UNIQUE EVENT IN BROCKVILLE

Merchants and Newspaper Inaugurate Big Shopping Day-Fourth of July

Most towns now have an annual "Merchants' Day," or "Shopping Week," or something of that character; a special event in the shopping line, when the merchants combine to presents extraordinary sales offerings to out-of-town customers on a special day, or series of days. Excursions are run and other extra efforts put torth to get people to come to the town on that occasion to do shopping in what used to be recognized as an inevitably dull season. Brockville has not yet reached the "Merchants' Day" stage but is getting there, and a good start bas been made this season. Several wide-awake Brockville merchants have been planning for weeks past to make the usually quiet month of uly look like a Christmas rush.

Goods at unusual prices have been ecured, and big advertisements prepared, to be distributed all over the county. A new feature is that the sale bills of several firms will be distributed on the syndicate plan, all the bills being folded together and the sales to start on the same day-July 4th-this making varied and strong

A monster excursion is going over the B. & W. Railway, and it is expected to inaugurate the unique shopp ig event with a memorable rush. Among the firms who have pro

moted and are participating in this trade stimulator are the Robt. Wright Company, R. Craig & Co., the C. W. Linsday Co., and The Brockville Times.

in Athens this week. The date fixed for the annual camp-meeting awaits confirmation by Bishop Horner,

LESSON I.-JULY 6, 1913.

The Child Moses Saved From Death Exod. 1:8-14, 22-2:10.

Commentary .- I. The Israelities oppressed (1:8-14, 22). 8-12. A change took place in the government of Egypt that was destined to affect most vitally the children of Israel. The record doe not state what change was made, but it is evident that the new ruler was not favorable toward the Hebrews. The great work that Joseph did ceased to be gratefully recognized, and since the Israelites had increased greatly in numbers, there appeared to be danger of their joining with Egypt's enemies in time of war to bring disaster upon the nation. A policy was adopted which the Egyptians thought would keep the foreign race in subjection. This policy was to enslave the Hebrews, putting them at hard work, thus bringing advantage to Egypt and at the same time tending to retard their rapid increase. The king employed their labor in public works. It is stated that the "treasure-cities, Pithom and Raamses," were built for him. The site of Pithom has been found, and a strong confirmation of the Bible account is furnished by the walls. The brick used in the lower parts of the walls are well made and contain chopped straw mixed with the mud. Higher up the straw is scanty and not suitable for the purpose; while at the top the bricks are made without straw, rushes and water plants because the straw of the straw used to take its place (see Exod. 5:6-18). In spite of this cruelty, the Is-raelites thrived and increased, and severer measures were employed to check their increase; but even these efforts were unsuccessful. The Lord was fulfilling the promise made to Abraham, Isaac and Jacob, to make of Israel a great na-tion, in spite of all the efforts of Phar-

aoh to prevent their growth.

22. Pharoah.—The title given to the sovereign of Egypt. It is generally believed that Rameses II. was in power at this time. He is spoken of by scholars as the most enterprising builder of all the Pharoahs. He directed the construction of cities, walls, temples, monoliths, dikes and canals, and in this labor tens of thousands of lives were sacrificed Charged all his people—Pharaoh had called to his aid a certain class (v. 15). in his effort to check the growth of Is rael, and now he endeavors to enlist all his subjects in the task by putting to death the male children of the enslaved "The command was so inhuman and so contrary to the interests of the Bayptians themselves, that it is not likely that it was ever enforced for any length of time; but it gave legal oppor-tunity to any who desired to destroy children of Hebrew families who seemed for any reason specially danger-ous. Hence the fears of the mother of Mosen."-Whedon. Into the river-The Nile. Every daughter ye shall save alive-If the sons were slain Pharaoh's purpose would be accomplished. The daughters of the valuable as slaves. This cruelty at once suggests the crime of Herod in decreesuggests the crime of Herod in decreeing tae death of the male children during Christ's infancy. Both Pharaoh and
Herol feared for the safety of their
respective governments. Herod was
alarmed at the suggestion that a new
king would displace him as ruler of the dews and was willing to sacrifice any number of infant males to forestall such a condition. Pharaoh also feared for the stability of his kingdom, and was early to suffer the loss of thousands of Hebrew children that his kingdom might be secure. In both instances the schemes of wicked men were de-

was, by the decree, sentenced to be drowned. A goodly child—He was goodly God that he would be preserved (Heb. "She used all means, yet trust had full trust, yet used all benevolen 3. Could not longer hide bim Through

And thus at once ex-the pity of the princess. One of febrews' children. She knew from the Hebrews' children the child's complexion, and from the effort that had been made to keep it alive that it belonged to the oppressed race. 7. Then said his sister—She was ready to take advantage of the situa-tion. The princess "had compassion" (v. 6), and seemed disposed to ignoce the cruel decree of her father. A nurse of the Hebrew women Miriam desired to the Hebrew women Miriam desired to be helpful both to the princess and her own family. An Egyptish woman would not undertake this service for a Hebrew

child, and Miriam knew of a Hebro woman who could be secured. S. Called the child's mother—The mother's desires the child's mother—The mother's desires were being met most satisfactority, and God's purpose was being fulfilled. Man's wrath was being made to praise God (Psa. 76:10). 9. Take this child away, and nurse it for me—By thus taking the child, the mother became from this time. in some sense, the recognized servant of the princess; for otherwise how would she enjoy more safety with her babe than before?—Alford. Thy wages—Jochebed was to receive pay for the service that she would gladly, were it rossible have paid for the privilege of

service that she would gladly, were it possible, have paid for the privilege of doing, because of her love for her child.

10. The child grew—Nothing further is said of Moses' childhood and youth, it is supposed that his mother had the care, and training of her boy until he was seven years old, at least. His after life showed how carefully he had been showed how carefully he had been taught. He became her son-Pharaoh's laughter formally adopted Moses. She called his name Moses—The language in-dicates that his name was changed at this time, but it is not known what he was called before. His name means "drawn out," from his having been tak-

en from the water. Questions.—What caused a change the condition of the Hebrews in Egypt? What fear had the Egyptians? What tasks were upon the Hebrews? What wicked decree 1id Pharaen make? Who were Amram and Joehebed? What child-ren of theirs are mentioned in the les-son? Why did Joehebed hide her child? Describe what was done with the baby when he was three months old. Describe the finding of the ark! How did the child's sister help the princess? What is said in the Bible about Jochebed's faith? What privilege was given to her? How did Moses get his name?

PRACTICAL SURVEY.

Topic.-God's instrumentalities, I. To wean Israel from Egypt. II. Against the forces of evil.

I. To wean Israel from Egypt. Israel was becoming idolatrous. Egypt was dis tinguished as the abode of a peculiarly eesy and luxurious life. It was necessary some means to awaken a desire for Israel for their promised land of Canaan, since their habitation had become a snare to them. The covenant with Abraham had included the prediction of four hundred years of oppression in a strange hand. The death of Joseph and a new ruler in Egypt brought changes to Israel. The new hynasty wished to pursue course of action inconsistent with the purity, integrity and candor which Joseph had counseled. The new Pharaoh was out of sympathy with the conduct of his predecessers. Through fear and jeal ousy he designed to prevent the numerical increase of Israel, to enfeeble their military power and retain them in per-manent bondage. He feared to let them become more powerful, and he was reluctant to let them go. His policy required that the happiness of a whole nation should be utterly sacrificed; first, by oppression, then by slavery, and then by marder. Pharaoh alleged no crime against Israel. He was not actuated by hatred. He was suspicious of what might befall his country in future exigencies. His extreme measures were reached when destruction was made the fierce remedy to beat back the manhood of the dreaded nation. Pharaoh reason of the dreaded nation. Financia reason-ed without taking God into his plans. It was no crdit to Pharaoh that God over-ruled his oppression of Israel to their advantage, and made him his instrument in weaning Israel from the Egypt ion world. Their severe treatment became to them a salutary discipline to separate them from Egypt.

II. Against the forces of evil. Jochebed was too wise for Egypt's monarch.

Stronger than kings was the power of faith, the force of patriotism, the instincts of humanity and the art of evasion. Maternal love was quick and spontaneous in action. It was bold to override the strict command of such a 11. The child Moses hidden (2: 1-4). 1. monarch as Pharaoh. It was the beau-A man of the house of Levi—His name was Amram. Levi was one of the sons of Jacob. The descendants of Levi were later constituted the priestly class of to the River Nile, but not in Pharocob's experiments of Jacob. Israel. A daughter of Levi—A descendant of Levi. Her name was Jochebed. 2. Bare a son—Miriam and Aaron, elder children of Auram and Jochebed, were probably born before the cruel cdict of scene of trial, because her supreme hope Plarach was declared. This new son was in God. In connection with a other's love and heroism is presented was, by the decree, sentenced to be mother's love and herosm is presented the beautiful ministry of a youthful life to to only in his mother's eyes, but also in Miriam. She risked her life to save before the Lord (Acts 7: 20, margin). Hed him three months—The mother's the sympathy of the princess into the sympathy of the sympath leve and her sense of right prompted right channel and moulded it into action. make an effort to save the child's Thus maternal solicitude, filial obedience. More than that, she had faith in infant beauty and helplessness prepared infant beauty and helplessness prepared the way for the gracious pity, the prompt wisdom, the tenderness, compassion and de she had full trust, yet used all benevolence of Pharaolis daugiter.

MURDER AND SUICIDE.

Spokane, Wash., June 30. - Frank Fromm, champion revolver shot curited States in 1909, and his wife and dead in a tent back of their home found deau not be to here yesterday. From a none in here yesterday, bandwriting the authority woman's bandwriting the her husdead woman's handwriting the authorities believe Mrs. Fromm shot her husband through jealousy, and then committed suicide.

In the note two young women of this ity are named as the couse of the tragedy.

Even the most experienced feminire shopper cna't always buy her experience to match.

TRAINING THE COLT.

The man who undertakes to break or train a colt must be of a gentle, kind, He must avoid persevering nature. He must avoid fright and harshness. It must be remembered that the horse, like all dumb animals, does not understand languages.
All are alike to him. Some action must be associated with the command. For example, on coming to the animal while yet in the stall we want to teach him to step aside, so we may be able to get up to his head, we say "Step over," and at the same time lay our hand on his its hip on the side from where it is to move, and increase the weight of the hand to a push, until the colt steps over. Continuous treatment in this way will teach it to understand the meaning of

"step over," and obey the word alone.
We must be persoveringly exact in giving our commands. Firm, but never larsh.

Some drivers have a habit of continucusly clucking at their teams to induce them to go faster, and sometimes when a faster gait is not desired. The horses become accustomed to this clucking as readily as they do to the rumbling of the wagon, and pay not attention either.

The colt is taught the meaning of the word "whoa" by at the same time receiving a gentle pull back. He learns the meaning of the word "back" by hav-

ing a harder pull made on the reins.

Man can overrule the mental power of the animal, but it is not always an easy matter to overpower his physical strength.

Training should begin early in life. Our teaching can be given to the colt of even a few days old. But in these carly lessons we must be careful not to overtax the pupils either physically or mentally. Many colts grow prematurely old by being made to do heavy work be-fore they are of proper ago.

When breaking the colts the trainer

should have perfect control over his temper. One little display of ill-temper may spoil the labor of weeks and months, and possibly cause irreparable damage in the future development of the animal.

Always speak to the stock in a plain, natural tone; be distinct in expressions but never yell or scream at the animals This not only frightens them, but makes

them nervous. Say plainly, gently and yet firmly what is wanted, and in the fewest words possible.
Go elow. Do not hurry the colt's edueation. Teach one thing at a time.

Natures of animals will differ. Som will suffer any amount of abuse, while others are apt to resume harsh treat-

ment of any kind. Study their peculiar ities. Never strike a colt. In fact, it is bad horsemanship to apply the whip to a horse of any age.

A horse should not be punished for showing his natural traits. He does not

wilfully displease us. If he becomes afraid, or does not want to be caught afraid, or does not want to be caught and runs in the opposite direction, mat-ters will be made worse by ill-treating him. On the other hand, the bad notion may be improved by the offer of an apple or a handful of oats after being

Professor Jesse Beery says no horse has ever yet indicated any ability to We may define reasoning as an ability to proceed from a cause to

The horse ir. a state of nature remains generation after generation in the same nental condition. Never until he comes mental condition. Never until ne concest in contact with man and receives train-ing from him is there my progress in his mental equipment. Every indication points to the fact that, whatever proress he makes, comes from without, not of reasoning within mind in training a colt that it will not gain in knowledge unless its training is continued. It stops just where you leave it, except for the accidental impress. made that attach some minor

habit. The point is fundamental in training horses. When a man realizes that he is training muscles to certain actions, and that through these muscles the brain is en and then only is he fit to develop a horse.

