BANK ACCOUNT BUNDLED WHERE DID MONEY GO?

More Peculiar Features Develop in the Banco Gianetti Affair— Friends From New York Say That Funds Were Duly For- warded.

Significant facts developed yesterday when the safe of the Banco Gianetti, 180 West Front-street, was opened by an expert under supervision of Inspector of Detectives Duncan. Documents were found by which it was shown that withdrawals made by Gianetti, who ended his life at the Cecil Hotel, West Queen-street, Wednesday, had reduced the office account from \$45,236.96, on June 30, to \$16,621.21 on July 30, and that the balance now stands at a few dollars.

Where has this money gone? This is the question which is driving the detectives and the lawyers involved, to say nothing of the whole of "Little Italy," to a state of distraction.

One explanation is that these reductions show the transmission of deposited moneys of the local Italians to New York, in which case a shade of the disquiet will be allayed.

Eric Armour, who is counsel for a number of the depositors, is of the opinion that Gianetti has been operating in stocks, which points another possible road for the moneys missed.

In support of the first theory are the sheets of receipts produced by Domenico Vetromile, and F. E. Martirani, both of New York, who declare these sheets to show that all remittances have arrived in New York.

In this regard the detectives point out that these sheets are not receipts from a third party nor are any such produced to show that the Banco Gianetti forwarded their holdings.

Italians do not hesitate to say that Gianetti prepared these sheets while in New York.

Gave a Blank Check.
It is not clearly shown what is the connection of Vetromile and Martirani with the bank, and with the affairs of the dead man. That they are closely concerned is shown in many ways.

Vetromile declares that before leaving New York he gave Gianetti a check on his own personal account. This check, he says, is made out in blank, and he says might have been used by Gianetti to any amount up to \$50,000 or more.

He gives as his reason for its issuance his friendship for Gianetti. He declares that Gianetti asked him \$1000 for this check, and that he had to see him in New York, diamond jewelry to the value of \$1000, which Vetromile had given him.

A diamond ring, thought to be a part of this jewelry, was found last night by Norman Craig, the undertaker, in whose custody the body is. The jewel was found coated with blood, pinned in the dead man's tie. Other jewelry may be found in the man in American 1874 found on the man in American. Vetromile speaks in addition to which \$200 in Italian notes on the dead man, while they thoroughly establish suicide, in other respects do not cast much light.

What is the chief constable declares that, owing to impending dishonor, he must die. It declares that no one else is implicated, and that the cheque to himself is implicated, and that the brother, Mario Gianetti, is in his way his partners. It directs the cheque to Vetromile, but no such cheque was found in his effects.

His letter to Miss Eva Armstrong, his sweetest, who lives at 4857 Sherbrooke-street, Montreal, reads in part as follows:
"Dear:
I have worked honestly but my competitors are very bad.
"They have done in such a way that I have a warrant of arrest against me."
"All my things are all right, but the rush on my Toronto branch will bring me to the Italian consul."
"I care too much for my honor."
"So please excuse, I go to die."
"He again protests, and neither Vetromile nor his brother are associated with him in his business. He speaks of their great friendship for him, and says:
"I hope to see you in the other world."
"Your
"Joe."

He also asks her to intercede with her father to care for his brother and to secure him a position, but he adds, not among Italians.
Among his effects is a letter from this girl, in which she speaks affectionately of her love and of her faith in him. She referred to his worries and hoped to see him soon again.

"These are the only letters in English. The others are to Mario Gianetti, in care Mr. Armstrong, at the Montreal address. This is thought to be the brother. Another is to his sister, Anna Gianetti, via XX St. S. Caylotti, Italy. This is thought to be his mother, and in it he asks forgiveness. In another to the Italian consul at Mulberry-street, New York, he speaks of a policy of insurance, the proceeds of which he wants to go to his brother. Another is to the Italian consul at Montreal. In all these Gianetti reiterates his declaration of suicide and repeats his protest that no one but himself is connected with his bank, which capacity other than as a clerk.

An Extensive Business.
With the other effects taken from the safe were books of the Dominion Express money order blanks and tickets of the G. T. R. and C. P. R. and of the Allan, Lloyds and other steamship lines. Gianetti conducted an agency. Other books and papers found showed that an ordinary banking business was being conducted. Vetromile now says that he is only a friend of Gianetti, and Martirani declares that he is but a clerk in the New York branch of the bank, which they say is conducted at the corner of Mulberry and Spring-streets, Vetro-

RAIDERS FEAR TO SPEAK OUT Could Be Indicted— Magistrate Averse to Committing Wo- man For Trial.

WIARTON, Aug. 22.—(Special)—Agnes Thomas was brought before Magistrate Miller this morning for trial, and the result was that the magistrate, after hearing evidence, thus declared himself:
"I do not feel like taking the responsibility of acquitting the prisoner, nor do I care to commit her. I will, therefore, remand her for eight days, while I send the evidence to the attorney-general for his consideration. He can then take whatever course he sees fit in the evidence."
Dr. Albert Fisher and Chief Hull were again examined, but little new evidence was produced. It was brought out, however, that the tent had been completely demolished, the furniture broken and strewn in every direction and the jacket and skirt of Stella Lamont covered with egg marks, while the chief noticed that she had been struck with stone in the back and another on the face, and that Agnes Thomas had a tooth knocked out. He said the stone was sufficient cause to be alarmed of bodily injury, and in his opinion was justified in firing into the air.

Use of Firearms.
The chief said he could not find one of the crowd of raiders, variously estimated from 35 to 50, who would come forward and say he was there during the raid and to give evidence.
The crown attorney produced the town bylaw against the use of firearms within the corporation, and the bylaw for the defence objected. Robert Lancaster, to whose house the deceased had been taken, and who was under the rapid cross-examination of A. G. Mackay, got badly tangled. He would admit nothing. Lancaster is reported to have been one of the organizers of the raid. The counsel for the defence warned him that he was liable to an action for perjury if he did not admit that he was there during the shooting which was perfectly justifiable. He asked the magistrate to allow it to go to the jury, and on account of the expense to the county the magistrate so decided.

