New Superior Chevrolet

Chevrolet Reduces Cost of Maintenance Service
Over 1500 Chevrolet Dealers and Service Stations in Canada Are in a Position to Offer Maintenance on a Flat Rate Basis.

The new Chevrolet Maintenance Service Policy makes it possible for Chevrolet Dealers to offer Chevrolet owners maintenance service on a flat rate basis. This means that when your Chevrolet needs attention you know in advance what the cost will be; when your car will be ready, and that it will be in good condition when you receive it.

The costs for the various operations in our standard portfolio of charges have been based on experience in hundreds of garages covering a period of several years, and are a fair charge which every Chevrolet owner is willing to pay.

Chevrolet is to-day the fastest selling fully equipped car in the world. Moreover Chevrolet is lower in operating cost than any car made. More miles per gallon are possible with a Chevrolet than with any other car, and the tire expense is unusually low.

Now with the new flat rate system of maintenance service and the new reduced prices on Chevrolet parts, Chevrolet is the lowest car in upkeep cost.

Chevrolet represents greater value as a transportation unit than any other make of car.

Get the Most for Your Work and Money

I know you've a big investment tied up in your fields of corn and your beef and dairy cattle. I want to see you get full returns for this money.

That's why I recommend one of my "Toronto" Wooden Silos. It's built to retain all the tasty food value of the corn—and cattle fed on this kind of silage will give more milk and make better beef. "Toronto" Silos are durably built of selected spruce, double tongued and grooved to exclude the air, treated with creosote to lengthen their life. The Silo is thus protected against dry or wet weather, freezing, thawing or any action of the silage. The special Hip Roof, too, gives 15% extra capacity.

Get full value for your investment. Let's talk it over or get some of my free literature.

McPHERSON & CLARKE

LUMBER DEALERS PLANING MILL COAL & BUILDERS' SUPPLIES

DISTRICT AND GENERAL

Sunday, May 20, is designated in Canada as Go-to-Sunday-School Day. Dutton post office will occupy quarters in the newly-erected memorial hall in that village.

The death took place at Alvinston on Saturday, April 28th, of Gilbert McCallum, in his 74th year.

A severe wind storm destroyed many acres of onions in Essex by blowing the seed out of the ground. The Province of Ontario Savings Office in fourteen branches has funds amounting to over six millions on deposit.

Canada exports to 44 different countries and has stepped from ninth to fourth place among the great exporting countries of the world.

The test well drilled by the Ontario Gas Co. on the farm of J. E. Bee-croft, Dunwich, has been abandoned at a depth of 1,725 feet, no indication of gas or oil being found.

Robert York, of London, has rented a room in the Grand Central hotel at Alvinston, and will open a barber shop there. He has moved his household effects into M. B. McNeill's house.

Children playing with firecrackers caused a fire at Ailsa Craig on Monday afternoon that destroyed ten business places, left six families homeless and caused a property loss estimated at \$200,000.

Shipments of Alberta coal have been received in several Ontario cities, where tests have been made and the coal pronounced a success. Many are convinced that Canadian coal mined in Alberta will solve Ontario's coal problem for many years to come.

The funeral of the late Edward McLachlan, who died in Detroit on Saturday, April 28th, in his 60th year, took place from the residence of his son, Mrs. Donald McCallum, Alvinston. Deceased was a son of the late Captain Duncan McLachlan, of the Detroit & Cleveland Navigation Company.

Engineer Meir, of the highways department, has been instructed to prepare a report on the roads embraced in the proposed Blue Water Highway. His investigations will take several months. Mr. Meir will prepare full data on the character of all the links in the proposed Windsor-Owen Sound route.

Mr. and Mrs. Reginald Dicker, of Wardville, were rendered a shower on their return from their wedding trip at the home of the bride's parents, Mr. and Mrs. Alfred Shaw, Ald-borough. There were about fifty of the guests of the young couple present, who presented them with many gifts, and a very pleasant evening was enjoyed.

The Bank of Montreal Canadian crop report issued May 3rd says:— "The wheat crop is excellent in British Columbia, where it is earlier than usual. Conditions generally favorable in Prairie Provinces where seeding will be general in a few days. Slightly smaller wheat acreage expected and larger acreage coarse grains. Seeding has just begun in Ontario. Not yet started in Quebec or Maritime Provinces. Fall wheat wintered well."

John Peter McKinlay, a justice of the peace at Ridgeway for more than 20 years, and the father of Justice John F. McKinlay, of Detroit, died at the latter's home on Thursday. He would have been 100 years old had he lived until next New Year's day. Judge McKinlay's death was caused by a storm door blowing against him, knocking him down a step. He was born in Aldborough township and lived there until his early manhood. When he retired he was the oldest justice in the province of Ontario in years and in age, as he was past 90 when he completed his last term.

APPIN WOMEN'S INSTITUTE

Another Successful Year's Work Shown at Annual Meeting

The Appin Women's Institute held their annual combined with their regular monthly meeting on Friday. The president occupied the chair. Mrs. Peter McArthur was invited to preside during the election of officers. With a few exceptions the officers of last year were reappointed, as follows: President, Mrs. J. W. Macfie; first vice-president, Mrs. Peter McArthur; second vice-president, Mrs. Jas. C. Allan; secretary, Mrs. Dan. McCall; treasurer, Mrs. John Jones; directors—Mrs. Bernice Galbraith, Mrs. A. F. Munroe, Mrs. Thos. Hodgson and Mrs. Herman Galbraith; district representative, Mrs. Peter McArthur; school committee for the next three months, Mrs. Lotan and Mrs. Dugald McIntyre.

The last year was proven to be another successful one. The total receipts amounted to \$619.56, expenditures \$466.77, membership fees \$14.75. A regular attendance of thirty members was noted during the year. The institute also sent \$40 to the fire sufferers in Northern Ontario, besides clothing valued at \$500; \$10 to Russia for sick children; \$25.50 to the hospital in Strathroy; \$5 to the Sick Children's Hospital, London, and \$12 to the Federation W. L. Over \$75 given towards the recreation park at Appin in purchasing tennis and basket balls and procuring ornamental trees and bulbs to beautify this community park.

Send in the local news, and send it early.

BARN FIRE IN EKFRID

Bernie Galbraith Sustains Heavy Loss in Buildings, Live Stock, Etc.

At 1.30 o'clock on Thursday afternoon the barn and adjacent small buildings of Bernie Galbraith, reeve of Ekfrid township, situated on lot 13, Longwoods Road, took fire from some unknown cause and were completely destroyed, together with the most of the contents, including 7 calves, 2 colts, 14 pigs, several chickens, a large quantity of grain and hay and, farm implements and machinery. There was an insurance in the Ekfrid Mutual of \$2,300, which represents but a small portion of the loss.

Just after the noon hour Mr. Galbraith left home to go to a neighbor's a short distance away. Before he got there he met another neighbor running excitedly towards his home who informed him that his barns were on fire. Looking back he saw that the buildings were nearly all in flames. A number of people were soon at the scene but could do little to save anything, as the fire spread rapidly. A team of horses put in the stable for the soon hour was rescued with difficulty and at the risk of his life by the hired man, Mr. McGregor, who had both arms severely burned. The two colts which perished were also put in the building for feeding a short time before. A wagon loaded with fence rails and a grinding mill, both outside and a little distance from the barn, were consumed, as the heat was too great to allow of their being removed. The pig pen which was across a lane between it and the barn could not be saved for the same reason. This contained four large and ten small pigs. Fortunately the wind was in a favorable quarter for saving the dwelling house. An old frame building standing between the barn and the house caught fire in several places and was only saved by great effort. A large quantity of stovewood at the back of the barn and some distance from it was saved with considerable difficulty as the wind blew the burning embers directly towards and into it.

U. F. O. NOMINATION MEETING

The United Farmers of West Middlesex met on Wednesday in Mount Brydges and arranged to hold a convention on May 16. The villages of the riding will be asked to send delegates to the convention on the same basis as the townships, four from each polling subdivision. Mr. Drury is expected to attend the convention.

SEARCH WAS FRUITLESS

License Inspector Bolton, T. Stratton, of the Provincial Police Force, and J. B. Henry, town constable, probed into a carload of stable manure consigned from Toronto to a Chatham citizen one day last week. It was suspected that the car contained liquor concealed in the fertilizer, as the shipment was quite unusual one. The car had been disconnected from a train at Glencoe owing to a hot box. The search revealed nothing but a strong odor, which experts agreed was not produced by whisky, good, bad or indifferent.

On the same day the inspector made a regular inspection of the town pool rooms and found everything in good order.

DEATH OF AGED MOSA LADY

The death occurred at the home of her daughter, Mrs. Isaac Walker, Mosca, on Thursday morning, May 3, of Mrs. Mary Jane Corbett, widow of the late Wm. Corbett, in her 83rd year. Mrs. Corbett was an invalid for number of years, and had resided with her daughter since last fall. She is survived by three daughters and one son—Mrs. W. A. Rodham, of Fardo, N. Dak.; Mrs. Ross Lamont, of Detroit; Mrs. Isaac Walker, of Mosca, and James Corbett, on the homestead. She also leaves two brothers and two sisters—Sam Parish, of Oil Springs; John Parish, of Windsor; Mrs. Carlton, of Petrolia, and Miss Ann Parish, of Glencoe. Her husband died one year and six months ago and a daughter, Miss Minnie Corbett, died one year ago on the same day as her mother.

Funeral services were held on Saturday afternoon at the residence of her daughter, Mrs. Isaac Walker, conducted by Rev. A. S. Whitehall, pastor of the Methodist church, assisted by Rev. Wm. Willans, rector of the Anglican church. The pallbearers were Russell Parish, Harold Bechill, George Carlton, D. Secord, D. Mitchell and Ross Douglas. Those who attended the funeral from a distance were Mrs. Lamont, Detroit; John Parish, Windsor; Sam Parish, Oil Springs; Mrs. Carlton and Mr. and Mrs. George Carlton, Petrolia; Mrs. Morgan, Miss Lillian Morgan, Mrs. Routley, Miss Sybil Routley and Mrs. McClung, Watford.

CROPS IN ONTARIO

The latest reports from the Department of Agriculture, Toronto, show Middlesex in the lead for the value of land, buildings, implements and live stock on hand, with Kent second on the list. The lenders in total wealth are:—

Middlesex.....\$84,484,627

Kent.....76,465,711

Time to return your neighbor's snow shovel and borrow his lawn mower.

HIGH HONORS FOR ORCHESTRA

Other Pupils of Prof. Gordon Also Win Distinction

At the Ontario musical festival held in Massey Hall, Toronto, last week, Prof. Howard Gordon's orchestra captured the gold medal, first prize in the competition for high school orchestras open to the province, and also the shield, emblematic of the provincial honors. The instructor is well known locally through his musical work.

Apparently daunted by the difficulty of the test numbers no other orchestra contested for the honors. To secure the reward, however, it was necessary for the competitors to receive the judges' rating of 80 per cent., and Prof. Gordon's orchestra were well above that mark with a rating of 90 per cent.

Judges and music critics were unstinted in their praise of the artistic ability of the orchestra, which is comprised of W. Ellison, Port Stanley; Ella Sexton, Strathroy; and Ella Martin, Alvinston, first violin; Jean McKnight and Helen Barnum, Aylmer, second violin; James Barnum, Aylmer, viola; D. Wright, Strathroy, solo cello; M. Bindner, Alvinston, and Fred Barnum, Aylmer, cello, and Miss K. McKnight, Aylmer, piano.

Donald Wright, 14-year-old son of Mr. and Mrs. E. J. Wright, Strathroy, won second place in the open event for cello. He competed against adults, and was complimented by the judges. In the vocal competitions, Miss Ethel George, of Glencoe, was awarded 78 marks and fourth place, and Miss Olive Black, of Appin, 76 marks. Little Miss Virginia Clarke, daughter of Mr. and Mrs. B. F. Clarke, of Glencoe, was awarded sixth place in the violin class for children under 12 years.

All the above are pupils of Prof. Gordon. There was a large list of competitors. Miss Pearl George assisted Prof. Gordon in training the school children and was their accompanist in Toronto. She is a gold medalist of the London Conservatory of Music.

HORSE SHOW AND RACE MEET

The annual horse show and race meet will be held in Glencoe on June 13th when \$1,000 in purses will be offered.

TRACTOR IN A RARE STUNT

Last Thursday appears to have been a day of mishaps for Bernie Galbraith, reeve of Ekfrid township. Besides the burning of his farm buildings and his brother's thrilling experience with a horse, the farm tractor performed a stunt of its own earlier in the day. Mr. Galbraith was engaged in plowing and stopped the tractor to wave his hat at some cattle to drive them through a gate-way. In doing this he unconsciously took his foot off the clutch pedal, throwing the motor into gear. The tractor made a leap forward, throwing Mr. Galbraith from the seat, and taking the plows with it tore through a rail fence, down into a pond of water six feet deep and up the bank on the other side, demonstrating its power qualities in no uncertain measure but doing no harm.

