SUPREME COURT AT DALHOUSIE

Judge Barry Sees End of Great
War—Serious Assault Case
On Trial.

Dalhousie, Aug. 28.—The Restigouche Circuit opened yesterday morning. His Honor Judge Barry presiding. His Honor in his address to the grand jury referred feelingly to the war, the shadow of which was still hanging over the world. He spoke of sorrow and sadness spread over the land, of the sacrifice made by the men in France and Flanders, and by their relatives and friends here at home, sacrifices which were already bearing fruit for the end of the struggle with victory, was in sight.

His Honor also referred to the death of Mr. James Reid, former M. P., for Restigouche, and to Ex-Governor Tweedie, who had been present in court when Judge Barry was here two years ago.

"Time, as an over-flowing stream, bears all her sons away," quoted the Judge, and it behooves us and men of the younger generation to fill and prepare to fill the places of those who have passed away.

The criminal docket consisted of one case—King vs. Parnam. The prisoner is an Assyrian pedlar, accused of assault against a young married woman.

The Attorney General, J. P. Byrne, prosecuted and the prisoner was ably defended by A. T. LeBlanc, M. P. P. After an absence of two hours the Jury brought in a verdict of adultery against the prisoner, and he was sentenced to six months in the county jail from the time of his arrest.

The civil docket was as follows: Quebec Forest Product Co. vs. Peter Shannon; Leonard Martin vs. Arthur Shouley; Wm. C. Hamilton vs. Daniel Taylor; James A. McKay vs. Wm. Denny. The case of the Quebec Products Co. vs. Shannon was won by the plaintiff with a verdict of \$20.

DEATH WAS FROM ACCIDENT.
Sackville Tribune: Mrs. Thomas Stebbings received a telegram from Ottawa, Wednesday evening, to the effect that her son, William Stebbings, had met with a fatal accident in the Y. M. C. A. gymnasium and had died at 6 o'clock that morning. Full particulars are not yet to hand. Wm. Stebbings had been engaged in the civil service at Ottawa for some years. He is survived by his mother and two sisters residing in Sackville, and a brother, Rev. Chas. Stebbings of Harcourt.

AGAIN—MAYOR OF DALHOUSIE

W. S. Montgomery Chosen by
Default—No Other Would
Offer.

(Special to the Graphic.)
W. S. Montgomery again occupies the position of mayor by default. When Mayor Stewart resigned, a mild curiosity existed as to who would be elected. The St. John "Standard" of August 26th, Billy's press despatch, concocted and sent by himself, and giving his own estimate of his public value burst in upon us.

Billy is Mayor, by default, because no other person in Dalhousie can be persuaded to take the office.

Billy wants to be Mayor because it is his only remaining way in which he can keep his name before the public. He has also found the position very profitable. His "takings" from the Town treasury, in the last four years under his trade name of "Dalhousie Land Co." have been over twelve thousand dollars. Three thousand dollars a year is good business. No wonder Willie wants to be Mayor.—Cor.

RETURNED SOLDIERS PLACED.

A number of the returned soldiers who have been taking the vocational training courses in connection with the soldiers' establishment scheme are already being placed in commercial and manufacturing establishments throughout the province, and others will be ready at an early date.

MOVING I. N. R. STATION.

The work of moving the I. N. R. station building to its new site near the C. G. R. depot is progressing satisfactorily. The large structure was jacked up and four steel flat cars run under it when it was lowered down upon them. A temporary double track has been laid to George Street, and the building with the aid of a locomotive, pulled to the end of the street. The contractor, W. H. Wallace is now turning the building around for the run down George St. It is an interesting sight, viewed by many, to see such a large building being moved on four flatcars.

PUBLIC MEETING.

A public meeting is to be held in Murray Hall on Friday evening of this week to organize for a "Drive" to raise \$1,000,000 in Canada for the comfort of our boys now in the trenches. This move is one in which every person should be interested. Restigouche County is looked to for her proportion, and Restigouche will as in the past do her share. Nevertheless it is important that this meeting be well attended, and we trust that as many as possible will make it a point to be present.

MOWAT LUMBER PROPERTY SOLD

Fraser's Limited Have Completed
Soon.
Deal—Transfer

For some time negotiations have been under way for the purchase of the B. A. Mowat lumber mill and lands. Messrs. Fraser's Ltd., of Fredericton, during the early spring cruised over the limits and appraised the property.

Now the Graphic understands that the deal has gone through and the transfer will be made shortly. Messrs. Fraser's Limited own a considerable block of pulp ground in Quebec on streams emptying into the Matapedia, and it is said the Mowat mill will be converted to roll this for export to their Edmundston pulp mill.

GERMANS FAIL TO

PLACATE SPAIN

Pars, Aug. 24.—(Havas)—Negotiations between Berlin and Madrid over Spain's decision to replace sunken Spanish ships with German interned vessels, have failed, according to the Petit Parisien.

Imperial Chancellor von Hofmann does not desire to furnish any guarantees against submarine warfare, as he said, and the Spanish ministry of Spain is maintaining its position. He said that at a meeting of the Council of Ministers at San Sebastian on last night, decisions were reached which were very satisfactory.

THE JOY OF MOTHERHOOD

Came to this Woman after Taking Lydia E. Pinkham's Vegetable Compound to Restore Her Health

Ellensburg, Wash.—"After I was married I was not well for a long time and a good deal of the time was not able to go about. Our greatest desire was to have a child in our home and one day my husband came back from town with a bottle of Lydia E. Pinkham's Vegetable Compound and wanted me to try it. It brought relief from my troubles. I improved in health so I could do my housework; we now have a little one, all of which I owe to Lydia E. Pinkham's Vegetable Compound."—Mrs. J. S. Johnson, R. No. 3, Ellensburg, Wash.

There are women everywhere who long for children in their homes yet are denied this happiness on account of some functional disorder which in most cases would readily yield to Lydia E. Pinkham's Vegetable Compound. Such women should not give up hope until they have given this wonderful medicine a trial, and for special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of 40 years experience is at your service.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others.
It works!

Ouch ! ! ! ! ! This kind of rough talk will be heard less here in town if people troubled with corns will follow the simple advice of this Cincinnati authority, who claims that a few drops of a drug called freestone when applied to a tender, aching corn stops soreness at once, and when the corn dries up and lifts right out without pain. One says freestone is an ether compound which dries immediately and never inflames or even irritates the surrounding tissue or skin. A quarter of tea spoon of freestone will cure your little as any drug store, but is sufficient to remove every hard or soft corn or callus from one's feet. Millions of American women will welcome this simple remedy which will remove the cause of the high heels.

A CHAPLAIN'S CONVICTIONS.

