Notice to Dog Owners

In compliance with a resolution passed by the Village Council at the last meeting, all dogs running at large in the Village of Waterdown without tags after June 1st, 1922, the owners will be subject to a fine of \$5, or the dog destroyed.

J. C. MEDLAR,
Clerk.

For Sale

One Covered Wagon and one Open Wagon in good condition, 1000 mile axles. Will sell cheap. Apply to Thos. Hunter, Hamilton Road.

How to Increase Your Appetite

Science has made wonderful strides in recent years, especially in determining food values. One of the most far-reaching recent discoveries deals with the important part Vitamines play in general health.

Those suffering from Malnutrition, Nervousness, Skin Troubles, Sallow Complexion and Lack of Weight are usually deficient in Vitamines. This is due to the fact that many of the Vitamine bearing portions of foods are discarded in the process of preparation.

To those suffering from any of the above troubles, we recommend Nyal Vitamine Tablets which contain Yeast in concentrated form, and other Vitamines in combination with Iron. Nyal Vitamine Tablets will increase your appetite, build up the nervous system, and put on firm, healthy flesh. Try them and be convinced. Price \$1.00 at

COURT OF REVISION

Village of Waterdown

The Court of Revision to hear and determine the appeals against the Assessment Roll for the Village of Waterdown for the year 1922, will hold its first sitting at the

Old School House, Waterdown

ON

Monday, June 12th, 1922

At 8 o'clock p. m.

Of which all persons interested are required to take notice.

J. C. MEDLAR,
Clerk of Said Municipality.

Waterdown, May 18th, 1922.

COURT OF REVISION

Township of East Flamboro

The Court of Revision to hear and determine the appeals against the Assessment Roll for the Township of East Flamboro for the year 1922, will hold its first sitting at the

Township Hall, Waterdown

ON

Monday, June 5th, 1922

At 2 o'clock p. m.

Of which all persons interested are required to take notice.

L. J. MULLOCK,
Clerk of Said Municipality.

Waterdown, May 18th, 1922.

In Memoriam

In loving memory of John Arthur Robson, who departed this life on May 20th, 1921.

The month of May again is here,
To us the saddest of the year;
We do not know who next may fall
Beneath that lifted rod;
One must be first, so let us all
Prepare to meet our God.

Wife and family.

Births

BINKLEY—At Waterdown Wednesday, May 10th, 1922, to Mr. and Mrs. Blake Binkley, a son.

ALLEN—At Waterdown on Monday, May 15th, 1922, to Mr. and Mrs. Thos. Allen, a son.

ROCKETT—At St. Joseph's Hospital, Hamilton, Monday, May 15th, 1922, to Mr. and Mrs. Walter Rockett, a son.

Locals

Mrs. Scoones of Carlisle is visiting her daughter, Mrs. Kay, this week.

Mr. and Mrs. John Johnstone of Toronto were Sunday visitors in the village.

Rev. C. L. Poole will preach in Calvary Church, Hamilton, Sunday evening.

Mr. H. D. Binkley has sold his farm in Lincoln, and will return to the village.

Mrs. W. J. Wiggins of Napanee was the guest of Mrs. J. O. McGregor on Wednesday.

Mr. and Mrs. Chas. Cust, of Hamilton, visited with Mr. and Mrs. A. Newell on Sunday.

Mrs. Walker Drummond motored to Buffalo on Monday to spend a few days with her sister.

Miss Linn of Guelph was a visitor with Mrs. R. Simpson and Miss Campbell on Sunday.

Mr. and Mrs. P. W. Brown of Buffalo spent the week end at the home of Mr. A. E. Alton.

The Misses Featherstone of Toronto visited with their sister, Mrs. Thos. Bowen, on Sunday.

Mr. A. Dale and Mr. W. J. Spence attended the Retail Grocers' Convention at Toronto this week.

The Kings Daughters will serve lunch in the new school on the 24th from 1 to 6 in the afternoon.

On the 24th the Juniors and the Wanderers will play at 9 a. m., and the Intermediates and Beavers at 11 o'clock.

Mr. and Mrs. W. McMillan of Hamilton were the guests of Mr. and Mrs. N. McMillan over the week end.

