# The Woodstock Journal.

Whatever thy hand findeth to do, do it with thy Might.

VOLUME 7. WOODSTOCK, N. B. THURSDAY, JULY 12, 1860. NUMBER 4.

### OUR PAPER.

The Woodstock Journal is a large eight-page weekly, devoted to the advancement of the industrial, commercial, social and moral interests of New Brunswick.

The Journal is published every Thursday at Woodstock, N. B., for Wm. Edgar, Proprietor.

Single copies, Two dollars a year, Clubs of six, one and three quarter dollars each.

Clubs of ten, one dollar and a half each.

To any person who makes up a club at these rates, and sends us the money in advance, we will send a copy of the Journal for one year gratis.

When payment is not made in advance, two dollars and a half, and when payment is delayed beyond the year, three dollars will be charged.

Advertisements should be sent in not later than 3 P.M. on Wednesday.

### THE "GREAT EASTERN"

The Great Eastern came in to the Light Ship, at Sandy Hook, at 7 A.M., on Thursday morning, having left the Needles at 10 A.M. on the 17th inst.

According to the official account of Capt. Carnegie, R.N., who accompanied her, the Great Eastern's passage across the Atlantic has been as happy as it was successful.

Originally destined to sail from Southampton on the evening of Saturday the 16th, unforeseen circumstances retarded her departure until 8 A.M. on the 17th, when she slipped her moorings, and passing through the Needles, stopped to land the pilot.

She then was again set in motion, and from that moment until the period that she sighted the light-vessels at Sandy Hook, neither paddles nor screw-engines have been stopped for a single moment, except to take soundings.

No furious gales impeded her progress, nor did favorable breezes assist to waft her across the Atlantic.

Twice she encountered adverse winds and seas that would have made their formidable presence known in a smaller ship by the universal prostration of the passengers by the overpowering influence of seasickness, but such is the indifference of the great ship to troubles which harass her smaller rivals, that no chair was empty either at breakfast or dinner hours, nor has a single plate or glass expired in fragments on the floors as offering to Neptune.

Her passage has been more like that of a marine railway, than of a ship exposed to the tossings and tumblings of the ocean's surges.

Could the Atlantic be bridged with iron, it would be scarcely possible to convey passengers with more ease and comfort than that experienced on board; and if the ordinary discomforts of sea-voyage be not only annihilated, but changed into active enjoyment, it will be wonderful indeed if the Great Eastern does not secure the lion's share of traffic upon whatever route she may eventually be placed.

Her passage has been made from Southampton to the light vessel in less than eleven days, but if this be considered the maximum rate of velocity ultimately attainable, it will be grievous error. Many causes now exist to reduce her speed, that are either removable or temporary, the first and most considerable being the incrustation upon her bottom, an incrustation that cannot be taken at a less figure than that of a reduction of one and a half knots per hour.

Again, upon examining the log, we find that neither paddle nor screw engines were worked up to their full power for several days after her departure. At the outset, and for some time afterwards, the revolution of the paddle engines did not exceed nine in number. This precaution appears reasonable, when we remember that nearly all the firemen were strangers to the ship, and that they all had to be organized and arranged for the performance of their respective duties; but that once accomplished, the engines were allowed to put forth their strength and exhibit their power, the result of which has proved her ability to perform nearly four hundred miles in twenty-four hours.

Some extra delay has also been caused by the course made by the great ship in adopting the southern passage, which brought her within the influence of the Gulf Stream and an adverse current.

The Great Eastern is commanded by Capt. John Vine Hall; her officers and crew number 420, and she brings 38 passengers, and eight guests.

One of the passengers gives the following information:

"The highest speed obtained was 14 knots. The ship's bottom is very foul, and an allowance of at least two knots an hour should be made on that account. The distance from Southampton, as usually steamed, is 3,190 miles, but to avoid the ice she went further south."

Every one on board speaks in the highest terms of her performance in every way. There was hardly any motion felt at any time, and notwithstanding the bad weather she experienced shortly after she left Southampton, not

### HOW TO CLEAN THE TEETH.

There is in my opinion, no dentifice used so beneficial in its effects as charcoal. I doubt if there is a dentist, with a fair practice of ten years, but has seen worse effects from its use than from the use of acids. I have had it in my own practice to insert three sets of teeth, where the gums were destroyed, and the teeth dropped out from the use of charcoal. In two of these cases the gums were permanently discolored, so there can be no mistake of its agency.

