The Golden Cache mine, situated in the Lillooet District, B.C., which has been such a sore disappointment to its shareholders, has been the scene of another flasco. Operations have recently been resumed on this property, and the shareholders have been led to believe that there would be a satisfactory clean-up from the stamp-mill. News has come forward that the results of the long expected mill run have been stolen. Under all the circumstances, we do not think the shareholders can still have much faith in the management of the Company, or its future outcome. We strongly advise against any investment in the Lillooet District, until at least one permanent dividend paying mine has been develoyed.

# A NOTE OF WARNING.

It is absolutely necessary if the confidence of the public is to be retained in Canadian Mines, that the information issued to the public from the management of the different mines be thoroughly reliable in every particular.

Within the past ten days it has been discovered that the statements issued for some time past by the manager of one of the leading Rossland mines have been in some instances absolutely false and in others colored to a high degree. The object of this individual (who it turns out has established a record for unreliability and irresponsibility) was to inflate the value of the shares to as great an extent as possible, so that he might unload his own stock at a handsome profit, and this we understand he has succeeded in doing. It seems to us that dismissal is too mild a punishment for misdeeds such as this, and we think the directors should, if possible, not only in their own interests, but in the interests of the investing public in general, compel him to disgorge his ill-gotten gains.

Fortunately, for the majority of the shareholders, the directors of this particular mine are men of honor and standing in the community, who immediately they discovered the dastardly methods of their manager, dismissed him instantly and decided to suspend operation until they succeeded in obtaining from a competent and reliable engineer a report as to the actual value of the property in question and its prospects of future earnings.

We would advise shareho ders to hold on to their stock in the meantime, for, though undoubtedly the disgraceful methods of the late manager have given the shares a set back, we understand the property is one of value and only requires intelligent and capable management in the development to prove its value.

B. A. C. AND LE ROI.

Lord Dufferin tells the Shareholders of the London and Globe Finance Corporation the Story of the B.A.C. and the LeRoi Deal.

At the annual meeting of the Lon-Lon and Globe Finance Corporation who on the sponsors of the British American Corporation speaki g about the Leroi complication Lord Dufferin said :--

I may now refer briefly to our interests in British America. Asyou are aware, we have a very large interest in the Brit sh America Cor-poration. It was announced in the prospectus of that company that we would co-operate with them, and as a matter of fact, we have taken a joint and equal interest in the East and West Le Roi and Columbia-Koote ay groups, as well as the Le Roi itself. This co-partnership is equally ad-vantageous. as the British America Corporation could not handle them all alone. Great good fortune has all alone. Great good fortune has followed us here and these groups have developed in a very promising manner. Numerous cables from the resident director and chief engineer, announcing one strike after another announcing one strike after another in these groups, and the discovery of reefs as mu h as 35 feet wide, have been received, and the latest of them says "on the present appearance of prospects of develo, ment work, we will have four Le Roi's." (Applause.) In reference to the Le Roi mine, you, as well as ourselves, have no doubt heard many rumors, some of them of the most fauciful character. This is a matter that inticharacter. This is a matter that inti-mately concerns the British Ame. ica Corporation as well as ourselves, and you will be glad to hear something in reference to the mine. The facts then, are, that the British America Corporation did buy the Le Roi mine, and insisted on having a special meeting of directors and shareholders of the Le Roi mine call-ed in America, to whom the whole Corporation as well as ourselves, and ed in America, to whom the whole agreement for sale of the property was c. lled verbation in order that it night be in was c. ned verbation in order that it might be incorporated into the power of attorney given by the directors in America, to their colleague here, whom they had sent over for the ex-press purpose of arranging the sale of the mine.

When this contract was signed under the power of attorney, thefact of the purchase was communicated to the shareholders. Through a legal technicality it was found that the contract of sale might be im-peached, so the British America Corporation and our company decid-ed to purchase the shares at a proed to purchase the shares at a pro-portionate price, instead of then try-ing to complete the purchase of the mine itself.