WEST MIDDLESEX SCHEDULE

Five-Club Circuit Gives Promise of Interesting Baseball

Delaware, May 6.—The schedule of the West Middlesex Baseball League for the 1923 season has been adopted. The league, consisting of five teams, Mount Brydges, Appin, Newbury, Melbourne and Delaware, hold every prospect for a successful season. The clubs are working out regularly and are fast getting into shape.

Following is the schedule:
May 18—Mount Brydges at Appin.
Newbury at Melbourne.
May 25—Melbourne at Delaware.
May 28—Appin at Newbury.
May 29—Newbury at Melbourne.
June 1—Newbury at Delaware.
June 4—Delaware at Newbury.
June 6—Appin at Mount Brydges.
June 8—Mount Brydges at Melbourne.
June 12—Appin at Melbourne.
June 15—Melbourne at Mount Brydges.
June 19—Mount Brydges at Delaware.
June 22—Appin at Mount Brydges.
June 25—Mount Brydges at Appin.
June 29—Newbury at Mount Brydges.
July 6—Mount Brydges at Delaware.
July 12—Appin at Delaware.
July 19—Delaware at Melbourne.
Mount Brydges at Newbury.

FOR NORTHERN RELIEF

The Ontario Division of the Red Cross is appealing for funds to relieve the needs of the people of Coburne who have suffered so severely from an epidemic of typhoid fever. The town itself has struggled bravely but is at the end of its resources. The Red Cross has sent supplies, nurses and food, but many of these people will not be able to work for many weeks. The Red Cross will appreciate public sympathy throughout the province in the work which they have undertaken on behalf of these stricken people.

Pure Green Tea— is guaranteed the finest when it bears the name

"SALADA"

Famous for its Flavor—Just try a sample.

THE HOME GARDEN AND
CANNING SHELF.

We usually can products to cover thirty weeks of the year when fresh products are too high-priced for frequent consumption. The table following gives the necessary amount per person. Cut this out and watch it through the summer and see if you are accomplishing your goal.

PRODUCT PER PERSON FOR THIRTY WEEKS.

1. Greens, spinach, dandelions, chard and other greens. Five quarts (one serving per week).
2. Tomatoes, ten quarts, (two servings per week).
3. Other vegetables, peas, beans, beets, carrots. Fifteen quarts (two servings per week).
- Supplement canned vegetables with stored ones, such as cabbage, rutabagas, onions.
4. Fruits (including jellies). Thirty quarts.
- Supplement canned fruits with dried or stored ones, such as prunes and apples.
5. Meats, thirty quarts. Through the warm months, beginning April through October.

You will notice that we recommend the eating of greens at least once a week, tomatoes in various forms, twice a week, and the other commonly canned vegetables also twice weekly. This makes a total of five days for which the canned products cellar is responsible. The remaining two days should be supplied by our commonly pitted vegetables for we should eat one generous serving of vegetables in addition to potatoes, at least once each day. Children under seven years of age should not be counted in when estimating the amount of sweet corn needed for it is not good for them, but they can eat all other products in considerable quantities and be the better for it.

Fruits should also be included in every day's menu. It is never difficult to interest the housewife in putting up berries and tree fruits. They always keep easily and furnish for her table an attractive, wholesome dessert. The amount given below, of course, is a minimum diet requirement and many of our readers will doubtless find they have gone far ahead of this chart. In general, it should be said that there should be equal amounts of fruit and vegetables put up for the winter. If this were true we would find high standards of health throughout the country. It is the continuous unvaried diet of meat, potatoes, bread and butter, and pie that becomes a menace ultimately to the family which keeps itself to these foods, even though generously supplied.

LOCATION OF THE GARDEN.

The garden should be near the house since it is often cared for after supper, or odd times, and it is also more easily accessible for the housewife. Since rapid growth is desirable, a protected spot should be chosen. A southern or eastern slope is best with

The Gift Of The Gods

BY PEARL FOLEY.
(Copyright.)

CHAPTER IV.—(Cont'd.)

When Tu Hee came to, for a few seconds the past hour was blotted from his memory and she gazed about bewildered. The couch she was on wasn't her own and the room was strange but very pretty. It was all pale blue and gold, like a foreign woman's boudoir. Foreign—ah!—she covered her face with her hands as memory rushed over her. Then two soft hands were on her own and a familiar voice spoke to her, "Dear little girl—little Tu Hee, don't be frightened. It's all right, dear."

Slowly Tu Hee withdrew her hands. Bewilderment was still on her face as she murmured, "It's the American, Mrs. Claymore. Please, please, why am I here?" The woman sat on the side of the couch. Taking one of Tu Hee's hands in her own she said, "It has been a terrible mistake, dear. The Government officials took you for some one else."

"Some one else?" questioned Tu Hee, perplexity in her voice. "Who? Do they not know I belong to the house of the great Weng Toy?" "They do now, dear. It will all be explained later. Just rest for a few minutes."

"No, no," exclaimed Tu Hee, slipping from the couch. "I rest at home! My voice was almost childish in its appeal as she turned to Mrs. Claymore. "Please—my friend—take me home."

"Won't you please have some tea first?"

Tu Hee looked into a pair of brown eyes so big and friendly that her lips parted a little and she bowed gracefully, as she obediently took the beverage.

No word was spoken as she partook of the refreshment, and she stole surreptitious glances at the girl opposite her. When she had sipped the last of the tea, the foreign girl leaned forward and addressed her in a low, eager tone. "My name is Grace Ashton. If you can ever forgive us for this painful affair, please let me hear from you some time."

Tu Hee smiled and bowed again, and still a little bewildered allowed herself to be led by Mrs. Claymore to a waiting car, where she was embraced by the frantic Lun, who laughed and cried in turns at seeing her child safe.

Beside the car stood the British officer, a long thin plaster dividing the dark brown of his cheek with its startling whiteness.

At sight of him Tu Hee shrank back, clinging to Mrs. Claymore. David came forward. A shadow was on his face and his voice was tense with feeling as he tried to right himself in the eyes of the Chinese girl.

"I know my conduct appears to you inexcusable, Miss Weng Toy, but when you are strong enough to listen to an explanation I feel sure I can clear myself. Won't you trust me and give me the honor and pleasure of driving you to your home?"

Something in the voice stirred Tu Hee strangely. Instinctively she trusted this foreigner, and wondered at the moment how she could have ever feared him. His gaze was so clear and direct. She bowed her assent, and David handed her into the front seat of the car.

Mrs. Claymore smiled, relieved that a tense situation was over, and took her place in the back, beckoning Lun to follow her. "Lun, don't be silly! Deal with it, however. She had had enough of foreigners and foreign automobiles. Nor was she willing that the monster should go without her until it had disgorged her child.

Tu Hee was half inclined to obey her nurse, but a glance at the officer beside her with its long white displacement decided her. Peremptorily she turned. "Please, Lun, seat yourself quietly. This foreign gentleman wishes to take us quickly to my uncle."

Lun turned an aghast face on her mistress, twisted her hands nervously, and seated herself beside Mrs. Claymore.

But Tu Hee had no thought for Lun. A gratified, pleased smile which she had glimpsed had set her heart beating rapidly, and she felt her mysterious adventure had opened up a glorious new avenue of life.

David drove rapidly. Fain would he have allowed the car to crawl, but common sense ruled, telling him he must clear up without delay every vestige of the blunder caused by the bungling of the officials.

The streets were thronged with people, but for once Tu Hee took no interest in her surroundings. She even felt no shame at riding openly and beside a foreigner. Indeed, the significance of her action did not dawn on her until hours afterwards and she had had time to think in the seclusion of her own apartment.

The car stopped at the American house on the hill, but Mrs. Claymore insisted on accompanying Tu Hee right to her home. She laughed at what she called male denseness. "I think, David, the present situation needs a woman's tact, and I am sure Miss Weng Toy will agree with me."

Tu Hee had an idea her uncle's wrath might be considerably mitigated by the gracious American woman and, considering her former feelings, it was a surprise how very much she wanted the whole nasty affair shoved back into the past. She could not exactly define her reason. She dared not acknowledge that the silent, courteous man beside her figured in it largely.

As they neared the great entrance gates of her home, a touring car turned out and approached them. Tu Hee leaned forward eagerly. The veneer of over-civilization dropped from her, and clapping David's arm she said tremulously, "My uncle, sir. He approaches in the grey car."

David drew up, his gaze fixed with

interest on the occupants of the oncoming machine. Weng Toy's face was set in tense lines. He glanced neither to left nor right, nor did his companion or driver.

Tu Hee, fearful of their passing right by, rose to her feet. Her voice was a half laugh and a half sob as she called, "Please stop, Uncle Weng—it's Tu Hee."

The amazed driver put the brakes on so suddenly that only sheer luck averted a catastrophe. The huge car swung round like a balked animal, but as it saw fit to keep its balance, no one bothered his head as to what might have been.

Weng Toy's dignity deserted him entirely. He did not wait to open the door, but vaulted like a school boy, and ran, arms outstretched and bareheaded—his hat had already been jolted off—to the excited Tu Hee.

"Yes, yes," assured the girl, "I am safe and sound, uncle. It was all a stupid mistake." She glanced shyly at David. "Mrs. Claymore will explain, uncle—and please thank this gentleman for his hand-clasp."

Weng Toy stiffened. He bowed courteously to Mrs. Claymore. Then his eyes scanned keenly the face of the foreigner seated beside him, and he lingered on the court plaster, but she beamed again as she saw his hand extended. She knew trust always went with the mandarin's hand-clasp, but she was not to be deceived.

Tu Hee instructed the chauffeur to drive both cars into the courtyard, and they all walked back to the house. Mrs. Claymore cleverly monopolized the conversation, and the foreigner beside Lun, while Tu Hee followed behind with Chu Sing.

Tu Hee was asked all manner of questions by her ruffled companion, which she answered evasively, and when he grew insistent pleaded she was too tired to talk, that Uncle Weng would explain.

For the first time in her life Tu Hee experienced the feeling of envy. She envied Lun. The old nurse was talking and gesticulating volubly. The girl's heart fluttered. Even she, stolid Lun, had captured the foreigner.

Tu Hee was served in the library, a concession extended to only Weng Toy's intimate friends. Tu Hee hadn't hoped for this, but a glance at her face told her that Mrs. Claymore's tact had won the day and banished the last vestige of a cloud. Not only this, but the mutual goodwill between her uncle and the officer was unmistakable.

Chu Sing was the only one of the party who was out of his element. He sat apart, moody and silent, nibbling cakes and drinking tea, and all the time furtively watching the Englishman. The persistent question which darkened his face was whether the foreigner's wound meant an act of chivalry to Tu Hee.

Weng Toy urged his guests to remain for dinner. David would willingly have set aside his business engagement, but a warning glance from Mrs. Claymore bade him leave with her, and he reluctantly obeyed. However, he eagerly accepted Weng Toy's invitation for the next week, and as he bent over Tu Hee's hand at parting he felt like imploring her to not forget him entirely in the long interval of seven days. But commonsense triumphed again, and merely murmuring a few common civilities, he accompanied Mrs. Claymore from the room.

When the door had closed on the foreigners, Weng Toy took Tu Hee's face between his hands. "My little girl looks not unhappy or downcast for all her harrowing experience. She has truly imbibed the brave spirit of the house of Weng Toy."

"It was terrible, first, uncle," Tu Hee shuddered, "but," and her eyes beamed up at him, "the foreigners dispelled all that. They were very kind to me."

"That young man is here on an important mission for the great war. He is already a hero, my child. The scar he carries on his foot is the symbol of his share in the ultimate triumph of right over the powers of darkness in Europe."

Tu Hee's eyes shone like twin sapphires as her hero worship was being fed.

Weng Toy, unaware of the fire that had been kindled, continued. "Mrs. Claymore wished me to explain to you more fully the unfortunate blunder of the Government officials, as she did not wish to harass you with details, when you were among strangers and still suffering from the effects of the shock. The two men who kidnapped you mistook you for a German spy who is in Pekin trying to undermine China. Stupid of them, but as my little girl has come to no harm the best thing to do is to overlook it and forget the whole affair, especially as they thought they were working for China and the God of Justice. Now, child, run up to your room and rest for an hour before dinner. I must go and explain to Chu Sing."

Tu Hee's feet barely touched the stairs as she flew to her room and her heart sang until she was dizzy. "He is a hero. He won his hero in the great war of justice."

