Here's an Advantage

On any day of the week, excepting Wednesday, a "rush" order for poster work, etc., reaching the Reporter office in the morning will be completed and returned on the evening train.

TO BURN THE MORTGAGE

The annual congregational meeting of St. Paul's Presbyterian church will be held on Monday evening next. A special feature of this meeting will be the burning of the mortgage, the claims of which have been fully satisfied. A spirit of self-sacrifice, devotion to duty, unswerving loyalty to the church, and to all that Presbyterianism stands for, on the part of the congregation, has made this ceremony possible, and all residents of Athens and all Presbyterians "within the bounds" will unite in extending congratulations upon this happy consummation.

THE LATE W. H. KELLY

The death occurred at Toronto, on Sunday last, of Mr. W. H. Kelly, brother of Messrs. A. W. and I. M. Kelly, of Athens. He resided with his daughter, Mrs. Shoolice, in that city, and as he had been invalided for a long time with paralysis, his death was not altogether unexpected. From an early age he had been in the employ of the Grand Trunk Railway, and was conductor of a train running between Toronto and Kingston when he left that company and took a similar position with the C. P. R. on the Ontario and Quebec division.

Deceased was very highly esteemed by the members of the Order of Railway Conductors, of which he was a prominent member. He was formerly a resident of Brockville, and in speaking of his demise the Recorder says: The late Mr. Kelly was a man of sterling integrity and was very popular with all who had the privilege of his acquaintance. His death will be learned with regret by his many old friends in this vicinity.

A SERIOUS CHARGE

Robert R. Gamey, M. P. P., who in an interview some weeks ago announced that, although elected as a Conservative, he would afford the Liberal government an independent support, created a tremendous sensation in the legislature last Wednesday by stating that he had been bribed with the sum of \$2,000 to support the government and had taken the money with the intention of securing proof of the corrupt transaction before the house.

Mr. Gamey in his statement charged that payments of \$4,000 had been made by Hon. James R. Stratton, the provincial secretary to ensure his support, and that Frank Sullivan, an officer of the public works department, had been the go-between. Sullivan, he says, received \$3,000 in bills on the first occasion from a messenger sent by Mr. Stratton to the smoking room at the parliament buildings, where Gamey and Sullivan sat waiting, and \$1,000 in bills on the second occasion directly from Mr. Stratton. Sullivan, by an arrangement previously made, took half the money, giving Gamey the other half. On the second occasion Mr. Stratton, according to the story of the member for Manitoulin told him personally the denomination of the bills in the package handed to and afterwards opened by Sullivan and divided between the two.

Hon. J. R. Stratton, in an interview, denied most of the statements made by Mr. Gamey.

The Liberals want Mr. Gamey's charges investigated by a commission of judges; the Conservatives want them referred to a committee of the Legislature. Party feeling is at boiling point in the Legislature, and it is not expected that a division will take place before this evening.

W. C. T. U. NOTES

Iowa has gone one better than the British liquor license law and condemns habitual drunkards to lunatic asylums. When the measure passed it caused but little stir, but within eight months three hundred alcoholic patients were under restraint and treatment. An Iowa despatch says that inebriates continue to flow into the state asylums at the rate of about fifty a month, and that an Iowa court has just ruled that their constitutional rights are not violated by their detention. Some of the inebriates don't like to be shut up, but the treatment they get seems to be humane and salutary. Their liquor is stopped, and they have to work on farms, and are encouraged to improve their habits. When they seem to be cured they are discharged, and report says that, so far, about 75 per cent of the cases have no result.

THE LATE DR. GILES

On Thursday afternoon last Dr. Giles departed this life at Brockville General Hospital. The news of his death caused surprise as well as sincere sorrow in Athens, his home, as well as throughout the county; for the serious character of his ailment was not generally known. He had been ailing but seemed at times to be recovering, and the thought of most was that his removal to the hospital on the 6th inst was simply for the purpose of hastening a too tardy recovery.

Dr. Giles has been so long prominently identified with the professional and business life of this part of the county that his life is an open book to the majority of our readers. In 1861 he graduated at Queen's College, Kingston, and has practiced his profession at Gananoque, Brockville and Athens. He was born in 1834 on the farm, just east of Athens, where he resided at the time of his death. Of his family, the Recorder says: In 1863, he married Caroline Teskey, of Appleton, Lanark county, who survives, with a family of four children, viz: Mrs. Cookell, Yorkshire, England; Mrs. (Rev.) Ralby, Kitchener, O.C.; Miss Edith Giles, of the Brockville Collegiate Institute teaching staff, and Dr. Clifton Giles, of Iowa. Two sisters, Mrs. Glasford, of Quebec, formerly of Brockville, and Mrs. Adam Teskey, of Appleton, and two brothers, Richard Giles, of Summit, N.J., and James Giles, of Athens, also survive.

Dr. Giles did not confine all his attention to his profession, but interested himself in all that concerned the people among whom he lived. The educational interests of his native village were by him always warmly championed and he took an active interest in the progress of agriculture. In 1876 he was elected by acclamation to represent South Leeds in the Local Legislature, and in all political contests he took a leading part.

The funeral took place on Saturday at Brockville cemetery, and was attended by a large concourse of sorrowing friends. The members of the Canadian order of Foresters attended in a body.

The pall bearers were Drs. Jackson, Horton, Robertson and Bowie. The services were conducted by Rev. O. G. Dobbs, rector of St. Paul's church, assisted by Rev. T. G. Mansell, pastor of Wall street Methodist church. The floral tributes included the following: The family, a pillow; Athens high school board and staff, wreath; the board of trustees of the Brockville Collegiate Institute, large spray; Wall street Methodist church choir, crescent; teachers of collegiate, wreath; students of collegiate, wreath; the Chateaufort Circle, sickle of violets and wheat; Mr. and Mrs. Robert Craig, spray; Mr. and Mrs. John Culbert, spray; Mrs. S. Flint, spray; Miss Beacock, violets; Mrs. W. West, Almonte, spray of lilies and violets; Mrs. Karley and Mrs. Forth, Unionville, spray of roses; Y.W.C.T.U., wreath; Mr. and Mrs. A. E. Donavan, Athens, wreath; Mr. Lewis and Mr. Patterson, roses; Mr. and Mrs. George Taylor, Gananoque, spray.

And so one has gone out from among us to return no more—one whom we all knew and esteemed; a home has been made desolate, sorrow deep and abiding has entered there; one more evidence of man's mortality has been presented. That many comforting thoughts may come to the family so sorely bereft is the wish of all.

A TRIBUTE TO ATHENS

I've left your handsome, pretty town,
 Where I longed so oft to be,
 Where men and women all look round
 For honor and principality.

Thy streets are laid out very fine,
 From one end to the other,
 With handsome trees, all straight in
 line,
 From one street to another.

