KITCHENER HAS LET FOR EASTERN ZONE May Mean Turn of Affairs and Advances on All Sides LONDON PAPER SUPPRESSED BECAUSE OF RESIGNATION STORIES

CANADIAN SET ZEPP. SHEDS ON FIRE FROM AIR

Lieut. Mulloch of Naval Flying Corps Performed Brave Exploit

FIRED AT CONSTANTLY

Some of the Shells Burst into Balls of Flame About Machine.

By a Staff Reporter. OTTAWA, Nov. 6.—A thrilling story of the wonderful exploit of a young Canadian aviator, Lieut. Mulloch of Peterboro, who flew to Brussels and did damage to German Zeppelin sheds and aerodrome quarters there is told by Major McKelvey Bell, in a letter received here. He says:

"I saw one of the Canadian flying men, Lieut. Mulloch, of Peterboro, who is attached to the Naval Flying Corps. He had just come back from a flight to Brussels. He started off in a mist and rain and flew over a mile high above the clouds, and he said that every time he came down a little to see where he was the Germans opened fire on him, and fired so accurately that he had great difficulty in dodging the shells. After he had been traveling nearly an hour and a half he came down thru the clouds and below him was a great beautiful city, the most beautiful city he ever saw, with wide streets and splendid buildings. He knew where the Germans had their aerodromes and he made direct for them. It was a large building painted in green and red and yellow, so that from a height it looked like the ground. He swooped down towards it and the Germans opened fire on him with their guns, so that the shells burst all around him. Some of the shells were of a new type, which burst into thousands of little balls of fire at him, he thinks with the idea of setting his aeroplane on fire.

He sailed through them all and dropped a bomb on the building, then made another circle and dropped another one and then he saw that the time bullets were passing him. One bullet went thru the machine but did not hit him. Then he threw out more bombs and turned for home. The Zeppelin shed was on fire by this time. The rain was driving so hard that every time he put his head outside to see where he was, it cut his face and he could not see where he was going. Then again he had only enough of a line left to carry him straight home, and if he made a mistake he would have descended into the German lines. He said that every time he came down a little to see where he was, the Germans met him with machine guns and that was the danger to come down closer than a mile from the earth.

After a long while he came down a little and there was no firing, so he concluded that he must be over France. He turned towards the coast and when he got there found himself almost home. Lieut. Mulloch left Ottawa as a sergeant-major of the 2nd Canadian Brigade with Lieut.-Col. Morrison. There are a lot of Canadian boys in the flying corps and they are very brave and daring and withal are just as modest over their exploits as the Englishmen.

FRESH ATTACK ON LA COURTINE FAILS

German Assault in Vain, Reports French War Office.

PARIS, Nov. 6.—A fresh German attack against the French position at La Courtine has resulted in failure, according to an announcement made this afternoon by the French War Office. The text of the communication follows: "From the Champagne district there was reported last night a fresh German attack against our trenches at the position known as 'La Courtine,' which resulted in complete failure. "During the fighting with mines, which is going on almost without interruption between the Argonne and Meuse, the blowing up this morning of one of our collectors of explosive materials damaged seriously certain German detachments in the sector of Mailcourt. The night passed with relative calm on the remainder of the front."

109th Will Attend Metropolitan Church

Headed by their brass and bugle bands, the 109th Regiment, 700 strong, will parade to the Metropolitan Church today (Sunday). The regiment will first parade at the Pearl street armories at 10 a.m. and then march to the church by way of York, King, Yonge and Queen streets. One hundred cadets will be in line. Rev. W. J. Atkins will preach a special sermon and the regiment's brass band will play the hymns. The men will return to the armories immediately after the service.

SIR HENRY BELLATT'S LUCK.

Sir Henry Bellatt stuck to his steel stocks under many discouragements, and the result is that he will be able to write up a great advance in their values. Everyone on the street is congratulating him on his lucky star still keeping with him.

MINISTER OF FINANCE IN TOWN.

Hon. W. T. White, minister of finance, is in town, partly on business connected with the location of the Canadian war loan. Present indications point to a successful and well organized flotation, generously endorsed by our financial institutions and the general public. The appeal will primarily be to the people on economic grounds, but as an investment it will also be an attractive one from every point of view.

THE MUNITIONS CONTRACTS.

OTTAWA, Nov. 6.—(Special).—The delay in closing the munitions contracts was due to a difference between the commission and the steel companies as to the price of steel to be used in the contracts. It is believed the companies have agreed a little in their quotations and that the contracts will be closed on this figure. A steel company was one to say that a steel mine was in sight and they could easily get more of their product; but eventually they accepted the compromise. The price is lower than on steel and a half cent a pound. The steel mine will be running away and might for a year and more and when he put his head outside to see where he was, it cut his face and he could not see where he was going. Then again he had only enough of a line left to carry him straight home, and if he made a mistake he would have descended into the German lines. He said that every time he came down a little to see where he was, the Germans met him with machine guns and that was the danger to come down closer than a mile from the earth.

A KING'S JOB IN JEOPARDY.

The conduct of the king of Greece in ignoring the voice of the people in the recent vote in parliament, of want of confidence in Premier Zaimis, may cause a revolution in Athens any day, and the installation of Venizelos as the head of a republic and the flight of the king within the German-Bulgarian lines. The people are with the allies and with Venizelos and his party. The Kaiser's job is also in jeopardy; and so is the Sultan's; also that of the Emperor of Bulgaria. In the lines of Bonaparte, "There are crowns to be broken" in the reverse sense, however.

HUNGRY CONQUERORS.

It is significant that all the reports emanating from Germany about the people of that country being on shortened rations and in some places starving, come at a time when Germany is endeavoring to get the United States to feed Poland. The same sort of thing was heard when Germany foisted the task of feeding the people of Belgium—whom by every right it should have fed itself—upon the good-hearted people of the States. German-Americans lead the Belgian relief work. There is no doubt that the steel belt of the allied armies and the British navy is daily squeezing tighter on the sensitive German stomach. Yet it works as if there was some big purpose in letting food starvation stories get out of the country.

EVEN LUXEMBURG CHANGES CABINET

Fever Spreads to Tiny Duchy — Another Ministry Summoned.

PARIS, Nov. 6.—Grand Duchess Marie of Luxembourg today accepted the resignation of the Luxembourgian cabinet and charged Dr. Leutseh, a lawyer, to form another ministry. The resignation was from Geneva to The Paris Temps.

POLICE SEIZE HARMSWORTH'S LONDON GLOBE

Oldest Afternoon Paper in London Suppressed—Plant Taken

HAS INVITED TROUBLE

Reasserted Kitchener Had Resigned—Owned by Northcliffe's Brother.

LONDON, Nov. 6.—The printing plant of The London Globe, together with copies of the issues of yesterday and today, were seized by the police this afternoon.

The following official statement was issued: "This afternoon Chief Inspector Fowler, with other police officers, acting under the authority of Sir Francis Lloyd, K.C., a competent military authority, entered the premises of The Globe and seized all copies of the newspaper for yesterday and today, together with the printing plant and the type."

The Globe had been inviting trouble for some time, virtually daring to take official notice of the disregard of some of the wishes of the official press bureau and of its unrestrained denunciation of members of the cabinet, who incurred by the attack yesterday by The Globe on certain ministers in connection with the administration of the war office, and its positive retention today, that Secretary Kitchener had resigned, notwithstanding official denials, seem to have decided the authorities on the suppression of the paper.

The Globe is controlled by Cecil Harmsworth, brother of Lord Northcliffe. It is the oldest afternoon newspaper in London.

A despatch from London today said The Globe again asserted War Secretary Kitchener had resigned, because of "manoeuvres and machinations." Official denial was made yesterday and again today that the war secretary had resigned. It is possible The Globe in this way may have incurred the displeasure of the London authorities.

Mr. Harmsworth's brother, Lord Northcliffe, has been one of the most bitter critics of the official government and the newspapers The Times and The Mail. The Globe has attacked the policy of the war office.

MORE THAN HALF OF SERBIA CAPTURED

Largest Cities and Most of the Railways in Hands of Invaders.