(To be continued.)

The Sky.

The sky is a drinking-cup.
That was overturned of old,
And it pours in the eyes of men
Its wine of airy gold.

We drink that wine all day.
Till the last drop is drained up.
And are lighted off to bed!
By the jewels in the cup!

—Richard Henry Stoddard.

Forest Fires Increase Newsprint Price.

One of the market features that is keeping the publisher on his toes today is the ascending prices of newsprint. Only recently this price has been advanced \$5 per ton, and another increase of a similar amount is expected. In an interview on Tuesday last P. F. Dodge, president of the International Paper Co., said, "I do not see how newsprint prices can help but go higher in view of the increased cost of raw materials, transportation, etc."

Pulpwood is by far the most important of the raw material entering into the manufacture of newsprint. To secure pulpwood the mills have to go farther and farther away every year. Labor and camp equipment and supplies must be sent greater distances, and the cost of delivering the pulpwood to the mill is greater. While the annual cut of pulpwood has grown to enormous dimensions, in 1920 amounting to over four million cords, forest fires are devastating more of our forested areas to a far greater extent.

In the province of Quebec last year 740,000 acres of forest land was burned over, according to Hon. Honoré Mercier, Minister of Lands and Forests, and in 1921 over 800,000 acres was destroyed.

While the publisher will no doubt be compelled to absorb a large portion of the increasing price of newsprint, this increase must eventually come from the reader; consequently both the newspaper publisher and the reader are directly interested in the protection of the forest from fire.

This year the forest fire hazard will undoubtedly be severe, and every citizen should recognize his personal responsibility and do all he can to save the forests for labor-employing industries.

Fooling the Bugs.

A motorist in the Southern States once stopped for water at a dilapidated house where a barefooted man, leaning against a rickety fence, was gazing meditatively across a field that had grown up to weeds. "How is your cotton this year?" the motorist asked.

"Well, sir," replied the man, "I ain't got no cotton. I didn't plant none cause I was afraid the boll weevil might be bad."

"How is your corn?"

"Well," came the reply, "I didn't plant no corn neither, for I didn't know if we'd git rain."

The motorist hesitated. "How are your sweet potatoes?" he asked at last.

"Well, now, stranger," the man replied, "you see, it's just this way. I didn't plant no sweet potatoes cause I was afraid the bugs might take them. No, sir, I didn't plant nothin'. I just played safe."

Worms and Cold Water.

Magistrate— "What's your name?"

You've been here before!"

Lyre Bird— "Lyre, Lyre."

Magistrate— "Liar, am I? Officer, take him back. Worms and cold water for thirty days!"

Bees Have Hip Pockets.

In the bee's legs are pockets for holding pollen, each pocket being closed by rows of bristles which interlock in the most wonderful manner, so preventing the pollen from falling out.

give your digestion a "kick" with WRIGLEYS.

Sound teeth, a good appetite and proper digestion mean MUCH to your health.

WRIGLEY'S is a helper in all this work—a pleasant, beneficial pick-me-up.

Does Your Touch Sense Ever Play You False?

Did you know that besides optical illusions, there are illusions of feeling? The proof is very simple. Take a small round pellet about the size of a pea. Cross the middle finger over the thumb side of the first finger. Now insert the pellet between the crossed fingers and roll it about the surface of the table. You will be astonished to find that you distinctly feel two objects about half an inch apart.

The explanation of the experiment rests in the fact that the pellet is touched by the opposite sides of the two fingers, and, consequently, two sensations of touch arise instead of one.

Start a Compost Heap.

To start that useful adjunct of the garden, a compost heap, choose an inconspicuous corner and there through the entire season pile all waste that will rot quickly—pea pods, corn husks, grass from mowing the lawn, leaves, tomato vines and pea vines. Now and then throw on a little lime. Every spring sift out the rotted material with a spading fork. What remains will be rich, dark humus, a most important material to revive worn-out soil. The unforgivable offense in the eye of a man who knows how to make a compost heap and how to use it is to have some one dump ashes and tomato cans on it, or other stuff that will not rot.

A Rain Song.

It is not raining rain to me,
It's raining daffodils;
In every little drop I see
Wild flowers on the hills.
The clouds of gray engulf the day
And overwhelm the town;
It is not raining rain to me,
It's raining roses down.
It is not raining rain to me,
But fields of clover bloom,
Where any buccaneering bee
May find a bed and room,
A health unto the happy!
A fig for him who frets!
It is not raining rain to me,
It's raining violets.

—Robert Loveman.

Ontario's First Sunday School Started in 1817

The very first notice of a Sabbath school in Upper Canada appears to have been in June, 1817. William Moon, who conducted one of Kingston's earliest day schools, was influenced by the plea of a Rev. Mr. Cat-trick to lend his school "and services" towards organizing what probably was this province's first Sunday school. Belleville's pioneer school opened doors in 1826, and John Turnbull, Dr. Marshall and Dr. Cooper were its guiding spirits.

By that date Sunday schools had come into general vogue in the old settlements, and were valued and encouraged by all classes of people. They were kept up not only by private benevolence but by the help of the U.C. parliament, which granted \$750 for the "use and encouragement of Sunday schools, and of indigent and remote settlements."

Francis Asbury, the Methodist bishop of the United States, in 1781, founded the first Sunday school in America. It is recorded that in 1790 the U.S. Methodist conference "resolved on establishing Sunday schools for poor children, white and black."

In England, Sunday schools date from 1769, when a Methodist lady, Hannah Bell, "was instrumental in training many children in the knowledge of the Holy Scriptures." Later in 1781, Robert Hall, publisher of the Gloucester Journal, happened to be talking on the street to a lady who afterwards became the wife of Samuel Bradburn, celebrated lay preacher. He pointed out some ragged urchins, asking, "What can we do for them?" "Let us teach them to read and take them to church," was the reply. He immediately proceeded to try out the scheme, the pair attending the first quota of neglected waifs to the church, exposed to the comments and laughter of the populace. Such was the origin of our present Sunday school, an institution which has perhaps done more for the church and the social improvement of Protestant communities than any other agency of modern times, the pulpit excepted.

Increasing of Telephone Sound.

An ingenious method of increasing the sound in the telephone is to heat up the transmitter, and in this way it is claimed some surprising results can be obtained. A Danish engineer applies heat to the microphone transmitter so that the air becomes rarefied and consequently has a different action on the microphone, as he claims, and speech is much louder than before.

The director of the state experiment establishment took up the matter and made a number of researches, the results of which appear to indicate that the effect is well marked. Then the apparatus was tested on a telephone line and it is reported "speech was so loud at the receiving end that it could still be heard when the receiver was laid upon a table and the persons present stood off at some distance. It appears, however, that the idea is not a new one, as a heated microphone was used before the Danish experiments by the French telegraph engineer Germain and with good results.

Progress of Liquid Fuel.

For a long time liquid fuel was employed only for steam production, but an indication of the wide application that it may have in many forms of industry is afforded by the experience of the owners of a large glass manufactory at South Hackney, in England.

The experiments there were begun more than ten years ago and after overcoming many difficulties a special form of burner was evolved which appears to be entirely satisfactory. Four to five thousand gallons of oil are burned every week with perfect combustion and a total absence of smoke and the temperature obtained ranges from that of a baker's oven to that required for melting crucible steel.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

SUMMER FEED FOR COWS.

Tiding the cows over the dry period of summer is a difficult and important matter for us dairymen. Cows which freshen late in winter and in the spring produce well for a short time and then fall off heavily in the milk flow, due very largely to the decline of pasture and the lack of some early maturing succulent feed. Oats and peas make an excellent combination for summer feeding. I have grown them heretofore for forage with excellent results. The crop may be cut green and fed as a soiling crop or matured and stored. I would sow one and one-half bushels of oats and one bushel of peas to the acre as early in the spring as the soil can be made ready.

Where a large acreage of clover hay is grown, some of it can be cut early and used for feeding. I have done this as early as the fifteenth of June. Alfalfa can be used in the same manner. A neighbor has been feeding alfalfa as a soiling crop and likes it very much for the purpose.

For summer and early fall feeding, I have been growing a small acreage of sweet corn for my cows. It is ready at a time when pasture begins to decline in quality and aids materially in keeping up the milk flow. Sweet corn is highly palatable and produces a large tonnage of fodder. I sow the corn as early as possible after the early spring frost has melted. A good clover seed which has received a covering of manure during the winter. About twelve quarts of seed per acre are required.—Leo C. Reynolds.

HOW I RAISE BETTER OATS.

From experience covering over twenty years, I find that most inferior oat crops are due to inferior seed. I do not mean that farmers intentionally sow inferior seed, but rather that many farmers sow inferior seed without being aware of the fact.

I find that the cost of improved seed is very low, considering the good results that are sure to follow its use. Nor does good seed necessarily mean high-priced seed. Good seed will make a rapid early growth, which is very essential to a good crop of oats; a good crop is rarely seen from a field that makes a slow growth in the spring. Just as much labor is required to sow poor seed and harvest a small crop as to sow first class seed and harvest a good crop; hence, the balance is all in favor of the better seed.

A good way to secure good seed oats is to take a good variety of native oats and run it through the fanning mill three or four times, until only the largest and plumpest kernels remain. We fan out about 90 per cent. of our oats, leaving only the strongest and

best-filled kernels. This seed will germinate quickly, sending forth strong, hardy shoots. By following this plan year after year, the same strain of oats will increase in weight as well as in yield. Since we adopted this plan, we raise from 25 to 30 per cent. more oats than we were able to raise before. There is no waste in this method, as the light oats are used for feed; whereas, if the oats are sowed without cleaning, a large percentage of the light kernels will not germinate, and will therefore be wasted.

Smut in oats will reduce the yield to a large extent. However, this is easily prevented by the formalin treatment. I find that the amount of seed to sow per acre varies greatly according to the condition of the ground. In sowing grass or clover seed with oats, it is not safe to sow the oats too thick. We have raised our best crops by sowing from 2½ to 3 bushels of oats to the acre. This leaves room for a good seeding for the next year's hay crop. When grass or clover are not sown in connection with the oats, 3 to 3½ bushels to the acre is a safe amount to sow on well-prepared ground containing plenty of fertility.

When farmers are annoyed by oats lodging, most generally it is supposed that the land is too rich. This is not always the case, however; it is often because the soil lacks some essential element. The soil may lack potash, which gives strength to the stalk. If fertilizer, containing a goodly amount of potash, is applied, this trouble may often be overcome.—L. M. D.

APPLE APHIDS EASILY CONTROLLED.

Aphids on apple trees are quite easily controlled by the use of a spray containing lime-sulphur and nicotine applied just as the insects are hatching out in the spring.

There are two kinds of aphids commonly found on buds of apple trees in the spring, one known as the rosy aphid and the other as the green apple aphid. The feeding of these insects results in dwarfed, mis-shapen fruit buds for market and is frequently a serious loss to growers.

Experiments have demonstrated that thorough spraying with a mixture containing two and one-half gallons of lime-sulphur, three-quarters of a pint of nicotine sulphate, and water to make 100 gallons at the time that the tips of the leaves of the fruit buds protrude from one-fourth to one-half inch will control the pests most effectively.

Careful spraying from the ground and under the tree rather than from the top of the spray tank is regarded as an important factor in the control of these pests.

HORSE

Horse stalls so arranged that a heavy inch rope, stretching across each stall behind the horses, saves the necessity of halters. The attachments for each rope are made in a blacksmith shop and must be reasonably heavy and bolted firmly to the stall. One end of the rope is fastened to a ring and bolted to the stall. The other end has a heavy hook to drop into a ring when fastened. Arrange that the stalls are high at the front end so horses cannot reach each other's heads. This method of fastening prevents the horses backing up and kicking at each other. Horses that attempt to kick at another while passing behind soon learn that the rope is there and is effective. Horses are easily cared for and apparently enjoy the greater freedom of their bodies when not tied by the head. The halter headstalls are hung up in case of need, but are rarely used.

Building Up the Poultry Flock

In this bulletin on "Poultry Keeping in Town and Country," Mr. F. C. Elford, Dominion Poultry Husbandman, gives some invaluable advice on how to get pure breeds. He points out that the old theory that mongrel stock gave the best results has not proved true in experiments. The foundation stock, he says, should be pure, but there should be a continuous selection year after year. Only birds of the best type and strongest constitution should be bred. It is advisable for a poultry keeper who does no trap-nesting to purchase a cockerel each year from a good laying strain and use him rather than one of his own breeding. In buying cockerels it is wise to get them, if possible, from the same breeder as the original stock came from.