Keeping Quiet.
In the meantime the prisoner had been sent to the jail at Walkerton. The raiders are keeping mum lest they be indicted for housebreaking. It is said that they declared that bullets went whizzing around them, and that Gilbert was taking to the bush to protect himself when he was shot. As there was no charge against Mrs. Lamont, she has been given her liberty, but she remained with her friend, Mrs. Thomas, at the hotel all last night. She was with her in the police court this morning. Both women were dressed in black, and during the recital of the shooting, tears ran down their cheeks. Mrs. Thomas is about 45, striking of figure, but worn of face.

NOT TRYING TO INFLUENCE LEGISLATION IN CANADA

Insurance Men Refer to World's
Criticism—T. B. Macaulay's
Address.

The mild rebuke addressed by the World to some speakers at the insurance convention in reference to its alleged influence on pending legislation in Canada, and to the association itself for permitting in their opening program an attack from a Canadian delegate upon the royal insurance commission, counsel and consulting actuary, as a breach of international etiquette, elicited some remarks at yesterday's session. Several speakers made incidental reference to the World's criticism, and while not denying its justice, disclaimed any intention of endeavoring to influence Canadian legislation. They thought it might be useful, in discussing their own insurance problems, for Canadians to hear the manner in which they were seeking to dispose of them and they were deeply grieved if, in doing what seemed to be a necessary duty, they had transcended the limits of courtesy. Col. J. A. Goulden called attention to the editorial, which he took as an intimation that they wished to lobby bills thru the legislature. He declared that he hated a lobbyist, and that he would prefer to have The World against them than with them, a remark which was received in dead silence, and the young man, feeling that he had put his foot in it, sat down in confusion.

The morning session was largely taken up with the papers read by T. B. Macaulay of the Sun Life and Hon. Joseph A. Goulden, M.C., of New York.

Mr. Macaulay severely criticized the Armstrong-Hughes legislation in New York and the recommendations of the Canadian commission.

As the keynote of insurance legislation in Great Britain was "restriction with publicity," so that of the United States might almost be said to be "restriction with publicity." As a Canadian act that would, for Canada and Canadian companies, at least, be superior to that of either the motherland or of their neighbor to the south. He was opposed to the "deathlike uniformity" of the standard policy. It put an end to progress and originality. Neither could he see any point in requiring annual distribution of profits and a limit upon the reserve.

As there was a constitution and election of officers of the new body, which will be known as the Ontario Local Fire Insurance Agents' Association.

New York requirement that the insurance companies must invest in bonds and not in stocks. Bonds were so. The large increase in the world's supply of gold had reduced the purchasing power of the dollar and so had steadily since 1900. Hence bonds would decrease in value and so had British consols, municipal debentures and the like.

To Make or Mar.
Mr. Macaulay said that it is not a session of parliament that he declared the most important in Canadian history. What would make or mar the life insurance business in Canada.

Two Charges of Illegal Liquor Selling
Against Hotelman.
ST. CATHARINES, Aug. 22.—(Special)—Two charges of having sold liquor during prohibitory hours are pending against John Harrigan, proprietor of the Austin House, Port Dalhousie. A bartender named McNulty of the Lincoln House, Port Dalhousie, is said to be the complainant. It is quite likely that the case will be heard by Police Magistrate Comfort to-morrow or Saturday.

FRANK OLIVER STATES THE
GOVERNMENT'S POSITION AS
REGARDS INFLUX.
EDMONTON, Alta., Aug. 22.—Hon. Frank Oliver, minister of the interior, is quoted as follows regarding the Japanese influx:
"If people believed that the movement was only that of the surplus labor of the Sandwich Islands, there would be very little objection to it, as there is an ample demand for their services here. It is not the influx of a race, but of a class, and it is a concerted movement from Japan itself, the end of which no one can foresee."
"It is this idea which has taken such a strong hold on the minds of many of the people, and has made the weight of the arrivals which have taken place."
"From a material standpoint, the argument appears to be strongly in favor of the Japanese, but from a national viewpoint, provided the suspicious mentioned are corrected by the weight of the argument against them."
"The difficulty in the Dominion with the Japanese question is compared to that of the Chinese and Hindus, is because of the treaty between Britain and Japan, to which Canada is a guarantor. The new smelter which guarantees to the Japanese in Canada equal rights with the remainder of the population."
"Even if there were no such treaty the desire of Canada for Japanese trade and the spirit and military strength of the Japanese empire place the Japanese question on an entirely different basis."

Colorado Scene of Two Attacks on
Same Train—Sheriff is
on Their Trail.
CRIPPLE CREEK, Col., Aug. 22.—An attempt was made to-day to blow up the incoming Short Line passenger train with dynamite at St. Peter's Dome, midway between Cripple Creek and Colorado Springs.
Every window in the last car was broken, and M. J. McCarthy of Vio, deputy state mine inspector, had his hand cut. A number of women fainted, and there was great excitement.
A similar attempt was made to blow up the same train at Duffield yesterday. The dynamite exploded, but the sheriff is on their trail.

INVEST \$15,000,000.
New Smelter at North Cobalt Will Be
Complete.
COBALT, Aug. 22.—(Special)—The advance in Nipissing is believed here to be the result of the determination of the Newhouse interests to erect a local smelter.
Fifteen million dollars, it is said, will be invested by smelting interests controlled by Sam Newhouse, president of the Nipissing. The new smelter will be erected at North Cobalt. This is conclusive proof that men in control of Nipissing have abundant faith in that property and in Cobalt camp.
J. A. Kammerer of Toronto visited the camp to-day, in company with Mr. Gage and Captain Murphy, representing the Newhouse people, and selected a site at North Cobalt for the smelter.

MAIL CLERK SUICIDES.
E. O. B. Rogers Takes His Life
While Deranged.
WINDSOR, Aug. 22.—(Special)—E. O. B. Rogers, aged 47, for many years a mail clerk on the Grand Trunk, committed suicide by shooting himself thru the heart.
He had been suffering for some time from mental derangement and about four months ago returned from a private sanitarium.
While his wife was at supper he took advantage of her absence and fired the fatal shot. Mrs. Rogers and three children survive. Coroner Labelle did not deem an inquest necessary.