The effect of charcoal is purely mechanical; it is as sharp as diamond dust, and the finer the worse in its effects. Being perfectly insoluble in the fluids of the mouth, it insinuates itself between the neck of the tooth and the gum, producing ulceration, recession, and final loss of the tooth itself.

Next to charcoal, in their bad effects upon the teeth, are the various kinds of bores and earths, under different high-sounding names, and popular as tooth-powders.

I would have my patients use no kind of powder upon the teeth oftener than two or three times a month; then I would not have them use the brush, but take some finely prepared chalk, and a stick of red cedar, orange or hickory, (we should say soft white pine,) and about three inches long, wedge shape, and from one-eighth to one quarter inch wide; with this, polish the enamel, being careful not to irritate the gums.

The great dentifice that should be used at all times, and under all circumstances, is soap. Its alkaline properties serve to neutralize the acids contained in the fluids of the mouth, and its cleansing properties will correct the breath, and remove offensive odor sooner than any article I have ever seen tried. I have seen the best effects from its use in tenderness and inflammation of the gums denoting acid secretions; and have never known it to fail in its results."—Dr. Blodgett.

The London Exhibition of 1862 is a fixed fact. The guaranty fund of £250,000 has been raised. Arrangements for the building will be commenced at once but it is not expected the "first stone will be laid before July, 1861."

"The ass that carries wine, drink water?" That is because he is an ass! The choice shows the donkey.

MR. BENNET IN VICTORIA. From a Grand Falls Correspondent. GRAND FALLS, July 2.

John Bennet, Esq., Chief Superintendent of Schools, now on a hasty professional tour through this section of the Province, on Saturday evening last delivered an instructive and interesting lecture on Education in the Temperance Hall of this village, before a large and attentive audience. To-night he will, I understand, lecture at Tobique, and tomorrow afternoon at Florenceville, on the same subject.

Mr. Bennet appears to be well qualified for the situation which he holds. Evidently he is the right man in the right place. How the Smashers came to appoint so honest and intelligent a man to office is passing strange. In this County, after ignorance and inability, the best recommendation, and the essential qualification, for office is the commission of penitentiary offences.

For the Woodstock Journal. RICHMOND BIBLE SOCIETY.—The Richmond Branch of the British and Foreign Bible Society held its second annual meeting on Friday, June 29th, in St. John's Church, Capt. Wm. McKenzie in the chair. The attendance was not numerous, although the proceedings were of an interesting and encouraging nature. The collectors for the most part seem to have entered upon their work with diligence and spirit, and the people to have responded willingly to their call, as the sum collected testified. Notwithstanding that, two districts were not reported from. The amount in hand was found to be £9 6 8d. Of this sum £7 6 9 was appropriated to the purchase of books to be sold at the Society's prices. It is resolved that the balance, together with the amount yet to be paid in for the past year should be transmitted as a free contribution to the parent Society. This effort is very creditable to Richmond; and we wish them "God speed" in this noble work of Bible diffusion.

EUROPEAN NEWS. GREAT BRITAIN. In the House of Commons on the 11th, Lord John Russell announced that as there was very little prospect of a Reform Bill being passed this session, the government with a view to prevent further waste of time, was reluctantly compelled to withdraw the measure. He promised to bring forward the new bill at the earliest opportunity next session.

Mr. Disraeli congratulated the government upon the withdrawal of the bill, and even Mr. Bright said he could not blame Ministers for the course they had taken. He trusted the public would firmly declare what it expected before the next session, and that the promised bill will be received in a fairer manner by the House.

Mr. Bright also entered into a defence of the commercial treaty with France, and protested against the misrepresentations of the 'Times' upon the subject. He predicted the most beneficial results from the treaty.

In the Commons, on the 12th, Lord Palmerston stated that in order to afford shelter to persons claiming protection of the British flag, the Admiralty has been directed to station a ship-of-war at Messina, another at Marsala, another at Palermo, and four in the Bay of Naples. He understood that an *envoy* was on his way from Naples to Paris and London, and Government would not hesitate to express to him those feelings which they, in common with every person throughout the country, had regarded the barbarities perpetrated at Palermo, barbarities which were really a disgrace to the present age.