One way to obtain pure-bred stock is to buy eggs, breeding stock, or day-old chicks. Another way is to buy pure-bred males and grade up the flock already on the plant. The latter way is recommended to increase the egg yield, but is not advised for the purpose of changing a mongrel flock into a pure breed.

Eggs for hatching should be obtained from hardy stock known to be good winter layers and conforming to the general breed type. The nearer home the eggs can be purchased, the better. It should be remembered in exchanging eggs with neighbors that breeding eggs are worth more than market eggs. Never, advises Mr. Elford, be-

cause they are cheap, buy eggs for breeding purposes late in the season. In a climate like that of Canada, chicks hatched before the middle of May give the best results, though with good care they may be hatched several weeks later; but if pullets are not well developed before winter comes they should never be used for breeding. Late hatched chicks are seldom worth the trouble it costs to raise them.

Breeding stock can best be bought in the fall, but if the buying has been left to spring then wait until the breeding season is over. It is wise to stick to the same variety and buy, if possible, from the same source each year. In selecting a male bird choose a bird that is strong in the points in which the hens are weak. If the practice of buying a new male bird each year is followed, the male bird should be taken from the flock as soon as the breeding season is over, and the cockerel disposed of, or separated from the flock, before they become troublesome.

Weedless Farms.

To keep farms free from weeds, few methods give such good results as a systematic short rotation of crops, with regular seeding down to grass or clover at short intervals, remarks the Dominion Seed Commissioner in his bulletin on "Weeds and Weed Seeds."

Weeds are most in evidence in districts where the production of cereal grains predominates and where the systematic alternation of crops is not generally practiced. Thorough cultivation with a systematic rotation of crops, combined with the maintenance of as many sheep as can be kept to advantage, is a certain and profitable means of keeping weeds under control. But superior to all suppression methods is precaution in the sowing of clean seed—that is seed that has been as perfectly purified as possible and which comes off clean land. In many cases proper sieves in the fanning mill will remove most of the weed seeds.

In this backward spring, doing the right thing at the right time is what counts.

The farmer's success is going to depend upon the business he gets. If he waits for the buyer to look him up, or his neighbors to tell everybody about his goods, he is expecting too much of human nature, and it will be a long time before his sales will reach any noticeable volume.

THE CHILDREN'S HOUR

MY NEST.

Up on a hilltop ever so high
There's a grassy nest where I love to lie.
There I keep very still,
And watch until
All kinds of wonders pass me by.
There's a flutter of wings, a bird draws near;
He knows I'm a friend and he has no fear.
He swings to and fro
On a branch below
And trills a song that I love to hear.

Bright as the sun and blue as the sky
Flutters a brilliant butterfly;
I can hear a deep humming,
A bumblebee's coming!
He crawls deep into a flower near by.

Hello, Mr. Squirrel, so gay and so bold,
You laugh, although you pretend to be cold.
Your face looks puffed,
For your cheeks are stuffed
As full of nuts as they can hold.

A crimson lizard I can see;
He basks in the sun and he watches me.
His bright little eyes
Show no surprise.
Perhaps he thinks I am part of the tree!

A sea gull floats through the blue of the sky.
He flaps his wings with a wild, shrill cry.
Just over the grasses
A dragon fly passes,
And locusts snap their wings as they fly.

Running along with a jump and a bound,
Comes Mr. Field Mouse. Now what has he found?
He looks so merry;
In his mouth there's a berry!
Then he disappears in his hole in the ground.

So now do you see why I love to lie
In a grassy nest on the hilltop high
And just keep still
Such wonderful things come passing by—
Ethel C. Brown, in Youth's Companion.

HOW A BIRD FLIES.

How many of us can answer the question: "How does a bird fly?" It seems simple enough, and yet it is a problem that the wisest in such matters have made a study.

The most prominent fact about a bird, in which it differs from every other creature, except the bat and insects—is its power of flying. For this purpose the bird's arm ends in only one long, slender finger, instead of a full hand. To this are attached the quills and small feathers on the upper side, which make up the wing.

Observe how light all this is; in the first place, the bones are hollow, then the shafts of the feathers are hollow, and finally, the feathers themselves are made of the most delicate filaments, interlocking and clinging to one another with little grasping hooks of microscopic fineness. An open wing forms a hollow on its under side like an inverted saucer; when the wing is forced down the upward pressure of the air, caught under the concavity, lifts the bird up, much as you hoist yourself up between the parallel bars in a gymnasium.

This explains how the bird keeps itself in the air, but how does it sail forward at such terrific speed? He never in this way could get ahead, and the hardest question is still to be answered. Now the front edge of the wing, formed of the bones and muscles of the forearm, is rigid and unyielding, while the hinder margin is merely the soft, flexible ends of the feathers, so when the wing is forced down the air under it, finding this margin yielding, the easier will rush out here, and in so doing, will bend up the ends of the quills, pushing them forward out of the way, which of course, tends to shove the bird ahead. This process quickly repeated by the flapping of the wings, results in the bird moving forward in its flight.

RURAL OPPORTUNITIES.

Boys and girls, as well as adults, who are fortunate enough to live in either small towns or in the country,

THE WEST FOR ANOTHER CROP.

The western farmer is always optimistic in the spring, and in spite of the talk of limited markets and other adverse conditions, Canadian farmers are preparing for a big crop again this year.

have golden opportunities to make life easy for all kinds of dumb animals, because they live where the animals live. Not all of the humane propaganda should be distributed in cities, one can readily see. Animals used on the farm often suffer, when this could be alleviated, were there some boy or girl or older person who would make the effort to see that animals are given proper care and treatment.

Instead of viewing your fate as unfortunate because of the fact that you have to live in the country or in a village, you should be thankful that you were born so close to nature. You have opportunities to study wild life, and to help conserve it, that many city folks envy.

Humane clubs could well be organized in various rural communities and much helpful propaganda could be spread. A country store, church, or schoolhouse could serve as a meeting place. Humane literature could be distributed from small libraries found in villages, or from the rural school. Nature studies could be made by classes, whose pupils would not have to go far before finding something to study.

This is one way by which monotony can be routed, and the good part about it will be that you are helping to make the world lovelier and the life of dumb animals more comfortable.

Some day you may move away from the country—though it is to be hoped that you will not—and what you have learned about nature and all forms of wild life will be of considerable value. To say the very least, it will prove a pleasant, wholesome memory.

Decide that you will do something along this line in your community now. Do not wait until conditions seem more promising.

There is a great work for you to do in your community.

Approved Poultry Flocks.

With a view to improving the farm poultry in the Province of Manitoba, the Department of Agriculture at Ottawa has set about the establishing of approved flocks of Barred Plymouth Rocks. These flocks are intended to provide the source of improved breeding stock and hatching eggs for the use of farmers. This work is in charge of the Manitoba Poultry Promoter of the Live Stock Branch, who enters into agreement with farmers wishing to take it up. Under the agreement the breeder places his flock in the hands of the promoter who sees to it that only approved hens and cocks are kept for breeding purposes, and that only eggs from approved parentage and up to a required standard are incubated. Laying records are to be kept, and during the season the flock is to be culled by an official of the Department. These and other requirements are to be observed for a period of three years. The Poultry Promoter, during this period and afterwards, will assist in securing a market for the produce of the flock and render such other assistance as will enable the breeder to keep his flock up to a high state of quality and profit. The details of the scheme are published in Pamphlet No. 25 of the Department of Agriculture, which is available from the Publications Branch of the Department at Ottawa.

This pamphlet also explains the principles and requirements of the Record of Performance "A" for poultry by which certificates of production are granted for trap-nested hens that lay the required number of eggs in a year.

The Live Stock Market.

Top prices for steers were a shade lower in the week ending April 12 at Montreal and Toronto, when compared with the same date last year, but at Winnipeg there was no change and at Calgary and Edmonton they were 65 cents and 50 cents respectively, higher, according to Dominion Live Stock Branch reports. Calves showed no change at Toronto, were a trifle lower at Montreal and at Winnipeg, although absent of the previous week, but manifested an improvement at both Calgary and Edmonton. Hogs were steady at the previous week's prices at Toronto and Montreal, but were weaker at the three Western points. Lambs were up \$1.00 in all the markets, compared with last year and unchanged as regards the previous week. Sales numerically all along the line were greater than last year, excepting calves, which showed a slight falling off. Up to date this year, the cattle billed through have been 34,103 against 20,517 for the same period of 1922, hogs 56,150 against 18,700, and sheep 15,758 against 15,559.

Feeding Geese and Goslings.

Geese, like ducks, require a large proportion of roughage in the feeding ration. This can be best supplied in the winter by the use of clover hay and roots. In summer, if given the range of a good pasture, a flock of geese require little else, unless extra rapid growth is desired. According to Dominion Experimental Farm bulletin No. 91, goslings require warmth and rest the first day. On the second day they should be placed where they will have free access to a plot of tender grass, should be supplied with all the succulent green food they will eat, together with mash feed three times a day. If they are to be marketed as green geese it is advisable to feed mash heavily from the start. If they are to be kept as stock, use more hard grain, and when the goslings are strong enough, let them have the freedom of range on the pasture lands, and they will require only a light feed of mash in the morning and grain at night.

For fattening ducklings and goslings, feed a mash moistened to a creamy state, consisting of 1 part bran, 2 parts shorts, 5 parts corn chop, 10 per cent. beef scrap, about 5 per cent. sand, reducing the green food to feed half the quantity previously fed. Give plenty of water at feeding time. When geese have been on pasture all summer and are penned in

Fresh air and BOVRIL

—or, as the Report of the Ministry of Health of Great Britain said: "a sanitary environment and sound nutrition"—are the great safeguards of Health.

Home Education

"The Child's First School is the Family"—Froebel.

An Old Fashioned Quality—Respect—By Carrie A. Ritter

"Mother had a hen-party yesterday," gleefully exclaims a young girl of sweet sixteen. "Mother had seven old hens here and you ought to have heard them cackle and seen them eat ice cream."

Many people might call this a cute up-to-date speech, but the mother of this same girl complains, "Mary is not respectful to me. She thinks I'm old, too, and I'll not be fifty-six until September. I don't see why she talks so about my age."

Casually observing these cases we wonder how much of this is training or rather lack of it. We notice the same attitude in the parents not infrequently in speaking of, or to, elderly relatives. Children are often allowed to be saucy to their grandparents or to their elders.

So it comes to us that the atmosphere in which a child is reared is responsible for his respect or disrespect for those older or in authority. Sometimes it is not the words so much as the tone in which the parent speaks of an elderly person that conveys disrespect.

There has always seemed to me to be a natural bond between children and very elderly persons. The little ones, who are the members of the older generation, tell delightfully. I know of a case in which a grandmother and her only granddaughter are chums. They camped together for a month when the rest of the family did not care to go. "Grandma had the time of her life," explained the girl, "only we did eat such a lot, both of us, it kept her busy."

The Granary Converted Into An Elevator.

The average farm granary with bins eight feet or more in height, with a store-away attic, is usually not economic. A granary elevated on piers four feet or more and the bins extended to the eaves doubles the carrying contents at small cost. An elevator shaft with cups is a comparatively cheap equipment. A four to six-horse power gasoline engine is used for driving the belt to elevate the grain. Grain arriving at the elevator can be scooped into the grain dump at a rapid rate.

Reloading grain from bins by gravity into the alleyway in bags or bushels, leaves only a few hundred bushels to be scooped out of the bottom. Reloading can also be accomplished through the elevator's operation and spouted into the grain tank. The examination of any grain elevator in your market town will give the basic ideas for remodeling a granary into a farm elevator for storage. A grain tank and the elevator reduce the bags necessary on the farm to the minimum. These fixtures are permanent, while bags are in a constant condition of deterioration.

A roof over the end of the granary elevator used for the dump for unloading, makes a good place for a grain tank to stand when not in use. A four-foot alleyway running through the building at right angles to the dump gives access to all the four bins. This economy of space necessitates an outside stairway. All the windows of the granary are removed except in the alleyway.

Grain which may be wet and inclined to heat can be changed to other bins through the elevator with comparative ease and given quite a good aeration.—J. McBride.

When Calves Can be Slaughtered for Food.

N. E. Ontario county—What is the age at which calves may be slaughtered? Regulations adopted under the Meat and Canned Foods Act provide that no animal under three weeks of age may be slaughtered for food.

ISSUE No. 19—23.

THE BROODING OF YOUNG CHICKS

The essential factors in successful brooding of young chicks, whether natural or artificial, are healthy, vigorous chicks, proper temperature, sanitation and plenty of room.

Where only a limited number of chicks are raised each year, natural brooding has many advantages. The temperature is controlled by the mother hen, and, as she can accommodate but a restricted number of chicks, there is very little danger of overcrowding. A quiet but not clumsy brooding hen should be selected, after making sure, before allowing her any chicks to brood, that she is entirely free from lice.