The British America Corporation and ourselves consequently now con-trol about 400,000 shares out of a total of about 500,000 shares — (more total of about 500,000 shares—(more applause), and some three-fourths of these are actually paid for. We ex-pect to acquire other shares shortly, and our chief engineer, Mr. Carlyle, is already in possession of the pro-perty and is actively developing the same on a large scale. We are ad-vised that the Le Roi mine has greatly increased in value in the hands of our engineer since the orig-inal contract for purchase was made. made.

made. These,gentleman, are the facts as to this great mine, the Le Roi, and I am quite satisfied that the shareholders of both the London and Globe Co. and the British America Corporation may safely leave them to be dealt may safely leave them to be dealt with by the directors of thos  $\sigma$  com-panies. I say no more, therefore, on that subject, but turn to interests nearer home. (Applause.)

## "DEER PARK."

## New Plant in Operation.

Last week the new compressor plant and hoisting machinery was officially started by the Hon. C. H. MacIntosh, in the presence of a number of prominent mining men.

The new plant is very complete and powerful and is arranged in such a manner that one man can attend to the hoist, compressor, and boiler. The compressor plant is of seven-drill capacity and is laid in concrete foundation.

It is the intention of the Company to sink the main shaft to the 300-foot level at once, and as three shifts will be employed, with the aid of the drills, rapid progress should be made.

## Centre Star vs. Iron Mask.

An important stage has now been reached in the above case which has been going on for a long time and arose out of the lateral lode extension. Both injunctions obtained by the Iron Mask against the Centre Star have been carried to trial. The mo ions which were brought up by the Centre Star people to have the injunctions dismissed have been negatived by the court. This is now considered to be a moral victory for the Iron Mask company.

J. F. PIGGOTT, AGENT MINES AND MINING, 61 St. Francois Xavier Street. MONTREAL.

I F you are interested in the latest news in con-nection with Gold, Silver, Copper, Lead or Iron mines and the new districts now being explored, and want to get in at Rock Bottom prices, call on or ring up

The management of the Le Roi has stated that they will probably not pay a dividend until November. Shipments were cut off for some time pending the litigation with the B. A. C., which was very expensive, but as the mine is now shipping over 2000 tons per week, regular dividends may be looked for.

War Eagle stock has been fluctuating considerably. After selling down on the 7th to 280, it quickly advanced eight points, but is now quoted three points lower. There seems to have been no substantial reason for the drop. The general weakness of the market, added to the fact that one of the local banks called up some loans, which affected War Eagle holders,

While the results from the mines in the Rossland and Slocan districts continue to be of the most satisfactory character, we would strongly caution the public against hasty and illconsidered investments in mining enterprises. We have reason to believe that unscrupulogs, or perhaps in some cases unbusinesslike, people, are endeavoring to boom all kinds of mining propositious, whether good, bad or indifferent, on the strength of the well known successes.

# MONTREAL GOSSIP,

The advance in the rates of interest, in Germany, by the Bank of England, and the local lending Banks, was the chi f news of the week. On the other hand, the Americ n money market has overcome its difficulties, and, ex-cept for an occasional manipulated squeeze, which can be but temporary. promises borrowers a long period of ease.

ease. The New York stock market had just begun to show a decidedly im-proved front when the Fashoda incident caused an uneasiness in the minds of European shateholders, which led to the selfing of a great deal of American and Canadian stocks. This caused a decline in Pacific, which, but for the strong manner in which stocks are held locally, would certainly have result-ed in a selling movement here, which might have reached large enough ed in a selling movement here, which might have reached large enough proportions to have affected even well margined accounts. As it was, a small decline occurred, but any one wishing to lighten his load, found un-limited demand for his shares, and prices soon reacted to their starting point. The large amount of money still seeking investment will be a safe-guard against any big break, even in the event of European disturbances, which are improbable. A very uninteresting market may

which are improbable. A very uninteresting market may be looked for till a dractic unfo seen change of some kind occurs to affect stocks. Canadian Pacific, which is beyond local control, is likely now-ever, to vary considerably and pro-mises to be the active stock for the near future near future.