Mr. and Mrs. C. L. Robertson and Mr. and Mrs. J. S. Robertson, of Fenwick, were Sunday guests of Rev. C. L. and Mrs. Poole.

The Ladies' Aid of the Methodist church will hold a sale of home made baking Saturday afternoon, May 27th, in the Sunday school room.

Mothers' Day was observed Sunday in the local churches with special services, hymns and floral displays, while nearly everyone wore a flower.

Rev. C. L. and Mrs. Poole, Mr. O. B. Griffin and daughter Evelyn, and Miss Luella Roberts, attended the Missionary Convention at Kitchener this week.

The postponed meeting of the Poultry Association will be held on Thursday evening, May 25th in the Township hall. Election of officers and other important business.

The Agricultural Society will meet Friday evening to consider the fair grounds site. The committee has obtained prices on some good sites, and all interested are invited to attend the meeting.

Miss Ellen Baxter has had her house on Mill street re-roofed with the new Art-craft roofing, which greatly adds to the appearance of the street. The work was entrusted to a reliable Hamilton firm.

Base Ball

Last Saturday was a scene of a double triumph on the ball field here when both Junior and Intermediate teams came out victorious. Snappy running catches by Jack Kirk saved the situation different times. Why the manager pulled Kirk remains still a mystery.

Shortstop Tommy McNamara of the Juniors double play. Ribson's batting and Arnold's pitching were features of the Junior game. Although the game was very loose at first, Waterdown soon tightened up and held the Olympics to no score in the last five innings. Manager Lovejoy has a snug little team of ball players, and it will take some beating before they are counted out of the running.

The Intermediates are showing an improvement in batting, as shown by coming from behind and pulling out a victory. The Mooney brothers are a sweet battery, and it will take a lot to beat them.

Fast Game Saturday

The Waterdown Intermediates and Harvesters of Hamilton play here Saturday afternoon at 3 o'clock. The Harvesters is known as the speediest team in Hamilton, and a fast game is expected.

Annual Meeting of the A. Y. P. A.

The annual meeting of the A. Y. P. A. of Grace Church was held in the Parish hall Thursday evening, May 11th. The reports of the officers, which were encouraging, were read and adopted. The retiring president Mr. Robert Buchan, then requested Rev. Mr. Leake to take the chair, and the offices were declared vacant, and nominations for officers for the ensuing year were called for.

The following officers were elected. President, Mrs. Robert Griffin. Vice President, Miss May Cutter (re-elected). Secretary, Miss Laura Leake (re-elected). Treasurer, Mr. Edward Brown (re-elected). Editorial Secretary, Miss Grace Lovejoy. Executive Committee, Mr. Robert Buchan, Mr. Thomas McDonald, Mrs. Leake, Miss Atkins, Mrs. Davidson.

Immediately after the election the new president took the chair, and in a short speech thanked the members and promised devotion to the best interests of the association.

It was decided to hold meetings every second Thursday from June to October 1st.

Greenville

Mr. Jacob Cochenour, an old resident of this place, was buried here Tuesday afternoon.

Miss Lizzie Green was visiting friends in Rockton last Sunday.

Mr. Harry Smith of New York spent a few days with Mr. Frank Cochenour.

Rev. S. and Mrs. Bennetts of Waterdown were calling on friends here this week.

Mr. and Mrs. Gilbert Clark have motored to Carney, Muskoka to visit Mr. Clark's sister, Mrs. I. Thornton.

Prizes for Field Events

The following prizes will be awarded the winners in the Victoria Day field sports.

Hop, Step and Jump—1st. Set of auto chains value \$3.75, donated by Wm. Springer and Son. 2nd. Pair of running shoes, value \$2, donated by E. Gordon.

High Jump—1st. \$5 worth of smoked meat, donated by the Sterling Markets. 2nd. Cap donated by Eagers.

Running Broad Jump—1st. 20 lb. bag granulated sugar, by Carroll's. 2nd. Best tie in store, donated by O. B. Griffin.

100 Yard Dash—1st. Box cigars, value \$5, donated by J. Kirk. 2nd. \$3 worth of groceries, donated by A. Dale.

220 Yard Dash—1st. Fountain pen, value \$5, donated by W. H. Torrance. 2nd. Gillette razor, value \$2.50, donated by A. Featherston.