LONDON, Nov. 6.—With the exception of Belgrade, Nish, reported captured, is the largest city in Serbia. Nish is situated on the main railway of the country, and the capital was transferred from Belgrade to Nish. There the government remained until the city was threatened by the invaders. In the last month various towns have been mentioned as the temporary seat of the government. Nish is situated on the main railway line of Serbia, running from Belgrade to Saloniki. There are no recent statistics of its population, which twenty years ago was 21,000. More than half of Serbia is now in possession of the invaders, who also have taken the greater part of the country's railroad system. The new junction effected between Austria-German and Bulgarian forces reported by Berlin today completes the semi-circular wall of hostile armies about the retreating Serbians.

HIGHLANDERS WILL NOT MARCH IN ON SUNDAY

Citizens who expected to see the 92nd Highland Battalion march into the city Sunday afternoon will be disappointed. The battalion arrived at Port Credit Saturday morning and was to march to Sunnyside Sunday. The soldiers will not be allowed to march today owing to the Sunday observance laws and will come in Monday morning.

Seamen's Hospital Fund Contributions

In regard to the appeal for funds for the Seamen's Hospital at Greenwich which appeared in The World Saturday morning, Major-General Lassard desires to state that the Imperial Bank will receive and forward all subscriptions in aid of this deserving empire-wide work.

Sizing Up the Situation.

President Vandenberg edits, and we imagine, usually writes the excellent business review issued every month by the National City Bank of New York. In sizing up the business situation at the beginning of November he declares there is occasion for "relief, satisfaction and confidence" in the good times or bad times in the United States react so directly upon Canada that it is almost impossible to conceive of one country enjoying prosperity while the other suffers depression. It may be of interest to believe resume his conclusions, based upon business conditions all over the union.

In the south cotton is selling at twelve cents a pound, instead of seven as a year ago. In the west grain is so prodigious in size as to compensate the farmer for lower prices than he got a year ago. The wet weather in the corn states caused a partial failure of the corn crop, but produced great abundance of hay and fodder. In the far west the miners and smelters are rejoicing over enormous demands and high prices for lead, copper, zinc.

The iron and steel business has prospered as never before. The stock market reflects this prosperity, and it is not surprising that new companies are being started. The automobile industry and the manufacturing of war munitions are stimulated to a point of hysteria, but generally speaking, the business of the country is moving along safe and prosperous lines. Railway earnings and bank clearings show large increases. The complaints about idle cars a year ago are replaced by complaints of car shortage, and congestion of traffic. Labor is so fully employed that the problem is not so much to find men for the work rather than work for the men to do. Except that construction work on a large scale is away below normal, and the lumber business is somewhat better than it was a year ago, there is little or no unemployment. The United States recovered more quickly from the great dislocation caused by the outbreak of the war partly because she had better business and currency systems, and the government was able thru the federal reserve banks to finance any war orders that the manufacturers were able to get. But Canada is now coming into the picture and her war orders from the United States recovered more quickly from the great dislocation caused by the outbreak of the war partly because she had better business and currency systems, and the government was able thru the federal reserve banks to finance any war orders that the manufacturers were able to get. But Canada is now coming into the picture and her war orders from the United States recovered more quickly from the great dislocation caused by the outbreak of the war partly because she had better business and currency systems, and the government was able thru the federal reserve banks to finance any war orders that the manufacturers were able to get. ZEPP. BOMB HOLE FIFTEEN FEET WIDE

Demeanor of Canadians During Crashes Was Splendid

KILLED CANADIANS

Officer Describes Disaster in Shorncliffe Camp.

OTTAWA, Ont., Nov. 6.—A vivid description of the Zeppelin air raid on Otterpool Camp, near Shorncliffe, Kent, England, is contained in a letter from an Ottawa officer now with the Canadians in England...

An idea of the terrific force of the Zeppelin bombs can be gained by the fact that the hole left by the explosion is about 15 feet across and anywhere from 4 to 8 feet deep...

One's Heart Jumps and Flutters. "Only a few seconds elapsed, then a blinding flash and a fearful roar sounded just behind our stables, 300 yards away..."

not escape. As quickly as possible I got a few beds together and started for the tent...

Blown to Fragments. "It was awful. One bomb struck the guard tent, and one fell in the horse line. Thirteen men were killed almost instantly and fourteen were wounded..."

"Thursday morning we saw holes left by the bombs. Each left a hole about fifteen feet across, perfectly circular, and from four to eight feet deep..."

WOMAN MUST REST AT LEAST FIVE MINUTES

Professor of Home Economics Says a 'Daily Minimum' Should Be Practiced.

"No matter how busy, a woman should take time to rest five minutes several times a day," said Miss Mary F. Rausch, assistant professor of home economics at the University of Washington...

A long and high English railroad bridge is equipped with automatic wind gauges, which set danger signals against trains should the wind blow at a dangerous velocity.

Events of the Week - - - By Lou Skuce

Humor of the Week. A collection of political and social cartoons. Includes 'SNOW!' showing a man in winter gear, 'WILSON BEGINS CAMPAIGN FOR GREAT ARMY' showing a man with a rifle, 'WAR BIN' showing a man with a bin of money, 'WELL A JOB IN THE BUSH IS WORTH TWO IN YOUR MIND' showing a man with a hat, 'SUFFRAGE DEFEATED 184,000 IN THREE STATES' showing a man with a ballot, and 'GEE THIS IS A TOUGH OLD WORLD' showing a man with a cane.

WAR NEWS SUMMARY

Nish has been captured by the Bulgarians. The Serbian city which has been the national capital during the greater part of the war, fell into the hands of King Ferdinand's forces after three days' fighting... The Greek cabinet situation is still unsettled. King Constantine is reported from Athens to have prevailed upon M. Zaimis to retain the premiership... Field Marshal Kitchener has been entrusted with an important mission to the Near East... German submarines are again active in the Mediterranean, having sunk three ships, two French and one Italian... Any hope which the entente allies may have entertained that the friendly neutrality of Greece might be converted into something more positive in their favor seems to have been dissipated by the latest news from Athens... The Bulgarians are within a short distance of Nish. According to one account, they have actually penetrated the city... The fortunes of war are showing the customary fluctuations along the eastern front. Vienna asserts the Russian thrust along the Stripa has been repulsed completely, 2,000 men being captured.

WHY THE PEOPLE DEMAND Chiropractors. Because they need health and not poison. Because spinal adjustments produce results where medicine and surgery fails. Because Chiropractic is a safe method, both for the infant and the aged. Because Chiropractors adjust the cause and leave nature to remove the effects of disease. Because medical diagnosis is but a guess at the best, according to the highest authorities in medicine. Because the real graduate Chiropractor is an educated man, and thoroughly understands the human body. Because the Chiropractor knows the cause of disease and does not treat symptoms or effects. Because the people are tired of pills, potions and superstitions, and turn with relief to sane and logical methods. Because sanitation and clean food is all that is necessary; doing away with senseless toxic serums. Because Chiropractic science is founded upon natural law and basic principle of cause and effect. For further information consult the following members of the Dominion Chiropractors' Association: D'ARCY AND ADELE McLEAN, D.C.'s—328 Palmerston Boulevard. Telephone College 5984. James, 40 Helena Avenue, Toronto. Veterans of 1866 Association. The members of the above Association are requested to assemble at the corner of St. Clair Avenue and Avenue Road, on Monday, Nov. 8th, at 2:15 o'clock p.m., for the purpose of attending the funeral of our late comrade, Post President Thomas B. Whitelaw, 80 Oriole Road. A full muster is desired. Medals to be worn. JOHN MACDONALD, President. WM. GIBSON, Secretary. CALUMET MINE SHAFT MILE BELOW GROUND. Some Interesting Experiments Made by Faculty of Michigan College of Mines. In reference to the deep mine shafts at Calumet, some experiments conducted by members of the faculty of the Michigan College of Mines are interesting. It had been noticed that in the vertical shafts at the Tamarack mine, if some ore or rock were spilled near the surface, men working in the bottom of the shaft a mile away were not much bothered and sometimes only observed "a little dust." It is stated that a car of broken rock could be dumped into the shaft without injury to a man standing directly underneath a mile down. The reason is that the rock would never reach the bottom, but would lodge in the sides of the shaft on a few inches at intervals; that is, the rock would not fall straight, since these shafts are exactly vertical. In the experiments conducted, two round metal balls were dropped into the centre of the shaft by burning threads by which they were suspended so as to give them no lateral motion. It was tried to catch the balls in a box of clay in the bottom of the shaft; none of them were caught. One ball was never found afterward; the other was found in the east wall of the shaft only a few hundred feet below the surface. The explanation, says The Engineering Record, is that the earth is revolving from west to east, which gave the ball an eastward component in its fall because a particle on the surface of the earth is traveling at a higher rate of speed than one nearer the centre, altho at the same angular velocity. Thus a ball or rock dropped in the shaft will strike the east wall a few hundred feet from the surface, possibly then rebounding several times in 480 drop until it lodges on a timber or on a level. One large land owner of Australia possesses an area of about one-tenth that of England. LIQUOR and Tobacco Habits. AUSTRALIA SETS US GOOD EXAMPLE

Her Loan Subscribed for Almost Three Times Over.