FARM NOTES.

One part of oats and two parts of wheat, ground together and mixed into a slop twice a day for the bogs, make a good ration. If skim-milk is used for the mixing, so much the better. The economy of this plan lies in the fact that it cheapens the feed, while furnishing a balanced ration, which is a prime factor in the fattening-pen.

For breeding purposes avoid hogs with long legs and snouts, shallow bodies, tarmassive appearance. A very fit hog is a bad risk, for there is danger of his breeding facilities being impaired.

By a new classification for dairy cows,

proposed by a dairy teasure in the island ured by comparing the weight of the cow with her annual milk yield. A cow giving five times her own weight is called poor and one less than that worse than worthless. If six times, she is medium; eight times, good; ten times, excellent. According to Professor C. H. Eckles, one of the best-known authorities on dairying in the United States, the best way to dry up a cow when you are ready to allow her her resting period is to stop milking all at once. Some believe it necessary to milk once a day

strip partly out each day for some time. This is not necessary, says the professor. We have seen cows dried off many times by this method, and have yet to see any armful results from it.

Overfeeding and lack of exercise may cause pigs to have fits. In such cases stop all other feed and give slop of milk, stop all other reed and give slop of milk, middlings and limewater, the latter at the rate of one ounce to the quart. Feed roots and alfalfa hage. Make the pigatake abundant exercise every day in a large shed if they cannot run out of

for a while; some think it necessary to

The character of the soil is one of the main factors which determines the quality of the crop. The soil is more than a storehouse of plant food. It is the abode of the plant. If the plant is starved or the root system is restricted

in growth, a dwarfed crop results. If the crop has as competitors strong, vig-orous growing and feeding weeds it does not get its share of food and fails to reach normal development, and if the soil is undrained, or "sick" or "unsani-tary," the crop is nunv.

tary," the crop is puny.

Plums need a light, open soil and subsoil. It is rather difficult to classify them, owing to useir belonging to dif-ferent species, with different require-ments. Cherries are quite adaptable in the matter of subsoil, but all the districts in which cherries are markedly successful have light, open subsoil. Grapes stand in a class by themselves. our native grapes grow largely by streams and in poorly-drained, damp places, while practically all our cultivated grapes demand open soil.

At the Kentucky experiment station the results of a test of rates of seeding and methods of planting are regarded as indicating that in a very favorable seeding that in a very favorable seeding.

indicating that in a very favorable sea-son three stalks per hill will give a higher yield than two stalks, and that drilled corn yields better than corn planted in hills, when the rates of seed-ing are equa. When the corn was drilled, however, planting twelve inches apart, equivalent to four stalks per bill, gave a still higher yield in 1910.

THE POULTRY WORLD

GET RID OF THE MALES.

It is remarkable how few farmers appreciate the importance of infertility in market eggs. To make provision for the infertility of an egg does not necessarily guarantee the absolute preservation of its good quality; but such an egg, being free of the active germ cell, will not, under ordinary storage conditions, deteriorate seriously. The great bulk of eggs which are spoiled for purposes of consumption are the fertile eggs, which, having been subjected to heat above seventy degrees, undergo partial incubation. If the heat is continuous and strong enough, the develop-ment of the chick will continue; but if it ceases or is intermittent, putrefaction at once sets in and the eggs become bad. Such eggs are known to the trade as "blood rings," "floats," "heavy floats" or "rots," depending upon the degree of deterioration they have undergone. Few farmers have any know ledge of these facts, and consequently practically none have made any effort to ensure infertility. They seem to have the erroneous impression that the pres-ence of the male bird is essential to the production of a maximum number of errors, but it has been proved beyond all question of doubt that such an arrangement is not necessary, and for the reasons set forth, is highly undesirable.—Hare, J. H., and Benson, T. A., bulletin 208, Ontario Department of Agriculture.

POINTS FOR EGG BUYERS.

1. Buy on a "loss-off" basis and en-ourage other merchants to do the 2. Go further. Pay a premium for

quality and do not hesitate to condemn bad, dirty, small and broken eggs.

3. Insist upon the farmers furnishing frist quaity eggs only.

4. Keep in mind the perishable nature of the product, and do not hold eggs.

5. Keep eggs in a cool place. Never expose them to heat from any source. The sun and the stove often act as mammoth incubators.

6. When shipping, pack carefully in strong, clean cases and fillers.
7. Never keep eggs near kerosene. onions, fish or any other strong smellng substance; they readily odors.

8. When packing, carefully place a

uniform bedding of excelsior or cushion material in the bottom and top 9. If buying direct from the farmer, of the case. Encouage the farmer to keep bet

ter poultry and more of it. PRODUCTION AND CARE OF MAR. KET EGGS.

10.

1. Feed the hens on clean, wholesome foode and provide an abundance of pure water in clean utensils.

2. Keep the poultry house clean, saniitary and free from vermin. Provide plenty of clean, dry nests n darkened places.

4. Gather eggs at least once a day in ool weather and twice in hot or wet weather.

Keep eggs in a cool, dry place. Cover eggs with a cloth to prevent fading.

7. Never keep eggs near kerosene,

onions, fish or any other strong smelling substance; they readily absorb od-8. Do not sell eggs known to be bad

or which have been in an incubator. It a dishonest. Do not wash eggs.
Use, the dirty, small, very long 9. nd grass-stained eggs at home. Never expese eggs for market to

direct sunfight, rain or extreme heat 12. Remember that eggs are perish-13. Market eggs are regularly and fre-

quently as possible Secure suitable crates for home ise and thus prevent breakage and slight cracking 15. Kill off, dispose of, or get rid of

the male birds after the breeding sea-son. Their presence in the flock after June 15th is costing Canadian farmers a million dollars each year through the sale of partially incubated eggs.—W. A. Brown, Bulletin 16, Live Stock Branch, Department of Agriculture.

POULTRY NOTES.

The beginner should always start with either hatching eggs, day-old chicks cr stock in limited numbers—but always eggs, chicks or stock. Too many fail by trying to obtain a cheap start. Be by trying to obtain a cheap start. Be willing to pay a fair price for the breeders' experience in breeding fowls that are producers.

The batching and rearing season is on

chicks to one hen, or crowd the broods with from 60 to 75 chicks, when 50 is all it can hold. Better raise a few good

chicks than many poor ones.

The beginner should (in spite of the fact that in many sections custom hatching has taken a strong hold) purchase an incubator and hatch at least one ma chine full in a season to learn the art of incubation. While the high-grads incubators of to-day are dependable hatchers when all conditions are right, yet better hatches can be made when the poultry raiser understands his own conditions and the machine.

When breeding pens are confined in yards the birds often are put on short rations of green feed. Green feed is as important as any other part of the daily ration. Any kind of vegetables may be used as green feed if grass is not to be had. Chop potatoes, turnips, beets, cabbages and such things until they are fine enough for the bens to swallow. In the absence of other vege tagles use cut clover or alfalfa.

It is the little things that make for success in the country business. Every day care is what counts. One canno a good poultryman and neglect his birds for a single day. Keeping poultry is not hard work, but the poultryman must do his work Sundays and holidays as well as other days if he would

Keep the chicks growing. The old advice to feed little and often is good if strictly followed, but it is better to keep food before them all the time than to allow the little fellows to become hungry. When a chick stops growing for a single day it often gets a setback which is never made up.
Old geese are better breeders than

young ones. A goose will continue to breed for many years. Never put in the breeding pen a hen which he held

which has had a severe case such a hen never fully recovers from the effects of the disease.

A single false color feather does not hurt a bird, but it is the tendency to breed off color, feathers that should condemn it. For this reason selling a fowl which needs plucking before delivery i not quite fair

Have you a wheelbarrow to use about the poultry yard? If not you do not know how many times one can be pu to good use.
Many an incubator has been condem

ned because the egg put into it were too

When sending poultry to market alive or dead appearance counts first, as this is what attracts favorable or unfavorable attention. Remove from the breeding pen any

nens that are over fat, else you will have plenty of infertile eggs.

Owing to the changeable weather fowls

are apt to contract roup. Roup if neg-lected will prove disastrous. We read with interest the splendid egg results received from back yard poul-try. There is no doubt that if the large poultry farmer would copy the methods of the back yarder in many cases the re-sults would be much better. This care and attention devoted to back yard hens must be applied to fowls on free ranges. "Keep for layers the hens which moult latest.' This is one of the cases where a careful, practical experiment has ex-ploded an ancient and venerated theory Still, there are those who pose as good authorities who say the experiment stations are of no value to poultry breeders Get your eye on those show birds and watch them from now until time to begin conditioning them for the show pen. Fine road dust is the best insecticide

Superior to Germany's Says an Official.

St. Petersburg, June 30 .- The development of the aerial armanent of Russia is making immense progress, according to the chief of the army staff, who today, during a debate in the Douma, related some interesting details of what had been done in this direction. He said the Russian Ministry of War would not est until a-flying squad had been established in every army corps. The Government, he continued, had doubled the number of dirigibles recently. It had acquired airships, known as rerial dreadnoughts, which were provided with mahine guas, bomb throwers and wireless It was true, he concluded, telegraphy. that the German army possessed eleven lirigibles, but only eight of those came army dirigibles.

DENMARK'S PLANS

New Cabinet Wants Equal Universal Suffrage.

Copenhagen, June 30 .- At an extraordinary session of the Rigsdag to-day the Premier, M. Zahle, said that a new Cabinet had been formed in order to secure such amendments to the Constitution as would make effective the popular lemand shown in the recent elections. He added that elections from both chambers would be held on an equal universal suffrage basis, and that Parliament would open a month earlier than usual so that he meas ares could be carried through the com ing session. Erik de Scavenius has been ap-

pointed Kinister of Foreign Affairs. Since the formation of the Cabinet Edward Braudes, Minister of Finance, has provisionally held the portfolio of Foreign Affairs.

He greeted her eagerly, anxious be me greeted her eagerly, anxious beyond words to hear how Bab was, and believing that she had come with some message from her. His first words caused India's heart to beat fiercely. "Tell me, how is little Bab?" he cried. "I—I—have not been able to sleep or rest, worrying over her."
"She is getting along splendidly and

rest, worrying over her."
"She is getting along splendidly and recovering from the effects of her terrible fright," she murmured; "and, oh!" she added, her voice sinking into a whistper, "I want to tell you how she, and, in fact, we all, thank you from the bottom of our hearts for your rescue of our darling."

of our darling."

He tried to speak, but his voice was too husky; but at length he answered:
"I would have risked a hundred lives as many more to have her sweet young life."

"There is one thing which Barbara bids me say to you," said India, raising her dark, wondrously beautiful, false eyes to his face, "and that is that you will refrain from ever mentioning one word connected with that terrible scene to her, or, in fact, to any one, for the reason that she could not endure to be reminded of it, as it would make her live over again all that she suffered in that terrible moment. We are all bound to the same promise, never to mention one word concerning it in her presence, and indeed, if she should forget her resolve herself, so quickly change the sub-

"She has only to command me," said Clarence Neville, with a low bow. rest assured I shall never refer to in the matter.'

"It must seem strange to you that she should delegate me to thank you for saving her life, instead of speaking of it herself to you; but you know Bab is a strange girl and takes odd caprices, and this is perhaps the oddest of them." "It is certainly not to be wondered at in this instance," returned Neville; "and rest assured the subject shall nev-

er be broached to her by me." "You are so good," murmured India:
"so thoughtful, so considerate, and I thank you for Bab. She will appreciate it so much. She does not know that you were injured ever so slightly," she

you were injured ever so slightly." she added, sighing deeply, as she looked down at the injured foot.
"Then pray do not mention it, I beg of you." he rejoined.
"I shall respect your wishes." she said: "but let me extend my sympathy, and tell you in my own poor way how."

said: "but let me extend my sympathy, and tell you in my own poor way how deeply sorry I am for you."
"It is nothing, Miss India," he returned, smiling at her earnestness: "only a slight twinge in my ankle which presents welking about for a day or two. Please believe that I shall call at Haven Haves upon Miss Bah and yourself outton. House upon Miss Bab and yourself quite as soon as I am able to walk that far." hope that he would certainly do so. India took her leave.

He looked after the lithe, graceful

form with a thoughtful expression on "What a tender-hearted, sympathetic oung girl she is!" he mused, adding to

"If I had not seen Barbara. almost believe I should have taken a fancy to her.' Meanwhile India turned her steps in

the direction of the depot, and, as chance would have it, the first person whom she saw on the train, taking a hasty run to the city, was the very one of whom she was thinking—Rupert Downing.