Rev. George A. Griffith, a Baltimore clergyman, now overseas as chaplain with an American artillery unit agrees with Dr. L. P. Jacks, Principal of Manchester College, Oxford, that the outstanding and dominating characteristic of the German is an "instinct to cruelty." Stories the distinguished Protestant Episcopal divine has investigated and probed have convinced him that "all that you have heard about them in America does not approximate the truth." He has seen little children with their fingers and hands cut off, he has been told by men who saw them, of four young Canadians found crucified, one on each side of a room, occupied by German soldiers, and has been informed by reliable British and French officers of outrages too horrible to publish. These stories, confirmed by one of the greatest French Abbe's, left no doubt in his mind that the destruction of convents and misuse of the nuns was a settled German policy, "the ground principles of Boche efficiency in action." With that conviction forced on him by the knowledge gained through service at the front and patient investigation of it is not surprising to find this "man of God" declaring:

"I feel that I express the sentiment of those who have seen and heard over here, when I say that were I in America to-day, priest as I am, I should: to my best to have put to death any Boche in America or any so-called American who would apologize in any way for what the Boche has done."

Naturally, Rev. Mr. Griffith makes his convictions the text for an urgent appeal to Americans at home to put every resource into the war. His words express his feelings:

To talk of terms until the Boche is exterminated is to league with Satan for a corner in hell. Privations, sacrifices! What can you do at home to compare with what these men of ours are doing over here? Meatless days, wheatless days, sugarless days, good women knitting, benefits for the Red Cross—or all your social diversions with a charitable object, sandwiched in. When you are out on a shell swept hill and the shells are going by like balls out of hell, as the soldiers say, and it's dark as the grave, and every man, God bless him! stands strong, and true camouflage all his own feelings for your sake and for the sake of what he has back home, meatless days and wheatless days and Liberty Bond campaigns seem cheap as your support of him in such an hour.

Loathe the Boche—preach against him—work against him, wherever he is ostracized him socially and commercially. Take no chance—even though his reputation for loyalty has been a long-standing one. The leopard can not change his spots—neither can the Boche demon lose his horns. I'm begging you now—as the Boche are trying to murder us—to help wake every one up to the fact that America must realize what the world is facing over here. Can't you see it—can't America see it—how everything is hanging in the balance—and I know that the weight which will cast it down is when your loathing for the Boche will so burn in you as to make you count nothing—consider nothing—but his extermination.

I don't believe there is one of us here who wouldn't like to be home. But there is not one of us here, I believe, who does not want to see Boche-land devastated from one end to the other, with Berlin a blackened ruin—with the Boche exterminated, militarists and all before we come home. These are not hasty words, but the carefully considered thoughts of a Christian man, a lover of peace, whose opportunities of studying German war methods at the seat of war have forced on him the conviction that the Allies are fighting a degraded people. They must in the interest of their fellow men and for the safety and perpetuation of those great principles for which our civilization stands, fight on without thought of the war or the home sacrifice until through victory a just and abiding peace—Ex.

IN MEMORY OF CANADIAN FALLEN

Folkestone, Eng., Aug. 23.—For the second year in succession, there was enacted that beautifully impressive and heart-touching ceremony—the laying of flowers on the graves of Canadian soldiers in Shorecliffe Military cemetery by 2,600 school children from the district. No tribute that England can pay to the gallantry of Canada's fallen sons who lie in peace by the shimmering waters of the Channel could be more eloquently touching, and we would that we had the space more fully to describe the simple grandeur of this ceremonial of homage and the scene, as one looked down upon this Gods Acre carpeted with the living bloom of love and remembrance.

The natural amphitheatre was thickly thronged with spectators whose eyes were dimmed with tears, while below were gathered the children of Folkestone, Hythe, Cheriton, Sandgate, Saltwood and Seabrook, each bearing a bunch of flowers.

There also were here the civic representatives of the district, together with staff officers and the troops.

The ceremony opened with the singing of the hymn "Abide With Me" by the children, led by the band of the 1st Canadian C. D., under Bandmaster Chisholm. Then the children sang "The Maple Leaf," and following, the Mayor of Folkestone in the course of a brief address, said he regarded it as a great privilege to be there for the second time to show homage and respect to the memory of these brave men who left home and country to battle for Justice and Righteousness.

Alas, they remained here, but it would be some satisfaction to their relatives and friends in Canada to think that, although their loved ones were silent, they were not forgotten, and that the people in England were doing their best to show the respect and honor they felt for the bravery of the fallen Canadians. His Worship then laid the beautiful wreath from the Folkestone Corporation upon the nearest grave.

The National Anthem was then sung, after which the children filed by the trim kept graves surrounded by the simple wooden crosses of honor and hope, and thereon laid with reverent care their fragrant posies for gratitude and remembrance.

LESSONS FOR GERMANY

Proposals of peace are in the air. Germany, according to Count von Hertling, holds Belgium as a pawn in her hand. But it is not the greatest of Germany's many crimes that she should hold Belgium as a pawn at all? What stronger pledge can she give for the integrity of Belgium after the war than the pledge which she violated at the beginning of the war? The evil which has plunged the world in misery lies deep down in the German nature; it is the doctrine that might is right. It is the corrupt theory that everything, however immoral is justifiable if it is done, or alleged to be done, in behalf of the state. From this evil, the savagery which have made the name of Germany loathsome to the civilized nations of the world. Until this evil is burnt out there can be no peace, or no peace which will serve as the preparation for a new war. But the only cure for the evil is the defeat of Germany on land as well as at sea. Repentance, restitution, regeneration are the three lessons which Germany must learn; and there is, I am afraid, no coincidence as yet that she has learned even the first of them.

Half Way.

"Many a high-sounding name connects pretty rotten things," said Ralph Corson, the popular New York after-dinner speaker, in an attack on Pan-Germanism.

"It's like the case of the chap whose little boy asked him: 'Pop, what does years of discretion mean?'"

" 'It means, son,' said the father, 'that you're too young to die and too old to have any fun.'"

THE WASTE OF COAL

The fuel situation promises to be as acute next winter as last. There is little prospect that people will have all the coal they require in mid-winter. Every effort should be made, therefore, to make the coal go as far as it will.

A correspondent of the Ottawa Journal-Press draws attention to the waste of coal by large users throughout the country through imperfect combustion in the furnaces. Perfect combustion of coal, he reminds us, is now no mystery. There are apparatuses which, he claims, when installed on large furnaces, effect a saving of from 25 to 40 per cent in the coal consumed.

These instruments, the correspondent states, are working satisfactorily in many factories, but in most cases the old unsentient firing methods are followed.

If the saving of coal from the use of these apparatuses is anything like as great as is claimed, it would be good business for large fuel users to install them. Lacking voluntary action in this direction, the Fuel Controller might consider the advisability of taking steps to curtail this waste due to improper combustion.

NEW POTATO PEST HAS BEEN REPORTED

It seems there is always something new bobbing up to make the life of the farmer miserable, and cause him extra moments of worry. He has had trouble in gathering the hay, because of shortage of labor and too frequent showers. He was fussing comfortably with the idea that his potato plants had safely passed the danger point, when he discovers a new insect that is sapping the plant, and destroying its nutritive giving quality.