## CANADIAN PACIFIC.

European war news and the in-crease in interest rates in Berlin and London, caused a selling movement of this stock in London from Berlin, London, caused a setting movement of this stock in London from Belin, resulting in a decline of one per cent. within the last two days. Consider-ing the quantity of stock offered and taken up, the break was very small. and the comparative y sli ht decline is an indication of the favor with which it is regarded in the financial metropolis of the world. The price f the stock in the local market during the week has been often above parity, showing that th ugh a large quantity of the stock has been placed in this market. There is still a good demand for it. 5416 shares changed hands at prices ranging from S4½ to S3½ and it closed ye terday S3½ to S3½. The meeting in Chicago to settle the question of freight differentials is still in session, and the conclusions arrived at may not be made public for several days.

arrived at may not be made public for several days. No very favorable decision as re-gards the C. P. R. may be expected as the American roads are quite satisfied, the former road is well able to take care of itself and is not entitled any longer to the differ-entials which they have enjoyed in the past. In any case all un-favorable news has been discount-ed and the stock is not likely to recede to any appreciable extent in recede to any appreciable extent in

the event of an adverse decision. An advance in the shares may be looked for, when European news become more favorable.

## MONTREAL STREET.

The recent decline in this stock created such a demand that the price soon rose to the point from which the decline started. It opened the week with sales at 273, but by the 11th it had risen to 276 and closed yester-day with sales at 279 and 275<sup>4</sup> bid, ex-div. of 2<sup>1</sup>/<sub>2</sub> per cent. The earnings for the present year ending Sept. 30 were \$1,459,851, being an increase of \$126,220 over the previous year, or an average daily earning of nearly \$4,000 and an average daily increase of \$346.00. The increase in earnings are equivalent to nearly 2<sup>1</sup>/<sub>2</sub> per cent. on the capital stock, and many share-The recent decline in this stock on the capital stock, and many share-holders expect, if this ratio of in-creases continues, to receive a bonus next year in addition to the regular 10 per cent. dividend. It is worthy of note that already the increase in earnings for the first thirteen days of earnings for the first thirteen days of the new year amount to \$9,143.50, an average increase of over \$700 per day. It certainly seems as if there was no limit to the earning capacity of this road, and it is fully deserving of the prominent place it occupies in the estimation of the public. Two thousand nine hundred and twenty-two shares of old and new s och sold two shares of old and news ock sold up to yesterday, opening at 273 it sold steadily up to 279.

earnings of this road amounts to \$5,587.92, an average increase of over \$465 per day, and as the bicycle fad is gradually diminishing the earnings may be expected to increase in a greater ratio.

#### MONTREAL GAS.

MONTREAL GAS. This is the only live stock which is lower to-day that it was ten years ago, owing doubtless to electric com-petition, and although one of the cheapest on the list does not seem to have much life. Two hundred and seventy-seven shares sold at prices from 185 to 187<sup>1</sup>/<sub>2</sub>. The first sale of the week was made a 185, from which price it sold up to 187<sup>1</sup>/<sub>2</sub> with a brok-ers lot at 188, and closed yesterday at 186<sup>1</sup>/<sub>2</sub> to 188.

## LOYAL ELECTRIC.

Two hundred and fifty-one shares of this stock changed hands in this week at advancing prices. On the Sth 25 shares sold at 153<sup>§</sup>, it advanced on the 12th from 155 to 158, and closed yesterday at 157 bid, 157<sup>§</sup> asked. The upward tendency shows that it pos-sesses friends, but we think it would be wiser before paying present prices to see what will be the out-come of the various companies in which it is interested HALLEAX RAILWAY

## HALIFAX RAILWAY.

This st ck has sold to the extent of This st ck has sold to the extent of 231 shares between 131 and 130. The hopes entertained by the friends of this Company that it would sell up to 250 this year we do not think will be realized. In the absence of any defin-ite statement as to its earnings it is very difficult for the public to esti-mate the value of this stock. It can therefore only be bought upon the yield it gives to investors and on that basis at present figures it is high enough. enough.