He believes that Naples had applied to its foreign allies to guarantee the possession of the Two Sicilies to the Neapolitan crown, but Austria had

WHATSOEVER THY HAND FINDETH TO DO, DO IT WITH THY MIGHT.

In these few and simple words is included the whole of our duty, toward ourselves, toward each other, toward all created beings, and things, and toward the common Father of all.

Whatsoever thy hand findeth to do, do it with thy might. Mark well this whatsoever. In the path of duty we are to avoid nothing, omit nothing, be daunted by nothing; We cannot choose that which we should do; we must do that which our hand findeth, whatever that may be—however hard—however difficult—however disagreeable—however dangerous.

Whatsoever thy hand findeth to do.—Observe here how the whole man is typified in the hand, which is that which goes before the man and beyond him, wherewith he reaches on all sides to find and grasp. The hand is an active and not a passive member; it is the agent of the whole man; and thus, the Preacher conveys the idea that the man should not stand still until the work comes to him, but should reach beyond himself to seek and to grasp it.

Whatsoever thy hand findeth to do.—Find, O man. Sit not at home waiting for the work to come to thee; go forth and seek it with eager eye and outstretched hand. Search with anxious spirit and unwavering; search early, search late; search far and near; search until thou dost find. Thou shalt not want for work. All around is the world, full of work for strong heads and loving hearts and active hands. Thousands, writhing in anguish of spirit, despoiled and wounded on the dangerous highway of life, lie listening for the footsteps of the Good Samaritan, that their wounds may be bound up, and aid lent to their tottering steps.

Phrenology has had, and is yet having, a hard struggle against the opposition which has been brought to bear upon it.—an opposition which has proceeded from the most learned and able men, which has been pointed with the keenest wit, and directed by the most powerful intellect. It has been peculiarly open to criticism and ridicule, inasmuch as numberless ignoramuses and pretenders have joined in the ranks of its disciples, and taken upon themselves to expound its doctrines.—some to exhibit what they considered their own cleverness, and others for the even baser purpose of wringing money from an easily guided people. Nothing in the doctrines themselves, or in the arguments by which they are supported, and nothing which all the opposition of its most learned and dangerous opponents could have done, has had such an effect in impeding its progress with the rational portion of the public as the contemptible assistance of these wretched mongers. Nevertheless Phrenology has gone on from year to year slowly gaining ground with the intellectual world. The number of scientific men who have given its principles their adhesion are comparatively few; but the fact which it is producing upon the public mind, is seen peeping out in the periodical scientific literature of the day. Even those who will not acknowledge

Don't satisfy yourself with idle speculations about it, or with mere talk.—Don't be a drone or a dreamer, or a mere sentimental enthusiast. Be a worker. Don't neglect it because it is difficult. Don't avoid it because it is dangerous, but give thy life if it be necessary, in the cause; for the cause which is baptized in the blood of good and true men the angels of heaven will fight. Let not bad success dishearten you; fight not for the end but for the cause. Don't mind the laughter of the idle, or the scorn of the world, or the sneers of formalists, or the abuse of the bigots. Dare them all and face them all; plant your feet firmly and set your teeth hard; if you can't conquer you can at least suffer and die for the truth. Having found what you should do, do it, though you should have all combined against you, all the fools in the world, and all the fiends in hell.

And how? "With thy MIGHT!" With thy whosoever and strength. With head and heart—body and spirit. Do it not with indifference and slovenliness; do it not as a task, but heartily, cheerfully and thoroughly. Work with the strength of honesty, of sincerity, of a pure heart and a strong head. Enlist all your faculties and all your sympathies in the work, and throw yourself into it with all the zeal fervor and devotion of a true man.

Lukewarmness and indifference are great curses to any cause, not only from their effect on the labors of men who possess them, but from their influence in disheartening others. The effect of their manifestation by one is to depress the ardor of others. A lukewarm friend or advocate is worse than ten opponents, for he chills one's own feelings of heartiness and ardor. Work with thy might then. Work with a fervor which will melt opposition before you, even ere you have come in actual contact with it. The men who have moved the world have been men who worked with heart and soul—with their very might.