The contract for the decoration of this home of music has been awarded to the Thornton-Smith Co., 11 West King-street, and 50 painters are already at work on a scaffold 50 feet high.

GUARDS SHOOT INSANE IN OUTBREAK OF 380

Guards Had to Call in Help From
Villagers to Quell Prison Riot
—Cunning Plot by Madmen to
Escape.
PLATTSBURG, N.Y., Aug. 22.—For two hours last night a mob of approximately 380 insane at the state hospital in Dannemora stood off their guards while other lunatics made a desperate attempt to break through the walls of the building. Not until one of the rebellious madmen had been shot and killed, and the guards reinforced with less violent inmates and villagers was the outbreak put down.
Again locked in their rooms an examination of what the insane men did in the institution when at exactly two large dormitories wrecked, windows smashed, iron gratings bent and the walls damaged, where an effort to break through the iron bars from their stone fittings had been made. The dead man was Isaac Dubois, who had been at the hospital but a short time.
Convicted of larceny in the second degree, he was subsequently mentally examined and ordered to the state hospital.
Details of the outbreak first became generally known to-day. It had been planned with the cunning of the mad, and the plan so far as carried out was executed with reckless boldness.
All had been quiet among the 320 men in the institution until about 10 o'clock when a signal having been given almost all of the inmates who had been lined up for retiring rushed into two of the big dormitories and slammed the doors in the faces of the surprised guards, who rushed after them. The lunatics showed a determination and concerted vigor possessed by sane and desperate criminals, then barricaded the doors with beds and other furniture and immediately started a fierce assault on the heavily barred windows, evidently hoping to force all at once and thus obtain easy avenues of escape to the outer world.
A number of the less violent insane offered their assistance to the Keepers and were gladly enlisted.
It was soon seen that the doors could not be forced to allow entrance as the madmen put mattresses in them, and an attempt at entrance would mean certain death. Guards were stationed at the outside windows and ordered to shoot at all arms or hands appearing thru the windows, but not to kill in case of absolute necessity.
Several shots were fired by the guards, and the madmen put mattresses in all the windows and continued hammering at the stonework in which the doors were fixed.
All kept up a continual shouting and shrieking. Above all the tumult, however, could be heard the madmen shouting "Let us out!" until the inmates, who also had a heavy chain and sledge-hammer. Where they got these was a mystery.
Several shots were fired by the guards, and it was impossible to tell whether they were effective until the morning, when it was found Dubois had been killed and several injured.

Blind From Smoking.
Habit Causes Young Man to Suddenly
Lose His Sight.
OTTAWA, Aug. 22.—(Special)—William Wagner, a young man residing at 239 Albert-street, went completely blind suddenly last evening, from excessive smoking, and remained so until this morning, when he partially recovered his vision.
He was attended by Dr. T. A. Waterson, who pronounced the blindness due to cigars.
Wagner, however, smokes nothing but a pipe, but as he indulges heavily in this the same result followed.

THREE DEPARTMENTS FOR COLONIAL OFFICE

Lord Elgin Announces a Change of
Plans, and the Scheme of
Division.
(Canadian Associated Press Cable).
LONDON, Aug. 22.—In the house of lords, Lord Elgin announced that it was proposed to divide the colonial office into three departments, instead of four, as now. One is to be a Dominion department, exclusively for business of the self-governing colonies; the second for crown colonies; the third for legal and financial business; the last to have seven assistants under the secretary of state, for duties arising out of the work of the imperial conference. Mr. Just, joint secretary of the conference, is to be appointed.

GIRLS ENJOYED VOYAGE ACROSS

And Some Were Luckier
Than Others in
Their Experiences
With Mal de Mer.

LIVERPOOL, Aug. 10.—Spinning down the Irish Sea within an hour or two of landing at Liverpool, an opportunity occurs to look back on the voyage of the Maple Blossoms since they left Rimouski. Last night (Friday) a quite brilliant dancing party brought the week to a sparkling close. Most of the days had been dull and grey and monotonous. Nothing had occurred to relieve the tedium since passing Belle Isle such as usually enlivens an ocean passage. An iceberg was seen, but it was in a decadent condition and evidently had been upended. Porpoises and whales avoided the track and even sea-gulls were scarce. A solitary steamer was seen on the dim horizon one day, and yesterday the "Corsican" came plowing along thru head seas, which dashed over her bows. A brave old sailing craft appeared to the south and shortly after the "Virginian" was in touch with the Irish coast. If other features were wanting the Atlantic was a little strong on waves. Envious male passengers twitted the World man with having unwitting opportunities for holding hands. He was restricted, however, to holding hands. Naturally he only held one at a time, but they advanced to traces and with pitiful regularity of course there were exceptions and wild horses would not drag from The World records the names of either the fortunate or the fortunate. It is only fair to say, however, that Toronto made a better showing by the bill of health than the provinces.

Lost a Day.
The voyage has not been a record one in the matter of time. Heavy fogs in the Straits of Belle Isle delayed the steamer for 15 hours, which counting a day off the London trip. An effort will be made to lengthen the metropolitan days as a compensation. Some grumbling occurred on the vessel day to day, but this ceased after a somewhat exciting incident. A horn was heard on Monday morning, the first of the great fog. A clever fog lifting revealed a big liner right across the bows of the "Virginian" and much too close for nervous passengers to holding hands. A horn was heard on Monday morning, the first of the great fog. A clever fog lifting revealed a big liner right across the bows of the "Virginian" and much too close for nervous passengers to holding hands. Naturally he only held one at a time, but they advanced to traces and with pitiful regularity of course there were exceptions and wild horses would not drag from The World records the names of either the fortunate or the fortunate. It is only fair to say, however, that Toronto made a better showing by the bill of health than the provinces.