With buildings none can thee compare,
 Not even Brockville City,
 Thy schools and churches are all fair,
 And no one can thee pity.

I'll now retire from writing more,
 For acquaintances I have many,
 I cannot think, it makes me sore,
 It's a pity I haven't any.

—C. J.

LONG AGO

I used to know a lot of things—
 Once I was very, very wise—
 It beat creation what I knew
 Of things beneath the sunny skies;
 Then folks would listen when I spoke
 With rapt attention, bending low,
 And heed the all I had to say—
 But that was very long ago.

I knew where fragrant flowers grew,
 And many a rustic shady nook,
 I knew the names of all the trees,
 Which clustered by the tuneful
 brook,
 I knew the wild-fowl's warning cry,
 Their haunts I knew in marsh-land
 low,
 And all about the birds and bees—
 But that was very long ago.

I knew the green and grassy slopes
 And all the grasses, all the crests,
 And every crevice by the stream,
 Where water-ossils hid their nests,
 I knew each creeping vine and shrub,
 And every bud, and every blow,
 When I was wise, so very wise—
 But that was very long ago.

I knew the meadows, hills, and lanes,
 The deepest water in the pool,
 And the initials on the desks,
 Of all my playmates at the school,
 I knew of kindness, love and truth,
 And all the things 'twas good to
 know,
 Could I exchange life's time-worn lore
 Again be wise as long ago.

SALE OF MICA MINE

Rideau Record: In order to show the rise and fall in the value of minerals we cannot do better than refer to an example in phosphate and mica which has taken place in North Burgess. In 1891 Capt. Foster and Mr. Ogle Cars purchased the mineral right to 300 acres of land in North Burgess eight miles from Perth. The purchase was made with the sole intention of mining phosphate which was worth at that time \$23.00 per ton. They immediately began the mining of phosphate and took 200 tons at a cost of \$6.00 per ton for mining. About this time phosphate was discovered in Florida and several countries, in very large quantities so that the price dropped in a short time from \$23.00 to \$9.00 per ton.

In taking out the phosphate large bodies of mica were discovered but as it had no commercial value at that time tons of it were broken up and wheeled out as refuse and owing to the low price and limited sale of phosphate the property was abandoned and no work done since 1892, the owners expecting to lose all they had invested. Recently there has been a great boom in mica which now finds a ready market at very high prices, and this week Messrs Foster and Cars sold 100 acres for \$4000 cash and they yet hold 200 acres adjoining upon which there is much larger deposits of mica than on the 100 acres they sold and already they have been asked to name a price for the 200 acres. They fully expect to be able to sell at a good figure very soon as the property is known to be one of the best mica properties in North Burgess.

The mica taken out of those properties in 1891 and dumped as refuse would now be worth several thousand dollars.

OPENING CEREMONIES OF DOMINION PARLIAMENT.

Matters of Importance Touched on in Speech From the Throne

The Colonial Conference Mentioned—The Rush of Immigrants Spoken of—Promis of a Commission on Transportation—A Redistribution Bill Promised—The Alaska Boundary Matter—Other Bills to be Brought Down.

An Ottawa, Ont., despatch says—Parliament was opened at 3 o'clock this afternoon by Lord Minto. There was a large attendance at the opening ceremonies, and the interest manifested in the event was as great as in past years.

I feel assured that good will result from the bringing of the leading public men of the great self-governing colonies into direct contact with each other, and with the statesmen of the motherland.

SPEECH FROM THE THRONE. Ottawa, Ont., despatch: Honorable Gentlemen of the Senate; Gentlemen of the House of Commons: I am glad to be able to congratulate you on the continued prosperity that prevails throughout the Dominion.

A treaty has been entered into between His Majesty and the Government of the United States under which the proper delimitation of the boundaries between Canada and Alaska is to be judicially determined by a tribunal of six impartial jurists of Canada and of the Republic.

Colonial Conference. Representatives of this Government participated in the important colonial conference, which was called by His Majesty's Government, in connection with the coronation.

Gentlemen of the House of Commons.—The public acts will be laid before you, and also the estimates for the coming year, which have been prepared, with due regard to economy and the rapid growth of the Dominion.

CANADIAN GIRL PRISONER IN A DOCTOR'S HOUSE.

Queer Turn of Affairs in a Truck Driver's Strike in Kansas City.

Friendship, March 13.—Dr. John Curry, who lives about a mile and a half from this village, was arrested yesterday, charged with assault with intent to kill. He was arraigned before W. H. Scott, justice of the peace, and was held for the grand jury.

took her at the station. He took her back to his home. Miss Johnson then wrote a letter to her sister, telling of her trouble. The letter was mailed by one of the neighbors.

WHITAKER WRIGHT U.S. CITIZEN?

King Edward Will Go to Lisbon for a Visit on March 31.

London, March 16.—According to a financial paper, Whitaker Wright, the director of the London & Globe Finance Corporation, Limited, for whose arrest a warrant was issued yesterday following the order of the Chancery Court to criminally prosecute him, and who is said to be in Egypt, secured U. S. citizenship while engaged in business enterprises in Philadelphia and elsewhere.

States citizen, although they knew he went to America as a young man. It is believed to have been born in Cheshire, England. It is pointed out that, providing Wright should prove his American citizenship, his extradition could not be secured by the British Government without the consent of the United States State Department.

A prominent club woman, Mrs. Danforth, of St. Joseph, Mich., tells how she was cured of falling of the womb and its accompanying pains.

"Life looks dark indeed when a woman feels that her strength is slipping away and she has no hopes of ever being restored. Such was my condition a few months ago when I was advised that my poor health was caused by prolapsus or falling of the womb. The words sounded like a death knell to me, I felt that my sun had set; but Lydia E. Pinkham's Vegetable Compound came to me as an angel of life; it restored the lost forces and built me up until my good health returned to me. For four months I took the medicine daffily and each dose added health and strength. I am so thankful for the help I obtained through its use."—Mrs. ROSEMARY DANFORTH, 1007 Miles Ave., St. Joseph, Mich.—\$5.00 for full trial of the best letter proving genuineness cannot be produced.

The record of Lydia E. Pinkham's Vegetable Compound cannot be equalled by any other medicine in the world. "FREE MEDICAL ADVICE TO WOMEN." Women would save time and much sickness if they would write to Mrs. Pinkham, Lynn, Mass., for advice as soon as any ailment is felt.

Fatal Feelslary Canoe Trip.

Goderich, Ont., March 13.—An attempt to run the River Maitland from Auburn to Goderich in a canoe resulted yesterday in the death of Frank Turnbull, 21, a clever young physician, who has been practicing at Auburn, and a brother of Dr. J. L. Turnbull of this town. He had sold his practice and was about to go abroad to prosecute further studies in his profession, and before leaving was anxious to perform a feat which has frequently been undertaken by some of the young men of this town, the navigation of the Maitland during the spring floods. The river broke up only a few days ago, and the icy current was flowing with great rapidity. Yesterday morning at 10.30 he started from Auburn to make the hazardous trip of forty miles down the winding river to Goderich.