440 Yard Dash—1st. Box cigars, value \$5, donated by Herb. Oakes. 2nd. Brush and comb, value \$3.50, donated by Alton Bros.

Junior Events for boys 15 years and under, consisting of 100 yard dash, high jump, hop step and jump, and running broad jump. Valuable prizes will be given by Dr. Vance, Dr. Hopper, Henry Slater, Albert Feilde, A. E. Alton, Frank Speck, Geo. Potts, S. Weaver, O. B. Griffin, Miley Springer, R. M. Spence, Geo. Nicholson, J. W. Griffin, A. Lovejoy, Darius Springer, P. H. Metzger, Geo. Dougherty and others.

All prizes will be presented the night of the Minstrel show.

Municipal Elections in December

An amendment to the Municipal Act provides for the holding of municipal elections on the first Monday in December, if the municipality desires to take advantage of the provision. Thus if Waterdown wishes, the elections may be held on Monday, December 4th, for 1923. All that the Council requires to do to bring this change into effect is to pass a by-law adopting this provision before the first of November. This change has much to recommend it. Under present conditions the nominations, election campaign if any, and the election come in the midst of the Christmas and New Year's holiday season, when citizens generally are at the busiest of the business season of the year, and when family and social festivities are at their height. By following the amendment provided, the elections will be over and all the attendant turmoil settled, nearly a month before the holiday trade and Christmas-tide activities.

CARD OF THANKS

Mr. J. Ellsworth and family wish to thank the people of Waterdown, also the W. A. of Grace Church, for kindness shown in their recent sad bereavement.

Kilbride

The Ladies Aid of the Kilbride Presbyterian Church will hold their Anniversary on Sunday, May 28th at 2.30 and 7.30 p. m. Services will be conducted by Rev. Mr. Hender-shot of Carlisle Methodist church.

How to Retain Youth in Spirit and Appearance

Paper given by Mrs. G. H. Greene at the Women's Institute Meeting

When we accomplish the former, the latter will follow as a natural consequence. Youth is a beautiful gift from our Creator. It begins at birth and passing through a variety of stages of development it gradually mellows into beautiful old age, to end only at the grave.

The spirit of youth never grows old. It simply ripens in the various experiences and vicissitudes of life. We wonder why so many persons lose the charm of youth. I say lose, because it is never taken from us by anyone. We simply let go, and when it has completely gone from us, it never returns. Outward make-up is not youth. It is but a poor camouflage at best.

The spirit of cheerfulness and optimism is twin sister to youthfulness. Let us be cheerful and take a hearty interest in youthful pursuits and ambitions, having an ever ready sympathy and broad-minded consideration for the welfare of our young folks.

Be cheerful. Be optimistic. Be helpful. Do not point to the bright side, but just live on the bright side. Cheerful folks can help us in such a wonderful way to see the glint of gold in the darkest clouds. They talk to us of sunshine and gladness, the beauty of nature, the loveliness of springtime (which is the youth of the year), the birds and their music, happiness and so on, and by such an inspiration lift us out of the gloom of everyday disappointments and worries into self-forgetfulness. Let us forget ourselves, and there is no better way than by taking an interest in helping some one else.

The real keynote of youthfulness is contentment. You all know how strongly St. Paul preached about contentment, and I know of nothing in this life more to be desired than a happy and contented mind. Have you ever studied the countenance of a care-free happy child? He knows nothing of worry, envy or suspicion, and only in the rich warm soil of sunshine will the spirit of youth flourish. As I said in the beginning when we retain the spirit of youth by a cheery usefulness all down along the line into ripe old age, our appearance will play the proper accompaniment.

WINDOW AND VERANDAHS

Brightened With Flower Boxes
and Hanging Baskets.

The Boxes Must Be Strong and Durable—The Soil Should Be Kept Rich and Well Watered—Hints on Arrangement of Plants.

(Contributed by Ontario Department of Agriculture, Toronto.)