Lost a Day.
The voyage has not been a record one in the matter of time. Heavy fogs in the Straits of Belle Isle delayed the steamer for 15 hours, which counting a day off the London trip. An effort will be made to lengthen the metropolitan days as a compensation. Some grumbling occurred on the vessel day to day, but this ceased after a somewhat exciting incident. THREE BOYS WITH THEIR MOTHER
came in yesterday morning to be fitted out again with Hewson Tweed Suits. Just a year ago, they were fitted out with Hewson Tweeds, and, while the suits showed signs of hard wear and usage, there wasn't a hole in them. Their mother said that Hewsons were the most economical suits she had ever bought for the boys, and hoped we would always carry a stock of them. **WE WILL**, and, what's more, our stock for this season is larger and more complete than ever.

THAT "NASTY CROSSING" A DETRIMENT TO THE CITY
A Rochester, N. Y., Gentleman Writes to Say That It Keeps People From Visiting Us.

A business man was asked yesterday by a visitor to the exhibition offices, why he was willing to pay a considerable sum of money for transportation to exhibit his articles at the Toronto Exhibition. He said that he found it was the best possible means of pushing his wares. As a sample, he quoted an instance where a man had said that he always came to Toronto to place his orders at fair-time, because he had an opportunity then to pick and choose. This man gave this particular exhibitor an order off-hand for two car-loads of stoves, and, being in the general hardware line, he said that he had the same day ordered no less a quantity than \$500 worth of goods. In fact, he came to Toronto at least once a week and usually did his buying for the year.

CHINAMEN PUT SAVINGS IN SAFE CANADIAN BANKS
Italians Who Trust Money to Compatriots Might Learn Wisdom From Celestials.

A banking man, who until lately has been directly in touch with the Italian colony, discussing the Gianetti affair, stated to The World that Italians were prone to trust their funds to dishonest and unscrupulous individuals who were disloyal.

"The scheme they work is this," he said. "They take the money to send to Italy. This takes six weeks. The man comes in at the expiration of that time, and is told that something is wrong. This takes another two weeks. In the meantime the money is being used in private speculation right here in Toronto."

The man also hinted that there was another agency at present operating in Italian quarters on the same scheme, and that sooner or later this firm would come to grief.

In marked contrast to the confidence of the members of the Italian colony place in private banks of their own people, it is pointed out that the Chinamen have big deposits, and a "yellow man" from the Orient is hard in the country to leave before the day they will be the guests of the directors.

The fine weather of yesterday led to increased activity among exhibitors, and all day long wagon loads of goods were arriving. The progress that has been made in a very short time is really wonderful, and if the exhibition were to open on Saturday, instead of Tuesday, it would be as well advanced as it has been in many years at a later date.

DETECTIVES AFTER MOSELY.
Head of Mosely Shoe Company Wanted For Fraud.

MONTREAL, Aug. 22.—(Special).—Detectives are looking for E. Frank Mosely, who was manager of the now defunct Mosely Shoe Company. The detectives are acting on complaints of Mosely's creditors that he has been guilty of obtaining money in warehouse receipts at the rate of \$100,000.

Paul Gilbert, leather manufacturer, has been victim of the extortions that have been made by Mosely. Gilbert, who is a wholesaler in boots and shoes, to \$23,000.

DISCOVER RICH VEIN.
Seven Inches of Silver and Calcite Found at Cobalt.

COBALT, Aug. 22.—(Special).—The Tombakung Mine, located in lot No. 1, in the third concession of Coleman, is one of the greatest in the camp.

Robert Shillington and Superintendent Harmon report the discovery of a new vein in the bottom of the main shaft. A rich seven inch vein of silver and calcite was found to-day.

Cobalt Central teams are hauling machinery out for the new concentrator, which this energetic company is erecting.

STILL AT LARGE.
Thomas Sarazin in the Bush With Rifle—Pals Are Held.

PEMBROKE, Aug. 22.—(Special).—The two men implicated in the Golden Lake shooting affair were committed by Police Magistrate Mitchell to stand their trial at the October assizes. Thomas Sarazin is still at large. No efforts are being made to capture him. At present he has taken to the bush with his rifle.

GOES TO HALIFAX.
The chair of civil engineers in Dalhousie University, Halifax, Nova Scotia, has been offered to Ernest Stone, Stone, assistant structural engineer for the Canada Foundry Company. Mr. Stone has accepted, and will move to Halifax early in September.

County Clerk Resigns.
WOODSTOCK, Aug. 22.—James White, for 27 years clerk of Oxford County, has resigned because of poor health. Mr. White never missed a meeting of the council during that time.

FINE CABINET OF SILVER FOR PASTOR AND BRIDE

Erskine Presbyterians Are Appreciative—An Infant Deserted.

HAMILTON, Aug. 22.—(Special).—This morning a baby girl only a few hours' old was found, wrapped only in a napkin, in a shed behind Mrs. Simpson's home, 352 North James-street. Mrs. Simpson cared for it, and handed it over to the Home of the Friendless, the matron thinks the child will live.

The minister of justice has refused to release Lorne Crisp, serving a six months' sentence for interfering with the police.

At a reception tendered this evening to Rev. S. B. Russell and his bride, by the congregation of Erskine Presbyterian Church, a cabinet of handsome silverware was presented to the couple. Dr. Anderson presided and the presentation on behalf of the congregation. Addresses were given by Rev. Dr. Fletcher and Rev. J. Anthony, Wierdown.

J. e. Kearney, Stony Creek, foreman at Thomas Barnes' quarry, was probably fatally injured this afternoon in a runaway accident. He was thrown from a wagon, which passed over him, tearing off nearly his whole scalp, breaking his hip and causing other serious injuries. He is being treated at the city hospital.

S. Shipman, who has had experience in South African mines, says he has discovered gold on the McKinley and Enright farms, West Flamboro, where he has been formed to develop the claim.

Louis Zambos, a foreigner, has been cautioned by the magistrate against the members of the Italian colony who do not desire his attentions.

Six drunks were locked up to-night. J. Goldblatt, a brass merchant, has been working hard for sixteen years to make a home for his family. He has now succeeded, but when he was preparing to make the trip to Russia to see his wife and children, he was told him that he could not stand the voyage. Mr. Goldblatt's partner, Louis Takedman, has undertaken on the trip, and Mr. Goldblatt is looking forward to a reunion with his family after a separation of fourteen years.