MIND AND BODY. We observe that Mr. O. S. Fowler, formerly of the firm of Fowler & Wells, and probably the most prominent apostle of the doctrines of Phrenology in America, has commenced a series of lectures in St. John on "Life: its laws, organs, functions and improvement, as taught by Phrenology and Physiology." The course is to extend over six evenings. We see also that Mr. Fowler purposes to visit Fredericton, and to deliver there his course of lectures on this most important subject, or, rather, assemblage of subjects.

Phrenology has had, and is yet having, a hard struggle against the opposition which has been brought to bear upon it.—an opposition which has proceeded from the most learned and able men, which has been pointed with the keenest wit, and directed by the most powerful intellect. It has been peculiarly open to criticism and ridicule, inasmuch as numberless ignoramuses and pretenders have joined in the ranks of its disciples, and taken upon themselves to expound its doctrines.—some to exhibit what they considered their own cleverness, and others for the even baser purpose of wringing money from an easily guided people. Nothing in the doctrines themselves, or in the arguments by which they are supported, and nothing which all the opposition of its most learned and dangerous opponents could have done, has had such an effect in impeding its progress with the rational portion of the public as the contemptible assistance of these wretched mongers. Nevertheless Phrenology has gone on from year to year slowly gaining ground with the intellectual world. The number of scientific men who have given its principles their adhesion are comparatively few; but the fact which it is producing upon the public mind, is seen peeping out in the periodical scientific literature of the day. Even those who will not acknowledge

as a science unconsciously adopt something of its principles, and occasionally make admissions which go far to grant the very groundwork of the science. Phrenology has given to Physiology a new meaning and a new value. It has furnished us with clearer conceptions of the relations of mind to body, of the mental operations, of the possibilities, nature, and mode of mental improvement, and of the general cultivation of body and mind. There has sprung up from it the New Philosophy; a system of metaphysics and ethics of admirable clearness, consistency, cohesion, beauty and practical utility.

Two years since the people of Woodstock, and of other portions of the Province, had the privilege of listening to a brief course of lectures on Phrenology and Physiology in their application to life, by Mr. L. N. Fowler, the younger brother of the gentleman now lecturing upon the same subjects in St. John.—We can speak for the decided impression made in our town by the simple but clear and earnest elucidations of Professor Fowler. Very few who entered the lecture room went away otherwise than pleased and instructed. We feel satisfied that those who heard the one brother will be glad to have the opportunity of hearing the other. Mr. O. S. Fowler's perception of the relation between the physical structure of the man or woman and his or her mental organization, is, we understand, almost marvellous to those who have not been accustomed to think of the intimate connection which exists between mind and body, and who are not acquainted with the vast and varied experience gained by a lifetime of careful research and experiment.

Thornton, chapters 4, 5 and 6; Education in New Brunswick; Lines on Art.

CARLETON AGRICULTURAL SOCIETY. A meeting of the Committee of Management was held in the Secretary's office on Saturday last. Present, Messrs. H. E. Dibblee, John Harper, A. K. S. Wetmore, H. Cowperthwait, John D. Ketchum, William Edgar, Thos. Stephenson and Secretary.

The sub-committee on Premium List for the Show proposed to be held the ensuing Fall reported a draft list, which was accepted and passed with some modifications and additions. It was resolved that the Premium List and Regulations should be published immediately four weeks in one of the County papers, and Mr. Grover was appointed a sub-committee to ask for tenders for the publication.

Some discussion took place respecting the holding a Fair for the sale of stock, &c., on the day upon which the Exhibition was to take place, and it was finally resolved that the afternoon of the day should be devoted to that purpose. The meeting then adjourned to meet again on Saturday the 22th inst. at 4 P. M., in the same place.

UNIVERSITY OF NEW BRUNSWICK.—Several of our contemporaries are discussing the fitness of Dr. Hea for the post to which he has been appointed President of our Provincial University. To us his name is entirely new, and whatever amount of fame he may have attained in other parts of the Province, it has never extended to Woodstock. Knowing nothing about Dr. Hea we do not incline to say anything about him. Certainly his antecedents are not those which might have been desired for a President of the New Brunswick University; but if he possesses energy, a knowledge of human nature, and business tact, in a high degree, these qualities will go far to make up for lack of depth of erudition.