Artificial methods are advocated wherever large numbers are to be brooded. The coal-burning brooder has reduced cost, and to a large extent lessened the labor required. These brooders are usually operated in a colony house, and, as soon as the chicks cease to need the heat, may be removed and the house still used for accommodating the chicks during the summer.

The first requirement of young chicks is warmth. The temperature should be about 95 or 100 degrees on a level with their backs before they are placed in the brooder zone. This temperature may be lowered gradually from week to week, depending on the season. In the early part of the year the chicks will require brooding at a higher temperature for a longer time than later in the spring. Those hatched between April 1st and May 1st will require brooding for about eight weeks.

It is most important for the first few nights after they are placed in the brooder house to see that the chicks do not get too far away from the source of heat or bunch up in one corner. A good plan is to have some adjustable arrangement made which will permit the chicks to pass no more than two or three feet away from the brooder at first; then, daily, they may be allowed a little further away, until by the end of a week they have the run of the room. Care should be taken not to drive the chicks away from the brooder through too much heat. On the other hand, there must not be so little heat as to induce crowding under. Watch the actions of the chicks as well as the thermometer. When they are most comfortable they flatten out just around the edge of the brooder.

Nothing is so dangerous as overcrowding. The capacity of many brooders is overestimated, and it is better never to use to full capacity in any make.

Sanitation and cleanliness are important points to watch. All brooders and rooms which have been in use before should be thoroughly cleaned and disinfected before being used each year. Clean, fresh litter, free from mold or mustiness, should be used. All water fountains, feed troughs, etc., should be washed with a disinfectant solution every day or two.

Summing up: given good, healthy, well-hatched chicks, the brooding points are a comfortable temperature, perfect cleanliness at all times, no danger of overcrowding, only gradual changes in temperature and feeding methods.

Poultry Record of Performance.

That the Record of Performance for Pure Bred Poultry, started in 1919, by the Poultry Division of the Dominion Live Stock Branch, is rapidly increasing in popularity is shown by the fact that while in the first year only 67 breeders with 4,436 birds made entry, in the third year, that is 1921-22, 122 breeders with 11,579 birds were represented. In Ontario, in 1919 the breeders making entry numbered 26 with 1,085 birds. In 1921-22 the number of breeders represented was 40 with 5,065 birds, including 2,407 Leghorns, 1,147 Plymouth Rocks, and 1,450 Wyandottes. British Columbia came second with 25 breeders and 1,630 Leghorns, 367 Plymouth Rocks, 398 Wyandottes and 135 Rhode Island Reds. Quebec was third with 18 breeders and 910 Plymouth Rocks, 785 Rhode Island Reds, and 315 Leghorns. Alberta made a big jump in 1921-22 with 16 breeders and 662 birds, including 315 Plymouth Rocks, 137 Wyandottes, 110 Rhode Island Reds and 50 each of Leghorns and other breeds, against one breeder with 45 Wyandottes in 1919-20.

Use of Yellow in Flower Beds.

The following points should be borne in mind in using yellow in the garden: 1. Use the pale straw and maize tints anywhere, just as you would white. 2. Clear yellow with most blues, using cream white freely in the group; creamy yellow any depth with any blue, white not being necessary. 3. Bright yellow with deep blue and deep violet (not the red-purple). Clear yellow very sparingly with pale blue-violet, and not at all with pink. 4. Remember that yellow "carries" farther than other colors, so it is best to have the other color in a combination in greater quantity than the yellow—"picked out," as the dressmakers would say—with touches of the fairy gold.

A little fore-talk would save much after-tail.

Gold Seal Congoleum Week

NARROWLY ESCAPED DEATH

Dragged Forty Rods With Foot Caught in Horse's Halter

An incident of a most thrilling nature occurred at the farm of Bernie Galbraith in Ekfrid on last Thursday evening. Following the fire reported elsewhere, a number of the neighbors were at the scene keeping watch lest the wind might carry sparks and start a fresh outbreak. A young horse named during the fire been hurriedly turned into the pasture field without removing a long halter from about its neck. Malcolm Galbraith, brother of Bernie, undertook to catch the horse, an unbroken and somewhat fractious animal, and untie the halter. In attempting to do so the rope became fastened about his ankle and the horse bounded away, dragging Mr. Galbraith some 40 rods in a semi-circle around a ten-acre pasture field. No one doubted but that he would be killed outright, and it was impossible to give him any assistance. Finally the rope was disengaged from his ankle and it was a great relief to the onlookers to see Mr. Galbraith stand up and to hear him shout, "I am all right, boys."

While Mr. Galbraith is suffering from many bruises and a particularly severe one on the side of one knee it is thought that any very serious results will follow. Fortunately the rope was long enough to keep Mr. Galbraith a safe distance from the horse's heels. The course over which he was dragged is clearly distinguishable as a grazed trail in the sod of the pasture field and through a dried-up creek. A gold watch, a keesake from his father, which he carried in his vest pocket, was broken and the works torn out of the case. The parts were picked up in the field and the watch is not beyond repair.

EKFRID COUNCIL

Pursuant to adjournment the municipal council of the township of Ekfrid resumed its sitting on Thursday, the 12th day of April, 1923. All the members were present. The minutes of the last meeting were read, approved and signed by the mayor.

By-law No. 882, providing for the repair and improvement of the Pierce-Nichols drain, was read a third time and finally passed and the mayor and clerk instructed to sign said by-law.

A petition from fifty-seven ratepayers was presented praying the council to take the necessary proceedings to close the river road at lots 2 and 3.

Wm. Pierce was appointed commissioner for the repair and improvement of the Pierce-Nichols drain as laid out by J. M. McGregor. Checks were issued in payment of current accounts. The council will meet again on May 15 at 10 a.m.

KILMARTIN

Gordon McLachlan, of Detroit, spent the week-end at his home here. Dr. J. H. Wood, of Toronto visited his sister, Mrs. D. N. Munroe, last week.

Mother's Day will be observed in Burns' church next Sunday. The rain on Tuesday was very welcome, as the wheat and grass were badly in need of it. Spring grain is coming up fine. Quite a few have sown their sugar beets.

COUNTER CHECK BOOKS

The Transcript is agent for the Appleford grade book and at the lowest price. Before you give your order to any travelling agent, phone 15. There is a tendency among some of the check book firms toward higher prices in the near future; however, we have been instructed to accept orders at present prices for delivery any time in the next three months. Look up your supply and if you will require more in the next six months, give your local agent the order.

In the Orchard.

The foliage of stone fruits, as cherry, plum, and peach, is on the whole quite tender, and the arsenical sprays should be employed with caution. Arsenate of lead is least likely to do harm, though more than two applications, especially to peach, may cause shotholing, dropping of leaves, and burning of fruit.

The care of the home orchard provides for spare time congenial and profitable occupation for those who enjoy seeing things grow.

Important In Chicken Yard.

The health of our family depends largely upon the kind of feed that is given them and the way it is served. It is just as important to feed right in the chicken yard. Have the right kind of feed and see that it is not tainted in any way.

The first requisite of a good gardener is living near a neighbor who has garden tools.

Cause of Asthma. No one can say with certainty exactly what causes the stabilizing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

CHINESE JOSS SAFEGUARDS LINER

1. Customed actors rest from their antics.
2. The altar and offering.
3. S.S. "Empress of Asia" aboard which the other pictures were taken.

In a little steel-bound compartment stand or squat in the stifling heat, forward a hundred Canton Coolies which seems to draw through the walls in sticky beads, moisture from the sea without. The sickening smell of punk and burning Sandal wood pervades the heavy atmosphere, and the ear is tortured by the wail of musicians instruments of reed and string, and the monotonous tump, tump, tump of a skinny knuckle on a native drum. The dim light is thrown by two long tallow candles which burn before and cast wavering rays upon, a hideous Joss, the grotesqueness of which is accentuated and exaggerated by the moving shadows on its face. Before this Joss, which the cotton garbed coolies revere in their silence, is a platter of fruit and chicken—their humble offering. But the food offering does not suffice to win the good graces of this terrible and austere god, neither does the so-called music sufficiently influence it on behalf

of its subjects, therefore, that their wishes may be gratified and its evil designs be brought to confusion, costumed supplicants for its mercy dance before it, describing with painted paper streamers, long curves, dashes and abrupt swings, indicating that before it can turn loose its wrath upon the ship in which they are about to sail, the god of the seas and winds must flow all the difficult avenues described. So, according to the belief of the Chinese members of their crews, are the Canadian Pacific "Empresses" accorded safe passage across the Pacific. For forty years the Canadian Pacific Steamships, Ltd., have operated on the Pacific without any serious accident and practically no loss of life, and the Chinese are confident that this record has been achieved only by reason of their exorcism of the evil gods. Respectful of the religious beliefs and fancies of all its passengers, the company allows the Orientals to practise their religious rites with all ceremony, and the privileged occidental can watch the proceedings with amused and smiling but unexpressed disbelief.

Born

FARRIS.—On Wednesday, May 2, 1923, to Mr. and Mrs. Chas. Farris, a son.

TOWN AND VICINITY

Clean up! Next Sunday is "Mother's Day."

The spring grain seeding has been completed and corn planting is now in order.

Commencing this week the Sports Club of No. 5, Ekfrid, will meet every Friday evening.

It is expected that announcement of the date of the Ontario general elections will be made today.

Observe the traffic rules, keep to the right and remember the man on your right has the right-of-way.

Large flocks of wild geese were passing over northbound last week. This is unusually late in the season.

A grocer says that some people who buy on time don't seem to know when time leaves off and eternity begins.

Look at the label on your daily paper, and if it wants renewing, let The Transcript office renew it for you. We save you money.

Glencoe Masons to the number of fifteen visited Dufferin Lodge at Melbourne on Wednesday evening and conferred the third degree.

Mrs. Brodie, sister of Mrs. Andrew Clapham and of Mrs. Robert Clapham, of Glencoe, passed away a few days ago at her home in Detroit.

Few people, and especially those living in cities, are in a position to grasp just how important a factor weather is in the production of crops.

It is claimed by officials of the road that virtually forty trains are in motion at various points on the C.N.R.-Wabash system from Windsor to Black Rock at one time.

If you have an item of local news, a visitor or any matter of human interest, send particulars to your editor and in this way co-operate with him in making a good paper for the community.

The death occurred at the family residence, concession A, Aldborough, on Wednesday, May 2nd, of Lymedee C. Moore, aged 79 years. Mr. Moore had been a resident there for upwards of 50 years. He leaves a widow, two sons and one daughter.

The funeral was held on Friday afternoon, with services at the residence and interment in the Simpson cemetery.

C. C. McNaughton, clerk of Mosa township, has bought the general store and stock of the late J. D. McBride at Ferguson, midway between Glencoe and Alvinston, on the Glencoe-Kingscourt line of the C.N.R.

A few light showers of rain on Tuesday freshened up the lawns and gardens, but a real good rain is much needed. There were flurries of snow Tuesday night and yesterday. Warm weather is promised for today.

Glencoe horticultural society last week distributed among its members about \$100 worth of rose bulbs and other plants and shrubbery, which should make a great improvement in the home surroundings of the community.

Glencoe Oddfellows will observe the 194th anniversary of the Order on Sunday next, when divine service will be held in St. John's church at 11 o'clock, conducted by the rector, Rev. Wm. Williams. The brethren will meet at the lodge room at 10.30.

An unusually large congregation attended the regular quarterly sacramental service in the Methodist church on Sunday morning. The rite of baptism was administered to four children, and about fifteen persons were received into church membership.

Mr. Cunningham had intended to cancel his moving picture show for last Saturday night, but having an unusually attractive production with Mary Pickford as the star, he was anxious to present it to the people of Glencoe and did so on short notice. The show was well patronized.

At the regular monthly meeting of the town council on Monday evening it was agreed to order 4,000 gallons of liquid asphalt for street oiling. A petition for a drain, signed by A. J. Wright and others, was accepted and the engineer will be instructed to make a survey and report in the matter.

Tuesday afternoon of last week a quiet wedding was solemnized at the home of Mr. and Mrs. W. K. Darch, London, when Marguerite Hooker, daughter of the late E. R. and Mrs. Hooker, formerly of London, and sister of Mrs. Darch, was united in marriage to Archie Leitch, son of Mr. and Mrs. David Leitch, of Glencoe.

While looking over the ruins of the recent barn fire at Bernie Galbraith's, discovery was made in the ashes of a peculiarly shaped clay pipe, thought to be made for smoking cigar stubs. This leads to the conclusion that some stranger had been smoking in the barn some time before the fire broke out, thus causing the fire.