## DOMINION COTTON.

DOMINION COTTON. The uncertain feeling brought about by the talk of new opposition in cotton has evidently evaporated, in fact from what we hear it is doubt-ful whether the proposed company will materiafize, as it is the opinion in the best informed circles that the Dominion of Canada has all the Cotton Mills warranted by the de-mand for this class of goods. The stock has consequently recovered its lost ground and closes the week firm with 99 asked and 98<sup>§</sup> bid, last sales having been made at the latter price. With its present vigorous management we consider the stock at present prices cheap, paying as it does a regular quarterly dividend of 14 per cent. 287 shares sold the bulk of the sales having taken place yes-terday at about top prices.

## RICHELIEU & ONTARIO.

The half-yearly dividend of 3 p.c. of this company has been declared payable in November. We under-stand that this company will have a remarkably fine statement to pre-sent to its shareholders for this year's business. Its earnings have year's business. Its earnings have been larger than last year, and its business all through has been of a most satisfactory nature. 125 shares have been sold for which par has been paid and it closed yesterday 99 to 102 to 102.

## COMMERCIAL CABLE.

Sales of 175 shares of this stock have been made at prices of this stock have been made at prices ranging fr m 181 to 181<sup>1</sup>. The supply of this stock is very limit d, and is being gradually absorbed for investment, and will soon disappear from the market. Its future is of the brightest and a refuture is of the brightest and a re-currence of the violent fluctuations which have taken place in the past are not likely to be repeated.

## WAR EAGLE.

# CHICAGO MARKET,

# MARKET OPENS STRONG.

# WHEAT LOSES ½ CENT ON THE DAY.

# CORN AND PROVISIONS ABOUT STEADY.

## Chicago Oct 15.

The first sales were the best all along the line. The cables were steady to strong following quotations of vesterday from this side. For some time to come there will be very little in the wheat market, which should be sold on all advances for small turns. December opened at 65% and closed at 64%. May ranged between 66% and 65½.

Corn was a shade easier and Provisions closed at yesterday's prices.

A STATE AND A STATE AND A STATE			

# INVESTMENTS.

A few years ago Bank shares were largely speculated in and bought and sold on margin the same as any other stock. Bonds, debentures and mortgages were then looked upon as the safe retreat for investment money. During the past ten years there has been a complete change in the channels for investment. Banks and Insurance companies have absorbed all the bonds and debentures offered, so that savings had either to be placed in Banks at interest or invested in Bank shares or shares of other corporations, with the result that but little of this kind of investment is ob ainable and now possess a market value that is in many cases entirely out of proportion to the intrinsic worth of the properties, and therisks entailed in their possession.

A st ong effort was made by the Government, when they extended the chasters of the Banks until 1901, to compel Banks to appoint auditors whose duty it would be to examine into the bu iness of Banks. A united protest on the part of Bankers caused the clause to be rescinded. It is a question whether the Government's action in the matter was wise. The impossibility of making a thorough investigation of large Banks by outsiders must be admitted, but this question should be thoroughly gone into and some means devised for the prevention of a repetition of some past robberies. Had an auditor experienced in Banking been allowed entrance into the Peoples Bank would it have been possible to have passed off bons of hundreds of thousands as specie; and would not hundreds of thousands of dollars been saved to innocent investors and depositors in this Bank, had the current rumors of the street been followed up and investigated by even a moderately posted independent inspector? This miserable sink of corruption always reported "debts overdue and not yet settled" as very small. This was generally the only truth contained in their statements. Their renewals and "never to become due" bons were never overdue.