There has recently been reported to the Dominion Plant Pathologist, G. C. Cunningham, a little green insect that seems to strike a field all at once, and before the farmer is aware of it, the field is ruined. These reports were received last week.

In many Aroostook fields the insect, called lice, are trimming the fields badly. They have not been noticed on this side of the border until within the last few days. The laboratories of the Dominion Plant Pathologist and Dominion Entomologists have been busy preparing directions for combating this pest which is considered by the experts a most serious menace to the potato industry of New Brunswick, and they advise very prompt action to exterminate these lice as quickly as possible.

Mr. McLean, of the Entomological Laboratory, says:

"A bad outbreak of the Potato plant louse has been reported from the potato growing sections of the province. Spraying with arsenate of lead, paris green or Bordeaux will not control this pest. As this insect does not eat the leaves but drives its beak through the surface of the leaf and sucks the juices, causing the latter to curl and dry up. The only means of control is to apply a contact insecticide. 'Black Leaf 40,' 'Nikoteen,' (or one of the nicotine sulphate solutions), fish oil or whale oil soaps, or kerosene emulsion will give good results if it is properly applied and will not injure the foliage."

Mr. McLean has prepared formulas for preparations to kill this insect, and all farmers should become familiar with this preparation. The pest has gotten a bigger hold on the province than was at first believed, and it is getting in its work with great rapidity.

Potatoes of the late variety require one month more for development. The louse has ample time to stop that development if, through neglect, its ravages are not stopped at once.

There are three preparations given by the Entomological Department to kill these lice. One is known as the "nicotine poison", whale or fish oil soap application, and kerosene emulsion. These should be applied with a spray.

In speaking of spraying, Mr. McLean says:

"In spraying, with a contact insecticide it is necessary to hit the insects to get results. Top spraying will not control aphids or plant lice, as they feed on the under side of the leaves, consequently the nozzles must turn up in order to reach them. If the leaves of the plant are badly curled it will be impossible to reach the insects and spraying will be of little benefit."

The fuel situation promises to be as acute next winter as last. There is little prospect that people will have all the coal they require in mid-winter. Every effort should be made, therefore, to make the coal go as far as it will.

A correspondent of the Ottawa Journal-Press draws attention to the waste of coal by large users throughout the country through imperfect combustion in the furnaces. Crowd More Into the Busy Day

THE CHEVROLET 490 is an investment, not an expense or luxury. Doctors, business men, farmers, salesmen and ladies—all should use the Chevrolet Four-Ninety and crowd more energy, activity and business into the busy day.

The Four-Ninety stands unchallenged in its price class. The electric starting and lighting equipment is most efficient. The car is powerful, roomy, comfortable and economical. The time gained by operating a Chevrolet more than pays for the cost.

HON. MR. CARVELL ON COURTNEY DAY WORK

St. John, Aug. 24.—"I hear some people are complaining that the dredging work at Courtney Bay is not being proceeded with as rapidly as they desire," said Hon. P. B. Carvell, Minister of Public Works, who was interviewed last night by The Telegraph at the Royal Hotel. "The intention was not to dredge on an extensive scale immediately, the prime intention was rather to get the dry dock under way. This is the first consideration, and this work will be pushed ahead in advance of the dredging operations," he continued.

Hon. Mr. Carvell accompanied by Mrs. Carvell, arrived in the city yesterday in their private car, in order to attend the launching of the War Fund today, when Mrs. Carvell will act as sponsor. Mr. Carvell said last night that his visit was more in the nature of a pleasure jaunt and that he had no particular business to attend to while here.

He will this morning, however, inspect the plant and the progress of the work on the Norton-Griffiths site at Courtney Bay and expects to return to his home in Woodstock, N. B. this evening.

Regarding the complaint in some quarters that New Brunswick was not being treated fairly in only being allocated two platoons in the Siberian contingent, about to be raised, whereas out of a complement of 4,000 men the province should at least be given a double company with a strength of 250 men. Hon. Mr. Carvell said that this phase of the matter had not been put before him. He added that a very large number of returned officers were making application for posts in the Siberian contingent and that these were to be congratulated on the splendid pluck which they displayed in their desire to again go overseas on service.

THE CZECHO-SLOVAKS (Halifax Chronicle.)

Who are the Czecho-Slovaks, the troops so frequently mentioned in despatches relating to Siberia? They are composed, as the writer in the Boston Transcript states, very largely of Austrian forces which surrendered freely to the Russian General Brusiloff in the great offensive in 1917, and which were sent to Russian prisons beyond the Urals. Their strength was originally 60,000, but since has been increased to 300,000. When the Russian revolution broke out they were liberated from prison and began their march eastward for the avowed purpose of fighting alongside the Entente Allies against the Teutons. The Czecho people inhabit Bohemia, Moravia and Austria-Silesia, which under the present constitution are crown lands of the Austrian empire, and lie between Austria proper on the south and the German empire—Bavaria on the west, Saxony on the north, and Prussian Silesia on the east. The Slovaks live in the upper regions of Hungary, adjoining the Czechs to the east and southeast.

The two peoples are in effect the same race, their language has only slight dialectical differences; the political division between them was erected only in 1867, when to divide the energies of the people the Slovaks were put under Hungarian rule. Czechs and Slovaks have worked together with absolute harmony for unity and independence. The Czechs are one of the most highly civilized peoples in the world, and economically the most prosperous in the Austrian Empire. Their country includes most of the coal and iron deposits of the empire, the principal manufacturing and the most prosperous agricultural districts. The Slovaks have been held back by Magyar repression, but elsewhere, as in the United States, have shown that their natural capacity is as great as that of the Czechs. The area of the Czech countries is about 30,000 square miles, and of the Slovak region 18,000. It is estimated that there are approximately 8,000,000 Czechs and 3,000,000 Slovaks in the two countries. In addition there are more than 2,000,000 Czechs and Slovaks in the United States.

In a London "bus" man in civilian garb rose and offered his seat to a woman.

I never accept favors from slackers she said witheringly. "Madam," he replied blandly, "I was all through Gallipoli, and if we'd had as much powder as you have on your face we'd have got to Constantinople in no time."

CANADIAN SOLDIER TRIES TO MAKE A DATE WITH PRINCESS

She Turns Him Down, But Blushingly Admits She Would Like to Go With Him.

New York, Aug. 2.—A Canadian officer just over from France, watched a group of women workers in the canteen at Forty-first street and Fifth avenue with a twinkle in his eye. They were serving tea and wafers to tired men in khaki.

"That's the way they do it at Victoria station in London when the boys come back to Blighty," and he sighed reminiscently.

"There was one soldier, when I was passed through Victoria station the last time, who lingered over cocoa and ate his bun slowly. When all the others who had come on train with him had gone, he was still there."