Window boxes should be made strong and durable. Each box should be nine or ten inches wide at top and bottom, seven or eight inches deep inside measurements, of a suitable length to fit the window, not over four feet in length, made of one-inch dressed lumber, and when finished painted a dull green color. Half-inch holes should be bored about six inches apart through the bottom of the box for drainage purposes. Verandah boxes should be about the same measurements. A large iron screw eye, or iron staple, should be put at each top, outside (front) corner of the window boxes. A strong piece of wire should be attached to these long enough to attach to another screw eye or staple placed in the window frame about a foot higher up than top of box, so that the box can be fastened securely in position. Boxes and barrels may be made more artistic and rustic looking by nailing moss and fungi covered bark, of native trees, on the outside. This not only adds to their attractiveness but also helps to keep the plants moist and cool at the roots in summer time. The bark from Basswood, Elm, Cedar or Birch trees will be found suitable. By the exercise of a little taste and originality, very pretty boxes can be made at slight cost. Verandah boxes and rustic stands can be made in something the same way. One of the prettiest rustic stands I have ever seen was made from the lower half of a sugar barrel, reinforced by a thickness of half-inch board nailed on the bottom of the barrel outside to strengthen it, with three-quarter inch holes bored through for drainage purposes.

Hanging Baskets.

Wire hanging baskets lined with green moss or sphagnum moss are very effective, especially for a sunny position. The clay baskets dry out very quickly and are better suited for a shady position than a sunny one.

Soil.

The soil for window boxes must be rich in fertilizers if the best results are to be obtained. It is a good plan to put an inch in depth of well rotted barnyard manure, or dry cow manure, near the bottom of each box, before filling it up with the prepared soil. About an inch in depth of soil may be placed in the bottom of the box first, and the fertilizers named spread over it, or about half a pound of bone meal may be used as a substitute for the first named fertilizers. These fertilizers will help sustain plant growth late in the season when the soil has become exhausted. One part sand, one part leaf mould (black soil from the bush) and seven or eight parts of light loamy soil well mixed, with two parts of either of the fertilizers named added, will make a good soil for window boxes, rustic stands, etc.

The best time to fill window boxes is when they are to be placed in position toward the end of May or early in June. The boxes may be set in position and well secured, before they are filled with soil or plants, as they are heavy and difficult to set in position when filled.

Arrangement of Plants.

Tall growing plants should be placed at the back of the box nearest the window. Dwarf plants and trailing plants should then be put around the front and ends of the box. Any space between these in the centre of the box should be filled with medium height plants. It is a good plan to first fill the box nearly level full with soil, then stand the plants on the surface where they are to be planted finally. By doing this the plants can be changed about and rearranged, and a good idea of the arrangement and effect desired can be obtained before finally planting them. For color effect, for instance, too much of any one color, especially the heavier colors, should not be placed in any one part of the box, whether of dwarf or tall plants, as there would not then be a proper balance of color, something that would detract from the effect considerably. By standing the plants on the surface of the soil before plant-

ing as mentioned, any change required can be easily made. Use bright colored plants mainly whether of foliage or flowers, and if possible, make use of good sized plants. Boxes filled as described at the time of setting out, will do much better than boxes filled indoors early in the season. Boxes filled very early indoors, often get shabby as soon as they are set out, and sometimes become positively unsightly before the summer season is half over.

Care of Boxes.

Window boxes, etc., require copious and frequent waterings every day, or at least every second day, especially during hot weather. The soil should be well soaked with water when watering the boxes. Toward the end of the season, in July and August, some liquid fertilizer may be given the plants.—The late Wm. Hunt, O. A. College, Guelph.

E. G. Bennett, of Missouri, says: "When you sell grain you wholesale the fertility of your soil; when you sell butter-fat you retail water, feed and sunshine."

Popular Varieties of Strawberries.