Thieves got into R. O. and A. B. Mackay's warehouse last night and stole a quantity of wines and champagne. Ernie Lepp, head-coop at Stony Creek was also robbed last night, sixty chickens being stolen.

By marrying Thomas P. Clappison, Mrs. H. H. Hill lost interest in her late husband's estate, which is valued at about \$9000.

The late John E. Parker left an estate of \$80,000. From this his widow will draw an income of \$2500 a year, the remainder going to his daughter, Mrs. C. D. Mackay.

C. D. and Mrs. Blachford returned this morning from a trip to the old world.

HOTELS OVERCROWDED
GUESTS GO ACROSS LAKE

No Place Else Where They Can Lay Their Heads—Exhibition Will Cap Climax.

All the leading hotels are crowded with visitors and the managers are engaging private apartments in various parts of the city to accommodate late arrivals. The conventions of the insurance underwriters and boat and shoe workers and the O. R. A. matches help to swell the throng. At the King Edward "doubling up" and the use of cots has been resorted to, but even this is not sufficient to meet the demands and people have to be refused every night.

A similar state of things prevails at the Rossin, Walker and Paemer houses, and the Iroquois, Imperial and Arlington, Grand Union and other hotels. At the Queen's many of the guests are making a daily trip across the lake, spending the day in the city and the evenings at the Queen's royal Niagara-on-the-Lake.

The bookings for the exhibition weeks are far in advance of last year, and it appears certain that every available room near the centre of the city will be "commandeered" by the hotel people, to provide for their guests.

The committee of the British Wicketeers League have been approached by two or three of the hotel managers to see whether it will be possible to utilize the hotels for sleeping visitors, subject to the requirements of the new arrivals.

1908 English Exams.
The education department has prepared the language texts for the high schools and collegiate institutes. For the district certificate, the passage of English are: Tennyson's The Lady of Shalott; Oenone, The Epic of Monte d'Archer, St. Agnes Eve, The Voyage, Break Break Break, In the Valley of the Caucases; Browning's My Last Duchess, The Ride from Ghent to Aix, Love and Friendship, Home Thoughts from Abroad, Up at a Villa, Andrea del Sarto, The Guardian Angel, Frolics, An Epistle to Karshish, Cavalier, Tunes. For the junior teachers, Shakespeare's Macbeth is added, and for senior teachers another addition is made, "As You Like It." The entrance memorization selections will be the same as this year's.

KEEP WITHIN THE LAW. While the tragic issue of the Warton affair is much to be regretted, it is impossible to overlook the fact that the action of the residents who took part in it was lawful and unwarranted. However proper the object, it could not possibly justify proceedings of the nature which were taken, and the real responsibility for the catastrophe which ended their every reasonable person will readily admit, lies upon the parties who took the law into their own hands. Here in Canada we are a little inclined at times to adopt the methods of Judge Lynch. It is an occasional practice which ought not to become a habit. As there are regular and proper ways of removing undesirable squatters, the summary remedy adopted at Warton was not only unnecessary, but was rendered still more objectionable by the violence with which it was applied. The unfortunate woman who is now charged with murder, was, in this matter, more sinned against than sinning, and the mob who wrecked her dwelling would have done better to remember the reproof of the Master: "He that is without sin among you, let him first cast a stone at her."

INSURANCE. In his address before the underwriters, T. B. Macaulay of the Sun Life pointed out that the enormous increase in the production of gold had made prices high and incidentally depreciated the value of credits. In the same breath he foresaw financial breakers ahead, because of the scarcity of money. It is fair to surmise that he may not be entirely justified in his severe strictures upon the Royal Insurance Commission.

One thing is certain, and that is that the people demand an amendment of the Insurance Act, and the enforcement of present and future protective legislation.

In New York the insurance question is still a live issue, and upon the complaint of The New York World, Governor Hughes has ordered an investigation, which may result in another insurance commissioner being removed for non-enforcement of law.

The insurance companies are organizing to influence legislation and to influence the government. They are enlisting the press and copies of certain newspapers are lavishly distributed, filled with "canned news" and "canned" editorial comment.

The policyholder can judge what newspapers are looking after his interests. The World desires to do no injustice to the insurance companies or to the men who control them, but it will consistently protect the policyholder, both by advocating the passage of good laws and by insisting upon their enforcement.

SAFEGUARDING THE PUBLIC. In order to prevent further over-capitalization and stock watering and also merging of railroad companies, unless clearly for the public benefit, the Public Utilities Commission of New York has published a series of rules for observance in the future. Hereafter, before a combination of traction or other public service companies can be carried through, a petition must be presented, giving a full and complete statement of the reasons for it. If authority is wanted to acquire capital stock in any other company of a like character, a full statement of the proposed transaction and the reasons therefor must also be made. Before an increase of capital is sanctioned a sworn statement must be made, giving full details of the financial position of the company, the nature of the stock issue and the use to which the new capital is to be put, specifying each branch of the outlay definitely and separately. All contracts must be dis-

closed and a further statement must accompany the application, showing whether any of the outstanding stocks or bonds of the company have been used in capitalizing franchises, and if a merger is contemplated, full financial disclosure must also be made.

These are excellent provisions which it is an infinite pity were not in force years ago. Publicity of the kind required would have prevented many, if not all, of the disgraceful stock operations which have landed the public service companies of the United States in their present financial difficulties. Comment on the regulations, The New York Evening Post admits that in the course of a whole chapter of recent railway incidents, all laws of conservative finance and frequently all laws of common honesty were brushed aside and instances of the proceedings of the Metropolitan Street Railway and Mr. Harriman's moves in Union Pacific finance. No doubt the issue of the order by the public service commission will be followed by the usual wall of these necessary and proper requirements will still further unseat public confidence. But, as the Evening Post says, "the investing public ought, by this time, however, to have its own ideas as to who the people are, who have unsettled confidence, upset the markets and blocked the avenues of capital and credit."