"One of the young women who was helping about the place came up to him, seeing him standing there all alone, and spoke a friendly word. She asked him why he didn't hurry on to his folks like the rest of the boys."

"I'm a stranger in a strange land, ma'am," he told her. "I've no folks in London. I'm a colonial from Canada."

"The young woman was genuinely sympathetic. Suddenly the soldier's eyes brightened."

"Say," he said, "Let's you and I go have a bit of a dinner, a nice steak and a salad, and then go to a music hall. We'll have a jolly party, we two."

"The young woman, who was well dressed, and apparently of some refinement, blushed at this suggestion, and slowly shook her head. 'I'd like to,' she said, but I'm afraid I must refuse. I'm very sorry."

"An old soldier approached the colonial and observed, 'That was a nice young girl you were just talking to.' The soldier nodded moodily. 'What did she have to say to you?'"

"Turned me down cold," said the soldier. "I asked her to go to a music hall with me tonight."

"Ho, ho!" said the old pensioner, "and did ye not know who you were talking to? That young woman was none other than Princess Mary, the King's own daughter?"

"Without finding words to reply, the soldier finished his cocoa in incredulous silence and prepared to go. 'Well, where away?' the old pensioner asked, the Canadian started out.

"Turning in the doorway, and in a voice that all the ladies in the canteen could plainly hear, the young soldier replied:

"I'm going to Buckingham palace to ask Queen Mary to go to the movies!"

GREAT FUTURE FOR SHEEP INDUSTRY

Expert Sees No Indication of Lower Prices for Ten Years.

Fredericton, N. B., August 24.—Thomas Hethcote, livestock husbandman of the New Brunswick department of agriculture, will leave on Tuesday next for the Sherbrooke exhibition where he will endeavor to secure options on a number of pure bred rams of the down breeds which are desired for improvement of breed in this province. Shropshires, Hampshires and Oxford's are what are wanted. The pure bred stock imported will be assembled at Fredericton for sale early in October. The sheep raising industry has a great future in this province, according to those who have studied the situation.

H. S. Arkell, of Ottawa, dominion livestock commissioner, who is now in the maritime provinces, during his visit to Fredericton a few days ago stated that there was no doubt that sheep products had reached their maximum prices at the present time, but he could see no decline in prices for at least ten years to come. Mr. Arkell is an expert and his opinion counts heavily. His remarks applied to mutton and lamb, wool and skin.

BABY BORN IN A FORD AUTOMOBILE

Race for Hospital was a Failure.

Henry Ford probably never intended to manufacture an itinerant maternity ward, but his car has been put to no end of surprising uses.

A man and his wife who live near Topeka had been looking forward to a call from the big bird from Babyland. By and by the wife got a code message from the stork. She called the husband in from the field. He negotiated the trip from the harvester to the house in "nothing flat."

Said the wife: "John, you better hitch up the Ford right away."

John had the Ford in action in a twinkling, and the two jined off to ward a Topeka hospital, fairly eating up the road as the little wheels spun round and round.

About five miles out of Topeka, the long-expected event took place, the car serving as the couch of the nativity. Presently the Ford resumed its journey, carrying the father, mother and new-born child into town, and to Christ Hospital where the mother and babe are now located—and all are "doing well."

The wee one is a girl. In honor of her unique birthplace, she is to be called Henrietta, so the story goes.

MIDGET AIRPLANES ARE BEING BUILT

Of Less Span than the Largest Bird.

The smallest British airplanes now being manufactured are actually of less span than the largest birds. The great albatross has been known to measure nearly 18 feet from wing-tip to wing-tip. A certain type of midget airplane recently exhibited in London is only 15 feet in width.

"These are the machines which we may expect to see after the war carrying our mails," declared Major Orle Lees, of the British aviation service, "and they will be almost as universal as the smart automobile mail vans of pre-war times. These small machines will be largely used by the postal authorities on account of the existing limitations of storage and starting grounds in our great cities. Postal aerodromes, like railway stations, must be near the post offices, at least in the initial stages of the development."

"Later the problem may be solved by the use of pneumatic tube communication between the central post offices and the postal aerodromes. In delivering letters to distances of 250 miles or more, the big types of airplane will be used, but for local work small machines are likely to be much more serviceable."

"Dropping the mail bags by parachute will be given a good trial, and this, if successful, will be of great assistance. Bags may also be piled up while flying after the manner in which mail bags are now caught by express trains."

VICTORIA CROSS FOR A CANADIAN

Canadian Army Headquarters, Aug. 24.—(By J. F. B. Livesay, Canadian Press correspondent)—A Canadian corporal has been recommended for the Victoria Cross for capturing a strong German post with three machine guns, single-handed. The guns were enfilading his company and the corporal attacked the post, killing three men and capturing the remainder of the gun crew. Later on the corporal collected three men and charged a battery of 5.9 howitzers, capturing it.

MAKE EAST AFRICA AN INDIAN COLONY

London, Aug. 24.—(Canadian Press despatch from Reuters' Limited)—Sir Theodore Morison, member of the council of India, advocates making German East Africa an Indian Colony. He dwells on the advantage that German East Africa could offer to hundreds of thousands of small cultivators and also on its value as a field for the investment of capital. He suggests that administration and public development work be wholly entrusted to Indians. He believes that the Indians are capable of thinking out and applying a policy of firm and sympathetic government for the natives of German East Africa.

GAME PROTECTION.

The Graphic understands that at the present time no game wardens are on duty in this section. This is a grave mistake as moose and deer are reported to be numerous and at this season of the year they seem to be in evidence about the settlements, and the temptation to kill is great.

Since Warden Chas. B. Gray has had charge of this section there has been a great improvement in the game laws, and we are sure we voice the sentiments of all interested in the preservation of our game animals, when we say that Warden Gray should be continued in office for the whole year.

Mr. Gray is also an experienced woodsman, and would make a first class forest ranger, in fact he is the best qualified man in Restigouche, but for some reason or other he has been turned down.

Restigouche lumbermen annually pay large amounts for fire protection, and in return they have been given a very inadequate service. It is felt that if Mr. Gray was appointed Warden and Forest Ranger good return for the money expended would be given. Those interested should impress this upon the officials of the provincial Crown Lands Department.

BRITISH TANKS DOING GREAT WORK

With the British Army in France, Aug. 24.—(By the Associated Press)—Tanks participated heroically in the fighting yesterday, it is reported. One engaged in a duel with an enemy battery and silenced the German guns. Another group of tanks co-operated with a group of airplanes when the latter attacked German anti-tank guns which had been strategically located at the head of a gully through which the tanks had to go. One tank suffered seven direct hits and all the crew was wounded except the pilot, who kept the monster running, finished off a machine gun nest and brought the wobbly, badly damaged tank and his wounded comrades back safely through the rain of fire.

Many married men are envying the Emperor Charles some of his powers.

WOMEN OF THE ALLIES.