By a Staff Reporter.
OTTAWA, Ont., Nov. 6.---Despatches to the trade and commerce department from Melbourne state that the issue of the first instalment of £5,000,000 of commonwealth 4 1/2 per cent. one-year 20 million war loan issued at par on August 31, proved highly successful. It was announced that the amount was not limited to £5,000,000, but all applications would be accepted in full. The total amount subscribed was £12,350,000 and the total number of applications was 15,697.
Banks, mercantile companies, insurance, trust and savings companies, contributed largely, while there were individual subscriptions as high as £150,000 and

WARSHIP PICKS UP WRECK SURVIVORS

Fort Bragg Founders With 47 Silver and Gold on Board.

SAN DIEGO, Calif., Nov. 6.---The cruiser San Diego was standing by the wrecked coast steamer Fort Bragg off Point Palmita today, ready to take aboard the vessel's 24 passengers and crew of 23, who were believed to be safe on the beach.
The San Diego, with Rear Admiral Winslow aboard, picked up the Fort Bragg's distress signals early yesterday and raced 250 miles to her aid.
All of the Fort Bragg's lifeboats were lost except one. Whether it succeeded in taking ashore the 47 which enabled the passengers and crew to escape by means of a breech-ast buoy, or whether the stricken vessel was close enough to the beach to use its lifeboat is not known.
When the San Diego arrived on the scene last night the passengers and crew could be seen huddled about bonfires on the beach. It was impossible for the cruiser to communicate with them until daylight.
The steamer was believed to be a total loss. In addition to a cargo of merchandise she was thought to be carrying gold and silver from Mexican mines.
GERMANS PROTEST AT RISE IN FOOD PRICES
Socialists Issue Manifesto Denouncing Usurious Practices of Dealers.
BERLIN, Nov. 6.---(By Sayville wireless).---The Socialist party issued today a manifesto against increases in the price of food. The manifesto says that Germany is amply provided with food, and that advances in prices are due merely to curb usurious practices, viewing measures against which are demanded.
The Socialist newspaper Vorwaerts comments favorably on the first measures taken by the government to combat the rise in prices by establishing maximum quotations for various articles of food.

"EVIL AND WICKED" CAMPAIGN APPEALS

Presbyterian Convener Makes Hot Reply to Toronto Pastor.

Rev. Dr. W. J. Clark, convener of the Presbyterian General Assembly's committee on union of that denomination with the Methodists and Congregationalists, was recently called "an innocent vot" and likened to both the covetous King Ahab and despotic Kaiser by Rev. A. B. Winchester, minister of Knox Church, who is a member of the committee fighting the unionist movement.
The convener of the church union committee has issued a reply to Rev. Mr. Winchester, addressed to the Presbyterian membership, in which he takes Rev. Mr. Winchester's committee to task for the kind of literature the opponents of union are circulating.
Dr. Clark quotes as samples the following campaign cries in the opposition pamphlets: "Vote against a creedless church," "Kaiserism in the shape of a settlement committee is not wanted." "The proposed union is a going backwards to attempted unity."
Dr. Clark says: "I say deliberately to circulate thru the church just at the time the vote is being taken statements of that character, with all their false and evil suggestions, is a wicked thing and a shame to all who are responsible for such conduct. I believe they have oversteered the mark. The mass of our people are too intelligent to be fooled by such appeals to passion and prejudice."
"When Mr. Winchester represents the union committee as a tyrannical body affecting the church he writes nonsense."

CANADA'S TOTAL TRADE STILL OVER BILLION

Large Shipments of Coin and Bullion Swelled Aggregate Export Figures.

By a Staff Reporter.
OTTAWA, Nov. 6.---Canada's total trade for the 12 months ending Aug. 31 was \$1,272,995,000, as against \$1,083,908,000 for the corresponding period the year previous. Of this increase, however, \$170,000,000 was in shipments of coin and bullion, so that the trade in merchandise is somewhat less for the latter period. Dutiable imports show the remarkable decline from \$357,000,000 to \$245,000,000, and free imports from \$192,000,000 to \$170,000,000, while the exports increased from \$468,000,000 to \$562,000,000.
The increase in exports of manufactured goods was from \$310,000,000 to \$321,000,000; animal produce, \$61,000,000 to \$83,000,000; forest products, \$42,000,000 to \$45,000,000; and agricultural products declined from \$168,461,000 to \$132,912,000.

COBALT ORE SHIPMENTS

Business Men's League Gets Under Way at T. B. C. Alleys—Hamilton, Orrs', Central and Athenaeum Leagues—Gossip of the Trundlers.

The Business Men's League opened their season at the Toronto Bowling Club as a handicap affair during the past week, and already the innovation is proving its popularity by the intense interest shown by every team having rolled in past two weeks.

In the opening game Monday night two old gladiators met in the person of Boyd Sproule, last season's champion, and J. Curry Co., netter outfit, however, who contain some of the best bowlers in the city.

of the team were somewhat below their true form. However, Capt. Cowdy still has his crew right at the top and it is rumored that he has a strong man to rush into the game next week in an attempt to hold his position.

HAMILTON BOWLING

The third week of bowling of the City Trundlers League at the Hamilton Bowling and Athletic Club found the bowlers rounding up in the scores.

PRESIDENT TENER DEFINES POLICY

Tells Just What His League Thinks of Jim Gilmore's Circuit.

By W. A. Collins. NEW YORK, November 6.—In view of many conflicting stories concerning the National League's policy, since the confab with the Feds at the Bellevue-Stratford, Philadelphia, President John K. Tener said that he desired to make several points clear. He declared that the National League men never would consent to recognize the Federal League as a third major circuit; that the Feds never would be permitted to take part in the world's series and that the National League's membership would not be increased to ten clubs. President Tener refused to discuss the plan to permit certain Federal League backsliders to purchase stock in one or more National League clubs, but he would not deny that informal negotiations with that end in view were under way.

DARCY BEST MIDDLEWEIGHT SINCE KETCHEL HELD TITLE

Australian Fighter Shows Cleverness, But Seems to Lack the Wallop—Coming Fast.

(By Iconoclast.) NEW YORK, Nov. 6.—Altho Les Darcy, the Australian sensation, defeated Jimmy Clabby in their recent bout, he did not prove himself to be another Stanley Ketchel. Clabby was still on his feet at the end of the twenty rounds, which indicates that Darcy is not such a remarkable hitter despite his knockout of Eddie McGoorty. But that Darcy was able to win the decision proves that he is no false alarm. Clabby is an experienced veteran, and the cleverest and best ring general of the middleweights who are not afraid to fight twenty rounds. Australians have a great admiration for his style of boxing, and Darcy must have displayed very good form in order to have gained the verdict. The match was announced as being for the middleweight championship of the world and in the eyes of his admiring fellow countrymen at least, world's series. If the Feds decide to begin another season in 1916 under existing conditions, nobody can stop them. But you can rest assured that they can do no further harm to organized baseball.

Darcy is supreme in that division Americans, of course, will not accept him until he has disposed of Mike Gibbons, Young Ahearn and Al McCoy. On the form he has shown Darcy should prove equal to the task. He has now defeated McGoorty, Clabby and Jeff Smith, all of whom were seasoned ringmen accustomed to fighting twenty rounds.

Having accomplished that much Darcy should be equally successful in disposing of the other three, provided he can lure them into twenty round battles. It is very doubtful whether Gibbons is capable of maintaining his form over ten rounds, and it is probable that he will never care to dispute the honors with the Australian in anything more decisive than a ten-round skirmish.