"I am so glad to find you here." she said, eagerly, taking a seat by his side,
"And I am surprised to find you here," rejoined here, wondering curiouswhat in the world took her down to Boston, but it was not long ere she informed him.

nave a plan." she added. "You shall go with me to the hotel to see Mr. Haven, and tell him the story, which Bab vill corroborate, of how you saved her life. That will establish you in his ta-vor instantly—av, and in his heart, and when you come to ask for Bab's hand in marriage he would find it hard to re-fuse you. I have sealed Clarence Nev-ille's lips on that subject for all time to come." and in a few words she related the conversation which had taken place so lately between them, and the promise she had exacted from him, representit as Bab's arnest wish.

"By Jove! you're a trump, India!"
cried Rupert Downing. "It takes a
clever woman like you to bring any

scheme to a finish." They talked long and earnestly, and by the time they reached Boston they had perfected their plans for the scheme in which poor little Bab was to be traped without loss of time into an in The bargain was that diate marriage. The bargain was that in the hour in which it was consummat-

pram she found Mr. Haven in quite the condition that the old housekeeper had described. He had had a severe case of indirection—indeed, so severe as to couse him serious apprehension, as his thoughts into another channel, but his thoughts into another

physician had warned him that he would go that way, sooner of later.

The was improving very favorably when India put in an appearance.

"Oh, uncle, you frightened us!" she cried, gliding forward and flinging her cried, gliding forward and flinging her arms about his neck careasingly.

The crave, for he could do muce for him craved, for he could do muce for him her way. Mr. Haven was a power in his locality—ay, and in his State. His present visit to Boston was on some political business.

Rupert Downing's answer almost took his breath away.

arms about his neek caressingly. his breath away.

"I was quite sorry for sending the "The soon I crave at your hands is telegram as soon as it was fairly gone, your daughter Barbara, sir. It was a

"I would go with you," said Barbara, he declared. "I hope my little Bab does not know."
"No," murmured India; "we thought

it best to take your advice, and not tell her, especially in her condition." Mr. Haven leaped excitedly to his feet,

for the moment forgetting his indisposi

"Bab's condition!" he repeated, breath lessly, turning very white. "What can you mean Surely nothing has happened to my little girl, whom I left so well happy but a little while since- Is ill? Speak quickly my dear child. I-I-cannot bear suspense in my nerv ous state. I—I—see by your face, India that something has occurred. What is

Oh, uncle, how can I ever forgive my self for that blundering slip of the tongue! I had intended to carefully keep it from you for the present; now that you know that something has happened, I must end your keen suspense by telling you all about it. Let me preface my story, however, by saying in advance that our darling Bab is well entirely well and happy-but for a trifl

ing nervousness."

The father heaved a deep sigh of re lief as he sank back into his seat again. He could stand anything, now that he was thus assured that Bab, his treasure, was well and happy. It could not be anything of a very serious nature which

had happened.

He leaned back upon the cushioned seat and nodded for India to proceed, which she did, telling him the whole story of Bab's narrow escape from a fearful death under the ponderous wheels of the eastern-bound express, substituting Rupert Downing's name for

Clarence Neville's as her rescuer. Mr. Haven's emotion as he listened was pitiful to beold.

May heaven bless the noble young May heaven bless the hobbe young hero for that brave act!" he cried, burying his face in his shaking hands.

His lips moved, but India did not know that he was asking heaven to pardon him in judging Rupert Downing so wrongfully, so unjustly, and wonder-ing how he could ever atone for it. India was watching him narrowly from under her long lashes, endeavoring to read his thoughts, at which she made a

ather shrewd, accurate guess.

After a moment's pause, she continled: "Mr. Downing came down on the same train with me, and is stopping at this hotel.

The effect of this announcement upon Mr. Haven was wonderful.
"Mr. Downing, the rescuer of my child,

here in this hotel!" he exclaimed, excit-"Touch that bell for me, India. I

must see him at once.
"I think you have little need to send
for him," murmured India, "for when
he heard how ill you were and that you were stopping here, he signified his intention of calling upon you if you were able to receive him, quite as soon as he had concluded the business which brought him to Boston, which ne expects to do in the course of an hour or so." She had scarcely ceased speaking ere

Mr. Downing was announced.
"I will see him at once," said Mr. Haven. "Show him up to my room." The meeting between the false, spurious hero and Bab's father was a scene

which India never forgot. Mr. Haven was overcome with emotion, and as he grasped the young man's hand he broke down completely, and cried as strong men seldom cry in a lifetime. It reminded India of a strong Barbara's father most gracefully, muroak which she had once beheld nearly bowed to the earth by a terrific gale delight: which threatened to wrench it asunder.

the face of his companion, have been shocked to behold a sneering smile flicker for a moment at the corner of Rupert Down's mouth as his eye met India's for an instant.

"How can I ever thank you, by word or deed, for what you have done for me and mine!" cried Mr. Haven, brokenly. "Expressions fail me. I can only say thank you from the bottom of my heart -ay, from the depths of my very soul! If my right arm were the price of ing you my intense gratitude, how cheerfully I would give it!"

"Pray do not think of it, Mr. Haven," oried the other with well-assumed mod esty. "Believe me, I would have leaped into a burning caldron of melted lava for Miss Barbara's sweet sake. only glad that I was nigh to be of ser-

"Thank you, thank you," murmured Mr. Haven, a great lump rising in his throat. "I do not know what else to say to you than this: Ask any favo in the world from me that I have the power of granting, all through your life, and believe me, it will be granted." "The occasion is now ripe," murmured India,' in so low a voice that only Rupert Downing's sharp ears caught the "I would advise you to strike

while the iron is hot."

Again Rupert Downing acted on the shrewd French girl's counsel. "Do you really mean that, sir?" he sked, maxing fixedly into the cother asked.

man's face. indeed," replied Mr. Haven quite carried away by the excitement of the moment. "I will prove the sincerity of my words to you at any time or in any way in which you may clect. "You have it in your power to make me the happiest man on earth, sir," murmured Rupert Downing. "I scarcely

case of love at first sight with both of us, sir. I had not intended letting of us, sir. I had not intended letting her know of my feelings toward her for long years yet, and then only after having a long, earnest talk with you on the subject; but, alas! for the best laid plans ever made by man! I was surprised into breataing out to her my great love for her in the moment I saved her life. And, oh, sir, how can I picture to you my wild delight to find that the lovely girl whom I had faced a horible death to save loved me in refurn? rible death to save loved me in refurn? You will forgive me for letting her know of it without gaining your approval first; but the circumstance which brought that confession about was no ordinary one. There are few men who could have restrained themselves from

uttering the words that would come to their lips in a crisis of that kind." "You are right," replied Mr. Haven huskily. "With a man's intuition, I can well understand how you were sur-well understand how you were surof your feelings; but what staggers me beyond all words is the intelligence you bring me that my Barbara, who is scarcely more than a child, loves you. wery thought bewilders me—seems to fairly benumb my brain," and as Mr. Haven uttered the words he staggered back, covering his face with his trem-

bling hands.
"You have no answer for me, sir," "Forgive me if my agitation conquered

me for the moment," he responded, add-ing slowly: "If it is indeed true that my darling loves you and you love her, when she is old enough she may marry you. You may win and cherish the heart you have saved if it is God's will. Rupert Downing started violently. He

did not relish the latter clause, for he had had little enough to do with the divine power during his eventful ,unenviable career, and he knew that he was entitled to little money or favor from that source. But he smiled and thanked muring with a two-faced exression of

"You have made my happiness for all Mr. Haven was too agitated to notice time to come, as well as your darling

> Mr. Haven tried to force a happy laugh to his lipe, and as he did so, he thought of the lines: You think that laughter must betoken mirth?

And yet I laughed to-day,
When the greatest pain in all the earth Held my poor heart a prey.

'My laugh was feigned! And yet it rang out true.
And he that heard the sound Could see no cause to doubt the laughter who

No cause for doubt had found. I felt my grief was blazoned on my

face—
I could not hide it there. Though men may laugh, yet grief will The telltale lines of care,

'Ah! let me but this truth impart From one of human race; There's naught as false as the huma

heart. Except the human face."

If it had been young Clarence Neville, the son of his honored old friend, how different he would have felt about giving his consent to his marriage with the daughter whom he loved better than his life; but he put the thought quickly from him, chiding himself severely for his lack of gratitude toward the man who had saved Bab's life.

CHAPTER XXII.

For some moments after India had left him, Clarence Neville sat on the vine-covered porch of his friend's home lost in deep thought. He was thankful beyond words to learn that Bab was revering so nicely from her terrible ight. She had sent word by India how grateful she was; still, he felt that she ought to have written him at least one little line.

He sighed heavily and tried to divert

den him to walk, for ever so short a distance, but his desire to see Bab was so great, he threw advice and prudence to the winds. The ankle was painful, but he was so brave and strong that he scarcely heeded it—he walked as far as the brook, but outraged nature in the

shape of a sharp twinge warned him he shape of a snarp twings waries into the must rest then for a while.

He threw himself down in a nest of bluebells and gave himself up to the sweetest and rosiest of daydreams, all of which began and ended with Barbara

Haven.

Suddenly he was aroused by a voice, and the very person he was thinking of, Bab herself, and sweet as the day, appeared before him.

appeared before him.

He would have sprung to his feet had not his ankle warned him that he was on the invalid list, so to speak. He said to himself: "Of course Barbara must know of it, for India had surely told had been speak to be a surely told had been supplied to the said to himself: "Or read to be a surely told had to be a surely told to the said to be a surely told to be a surely told to the said to be a surely told to the said to be a surely told to be a surely to be a surely told to be a surely to be a surely to be a surely to be a surely told to be a surely to be a surely told to be a surely to be a her of his mishap." But she did not even refer to it.

He held out his hand to her eagerly

looking longingly into the beautiful blue eyes, bluer than the larkspurs and bluebells about him—and the forget me nots that fringed the banks of the bab

bling brook.

The word was on the end of his tongue: "Oh, Bab, Bab, how thankful I am to God that I was enabled to save your precious life"; then he suddenly remembered that she had asked as a spectrum. ial favor that he should not mention ial favor that he should not mention it in any way in her presence, or even elsewhere—the memory of that scene was so abhorrent to her.

He stopped short, and smiled, even

He stopped short, and smiled, even though he sighed.

"Of course he has heard of my terrible accident, and how near I came to losing my life," thought Bab—and she wondered why he did not congratulate her upon escaping uninjured from what accemed certain death.

"Will you sit down, Miss Barbara, and talk to me?" he said wistfully; "and pardon my not rising—I have a very unkind master, you see, in my sprained ankle, which sadly interferes with gallantry."

Bab's blue eyes opened in wonder,

Bab's blue eyes opened in wonder but she made no comment, other than to say that it was certainly too bad. The sun was warm, and she had been walking a considerable distance, and she was very glad to avail herself of his invitation to sit down in the long,

ms invitation to sit down in the long, green, cool grass.

Bab felt piqued that during the following half hour he made no mention of her accident, and she was determined that she would not speak of it. What did they talk of? They could scarcely have told themselves: they seemed to have told themselves; they seemed to realize that life had just begun for

them from that hour. They talked of the poets-he quoted sweet, passionate words from them that she had never read—he murmured some she had never read—he murmured some of the very passages that Rupert Downing had read to her, but ah, how different they sounded on his lips—every word seemed to thrill with a newer, sweeter, tenderer meaning. This was something like romance—sitting under the spreading shade of green trees liethe spreading shade of green trees, lis-tening to the singing of the little brook, with this handsome, fair-haired young man by her side, with his dreamy eyes, so full of unspoken love, riveted upon

her face.

He knew all the pretty legends of the flowers. Gathering a tuft of blue forget-me nots that grew at her feet, he said:

"Let me tell you how these flowers which so resemble your pretty eyes, came by their name.
"It is said that a knight and a lady were walking by the side of the Dan-ube, interchanging vows of devotion and affection, when the young girl saw, on the other side of the stream, the bright blue flowers of the myosotis, and expressed a desire for them. The knight, eager to gratify the every wish of his sweetheart, plunged into the river, and, reaching the opposite bank, gathered a bunch of the flowers. On his return, however, the current proved in the return of the his pand of the many of too strong for him, and, after many efforts to reach the land he was borne

(To be Continued.)

THE DANGER OF ANAEMIA

Consumption May Follow Unless Its Ravages Are Checked.