How or when the accident occurred is not known, but an upturned canoe with a man clinging to it was seen from the G.T.R. station at 2.30 in the afternoon. They were intercepted and the unfortunate man was taken to an office near by, where all the doctors of the town, including his brother, failed to restore life to the chilled body.

FATAL WRECK AT OAKVILLE

Fast Freight Collides With Standing Freight Train.

Reports Differ as to Position of Danger Semaphore Signal—Brakeman McGuire Was Killed at His Post—Coroner is Attempting to Fix the Responsibility For the Accident—Official Story of the Wreck.

Oakville, March 16.—A rear end collision of two east bound Grand Trunk freight trains occurred at 1 o'clock Sunday morning just opposite the station platform.

An east bound freight, Engine 597, was at the station picking up a couple of cars when, without warning, another east bound train, Engine 785, crashed into the rear of the standing cars.

David J. McGuire, the forward brakeman of the second train, was killed, the engine was derailed and half a dozen cars were completely destroyed. The escape of the engineer and fireman is a little short of miraculous.

Both crawled through the standing cars to safety after the locomotive had come to a standstill in the ditch.

They say that Agent Albertson sought to signal the train with his lantern, but without effect. The engineer on the other hand claims that they without any signals against them.

The first train was standing on the siding when the second train, bearing down the grade at 40 miles an hour, collided with the standing cars. Neither the engineer nor the fireman could have seen the train ahead, or the probability is that the heavy grain cars adjoining the locomotive sent it off the rails, which accounts for the comparatively small amount of damage inflicted upon the standing train.

The caboose of the latter was smashed into the siding wood.

McGuire was at his post close to the engine when the collision occurred. He was probably signalling with his lantern to the rear end brakeman and had no warning of the danger into which he was rushing.

Death must have been almost instantaneous. He was found under the engine wedged into the corner which filled the car adjacent to the engine. There was little or no apparent injury to the body. Daniel McGuire was smothered in the corner. His body was removed to the station and later to Undertaker Youngs.

Coroner Williams empaneled a jury during the afternoon, and next Tuesday an effort will be made to fix the responsibility for the man's death. McGuire was in the accident at Merriton and escaped with only his limbs. His parents live in Merriton, and the victim is single and lives with his sister.

Official Story of Wreck.

The official account of the accident states that one extra east train, engine 597, was standing at Oakville station at 1.10 a.m. Saturday, when it was run into by another extra east train, the front end brakeman, D. J. McGuire, was caught in jumping, and was found dead under the engine. Seven or eight cars were derailed, and the corn with which they were loaded was spilled along the track.

The cause of the accident was the second train running by the semaphore set at danger. No reason can be assigned for this, as several witnesses were sure that the danger signal was set.

The train was soon cleared, and traffic was not delayed.

THE DOMINION PARLIAMENT.

Ottawa, March 13.—Parliament was opened at 3 o'clock yesterday afternoon by Lord Minto. There was a large attendance at the opening ceremonies, and the interest manifested in the event was as great as in past years.

Just before the House adjourned R. L. Borden asked for an explanation of the changes in the Cabinet.

Sir Wilfrid Laurier replied that the first duty of the House, according to constitutional usage, was to pass an address in reply to the speech of His Excellency. As soon as that duty had been accomplished he would be prepared to name a day and give the desired explanation.

Sir Wilfrid held an informal levee after the adjournment.

Ottawa, March 14.—The address in reply to the speech from the throne was passed after the movers and seconders and Mr. R. L. Borden and Sir Wilfrid Laurier had spoken.

Chamberlain Was Warmly Greeted.

London, March 16.—"Southampton Welcomes Home Britain's Empire Statesman," in huge letters surrounded and intertwined with the Union Jacks and Stars and Stripes was the motto that first greeted Colonial Secretary Chamberlain and Mrs. Chamberlain on landing at Southampton Saturday morning from South Africa.

The travelers had a magnificent greeting. The Colonial Secretary, who showed evident pleasure at the heartiness of the welcome, said he was hopeful of the loyalty. Subsequently Mr. Chamberlain and his party took a train for London, where a large crowd waited their arrival. Premier Balfour and practically the whole Cabinet were present at Waterloo Railroad Station to meet Mr. Chamberlain. The greetings which he received were everywhere most cordial.

For Writ of Habeas Corpus.

St. Thomas, March 16.—Barrister John A. Robinson will apply for a habeas corpus in the case of Robert Foster, the convicted impersonator, now serving his year's sentence in the Elgin jail. This proceeding is taken so as to bring the case before the Court of Appeal.

KEPT A PRISONER.

Canadian Girl Incarcerated by a New York State Doctor in His Home—Repeating Shotgun For Mob.

Friendship, N.Y., March 16.—The arrest of Dr. John Curry at his home two miles east of Friendship Friday on a charge of assault and threat to kill, on a warrant sworn out by Miss Evelyn Johnson of Niagara Falls Centre, Canada, has brought to light one of the strangest stories ever told in Allegany County. It is that of a young woman of beauty and intelligence lured from her home in Canada by deception and held a prisoner for weeks by a physician.

Her clothes were hidden, she was compelled to do rough work about the barn and farm, her letters were read and the truth kept from her father and sister. Becoming alarmed, her sister determined to visit her, discovered her condition, was ordered from the physician's house, assaulted, had the physician arrested and placed under bail for the grand jury and is now on her way to her home in Canada in company with her sister.

Once a mob came to avenge insults to the girl, but the doctor kept them at bay with a repeating shotgun.

The victim of this strange tragedy in real life is Miss Stella May Johnson of Niagara Falls Centre, Ont. The doctor says he has nothing to fear.

THE GAMEY CHARGES.

Motion for Judicial Commission Submitted by the Premier.

Toronto, March 13.—When the Ontario Legislature met yesterday afternoon Premier Ross rose in a crowded house, and amid breathless silence, proposed that the charges of Mr. R. H. Gamey, against Provincial Secretary Stratton be submitted to a commission of two judges of the Supreme Court of Judicature, or of the president of that court and two other officials, to be appointed by the Government without reference to the House, and that the House adjourn in the meantime, to reassemble when the report of the judges shall have been prepared in about three weeks.

The Premier then read the motion which he submitted to the House, as follows:

Resolved, that an humble address be presented to His Honour the Lieutenant-Governor praying that he will be graciously pleased to issue a commission to inquire into and investigate the charges of bribery set forth in the statement made to this honorable House by Mr. Robert R. Gamey, member for the electoral district of Manitoulin, on Wednesday, the 11th day of March instant, and all matters and things which, in the judgment of the commissioners, relate thereto or affect the same; such commission to be directed to two commissioners, who shall be two of the Chief Justices of the Supreme Court of Judicature or the President of the High Court of Justice and one of the Chief Justices of the Supreme Court of Judicature and the said commission shall consist upon the said commissioners all the powers contained or given in or by Chapter 19 of the Revised Statutes of Ontario, being an act entitled "An Act respecting inquiries concerning public matters," or in or by any act amending the same.