WHERE SHOES ARE PINCHING. Evidently the delegates to the Boot and Shoe Workers' Union have not come in their carpet slippers to the convention. Equally true is it that certain of the offending brethren will "feel their corns" for the rest of life's journey.

By this time the public are familiar with the charges and counter charges which the so-called Tobin and Hickey actions are making upon each other's "uppers." The pity of it all is, the fight is going on beneath a motto which breathes of unanimity and loyalty—Each for all and all for each. But many other zealous people, they are finding out that many a fine watchword may be shaved down until it reads—Every man for himself and the darkey for the hindmost.

As a parliament of men and women this convention is noteworthy. The boot and shoe makers take to themselves credit for intelligence. The time was when the man who wrought with his hands required an advocate who could use his head. To-day oratory does not preside over classic halls, where an advocate with a ready tongue could use his head. To-day oratory does not preside over classic halls, where an advocate with a ready tongue could use his head.

What is the use of speeches which do not move? Labor men are students of the law and they speak. "Noise is music to their ears and they mean 'heaps of it.'" But the thought is just as strong and forcibly delivered. Labor is the floor of the house some brilliant efforts took place. Like their trade, they drove sharp points and clinched them well.

There is also the element of force. What is the use of speeches which do not move? Labor men are students of the law and they speak. "Noise is music to their ears and they mean 'heaps of it.'" MOORS GOOD NEWS FRENCHMEN IN BATTLE

An Advance is Made Thru Fog—Mist Rises Just in Time for Defenders.

CASABLANCA, Aug. 22.—Twelve Frenchmen were wounded during the fighting yesterday. They include Capt. Dettles of the foreign legion, a battery of 75 millimeter guns was disembarked from a transport and used shrapnel with tremendous effect upon the enemy. The Arabs again showed reckless courage. They would ride close up to the French camp, dismount and fire persistently until they were dispersed by the shell fire from the cruiser Glorie.

The Algerian Gueydon has bombarded the port of Pidalah, to the north of Casablanca. The smugglers of arms had their headquarters at Pidalah. TANKERS, Aug. 22.—The government troops, under command of Elmerani, the uncle of the sultan, have been defeated in the mountains of Beni-elmerani. Elmerani retreated in the direction of Alcazar.

Elmerani's defeat means there is danger of the hills tribes looting Alcazar. Three days ago Raisuli, who is holding Capt. Sir Harry Maclean prisoner, was not more than eight miles from Elmerani's headquarters.

PARIS, Aug. 22.—Vice-Admiral Philbert, commanding the French naval forces of Casablanca, telegraphed that while the Moors were advancing on the French camp near Casablanca yesterday morning under the cover of a fog, the fog lifted and permitted the French batteries ashore and afloat to shell the Moors with deadly effect.

It is stated that as a result of the cabinet conferences and exchanges of views with Premier Clemenceau, who is at Maribled, where the met King Edward, the government remains firm in carrying out its program, which it is reiterated is not one of conquest.

SHIELDS OTHERS. Italians Prisoner Prefers Should Support Latter's Wife.

OTTAWA, Aug. 22.—Antonio Bardesi, for stabbing Arthur Charbonnet twelve times with a stiletto, was today sentenced by Judge Gunn to eighteen months in Central Prison. The prisoner shielded others in the affair, and the judge suggested that these men should be held where they met King Edward, the government remains firm in carrying out its program, which it is reiterated is not one of conquest.

Political Intelligence

It is announced that the four federal by-elections will be held on Sept. 18 or 19. The vacancies are: London, vacated by Hon. C. S. Hyman, who will not again be a candidate. In 1904 Mr. Hyman defeated William Gray by 24 votes. In the by-election, following the acceptance of a portfolio by the Hyman, the minister carried the constituency by 323 votes. Following the police court revelations in Toronto last year, as to election methods in London, Mr. Hyman fled the country, and is now in California for his life. He has resigned his seat and it is probable George C. Gibbons, Mr. Hyman's campaign manager, will be the Liberal candidate. The seat has been in both columns. From 1887 to 1897 Hon. John Carling represented the city, securing majorities of from 100 to 200 votes. In 1897 Hon. John Carling represented the city, securing majorities of from 100 to 200 votes. In 1897 Hon. John Carling represented the city, securing majorities of from 100 to 200 votes.

North Wellington was won by Thomas Martin, Liberal, in 1904, by 208 majority over John McGowan, Conservative. The constituency is regarded as Liberal, but it is believed that an independent farmer with some progressive views was not more than eight miles from Elmerani's headquarters.

PARIS, Aug. 22.—Vice-Admiral Philbert, commanding the French naval forces of Casablanca, telegraphed that while the Moors were advancing on the French camp near Casablanca yesterday morning under the cover of a fog, the fog lifted and permitted the French batteries ashore and afloat to shell the Moors with deadly effect.

It is stated that as a result of the cabinet conferences and exchanges of views with Premier Clemenceau, who is at Maribled, where the met King Edward, the government remains firm in carrying out its program, which it is reiterated is not one of conquest.

SHIELDS OTHERS. Italians Prisoner Prefers Should Support Latter's Wife.

OTTAWA, Aug. 22.—Antonio Bardesi, for stabbing Arthur Charbonnet twelve times with a stiletto, was today sentenced by Judge Gunn to eighteen months in Central Prison. The prisoner shielded others in the affair, and the judge suggested that these men should be held where they met King Edward, the government remains firm in carrying out its program, which it is reiterated is not one of conquest.

SPECIAL

THE FARMER'S SECURITY.

The harvest is yielding better returns than the earlier estimates. The promise of Barley is quite good, mostly turning 40 bushels to the acre, while goose wheat has had the best year for the last four or five years. Oats are exceptionally good all over the province, while oats, the one crop that has been vigorously assailed by rust, the green bug and pessimists, are yielding bumper crops in some parts. As high as 50 bushels to the acre have been threshed in certain parts of Central Ontario. Yet this crop has many acres that will not go 25 bushels to the acre, which brings the average yield away.

On the whole, Ontario farmers have reason to feel highly jubilant at the returns this year's Providence has sent them. There is no farm that has a complete failure of crops. Hay has been lighter than usual and pasture has been scarce. Against this the acreage of corn is larger and many who foresaw the shortage in fodder prepared for it by way of supplementary green crop.