Another case where an independent audit would have been of benefit, to shareholders at least, was in the Ontario Bank. In the annual report of 1890 the President, Sir W. P. Howland, was made to say, amongst other things, "that for losses ascertained and *anticipated*" they would appropriate \$250,000. That for fear this would not meet everything they would cut off another \$75,000, hoping, however, this would be found more than ample.

The President later on at the meeting states: "we havemade a full estimate of any loss which in our judgment can possibly accrue and have made full provision therefor." The President further states: "the Bank is now in a position where any profits that arise can be appropriated to the stockholders or to the reinstatement of the reserve fund," etc., etc.

In answer to the Rev. Mr. St the then General Manager, Mr. Holland endorses and emphasizes all that the President said "you are justified in concluding that the Bank's statement as it stands to-day, so far as the valuation of a live business can be made, can be relied upon, and that its business is in a sound and healthy condition and its assets clear of all bad and doubtful items, according to the best judgment the directors and I can give them." In answer to Mr. Harty, who asked for some further explanations, Mr. Howland gracefully retires behind the fortress, -- so often used by G. M's and Presidents who wish to avoid unpleasant questions,-I do not think it is in the interests of the Bank, etc., etc. To give the information would be a pleasure, etc.; but!!! The real facts and standing of the Bank were, however, more correctly given a few months later, when, in addition to the \$250,000 which was "sufficient," and the \$75,000 which was to make "doubly sure," this institution had to write off a further sum of \$500,000 of capital and nearly

the whole of its \$250,000 of rest and was then only able to declare annual dividends of 5 per cent. per annum on the reduced capi al.

From the foregoing statements it is evident that the calculations and opinions of the best informed are not to be too closely relied on, and Banks running under full sail should be closely watched.

Rests and reserves are good in their way, but should be considered more in proportion to the business done by the Bank than the percentage they bear to their capital.

In 1880 current loans and discounts of the chartered Banks were 105 millions, in 1889 they had run up to 150 millions, to-day they are 218 millions. In 1880 the paid up capital of the chartered Banks was about 60 millions, to-day they are about 62 millions. In view of these facts it is no wonder that earnings should be large. The point to be considered by investors is, whether rests and reserves are in proportion to the immense volume of business current.

The dangers attached to the holding of Bank shares are numerous, as many know to their cost. Such institutions as the Mechanics the Exchange and the Central were not half such dangerous rocks as some others f r to them—the first and third especially—a large amount of discredit was always attached.

The institutions which caused the most widespread suffering were the Metropolitan, Consolidated and Federal Banks. On the directorate of these institutions were men whose names inspired confidence and who in their own business were eminently successful. An examination of the standing of these institutions accordto their statements, issued shortly before their collapse, and endorsed by some of the leading business men in the community, who were on their boards of directions, gave no warning of the squalls to come. Perhaps the most disgraciful mismanagement was in the case of the consolidated whose methods in many ways closely resembled those pursued later on by the Peoples Bank.

The president in this instance was regarded as the most experienced financier of his day, on the board were men of real integrity and very successful in their own bu-iness the cashier was regarded by bankers as a veritable Solon in his line, yet the unfortunateshareholder on the winding up of the Bank lost more than three quarters of his investment.

Assets of Banks will always be weighed in a different balance by different authorities. No new cashier ever accepts the valuation of his predecessor but on assuming charge always pares assets down largely.

In paying current prices for Bank shares the investor in nine cases out of ten is giving full value, and in most cases their scarcity alone accounts for the heavy premiums.