There is danger to every girl and every woman who falls a victim to anaemia—that is bloodlessness. They anaemia—that is bloodlessness. They become listless, feel too weak, too wreck-hed and to hopeless to take prompt steps to stop the trouble. Too often, through neglect, they drift into a worse condition, forgetting that anaemia frequently leads on to consumption. If you are angemic in the least degree you should lose no time in beginning treat-ment, to increase and enrich the blood supply. To do this there is no other medicine so good as Dr. Williams' Pink Pills. Every dose helps make rich, red blood which drives out disease brings again the bloom of health to pale and sallow cheeks. There are thousands of women and growing girls in Canada owe their present good health to timely use of Dr. Williams' Pink the timely use of Dr. Williams' Pink Pills. Among those who have been re-stored to health by this great medicine is Miss Rose Neville, Mount Forest, Ont., who says: "Dr. Williams' Pink Pills performed almost a miracle in my case I was a victim of anaemia, in what my friends considered a dangerous form. I was very pale, always felt tired out, suf-fered from severe headaches, and had no appetite. I was taking doctor's medicine for a long time—in fact, I tried two doctors—but instead of improving I seemed to be growing worse. My parents were as a loss to know what to do for me and thought I would not recover. Then a friend advised Dr. Williams' Pink Pills a friend advised Dr. Williams' Pink Pills and I had only taken them a few weeks when I began to feel better. This greatly encouraged me and I continued taking the Pills for some time longer, and found my health again as good as ever it had been. In fact, I am stronger than ever I was before. I have advised the use of Dr. Williams' Pink Pills to other girls who have found the results equally girls who have found the results equally beneficial"

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A GOOD TIME COMING. (London Advertiser.)

(London Advertiser.)

No one nation can bring about general peace by disarmament. The leading civilized nations must act together. That they will do so in time is a matter of little doubt. It may be slow in coming, but the time "when the common-sense of most shall keep the fretful realms in awe" is sure to come. And the so-cieties and indviduals who work for that end will not work in vain.

DREADFUL ITCHING AND BURNING

White Blisters Spread All Over Head. Scratched Until Mass of Sores. Hard Crusts Left Raw Flesh. Had to Cut Hair Away. Healed by Cuticura Soap and Ointment. Hair Growing Thick.

139 Romaine St., Peterboro, Ontario. 'My little girl's head was in a terrible state. It started with little white blisters, which would break until it spread all over her head. The burning and itching

were dreadful, especially at night when she would scratch it until it was one mass of sores all over her head and the pillow would be covered with blood. She could get no rest at all with the pain. She would beg of me to put

something on to cool the burning and irritation. Hard crusts would form on her head which when she scratched it would leave the raw flesh underneath, and her hair came off with it or would be in such dreadful state that I would be obliged to cut the hair away.
"I tried several remedies but none of

them seemed to do any good. I then cut them seemed to do any good. I then too her hair quite close, washed it with Cuticura Soap and bandaged it using Cuticura Oint-ment. It is now quite healed without a mark on the skin. Her hair is growing nice and thick again." (Signed) Mrs. M. Saun-

lers, Feb. 13, 1912. Cuticura Soap and Cuticura Ointment are sold by druggists and dealers everywhere A single set is often sufficient. Liberal sample of each mailed free, with 32-p. Skin Book. Address post card Potter Drug & Chem. Corp., Dept. 36D, Boston, U. S. A.

AN ANCIENT RACE.

Excavations in South Africa Reveal Relics.

A most interesting discovery has lately been made showing the existence of a primitive race of men in South Africa. Dr. Broom, of Germis ton, whose archaeological and geological cal researches have made his name familiar to scientists in Europe and America, told of a specially interesting discovery recently made of a hot spring thirty miles north of Bloemfou-tein, in the course of operations designed to open up the eye of of the spring. To do this it was necessary to tunnel into a sand hill, and in the course of operations the workmen came across a large quantity of mammalian bones associated with hu-man implements and a quantity of charred wood.

The significance of the discovery was not realized by the first finders but, fortunately, a Dutch woman in the district suspected they had scientific value, and prevented the finds from being dispersed. Dr. Broom went down and examined them. He found that the bones were chieftly those of hip-popotami, eland, the huge extinct buffalo of Scuth Africa, whose horns used to attain a span of twelve feet; the gigantic Cape horse longe since extinct, which far exceeded the Clydesdale in size; an extinct variety of wild beasts; the wart hog, and a number of small buck, not yet identified.

Previous discoveries had caused sci entists to believe that man had lived in South Africa contemuporaneously with the extinct giant buffalo, but the proofs available were inconclusive. Dr Broom regards this discovery as prov-ing their co-existence beyond doubt The find further proves that extinct animals were killed, and their bones broken, and indicates that their flesh was cooked by some primitive race of human beings. The implements found included stone knives and large spear heads, but no evidences were found of

typical bushman stones. At present there is some doubt as to race to which the human beings who hunted these giant buffalo belonged. In this connection it has been noted that the bones of the extinct buffalo and horse possibly identical with those discovered in South Africa

have been found in Algeria. It is thought possible there-fore that the tribe which hunt-ed them migrated south along with these extinct animals during the last ice age. It is further thought that these ancient people were probably white and of European stock. Dr. Broom has sent a representative collection of the bones to Cape Town.

MALINGERERS

And the Tricks Used to Convict Them.

The treatment of malignerers omewhat rare incident in the work of a civil medical man. In the army this branch of medical diagnosis has always beeen wel lto the front. The soldier, weary of field days, "fed up" with some insalubrious tropical station, or under orders for toreign service, has always

proved a certain source of trouble to the army medical officer.

Take the case of the professed deal and dumb man. Of course, under ordinate of the course of the nary circumstances, writes a surgeon-major in the London Globe a soldier does not become deaf and dumb. To be aware of this fact, however, does not, of necessity, mean that the crime can be or necessity, mean that the crime can be proved against the man in a moment. In the case of the man under consideration the patient, when asked a question, would stare straight to his front in stony silence. Upon his diet sheet each morning was written a tempting array of hospital comforts such T. Atkins loves -rice pudding, bacon, eggs and 'even beer. This list of luxuries could be stud-

ied by all who cared to read.

Day after day the medical orderly brought nothing to the poor patient but plain milk. Each morning, in sympathetic voice, the officer inquired of the orderly, in front of the patient, whether each and every article of diet had been religiously provided. The orderly, with truth written upon every lineament of truth written upon every lineament of his features, glibly answered, "Yes, sir." At first the poor deaf and dumb man's face would redden, but never a word could he hear or speak. There is, how-ever, a limit to all endurance. And it

was for that limit that the officer wait-

Fully convinced that the orderly had been bagging the comforts for himself, the patient could stund it no longer. "He's a liar, sir!" gasped he at last. "Twe had nothing but milk for a week." Result: Immediate discharge from hospital and a court-martial.

Then there is the deaf man who cannot withstand the temptation to turn his head when a coin is suddenly dropped upon the floor behind him. Shamming lunacy is, perhaps, the commonest form of attempt to obtain a discharge from the army on medical grounds. This often succeeds. There was a case in India the writer recalls with amusement. Each morning the guard over "the insane" would rush in and hold the dangerous man while the medical officer visited him. The struggle that ensued was not withstand the temptation to turn

gerous man while the medical officer visited him. The struggle that ensued was inveriably fierce.

One morning a more than usually lusty officer took charge of the case. The door was opened. The guard, as usual, prepared for battle. "Hold!" commanded the officer. "Leave him alone!" Walking boldly into the cell, he approached the patient unattended. "Now, then, my man, what are you going to do?" asked he. "Please, sir." replied the patient, grinning, "I wouldn't touch you for anything."

thing."
Pains in the back are generally supposed to puzzle the army surgeon most. But there are also wiscr men who try more subtle ailments. A soldier with an incurable headache is none too easy an individual to tackle. I have in my memory such a case. The soldier concerned slept well, ate exceedingly well and never showed any rise of tempera-ture. Yet he complained of excessive headrche, which apparently no drugs

could alleviate. He was passed on from one medical officer to another. Each one was convinced that he had no headache. How to prove it was the difficulty. At last the man was brought to a court-martial. The opinion difficulty. (for what it was worth) cf a strong combination of medical officers was considered by the court to be sufficient. The malignerer received three months' imprisonment. He served his time. The head-

ache was heard of no more. One medical officer with whom I was associated had a habit of confiding in a suspected malignerer in this wise: "Look here, my mon. I don't believe there is anything the matter with you whatever. I cannot, however, be quite certain yet.

If you are playing the fool, my advice to you is to recever miraculously by to morrow morning. I give you until then to think it over."

Our Precise Artist

AMUSING EXPERIMENTS

FLY -

Glass can be cut with scissors just as easily as cardboard, if you know how, and it is so simple that everyone ought to know how to do it.

Use a large, strong pair of scissors. Take the glass which you wish to cut, hold it and the scissors entirely under water, and you may cut the glass in straight or curved linesc, without break or crock, for the water deadens the vibration of the scissors and the sheet of glass. Try this the next time you want to frame some pictures.

Ornamented candles are very pretty. but far more expensive than the unor-namented. A very pretty, artistic ef-fect, however, may be obtained by the following easy operation: Take some pictures, preferably of plain outlines, and roll them tightly around wax candles. The design must not be larger than the circumference of the candle. Now pass a lighted match of taper very rapidly over the back of the paper is rolled on the candle and the work is done. Unroll the paper, and you will see the design has been faithfully resee the design has been lattury produced in grayish colors. The designs chosen for reproduction ought to be printed as dark as possible, and the shadings between the lines ought not to be too close, for they are enlarged in the process or reproduction.

WHEN JIM WAS DEAD.

When Jim was dead, lit sarved him right," the nabors sed, i' bused him fer the life he led, i' him a-laying thar at rest ith not a rose upon his breast! in menny cruel words they sed When Jim was dead.

"Jess' killed hisself," "Too mean tel They didn't have one word ter give Of comfort, as they hovered near An' gazed on Jim a-lying there! "Thar ain't no use to talk," they sed, "He's better dead!"

But suddenly the room growed still, While God's white sunshine seemed to fill
The dark place with a gleam of life,
An' o'er the dead she bent—Jim's wif
An' with her lips close—close to his,
As tho' he knew an' felt the kiss
She sobbed—a touchin' sight to see—
"Ah! Jim was always good ter me!"

I tell you when that sum to light
It kinder set the dead man right.
An' round the weepin' woman they
Throwed kindly arms of love that day,
And mingled with their own they shed
The tenderest tears when Jim was dead
The L. Stanton.

Tell the average man to take his own part and he will want to grab the whole thing.

God's love and a mother's love the two best things in life.—Florida Times-Union.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 20 years, has borne the signature of and has been made under his per-Charff lutcher. Sonal supervision since its infancy.
Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children-Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea-The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of The Kind You Have Always Bought

in Use For Over 30 Years.

ULCERS, BOILS, SWOLLEN GLANDS, BLOTCHES, PIMPLES, AND ALL SKIN AND BLOOD DISEASES ARE COMPLETELY CURED BY THE NEW METHOD TREATMENT

We desire to call the attention of all those afflicted with any Bleod or Skin Disease to our New Method Treatment as a guaranteed cure for these complaints. There is no excuse for any person having a disfigured face from eruptions and blotches. No matter whether hereditary or acquired, our specific remedies and treatment neutralize all poisons in the blood and expel them from the system. Our vast experience in the treatment of thousands of the most serious and complicated cases enables us to perfect a cure without experimenting. We do business, on the plan—Pay Only for the Benefit You Derive. If you have any blood disease, consult us Free of Charge and let us prove to you how quickly our remedies will remove all evidences of disease. Under the influence of the New Method Treatment the skin becomes clear, ulcers, pimples and blotches heal up, enlarged glands are reduced, fallen out hair grows in again, the eyes become bright, ambition and energy return, and the victim realizes a new life has opened up to him.

AN ELUSIVE LAKE

Antics of an Erratic Body of Water In Switzerland.

In the canton of Valais, in Switz land, at the foot of the great Aletse glacier, lies a small body of water Lake Marjelen, of which the Journa des Veyages reports a strange fact.
At irregular intervals every three or

four years Lake Marjelen completely and suddenly disappears. The phenomenon always occurs during the last days of August. Without warning the ake empties itself, and the great quantity of water that it contained disappears through fissures in the rocks to swell the waters of the river Rhone. So rapidly does the lake empty itself that the water level of the Rhone rises several meters in a few hours, and the valley is flooded. An old custom grants a new pair of shoes to the first disappearance of the lake to the inhabitants of the valley.

All the autumn, after the disappearance of the waters, the basin of Lake Marjelen remains dry, but during the following winter and spring it grad-

Scientific men believe that the phenomenon is caused in some way by the neighboring glacier. Little by lit-tle the melting ice raises the level of the lake until at the end of three or four years the accumulated water exerts such an enormous pressure upon the sides and bottom of the lake that the basin gradually becomes as porous as a sponge. At some point or other the water begins to escape. Then it flows more rapidly until at last it pours through the fissures on every

CONCENTRATION.