Young Ahearn now appears to be the most likely to check Darcy's march to the title, and his chances are higher than those of Gibbons. Ahearn's delicate chin makes him a poor risk in a long battle, for at some time he is sure to be punished more or less. According to his present plans, Darcy will come to America as soon as he has gained the verdict for the second time. After that there will be nothing for him to do in Australia, but there will be a wide field for him over here.

The merry gossip mongers have dug up another angle to the impending baseball war between the Feds and the O. B. forces. It is being said around the New York baseball headquarters that Harry N. Sinclair, owner of the Newark Reds, is to be offered a chunk of Giant stock in the National League. This would be the first big step toward peace, for the reason that the Giants could play Sunday ball at Sinclair's Newark grounds. Charles Weegham, the latest rumor says, will be taken in the loving arms of the Chicago Cubs, and that will end the dread strike in Chicago.

All along the line the proposition is to take Fed leaders into the American and National Leagues. Naturally, the men behind the big desks in baseball quarters deny any and all rumors of this sort. Johnson and Jim Gilmore still insist that there will be no peace. Gilmore repeats again and again that there is plenty of room for the third league.

I'M NOT LOOKING AHEAD FOR TROUBLE

"We Shall See What We Shall See" Says Censor Banks.

BARE-KNEED SHOWS

Foundation of Art and Appeal of Chorus Girl Revealed.

BY D. K. Billings. THIS matter, ladies is altogether too serious for our consideration. It must be referred to a higher tribunal. It deals with a state of affairs that directly affects the solitariness of the nation. On its successful solution depends the future of the home. The entire reorganization of the chorus girls' organization may be resultant upon our failure to deal with this all important problem immediately and with a firm hand. What are we to do? We must lose our grip on our men, they will no longer obey us. We might just as well throw up the sponge unless we can "take a can" once and for all upon these outrageous exhibitions which have so enervated our business.

The speaker sat down, wiped a regular flood of indignation perspiration from his heated brow, stamped and lapsed into silence, the first for an hour. The question had been under consideration thru a long session of the Society for the Proper Control of Masculine Exuberances, and the foregoing remarks were made as a grand climax to an evening of indignant protest. The topic under consideration was the advent of the "Bare-kneed show." The state of affairs had become desperate. Never before had apparently so feeble a man become so utterly unmanageable. Instances were related of previously trustworthy and unimpeachable helpmates deserting their hearths for a whole lot of "Bare-kneed shows." The speaker, however, was not to be deterred. He had brought back word of these same wild pates and rosy faces tucked snugly against the neck of a woman in the front row, absorbing with bulging eyes one of these latest home-wrecking and terrible catastrophes. And where is the remedy? The speaker appeared to be unanimously accepted. An appeal must be made to the law.

Of course, the Society for the Proper Control, etc., have no provincial restrictions. The meeting reported above, but they exist, and their feelings, for the sake of peace, and the safety of the nation, let us see what legs THEY would stand on should they decide to appeal to the strong arm of man-made laws for banishment of the "Bare-kneed shows." The Newest Thing. Barelegged shows are the latest development of the theatrical. They have sneaked in upon us very gradually and have now reached a very nice state of perfection, especially in that haven of the pleasure seeker, the New York Winter Garden. One in a while they are visited by a production from this same playhouse and, to that extent, this question is raised. What is the question? Well, Toronto now that one is almost dead.

At any rate, there are undoubtedly certain well defined limitations placed upon the extent to which they may meagre plots may lay bare their characters. In Gotham this has been a topic for some considerable time and is yet far from settlement. Certain well known journals, considering that the welfare of the community at heart, most strongly resented this displacement of plot for an exhibition of the legs and did not waste many words in telling the producers and public just what they thought, with the result that the advertising managers of the papers in question were soon given a blue paper cancelling all advertising contracts. On the other hand the new order of things had its warm supporters, and the development was declared to be the greatest forward step in the history of Broadway theatricals.

What Censor Says. Such a show is "over the heads" of a Toronto audience, it is said to be. Such is the idea of the runway, but we do not doubt the ability of Censor Banks with any such examples in a manner quite satisfactory. Listen to what he has to say. "I am not looking for trouble, when worn by either sex, has been declared perfectly proper, even when not ornamented by pink or green tights, I am not able to declare on the legality of bare limbs. My decision must depend entirely upon circumstances and, if necessary, I may even refer to the higher authority of a police magistrate or prosecuting attorney. Also, in view of the fact that quite recently barefooted searchers for health among rovelty, aristocracy, and other leaders of custom and fashion have been going out early in the morning in various forms of Grecian and other classical garb, to travel over the grass to wash their feet in the dew the censor might have to consider questions of health, and in that case would be required to call in the medical health officer. Of course, the M. H. O. fully appreciates that while these fair damasels are among we are partly responsible for their health and must allow them to run undue chances of catching pneumonia or other dangerous ailments. "This is a cold country. The general tendency, however, seems to be rather toward increased than decreased attire on the stage," he concluded.

Emphasizing the Quality Element in Overcoats

QUALITY in your Overcoat is important—it's the prime consideration in the overcoats we sell—quality throughout—in fabrics, tailoring, styling, everything.

QUALITY is what makes the style enduring, the fabrics long-lived, the fit permanent—you get it in all our overcoats and you'll find most unusual assortments and values in the overcoats.

Hickey's CLOTHES BY YUNGE STREET HABERDASHERY

WILLIE RITCHIE A GONE GOOSE BECOMING MIDDLEWEIGHT FAST

Freddie Welsh Has Cause of a Laugh—Freddie, the Wise, Never Overlooks a Bet—Lewis Is Causing a Stir—Sporting Gossip.

By Igoe. NEW YORK, Nov. 6.—Willie Ritchie, as a lightweight, is a thing decidedly of the past. He met Johnny Dundee at the Garden the other night, and the "American Light-weight champion" came in weighing over 141 pounds. He was as lean as a greynouth at that, not an ounce of fat showing about him anywhere. Freddie Welsh, the man who took Ritchie's title, sat at the ringside and smiled a nice broad smile when the weight was announced. If Freddie ever had any fear of meeting Willie again all that terror has been eliminated, for Welsh would only have to remark that he would be a lion to risk his title against the challenging welterweight.

That's just what Willie is today, and he won't be that very long. Willie is on the high road to the middleweight division, and no amount of hard training can keep him out of the famous Dempsey camp. Dundee made the fast Ritchie look slow by comparison. The speedy Italian went down Willie in a cooper around a barrel. Willie couldn't set for his useful right, and when the score was posted Willie was a sad loser. Just now there are but three or four men who make the lightweight limit. Dundee can come in at 28 or 30, a little fellow, and Ted Lewis, the English crack, is a remarkable weight freak. He weighs something like 142 in Philadelphia one week, and then hopped to Boston the next and made 185 for Joe Mandot, Jack Britton can make 185 easily, and so can Freddie Welsh, who seldom takes the trouble to weigh any more. If Freddie signs for a fight where the weight will be a source of worry. That is his privilege, since he is the commander of the food ship.

One thing about Welsh that few know is that he never signs for a fight unless it is expressly stated that no decision on a foul shall take his title away from him. Harry Pollock, Freddie's manager, sees to it that Welsh will not be served as Kid Williams was, whether Williams was at New York or Erie, by the way, is in New York trying to get on at Madison Square Garden just to show the world that he is a real champion. He certainly looks like one. He looks like a pocket edition of a wrestler.

Ted Lewis is cutting up high and lefty capers among the lightweight and the night he knocked Jim Coffey out in Madison Square Garden there was many a sailor perched up under the great rafters rooting for the sad, old crowd. "I'm for the boys in the blue" said Frank the other day. "I used to be an expert at wig-wagging when I was in the Mayflower, and several of the signs in the present naval code were invented by me. One night I went in to a big Pittsburg hotel for a bite to eat. Sitting on the opposite side of the dining room were two remarkably pretty girls, one of whom I began to wig-wag him for a little information about the spare blonde. I learned all about that woman from him, and when I turned and told my manager who she was, where she lived, how much money her parents had and so on, he nearly fainted. Believe me, the old signal code is a mighty handy thing to know. I went to the movies the other night and they showed an old vet who

YOUR TAG READY ONE OF 350,000

Captains of Three Thousand "Recruiting Day" Workers Armed

KEEP TORONTO AHEAD

Recruiting Day tags to the number of 350,000 were Saturday supplied to the captains who will take part in the big campaign of the Citizens' Recruiting League on Tuesday next, Khaki Day and Memorial Day for the late King Edward VII. Almost three thousand Toronto women and girls are assisting in the effort to "Keep Toronto Ahead" in her place as foremost recruiting centre of the Dominion, and the organizer, Mrs. G. R. Baker, has mapped out the plan of campaign in a military manner as possible.