Alfred Hogg, of Port Stanley, 41 years old, was instantly killed, and John B. Going, also of that village, was seriously, perhaps fatally, injured, when the C.N.R. Eastern Flyer struck their touring car as they were driving home from Detroit Saturday night last. The accident occurred about 5.30 o'clock, two miles west of Bothwell.

The remains of the late Mrs. Wm. Tolson, who passed away at Highgate on Monday, April 30th, in her 75th year, were interred in Oakland cemetery on Thursday afternoon. The late Mrs. Tolson leaves three sons and one daughter—John, of Highgate; William, of Calgary; Harry, of Long Beach, Cal., and Mrs. W. Lockwood, of St. Thomas.

Clouds of smoke from a bush fire two miles south of Newbury on Sunday attracted the attention of a lot of people for miles around. The fire started on the Canada Company's land and, when the bush caught, it was a serious matter. The new building to be erected we are assured will be an attractive one and will materially enhance the appearance of that part of Main street.

Mr. and Mrs. John Henry, Mr. and Mrs. P. E. Lumsley and Mrs. Frank Hayter attended the funeral of their cousin, the late James Reilly, at St. Thomas on Friday. Mr. Reilly was born in the township of Glencoe, 60 years ago, and went to St. Thomas with his parents at the age of six years. In the year 1883 he entered the service of the Grand Trunk in the roundhouse, remaining in that capacity, and as a spare fireman, until 1886, when he was promoted to fireman. In the year 1893 he was made an engineer, and held that position from 1893 until 1908, when he transferred to the Wabash. He was considered one of the best men on the road, and had a clear record as an engineer.

PERSONAL AND SOCIAL

—J. A. McCracken is on a business trip to Winnipeg.

Frank Brown was home from Detroit for the weekend.

—Miss Lella Colerick, of London, was a week-end visitor at James Gilbert's.

—Mrs. Flen. Carr, of Iowa Station, spent the week-end with Mr. and Mrs. George McCallum.

—Miss Carrie Pearson, of Thamesville, was the guest of Miss Evelyn McLachlan over the weekend.

—Mr. and Mrs. John H. Jeffery announce the engagement of their second eldest daughter, Sara Helena, to Christopher Harvey Deering, youngest son of Mr. and Mrs. Thos. Deering, of Orton, the marriage to take place soon.

—Mr. and Mrs. Chas. L. Lucas, Main street, North, Glencoe, announce the engagement of their only daughter, Lorene, to Russell Quick, son of Mrs. Quick and the late W. R. Quick, Appleton Road. The marriage to take place quietly in June.

The United Farmers of No. 4 polling division, Mosa, will meet in No. 1 school house on Thursday evening, May 10, to appoint delegates to the convention. Those of No. 5 polling division will meet at Pratt's School house Friday evening for the same purpose.

A meeting of the directors of the Mosa Farm Loan Association will be held at the McKellar House, Glencoe, on Friday evening, May 11th. Members of the association or those wishing to join may take out loans at this meeting or may file applications with the secretary at his office at any time before the meeting or at the McKellar House during the afternoon of the above date.—Dan N. Munro, president; C. C. McNaughton, secretary.

HIGH SCHOOL NOTES

On Wednesday last our senior baseball team journeyed to Alvinston for the first game of the W. O. S. S. league. The game, which was umpired by J. E. Weaver, of Glencoe, was very closely contested, the score being 10-9 in favor of Alvinston. Batteries—Glencoe, Trestant and McRae; Alvinston, Whittton and McEachern. The return game will be played in Glencoe on Wednesday, May 16th.

The school was fortunate on Friday last in having a visit from Walter Knox, who is in the employ of the Ontario Athletic Commission, training and instructing high school boys and girls in athletics. He assures us that there are some very promising athletes in the local schools. Arrangements are being made for him to spend a day at the school in the early fall.

AUCTION SALES

On lot 17, second range south of L. W. R. Ekfrid, on Thursday, May 10, at 1 o'clock:—1 mare 8 years old; 1 gelding 3 years old; 1 cow 8 years old, due about time of sale; 1 cow 5 years old, due May 7; 1 farrow cow, milking, 6 years old; 1 heifer 3 years old, due 9th September; 1 cow 6 years old, due 11th September; 1 cow 7 years old, due 15th November; 1 yearling steer; 4 yearling heifers; 1 spring calf; 6 sheep and 3 lambs; 1 wagon; 1 gravel box; 1 hay rack; 1 Massey-Harris binder, in good repair; 1 Deering mower; 1 dump rake; 1 manure spreader; 1 Deering hay loader; 1 steel roller; 1 sulky plow, new; 1 set of lance-tooth harrows; 1 disc harrow; 1 set heavy harness; spades, shovels, logging chains, and other articles. Terms: 7 months' credit on approved joint notes; discount of 6 per cent. per annum for cash.—Archie McCallum, proprietor; L. L. McTaggart, auctioneer.

Rub it in for Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate to the muscles and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

THE RED CROSS OF ONTARIO

asks the generous people of Ontario to come to the help of

COCHRANE

an Ontario town.

3,400

people live in Cochrane;

780

have had typhoid fever or are now sick. The town itself has gallantly carried its burden until now.

The Red Cross asks Ontario for

\$75,000.00

in order to run the Emergency Hospital with 20 nurses and 80 beds. Also to care for hundreds of convalescents still urgently needing special food and care to restore them to health.

Please send your contribution to the Hon. Treasurer, Ontario Red Cross, 410 Sherbourne Street, Toronto.

Milk, Cheese, Ice Cream sales are increased!

by Long Distance

Some quotations from recent reports:

"We depend on Long Distance to order milk and cream from farmers, and to find a market in the cities for butter."

"A 15 cent Long Distance call enabled us to get 12 cents more a pound for our butter in a nearby city"—writes a farmer.

"Long Distance is the cheapest way to sell ice cream."

"We purchased over \$100,000 worth of cheese by Long Distance at a cost of \$16 or \$16½. This cheese we sold by Long Distance at a cost of \$20 or \$20½, and never saw the buyer."

"We sell thousands of dollars of surplus milk by Long Distance."

May we tell you how Long Distance is being used to increase sales in your business?

NOTICE TO CREDITORS

In the Matter of the Estate of D. M. Smith, Late of the Township of Euphemia, in the County of Lambton, Postmaster, Deceased.

Notice is hereby given pursuant to section 56 of the Trustees' Act, R. S. O. 1914, chapter 121, that all creditors and others having demands against the estate of the said D. M. Smith, who died on or about the 6th day of December, 1922, in the township of Euphemia, in the county of Lambton, are required on or before the 9th day of June, 1923, to send by post or deliver to Stuart Smith, 114 Windermere Road, Walkerville, Ont., the full particulars in writing of their claims, a statement of their accounts. And take notice that after such last named date the hereafter named executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice and that the executors will not be liable for the said assets or any part thereof to any person or persons of whose claim notice has not been received by them at the time of the distribution.

Malcolm D. Smith, Gordon L. Smith, Stuart Smith, executors for the deceased.

Dated at Walkerville, Ont., this 7th day of May, 1923.

Extra copies of the Transcript may be had at the office ready wrapped for mailing to friends at a distance.

Stop the Ravages of the European Corn Borer

The moth of the European Corn Borer, which develops from the overwintering caterpillar, is present from the middle of June to the last week in July. This moth prefers to lay eggs on the early and most advanced corn.

Dodge Egg Laying by Planting Your Main Corn Crop Late

By planting your main corn crop as late as possible you will dodge the greater part of the egg-laying period.

Plant 10 to 12 rows of corn a week or 10 days earlier to act as a trap crop. By using this trap crop as green feed the caterpillars developing from the eggs will be destroyed.

Write for Pamphlet

Write immediately for pamphlet and full information on the control of the European Corn Borer.

JOINT REPLY FROM FRANCE AND BELGIUM REFUSES GERMANY'S OFFER

Resistance in Ruhr is Act of Government, Says the Note, and Must Cease—Treaties Must Meet Obligations as Fixed by the Versailles Treaty.

Paris, May 6.—After the French and Belgian Premiers had decided not to adhere to the wish of the British Cabinet for a joint allied reply to the German reparations note, the text of the joint Franco-Belgian answer was handed to Dr. von Hooser, the German Charge d'Affaires, at 7 o'clock to-night.

Up till late last night and again to-day, it is reported, Lord Curzon endeavored to persuade Poincaré to attempt a joint allied note, but the French Premier, acting in full accord with Premier Theunis, held to the original plan, after having given Britain an opportunity to sign the note, which opportunity was not embraced. Thus, once more, France and Belgium have given an indication of their intention to remain in the Ruhr until paid.

The Paris Government, while refusing to postpone its reply—and French opinion was loudly demanding a prompt refusal of the German offer—assured the British Government that it would be glad to enter into negotiations for an allied accord when Britain approved of the French and Belgians remaining in the Ruhr, but stood on the position that, inasmuch as the essential part of the French plan was continued occupation of the Ruhr, it thought it unwise to enter into a debate with London on this issue before replying to Germany. The note to Germany is in Poincaré's usual concise and pungent style. It sets forth that the reparations total stands as fixed by the London schedule. It denies the German assertion that passive resistance is an act of the Ruhr population, and affirms that it was an act of the Government.

It declares most plainly that France and Belgium will consider no German proposals until passive resistance ends. He mentions that France has already advanced hundreds of billions on Germany's account, and that one-half of the reconstruction of the devastated regions remains to be done. He asserts that France will never stand the iniquity that, while Germany does not pay reparations, she continues to build up her industry at home. The note goes in a great detail into technical objections to the German proposal, accusing Germany of filling her proposition with "jokers."

France and Belgium's joint note categorically refusing to consider Germany's recent offer of thirty billion marks as reparations, criticizes point by point the German offer. Surprise is expressed at the German pretensions, which, the note says, would mean tearing up the Versailles Treaty. In the final paragraph it remarks: "The German Government, if it will only look into its own heart, will not be astonished that such a bargain should be refused."

THE LOCATION OF THE CHESTER CONCESSIONS
The Chester concessions to United States financiers just signed by the Turkish government, include rights for ninety-nine years to develop immensely rich copper, oil and iron deposits in Anatolia. They are believed to include concessions already made to Britain and France, and a French correspondent reports that the Turks are keen to recognize the concessions, not because they prefer to hand the industrial rights to U.S. capitalists but because they aim to hamper British development in Mosul. The dotted lines show the railways to be built by the Americans.

Weekly Market Report

TORONTO.
Manitoba wheat—No. 1 Northern, 12 1/2c; No. 2, 12c; No. 3, 11 1/2c; No. 4, 11c; No. 5, 10 1/2c; No. 6, 10c; No. 7, 9 1/2c; No. 8, 9c; No. 9, 8 1/2c; No. 10, 8c; No. 11, 7 1/2c; No. 12, 7c.
Manitoba oats—Nominal.

Beans—Can., hand-picked, lb., 7c; primes, 6 1/2c.
Maple products—Syrup, per imp. gal., \$2.50; per 5-gal. tin, \$2.40 per gal. Maple sugar, lb., 22c.
Honey—60-lb. tins, 10 1/2 to 11c per lb.; 3-2 1/2-lb. tins, 11 to 12 1/2c per lb.; Ontario comb honey, per doz., No. 1, \$4.50 to \$5; No. 2, \$3.75 to \$4.25.
Potatoes, Ontario—No. 1, \$1.05 to \$1.10; No. 2, \$1 to \$1.05.
Smoked meats—Hams, med., 25 to 27c; corned, 26 to 28c; cottage rolls, 28 to 30c; breakfast bacon, 30 to 35c; special brand breakfast bacon, 35 to 38c; backs, boneless, 34 to 40c.
Cured meats—Long clear bacon, 50 to 70 lbs., \$18.50; 70 to 90 lbs., \$18; 90 lbs. and up, \$17; lightweight rolls, in barrels, \$35.50; heavyweight rolls, \$32.50.
Lard—Pure tins, 18 to 19 1/2c; tubs, 16 1/2 to 17c; pails, 17 to 17 1/2c; prints, 18 1/2c. Shortening, tins, 14 1/2 to 15 1/2c; tubs, 15 1/2 to 16 1/2c; pails, 15 1/2 to 16 1/2c; prints, 17 1/2 to 17 3/4c.
Heavy beef steers, \$7.50 to \$8.25; butcher steers, choice, \$6.75 to \$7.25; do, good, \$6 to \$6.50; do, med., \$5.50 to \$6; do, com., \$5 to \$5.50; butchers' heifers, choice, \$6.50 to \$7; do, med., \$5.50 to \$6; do, com., \$5 to \$5.50; butcher cows, choice, \$5 to \$6; do, med., \$4 to \$5; canners and cutters, \$1.50 to \$2; butcher bulls, good, \$4.50 to \$5; do, com., \$3.50 to \$4; feeding steers, good, \$6.50 to \$7.50; do, fair, \$6 to \$6.50; stockers, good, \$5.50 to \$6; do, fair, \$5 to \$5.50; milkers' springers, choice, \$8 to \$10; calves, choice, \$10 to \$11; do, med., \$8 to \$10; do, com., \$5 to \$7.50; lambs, choice, \$13 to \$14.50; do, com., \$7.50 to \$12; lambs, spring, each, \$10 to \$12.50; sheep, choice, light, \$8 to \$10; do, choice, heavy, \$6 to \$7.50; do, culls and bucks, \$4 to \$5.50; hogs, fed and watered, \$10.75; do, f.o.b., \$10; do, country points, \$9.75.
Corn, Am. No. 2 yellow, \$1.02 to \$1.03; Oats, Can. West, No. 2, 68 to 70c.

