The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shell contains the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaît sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFATORY NOTE.

The first edition of this catalogue was issued in 1898, under the joint editorship of the Librarians of the Public Library and University Library of Toronto. In this second edition the plan and style of the first edition are followed throughout, except that all reports and other publications of an administrative character, issued by governments of countries, states, provinces, or cities, have been omitted. The accumulation of public documents of the above nature in several of the libraries of the city of Toronto has become so extensive that it has been thought better to exclude them from the present catalogue and reserve them for a supplementary catalogue which will soon be issued.

The individual entries have been verified, as in the case of the first edition, by the Librarians in charge of the various Libraries, and the collation and arrangement of them have been carried out under the direction and supervision of the Editors.

In the first edition the periodicals belonging to the School of Practical Science were indicated by the letter "S". Since the former edition was published, the School of Practical Science has ceased to exist as an independent institution, and its Library is now merged in that of the University of Toronto. The items, therefore, which in the former catalogue appeared with the letter "S" attached to them are now included in those belonging to the University of Toronto. With this exception the number of contributing libraries remains the same as in the former catalogue.