For Tag Day Toronto has been divided into 42 districts, with a captain over each. Under each captain are five lieutenants, and each lieutenant in charge of one automobile and ten privates, who go out to the firing line laden with ammunition trays and money boxes.

"Keep Toronto Ahead" Officers attached already to overseas battalions are helping the recruiting and recruiting depot, who must carry on at home, and will be here on Tuesday to help. They are providing four teams and at least fifty officers will be among the workers. Streamers which "Keep Toronto Ahead" have been provided for the backs of the cars, and large shields, replicas of the little tags will decorate the cars.

The men's teams, under Mr. E. E. Fetherstonhaugh, will meet early on Monday morning before the Royal Bank on King street, and will spend the day canvassing the business portions of the city.

"We're giving the men who can't go a chance to do their share," said one of them today.

The downtown part of the city has been divided into sections, each team of men taking so many blocks instead of just canvassing so many addresses, as was done formerly. When the day's work is over they will report to the bank, and on Tuesday at 5 o'clock they will report at headquarters, the city hall, when all the captains of the ladies' tagging teams bring their boxes in.

Forty Tanners to Count Money.

City banks have provided forty tellers who will commence operations at 5 and expect to have all returns in and checked by 6 o'clock today. They announce the total to the audience at the Empire Club patriotic demonstration in Massey Hall.

Members of the captains with their workmen were held Saturday afternoon, when the boxes were distributed and final instructions given. Two captains whose names did not appear on the first list published are Mrs. G. Reynolds and Mrs. C. A. Simmons.

While the route of the big parade has not been finally decided upon, it is tentatively given as starting from Exhibition camp, going north on Dufferin to King, to Jarvis, to Wellesley, to St. Alban's and to Queen's Park, down the east side to front of the Parliament buildings, down University avenue to Queen and west on Queen to Dufferin to the camp. The 9th Battalion, newly formed, under Lieut.-Col. R. K. Barker, will also march and the estimated parade strength is ten thousand.

Your Last Year's OVERCOAT MADE TO LOOK LIKE NEW

We will put on a new velvet collar, clean and press your coat, and it will look like new.

WILL FLY FROM TORONTO TO N. Y.

Victor Carlstrom to Attempt Unusually Long Flight Alone

DISTANCE 360 MILES

If Successful, Trip Will Top American Record by 200 Miles.

Flying alone in an 80-horse power machine, Victor Carlstrom will carry 15 gallons of gasoline, enough for eight hours, and will land at Governor's Island. If successful in getting to New York it is not likely that he will essay the flight back.

"The flight," said J. A. P. McCurdy, of the Curtiss School at Long Branch, and the machine he will use is an R2, a type supplied in big quantities to the two British air services, and made in Canada, except for the engine. The aeroplane has a spread of 40 feet and 170 horsepower, and especially equipped for long distance work. He will carry 15 gallons of gasoline, enough for eight hours, and will land at Governor's Island. If successful in getting to New York it is not likely that he will essay the flight back.

SUB BLOCKADE OF ENGLAND DROPPED

Germans Will Use Remaining Ships in Mediterranean

SINK SEVERAL SHIPS

British Methods of Defeating Submarines Too Effective.

PARIS, Nov. 6, 12.30 p.m.—The Straits of Gibraltar have again been passed by German submarines, which on Thursday sank two French and one Italian steamships. The crew of one vessel is missing.

The following statement was made by the marine ministry today:

"The enemy's submarines, coming from the Atlantic, passed through the Straits of Gibraltar on the night of Nov. 2. They sank on Nov. 4 the French ship Dahra, off Arzew, Algeria, and the French ship Calvados and the Italian ship Jomo, near Cape Ivi.

"The crews of the Dahra and Jomo were saved. There is no news from the crew of the Calvados."

The sinking of the Jomo was reported from London last night. The Dahra, 2127 tons gross, sailed from Port Talbot, Wales, on Oct. 7 for Tunis. The Calvados is not mentioned in maritime records.

German submarines have penetrated the Straits of Gibraltar previously during the war. This was first accomplished successfully when Captain Bleswing made his now famous trip with the U-51 from Germany to the Dardanelles last spring. In September a number of merchantmen and transports were sunk in the Mediterranean by submarines, but recently little has been heard of their activities.

News of the presence of a number of German submarines in the Mediterranean bears out information received from a private source recently. It was the effect that Germany had decided to send most of her submarines to the Mediterranean, having virtually abandoned her campaign in British waters in consequence of the engagements she had entered into with the United States.

This disclosure is said to have been made in the form of an announcement by the German minister at Bucharest, Roumania.

In England, however, the suggestion has been advanced that Germany's abandonment of her submarine campaign in English waters was due to the effective measures adopted by the British and the large number of German submarines reported to have been destroyed. Activities of submarines in the Mediterranean, according to this theory, are designed to divert attention from the ending of the campaign near the British Isles, as well as to impress the Balkan States.

ALGIERS, Nov. 6, via Paris.—The steamer Sidi Ferruch was sunk yesterday forty miles off this port by a German submarine. The steamer's crew of 28 men arrived today at Algiers. The Sidi Ferruch carried no passengers.

COLORED INSTITUTE SUFFERS FROM TIMES

War Has Seriously Affected the School and Washington Calls for Northern Help.

"The most trying and difficult experience that which the south has been called on to pass since the civil war," according to Dr. Booker T. Washington in his annual report of the Tuskegee Institute, "have made the last year exceptionally hard for the school, and promise a harder year to come. The budget for the ensuing year is placed at \$293,567, and, although the endowment has grown to almost \$2,000,000, \$100,000 of this must be raised from outside sources."

With the report is published a statement by Seth Low, chairman of the board of trustees, estimating that the annual difference between the expenses of the institute and its assured income is likely to be \$150,000, and urging that some steps be taken to relieve Dr. Washington of the heavy burden of providing for this deficit.

"I would call attention," says Dr. Washington, "to the fact that next year will be the end of a five-year period for which a number of trustees and friends made a definite promise to give a certain sum of money each year. We shall have to begin now to consider some method of replacing these donations. The relief which has come to us because of this guarantee fund has been most marked and far-reaching. This means that our present endowment ought to be increased greatly or a larger income assured by some other source."

"Conditions due to the low price of cotton resulting from the European war have been very serious among both white and black people. Because of these conditions, this institute has been doing an unusual amount of work and expending an unusual amount of money in trying to teach these people how to overcome them by planting something to eat."

NO FRIENDS IN ONE QUARTER.

Ambassador Kajetan Merye von Kapos Merye may be a better diplomat than Dumba, but he will never be as popular with the headline writers.

WANTS SPECIAL TAX ON UNMARRIED MEN

Ald. John H. Hodgson of Hamilton to Bring Up Proposal Monday.

FIFTY CENTS WEEKLY

HAMILTON, Sunday, Nov. 7.—Ald. H. Hodgson said today that he has no intention of abandoning his scheme of a general tax on unmarried men. Stress of business has prevented him giving adequate attention, but on Monday he intends taking steps to bring the suggestion to a head, a special meeting of the council being probable.

"Since I made the suggestion a number of young men have told me that they think it is just what is needed. Various manufacturers have also informed me that they will line up their men in the suggestion," he said Saturday.

Ald. Hodgson's scheme calls for a special tax of 25 cents, or 50 cents can afford to give this much. Single men, he says, are contributing very little towards the general expenses of the war but Ald. Hodgson's suggestion would compel them to help. He plans to have it taken up through the Dominion.

SOME OF STRIKERS RETURN TO WORK

Hydro-Electric Employees Believed to Be Wavering in Stand

NO REPLY YET MADE

Manager Couzens Has Not Answered Affidavit of Union Men.

Information given out at the offices of the Toronto Hydro-Electric system Saturday was to the effect that some of the strikers have returned to their jobs and the officials believe that the men are wavering. Many of the men have refused to strike.