NEW PUBLICATIONS. From the author we have received a little volume entitled Poems and Songs, by William Murdock. As Mr. Murdock, although born a Scotchman is a resident of the Province, and the book itself is printed by Barnes & Co., St. John, we look upon it, entirely irrespective of its literary character, with no small pleasure, as a specimen of home manufacture which is far too scarce in our Province. The volume contains some fifty or sixty pieces, the greater number of which are short, and treat of humble and familiar subjects. They are nearly all written in the Scotch dialect. Mr. Murdock's verse exhibits poetic feeling, and some of it reads pleasantly enough; but it cannot perhaps lay claim to the qualities which are found in true poetry. Neither in idea, in fancy, or in composition does it rise to the heights, or descend to the depths, of divine poetry. Nevertheless we think Mr. Murdock did well to publish it; and we doubt not that his book will be made very welcome to many a New Brunswick fireside, where the sound of a Scottish dialect is still familiar; and anything which excites old memories, and brings back old thoughts and associations connected with the land of the heather, is hailed with a feeling of national pride on which the lapse of time seems to have no influence.

The printer and binder have both done their work well; and the volume is a very neat and presentable one. The Water Cure and Phrenological Journals, for July have been received, from Fowler & Wells. Harper's Magazine for July is also at hand, as is the Working Farmer for the same month. The Guard, of July, edited by R. Aitken and E. M. Irving, Teach and printed and published by Barnes & Co., St. John, is a good one. Its contents are History of Acadia; State of the World as it is; and Echoes of Papers by a Recluse, No. 6; Coal third article; The Beaver; Grace

ARRIVAL OF THE PARANA AT ST. JOHN'S, N. F. ST. JOHN'S, N. F. July 5. Caught upon starting, the Parana war steamer dispatched in her place and arrived here this morning. Reported that Garibaldi held Council, at which it was determined to march on Messina soon as fully organized. Expected that march would commence 22th June. It is said that Neapolitan Government determined to purchase two captured vessels, but American Minister denounces negotiation for insult on the American flag. King of Naples is ill. Assented Neapolitan Council resolved to grant Constitution, general amnesty, total change in Ministry and Free Press and Italian alliance with Piedmont, but King's assent wanted. Reported Russian and Spanish legations threatened to withdraw unless Sardinia stopped expeditions to Sicily. House of Lords debated Slave Trade question, and adopted resolution in favour of reappointment of consulate at Mozambique as check, notwithstanding Government opposition. Reported Gladstone determined to resign on account of same report adopted by Commons. Committee of order, objection of Bill repealing Paper Duty. Volunteers review by the Queen was a brilliant success—over 10,000 men in line. Prince Jerome Bonaparte dead. Napoleon visits Savoy in July. Since Emperor's return from Baden troops concentrated on the Eastern frontier of France withdrawn. Reported French loan will be twenty or thirty millions sterling. Ruetrians making vast military preparations at Venetia.

Barling Brothers introduced new Russian loan of £200,000 sterling in London—4 1/2 per cent at 92. China mail telegraphed. Steamer Malabar having on board Lord Elgin and Baron Gros, was wrecked off Larbour of Galles; no lives lost. Bullion in ship. Both Ambassadors lost creditentials and all papers, and would be delayed at Galles until 6th June. CANTON, May 10.—Reply from Chinese were actively employed preparing resist. Allies occupied Cheuan with out resistance. Canton trade improved. Shanghai stagnant, owing to alarming movements of the rebels. MARKETS.—Provision quiet and steady. Weather unfavourable for crops. Sugar dull. Coffee dull. Rice steady. Turpentine steady. London Money Markets.—Consols 93 1/2 for accounts ex dividend. Wheat—declining tendency. Tea firm. THE PRINCE OF WALES.—A certain veil is thrown over the subject; but we have some reason to believe that the programme of his Royal Highness's tour has been modified, even at recent date. We now understand that he will extend his travels far to the West and employ some weeks, if not a couple of months, in the whole tour. So much the better. His original plan was to more fit the youthful Prince for a personal knowledge of the dominions which he is to govern. "Feeling is believing" and something more. But there is one class of British Colonies which will justify and keenly feel the slight, should the Prince not extend his footsteps into their lands. We allude to those colonies which have required a separate self-government, the United States of America. For British colonies they are and part and parcel of the Anglo-Saxon family they will remain. They are, in truth, the arms of England, and must continue to be exercising as a common language enables them to share with us a common industry in the broad fields of production and trade. If any rancours remained after the grievous fault of George the Third and his advisers, their last traces have passed away within the last few years. But what will Americans say if the illustrious young Englishman should come next door, and not do so much as make a call? What return would this be for the opening courtesies with which Americans, while in no degree ceasing their independence, manifest their satisfaction at any show of royal attention. London Chronicle.