WOULD TREAT POOR CONSUMPTIVES FREE
Campaign Started in Kingston Against Dread White Plague Among the Poorer People.

A despatch from Kingston, Ont., says:—An energetic campaign against tuberculosis among the poorer people who are unable to provide proper sanatorium treatment for themselves was undertaken here on Friday night by a strong and representative committee of citizens. The purpose of the organization is to push the fight against the dread white plague and to present a strong appeal to the Ontario Government for free sanatorium treatment for those unable to provide such for themselves. It is hoped that the undertaking will be given support in other centres, following the lead set in Kingston. Addresses were delivered by Mr. A. McDonald and Dr. B. Hopkins of Mowat Sanatorium.

Manitoba Abolishes the Grand Jury System
A despatch from Winnipeg says:—The grand jury system in Manitoba will be abolished. Attorney R. W. Creighton's decision for throwing it into the discard on the grounds that the system has outlived its usefulness, and that preliminary review of a magistrate's decision was a farce, was carried without a division in the Legislature on Friday afternoon. It is estimated the province will save fully \$50,000 a year by the action of the Legislature.

Canada from Coast to Coast

Halifax, N.S.—The total value of production of fisheries of Nova Scotia in 1922, comprising fish marketed for consumption, fresh and canned, cured and otherwise prepared, was \$10,207,444, an increase over the previous year of \$428,821, according to figures issued by the Bureau of Statistics. Cod, with \$3,555,727; lobsters, with \$2,913,087; mackerel, with \$1,129,104, and haddock, with \$934,138, together contributed 83 per cent. of the total value of production for 1922.

Fredericton, N.B.—Representatives of European capitalists were in conference with Premier P. J. Veniot here recently with the idea of finding locations for the establishment of pulp and paper industries, as a result of recent announcements of the possible early development of the Grand Falls on the St. John river by the Province of New Brunswick. In addition to the money already spent by private interests in developing the Grand Falls, the Government has announced its intention of expending approximately \$1,000,000 for further development.

Quebec, Que.—It has been decided that the policy adopted last year by Hon. J. E. P. Perrault, Minister of Colonization, of building small houses on settlers' lots in certain colonization areas will be resumed this season. The intention of the Government is to erect inexpensive, but comfortable houses on some lots so that the settlers can start early agricultural work on their settlements. Last year the experiment was started in the Matapedia Valley and also in some sections of the Abitibi.

Port Arthur, Ont.—Approximately ten thousand sheep which were fatten-

ed here during the past winter by R. C. Harvey, Alberta sheep rancher, have been sold. Mr. Harvey intends bringing 5,000 more head next fall than last, and prophesies is made that the feeding business will assume immense proportions here before many years, developing also a slaughtering and abattoir business.

Winnipeg, Man.—More than \$2,500,000 were paid in customs and excise duties at the Port of Winnipeg during the fiscal year ended March 31st, 1923, while more than \$1,000,000 was collected in March. This is the second month this year that collections have passed the million mark, January leading with \$1,107,809.

Regina, Sask.—The Karakul sheep ranch at Dollard, reports that both the pure-bred karakuls and grades have wintered exceptionally well and have proved harder than the range sheep. None of the black sheep died, while three of the range sheep receiving the same feed and shelter died last winter.

Masset, Queen Charlotte Islands.—It is understood that whale fishing at Queen Charlotte Islands will be carried on full strength this summer. Last year some of the stations were closed, due to a lack of demand for whale products. A good market is expected for this year's catch.

Victoria, B.C.—Two new Indian schools are to be constructed in the Okanagan. One is to be erected on the Penticton reserve at an approximate cost of between \$4,000 and \$5,000 and the other school building, including residential facilities for the school teacher, is to be built on the Okanagan Reserve, near Vernon, at a similar cost.

NEW RUSH TO NORTH FOLLOWS OLD TRAILS
Human Stream Pouring Into Gold Fields of Northwestern Quebec.

A despatch from Cobalt says:—Judging from the number of people who are signifying their intention to visit the gold fields of northwestern Quebec "just as soon as the break-up comes," it is evident the transportation facilities are going to be taxed to their utmost limits. A good many prospectors will no doubt travel in with their own canoes, so as to be equipped for cruising far and wide throughout the new district, but there will be an army of men who have set destinations in view, and will rely upon the trails for moving from place to place.

Travelers, for the greater part, will carry considerable baggage, it being practically necessary for each to be provided with his own shelter and food. This will be an army of men who have set destinations in view, and will rely upon the trails for moving from place to place.

Seasoned prospectors, representatives of capital, ordinary adventurers, prospective storekeepers, mining engineers and a swarm of would-be prospectors will comprise the human stream.

Experiments Prove That Cancer is Infectious
A despatch from Paris says:—The infectious character of cancer is said to be proved almost conclusively by the experiments of Professors Roussy and Wolf on a number of hens of Plymouth Rock breed. A cancerous growth was regularly produced by inoculation from a tumor and the curious feature was that old birds and sick ones remained immune, while fowl in the best of health invariably succumbed. The experimenters were able to transmit cancer to other breeds of hens, but not to pigeons. The cancer microbe, however, is still undiscovered. Powl cancer is not communicable to human beings.

Yeast Plant Yields Relief for Diabetic Patients
A despatch from London says:—A substance similar to insulin, and which renders diabetic patients sugar free, may be obtained from yeast, it is announced from the Cambridge Biochemical Laboratory.

It is thought that the yeast plant contains an active principle similar to pancreatic insulin.

Income Tax of 1922 Totaled \$1,462,539,169
A despatch from Ottawa says:—The gross amount of income assessed for the purposes of the income tax for the year ending March, 1922, was \$1,462,539,169. This information was furnished to T. W. Bird (Progressive, Nelson) in the House of Commons.

Western Border Bandits Met by Machine Guns
A despatch from Winnipeg says:—Along with the Provinces of Saskatchewan and Alberta, Manitoba will take active means to prevent border banditry this summer. A fleet of fast and especially constructed motor cars, machine guns, saved-off shot guns, heavy calibre rifles and tear bombs will be used by the provincial police border patrol, while a motorcycle squad will be maintained. The patrol has been reorganized and a secret service organization has been built up for the purpose of getting information of intended raids. Provincial Police Commissioner H. J. Martin has issued instructions to "shoot to kill," and all motor cars falling to stop when ordered to do so, will be fired on. Last year the southern portion of the province was terrorized by safe-blowing and hold-up episodes.

Western Border Bandits Met by Machine Guns
A despatch from Winnipeg says:—Along with the Provinces of Saskatchewan and Alberta, Manitoba will take active means to prevent border banditry this summer. A fleet of fast and especially constructed motor cars, machine guns, saved-off shot guns, heavy calibre rifles and tear bombs will be used by the provincial police border patrol, while a motorcycle squad will be maintained. The patrol has been reorganized and a secret service organization has been built up for the purpose of getting information of intended raids. Provincial Police Commissioner H. J. Martin has issued instructions to "shoot to kill," and all motor cars falling to stop when ordered to do so, will be fired on. Last year the southern portion of the province was terrorized by safe-blowing and hold-up episodes.

SPRING SHOWERS WELCOMED BY WEST

Seeding Well Under Way With Grain Above Ground in Chinook District.

A despatch from Winnipeg says:—Seeding of wheat is about thirty per cent. completed in Alberta, according to reports reaching Winnipeg. About 75 per cent. seeding is completed in Southern Alberta, but it is just getting well started in the North. Conditions in Saskatchewan are somewhat different from previous years. The northern part of the province was the first to get on the land this year. Thirty per cent. of the seeding has been completed in the Carrot River Valley, while grain is above ground in the Chinook district, west of Saskatoon, and along the Alberta border.

In Manitoba seeding has been general in the Dauphin country for ten days, while in the southern part of the province, which is usually the most advanced, work on the land is just beginning. Floods have prevented farmers from getting to work around Morden and Emerson, where, in ordinary years, the seeding would have been completed by this time.

Reports state that all parts of southern Alberta were visited by a splendid rain on Sunday afternoon and night. At Lethbridge the precipitation measured .36 inch, but some districts report heavier rain, while there was no part that was not visited.

It was the finest spring rain in years, but it did not come before it was needed, especially in districts east of Lethbridge, where some farmers were delaying seeding because the soil was too dry.

Medicine Hat had both rain and snow, but the total precipitation was heavier than at Lethbridge, being .50 inch. Calgary has .12 inch, while Edmonton, in which district conditions are very dry, only .04 inch was recorded, this falling in the form of snow.

Altogether Sunday's rain brightens prospects in southern Alberta very considerably.

COVER WIDTH OF U.S. WITHIN 27 HOURS

Two American Airmen Establish Record in Flight from New York to San Diego.

A despatch from San Diego says:—Lieutenant A. Macready and Lieutenant Oakley G. Kelly, the United States premier airmen, came home from New York on Thursday in 26 hours, 50 minutes and 38 seconds.

Riding with the speed of the wind, battling like heroes at the very outset of the start to repair a broken wing regulator the two master airmen not only won that for which air navigators have striven for during the last ten years, but they carried a mile in the hall of fame that will stand for time immemorial.

Macready and Kelly topped a series of sensational flights by Thursday, spanning the continent without a stop, establishing a new world's record for distance, and bringing with them not only a thermos bottle full of New York's coffee, still hot, but New York newspapers, fresh from the presses.

The official figures are as follows: Time of start from Hazelhurst Field, Long Island, 12.36.18 p.m.; eastern standard, western Union time; time of landing at Rockwell Field, 15.36.56.2.5 p.m., Pacific Coast time. Actual time of flying between Hazelhurst Field and Rockwell Field, 26 hours 57 minutes 38.2.5 seconds. Approximate distance covered 2,625 miles.

Airplane Makes 400-Mile Trip to Save Woman's Life

A despatch from Balboa says:—An airplane flight of 400 miles, in response to her husband's call of distress, may save the life of Mrs. Helen Gaige, assistant curator of the University of Michigan Museum of Zoology. She is now in the hospital and is resting well, but there is danger that tetanus will develop.

Mrs. Gaige and her husband, Fred N. Gaige, have been in Panama for several weeks collecting reptiles and insects for the museum. Two days ago, in the Province of Chiriqui, Mrs. Gaige accidentally shot herself in the hand, losing a finger. Her husband, fearing tetanus, telegraphed to friends in Panama City for aid and the American authorities despatched two airplanes from France Field, Cristobal to Chiriqui. A plane returned with Mrs. Gaige, making the round trip in six hours.

FLOODS ABATING IN NEW BRUNSWICK

Railway Communication Resumed With Interior Canada and United States.

St. John, N.B., May 6.—Railway communication with Upper Canada and the United States was resumed on Saturday night when the washouts on the Canadian National Railway were sufficiently repaired to allow trains to run. The situation on the Canadian Pacific Railway was much improved and it is believed that through trains will be run on Tuesday.

On

STORIES OF WELL-KNOWN PEOPLE

The King's Stamps.

The stamp collectors of the world are going to hold a marvelous exhibition at London, England, within a few months.

The stamp collectors of England are hoping that King George's collection of stamps will be exhibited. It is not commonly known that King George has one of the most interesting collections of postage stamps in the world. The King started to collect stamps when he was a middy in the navy, and he has maintained this hobby ever since he ascended the throne.

Old Ford Employee's Pay Envelope Surprise.

Mr. Little Young tells the following story of Henry Ford. One day Mr. Ford was going through one of his factories. Among hundreds of others he saw an old white-haired man, tending one of the machines. Ford went up to him and said: "I'm afraid you are too old to be working here. I expect you had better get your pay and lay off."

The old employee quit, and with his job gone, sorrowfully made his way to the cashier's office. He was handed an envelope containing his pay. When he opened it there was a slip inside, saying, "Please call every week for your pay as usual."