No reply has been made by General Manager Couzens to the affidavits, in which he is said to have expressed surprise that men whose jobs he saved until all the strikers returned.

The system is being operated satisfactorily, and no complaints have been received so far.

Speaking in regard to the situation, E. W. Ellis, chairman of the commission, stated Saturday that there was no need for a strike at the present time, as the wages were not affected until next May.

RETURNED SOLDIERS COMMITTEE.

REGINA, Sask., Nov. 6.—The Saskatchewan committee appointed to act with the federal commission for the care of returned soldiers consists of Judge Elmwood, Regina, chairman; Mayor Balfour, Regina; Mayor Pascoe, Moose Jaw; Mayor Morrison, Saskatoon; and ex-Mayor J. W. Smith, Regina.

STOPS FALLING HAIR

This Home-Made Mixture Stops Dandruff and Falling Hair and Aids its Growth.

To a half-pint of water add:

Bay Rum 1 oz.

Oleic Compound a small box

Glycerine 1/2 oz.

These are all simple ingredients that you can buy from any druggist at very little cost, and mix them yourself.

Apply to the scalp once a day for two weeks, then once every other week until all the dandruff is gone. A half pint should be enough to rid the head of dandruff and kill the dandruff germ. It stops the hair from falling out, and relieves itching and scalp diseases.

Although it is not a dye, it acts upon the hair roots and will darken streaked, faded, gray hair in ten or fifteen days. It promotes the growth of the hair and makes harsh hair soft and glossy.

BRITISH TRADE RETURNS SHOW BIG INCREASES

Imports in October Jumped Eighty-Two Million Dollars—Exports Also Greater.

LONDON, Nov. 6.—The board of trade figures for October show an increase in imports of £2,413,000 (\$2,065,000). Exports increased £3,387,000 (\$16,335,000). The principal increases in imports were: Food, £2,000,000; chemicals and drugs, £1,000,000; raw materials, £8,000,000, of which cotton from America contributed £2,000,000. The principal increases in exports were in iron, steel and textile manufactures.

Stuart's Calcium Wafers Make Your Face Clean and Radiant in a Few Days. Trial Package Mailed FREE.

No need for anyone to go about any longer with a face covered with pimples, blotches, eruptions, blackheads and liver spots. These are all due to impurities in the blood.

Free Trial Coupon. P. A. Stuart Co., 310 Stuart Bldg., Marshall, Mich. I send me at once, by return mail, a free trial package of Stuart's Calcium Wafers.

LARGEST COLONY OF STRAFERS IN ENGLAND IS 4000

Alexandra Palace, Famous for Boxing Bouts, Houses Aliens - Most Are Glad They're Intered.

By W. B. Thompson. The largest German colony in England is to be found at Alexandra Palace, that home of pleasure in peace time which people all over the country know because of the annual boxing competitions for amateurs that are held there.

Captives Look Cheerful

Thrills are occasionally provided by the arrival of contingents of aliens driven up to the camp by motor-buses specially provided for the purpose. As a rule, they look quite cheerful and by no means distressed at the prospect of captivity.

It is curious how very few people outside those living in the neighborhood are aware of the existence of Alexandra Palace as now applied for at all hours of the day holiday-makers ask the sentries whether they can be allowed in, and seem surprised when met with a refusal.

From the outside there is nothing to be seen of the camp or of the existing guards on duty at the various entrances; and inside, according to those who have been permitted to reach them after a rigorous examination, to prove their inoffensive character, the prisoners may write home and receive letters from their relatives.

Confinement Made Easy

The men are allowed to amuse themselves in a variety of ways and the monotony of confinement, true to British humanitarian instincts, is made as little irksome as possible. Parcels from friends are permitted to reach them after a rigorous examination, to prove their inoffensive character, and the prisoners may write home and receive letters from their relatives.

DEFENCE OF CORPORAL PUNISHMENT.

We have no controversy with parents who hold that it is wrong to spank a kid, but our observation is that the spanked kid is more successful in becoming a grown-up who will stand hitched.

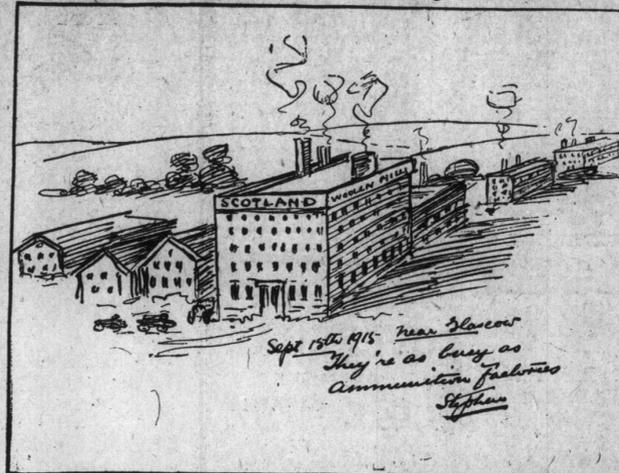

How to Save Your Eyes

Try This Free Prescription

Do your eyes give you trouble? Do you already wear eyeglasses or spectacles? Thousands of people wear these "windows" who might easily dispense with them. You may be one of these.

BUSY AS AMMUNITION PLANT

Notice what our correspondent has written under this sketch of the Mills: "They are as busy as ammunition factories." Every mill in Scotland is working overtime to supply the soldiers with clothing and trying to keep up with a deluge of orders for the civilian population.

Sept 15th 1915 near Glasgow They're as busy as Ammunition factories

Although the pressure is great there has been no falling off in the quality of the material produced by the Mills. You can realize that by visiting our showrooms and looking at the new shipments recently arrived from the old land.

There is no shortage of hands in the factory, for the Government sees to it that the skilled weavers are not disturbed. Their work is as necessary as the millers in times of war.

Its new weaves and better weaves that we're showing today. Not only exclusive patterns, but something that has a foundation of the best of selected wool.

Made-to-Order Suit or Overcoat

Let us point out again that you are saving all the middleman's profits when you deal with the Scotland Woolen Mills Company; that you are getting absolutely the highest quality of cloth produced, that you are getting the finest workmanship we are able to buy; and that you are protected by our guarantee that if you are not satisfied we will cheerfully refund you any money you have paid.

Out of Town Men: We are anxious to see you well pleased with a suit of clothes or an overcoat as you are. By having you satisfied we know that you will come again and that is the reason we go out of our way to be more than particular plates and book of samples.

Scotland Woolen Mills Co. Limited YONGE STREET ARCADE BUILDING

Marie, Port Hope, Acton West, Brighton, Belleville, Campbellford, Brockville, Peterboro, Kingston, Ottawa, Detroit, Mich., Akron, Ohio; Youngstown, Ohio, and Havana, Cuba.

VATICAN TURNS DOWN OLD WAR TIME RULE

Italian Wounded Soldiers Handed Over to Military Authorities When They Enter Palace.

The Hospice of Santa Marta, an annex of the Apostolic Palaces of the Vatican, has been converted into a hospital for wounded soldiers. This great building on the left of St. Peter's, originally intended as the residence of pilgrims, since 1870, remained deserted until during the Messina earthquake, Pius X converted it into a hospital for wounded survivors, and the present Pope followed his example during the Avezzano earthquake.

The wounded Italian soldiers. The fact that an annex of the Apostolic Palaces is used as a hospital for Italian soldiers is sufficiently significant in itself and undoubtedly affords an indication of the improved relations between the Holy See and the Italian Government, but it does not follow that Benedict XV, in visiting his guests has renounced the so-called "imprisonment in the Vatican."

FRANCE WAS FIRST TO INSTALL MOTORS At Very Outbreak of Hostilities, French General Staff Seized Five Hundred Paris Cars.

general staff seized 500 Paris motor buses and sent them off, packed with soldiers, to the Belgian frontier, and 1000 other motor transports similarly improvised, followed next day.

BALD SPOTS SOMEWHAT LARGER There are new ways of wearing hair this season, but the way of wearing no hair remains about the same.