For the essential part played by women in the Allied war organization, humanity owes them unbounded gratitude, says Premier Lloyd George in a message to the Inter-Allied Women's Congress of Paris. Without their efforts, he says, the Allies would have been unable to withstand the enemy attacks of the past few months.

By war service women have won a recognition never accorded her before the nations were called upon to exert their maximum strength, remarks a contemporary. Every Allied country has felt the benefit of her intelligent appreciation of duty, and her readiness to give unequalled support to national endeavors. The courage, determination and energy of women have rivalled that of the men, and, many times, have led the way to successful accomplishment.

There has been no cry of weakness from the so-called weaker sex, and even where physical strength and endurance are demanded, women have not shirked a generous performance. She has gone out into the heat and strain of industry as readily as if accustomed to what has always been regarded as man's own environment.

The women of the Allied countries have answered the critic who once derided woman's growing influence on public affairs. They have established for all time the right of their sex to the full enjoyment of citizenship.

LAND FOR THE VETERANS.

About seven hundred returned soldiers already have gone in for land settlement, taking advantage of the provision whereby they secure from the state in addition to free land, the loan of money to set them up as farmers. The Dominion Government has advanced to the veterans under this provision \$700,000.

These returned men should not be exposed to the risk of handicap or failure at the very outset of their new career through securing unsuitable land. Under present arrangements, remarks a contemporary, there is this risk. They are given no assistance, except in reduced railway fare for purposes of inspection, in the selection of land. Soldiers' Settlement Board exists for the purposes of looking after the matter of settling the returned men on the land, but no provision has been made for helping them to choose their farms.

Many of the men who will go in for farming have had no farm experience. They are not qualified to judge of the agricultural possibilities of soil. For the protection of the investment it is making through these loans to the soldiers, as well as in the interests of the men themselves, the Government might very well provide expert assistance for the land settlers. The inexperienced farmers will be a long time paying back the Government advance if they are unlucky enough to get poor land.

JACQUET RIVER

An Ice Cream Sale was held in the Red Cross Rooms on Saturday and was a great success. The weather was beautiful and the rooms were very artistically decorated with flags and natural flowers. The usual good crowd were in attendance. The sum of \$18.75 was realized.

Miss Elizabeth Nutter, Domestic Science graduate of Acadia College, held a cooking demonstration under the auspices of the Women's Institute at the home of Mrs. D. McAlister, on Monday evening last. Miss Nutter gave some very valuable advice which was much appreciated.

A number of our boys have been in the recent heavy fighting, as the casualty lists show. Mr. Ambrose Daigle received a telegram that his son Pte. Alex. Daigle has been wounded, with a gunshot wound in the side. Private Daigle enlisted in the 132nd.

Peter M. Firlotte has been wounded with a gunshot wound in the leg. Private Firlotte went over in the Fighting 26th, being one of the original members. This is the second time he has been wounded. Private Willie Bernard has also been wounded. He went over in the 132nd and was later transferred. The many friends of these boys wish them all a speedy recovery.

Many friends of Gunner Horace Morrell, formerly of Newcastle, but well known here have heard with deep regret of his being killed in action. Gunner Morrell was very popular, and his wife and parents have the sympathy of all.

Several weddings have been celebrated in our midst recently. Mr. Harry Ellis and Miss Katherine Legasby of this place were united in marriage by the Rev. F. L. Jobb on Saturday afternoon. The ceremony was very quiet, but a number of friends serenaded the happy couple in the evening. Mr. and Mrs. Ellis will reside at Armstrong's Brook.

Also Miss Olive Firlotte was married to Private Silva Bouchie of the Depot Battalion, Sussex and formerly of Athol. They were married at Athol on Wednesday. The many friends of both couples wish them many long years of success and happiness.

Private Silva Bouchie of Athol was in town on Saturday.

Operators Thomas Hamilton, Harold McNair and Percy Shannon attended the O. R. T. meeting in Campbellton on Tuesday.

Miss Adeline Daley will attend Provincial Normal School, Fredericton this year and will leave for there shortly.

The school will be opening once more on September 3rd. The new room in our school here is almost completed. There will be three new teachers, Miss Henryberry of Grand Falls will be principal, Miss Brown, Intermediate, and Mrs. Joseph Doucet will be in charge of the Primary Department.

Miss Pearl Henderson has gone to Moosehorn, Saskatchewan where she will take up the profession of teaching.

A number of pupils will be returning to college and Academy next week, they include, Misses Irene Doyle, Hazel Hayes, Patricia Culligan, Mona Ullman, Bernadette and Isabel Culligan to St. Michael's Academy, Chatham; Masters Jackie and Charlie Culligan, Guy Doyle, Misses Cecelia Callahan and Gladys LeCoffre to Dalhousie Convent.

Of the four young ladies who took Matriculation exams at Campbellton, Misses Annie Barton, Hilda Hickie, Ella Foley and Kitty Fenderson, all passed in second division. Misses Hickie and Ella Foley will enter Normal School at Fredericton.

Mr. James Hayes of Campbellton spent the week end at his home.

Mr. and Mrs. Hilary Ullman of Moncton were the guests of Mr. and Mrs. Felix Ullman on Sunday.

A run-off on the C. G. R. occurred on Friday morning at Colligan's siding, about a mile below the station. Seventeen cars of No. 875 northbound, special left the rails and were quite badly broken. The cars were mostly loaded with coal and lumber. Traffic was held up until the early afternoon, the wreckage was not completely cleared for several days. Luckily no one was injured. This is the second bad spill in the vicinity, in a comparatively short time, a freight train leaving the rails in much the same manner some time ago.

Dr. Edmund Arsenau of Richards has taken up practice in Jacquet River and is having a very successful beginning. His many friends hope he may continue so.

Mr. Thomas LaPointe of Seattle, Wash., U. S. A. is the guest of his mother Mrs. Lawrence LaPointe, Sr., of Nash's Creek.

Mr. and Mrs. Brian Dempsey entertained a number of their friends one evening recently in honor of their guest, Private Homer Arsenau of Petit Rocher. Miss Ellen Landry of Nash's Creek was the guest of Mrs. M. Shannon this week.

Near-food substances are being offered by the German authorities in return for cast-off clothes—as, for example, a packet of pudding powder for a pair of patched pants.

The embargo on use of ham and bacon has been removed now for some days, but we have not heard of many people having the price to acquire.

Could the Food Board help?

And now Haig's men are repeating the "Show" in the famous Lyceum theatre.

It is rumored the Frenette brothers will purchase the store of Mr. A. J.

What Will You Do For Help?

FARM help is scarce, but this condition can be relieved to a marked degree by using machines that accomplish more work in a given time with less man power.

Why should the farmer cling to horses—a slow, expensive means of power—when every other business is adopting the truck and thereby reducing the cost of hauling, speeding up deliveries, and saving for human means the food that the horses would otherwise consume?