Toronto, March 14.—The House debated the Gamey charges yesterday, coming to no conclusion. It was agreed that no vote would be reached Monday. The speeches on both sides were unusually vigorous.

TO SATISFY SUBSIDY SEEKERS.

All Railroad Schemes to Be Turned Over to Transportation Commission.

Ottawa, March 16.—The latest speculation on the railway projects is that nothing will be done till the transportation commission hands in its report, as it seems to be the general belief that all the schemes will be turned over to it. Besides Sir William Van Horne, it is expected that Hon. A. G. Blair will be a member of the commission. Walter Scott, M.P., of Regina, considers the railway projects so far are merely in the air. He expects the transportation commission to bring them down to earth. He is strongly opposed to any land grant, and declares the west is with him on this point.

he Alaska Commission.

A cable has been received by the Government from the Imperial authorities in reply to the request of Canada that the Chief Justice of England, Baron Alverstone, and two Canadian jurists, should be appointed commissioners for the Alaska boundary inquiry. It stated that the Chief Justice of England had consented to act, and asked the Canadian Government to send forward the names of the two judges for the commission as soon as possible. The Cabinet met Saturday afternoon and decided on the names of the Canadian commissioners, but did not communicate them to London for the men in view have yet to be communicated with. The Imperial Government will be informed of the selection to-day.

ARREST OF WHITTAKER WRIGHT.

London Promoter, Accused of Embezzlement, in New York.

New York, March 13.—J. Whittaker Wright, the London promoter accused of fraud in connection with various financial corporations, was arrested here yesterday at the request of the London police upon his arrival on the French Line steamer La Lorraine. Wright was at once turned over to the United States authorities and taken to Ludlow-street jail. The financial crash of the companies floated by Whittaker Wright came in December, 1900. There were eleven of these, including the parent company, entitled the London and Globe Finance Corporation, with a total capitalization of \$87,875,000. Wright was the managing director.

FIRE DESTROYED BIG TANNERY.

Hon. E. J. Davis Establishment at King Goes Up in Flames.

King, March 16.—At the noon hour Saturday fire broke out in the extensive tannery of Hon. E. J. Davis, Commissioner of Crown Lands, which was entirely destroyed.

The fire, which was discovered on the third floor by some workmen who were eating their noon-hour lunch in the building, spread rapidly, and in a short time was entirely beyond control. Practically nothing of the machinery and stock could be saved, except of the latter as happened to be.

TO MY MANUSCRIPT

Thou product of request-red flowers, Thou vase of limp, unfragrant flowers, Thou toy of hope, of feeble powers, Companion sweet of many hours.

Ye, one of nature's cruelest broods, With heavy lines and clumsy broods, The tangled weeds of sluggish broods, The rustic growth of inland noods.

But, though the critic leered high, To quite beyond his cultured eye To see thy failings all as I— With this consoling thought, go, I pray.

Should men reject thy jagged lore, Return, I'll love you all the more, Within my pulsing bosom's core You'll ever find an open door.

CAINTOWN

Mr. and Mrs. S. B. Hogsboom left Monday for their home in Ontario, N. Y., after spending the winter with his parents.

Mr. A. Sherman, of New Dublin, made a business trip through here last week.

Mr. Ben Young, who has been so seriously ill, is now much improved.

Misses Ethel DeWolfe, of Trevelyan, and Jennie Coughan, of this place, spent Saturday and Sunday at the latter's home.

Master Wilbert Parvis, who has been ill for a few weeks, is now back to school.

Mr. C. M. Quinn, music agent, of Landsowne Station, was calling on friends here lately.

Many farmers have not tapped their sugar bushes yet as they are doubtful as to whether or not this will be a sugar season.

Bees are the order of the day around here, as people are behind with their wood-cutting owing to such an early spring.

LAND GRANTS FOR VETERANS

On Saturday last the members of the old Frankville Company of Canadian Militia, who for services rendered during the Fenian raids, are entitled to land grants in new Ontario, met at the Florida House, Frankville, to consult as to the best district in which to make the selection and appoint an agent to go up and spy out the land and make a personal inspection of the lots for each member.

The meeting was organized by the appointment of Samuel Hanton, Esq., Frankville, as chairman, and Wm. Karley, Athens, as secretary-treasurer. The chairman briefly referred to the object of the meeting, and said this was the first time that the company had got together since they were disbanded at the close of service. Through the munificence of the Ontario Government, each veteran who was in actual service at the time of the Fenian raids was given the right to select 160 acres of land in such portions of New Ontario as had been set apart for that purpose, and they were here to day to try and decide in what district they would pick out their lots, as well as consider the advisability of sending one man or more up to make the selection for them. He had been informed since coming to the meeting that Mr. B. Loverin, of Athens, was present prepared to give them some information as to the best districts now open for settlement, as well as to submit a proposition for their consideration.

Mr. Loverin, on being called upon, exhibited a number of large maps of the districts open for settlement, and

gave it as his opinion that, from all the information he was able to gather from reliable sources, the Temiscamingue district presented the best soil and was, taken altogether, the very best place for them to make their selections. He had been in communication with several parties who had been over that district, as well as other portions of new Ontario, and they all agreed that the Temiscamingue country was the best location for all purposes to be found in new Ontario.

On being put to vote, those present were unanimous in favor of that district. Mr. Loverin then submitted the draft of an agreement whereby he agreed to proceed to the district decided upon and make a personal selection of one lot for each party to the agreement, and furnish each person with a statement of the soil, timber available for market, and facilities for disposing of same, as well as the means of getting to the lot from the nearest point of settlement; the cost to each person not to exceed \$7.50, provided there were fifteen signers to the agreement, and all over 15 of this company or veterans belonging to other companies who wished his services as selector of their lots, should be allowed to have the same rate, viz.: \$7.50 each.

In less than five minutes the required number of signatures were obtained, thus closing the agreement. It was further decided that each person should forward his certificate and the money required to Wm. Karley, secretary of the company, not later than the first day of May next, and any person wishing to engage Mr. Loverin's services to make a selection for them, who have not signed the agreement above referred to, have only to send their certificate and \$7.50 to Wm. Karley before the first of May to have the same rights in the selection as the others.

Mr. Loverin intends starting on his trip about the second week in May, and will be gone about four weeks. In the meantime, he would be glad to communicate with any veteran or others wishing further information in regard to the selection of lands in the Temiscamingue district.