Prices for all agricultural products are high. Dairy and hog products have remained steady. Prospects for the future are not discouraging. If there is to be a money famine, or financial affairs tie themselves into knots over the situation, the farmer in Ontario, we contend, is the most secure man of them all. He has his living and his wants can be fashioned by his means. It is this security and contentment from worries that makes our Ontario farm life worth the getting. Many a young man has left the province in search of these very things, which flourish nowhere so well as under our own Ontario.

Financial scares and bad-vised dreams of hard times ahead for the agriculturist find little credence in the mind of the lord of one hundred fertile acres, who knows the world must eat and be clothed from his farm. The farmers of Ontario are on the sanest and most stable footing of all men. And while agriculture is well why should others tremble?

THE FARMSTEAD

Now for the fair!
Harvest yields fairly well.
A great crop of peas.
Goose wheat is good.
Cattle are cheap enough.
A good demand for lambs is in sight.
Now let the city cousin entertain the rural friend.
Syndicating stallions does not seem to be in vogue.
Market the farm products in good condition.
A good flock of barnyard fowl are a pleasing view now.

Resolve this year to quit the scrub acre and that poor female.
Wait and see the co-operative apple selling societies make good this year.
He is a poor farmer who will give away his produce at half price.
Keep the pig pens and farm buildings well disinfected.
Geo. Gormley of Unionville made a sale of his herd of grade Durham milk cows to Donlands farm this week.

Fullerton, the Clydesdale stallion owned by Geo. Gormley of Unionville, has closed a very successful season. His cut appeared in "The World" earlier in the year.
What are we going to do with the autos on our good country roads? The farmers made the roads to be monopolized by these engines. Farmer's wives are suffering the most.

Talk about hard times on the corporations. If ever any one squealed during a pinning it in the millions. They have outgrown any farmer that ever lived.
What can be done by flowers, grass and paint on the old farm is well illustrated by the little farm of James Plaskett of Greenwood, Ontario. He has transformed a desert to bloom like the rose.

About the usual number of hogs seem to be going to market this season. The high prices of coarse grains and the losses in many spring litters tell against the supply somewhat, but Ontario farmers are all right and as Prof. Day says they will likely pursue the even tenor of their way.
Prof. Powell, at the recent International Apple Shippers' Convention, advocated the boxing of fine, well-graded apples, no matter where grown. He said that he boxed Spitzenburgs last season which brought him at the rate of \$16 per barrel, reports an exchange.

September is the month to transplant the strawberries. Each farm ought to have a narrow strip at least as these berries are such choice fruit. It makes no difference in the variety of plants. We have known some farmers to plant a variety they got from a neighbor, that was wholly unsuited to their soil, and they lost. Reading the reports of the O. A. C. will pay.

The old wood-burning engines never did any more damage than the new R. engines are doing just now, when nearly every farm adjoining the track shows evidences of grass fires, says The Paris Review. On Monday a ten-acre field of stubble and 180 rods of line fence on Jas. Crozier's farm were burned and it was with difficulty that Jas. Scott's house was saved.

Apples are selling well in the States. Summer apples in Arkansas have been selling from \$3 to \$5 per barrel, says The New York Produce Review. The U. S. Government report on August 1st:

shows that the condition of the apple crop is quoted as compared with that of one year ago. New York State seems to have the best crop of all the states. But in New York this week they are selling at \$3.50 to \$4. The farmers of that state are asking \$3 per barrel for their winter fruit.

Frank J. Barber, manager of the Georgetown Fruit Growers, Limited, reports that the company expects to pack 2500 barrels of apples this fall, says The Georgetown Herald. Several good offers have been received for the entire output, the best being \$2.50 per barrel for No. 1 fall apples. Seconds 25c per barrel less in each case. All the fruit would net the grower about \$1.75 and \$1.50 respectively for his apples the offer has not been accepted as the company expects to do still better.

The highest price so far for any apple orchard on the Michigan Lake shore this season was paid for the orchard of Wade & Wade by Charles Hoffman of Chicago, says The New York Produce Review. The exact terms of the sale are not given out, but it is known that Wade & Wade had refused an offer of \$3,000, altho the orchard contains only about 200 trees. There are only 200 trees bearing fruit, and it is estimated that the orchard contains from 1600 to 1800 barrels. Mr. Hoffman is the largest buyer in that section. It is said, having already bought upward of 8000 barrels.

Mr. Hoffman also is said to have bought the Decker & Cooper orchards in Casco, estimated at 1275 barrels, at \$2,000 for the fruit on the trees. Heil Wedge & Carter secured the Fisher Spencer and Marshall Bugden orchards in Casco the same day at \$2.35 per barrel for the fruit packed.

SELECTED SEEDS.

Exhibitions of Selected Seeds as Held in Canada.
The Canadian Seed Growers' Association have done a good work in their campaign for selected seed. The last annual report of the secretary of the association has something interesting to say:
At the last annual meeting of this association detailed explanations were given of the plans that had been adopted to offer special prizes to members for creditable exhibits of hand-selected, improved and general crop seed that were brought together in the exhibit and the various provincial or district exhibitions. These exhibits of selected seed were always an attractive and educational feature of the exhibit and have done much to make the work of the association more widely known and better understood and appreciated by the general public. The places at which these special exhibitions are now held annually throughout Canada are as follows:

- 1.—At St. Hyacinthe, Que., open only to members resident in the Province of Quebec and generally held in the month of April in connection with the regular spring seed fair.
- 2.—At Guelph, Ont., open only to members in the Ontario district and held in connection with the Ontario winter fair.
- 3.—At Brandon, Man., open to all members resident in the district of Manitoba, and held at the time of the winter fair. The exhibition to be held at Regina next winter will be the first of its kind ever held in the Province of Saskatchewan.

Creditable prizes are offered at each of these places for special selections of hand-selected and improved seed plots. The classification of the prize list provides for two sections for each of the small grain crops considered. Section one makes provision for hand-selected crop on the breeding plot. These are exhibited in the form of sheaves.
Section two provides for a group exhibit, consisting of a hand-selected bushel of threshed seed from the same plot and a bushel and a half of threshed seed from the improved seed plot.