Do Only One Thing at a Time, but Do

That One Thing Well.

The man who makes good is the man who can shut out of his mind all but one thing. An unsuccessful principal of a school once said that every teacher ought to be able to do three things at once. Of course he was wrong. The teacher who does one thing at a time and does it well is giving the pupil the best possible object lesson in concentration.

We have to learn to think clearly amid distracting noises, to go forward on a straight and narrow way with-out diversions and excursions that waste our time and our substance and to keep at work regardless of the "tired" feeling, the "spring" feeling and whether the fishing is good or not. When the soft breeze comes in at the window we must stiffen the moral fiber against its allurement. We must pin our attention firmly to the turgid and dry geometry of a legal brief or the serried figures of the daybook or the busy system of a mercantile establishment and let every other thought await its turn at the end of office

You may have heard a great lawyer in action in a crowded courtro What was the secret of his power? It was that he would not let the jury's ettention or the witness' tongue wander from the relevant facts. He kept stently to the straight line that is the shortest distance from point to point. He curtly dismissed all that was superfluous, immaterial and calculated to blur the salient outlines of the matter in controversy.-Phitadelphia Ledger.

Wasted Medicine.

"There is one loss sustained by drug-gists that very few people know about," said the experienced clerk. "That is in the prescriptions that have to be made over, the same as clerks, stenographers, writers and artists, no matter how painstaking, occasionally have to do their work over. The most careful drug clerk in existence is bound to make mistakes sometimes in measuring and mixing.

"He may pour in too much of some kind of liquid or sift in too much of a certain powder. In most cases the overdose would not really affect the value of the medicine, but the conscientious clerk is not going to take chances on murdering anybody, so he throws away the whole mixture and makes up another prescription."-New York Times.

The Neighborhood Traveler.

It is written, and the world believes it, that travel is the infallible, exclusive cure for provincialism. Perhaps! Ultimately that depends on what the man takes with him in his wanderings. Merely to go accomplishes naught. fine, one need not travel at all. If the man with the common eye will but use his eyes he may bring all the world to him. The Alps and the Rockies are worth seeing, indeed, but the man who is capable of really seeing them, if among them, is capable also of beholding landscape and glory in his own neighborhood.—Booklovers' Magazine.

Slightly Inconsistent. "A pate : should not be concerned matters of mere pecuniary compensation.

"And yet," replied Senator Sorghum when a man is rich enough to be independent of such considerations, they won't let him run for office."—Wash-

Profane Golf. "Do you think golf a suitable game

"I should say not. Why, I saw a man playing once, and all he did was to walk around a field with a club in his hand and stop every few minutes to swear."-Buffalo Express.

Adversity is sometimes hard upon a man, but for one man who can stand prosperity there are a hundred that will stand adversity.—Thomas Carlyle.

READING THE ENVELOPES.

They Toll More Than the Name and

Envelopes often tell me more about a man's financial standing than could the best "private inquiry agency." You can't "swank" a postman. And month an official envelope with the re-lief stamp of a furniture firm on the back of it I know pretty well that the envelope contains the receipt for an installment on the furniture. When that envelope fails to turn up I keep an eye open for the other signs of impending bankruptcy.

An envelope with a crease down the middle has obviously been inclosed in another envelope. This tells me the handwriting of the householder and the kind of stationery he uses. When I de-liver one of these day after day at the same house I know that the occupa is out of work and is answering advertisements. But when the envelopes stop coming I am left to wonder whether the applicant has been successful

er can afford no more stamps. Sometimes there is tragedy in envelopes. There was a young fellow who used to stare down at me from behind the window curtain—so anxious to see what I'd got in my hand that he wouldn't wait till I'd pulled the bell. I soon tumbled to his job, for by nearly every post there would be a long eneased down the middle, showing it was a return. A writer he was. -Pearson's Weekly.

MAGNETIC CLEOPATRA.

Her Manner, Rather Than Her Beauty, Was Her Chief Charm,

The only authentic portrait of Cleopatra that is known to archaeologists is a bust which appears on a series of coins. It is on the reverse and bears the inscription in Greek, "Queen Cleopatra, the Divine, the Younger," while on the obverse is a portrait of "Antony, Dictator For the Third Time, Tri-

The workmanship of the coin is far from good, and this accounts in some measure for the undeniably plain appearance of the queen. Yet the likeness, as far as the features go, is a true one, for the other coins of the same series, though of a different type, give her the same features, an aquiline nose, a strong chin, a long neck and narrow shoulders.

The fact is that her beauty was not so remarkable as one would think from the spell she cast over Caesar and An-Plutarch, for instance, tells us "that her beauty in itself was by no means incomparable nor calculated to amaze those who saw her," but adds that the magnetic charm of her manner, the gracefulness of her movements, the persuasiveness of her conversation and her figure were most attractive.

Enjoyed What He Paid For.

It is interesting to note the effect that reputation has on those who are not good critics of the efforts of public performers, as a clerk in a downtown bank was telling.

"I happen to know a celebrated concert artist," he said. "One evening she was in the city and had nothing to do, so she came up to our very humble flat in Harlem to spend a quiet, homelike hour or two. The night was warm, and the windows were open After dinner she sat down at the piano and sang several songs for us. The next day I heard that one of our neighbors complained loudly about the 'yelling' in our flat and said that such nuisances ought to be prohibited. Two nights later that same neighbor paid \$2 a seat for himself, his wife and his daughter to hear our friend sing at a concert."-New York Sun.

Ptolemy's Big Boat,

Ptolemy (Philopator) was fond of building big boats. One of these is said to have been 420 feet long, 57 feet broad and 72 feet deep from the high-est point of the stern. This vessel had four rudders or what some would call steering oars, as they were not fastened, each forty-five feet leng. She carried 4,000 rowers, besides 3,000 marines, a large body of servants under her decks and stores and provisions. Her oars were fifty-seven feet long, and the handles were weighted with lead There were 2.000 rowers on a de, and it is supposed that these were divided into five banks. That this extraordinary vessel ever put to sea is doubted, but that she was launched and used at times, if only for display, several historians are agreed

A Case In Arithmetic The teacher was hearing her class of

small boys in mathematics, "Edgar," she said, "if your father can do a piece of work in seven days and your Uncle William can do it in nine days, how long would it take both of them to do it?"

"They would never get it done," answered the boy earnestly. "They would sit down and tell fish stories."— New York Post.

What the Teacher Taught Him. The small boy had just returned home after a most tumultuous day at school.

"What lessen," asked his father, was the most impressed on you to day by the totcher?"
"Dat I need a thicker pair of pants." Ladies' Hone Journal.

Friendliness

It is not wise to rush into violent friendships with every one you meet, but it is a great mistake not to be on friendly terms with those with whom you come in contact.

An accusation of having done wrong should not disturb pon-unless it's true.

DEATH OF JOHN DOCKRILL

John Jarvis Dockrill died at his home near Athens on Saturday, June 28, aged 72 years. He had been in failing health for several months but his death was not expected. He lived alone on his farm, and neighbors not seeing him about the place they invest igated and found him in bed in a very weak condition.

His wife, who was in Peterboro ame at once in response to a telegram. The funeral took place on Sunday afternoon to Christ's Church, where service was conducted by the rector, Rev. W. G. Swayne, and interment was made at Oak Leaf

B. W. & N. W. IMPROVEMENTS

The road-bed of the B. W. & N W. Rv. is to be substantially improved this year, At a meeting of the Board of Railway Commissioners for Canada on Wednesday last, upon the report and recommendation of the Assistant Chief Engineer, concurred in by its Chief Engineer, it was ordered

(1) That the railway company re new the ties at the following bridges : Bridges just east and west of Lya; bridge at Corbett's bush; and the bridge over the Rideau Canal at New-

(2) That the railway company rew at least 30,000 ties on its line that the whole line be ballasted; and that the highway crossings be made to conform to the standard regulations affecting crossings.

(3) That the work be completed by the 1st of November, 1913.

DEATH OF MRS MARY J. WILTSE

On Friday last, at the nome of Mr Jet Hawkins, Mrs Mary J Wiltse de-parted this life, aged 81 years, 6 months

Deceased, whose husband was the ate George Wiltse of Athens, had peen a life long resident of this district and her uniformly kind disposition gained and retained the friendship of all who had the pleasure of her acquaintance.

For a time following the death of Mr Wiltse. she lived with friends in northern New York, but she yearned o return to the scenes of her early life and eventually took up residence in Athens, latterly being tenderly cared for in the home of Mr Jet Hawkins.

Dr. and Mrs Anderson (her steplaughter) generously contributed to the omfort of her declining years.

The funeral service, attended by many old friends, took place on Satur day last

COVEY-MOEHRING

Mr and Mrs Charles Moehring announce the marriage of their daughter Lillian Henrietta Louise to Mr Samuel Budd Covey on the afternoon of Wednesday, the 25th of June nineteen hundred and thirteen, Rochester, N.Y. Mr and Mrs Covey arrived here on Thursday evening last and were ten. dered a reception at the home of the

groom's mother. The above announcement was read with pleasure by many Athenian friends of the groom and he and his bride are receiving many cordial greetings with best wishes for their future happiness and prosperity.

CLARK-CORNELL

Times: On Tuesday evening, June 24, at half est nine the Rev. Dr. Spelling, poor of the Wall Street Methodist caurch, united in marriage Dr. H. A. Clark and Miss Nina Geraldine Cornell, only daughter of Dr. and Mrs C. M. B. Cornell, all of Brockville. The ceremony was quietly per-formed at the new home of Dr Clark, the fine old residence of the late New ton Cossitt at the corner of Pearl and Ontario Wall street, which the bridgegroom has just refurnished and renovated. Dr. and Mrs Clark left on Wednesday morning for Ottawa, and will later on go to Montreal for their honeymoon

> The happy couple will receive a great many congratulations upon their return to town as they are both great favorites, and deservedly so, in so-cial circles. The bride is a most graceful and accomplished lady, and Dr. Clark has for long been a prominent citizen of Brockville. That they mav enjoy a long and happy wedded life is the hearty wish of a host of friends.

To All Women: I will send free with full instructions, my home treatment which positively cures Leucorrhoea, Ulceration, Displacements, Falling of Womb, Painful or Innovity Womb, Painful or Irregular Periods, Uterine and Ovarian Tumors or Growths, also Hot Flushes, Nervousness, Melarcholy, Pains in the Head, Back or Bowels, Kidney and Bladder troubles, where caused by weakness peculiar to our sex. You can continue treatment at home at a cost of only about 12 cents a week. My book, "Women's Own Medical Adviser," also sent free on request. Write to-day. Address Mrs. M. Summers, Box H. 8, Windsor, Ont.

THE CURE FOR GRUMBLING.

(Detroit Free Press.) (Detroit Free Fress.)

The man with an income of \$1,000 a day is not likely to be religious, according to Dr. M. J. Magor, of Chicago, who has been discussing in his pulpit the old problem of the spiritual value of riches and poverty.

Doverty.

It is easy, and it is the fashion in these days, to generalize in this manner about the rich man, because some rich men make unfortunate and reckless use of wealth, to their own personal detriment. Often ruin, and to the offense and disgust of observers. This is in, line with the general custom in many quarters of persistently looking at the unpleasant things and so failing to see the other side. For there are rich men—anyone can name a dozen or two off-hand—whose revenues far exceed \$1.000 a day, who are devoted to religion and benevolence. So that it is not a matter of money but of personal inclination or character—call it which you will—that determines the religious or irreligious bias of the man. There are moneyless men who are religious or irreligious the man—not money or the lack of it—which should be considered in a problem of the kind raised by Dr. Magor.

Much of the gdumbling and discontent in the world would immediately vanish could the ordinary man adopt the plan of considering the good as well as the evil side of every question presenting itself. s easy, and it is the fashion in these

Minard's Liniment Cures Diptheria

STONES FLOCK TOGETHER.

An English naturalist has lately given some intersting acounts of oddities found in the United States, and chief among them is the traveling stone, the size of a pea ordinarily, and yet sometimes reaching six inches in diameter. He came acress it in Nevada, where it is

most frequent.
It is really the queerest little stone in the world, for when a number of them are placed on the floor or on any level

surface and separated some distance from each other they begin to travel toward a common centre and to lie huddled together like eggs in a nest.

If a single stone is removed four or five feet from the rest it will immediately start with the greatest rapidity to join its fellows.