ARRIVAL OF THE PARANA AT ST. JOHN'S, N. F. ST. JOHN'S, N. F. July 5. Caught upon starting, the Parana war steamer dispatched in her place and arrived here this morning. Reported that Garibaldi held Council, at which it was determined to march on Messina soon as fully organized. Expected that march would commence 22th June. It is said that Neapolitan Government determined to purchase two captured vessels, but American Minister denounces negotiation for insult on the American flag. King of Naples is ill. Assented Neapolitan Council resolved to grant Constitution, general amnesty, total change in Ministry and Free Press and Italian alliance with Piedmont, but King's assent wanted. Reported Russian and Spanish legations threatened to withdraw unless Sardinia stopped expeditions to Sicily. House of Lords debated Slave Trade question, and adopted resolution in favour of reappointment of consulate at Mozambique as check, notwithstanding Government opposition. Reported Gladstone determined to resign on account of same report adopted by Commons. Committee of order, objection of Bill repealing Paper Duty. Volunteers review by the Queen was a brilliant success—over 10,000 men in line. Prince Jerome Bonaparte dead. Napoleon visits Savoy in July. Since Emperor's return from Baden troops concentrated on the Eastern frontier of France withdrawn. Reported French loan will be twenty or thirty millions sterling. Ruetrians making vast military preparations at Venetia.

Job Work

DONE WITH NEATNESS & DISPATCH, AT THIS OFFICE.

THE GREATEST Medical Discovery OF THE AGE.

Dr. KENNEDY, of Roxbury, has discovered in one of our common pastures weeds a remedy that cures EVERY KIND OF HUMOR... One to three bottles will cure the worst kind of pimples on the face.

Two bottles are warranted to cure the worst case of erysipelas. Three to five bottles are warranted to cure all kinds of rheumatism. Four to six bottles are warranted to cure the worst case of scrofula.

Reader, I have peddled over a thousand bottles of this in the vicinity of Boston. I know the effect of it in every case. So sure will this cure humors. I have never sold a bottle of it but that sold another; after a trial it always speaks for itself.

Several cases of epileptic fits—a disease which was always considered incurable, have been cured by a few bottles. O what a mercy if it will prove effectual in all cases of that awful malady—there are but few who have seen more of it than I have.

I know of several cases of dropsy, all of them aged people cured by it. For the various diseases of the liver, Sick Headache, Dyspepsia, Asthma, Fever and Ague, Pain in the Side, Diseases of the Spine, and particularly in diseases of the Kidneys, &c. the discovery has done more good than any medicine ever known.

No change of Diet ever necessary. Eat the best you can get, and enough of it.

DIRECTIONS FOR USE.—Adults one table spoonful per day—Children over ten years one spoonful—Children from five to eight years, tea spoonful. As no directions can be applicable to all constitutions, take sufficient to operate on the bowels twice a day.

The Principal Office for the State of Maine is at the British Provinces, is at the Drug and Medicine Store of H. H. Hay, 15 and 17 Market Square, Portland, (Me.) to whom all orders should be addressed.

Sold by all respectable Druggists throughout the United States and British Provinces. Price \$1 00.

AGENTS. W. T. Baird, Woodstock; J. W. Raymond, do.; Willard Sawyer, Upper Woodstock; A. W. Raymond, Grand Falls; J. W. Raymond, Middle Simonds; Mark Trafton, Houlton Me.