SCOTT-CHURCH

Wednesday, March 11th, forenoon, at the residence of Rev. F. H. Sproule, pastor of the Methodist church, Frankville, a quiet wedding took place, when Miss Florence C. Church, of Addison, was married to Mr. Francis J. Scott, of Whitehurst.

The bride was most becomingly costumed in blue repp, trimmed with chiffon and pearls, with hat to match. The bride was assisted by her cousin, Miss Maude Brown, who was attired in blue Henrietta with pale blue English taffeta waist, trimmed with chiffon and pearls. The groom was supported by his cousin, Mr. B. T. Scott.

Immediately after the ceremony the young couple left for Jasper, Smith's Falls, and other points. On their return home on Friday 13th, they were tendered a reception at the home of the bride's grand parents, Mr. and Mrs. H. E. Brown, where she was the recipient of many beautiful and useful presents, showing the high esteem in which she is held.

After partaking of a sumptuous repast, prepared for the occasion, a very enjoyable evening was spent, after which the company dispersed, leaving their best wishes with the young couple that theirs may be a long and prosperous life.

HOUSE OF INDUSTRY NOTES

Died, at the House of Industry, on the 14th inst., John Aimer, of consumption. His remains were placed in the Athens vault. He was committed to the home on February 21st of this year, in the last stage of consumption, after being refused admission to the hospital, where they have every facility to take care of such patients. Surely the authorities are not going to let the old people's home be turned into a hospital for consumptives. We do not mind, if the disease is contracted here, to take care of them, but we strongly object to having parties in the last stage of that contagious disease shipped here. This is not the first case, and it is hard to get the inmates to wait on them, as they all dread the disease. We simply ask this in all fairness to ourselves, and to the inmates, and hope the counties council will look into the matter at its next session.

Since the first committal, Dec. 9th, 1895, (Thomas Robinson), there have been 67 deaths; 11 died of consumption; 21 were buried on the farm, the balance were claimed by friends.

Great sorrow was felt by the inmates of the home when they learned of the death of their late medical attendant, Dr. Giles, who had always attended faithfully to their wants.—Com.

All Stuffed Up

That's the condition of many sufferers from catarrh, especially in the morning. Great difficulty is experienced in clearing the head and throat.

No wonder catarrh causes headache, impairs the taste, smell and hearing, pollutes the breath, deranges the stomach and affects the appetite.

To cure catarrh, treatment must be constitutional—alterative and tonic. "I was ill for four months with catarrh in the head and throat. Had a bad cough and raised blood. I had become discouraged when my husband bought a bottle of Hood's Sarsaparilla and persuaded me to try it. I advise all to take it. It has cured and built me up." Mrs. Houx Re-nour, West Lincoln, N. INTERNATIONAL LESSON NO. XII. MARCH 22, 1903.

Paul's Message to the Ephesians. Eph. 2:1-10.

Commentary. Explanatory. "This epistle was written to confirm and strengthen the believers with the faith and hope of the Gospel, and to give them some most important teaching in the deepest and sublimest truths of the Christian religion."

1. The children of wrath (vs. 1-3). 1. And you—As Christ fills the whole body of Christian believers with His fitness (chap. 1:22), so had He dealt with the converted Ephesians, who before were in trespasses and sins.

2. Ye walked—They had sinned continually, not merely occasionally. They lived in sin and followed the evil practices of the heathen world. True Christians separate themselves from the world (Rom. xii. 2; II Cor. vi. 14-18) and do not conform to its sinful customs and practices.

3. We also—Paul here changes from the second to the first person, putting himself in with those persons, but has just described. All—Jews and Gentiles alike. Once lived—The R. V. brings out the meaning. The word "conversion" is missing in the original.

4. Saved—The word "salvation" is used here. It is not a mere escape from physical death, but a deliverance from all sin and its consequences. It is a complete and permanent change of heart and life.

5. But God—The apostle now shows the glorious change that had been wrought in them through the Gospel. Three words are especially emphasized—God, mercy, grace. It is in mercy—God is rich in many things besides mercy; He is rich in worlds; He owns the gold and silver in a thousand hills, as well as the entire earth.

6. Raised—Believers are citizens of Heaven and have their places assigned there, which they will soon take possession of (Phil. iii. 20, 21). But this may be understood as referring to sanctified souls in this life. Having been raised from the death of sin, we enter into a heavenly union with Christ, and the soul is indescribably happy in His love. It is heaven begun below.

7-9. Ages to come. What God does for the sinner at Ephesus would be proof of His great goodness and mercy and serve as an encouragement to sinners in all ages of the world. Through faith—Faith is the condition upon which we are saved. The instrument in God's hands by which we are saved. The means by which we continue saved. Gift—That is, salvation is the free gift of God.

10. His workmanship—Instead of our being the workers, God is the worker and we are the workmanship—the factious workmen created anew—a new creation. Thoughts—The children of wrath—They are spiritually dead (v. 1). Their only life is in Christ. They have no conception of a higher life. Sin first numbs, then paralyzes, and finally sears our spiritual sensibilities. They are under the spell of an unseen evil

power (v. 2) They are captives of Satan. 3. They are prompted to sin by the instincts of a depraved nature (v. 3). 4. They are exposed to condemnation. The change made by the Gospel—1. God has quickened us. 2. Raised us. 3. Made us sit with Christ. This change is through the mercy and love of God. It is wrought in the soul by faith (Rom. v. 1); but faith cannot be exercised until all sin has been renounced. When we forsake our sins we will be saved from our sins. Salvation implies (1) deliverance, (2) preservation, (3) restoration.

Good works—There is a sense in which good works are necessary to salvation. We are not saved by good works, but created into good works. PRACTICAL SURVEY. Our condition by nature. Dead in trespasses and sins. Not only diseased, but dead; that is, spiritual death reigns throughout man's entire moral nature. He is totally depraved and devoid of all spiritual life. There is no life in him. To die in a natural sense means a separation of soul and body. Man's only hope. It must be remembered that God is rich in mercy only through His Son Jesus Christ. They who reject the one who shed His blood for men that they might have life must forever remain dead, for the life is in the blood. Mercy is unmerited favor. It rises solely out of the benevolence of God. Consequently no good work or even multiplicity of good works can render any man worthy of the mercy of God. Abundant mercy. God is rich in mercy. This wonderful statement should encourage the sinner. One has said, "The earth is the Lord's and the fulness thereof. They tell us that there are twenty-five millions of suns with worlds revolving around them, and yet it is not said that God is rich in worlds, but it is said that He is rich in mercy." The power of mercy. It quickens the "dead." Man is utterly lost, but through mercy he may be saved. Mercy knows no hard cases and all it asks is a chance, through repentance and faith on the part of the sinner. The perpetuity of mercy. "That in the ages to come he might show the exceeding riches of his grace." Salvation is not like a spent rifle ball which weakens in force, according to the distance it has covered. It is just as strong to quicken men from the dead in this age as it was in the beginning. God is an ever present help, and a thousand years is no distance to Him. With him is no variability, neither shadow of turning.