These stones are found oftenest where the land is very level and littig more than bare rock. Often scattered over these barren regions are little basins from a few feet to a rod in width and at the bottom of these basins the rolling stones are found.

The cause for the strange conduct is to be found in the material of which is a lodestone or a magnetic ore, which has the tendency to draw them together.

"FATHER'S DAY." (New York Herald.)

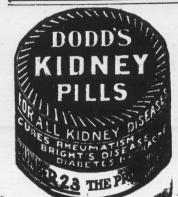

From far off Seattle comes a voice that gives us pause. The good folk there may be hopelessly distanced by the march of events and in the mental attude of the man who still is voting for Andrew Jackson. Again, they may be therees rallying to a lost cause. In any event, yesterday they celebrated as "Father's Dax."

heroes rallying to a lost cause. In any event, yesterday they celebrated as "Father's Day."
Whatever the occasion for this event, it is refreshing. It is a breath out of the nineteenth century and its predecessors. "Father's Day!" While we smile at the simplicity of our far western friends, let us not saeer; for even in this progressive east, where father is hardly enough in evidence to be marked as an exhibit, he still has a habit of coming home on Saturday night with the pay envelope, which represents not only the bacom but also slashed sheath skirts, turkey trot lessons and taxicab hire.

A GRAND OPPCRTUNITY.

(Washington Post.) Doc Friedman says his rivals are merely jealous. The very thing-let him now discover the germ of jealousy and cure that if he can.

Love, being blind, never sees itself as others see it.

USING WOOD-WASTE

A la Carte Restaurant

Not Much Dead Loss in Lumbering Now.

Perhaps the most interesting development in the manufacture of wood products has arisen in the increasing variety of uses to which wood-waste can be put. Beginning in the forest,, the closer utilization of the various wood products can be traced through the sawmills and large wood working industries, right down to the firms working only on small

specialized lines.

The utilization of mill waste is being made increasingly possible by the devel-oping markets for odd and short lengths n lumber instead of a few assorted sizes. Many sawmills use their waste products in the manufacture of laths, mouldings, pickets, roller blinds and paving blocks. The manufacture of wood-pulp from the small waste wood now being fed to the burner is also a commercial possibility. Even sawdust has its uses, and in coun-Even sawdust has its uses, and in countries where more intensive utilization prevails it is being successfully mancufactured into a variety of products. Several plants have been erected in this country for its manufacture into ethyl (or grain). alcohol, sugar and briquets for fuel.

The bulletin now being issued by the Forestry Branch. Ottawa, on "The Wood-Using Industries of Ontario, throws considerable light on the utilization of wood-waste. Sash and door fac tories sell for use their short ends and trimmings for the manufacture of boxes, baskets, bobbins, butter moulds, insula tor pine, novelties, skewers, spindles, spools, stakes and woodenware. They bale their common sawdust and sell it for floor covering for the manufacture of composition, novelties, and for cleaning crews. They sell shavings for bedding packing and for drying wet land. Hick-ory and other hardwood dust is sold for smoking meats. In fact, just as the pork packers boast of using all a pig but the "squeal," so wood manufacturers will soon be able to boast of using all the wood but the bark, and even that, in the case of some woods, such as hemiock

is of considerable value. It is now commercially possible to reduce the fifty to sixty per cent. waste formerly left in the woods by lumbermen to no more than five per cent. by a combination of three well-developed hemical industries, namely, paper-making, wood-distillation (in a modifie form) and the manufacture of resin oils Practically all the valuable constituents from the stumps, tops, branches and de-fective stems which would otherwise he left to rot in the forest are thus con-

FAMILY WORSHIP.

FAMILY WORSHIP.

(Kingston Standard.)

Hon. S. H. Blake, of Toronto, complains that family worship is practically a thing of the past in Ontarlo. And undoubtedly this is true. But we doubt if the morals of the community have suffered as a consequence of the decline of this form of worship. In some families it was looked upon more as a punishment and a torture than as a means of salvation. The tendency in the old days in a religious way was to do too much driving.

Minard's Liniment Cures Distemper

THOSE LOVELY CHIMES.

An American tourist was contemplating—from the outside—a quaint old chapel in one of the cathedral towns of England. In a nearby spire the chimes England. In a nearby spire the chimes began to ring. A venerable clergyman issued from the ivy-covered pile, and observing the look of rapt attention upon the stranger's face, was moved, out of the goodness of his heart, to approach and engage him in conversation appropriate to the time and the

"My friend," he began, "does not the sound of those sweet bells fall like a

benediction upon the soul?"

The American gazed at him blankly and cupped up one hand behind his ear in order to hear better.

"Which?" he inquired.

"Which?" he inquired.
The old rector raised his voice and shouted louder.
"I say that those lovely chimes seem to float down to us like a message of love and peace from on high. Do you not agree with me that theirs is a message from heaven?"

"I'm sorry," said the visitor, "but still I don't seem to get you."

The clergyman made a funnel of his hand in front of his mouth.
"I merely wished to ask you if you.

hand in front of his mouth.

"I merely wished to ask you if you, too, did not feel that the music coming from that tower yonder was truly celestial music, freighted with hope and beauty and glerious tidings?"

"Mister," explained the American, "the truth of the matter is that those during hells make so much realest."

durned bells make so much racket I can't hear a word you say."—Saturday Evening Post.

FOR THE VACATIONIST.

The best protector a house can have is the next-door neighbor. He can fuss around and look like the proprietor. But, in any event, if no policeman goes near your place, no crook can feel sure that somebody may not walk up at any moment, insert a latchkey, and walk in. But, if a policeman is on the dob for five minutes in the twenty-four hours, the porch-climber knows exactly where he is at. When he has seen the policeman pay his regular visit, he knows the House is at his disposal for twelve, or possibly for twenty-fower, hours.

It is possitively sinful to tempt weak men into crime by a system so crude.

DON'T SMOKE, LADIES!

Here's the Reason Why You Should Not.

It seems that at last a purely physiological reason has been found why women should not smoke, apart from the very general prejudice which exists in

this country.
"Soking," says Dr. Hargrave, a
London physician, "does not have the
same effect on women that it does on and that this is really beneficial from the viewpoint of the possible infection from the foods themselves.

"But with women it is a serious con-clusion reached from many experiments that few of them need tobacco. While the proportion of men whose salivary secretions were stimulated and sterilized by smoking was very large, the proportion of women, on the other hand, was very small. Even in women who have been habitual smokers for years the action of this weed was found to be less marked, in fact, almost negligible."

So apparently Dr. Hargraves is of the pinion that women should not smoke ecause they do not need it.

SLEEP IN CHURCH. WAR

German Professor Explains the Reasons.

Do you know why sermons make you sleepy? Because you hypnotize yourself,.

says a German professor.

Have you ever wondered why it is that you do get so sleepy in church that you sometimes think you are going straight off into a Rip Van Winkle slumber?

It is because you are too attentive. It isn't because the air is bad, thesermon stupid, or anything of the kind. The more faithful and zealous you are the

more faithful and zeadous you are the selective you can get.

The reason is that you gaze too hard at the preacher and hypnotize yourself. You are so attentive that you get yourself in an unnatural state and then suddenly you find that you are hopelessly sleepy and cannot remember what you have heard. early part of the service," the

professor says, "there is variety—sing, reading and so forth—but the mon itself is utterly unbroken, head and body are in one position, the same profession of the profession of the same profession and position, all notism."
Apparently from the trend of the professor's remarks, the only conclusion we

ressor's remarks, the only conclusion we can draw is that, as the more attentive one is the less he hears, it would really pay one to give less attention and learn

more.

The comfort of it all is that the professor proves that it is really not our fault if we cannot remember that text. Minard's Liniment Cures Colds, Etc.

SAVE RELICS OF THE PAST. (London Advertiser.)

(London Advertiser.)

It seems a pity that in a young and growing community there should be very little regard for the historic monuments that are so closely associated with ploneer life. Canadian towns have preserved very few of them. As the community grows older and richer, the relics of the past are swept aside, and little remains connected with the past. We think mainly of the present, somewhat of the future, but the past we bury out of sight. There will come a day with us, however, as it has come to many others, when we will realize more than we do now the work of the pioneers of Canada, and relics of their trials and their successes will have a value that they do not appear no wto have. A sentimental value it may be, but none the less a high one. Then, when we want to gather them up, it will be too late.

WILSON GIRLS CAN SEW. (Montreal Star.)

(Montreal Star.)

Employees of one of the leading departmental stores of Washington are telling a story that illustrates the wholesome simplicity of the family of President Wilson. According to the story, the President's daughters went to the store and looked at several gowns. They were informed that a charge of \$2 was made for alterations.

"Oh, we can make any necessary alterations at home; we know how to sew," said one of the President's daughters.

SANOL CURES GALL STONES

Quick relief is what the sufferer from gall stones begs for and longs for, and quick relief is what SANOL, the great remedy for gall stones, and all uric acid diseases, will quickly afford.

SANOL is a herbal preparation, made from the formula of a great German Scientist. It is a thoroughly scientific preparation. It may be used with perfect safety. It will quickly relieve kidney trouble and all diseases of the urinary tract.

We can send literature, including let-ters, from sufferers who can be cured, which will tell fully what SANOL is and what it will do.

SANOL relieves and cures the discased organs, and acts as an immediate strengthener of weak kidneys, ipflamed bladders and all weaknesses of a like nature. Price \$1.50 per bottle; sold by all lead-

ing druggists. THE SANOL MANUFACTURING, CO., LTD., WINNIPEG, MAN.

HUBBY WAS WILLING.

Here is one that was contributed by Winston Churchill, the author, the other evening when the conversation turned to the servant problem, and several sad-related their difficulties with hired help. "One-morning a few weeks age," said Mr. Churchill, "papa rambled downstairs, looked around and seeing no signs of breakfast, turned questioning eyes on little wifey.

"What's the matter, Minnle,' he asked, 'don't we eat this morning?

"What's the matter, Minnie,' he asked, 'don't we eat this morning?

"The bacon has been spoiled, George,' replied wifey, in a disappointed voice, the new cook has burnt it to a crisp."

"You don't mean it!'exclaimed George, inst a little excitedly. 'Have you fired her? Have you advertised for a new one? Have you—"

"Don't talk so loud,George,' interposed the little wife, in a gentle tone. 'She might hear you. We must not be too hard on her. She is young and inexperperienced. Won't you be satisfied with a kiss for breakfast just this once?"

"All right, deaire, submissively, re-"'All right, deaire,' submissively replied the old man, 'bring her in.'"

THE PERFECT SHOE FOR SUMMER SPORTS ASK YOUR DEALER.

Plants Trees Upside Down.

Plants Trees Upside Down.

A foreign raitway company has solved the plan of getting good shade trees in a short time, though they may be small. The trees are so arranged that after two years' time they will give as much shade as trees in the ordinary way of setting out would give that are 15 or 20 years old, says the New York Press. The company gets a small elm tree, preferably, digging this, roots and all, from the ground. The tree then is set, the top part being set into the ground, and the roots are left in the air.

The tree then grows, forms roots on what originally was the top of a tree, and the original roots that now take the place of the branches begin to leak out and form a complete foliage very quickly. Beautiful specimens of such inverted trees are to be seen by the fountains in Kensington Gardens, London.

FOOLING WITH FIREARMS. (Ottawa Free Press.)

The foolish practice of encouraging promiscuous use of firearms as if they were popguns—and the Collingwood affair is a good example of it—is to blame were possessed as a good example of the same standard in the fair is a good example of the same standard in the From the city dweller's standpoint the From the city dweller's standpoint the 22-calibre rifle seems to be more deadly than the elephant gun. Its small calibre deceives one as to its power to maim deceives one as to its power to maim deceives one as to its power to maim or kill, and the major cities are caused by it

LIQUIFIED GASES AS EX-PLOSIVES.

Liquid air, and more especially liquid oxygen, are being experimented on in Germany as mine explosives, reports the Engineering and iMning Journal. The latter, mixed with aluminum powder, and detonated, forms an explosive about 2 1-2 times as powerful as black powder, from which there can be no deleterious fumes, as the only products of an explosion are oxygen and alumina.

THE COSTLY RAT.

He Wastes Millions Every Single Day.

It has recently been estimated by a French statistician that \$1,000,000 worth of food a day is wasted on rats in Great Britain alone.

In other countries the expense runs equally high, and even higher. Every rat in France costs 2 cents a day for his keep.

keep.

In England a rat costs from 1-2 a cent to 5 cents a day to the person upon whose property it preys, and there are 40,000,000 rats in the British isles.

40,000,000 rats in the British isles.