IMPORTANT! THE SUBSCRIBER, thankful for the past favors, would respectfully inform the inhabitants of Woodstock that he is selling Furniture to those who have suffered by the LATE FIRE.

WILLFULLY AND MALICIOUSLY, and he brands them as wilful and malicious. R. B. DAVIS. April 23, 1860.

EQUITABLE Fire Insurance Company LONDON. Capital £500,000 Sterling. J. O. WINSLOW, Agent for Woodstock.

John Moore, Importer and Dealer in Liquors, Groceries, Pickles, Sauces, &c. &c.

QUEEN ST. FREDERICTON, N. B. HAS Constantly on Hand and for Sale the following GOODS: Dark & Pale Brandy, Gin, Jamaica Rum, &c.

They have also on hand a great variety of finished Monuments, Tombstones, and Head Stones of the first quality of Marble, and at lower prices than can be purchased elsewhere.

MRS. WINSLOW, An experienced nurse and Female Physician, presents to the attention of mothers, her SOOTHING SYRUP For Children Teething.

It will not only relieve the child from the pain, but it will also give tone and energy to the stomach. It will act most instantly relieving the griping in the bowels, and the colic.

THE UNDERSIGNED, having made an extension of the New Brunswick and Canada Railroad to the wharf, is now prepared to STORE GOODS, arriving from the United States and elsewhere, destined for the upper St. John.

China, Glass and Earthenware. EX CONQUEST. F. CLEMENSON has received by the above Ship from Liverpool White Stone Dinner, Tea & Breakfast Sets.

TO BUYERS OF LAND. THE Subscriber offers for sale a FARM in Jackson town. It contains one hundred acres of superior land, thirty acres of which are cleared, and the rest wooded with a heavy growth of Maple, Birch, and Hemlock.

UPPER and SHEET IRON WARE. WILLIAM HAMILTON has removed his shop to his new building between Mr. Sisson's and Mr. Sharp's, where he is prepared to do every kind of work in his line well and promptly.

Magistrates Blanks for sale at the JOURNAL OFFICE. HUGH McLEAN, Agent. Woodstock, April 23, 1860.

Scrofula, Or King's Evil

A constitutional disease, a corruption of blood, by which the fluids become thick, weak, and poor. Being in the circulation pervades the whole body, and may form a disease in any part of it. No organ is more its attack, nor is there one which it does not destroy. The first symptoms are manifested by morbid humors, low spirits, and filthy habits, the complexion is sallow, and the surface, eruptions or sores. This foul eruption, which resides in the blood, deprives the energies of life, so that scrofulous constitutions not only suffer from scrofulous eruptions, but they have less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which climates the human family has its origin directed in this scrofulous contamination; and all destructive diseases of the liver, kidneys, lungs, and indeed, of all the organs, arise from an aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by the blood by an alternative medicine, and vigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla the most effectual remedy which the intellect of our times can devise for this evil, where spreading and fatal mauldly. It is obtained from the most active remedials that have been discovered for the expurgation of this disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure not only scrofula, but also those other affections which arise from it, such as ERYTEM, and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSOL, OR ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BRUISES AND BOILS, TUMORS, TERTIARY AND SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYMPHYLITIC AND MERCURIAL DISEASES, DROPSY, DYSPENSIA, DEBILITY, &c. INDEED, ALL COMPLAINTS ARISING FROM VITiated OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth; for scrofula is a degeneration of the blood. Its particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible contaminated constitutions.

Ayer's Cathartic Pills. FOR ALL THE PURPOSES OF A FAMILY PHYSICIAN, as so composed that disease within the range of their action can rarely withstand or evade their penetrating properties search, and cleanse and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitality. As a consequence of the properties, the invalid who is bowed down with pain or physical debility is astonished to find health and energy restored by a remedy at once simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named pleased to furnish gratis my American Almanac containing certificates of their cures and directions for their use in the following complaints: Costive ness, Heartburn, Headache arising from disorder of the Stomach, Nausea, Indigestion, Flatulency, and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice, and other kindred complaints arising from a low state of the body or obstructed of its functions.

Ayer's Cherry Pectoral. FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons who have been restored from almost and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to need observation, and where its virtues are known, it public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefit on the afflicted they can never forget, and we placed cures too numerous and too remarkable to be forgotten.