Where prizes are offered for corn, the best ten ears are called for, and said ears to be selected from the seed plot. In the case of potatoes, prizes are also offered in the east for special selections from the seed plot. In addition to the general prizes of medals or cups, are also offered to those members making the most creditable showing of selected seed. These awards are usually in the form of medals or cups.

Without a single exception these exhibitions have given the public the interest that has been taken in the work, and the service they have rendered their surplus stock have proved their inestimable value to the community, as well as the members themselves, come to look upon their respective districts as permanent organizations and as annual meeting places, their real place and importance will be revealed. Their perpetuation, extension and betterment are obviously the duty of this association.

BUTTER TO NEW YORK.

During the past week two cars of Canadian dairy butter were brought to New York, the Montreal, says The Paris Review. The scarcity and high price of packing stock induced one or two of the New York houses to buy the butter for the tropics that month for some of the dairy goods. These two cars were bought in Montreal at a cost of about 15c to 18c a pound, and they were shipped to New York at a cost of 1 1/2 a pound. There is an import duty on foreign butter of 6c a pound, but when the butter has been imported and cleared for foreign countries the shipper gets back about 5 1/2c. It is not known how much of this butter is likely to be available at the price.

FARMERS' ASSOCIATION.

CANADIAN CLYDESDALES, CLEANING WOOD HONORS

Canada is Producing Good Animals — Scotchmen Meeting the Canadian Regulations.

Upon his return from the western provinces, J. W. Sangster, secretary of the Canadian Clydesdale Association, feels quite elated over the big showing of Clydesdales made at the Winnipeg and Brandon fairs. The stations and fillies that were in competition at these shows were worthy of the highest praise. Particular mention is made of a Canadian-bred one all, including a Cawdor cup winner from Scotland, the fact that the Scotchmen had to be reminded of the Canadian regulations. It will be remembered that the Canadian society passed a regulation, making imported fillies show two numbers, one in the home book, and one in the home book. Mr. MacNellie, secretary of the Clydesdale Society of Great Britain and Ireland, through several agricultural journals, gave as the reason for not numbering their animals upon registration, the fact that the Scotchmen had to be reminded of the Canadian regulations. The number was given. This rule worked out very strangely in some cases. Some animals were numbered, and some were not, etc., all, no doubt, due to carelessness. Such a system is entirely inadvisable. None Near Milkken.

None Near Milkken.

John Gibson of Milkken writes that he does not know of any syndicated outfit in that district. "We have been paying \$11 a day for a machine with rakers. Underneath the straw blowing machine with straw blowers charge \$12 a day and one dollar extra with rakers. The reason for this is that the blowing of grain to be a day's threshing, altho a great deal depends on the amount of straw, the feeding attachments did not work for them to yield the point. Henceforth all animals for export will have two numbers and the fillies will be numbered upon application. This enables the Scotchmen to obtain both the Canadian and English numbers within a few days. The exhibit will now be issued showing both numbers.

A PLAGUE OF GRASSHOPPERS

Quebec Suffering With This Pest While Ontario Has Plenty.

Grasshoppers are everywhere. Complaints of the depredations they have been eating off and the binders stopped in their harvesting operations because of these pests. In the eastern part of Ontario, especially in the eastern counties, they are very thick and are eating the turnips and other crops. The damage to the very poor and crops in some cases have been seriously injured.

Around Toronto they are quite thick and have done a great deal of damage. A walk thru many grain fields just before cutting and the large numbers of grasshoppers on the ground. Out especially their prey. But the harvest is about over and no serious damage is done. In connection with the winter fair, the exhibition to be held at Regina next winter will be the first of its kind ever held in the Province of Saskatchewan.

LOSSES IN ARGENTINE MEAT TRADE.

The unfavorable conditions surrounding the foreign meat trade of Argentina during the past year were revealed in a report by the Argentine Meat Export Company at its recent annual meeting in London. This concern, doing a business of \$2,500,000, has suffered a loss on last season's business, according to the report. Destructive conditions in Argentina are held responsible. According to the report, the Argentine meat trade is a disappointing one. Competition between the different frozen meat companies has been so keen that the companies raise prices materially for which in ordinary times would not have been considered. CASTORIA.

The Kind You Have Always Bought Bears the Signature of

SYNDICATE THRESHING

Various Groups of Farmers Working Out Their Threshing on a Business Co-operation—Difficulties in the Way—Expenses Higher—Less Men Needed.

Another form of farmers' co-operation that has been tried for several years, in various parts of the country, is what is known as the syndicate threshing outfit. A number of farmers, sometimes 10, ft. A number of farmers together and buy a threshing outfit, with latest improvements. These farmers meet and elect their officers, who hire the men necessary to operate the machine. Outside farmers are charged for all work they do at the regular rate. Each member of the syndicate is also charged the regular day rate at the end of the season, the shareholders meet and the books are closed. After all expenses of operation are paid and such payments as are due on the machinery, the balance goes in the form of a dividend upon the stock.

There appears to be no reason why such investments should not prove profitable. The leading difficulties lie in the direction of securing careful men to operate the machines. Where the syndicates are removed there seems to be a latent streak of carelessness in the majority of the men. Before the blowing of straw, the men are not so careful. The fact that the syndicates seem to be discouraged. Again, the manufacturers seem to like these syndicates for all they put out. In fact, many men think the manufacturer has too big an interest in the machine.

Several correspondents in the province report upon the working of these machines. None Near Milkken. John Gibson of Milkken writes that he does not know of any syndicated outfit in that district. "We have been paying \$11 a day for a machine with rakers. Underneath the straw blowing machine with straw blowers charge \$12 a day and one dollar extra with rakers. Windsor Cheese Salt is always the same in strength and purity—and will always give the same excellent results.
It stays in the curd—dissolving evenly—never caking.
Cheese-makers everywhere are constant in its praise.
Use no other. Your grocer has it—or will get it for you.