From the beginning of commercial strawberry growing, about 1800, the Large Early Scarlet was the leading variety grown in the United States. About 1860 the Wilson replaced this variety, because it was much firmer and was more suitable for shipping to distant markets, and its hardiness and good bearing qualities helped to make strawberry growing more popular in Ontario. From about 1880 varieties began to replace each other in more rapid succession, until at present 25 sorts constitute about 90 per cent. of the total commercial strawberry acreage. The Klondike, the leading variety in the Southern States, heads the list, constituting 28 per cent. of the total strawberry acreage. The Aroma, the favorite variety in the South Central States, is second with 13 per cent. of the total acreage, while the Dunlap in the Northern States ranks third, with 10 per cent. In Ontario among the most popular varieties commercially are the Glen Mary, Williams, Dunlap, Gandy, Splendid, Parsons, and Sample. Among the fall bearers the Superb and Progressive are preferred.

Feeding the Cow Before Calving.

The proper time to begin feeding a dairy cow is six or eight weeks before calving, and practical dairymen agree that this preparation has more to do with the amount of milk and butter fat which a cow produces during the lactation period than does the feeding during any other period. For cows calving during the summer or early fall most dairymen like to have a small pasture away from the herd but with an abundance of grass, and, in addition, they like to feed a suitable grain mixture. Corn silage, with clover or alfalfa hay and a limited grain ration of three parts ground oats, two parts of bran, and one part of oil meal is especially good for cows calving during winter or early spring. After calving the cows should be brought slowly up to full feed and thereby steadily to a higher production.

Feeding Young Chickens.

Young chickens should be fed from three to five times daily, depending upon one's experience in feeding, says the United States Department of Agriculture. Undoubtedly chickens can be grown faster by feeding five times daily than by feeding three times daily, but it should be borne in mind that more harm can be done to the young chickens by overfeeding than by under-feeding, and at no time should they be fed more than barely to satisfy their appetites and to keep them exercising, except at the evening or last meal, when they should be given all they will eat. Great care must be exercised not to over-feed young chicks that are content, as leg weakness is apt to result.

Playing Whist for Canada.

When Mr. Labouchere was an attache at Washington he went down with his chief to a small inn in Virginia to meet Mr. Marcy, the American Secretary of State, for the purpose of discussing a reciprocity treaty between the United States and Canada. Mr. Marcy, usually the most genial of men, was as cross as a bear and would agree to nothing. Mr. Labouchere thereupon asked that Minister's private secretary to tell him, in confidence, what was the matter. "He is not getting his rubber of whist," was the answer. After that the British representative proposed every night a rubber of whist, which he invariably lost. Mr. Marcy was immensely pleased at beating the Britisher at what he called "their own game," and his good humor immediately returned. "Every morning," said Mr. Labouchere, in relating the incident, "when the details of the treaty were being discussed we had our revenge and scored a few points for Canada."

CARE OF THE TRACTOR

Practical Advice About Running
This Farm Machine.

House the Tractor—It Must Be Kept Clean—Be Careful in Lubricating With Oils and Grease—Air Cleaning.

(Contributed by Ontario Department of Agriculture, Toronto.)

In the year 1893 the Hart-Parr Co. built their first tractor. During 1910 there were about 1,300 tractors sold in the United States, and in 1920 this number was increased to 175,000. This year the sales are greater than the total for the past ten years, many dealers being sold out in the first four months of the year. These figures are a pretty fair indication that the tractor is taking its place as a farm implement. Farm implements generally have a very short life, and tractor depreciation is usually reckoned at from 20 to 25 per cent.

Housing.

A good tractor deserves the best of protection and when not in use or stored for the winter should be in a shed that is weather tight. If it is to be left in the field over night it should be covered with a waterproof canvas to properly protect the wiring, magneto, etc.

Cleaning.

Exposure is not by any means the only ill-treatment to which a tractor is subjected. Have you not often seen them so covered with dirt and grease that you wonder how they can carry the extra load? If the work of carrying it was all it would not be so bad, but the great trouble with these dirt accumulations is that sooner or later the grit is going to work into the bearings and get into the carburetor, with the result that you have ground-out bushings and scored cylinders. To clean off these accumulations each day will take but a few moments and pay you well. To allow them to stand for a week or so means that the heat of the engine will burn them and make their removal a very difficult matter.

Lubricating.

Oil in a gas engine or tractor serves three purposes: 1, general lubrication; 2, compression seal in the cylinder; 3, cooling.