The motor driven truck can work constantly at maximum load under the burning summer sun, or in the coldest weather. Unlike the horse it needs no rests while working, it eats only while in actual use, and when the day's work is done it requires very little attention, and leaves you free for other "Chores" about the place. Then, it can be housed in one-quarter the space of the horses, wagon and harness it replaces.

It is a mistaken idea that a truck is useful only for driving upon paved roads. The Ford can be driven all over the farm, and used for hauling grain, potatoes, fruit, roots, fertilizer, wood, stock, milk or any other product. The speed it travels, the time it saves, and its low upkeep cost appeal very strongly to all users of the Ford Truck. If you need help, order your Ford One Ton Truck today.

Order Your Phonograph Records By Mail

Our Mail Order Department is giving hundreds of out of town Phonograph owners a complete record service. We carry 25,000 Victor and Edison records. Every Victor record in the catalog and every Edison record made. You can choose from the complete lists.

You Receive Them on Approval This is the way we do it. Select from the catalog the records you want to hear. Order by letter. Records go to you by return mail. Play them over in your home. All we ask is that you keep at least half of those sent you. Return the rest within three days from the time you receive them. If you keep three or more we pay postage both ways. We make good, breakages in transit. Money must accompany the order and we refund immediately for all returns. A few music houses sell records by mail, but this is the only music house that sends records out on approval. A trial order will convince you.

Catalogs and monthly supplements sent free upon receipt of the attached coupon.

BISHOP BARRY IN

Critical State. Chatham, Aug. 28.—Bishop Barry's condition has been quite serious since Saturday. On Saturday he was not expected to survive the day but he regained strength. His condition is, however, considered extremely critical. He has been ill about two months.

A. G. TURNEY INCAPACITATED.

A. G. Turney, Provincial Horticulturist, is now in Boston, where he went to undergo an operation for mastoiditis, at the Massachusetts Eye and Ear Infirmary. He was apparently making a good recovery after the operation, but has suffered a setback. He will be unable to return before the middle of September.

PROVINCIAL APPOINTMENT.

In the County of Restigouche—M. Alonso Kelly of Campbellton, to be clerk of the peace for the county of Restigouche; Alex. E. McMillan, of Black Point, and J. Wilfrid Comeau of Campbellton, to be justices of the peace; Clovis T. Richard, of Campbellton, and John J. Bernier, of Campbellton, to be commissioners for taking affidavits to be read in the supreme court.

RUN-OFF AT JACQUET RIVER.

Number 875 Fast Freight which left Moncton on the evening of August 22nd, experienced a serious run-off at Jacquet River Friday morning about 6 o'clock when sixteen cars jumped the track and were piled up in the ditch. The train was in charge of Conductor James J. Trites, with Driver Comfort Eagles in the cab. The cars were badly smashed and broken up but fortunately contained no freight. The Maritime Express was by the scene of the spill before the run-off occurred. Number 26 Accommodation from Campbellton was delayed until nearly 7 o'clock Friday night. The Ocean Limited was delayed two hours.

The auxiliary went out from Moncton to the scene and assisted in clearing the wreckage up. No one was hurt.

LOST RIGHT HAND.

Saturday afternoon the only son of R. J. Miller, Blacklands, N. B. had his right hand so badly lacerated in a large planer in the mill that it had to be amputated.

AGED RESIDENT GONE.

Many friends throughout the Bay Chaleur will regret to learn that Mr. Farquhar McKay of Beauséjour died at his home on Friday of last week. He was about seventy years of age.

NEW MARITIME RECORD.

At the Chatham races Thursday the St. John horse Peter Farren did an exhibition mile in 2:09½ making a new record for the Maritime Provinces. In the 2:21 Trot and Pace Peter Farren finished in 2:10½ distancing the field. An effort to bring this horse and White Socks together failed but a match race for \$500 a side between the two is possible in the near future.

DANGEROUS JOKE.

Someone at Richardsville Sunday evening stretched a string of shingle tarred marline across the road just high enough to catch the heads of persons passing in automobiles. Fortunately this caught on a high windshield and was broken. It was tied to a telephone pole on one side of the road and a tree on the other. The Automobile Association should take the matter up and endeavor to have the guilty parties punished.

HELD OVER.

A considerable amount of local and country news, including Dalhousie notes is held over this week because of a rush of copy which came in this morning. Correspondents and other sending in news items are requested to send them in as early in the week as possible as our machinery is capable of handling just so much news on publication day. If more than the capacity is offered some must be held over.

K.C. Drive!

A PUBLIC MEETING

Will be held in the Murray Hall, Campbellton, ON—

Friday Ev'g, August 30

At the hour of 8 o'clock p.m. To organize the County of Restigouche for the "Drive" commencing September 15th next. The Drive is to Solicit Contributions towards the

\$1,000,000 Fund to be Raised in Canada for the Comfort of the Boys at the Front.

All persons interested in the welfare of the Boys should be pleased to attend.

The Drive was started at the instigation of the K. of C. in the U. S. A., and they have already raised \$50,000,000 to build huts for the Soldiers, give them refreshments in the trenches and recreation when at the rear.

It is the intention to raise \$1,000,000 in Canada to the same ends.

Restigouche always was to the fore. Let not this occasion tarnish its good name.

One of the most dangerous habits people can indulge in is that of lying in bed. Nine-tenths of all the deaths occur in bed. Nearly one-half of all those who are murdered are murdered in bed. It is while you are in bed that the house is robbed and all your chickens stolen. It is while you are in bed that the big bite you and bad dreams haunt you. Therefore, dear reader, never go to bed.

FACE TRUTH HONESTLY

The man best able to tell the truth is he most willing to face the truth—especially disagreeable truths about himself or to the community he lives in. How can we correct errors if we will not even acknowledge them, or how can we acknowledge them if we will not even look at them? Truth facing, like charity, begins at home. The man who is able to face disagreeable truth about himself has learned to face the truth about the community he lives in and earned the right to speak it. And a community honest enough and intelligent enough to face the disagreeable truth about itself is a community hard to beat in war or in peace.

TWO GLOUCESTER COUNTY MEN KILLED.

Bathurst Northern Light: The grim aftermath of even good news from the battle front brought sorrow and worry to a number of Bathurst homes during the week. Among the wounded reported were Ptes. Douglas Hodgins, Alex. Young, who for the third time has suffered injury; T. L. Smith, of Salmon Beach and E. G. Y. Scott of Stonehaven.

Death in action came to two of the finest and most highly regarded of the boys who left here with the 236th Kilties, and who were later transferred to other regiments. They were David Hains, son of Capt. and Mrs. Allan Hains, and William Pentland, son of Mr. and Mrs. James Pentland.