In our country there are more rats than men, women and children, and doubtless their appetite is just as expensive here. In India, however, a country least able to bear the burden of supporting these pests, they are four times as numerous as the population, and each rat consumes on an average 3 cents' worth of food a day.

day.

Not long ago an international union was organized in France to rid the world of these unwelcome creatures.

The rat commits another sin besides impoverishing the country. He carries disease, and it is probable, because he is a thief, that he finally will be exterminated.

There is a race war going on between rats themselves which will help solve the problem. The black rat is being driven out by the gray rat. The black rat is a much greater nuisance than the gray. All along the Atlantic coast he has been driven out, and only the gray rat now is found.

Perhaps if the war between the fair race and the dark be kept up they may exterminate each other.

HIGHLY RECOMMENDED

BABY'S OWN TABLETS

No medicine for little ones is so highly ecommended as is Baby's Own Tablets They are guaranteed by a Government analyst to be absolutely safe, and besides that thousands of mothers through out the land praise them as the only sure cure for childhood ailments. Con-cerning them Mrs. Edward McDonald, Douglastown, Que., says: "I can highly recommend Baby's Own Tablets to any mother who has a baby suffering from Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

CAROLINE COE'S BEAN SOUP

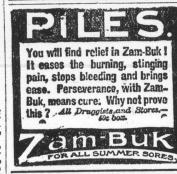

The day before I had served this homely soup I had boiled a tresh beef tongue. I kept the stock, turned it into a dish to cool, cook every bit of fat of the top. To three quarts of stock use twe-thirds of a cup of dry navy beans.

Soak the beans for an hour in clear cold water, then put them into the cold stock. Allow this to set near the fire or on the back of a range, for an hour. When ready to put on the fire, put in tow slices from the middle of the onion. A laurel leaf or sprig of thyme, one tiny pepper pod. Allow all to come to a boil slowly. When boiling reduce gas or gasoline flame or if on stove or range set back to simply simmer for the next few hours. Once in a while you must stir it all up well from the bottom of the kettle. An asbestos mat, price five cents, is most valuable to keep this soup from sticking. Place between kettle and flame.

When ready to serve turn out into a CAROLINE COE'S BEAN SOUP flame.

When ready to serve turn out into a soun strainer. Mash onion and bean

When ready to serve turn out into a soup strainer. Mash onion and beans as much as you can through the strainer. This stock should be reduced to about two quarts. Salt to taste and put back over a slow fire to keep hot. Now take one egg, break into bowl with a pinch of salt, one tablespoon of cold water, a dash of celery salt, one-fourth teaspoon of baking powder and dried bread crumbs enough to make a stiff paste that you can roll into bails. Drop these into boiling soup and allow to boil three minutes and serve.

American Army Has Adopted a New Model.

New Model.

The difference between a straight and curved sword may seem a negligible matter, but it has determined the fate of nations. Therefore, the recent adoption of a new sword model for the United States army, a weapon straight, double-edged, and designed for both cutting and thrusting, is a matter of more than technical interest, more than the hobby of officers charged not infrequently with changing types of weapons with little cause and much fickleness.

The new weapon, a straight-bladed speel, was adopted after the most modern practice of European fighting nations had been carefully studied. The mounted officers and men of the United States army are placed on equal terms with the fighting men of other first-rate powers. For more than fifty years the United States have used a curved saber for its cavalry men, a weapon praised and offense, and ridiculed as fit only to split bacon oper a slow fire.

The controversy is as old as the sword itself. The world has turned again to the straight blade, and the United States is getting in line.

The policy of the United States to maintain only a small standing army, with practically no experienced reserve, was one of the determining factors in changing the shape of the army sword.

When a reoky gets into the saddle his impulse is to use the sword for thrusting. He thrusts instinctively. In time of war the United States to maintain only a small standing army, with practically no experienced reserve, was one of the determining factors in changing the shape of the army sword.

When a reoky gets into the saddle his impulse is to use the sword for thrusting. He thrusts instinctively. In time of war the United States would fight a large part of its land engagements with the untrained recruit. He must have a weapon which he can use handily and without too much training. Later, with experience, he will learn to cut. The straight, two-edged blade is available for both practices; the curved steel is a cutting weapon of twenty centuries. The short sword of Rome was every ear

JANE ADDAMS AS MAYOR.

(Buffalo Times.) One of the first fruits of Suffrage In Illinois is the suggestion of Jane Addams for Mayor of Chicago, sounds funny, we have to laugh when we think o it. But we can't deny a belief that such a consummation would shoot some hop into the swordarm of the Goddess of Justice.

NEW YORK AND CHICAGO. (Detroit Free Press.)

We're afraid a proper comparison of the respective virtues of New York and Chicago would be a goo ddeal like a com-parison of the glories of the hot and cold sections of Milton's hell.

If his stomach be not well filled."

The hot dishes should always be hot and the cold dishes always cold. To have your coffee and salad both luke warm is ruinous, indeed.

Wire Wounds

My mare, a very valuable one, was badly bruised and cut by being caught in a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINI-MENT, diluted at first, then stronger as the sores began to look better, until after three weeks, the sores have healed, and best of all, the hair is growing well, and is NOT WHITE as is most always the case in horse wounds. .

DEATH FOLLOWS SPREADING RAI

Eight Dead, Fifty Injured, in Ottawa Wreck.

WERE IMMIGRANTS

And Their Cars Went Into the River.

Ottawa despatch - Warped and kinked from the heat of a torrid sun or else insecurely fastened after recent repairs, a rail spread on the Canadian Pacific line three miles west of Ottawa this afternoon. The big westbound transcontinental train, No. 5, rushing along at a forty mile struck the obstruction, two cars toppled over an embank ment and into the Ottawa River, and the result of it all was one of the worst of latter-day railway catas-trophies in Canada. Eight people are dead and fifty injured, and a

train load was severely shaken up.
It was the 9.45 morning train from
the Windsor Station, Montreal, which the Windsor Station, Montreal, which figured in the accident. Crowded with tourists and immigrants, more particularly the latter, en route to new homes in the west, the heavy train left the Broad street station, Ottawa, shortly before 2 o'clock. Between Ottawa and its principal summer resort, Britannia, is a fringe of summer villages banking the Ottawa River: one of the newest of them is known as McKellar's Townsite. It was there that the accident happened. At this point the river runs to a little bay and into it two cars of the ill-fated train plunged over, side on, and were half submerged. They were colonist sleepers full of British immigrants.

For the past few days sectionmen have been engaged on the line, laying new ties, and this work involved the subsequent respiking of the rails. Whether this latter work was insecurely done or whether it was simply a kink from the heat is not clearly established. from the heat is not clearly established. Something gave way and death and dis-

FIRST CARS PASSED SAFELY.

The train was running at about 35 miles an hour when the point was reached. The big engine, tender, mail and baggage cans passed over safely, but in doing so evidently displaced the defective rail, with the result that the two colonist cars next in fine buckled and timed over into the water. The and tipped over into the water. The r of the train, comprising the diner and first-class sleepers, was de-railed, twisted and partially smashed, but stayed on the embankment. Like all similar accidents, it hap-

pened in the twinkling of an eye, and without warning. There was a bump-ing and jolting, which threw most of the passengers out of their seats. An instant later the colonist cars went over the embankment, and by breaking the line probably prevented the rear cars from telescoping, with even more disastrous results.

A scene of wild excitement followed.

A scene of wild excitement followed.

The passengers who escaped without serious injury, many of them foreigners, ran about wildly in a state of about fight. ject terror; women screamed and faint ed, while from the overturned and par tially submerged cars came muffled crie of pain and distress and calls for assis tance. The train crew, who escaped with a shaking up, lost no time in going to the rescue and in utilizing the appli-ances for the purpose with which the

train was equipped.

The Ottawa Electric runs nearby, and a gang of men employed by it, along with residents of the scattered suburban villages, got busy with axes, breaking windows and getting as quickly as possible to the work, of rescue. It was accomplished with comparative It was accomplished with comparative expedition. In a few moments the in jured, many of them covered with dirt or water-soaked, were brought out and carried across the field to nearby houses.

AID BROUGHT FROM CITY. A hurry call meanwhile had been sent in for ambulances, automobiles and in for ambulances, automobiles and dectors, and there was a quiels response. Many motor cars became improvised ambulances, and these were utilized in transporting the injured to the city hospitals, three miles distint. Fully twenty doctors, whose services had been requisitioned rendered first aid to the sufferers, and accompanied them to the hospitals. For the greater part those injured are not fatally hurt, and will recover.

While the fact that the cass were partially submerged would have meant death by drowning, the condition of the bodies indicates that, with one excep-tion, the victims were killed outright. There were many exciting and pathetic scenes attendant upon the disaster. In

There were many extiting an parieties seenes attendant upon the disaster. In the terrible impact mothers were separated from their children and distractedly watened the work of the rescuers. Two little ones were among the dead, while a score of others temperarily missing were restored to their reflexed parients. One of them, calling for his mother, was rescued from the shallow water. A Scotch immigrant, feeling the train going over and realizing what had happened, grabbed his wife instinctively, held her aloft till the crash came, and then hoisted her to safety through a broken window. Afterwards he got out himself, and though cut and bruised went to the aid of the others.

Officials of the Railway Commission went immediately to the scene and made a superficial investigation. A more thorough inquiry will take place later.

made a superficial investigation. A more thorough inquiry will take place laster. They expressed doubt as to the real cause of the accident, but held to the view that it was a sun kink or else that the rails were not properly spiked by those who had been making repairs. The former theory is at present more generally accepted, but the coroner's inquest will doubtless establish which was the efficient cause. The Canadian Pacific officials say that the rails had spread because of the heat.

RICH MAN'S BURDEN

Is German Plan for Increased Armament.

Berlin despatch-The Imperial Parlia ment read a second time to-day the derman military contribution bill, whose purpose is to meet the current cost of \$20,000,000 in connection with the inrease of the German army. The meas ure has been greatly changed from the original bill proposed by the Govern-ment, which contemplated a levy on owners of property valued at over owners of property valued at over \$2,500, with an incidental tax on in comes. It now hits persons earning \$1,250 and upwards on a graduated scale

of from 1 to 8 per cent.

The increased armaments of Germany ecording to the Government's financial according to the Government stimates, estimates, will be largely a rich man burden, as \$40,750,000 of the \$250,000 is to be derived from persons with \$250.000 and over, and \$23,250,000 from those with incomes of over \$25,000 per an-

FRIENDSHIP GROWS

Poincare's Strong Speech at Guildhall Banquet.

London, June 30 .- "Today the friend London, June 30.—"I doday the Friendship between the two nations becomes, if possible, strengthened and re-affirmed. Co-operation continues between them which does not exclude the co-operation of any other power, but which tends. on the contrary, to the maintenance of European peace and establishes between Britain and France fraternal confidence

and common good-will."

This was the keynote of the eloquent speech which President Poincare delivered at Guild Hall to-day. It further emphasized the stirring message which Poincare has given to the British nation. The President's visit to the city was a personal triumph. He received a great ovation as he drove through the dense-ly crowded streets. To-night Poincare entertained the King at the French Embassy, the banquet being in every respect French, the valuable plate, decorations, and even the chefs coming from across

WAGES OF SIN

Bible Saying True in Case of Robert Nugent.

Welland, Ont., despatch—Robert Nugent, a farmer who lived at Welland Junction, committed suicide at three o'clock the morning by blowing the top off his head with a shotgum. His act, no doubt, was due to the worry and trouble he has undergone lately. Nugent was arrested recently on a nominal charge, it being claimed that he was the father of an illegitimate child which had been buried in an oat field on his farm. The jury had found Nugent and the child's mother, a domestic employed by him, guilty of criminal negligence which caused death, and he was out on \$4,000 bail, awaiting the decision of the authorities as to the charge to be laid against him. Nugent was \$45 years old, and leaves a brother and an aged and leaves a brother and an aged

New Ontario.

As a result of the department's demonstrations in pruning and spraying, farmers have cleaned up their neglected orchards and made them revenue producers.

From the Provincial nursery in Norfolk 350,000 plants were sent out for Rev. R. E. Knowles, pastor of Knox

FIGHT WITH A BEAR

Frontenac Farmer Had to Use an Axe.

Kingston, June 30.-A. A. Ferguson, who lives near Zealand, in North Frantenac country, has a sensational fight with a large she-bear while on his way through the wods to his cattle ranch. He carried an ax, knowing that bears had been prowling about. On turning around he found himself face to face with the bear, which had silently crept to within three yards of him. Quite a contest followed, of him. Quite a contest followed, Mr. Ferguson weilding his ax and keeping the animal off. His shouts for help brought James Parks to his assistance, and as the latter came up the bear fled. Mr. Parks killed three of its cubs which had taken refuge Bears in that vicinity have been doing a great deal of damage.

