#### California Lumber Trade.

The official Report, submitted by the Hon. But-Les King, upon the mineral, commercial, and lier's observations, because he is distinguished as agricultural resources of California, should be a close and keen observer of European politics, that region. It is replets with accusts and important information upon every topic of interest o the emigrant, and sketches a luminous future, ober imaginations, is tinged with the

outlines of romance. He looks forward to such an augmentation of population, that in a few your California will number half a million, or five times its present number. When alluding to he Lumber Trade, he points to a result which is n perfect accordance with the anticipations of

#### writters. He says :--

cause the manufacture of it in California to be aslandoned. We may add 300 per thousand, to meet any increase of price in the article, light, or in the freight, and the result is to be introduced and the state.

We are aware that some diversity ion exists as to whether, in the event of the United States 20 per cent. duty being taken off, our prices would rise to that extent. We think they would, unless it can be shewn that we could over-stock the market. We shall illustrate our idea. Let us suppose that the small community of Prince Edward's Island had imposed a duty and subsequently removed it - prices

would not permanently improve, because, the being small, we could more than consumption being small, we could more than supply the demand ; but in the case of the United itates; matters are otherwise. their children to those Schools—Baving dissented from the sectarian Schools of the Commissioners. Much annoyance occurring from the Commissioners was entered into with the Superintendent, on the subject, who gave it as his opinion, that any por-tion of the inhabitants being a minority, could legally dissent from the majority. Fortified with this opinion, and by the best legal advice that could be obtained, they continued to send their children to the dissentient Schools, which are in-ferior to none in the Parisk. At the last Circuit Court in this County, proceedings were instituted against three of the parties, for School rates, &c., by the Commissioners, and judgment awarded to the Plaintific as a matter of course. The Coun-sel employed to defend the case, received no in-structions to argue the case at all, and was posi-tively uninformed on the subject. Of course, the Defendants are not satisfied with a decision under such circumstances, and are only ansious have the matters at issue fairly and pro-perly argued before any legal tribunal—being huly satisfied that the Church of England and the Church of Rome, being a mimority, can legally dissent from the majority. The numbers of the Roman Catholic Church in this Parish are 1006, of the Church of England, 504, and the Presby-terian, 1886—this is according to the last census. From this statement, it will be seen that the dis-sentients cannot be suprescribed in the School Com-mission. To show the power of the majority under the present: Commission, there are the two Pres-byterian Ministers, each having made him their Church of England member, whose voice is neutralised by their having made him their Chartman.—Communicated.