WEEK'S SUMMARY OF THE WAR

By W. H. Stewart

By W. H. Stewart.
Confession of failure so far in attempts to force the Dardanelles was made in the speech of Mr. Asquith on the progress of the war the other day and ammunition was furnished thereby to the critics. But here is the way to look at the Dardanelles expedition. It is comparable to a mercantile undertaking in which a business man sets out to make a profit in a definite enterprise. The profit aimed at is say, half a million dollars, but he is slow in realizing the profit he sets out to make. In the meantime he puts himself in the way of earning a quarter of a million dollars or more in another direction. He is not to be faulted for embarking on the first enterprise. You cannot then truthfully say that the whole of the originally undertaken should not have been entered upon, for in that case you would not have the quarter of a million or so that you have on the side. The analogy is plain. The direct attack on the Turkish imperial centre forced the Turks to keep the bulk of their armies pretty close to their capital, while a small British force was able to proceed up the Tigris and the Euphrates to clear a district extremely rich in petroleum deposits of the enemy. That expedition is now close to Bagdad. Of that city, Sir Thomas Holdich says, "Constantinople is now but a frontier town and Bagdad, which has never parted with its halo of special sanctity in the eyes of the Asiatic Moslems, is of rising importance as a possible future capital should Constantinople be lost to Islam."

The Germans have just awakened to the fact that while they have been assisting Turkey to guard her front door, the second best and chief Asiatic city of Turkey is about to be taken from the Moslem. The occupying of this city would have much to recommend it to the Moslem population of India, because nearer Hindostan than the occupation of Constantinople. The Germans speak of the sending of reinforcements to Mesopotamia and Bagdad, but Bagdad is as far from Constantinople for military purposes as is Bombay. At least 1500 miles of indifferent communications exist between the two cities, passing by mountains, rivers and plains and encountering serious obstacles over the greater part of this distance. From Constantinople the railway service may be accepted now as complete for military purposes for 500 miles, says Sir Thomas as far as the foot of the Taurus mountains. Here tunnel driving has hardly commenced. Such a road may be looked for months by now.

Other Fruits of Expedition.
The saving of the Suez Canal from attack, the permitting of the Russians to hold the Caucasus, with a minimum number of troops, and also some of the fruits of the Dardanelles expedition. Russia's announcement that she knew of Bulgaria's accord with Germany a year ago, also disposes of the notion that diplomacy could have prevented Bulgaria going to war. Knowing this, it is evident that the Allies forced Bulgaria to show her hand at an opportune moment for them and the future in the Balkans may be awaited with a reasonable degree of confidence.

Serbian Campaign.
From a military view, the Serbian campaign is notable in relation to the whole war in that the enemy, for the time being at any rate, has been checked on every front in the major theatres and is only on the offensive in the Balkans, where he is being aided by the Austro-Germans. He has concentrated in this new theatre every ounce of his surplus strength and yet with the help of the Bulgarians he has been able to advance somewhat less than twenty-five miles on a front of eighty miles in the course of a month's campaigning. It is almost indisputable that without the assistance of the Bulgarians he would have already been defeated in this adventure. The causes of the enemy's ability to advance at all are soon told. He has massed a superior force of artillery and he has a supply of big gun ammunition superior to that of the British. He sets down before the Serb trenches, pounds them to pieces with his big guns, for the Serbians have an insufficient number to subdue the hostile bombardment, and then his infantry advances more or less successfully to occupy the trenches which have been made untenable for their defenders. As the artillery part of the advance is a fairly constant factor, the reason for the slowness of his progress must be attributed to the inferiority of his infantry to what it was last May, when it embarked on

the Galician campaign, when the Germans were able to advance at the rate of five or six miles a day. An advance of one mile a day against the Serbians army is about the best that the enemy now can do. Although outnumbered and attacked in front, side and rear, the Serbians are putting up a gallant resistance, and it is said can hold out a month longer in the mountains. Although standing at bay, the Serbians can still deal some hard blows as evidenced by their checking of the Bulgarian army that was advancing from Pirot, and forcing it to retreat. In addition, they are said to have skillfully extricated their army from the trap that the Germans, Austrians, Bulgarians, in their slow and dull way were endeavoring to throw around them.

Two Objects of Enemy.
The enemy has two objects, firstly and foremost, the destruction of the Serbian army, which was always a menace to his flank at a critical time in the war, and secondly, the succoring of the Turks by seizing the line of the Belgrade, Nish, Sofia, Adrianople, Constantinople railways. It is this railway that he would secure by his advance in northern Serbia in conjunction with the Bulgarians. But, as it happens, the railway above Nish is quite easy to destroy in the gorge of Niava, where there are several short tunnels, according to Sir Thomas. The walls are sheer, and the track is, in many places, hewn out of the rock. A very considerable delay can therefore be inflicted on the enemy's use of the line here, should he capture it, by judiciously placing blasting charges in this sector.

Gained Danube Route.
The enemy's plans to gain the Danube route have succeeded. All he had to do was to clear the Serbians out of a little district in the northeast corner of their country, about the size of a large Ontario township. This was done in conjunction with the Bulgars, but no difficult matter for him to do. But the Danube route, which involves transportation at Rusehuk, is vulnerable from an attack from the Black Sea or the Aegean. The most important route is the all-rail, as mentioned above. Attacked on two and partly on three sides, in a military sense, the Serbians will have to abandon the sector from Nish to Belgrade, and leave a strip of their western frontier in the hands of the enemy, unless some unknown factor intervenes.

Second Great Factor.
The second great factor of the campaign is the presence of an Anglo-French force in southern Serbia, which is slowly pushing its way northward as reinforcements continue to arrive by way of Saloniki. This new army occupied the town of Strumitza some days ago, and defeated a Bulgarian force which was the main force of the town, and is said to have defeated the Bulgarians with heavy losses. In regard to Strumitza, it is probable that it was the railway station of that town, and not the town itself that was occupied. The allies have seized the heights around this centre, and have driven off a force of the enemy. Once a sufficient force of men and guns has been collected, it is obvious that a direct advance on Sofia, which is only seventy or eighty miles away, would force the Bulgarians to conform to the wishes of the allies, and such an advance would relax the pressure on northern Serbia. The Bulgarians would have to withdraw their force to meet this new menace and not dare to push on and leave the main Serbian army on their flank. It was the presence of such a body on the Russian flank that held up the Russian advance at Pleven nearly four decades ago. A direct advance on Sofia would also threaten the avenue of communication with Constantinople, which the Germans are fighting to secure. The arrival of reinforcements from Saloniki has already eased the pressure on the Serbs.

Such a movement as this depends upon the numbers that the allies can place in the field. They would also have to give up their forces from their possible flank attack down the railway from Nish to Saloniki. But any prediction of whether the allies will march by this route cannot be definitely made. In the meantime, the presence of a growing force in this section of the country, coupled with the promises of Premier Asquith and Premier Briand to give adequate assistance to Serbia is causing the German general staff extreme anxiety. Till the enemy knows the exact plans

of the allies, he will be deterred from taking a bold course.

Greater Menace Still.
But a new and greater menace still has been added to the situation by the landing of the Anglo-French forces at Kavala. This town is about seventy or eighty miles from Dedeagatch, the seaport Bulgaria is receiving from Turkey, and a little to the north is a valuable railway line. An allied force in sufficient numbers can advance down this railway, turn the Dardanelles, cut off south-eastern Bulgaria from the capital, and invest the land defences of Constantinople. The famous Chatalja line. This is an operation regarded with anxiety by the enemy in view of the reporting of the landing from Salonki. Such a bold stroke adds greater uncertainty than ever to the German plans.

It will thus be seen that the allies hold the best cards for ultimate success, even should the Serbians be forced to yield up the Danube-Sofia-Constantinople railway route. The only way that the enemy could hold up an advance from Saloniki would be either by the holding of the force, or the holding of a fortified line stretching in sufficient strength for prolonged resistance across a line across Serbia as far as the Rhodope Mountains, and even with his Bulgarian allies the enemy has not sufficient men to spare for the purpose.

To Mystify Enemy.
But it should be remembered that any discussion of what the allies will do is based on probabilities. Nobody knows the forces which will ultimately be sent to the Near East and it is for the enemy to guess the line of operations that the allies will adopt in the early disposition of troops for the purpose of the allied high command will be to mystify the enemy as to the plans of campaign in which secrecy and surprise may play a large part. In the meantime it is obvious that it may take a considerable time for an allied force to be collected at Salonki for the big advance northward or westward, and it is also probable that before the weight of this new force begins to tell, the enemy may have gained considerable ground.