J. P. MORGAN ESTATE

Unofficial Estimate Is About \$100,000,000.

New York, June 30.-The whole of the J. P. Morgan estate has a value of about \$100,000,000, according to an unofficial estimate here credited to Thos. E. Rush, counsel to State Comptroller Sohmer, who has been in Europe the past month examining the books of the Morgan houses in London and Paris, to Morgan nouses in London and Paris, to determine the value of the late finan-cier's holdings. The European assets he found to approximate \$15,000,000. If the \$100,000,000 estimate for the

whole estate is correct, it is safe this will be the biggest estate to pay an inheritance tax in America. New York inheritance tax in America. State will be enriched nearly \$4,000,000, it is estimated, by a tax of four per cent. on a greater part of the estate.

FOR THE **FARMERS**

(From Annual Report of Hon. Jas. S. Duff, Minister of Agriculture.) At least 95 per cent. of the O. A. C. students return to the farm.

Over 50 apiary demonstrations were held throughout the province. The fruit experimental farm at Jordan

is making good progress.

The big stock shows at Guelph and Ottawa have shown great advances.
Financial assistance was given to 18 local horse shows and 37 local poultry

An area of 150 acres has been added to the Ontario Agricultural College lands.

Ninety-nine orchards entered the orchard competition conducted by the department.
There are 725 branches of the Wo

men's Institutes, with more than 22,000 members.

A new dairy barn and a field hus bandry building are being added to the

bandry building are being added to cellege equipment.
Ontario's share of the Federal grant to the provinces in aid of agriculture last year was \$175,000.

The Stallion Enrolment Act, adopted by the Legislature at the 1912 ession, was put into effect.

The total attendance at the Ontario

Agricultural College and the Macdonald Institute last year was 1,451. County Boards of Agriculture are

being formed as the result of the suc cess and number of Farmers' Clubs.

New-comers to Ontario through the auspices of the Colonization Branch of the Department last year totalled 10,147.

Twenty-five rural school fairs were held last year in twelve different companying eight to twelve

ture to control blight, and of the use of 20 per cent. solution iron sulphate to check mustard.

With a view to gathering up-to-date and useful information on dairy matters the department is having a survey made of two townships in Eastern, Ontario and two in western, to show modern tendencies and to indicate present needs.

Experiments by the poultry department of the O.A.C. with Buff Orping tons, Rhode Island Reds and White Leg horns showed that buttermilk produced the most and cheapest eggs, while no animal food in all instances gave the

best eggs for hatching.

O. A. C. No., 21 barley, developed at the college from Mandscheuri, is now taking practically all the prizes in competitions, and O. A. C. No. 72 oats, which is now being further experimented with, promises to duplicate the success of O.

A. C. No. 21 barley.

In treatments for loose smut in oats and stinking smut in wheat it was found the greatest yield per acre was produced from grain which was immersed in a sol-ution made by adding one pint of for-malin to 42 gallons of water for a period of 20 minutes of 20 minutes.

Through its fruit branch the depart-Through its fruit branch the department is teaching orchard owners how to prome their trees properly, and showing the farmer that the apple orchard is a valuable part of the farm if properly cared for. Thirty-four demonstration or-

hards were conducted. Important results have been secured Important results nave been secured by members of the Ontario Agricultural College staff with alfalfa, showing that it is essential to grow a hardy strain in Ontario, and one of the best is the Ontario variegated alfalfa which originated

in Haldimand County.
Under the direction of the Agricultu-Under the direction of the Agriculturan Societies Brank of the Ontario Department of Agriculture, 153 societies held field crop competitions, 3,000 indivirual farmers entering, and a total of 30,000 acres was seeded, as compared with 300 acres in 1907, when the competions became tions began.

Demonstrations of the use of electric-Demonstrations of the use of electricity on the farm in different sections of the Province have shown what a labor-saver electricity is, and it is the aim of the Hydro-Electric Commission to deliv-

the Hydro-Electric Commission to deliver it to farmers in the ever-extending electric zone at cost.

The Minister expresses the opinion that the present plan of distributing Federal aid should be made permanent, for to make it effective it is necessary to get as close to the people as possible, and Ontario now has a splendid agricultural organization for this purpose. tural organization for this purpose.

To check the spread of bovine tuber

culosis the College has adopted the Bang culosis the College has adopted the Bang system, by which calves at birth are taken from the mother, fed on milk either pasteurized or from healthy cows, and reared in a separate building, as it is well known that tuberculosis is con-tagious, but not hereditary.

ARGENTINE BEEF

Agriculture Minister's State ment re Meat Trust.

Buenos Ayres, June 30.-Responding to an interpellation by Deputy Ateniro in the Chamber to-day, the Minister of Agriculture made the statement that he had investigated the situation with reference to the meat industry, but was not able to say that a trust existed in Argentina, as opposed to the Anglo-Argentine meat establishment, although

gentine meat establishment, although exportation by American plants established in this country had increased.

He declared that since January, 1912, there existed a combination of all the establishments, some of which, however, had opposed its renewal recently. He added that the managers of the American country that the lowered that the lowered can plants declared that the lowered price of Argentina beef in England was accidental, and averred that there was

The Minister expressed the opinion that to limit exportation would be illegal, and asserted that the alarm was not justified. He said that the British Government had insinuated the desire that Argentina check the beef monopoly, and Argentina asked that Great Britain authorize the import of beef on the hoof after an inspection by an English

official at Argentine ports.

The Minister also urged the organization of a co-operative society among the cattle breeders.

WANT MUCH CUTICLE

To Save Lives of Buffalo Fire Victims.

Buffalo, N. Y., June 30.-Over 10,000 square inches of skin must be given for grafting purposes if the death list of the Husted Elevator explosion and fire is to be kept from reaching far more appalling proportions, according to conservative estimates of physicians in conservative estimates of physicians in attendance on the injured at the various hopitals. To meet this demand, the services of between 200 and 300 volunteers will be required. In individual cases a friend or relative has offered his skin but the Husted catastrophe leaves no alternative but a public appeal, which hospital authorities state will be made soon as the exact conditions are

No more bodies had been recovered from the ruins this morning, and firemen were still pouring water into the wrecked elevator. The debris is piled sixty feet high, and no substantial progress toward the recovery of bodies can be made until the ruins cool and the wreckage is removed.

ECHO OF TITANIC DISASTER.

London, June 30.—In a test case brought in the King's Bench Division by Thomas Ryan, a farmer of Cork, Ireland, against the White Star Steamship Co. to recover damages for the loss of his son in the Titanic disaster of April, 1912, the verdict handed down the following verdict::

"There was no negligence regard ing the lookout on the ship, but there was negligence in not reducing speed.
There is not sufficient evidence to
show if the message from the steam-

REPORT AGAINST FRIEDMANN CURE

Medical Association Committee is Unfavorable.

DOCTORS APPLAUD

London Convention Unanimously Down on Cure.

London, Ont., despatch—Prof. Adami, of Montreal, chairman of the committee delegates by the Canadian Association for the Prevention of Tuberculosis to investigate the alleged curative serum of Dr. Friedrich Franz Friedmann, of Berlin, presented his report here toat the convention of the Canadian Medi-cal Association.

The unqualified condemnation of

the cure contained on the report cause the six nundred physicians in attendance to express their satisfaction, and, while there was no debate, the approval of the distinguished gathering was unmistakably expressed by applause. As explained in the report, the finding was explained in the report, the finding was based on observations of all of the patients treated by the German scientist in Canada, and was awaited with the profoundest interest by members of the medical profession in Canada. The statement follows:

"In order to allay the public excitement, and to afford to the medical profession."

"In order to allay the public-excitement, and to afford to the medical profession and the people of Canada an authoritative statement regarding the value of the Friedmann treatment, the Canadian Association for the Prevention of Tuberculosis nominated a committee of five members to study and remittee of five members to study and re-port upon cases inoculated by Dr. Fried-mann at Montreal, Ottawa, Toronto and London. That committee has added to itself those physicians who have under their observation the cases treated in those cities.

those cities.
RESULT OF SCRUTINY. RESULT OF SCRUTINY.

"The committee thus constituted begs to report that it has carefully studied the case histories of the patients insoculted by Dr. Friedmann. These number attogether 161, namely: For Montreal 55, for Ottawa 10, for Toronto 81, for London 15. for London 15.. As a result of our ob-servations from March 11th to the pres-ent the following conclusions seem justi-

fiable:
"1. The inoculations have neither

"1. The inoculations have neither constantly nor frequently been followed by any marked change in the clinical course of the disease...
"2. The cure or progress towards cure claimed by Dr. Friedmann for his treatment has neither constantly nor even frequently taken place in the time during which these cases have been under observation.

observation.

3. Thus, upon investigation the committee find that the results have been disappointing, and that the claims made that th disappointing, and that the claims maked for this remedy have not been proved, and that nothing has been found to justify any confidence in the remedy."

The report is signed by Prof. J. S. W. Adami, Prof. J. J. Mackenzie, Dr. A. H. Caulfield, Dr. E. S. Harding, Dr. John W. A. H. Rose, Dr. J. W. H. Rose, Dr. J. Caulfield, Dr. E. S. Harding, Dr. John W. S. McCullough, Dr. Wm, H. Ross, Dr. J. H. Elliott, Dr. H. W. Porter. Dr. Chas. Hodgetts, a member of the committee, being averse to making any report whatever. did not sign

being averse to making any report who ever, did not sign. REPORT VENEREAL DISEASE. REPORT VENEREAL DISEASE.

Prof. Fraser Harris, of Winnipeg, presented a report of the sub-committee on venereal diseases. After deploring the prevalence of such diseases, which said the report, probably affected more families than tuberculosi, the report requested all provincial health boards to have the Wasserman test performed have the Wasserman test performe at the request of every member of the medical profession. The report also re-commended that in each province venereal diseases he added to the list of diseases which must be reported to the authorities, and that the association appoint a permanent committee to deal with these matters. The report was adopted and goes to the association for

approval or rejection.

Dr. H. W. Dill, of London Institute of Public Health, declared that there were between 200,000 and 300,000 attacks of infectious diseases in Ontario each year. He stated that each year in the province there were about 45,000 cases of measles, 20,000 of scarlet fever and 36.

Public health legislation in various provinces was then dealt with. Dr. J. provinces was then dealt with. Dr. J. A. Hutchinson, of Montreal, dealt with Quebec; Dr. J. W. McCullough, of Toronto, with Ontario; Saskatchewan, Dr. M. M. Seymour, Regina; Alberta, Dr. S. G. Revell, Edmonton; British Columbia, Dr. C. J. Fegan, Victoria.

Speaking in the section of general medicine, Dr. H. C. Parsons declared "that the only way in which to protect a child which had been subjected to tubercular infection was to have it examined systematically, as was being done in Toronto by a staff of visiting nurses."

By a vote of fourteen to two the pub-

nurses."
By a vote of fourteen to two the public health section decided that doctors should be paid for reporting cases of infectious diseases and births and deaths.

A recommendation was sent along to

A recommendation was sent along to the association by a unanimous vote suggesting a unifying of the public health laws of the various provinces, with the appointment of a committee from the association.

"Nine out of ten people of abnormal mentality are not recognized as such by their physicians, and are treated for something else," said Dr. Lewelly F. Barker, of Baltimore, speaking on "Mental Hygiene."

"Eugenies is getting people born with good brains, and euthenies is providing them with a suitable environment. Some people argue that each is all-important, but I consider they are equally import-ant" tal Hygiene.

SCENE IN PORTUGUESE SENATE. Lisbon, June 30.—A violent scene occurred yesterday in the Senate. Senator Arthur Costa, brother of the Premier, Dr. Alfonso Costa, sterenuously objected to the remarks of Joao Jose DeFreitas, and advanced upon him. Senator days a revolver, and Defreitas drew a revolver and levelled it at the other's breast.

Guild Lawn Social

The Ladies' Guild of Christ's Church scored a distinct triumph with their lawn cocial, held on the Church grounds on Friday evening last. There was present the largest attendance in the history of this annual event and a thoroughly sociable even-

ing was spent. The Toledo Brass Band furnished delightful music, breaking off the staccato notes with precision and swelling out the unison passages in a man-ner to delight the heart of the efficient leader, Mr C. A. Wood.

A bevy of busy ladies served their large number of patrons expeditiously and well, but the hour was late when the rector called the meeting to order and introduced the distinguished speakers. In the absence of several cabinet ministers their speeches (perhaps) were delivered by local men, and their interpretations were intensely in-

teresting and amusing. Altogether, the Guild has every reason to be pleased with the success of