GASPE

Gaspe Village is an attractive summer resort. It is situated on Gaspe Peninsula which lies at the end of the Gaspe Peninsula. It is reached by the Quebec, Ontario, and Atlantic, Quebec & Western Railways. During the summer and fall months, the trains leave Matapedia at 10.35 a.m. and reach Gaspe at 9.30 p.m. There are trains running every day. A gasoline ferry connects Gaspe, the terminus of the railway, with Gaspé Village. This ferry runs every ten minutes, requiring only a few minutes in crossing. The entire route along the Gaspe Peninsula is one of the most delightful trips one can take.

The people of Gaspe are enterprising and industrious. Their hospitality to strangers is abundant. These nationalities live happily together and form an ideal community. It was the good fortune of the writer to meet some of these people. Mr. Major Silas has lived about sixty years in Gaspe and is highly respected. He is a Jerseyman by birth and longs to go back to the place of his birth. He has an old fashioned home where he enjoys all the comfort of life he cares to have. Mr. and Mrs. Louis Roper keep his home and take care of some guests who prefer a private home to a hotel, especially when their means are limited. Mr. Roper is an intelligent sailor who has seen a good deal of the world and has been a keen observer.

Entrance to Gaspe Harbor, Gaspe, Quebec.

The distance between Matapedia and Gaspe is 202 miles. The scenery of hill, mountain and plain is charming. The hills and valleys, the mountains and plains, the rivers and bays, the fishing craft and fine farming sections, all go to make up a varied and most interesting picture. The railway follows the shore for the most part, and the beautiful waters of the La Baie de Chaleur are almost constantly in view. All along the route there are villages, hamlets and thickly settled rural districts. Nestled in some charming bay here and there is a fleet of fishing vessels, while away from the distance is a high bluff or a sandy bar penetrating the water. The beautiful and costly residences of the rich as well as the neat and attractive homes of the humbler people impress one with comfort and prosperity with which all are blessed.

While there are many places along this route, where a summer holiday may be profitably spent, perhaps no place is more attractive for the summer tourist than Gaspe. There is a fine hotel, The Baker House where tourists from all parts of Canada and the United States spend happy and profitable holidays. The Baker House is widely known and its guests speak in the highest terms of the splendid service received. During the fishing and hunting seasons many sportsmen spend a holiday here.

There are splendid rivers entering the Gaspe Basin, the Dartmouth, the York and the St. John. The scenery all about Gaspe and along these rivers is beautiful. The hills and mountains high and precipitous, adorned with trees whose leaves give different shades of green make a splendid background. The wide rivers, with high bluffs jutting out here and there, while away in the distance is a sand bar stretching almost across the Dartmouth river, forming a larger and safer harbour. Besides this inner harbour there is an outer harbour where large vessels can find shelter. One never gets tired of this natural beauty.

In Gaspe there are French, English, Scotch and Jersey families besides other nationalities.

A few names will indicate the Jersey element:—

LeTouzel, Slous, LeBoutillier, De-

Marsqu, LeBos, Veit and Carter.

PORT DANIEL

We are pleased to notice the progress of our little village in having a ship-yard to boast of. Charles H. Nadeau, Esq., with his usual business capacity has started and has well under way a fine fore and aft schooner, which he hopes to launch in October with a view to taking a cargo to West Indies, the work is considered to be of the very best under the supervision of J. A. Holder, Esq. of St. John, N. B.

Lumber operators have already

placed their camps in the woods, although men are scarce the camps seem to have their complement.

Having this year has been very successful, farmers who did not begin until after the rainy spell got their hay in, in perfect condition. Crops are generally average and will be above the average if suitable weather comes to ripen the grain.

Dr. Noel of St. Fovard de Bailly and family left on Tuesday for their home after spending their summer vacation in Port Daniel. Dr. Noel has an interest in lumber business here

SHEEP ON EVERY HILL SIDE IN NEW BRUNSWICK.

The New Brunswick Government through the Department of Agriculture has arranged with the Chartered Banks to help the Farmers—where assistance is needed—to buy Sheep.

The Department will not only arrange to buy Sheep FOR the Farmers, but will also buy good breeders FROM the Farmers—in other words, this branch of the Agricultural Department WILL SUPERVISE ALL PURCHASES AND SALES OF SHEEP.

CREDIT FOR THE PURCHASE OF SHEEP

Every bona fide farmer who wishes to purchase sheep for breeding purposes and cannot pay cash may secure twelve months' credit for two-thirds of the purchase price. GO TO THE MANAGER OF THE CHARTERED BANK IN YOUR COMMUNITY AND PLACE YOUR ORDER FOR THE NUMBER OF SHEEP REQUIRED, ACCOMPANIED WITH A CASH PAYMENT OF \$3.00 PER HEAD ON GRADES AND \$10.00 PER HEAD ON PURE BREDS. The Manager will forward the order to the Department of Agriculture; the Department will purchase the sheep and deliver them to your nearest railway station. The balance of the purchase price can be paid as follows:—Two-thirds, or about \$10.00 per head, by a twelve months' note, and a cash payment of about \$2.00 per head on grade sheep.

Under the credit system not more than 21 sheep can be secured by any farmer.

Any farmer who wishes to secure a greater number and cannot purchase locally can be supplied by the Department of Agriculture for cash.

PRICES

FIRST QUALITY stock only will be secured. All sheep will be carefully inspected in purchasing. Mature sheep are hard to obtain; therefore ewe lambs will form the major portion of the stock distributed. Prices will range from \$18.00 to \$16.00, according to size and quality, delivered at the nearest railway station.

The Department has not entered upon this as a commercial transaction—THE SHEEP WILL BE PURCHASED AS CHEAPLY AS POSSIBLE AND RE-SOLD FOR COST PRICE PLUS TRANSPORTATION AND HANDLING CHARGES.

PURE BRED RAMS

The Department is now purchasing pure bred lamb and shearing rams. The lamb rams will cost from \$30.00 to \$40.00 and the shearing rams \$45.00 to \$50.00 each. Exceptional individuals will cost from \$50.00 to \$60.00 each.

THE RAMS HAVE BEEN SELECTED FROM RELIABLE BREEDERS IN THE MARITIME PROVINCES, QUEBEC AND ONTARIO.

Suitability of New Brunswick Farms for Sheep Production

The hilly country makes ideal conditions for sheep pasturage. Hay, roots and oats are the staple crops—they are likewise the staple sheep foods also.

THE WOOL PRODUCED IN THE MARITIME PROVINCES IS THE FINEST QUALITY IN CANADA AND BRINGS THE HIGHEST PRICES. MARITIME LAMB AND MUTTON CANNOT BE SURPASSED.

The system of farming followed in New Brunswick makes the keeping of a flock of sheep easy and very profitable.

THE FUTURE

H. S. Arkell, Dominion Live Stock Commissioner, states: "That sheep products have no doubt reached their maximum price, but that he cannot see any reason for material decline in the price for at least ten years."

Unwashed wool is worth from 70c. to 80c. per pound, according to grade. Good lambs from \$10.00 to \$13.00 each. Under careful management the first clip of wool and the first crop of lambs will pay for the foundation stock.