German Failure at Dvinsk and Riga.
The end of the campaign which the Germans began against Russia, by their advance in Galicia last May, appears in sight with the Russians and not the Germans the final victors. For the Danube route, which involves transportation at Rusehuk, is vulnerable from an attack from the Black Sea or the Aegean. The most important route is the all-rail, as mentioned above. Attacked on two and partly on three sides, in a military sense, the Serbians will have to abandon the sector from Nish to Belgrade, and leave a strip of their western frontier in the hands of the enemy, unless some unknown factor intervenes.

Calls for Action.
Vigorous calls for action by allied forces come from certain of the more adventurous spirits not only in England, but in the United States, as it is such who have heard with the mouth of Mr. Asquith. He does not fore-shadow any action and he does not say that this and that must be done and that the nation is in a state of emergency. The truth is that the allies are everywhere holding back the enemy except in a small military theatre, where the enemy is employing only about 150,000 men, all he has to spare, and numerous artillery.

A glance at the British casualty lists would indicate that the British army is seeing considerable action. What these critical people are doing in connection with the German advance in Russia, with military success. But military success does not simply mean the destruction of the army of the enemy. Once the German army is gone, Germany stripped of defenses is open to the invader. Now, this is what is constantly going on. The quickest way of destroying the enemy is to force him to seek out a twenty-five per cent. of the attacking force is destroyed that attack fails. Lying behind trenches and barbed wire, a line of two men per yard can stop any attack. But for the purpose of attacking with his infantry the enemy has to form them up in dense masses. For an attack, he uses a concentration of ten to eighteen men a yard. He trusts to the momentum of this mass getting its blow home. What do we find in the Champagne last Sunday? The Germans pushed forward each day no less than four or five times on a six-mile front. The French would defend this position by a concentration of one man or more per yard, or men a mile, or about 21,000 men, all told. The Germans, say, in their whole front, would employ a concentration of their minimum concentration, say, ten men a yard. They might attack each time with a concentration of five men a yard, but for all their attacks, they would employ a total of ten men a yard. Thus they would launch against this frontage of six miles something like 17,000 men a mile, or say, 100,000 men altogether. The probability is that they employed 50 per cent. more. They thus came forward from five to seven and a half times as strong as the French were in their trenches. But their attacks failed, save at one little knoll, Tahure Hill, and as an attack fails owing to the loss of a quarter of the attacking force, the Germans must have lost at least 20,000 to 25,000 men. But if an attack fails thru the loss of a quarter of the attacking force the force must suffer in excess of that quarter while it is retreating and still exposed to gunfire, so, at the very least, the Germans lost 60,000 men and even double that number, while the greatest possible loss of the French defenders would be the full 21,000 in the trenches, and it is certain these men generally resisted the enemy successfully, that the French losses at the very least are no greater than one-fifth of the enemy. This is a part what is meant by the great offensive, the seizing of strategic positions, which means that either recover at all costs or retreat. The moment chosen for seizing these positions is surprising, and it is so as to permit the carrying out of the operation with a minimum of loss to the allies. This process will be continued till the Germans are exhausted, and the allies will break thru his lines at a number of places, get all the Germans turned out of the trenches and crush them. It is obvious that if

enough munitions could be furnished, this work could be carried out much more rapidly than it is being carried out. The room for the employment of heavy shells is unlimited. It will be seen that when Sir John French marches thru Belgium it will be after four attacks, in conjunction with the German army. The German and Austrian losses are now half a million a month, an attempt may be made to double that rate of loss, and that in a manner most conserving the lives of the allied troops.

The losses of Germany have been so great that they explain the attempt to get thru to Turkey. The German general staff believes that it may arm and secure the services of half a million Turks, to be moved up into Germany, and to delay the inevitable. They would make good a month of the present losses. Therefore the retention of a force at the Dardanelles would play a big part in frustrating the plans of the enemy, for the Turks will certainly not wish to part with any men while that force threatens their capital.

WILL POISON PEOPLE AFTER AN INVASION
Germans Will Employ Naval Gas When They Attack British Isles.

According to an English chemist who has lately written a book on Germany's poison war, the Germans will use a novel poison gas machine in any attempt they make to invade the British Isles.

The Spotless Dairy Bathed in Sunshine Take This Trip

Follow the milk from The Farmers' Dairy. It starts on big, scientifically conducted farms, inspected by expert dairymen. It comes to the finest dairy in America in sealed cans. It is tested for freshness, richness, purity. Then it is scientifically pasteurized, cooled, and bottled by machinery.

How Could This Milk Be Anything But Best?

It comes from the finest herds. We demand an extra high percentage of butter-fat. One bottle will convince you that here is the purest, richest, freshest milk you can obtain. Order a trial bottle today.

Come and See the Wonder Dairy

Visit this great white building with its big windows, its spotless white walls, its scientific equipment. You will be delighted with its wonderful cleanliness.

Phone Hillcrest 4400

The Farmers' Dairy Creamery Butter--As good as the Milk.

Try our Creamery Butter, fresh daily from our own churns. From driver or phone.

THE FARMERS' DAIRY

Walmer Rd. and Bridgeman St.

The Lightning Cure for COUGHS, COLDS and all Bronchial Troubles.

No curative preparation can possibly be quicker in action than Veno's Lightning Cough Cure. You don't have to wait for the effect, relief comes with the first dose, and in ordinary cases cure follows with a rapidity which fully justifies the title "Lightning." Even in old deep-seated bronchitis and asthma Veno's can be relied upon when all the usual means fail.

Awarded Grand Prix and Gold Medal, International Health Exhibition, Paris, 1910.

That award is the hall-mark of international scientific approval. The approval of the public is expressed in a reputation which is wide as the British Empire. Veno's has the largest sale of any cough preparation in the whole world. It is made in Great Britain by British pharmacists, financed by British capital, and sold wherever the British flag flies. Old and young take Veno's for—

- Coughs and Colds
- Difficult Breathing
- Bronchial Troubles
- Whooping Cough
- Nasal Catarrh
- Blood Spitting
- Hoarseness
- Asthma

Price 30 cents.

Large size containing 24 times the quantity 60 cents. Sold by Druggists and Dealers everywhere, or direct, on receipt of price, from the sole agents for Canada, Veno's, P. H. Veno & Co., Ltd., 110 West Street, Toronto.

Proprietors:—The Veno Drug Co., Ltd., Manchester, Eng.

VENO'S LIGHTNING COUGH CURE

Pryskies, 185 feet long, 120 feet broad, and from 10 to 26 feet deep. In some chambers of the mines, statues, candles, altars and even two large chairs have been cut out of rock salt. A large dancing saloon has also been hollowed out of the living salt.

Acid Stomachs Are Dangerous

A famous physician said in the course of a recent lecture that nearly all intestinal troubles, as well as many diseases of the vital organs, were directly traceable to a deranged condition of the stomach, which in turn was due nine times out of ten to excessive acidity, commonly termed sour stomach or heartburn, which not only irritated and inflamed the delicate lining of the stomach, but also set up gastritis and stomach ulcers. Remarkable results have been obtained by the use of ordinary bisulphated magnesia, which, by neutralizing the acidity of the food, removes the source of the trouble. It is foolish to treat the stomach troubles with medicinal preparations, as long as the contents of the stomach remain acid; remove the acidity, and there will be no need for medicine—the inflamed lining of the stomach will then heal itself. Sufferers from acidity, sour stomach or heartburn should get a small bottle of bisulphated magnesia from their druggist, and take a teaspoonful in a quart of glass of water after meals, repeating in 15 minutes, if necessary.

Bisulphated Magnesia, No. 25 R. 26th Street, New York City.

USIT

Highly Recommended For the Complexion.

Everyone—from coast to coast—you will hear the praises of Usit. This wonderful complexion restorer is bringing the freshness and smoothness of youth to the faces of thousands of Canadian women. Everyone who has used it consistently has obtained splendid results and recommends it highly. The woman who is seeking a perfect complexion will find Usit an inestimable aid. All good druggists carry it. Manufactured by the Usit Manufacturing Company, Limited, 416 Rosedale Avenue, Toronto.

DANCE HALL IN SALT MINE.
The most wonderful salt mines in the world are situated at Wieliczka, a small town nine miles from Cracow. The mines have been worked since the eleventh century, but their productive-ness differs levels, connected with the surface by eleven shafts, and have more than 25 miles of chambers and passages. Within them also is Lake