For purposes of comparison the quotations of ten years ago are of interest, the high and low for 1888 of

thi, ty to seventy per cent. discount. Ri, helieu sold as low as 37<sup>§</sup>. Montreal Gas alone claims the distinction of ruling at a lower price; its range for 1888 being 1834 to 2164.

real Gas alone chains the distinction of ruling at a lower price; its range for 1888 being 183½ to 216½. At a comparatively recent date several new enterprises have been launched on the street, and the very favorable manner in which they have been r. ceived must have caused much gratification to the promoters. Toronto Ry, which was originally issued at 10c on the dollar is above par. Halifax Tramway issued at 15c sells at 130. St. John Electric road largely issued at 15, is now 145. Dominion Coal issued at various prices, commands 25 for the common and 110 for the preferred. Heat & Light, exact particulars of capitalization not known to us, sold within a short time up in the fifties.

That most of these corpora ions have been successful, even beyond the hopes of the promoters in many in-tances, proves that Canada is a great field for pluck and enterprise. The Electric roads have created

The Electric roads have created for themselves an amount of traffic which yields large dividends on par and warrants their present high quotations, as their earnings are constantly increasing and their operating expenses continually being lowered.

As the risks of bad debts are entirely abs nt with this class of business, the shares have become favorites with investors who are willing to purchase them on a basis of a small return o capital, as the prospects of larger division of profits in the future are considered good.

The range of prices in 1888 for miscellaneous shares and their present quotations follow:

High	Low	Now
Mont. Tel. in 1888 961	$55\frac{1}{2}$	175
Dom. Telegraph 90	90	130
Montreal Gas	$193\frac{1}{2}$	187
Richelieu 57	371	100
Montreal St. Ry 223	181	278

Bell Telephone100	90	173
Montreal Cotton Co. 93	69	158
Hoch.Cot. (now Dom) 1271	1021	98
Merchants M'f'g Co. 70	50	$142\frac{1}{2}$

The public have doubtless heard a good deal about the "Subsidized Press." It has been, and is still the practice of the press to accept the statements given out by the directors and the management of public companies in their entirety as being. correct in their findings without any attempt at analysis or criticism. In fact, the accounts of the annual meetings of quite a number of our public institutions are written by interested parties, who carefully eliminate anything of a disagreeable nature which may have transpired at such meetings, and allow to be printed only such a record as will reflect credit on the directors and management. Of course these statements in the majority of instances are paid for at so much per line, and are quite a source of revenue to the papers who publish them,- hence the term "subsidized press."

Now we wish it to be distinctly understood that the EXCHANGE NEWS is published not in the interest of the officials of public companies, who wish to dazzle the eyes of their shareholders by couleur de rosest atements, but in the interest of investors whose hard-earned dollars they handle; and we propose to give as occasion may

During the period under review the miscellaneous list has also experienced heavy appreciation in values. Montreal Telegraph which was then looked askance at, as an investment, has since been almost entirely taken off the Street by investors. Dominion Telegraph has shared the same experience. Montreal Street Railway which was then capitalized at \$600,000 has now a capitalization of \$5,000,000 and is selling at 278 it was then selling nearly one hundred points lower.

Canadian Pacific was in the fifties, it now sells in the eighties. The Cottons, with the exception of Dominion which has since largely increased its capital, were selling at from

arise a free and independent criticism of the financial statements of the institutions in which the money of the public is invested.

We have been informed that interested brokers have in some instances resented our criticism of the annual statements published by "The Royal Electric," and have stated that our apparently hostile criticism was published because advertising which we applied for was refused. This state-ment is absolutely false. When their annual statement was published, in our notice of same we stated there were weak points in it. At that time we did not wish to criticise the statewe did not wish to criticise the state-ment without giving the manage-ment an opportunity of explaining certain points, but the explanation not throwing any light on the matter, we went ahead with our criticism on the basis of their own figures. We have been told that our criticism has had the effect of sending the stock With that we have nothing to and we care not whether the up. do, and we care not whether the price of the stock goes up or down. Facts are stubborn things. Are our figures correct? If they are not, show us in what particular. We are open to correction If they are the open to correction. If they are, the market value of the stock to-day or to-morrow cannot alter that fact.