For each part of an engine that requires oil there must be an adequate supply or that part is going to fail sooner or later. It has been said that not one man in a hundred knows every oil hole on his tractor. This is nearer the truth than may be imagined, and part of the fault lies with the manufacturer, who places oil holes or grease cups in places where it would almost require a detective to find them. You must study your oiling chart, and then follow the system of oiling as laid down in your tractor manual. Give the manufacturer credit for knowing the oiling needs of his product. Oils and greases should be bought most carefully. Each manufacturer will tell you what oil to use in his particular machine. The reason different tractors call for different oils is because they differ in construction, speed and operating temperature. To make sure that you are getting the oil recommended, buy it in sealed containers.

Mechanical Oilers.

Some tractors are equipped with mechanical oilers. In these cases fresh oil is constantly supplied to certain parts. These oilers work so well that they are often forgotten. Not long ago a tractor operator heard one of his cylinders blowing gas past the piston. On examination it was found that the piston was dry and badly scored. Further examination revealed the fact that the little pump in the oiler which should have been supplying oil to that cylinder had stopped working. The oiler was drained and washed out well with kerosene. Then it was turned out and fresh oil put into the oiler. It was again turned by hand and again that particular pump did not work. The oiler was now removed and taken apart when, after quite a careful search, a small bit of chaff was found in one of the fine oil passages. The bit of chaff would let the thin kerosene pass but stopped the thick cylinder oil.

Equal care as to cleanliness should be observed as to greases. If grit is on your hands or whatever you are using to fill the grease cups with, you may be sure you are going to have scored bearings. In filling the cups see that there is no air left in them and then turn them down until you see grease squeezed out of the bearing. This makes sure that it is getting where it will do good. It is wasting money to buy a low grade grease because they consist mainly of a low grade soap and a large amount of water and will freeze. Cheap greases also contain acid fats and are certain to spoil the highly-finished surfaces of anti-friction bearings.

Air Cleaning.

Do not neglect the air cleaner. If water is used, for example, it should

THE PRIZE WINNING PERCHERON STALLION
Photo taken by W. W. Forsythe, Dundas.

JASLO Nos. (10657) 119345 Form A-"One"
Enrollment No. 5720

Had the honor of winning first prize and championship at London and sweepstakes at Ottawa. He also is on the honor roll of premium horses, meaning that the Government pay a cash royalty to his owners. A premium horse is a horse government inspected for No. 1 class, and must be absolutely faultless. In considering these honors which Jaslo has won we are safe in saying he is one of the finest horses of his breed ever brought to Canada. Jaslo is not only a grand draft horse, but a wonderful individual, a rich dapple grey, with plenty of style and action, and weighs a ton.

Mr. J. Boad, the government representative of Mr. Wade, Agriculture Department, Parliament Buildings, Toronto, inspected Jaslo on Tuesday, May 16th 1922, for premium. Horses must be inspected regularly each year for this class. Jaslo was placed in Class A No. 1, which is a great honor, and also increased the cash royalty paid by the government to his owners. Jaslo is the first premium horse ever owned in this district.

ROUTE

MONDAY—Jaslo will leave his own stable, Central Hotel, Dundas, on Monday morning and proceed to John Bolton's, Brock Road for noon; thence to Wm. Anderson's, near Freeton, for night.

TUESDAY—To E. Mount's Mountsberg, for noon; thence to E. Blagden's, Carlisle, for night.

WEDNESDAY—To John Ptolemy's, near Flamboro Centre, for noon; thence to S. Frank Smith's, Waterdown, for night.

THURSDAY—To Thos. Chappel's, near Bowman School, for noon; thence to his own stables for night.

FRIDAY—Morning will go by way of the old Ancaster Road to Ancaster Fair Grounds, where he will remain until Saturday morning.

SATURDAY—Morning will return by way of Sulphur Springs and the Governor's Road to his own stables where he will remain until the following Monday.

For further particulars apply at his own stables or to J. W. Howell, Sec.-Treas. Phone Dundas 624 r 6.

Terms and Conditions

To insure a foal \$20.00, payable February 1st, 1923. Parties trying mares with the intention of breeding and not returning them regularly must pay insurance whether in foal or not. Parties disposing of their mares before foaling time must pay insurance whether in foal or not. All accidents at owner's risk.