SAFES IN CHURCHES. Uses to Which They are Put—Steel Poor Boxes Now. "Yes," said a safe manufacturer, "safes are used in churches, to some extent, but not to keep money in, because money isn't kept in churches. What they are used for here is to keep the church records and papers in for one thing, and for another, for the preservation and safe keeping of the church plate and sacred vessels. A church buying a safe for the preservation of its books and records and so on would very probably buy one second hand. It would commonly be kept somewhere in the basement of the church, out of the way, and it would very probably be built into a wall. It would not be essential that it should be burglar proof. On the other hand, safes for church plate and sacred vessels might in some cases contain pieces of great value, and would be made for protection against burglars as well as against fire. Such safes might be specially designed and built to hold the particular vessels kept in them. But while the use of regular safes in churches is confined to the purposes described, there are now used in churches of all denominations many strong boxes of steel in place of the old-time boxes of wood, poor boxes and gold boxes for the reception of offerings and contributions, placed permanently in the churches attached to the wall in vestibules or in the body of the church. Such boxes, of course, are not intended to keep money in for any length of time, and the amounts in them at any time may not be great. But made of wood and locked with an ordinary lock they are liable to be broken open and rifled, or the whole box to be carried off, for that matter, by thieves. These steel boxes are bolted to the wall, so that they can't be torn loose. While it is as easy to drop money into this steel strong box as to carry it, this steel strong box is so constructed that it cannot be fished out of it, and has a combination lock. It is intended to hold the burglar proof, but it is sneak-thief proof; and so it serves its purpose and it is, moreover, comparatively inexpensive."—New York Sun.

SUNDAY IS ASSASSIN'S DAY.

Rulers Who Met Their Doom on That Day.

Of the six rulers who have been murdered during the last two decades, notes an London Chronicle, four met their doom on Sunday, and the other two on Saturday. Caesar Alexander II, President Carnot and King Humbert were all slain on Sunday, and though Shah Nars-ed-Deen was killed on Friday, that is the Moslem Sabbath, and he was actually shot while kneeling in the mosque. On Sunday, too, Senor Canovas, the Spanish Premier, was killed, while the life of President Faure was twice attempted on Sunday in 1898. Next Sunday is Saturday, and on this day General Garfield, the Empress of Austria and President McKinley met their fate, and it was on a Saturday that King Alfonso stood in peril of his life. More mortals hail the week end with horror, but to monarchs it seems a season of peculiar peril.

THE TORONTO NEWS SAYS:

"The Massey-Harris Company not only occupies a foremost place among Canadian manufacturing houses, but the amount of capital invested in the business, the number of men which it employs, and its vast operations, entitle it to a place among the great industrial concerns of the continent. Outside of the United States, where the high tariff makes it practically impossible for a foreign company to do business, the Massey-Harris Company and its associates are known and appreciated wherever agriculture is carried on under modern conditions. The Company has had, and has yet, more keenly felt the pulse of the Dominion, and it is entirely owing to the merits of the implements which it turns out that it has been able to build up the world-wide trade which it now possesses. The heads of the Company are among the most experienced and enterprising business men in the Dominion, and the success which has attended it ever since its establishment is, no doubt, largely owing to the fact that they have always been on the alert for improvements, and have never rested satisfied with their agricultural machinery, no matter how well they might work, while there remained any chance of increasing their efficiency. Those who remember the old factory in which the Company conducted its business, for a number of years, have only to look at the immense workshops of to-day, covering acres after acre of ground on King street west, to realize the enormous development of this business. But, besides the Toronto factory, there is one in Brantford, well and the two employ nearly twenty-five hundred men. It will be readily seen that the output of so much labor must be enormous, especially when the fact is taken into consideration that the machinery used in the manufacture is of the very highest grade, and that every labor-saving and labor-saving invention which tends to cheapen or hasten production is employed. In Australia and South Africa the Massey-Harris binders are nearly as popular as in Canada, and the annual increase in the trade with those colonies shows conclusively that they are working their way into general favor. The Massey-Harris implements have played no inconsiderable part in building up Manitoba and the Northwest, and have done magnificent service in the West, where the hardship which must necessarily be endured by those taking up homes in a new and unsettled country."

DON'T PROD THE APPETITE.

Nearly All Drinks Used to Create a Desire for Food are Harmful. The Academy of Medicine of France at the unanimous request of the chamber of deputies has recently issued a report strongly condemning the drinks which are sold as appetizers, by the bulk of the "middle and lower classes. After careful analysis Dr. Lalonde, who was specially commissioned to draw that every quality of a drink contains poisonous elements. He discards the fallacy that vermouth, or noyaux, is harmless. Chartreuse is dangerous in a lesser degree, and cognac does for specific purposes. French gin is a form of wood spirit and the superstitious which makes it poisonous is a popular remedy in certain emergencies is pernicious to man's life. The Legislature ought, according to the report, to forbid the fabrication of these liquors and the immediate enforcing of the law of 1846 against absinthe. Dr. Lalonde considers that the fiscal revenue losses as much as it gains by fraud and adulteration and by the criminal or mental derangement caused by the terrible spread of alcoholism in

MAGNET RAZOR SHARPENER.

The Subject of a Patent Recently Granted. It is claimed in a patent granted to Oscar Newhouse, that a razor may be sharpened by merely placing the cutting edge in close proximity to the surface of a bar magnet. The inventor claims that the effect of the magnet is to draw into line the minute teeth or projections of the sharp edge, which normally rest at different inclinations to the blade. He states that after tests lasting for months he has found that the beneficial effect is very marked, so much so that a razor can be used a great many times without stropping or honing, it being only necessary to place the razor in proper position relative to the magnet, and allowing it to remain until it is used again. He adds that the action of the magnet has practically the effect of stropping or re-sharpening, and that it does not shorten the better cutting edge is thus obtained than can be secured by re-sharpening.

Headstrets on Trade.

Trade has, perhaps, been a little less active at Montreal, and it is doubtful owing to the fact that the roads are beginning to break up in some parts of the country, as is usual at this season. There is a good deal of activity displayed in wool, in trade centres for the past week or two than last year at the same time. In Manitoba there is a big increase in the demand for staple goods as a result of the large influx of settlers since last spring. Wholesale trade at Hamilton this week has been quite active. The orders being sent in by the travelers are large and well distributed and indicate a confident state of affairs on the part of retailers throughout the country in the future conditions of trade. Shipments are large now, as retailers appear to be anxious to secure early delivery of the goods bought, so as to be in a position to meet the demands of an early spring trade. London jobbers are receiving many orders for spring and summer goods. They are very firm in their ideas as to value. It is felt that there is a very good movement in wholesale trade for this time of the year. Country payments on marketing paper this month have been good, and the conditions of trade are generally healthy. Values of staple goods are firmly held.