If possible, purchase locally. Secure foundation stock from your neighbors immediately available—NOT ONE EWE LAMB SUITABLE FOR BREEDING SHOULD BE SLAUGHTERED THIS YEAR.

PROCEDURE TO PROCURE SHEEP

IF YOU CAN GET PURCHASE LOCALLY, PLACE YOUR ORDER IMMEDIATELY WITH YOUR LOCAL BANK MANAGER. HE WILL FORWARD IT TO THE DEPARTMENT OF AGRICULTURE, FREDERICTON.

Unless orders are given it will be impossible to secure time to make delivery before winter sets in.

This is a business proposition—think it over—decide and see your Banker.

For further information apply to THOS. HETHERINGTON, Livestock Superintendent, Department of Agriculture, Fredericton.

Aug. 29-2-ins. J. J. TREWEDALE, Minister of Agriculture.

PUBLICITY A CURE FOR IMMORTALITY.

Publicity is the one sure cure for immortality.

WITH THE SAMMIES AT THE FRONT

Railway Heroes at the War

WRITING from war correspondents' headquarters in France, Roland Hill says: "The men who drive the big engines of Canada's ocean-to-ocean trains across the prairies and through the mountains are made of stern stuff, and have nerves as steady as the steel rods they travel. You may meet many of them at the war. Under the most trying circumstances these men are carrying on the most difficult work right up behind the firing lines. The train tracks are often broken and the rail beds damaged by enemy shells. Men less skilled would not risk running a train over them, but these expert Canadian engine drivers often pile their cargoes along lines that seem impossible. They bring up troops, food supplies, guns and ammunition, and they bring back the wounded to the hospitals. Nothing daunts them. Roland Hill tells of a young sergeant who in days of peace drove the Imperial Limited, from Moose Jaw to the West; this man backed up his engine to a shell dump where there were \$200,000 worth of shells. Part of this dump was on fire and the shells were bursting around it. He drove with his main steam pipe and for half an hour pumped steam into the burning mass, and finally overcame the fire. His engine was holed with shrapnel holes. The fragments tore his clothes, and his escape was miraculous. His gallantry during the fire rallied others to his assistance. Many of these were wounded; he suffered his damaged engine to bring them to an adjacent hospital.

Private James Peter Robertson, of Medicine Hat, Alberta, was one of the C. P. R. engineers to win the Victoria Cross, the most coveted distinction in the army. A courier despatch says: "Number 552855, Private James Robertson, late infantry, enlisted at Medicine Hat, displayed the utmost bravery and outstanding devotion to duty in an attack when his platoon was held up by enemy wire and a machine gun was causing many losses. Private Robertson dashed to an opening in the tank, rushed the machine gun, and after a desperate struggle with the crew, killed four men and turned the gun on the remainder, who were slain by the fierceness of his onslaughts, were sent running towards their own lines. His gallant work enabled the platoon to advance. He inflicted many more losses amongst the enemy, and then, carrying the captured gun, led his platoon to the final objective. He there selected an excellent position and got the gun into action, firing on the retreating enemy, who by this time were demoralized by the fire brought on them. His courage and coolness cheered his comrades and inspired them to finest efforts. In carrying in a wounded man he was killed in front of his own trenches."

But not only have the engineers been doing great things at the war, men from other branches of the service of the C. P. R. have been doing nobly as well. At present there are 5,500 employees of the company in the fighting ranks; they are scattered everywhere there is a fight or the prospect of one, on sea or land, and some are training at home. Many have risen to the highest official positions, and many are being promoted every day.

Private Michael James O'Rourke, of New Westminster, British Columbia, was assisting in the boring of Rogers Pass tunnel—where the C. P. R. passes through the Rocky Mountains—when the war began. At Moose Jaw he won the military medal after being a short time at the war. On this occasion he spent three hours in a sap bombing Germans and when his supply of bombs ran out he lay in a shell hole sniping many of the enemy out of action. He was subsequently helping at a Lewis machine gun, and went away to get ammunition. While absent the gunner was killed. O'Rourke got the gunner's place. Then O'Rourke located a bomb, killed a German with it, took a lot of bombs from the German and flung them into the German lines.

Private O'Rourke was in the thick of the fight for twenty-eight months without receiving a serious wound. Some months ago he won his Victoria Cross unscathed. This is how he did it: For three days and nights he was a stretcher-bearer working without halt, going into No Man's Land and bringing in the wounded, dressing them and getting them food and water. On one occasion he saw a wounded man, blinded, and stumbled ahead of him, who was being fired on by the enemy. O'Rourke, fired on by the enemy. Regardless of his own safety O'Rourke guided that man into safety. On another occasion he went out fifty feet in front of the British barrage where he was exposed to very heavy shell and machine gun fire, and brought in a wounded man. In a single trip to No Man's Land O'Rourke dragged no fewer than six wounded into the shelter of a trench. Throughout the entire operations the area in which he worked was subjected to incessant fire of all kinds, but this hero was all the time absolutely reckless regarding his own safety, and though almost exhausted stuck to his task undiminished.

Corporal E. E. Keesee, formerly an employee of the Canadian Pacific Railway, is another to win the military medal. He rescued a number of 12 howitzer guns that had been left in a dangerous position and was liable to be put out of action by the enemy. The gun was taken back four miles under a terrific shower of shrapnel which lasted for four hours and he struck eight times during the removal to the rear.

PUBLICITY A CURE FOR IMMORALITY.
Vice cannot thrive when the spot light is thrown on it. The home newspaper does more to preserve the morals of a community than any other single factor. An habitual attendant in the courts fears publicity more than the possibility of being fined. Publicity is the

preventive of vice. The home newspaper should receive the unqualified support of every citizen who is anxious to uplift the morals of our community. This newspaper works hard in hand with the churches in all worthy causes to make this community a better

place. It supports all movements tending to improve conditions. The churches, the citizens and the press should co-operate in making this a clean town in which to live and in which to bring up our children. Everyone should read this newspaper. Everyone should assist in

riding the town of all forms of immorality. It would be easy to open a gambling den on the principal street of town were it not for the publicity that would be accorded such an undertaking. Ill-considered selling of intoxicating liquors would be easy were it not for publicity. Other

nauseous forms of vice would thrive were it not for fear of publicity. You can help make this a better place in which to live, a far better home for your children, by cordial co-operation with this newspaper. You can point out where vice exists. This newspaper will focus

public attention toward evil surroundings. Public sentiment will then be aroused. No institution is strong enough to overcome public sentiment. Patronize the home paper.

After all, there is no nerve food superior to good luck.

DO NOT NEGLECT

YOUR EYES

We hear much of people who sacrifice everything to sartorial splendor. They would go without dinner every day for a new pair of shoes.

Sacrificing health for appearance is not good policy—it does not make for health, a real happiness.

Not only do you squint and frown when you neglect your eyes, but you seriously injure your health.

Better have a careful examination made.