Failures This Week.

R. G. Dunn & Co., report liabilities of commercial failures in March \$2,025,070, against \$1,370,280 last year. Failures this week in the United States are 239, against 229 last week, 211 the preceding week, and 232 the corresponding week last year, and in Canada 22, against 16 last week, 28 the preceding week and 34 last year. Of failures this week in the United States 84 were in the East, 74 South, 65 West and 16 in the Pacific States, and the report liabilities of \$5,000 or more.

A NEW FOOD.

Horse-Chestnuts Made Delicious After a Treatment. Horse-chestnuts contain about 27 per cent. of albumen, this remarkable proportion being greater than is found in any cultivated plants, but their bitter taste, due to the presence of about 10 per cent. of bitter resin, has condemned them as unfit for food. By extracting the bitter principle, R. Fuggie, of Hanover, claims to have made useful another waste material. After partial roasting to loosen the shells, the kernels are removed and pulverized, and the powder is placed in a tight percolator with alcohol for about a week. To extract the bitter completely it may be necessary to replace the fluid with fresh solvent. The alcohol dissolves out the resin, leaving a pleasant and nutritious meal, which contains all the albumen and starch of the chestnut, and is a valuable food. The spirit is purified by distillation and used repeatedly.

HORTICULTURAL EDUCATION.

England Said to be Waking Up in This Respect.

A sign that we are waking up to some extent is afforded by a recent announcement that the Technical Education Board has instituted a chemical laboratory at the Botanic Gardens, Regent's Park, for the instruction of students studying botany and horticulture. There is no department of science with which chemistry shows closer alliance than that of plant culture. A knowledge of soil composition, of plant foods, and of the conditions involved in the successful cultivation of crops are points of obvious importance to the agriculturist and to the gardener.

A good deal of instruction is provided nowadays for farmers by county councils, not only in agricultural chemistry, but in veterinary science and in the management of stock. It is at least gratifying to find the need for such instruction being duly realized, for such recognition is the first step toward the supply of the information which will supersede the old rule of thumb practice. — London Chronicle.

Quebec Bricklayer Quickly Cured of Lumbago.

He Used Dodd's Kidney Pills and is Now Telling Others what they did for Him.

Quebec, Que., March 10.—(Special.)—To those working at trades which necessitate exposure to all kinds of weather and who are in consequence subject to such diseases as Lumbago, Rheumatism and Pain in the back, the story of John Ball, bricklayer, of No. 57 Little Champlain street, this city, is of peculiar interest. Mr. Ball for two years suffered from Lumbago, one of the most painful forms of kidney disease. His urinary organs were also affected so that he was frequently compelled to rise at night. Thus with broken rest at night and pains by day, his lot was anything but an enviable one. One lucky day he heard of a cure of Dodd's Kidney Pills, was tempted to try them and here's what he says of the result: "I purchased a box of Dodd's Kidney Pills and after I had used them I began to see and feel a change. I used three boxes and am completely cured. You can tell anyone you like I said so."

A GREAT SCHEME.

French Silk Worms Made to Die Their Own Product. The following report is made by United States Consul Atwell at Roubaix: Messrs. Conte and Levrat have recently been making interesting experiments with silkworms, which have resulted, it is said, in the production of cocoons of varied shades. The ordinary cocoon is white, yellow, or sometimes green. The question to be solved is why different colors should be produced by similar species, and whether it is the direct result of the food taken by the worm. If this coloring matter comes from the leaves fed to the worms, Messrs. Conte and Levrat considered that it should be easy to color their food artificially and thus secure different shades of cocoons, although several naturalists have attempted to prove the impossibility of coloring matter passing from the intestines of the worm into the silk-producing glands. The worms which served for their experiments were placed on branches of privet washed over with red. They ate the leaves without prejudice, and when the larvae began to spin the cocoon, the silk was a bright red. When fed on leaves colored blue, the silk-worms produced a slightly bluish shade. The species that produces ordin-

SELECTING KENNIE'S SEED

Many people have the impression that they can grow large pumpkins from the seed of small pumpkins, good wheat from the seed of poor wheat, large potatoes from small potatoes. This is a grave mistake. You cannot grow the best vegetables or flowers from the seed of poor vegetables and flowers. The best fertilized soil, the most careful attention, the most favorable season will not make up for the lack of substance and breeding in the seed planted. The best planters bestow greatest attention in the purchase of their seed, and will buy only from reliable growers and dealers. The best is none too good, because an unproven season is a season gone forever, nor can the mistake be rectified when the season is half gone. Moreover, the best of good seed is a main bagatelle in the total cost of production, and yet good seed usually costs just a trifle more than poor seed. The Rennie's Seed business of Toronto, their reputation, their success depends upon the most thorough system of selecting. No trouble is too heavy, no expense too great to secure the best. Everything is done with Canadian thoroughness.

RUSSIAN BRUTALITY.

Painful Disclosures of a Prison Scandal—Is it Murder?

A painful story, throwing a lurid light on the methods of Russian officialism, is related by the Moscow correspondent of the "Morning Post." Nearly a year ago a young Roumanian girl was travelling in the Caucasus, when a fellow-railway passenger, one Pusepp, made advances, which the girl repulsed. On arrival at the next station the man, who turned out to be a local magistrate, charged her with the theft of his dress-sword and umbrella. Pusepp, in his official capacity, held the preliminary inquiry, and a few days later the girl died suddenly. The police doctor pronounced it a case of suicide and she was buried. But the browbeaten magistrates of the neighborhood, and a large body of workmen on the railway, convinced that the girl had suffered violence, attempted to lynch Pusepp and other officials, and troops were summoned to preserve order. The matter created such a stir in St. Petersburg that the Minister of Justice sent down a special commissioner, who brought back a white-washed report. Now matters have taken a sensational turn. Prince Michael Andronoff has made a personal inquiry on the spot, and is convinced that the girl was done to death by violence. He states that her body was a mass of bruises, and adds that there is reason to believe that a bottle acid was poured into her mouth after death to give color to the police story of suicide. The Prince also confirms the allegations that the girl was, after her arrest, handed over to minor officials and Cossacks, and he has no doubt that the poor victim was passed from hand to hand by "dozens of monsters." Moreover, he alleges that the workmen who attempted to defend the girl were dismissed from their employ on the railway, and underwent terms of punishment. In view of these allegations the Minister of Justice has promised to reopen the investigation.

WORTH ITS WEIGHT IN GOLD

St. Jacobs Oil is a physician's formula, established fifty years; the pain soothing virtues are so evenly balanced as to meet all cases where pain exists, and where an outward application is generally applied. St. Jacobs Oil is truly worth its weight in gold, even for the cure of nerve pains (and pretty well all bodily pains proceeding from the nerves). It illustrates how wonderfully the essential elements are combined; its marvelous penetrating power enables it to seek out the painful spot in the sensitive nervous system, as well as the face and brain nerves. It cures neuralgia gently and surely, and after the application, if the nose of the bottle is held to patients' nostrils for, say, ten minutes, they will fall off into a restful, peaceful sleep. There is no other remedy in the world that will do so much, and do it so quietly and effectively as St. Jacobs Oil. Every family should have a bottle handy by them in the house. It acts like magic, it always conquers pain. Bridge Burned With Electricity. A novel method of destroying a wooden bridge has recently been tried with complete success. Weighted wires are placed across certain beams and heated by means of electricity the wires burn their way through the wood, aided by the weights, and the bridge falls.

A Chain is no Stronger than its Weakest Link and a Wire Fence is no Stronger than its Uprights. No one should expect a fence to hold up of itself between the posts. The Frost Upright wires are large and strong. The Frost Lock holds them in place and each support gives its own share of the weight. Light tie wires give no support. Bending to tie weakens them and they are apt to break when the strain is severe. Frost Fence never breaks. Write for Catalogue. FROST WIRE FENCE CO. LIMITED, Welland, Ont., Winnipeg, Man.

ONE AT A TIME

It is stated that certain residents of Elizabethtown are moving to secure the abolition of the toll gate nearest to Brookville, and will seek to obtain assistance from the Ontario "Act to facilitate the purchase of toll roads by municipalities." There may be a pointer in this for the people who are anxious that our nearest toll-gate should be put out of business. One at a time is pretty good fishing, and if the head and tail of this incubus can be cut off the remainder can be disposed of with little difficulty.

DEATH OF MARGARET L.

Detroit, March 14.—It has been learned that the notorious Margaret L. Shepherd, alleged ex-convict and anti-Roman Catholic lecturer, died in Detroit, at Harper Hospital, March 8, after an illness of four weeks. The woman was suffering from cancer and died a few minutes after being taken from the operating table at the hospital. She had recently returned from Australia, after having spent three years on the lecture platform. She had no relatives in this city, but Mr. and Mrs. Leonard were her friends and she came to visit.

BANISH YOUR RHEUMATISM

W. A. Andrews Banished His When He Was So Bad That He Had Lost Twenty-five Pounds and Was a Complete Wreck.

Hobbling Around on Two Canes He Commenced to Take Powley's Liquefied Ozone, Which Instantly Destroyed the Disease Germs.

In Two Days His Appetite Returned, His Sleep Was Natural and Restful, His Pains and Aches Vanished and He Threw Away His Canes.

"Last August I was attacked with severe muscular rheumatism. So bad was this attack that I called in my doctor, who had to administer injections to allay the pain, after which he put me through the sweating system. He attended me well and faithfully for five weeks. When I got up I was compelled to use two canes to get around the house. During all this time I lost about twenty-five pounds in weight; in fact I was a complete wreck. My appetite and sleep left me. I tried a number of good tonics to brace me up and give me an appetite, but none of them helped me. About this time my daughter commenced taking Ozone for a chronic sore throat and quinsy, from which she had suffered for years. In a short time she was completely cured of this troublesome disease. So effective was the preparation in her case that I commenced taking it myself, and in two days' time my appetite returned and my sleep became as good as ever. All the pains and aches had vanished by the time I had aried on the second bottle, and I threw away my canes. Ozone toned up my system and I became a new man. I gained rapidly in flesh, as all my friends can testify. I look well and enjoy as good health now as ever I did in my life."

W. A. ANDREWS.

Ozone Acts Rapidly and Thoroughly.

It is conceded by medical men that the cause of nine-tenths of the disease from which people suffer is disease germs. Powley's Liquefied Ozone acts rapidly because it immediately attacks this cause. It acts thoroughly, because it eradicates every trace of it.

In a nutshell, Powley's Liquefied Ozone cures disease by destroying the disease germs that cause it. It is especially beneficial in cases of rheumatism and will give relief and effect a permanent cure in the very worst cases.

Powley's Liquefied Ozone is sold only by reliable dealers—never by fakirs or peddlers. Price 50 cents and \$1.00 per bottle. Our book on Rheumatism free on receipt of name and address.

STEVENS—BROWN

On Wednesday last, Rev. W. E. Reynolds united in marriage Miss Addie Brown, of Athens, and Mr. Marill Stevens of Doytown. The ceremony took place at the home of the bride's mother, Mrs. Case Brown, Elgin street, but owing to her illness the wedding was attended by only a small number of guests.

The bride and groom have gone down east on an extended wedding tour.

Mr. Stevens is a prosperous young farmer, son of Mr. and Mrs. Philip Stevens, and the bride is well and favorably known in Athens. The Reporter joins with their many friends in offering congratulations and best wishes.

GHOULS AT LANSDOWNE

On Thursday night last two men were discovered in the act of robbing the grave of Margaret Smith at Union Cemetery, Lansdowne. One made good his escape, but the other, who gave his name as J. Hutton, and who claimed to be a law student at Queen's College, Kingston, was scoured. He was taken to Brockville where he was admitted to bail in \$2,000, and his trial was fixed for 27th inst.

The Kingston Whig contains the following report:—"Thursday evening a telephone message was received at Lansdowne from an unknown person in Kingston, warning the friends of the late Maggie Smith, who died a week ago, and whose remains were interred in Union cemetery, that an attempt to steal the body would be made that night. Ross Smith and a couple of neighbors hastened to the cemetery. A team attached to a light buggy was found in the church shed. An examination of the grave showed that the lid of the rough box had been nearly sawn through and the tools were left behind, showing that the would-be robbers had evidently left in a hurry.

"Mr. Smith and friends went back to the shed and saw two men, one in his shirt sleeves and covered with dirt and mud. When accosted this one managed to escape, but the other one was detained. The constables were notified and went out and took him in charge. He is a young, well-built, well-dressed man, and gives his name as Hutton. He claims to be a law student and only came for the drive. A plan of the cemetery with the road leading from Lansdowne to it was found, and also a record of death of Mrs. Francis Johnston, whose body is in the vault. There were also given the names of two who were recently interred at Toledo, Kitley township.

"It is rumored that the name of a prominent family in Lansdowne also appeared on the chart. The preliminary examination took place before magistrates Mulvaugh and Cross.

"The evidence showed that the chart of the cemetery was found in the other man's coat, which was in the buggy, also a receipt for \$95 paid by Mr. A. Sandwith. A pass book had dates of the death of Mrs. Johnston and another at Toledo. A satchel initialed D. A. S., containing an old coat and pants, also a hat, was found."

The students at Queen's have discovered that a fellow-student named Garvin, from Lansdowne, gave the information that resulted in Hutton's capture, and he will be forced to leave the college. Garvin and another student were driving after this body when they were passed on the road by Hutton and two others. Knowing that they were after the same body, and would get there first, Garvin, in a fit of anger, sent the warning message.