Mail Order Catalogue Used by Justice of the Peace.

Genevieve Lipsett-Skinner, who is not only a lawyer but a gifted public speaker, was recently asked to elucidate the British North America Act to a women's club in Victoria, B.C.

In the course of her address, Mrs. Lipsett-Skinner impressed the audience with the fact that women who were ambitious to participate actively in the public life of Canada must have an understanding of how to govern.

"They must have a more intimate knowledge of laws in force than that possessed by a justice of the peace in a certain rural district. When one, accused of a minor crime, was brought before him he always consulted a large book which the ignorant thought was the criminal code but which in reality was that household classic—'Eaton's mail order catalogue'."

"One day a negro appeared before him charged with robbing a hen-coop, after dark. The J.P. took down his big book and flipping over the pages, his eyes centred on something. He then announced the sentence of the man before him, 'I fine you four dollars and forty-nine cents, to be worked out on the road at twenty-five cents per day!'"

"'I am an unlucky nigger,' lamented the man as he was led away by the constable.

"'Unlucky nothing!' retorted his keeper, 'If the judge had opened the book at automobiles instead of trousers, you'd be working on the road for the rest of your natural life.'"

Great Britain Sells Former German Ships.

According to the British Board of Trade, a Government department, 420 former German ships, from trawlers to ocean liners, were sold recently by the British Government at about a third the price for which ships were then building.

The total price of the ships was £19,459,838. Of this the Government is still owed about £3,500,000 and about £6,000,000 is held up because repair, tonnage and delivery charges are still undetermined.

Ships were then in 1920 and 1921—building for about £30 a ton here. The Cunard Line bought the Imperator at £19,699 tons for £500,000, or something over £9 a ton. The same firm recently commissioned the Cameronia of 18,000 tons and it is said to have cost nearly £1,500,000. The Canadian Pacific bought from the Government three liners for about £10 a ton and similar prices were paid by other British companies. Even the Majestic of 56,000 tons went to the White Star Line for a little more than £1,000,000. It would probably cost about £2,500,000 to build today.

Cotton in East Africa.
Experiments in the production of cotton are being made in Portuguese East Africa.

Cures Cold Feet.
With heat applied by an electric lamp, a device has been patented to keep a person's feet warm in bed.

New Cell Bells.
New electric call bells and buzzers can be operated from flash light batteries inserted in their bases.

Biggest Ever.
The gasometer with a capacity of 7,000,000 cubic feet—said to be the largest in the world—is being built at Belfast.

Maybe you'll be wanting my definition of the difference between thrift and stinginess. Thrift is keeping your money in your "pouch" biding the day when you'll need it. Stinginess is putting a padlock on your pocket—and your heart—to keep from helping the other chap when HE'S needing it.—Sir Harry Lauder.

BRITAIN DEVELOPS HUGE PLANE CARRIER

NEW ENGINE IS BEING BUILT SECRETLY.

Contains Platform on Which the Fastest Machines Can Alight Safely.

The strides Great Britain is taking in aviation are evidenced by the construction now under way of a giant air engine said to be twice as powerful as any in existence, and the development of a naval airplane carrier of a revolutionary character.

The airplane engine, which will develop 200 horsepower a cylinder, is being built secretly on the outskirts of London. Air Ministry officials are reported to be confident that the new engine will make a transatlantic trip in less than twenty-four hours a possibility.

Originated in Italy.

The principle of the new engine was originated in Italy, but the British engineers have made improvements on it. If fitted into a bombing machine of ordinary type the plane would have an effective radius of 3,000 miles. Yet it is asserted that this powerful engine is no heavier than the average airplane engine.

The decks of the new airplane carriers are free of obstructions. The funnels are set on the starboard side of the vessels, making it appear as if an addition had been added to the vessels. The two upper decks are connected by huge lifts with the aerodrome deck, while the lower ones are equipped with workshops for making repairs. The flying deck also is fitted with a searchlight and a landing tower so that the planes can alight at night.

Has Platform to Alight On.

The carrier is equipped with an ingenious rotating endless platform for the planes to land and get off. The machine hops off in the opposite direction to that in which the platform rotates so that more speed can be attained. By the use of this platform the fastest plane can alight on the deck of the airplane carrier, for a machine which is going three miles a minute can be brought to a stop in a space of not more than forty feet.

The fact is that though the British are far behind France in the number of planes they have, they are devoting great attention to designing and constructing huge and powerful aircraft. Among the "hush-hush" planes being constructed by the Air Ministry is a machine capable of carrying fifty soldiers through the air at a speed of 130 miles an hour.

Art by the Foot.

Hurry is not characteristic of the present century alone; our ancestors were not always immune from the habit. The Dutch artist Vanderstraeten was a master in scheming out short cuts and saving time.

Vanderstraeten had little difficulty, it is said, in painting in a day thirty landscapes the size of an ordinary sheet of drawing paper. He would surround himself with pots of paint, each of which had its particular purpose—one for the clouds, one for the grass, one for the shadows. When he was ready to begin painting he called to his assistant, "Boy, a cloud!" and the lad speedily brought the desired pot. Vanderstraeten, with a thick brush, quickly transferred the clouds to the canvas. With the finishing strokes, he called: "There are the clouds; bring the grass!" And so went, without momentary waste of time, until the thirty landscapes were finished.

New Dish Washer.

For restaurant use an automatic dish washing machine has been given two sets of pumps and motors to avoid delay should one set break down at a busy time.

Surnames and Their Origin

BRENTWOOD.

Variation—Brantwood.
Racial Origin—English.
Source—A local name.

Those who are at all familiar with the so-called Scottish dialect should have no great difficulty in penetrating the original meaning of this surname. The name, however, is not necessarily Scottish. It is a fact not generally known that this so-called Scottish dialect is by no means a dialect of English or in any sense a corruption of English speech, but is, in reality, a full-fledged tongue in itself, coming down in a straight line from the Anglo-Saxon and Danish tongues, which were spoken in the north of England and the Scottish lowlands prior to the Norman invasion. It is also a tongue in which the Anglo-Saxon strain is purer than in modern English, the majority of its words showing less change from the old Anglo-Saxon spelling and pronunciation.

Thus the Scottish word for "burned" or "burnt" is closer to the old Anglo-Saxon "brennan" than is the modern English word. And it is from this word "brennan" that the first element in this family name comes. Brentwood simply means "burnt wood." The principal place of that name, however, happens to be in Essex, far from Scotland, and the explanation is that it received its name before the Anglo-Saxon form of the word changed.

TORTURING SCIATICA

A Nerve Trouble Due to a Watery Condition of the Blood.

Pierce darting pains. Pains like red hot needles being driven through the flesh—the thigh, perhaps down the leg to the ankle—that's sciatica. None but the victim can realize the torture of this trouble. But the sufferer need not grow discouraged; the trouble is due to the fact that the nerves are being starved by poor, watery blood, and when the blood is enriched the pains of sciatica will disappear. As a blood enricher and purifier no other medicine can equal Dr. Williams' Pink Pills. They bring to the blood just the elements necessary to restore it to normal richness and redness. That is why so many sufferers from sciatica, and other forms of blood poisoning, have found relief through taking these pills. Mr. D. M. Anderson, Beachburg, Ont., tells what Dr. Williams' Pink Pills have done for him as follows:—"Some years ago I was badly afflicted with sciatica. I could hardly walk and suffered great pain when I did so. I went to a doctor, but his medicine did not seem to do me any good. A man who was working with me told me he had once been like that and that Dr. Williams' Pink Pills had made him all right. I began to take them, continuing to work, and the trouble disappeared, and I did not lose a day, although sometimes I suffered terribly. Later I had another attack, and again the pills came to my relief. Now I take three boxes of Dr. Williams' Pink Pills every spring and fall, and I have had no attack of the trouble since that time."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Don't Kill the Earthworm.

To rid soil of weeds a roller has been invented into which a boiler feeds steam, which is injected into the ground for several inches through spikes.

It occurs to me that such a weed treatment will do a lot of harm by killing worms. The part performed by worms in rendering the soil fertile is not generally understood. Darwin estimated that worms, by swallowing earth for the sake of the vegetable matter it contains, and afterwards excreting it, bring to the surface as much as ten tons of earth per annum on an acre.

By boring, perforating and loosening the soil, worms make it pervious to rains and the fibres of plants. The stalks of leaves, twigs, straws, etc., they draw into the soil is no inconsiderable help. The cylindrical mass of earth voided by earthworms (called worm-casts) constitute one of the very best manures for grain and grass. Let alone, the worms throw these up in countless numbers; travelers have found them on lofty mountain heights, notably in the Sikkim Mountains of Northern India.

The earth without worms would eventually become cold, hard and barren. This actually has occurred in sections where the worms have been either accidentally or intentionally destroyed, and the fertility of the soil thus lost has been restored only when the worms have again collected and resumed their fertilizing work.—L. E. Eubanks.

Oldest Map.

The oldest map in existence is a piece of mosaic in a Byzantine church at Malaba, in Palestine. It represents part of the Holy Land; and is 1,700 years old.

There are some souls in the world who have the gift of finding joy everywhere, and leaving it behind them when they go. Their influence is an inevitable gladdening of the heart. They give light without meaning to shine. Their bright hearts have a great work to do for God.—Faber.

Minard's Liniment used by Physicians.

A Woman Barrister.
Miss Muriel Cockery, of St. John, is New Brunswick's only woman barrister practicing law in that province. She was recently admitted to the bar.

History of Lights.

Here are some interesting facts in regard to the progress of lighting. The earliest form of lighting was a wood fire in a cave.

5000 B.C.—Torches or lighted splinters placed in holders of stone or clay.

300 B.C.—Lamps, made of brass or bronze, became highly artistic.

50 B.C.—Romans used rushes soaked in grease—forerunners of the candle.

300 A.D.—Phoenicians introduced candles in Constantinople.

400 to 1700 A.D.—The candle, tallow or wax, vies with lamps and lanterns.

1700 Oil lamps, with wicks, began to be used.

1779—Edison, apostle of light, produces incandescent electric lamp.

1885—Auer Von Weisbach produced incandescent gas mantle.

1895—Incandescent electric lights made with carbon filament, in growing use.

1922—Incandescent electric light, using Tungsten filament, in high state of perfection.

What will be the next?

NOTHING TO EQUAL BABY'S OWN TABLETS

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus banish indigestion, constipation, colic, etc. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Twin Cities of the "Soo."

Canadian "Soo," with Union Jack, And rock-ribbed mountains at her back, Is bulwarked by St. Mary's Falls.

Where Nature's liquid music calls, Across the Rapids to the west, The eagle brooding on her nest, Another city welcomes you.

With Stars and Stripes—the Yankee "Soo."

No fortress facing north or south; No "Bertha" lifting morbid mouth; No frontier with police patrol; Each city sees the other's soul.

The peace that for a hundred years Has triumphed over all our fears Shall cover for a thousand more Atlantic and Pacific shores!

Republic and Dominion stand As friend to friend, with heart and hand,

Across the Border, to and fro, Fond lovers and their sweethearts go.

Through north and south, from east to west, Not "hate," but "song of love" is best; All hail, Twin Cities of the "Soo." The world shall go to school to you! —Joseph Dutton.

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

An Arch of Triumph in Ypres Salient.

Preparations are in an advanced state to erect an Arch of Triumph at the Menin gate to commemorate the feats of British arms in the Ypres salient, according to the Ypres Times. It is learned that agreement has been reached with the dominions and India on the matter, and that the memorial will be erected to the memory of all who fought in the salient, but will include a special reference to the "missing," whose names will be inscribed on it, as they cannot be, of course, inscribed in the cemeteries.

The arch was particularly designed under the supervision of the cabinet committee for battlefield memorials, and was not agreed to until it satisfied them that it was a worthy memorial from every point of view. It is impossible to say, of course, when it is likely to be completed. It will probably take something like two years to complete, but the contract for its erection is to be signed at once.

A PLAIN TALK.

We all know the man and woman in business who, somehow, never seem to succeed at anything—never get on.

What's the matter with them? Are they unlucky, or is it that their hearts are not in their work?

Some people expect mastery without apprenticeship. Knowledge without study, wealth without work. They live in dreams and reveries and vain regrets for the present and making the most of it. They waste their time and energy, and weaken their initiative, by constantly forming plans and resolutions which they never carry out.

They have no strong purpose running through their lives, the one thing which can unify and give strength and meaning to their faculties. They think that if they only keep on working, even if they have no definite goal in view, they will, somehow, arrive at success.

They are afraid of the new, the untried. They want other people to do the experimenting, while they get into ruts and cling to the old, the conventional, and the out-of-date. These are a few reasons why some don't get on.

The Cartoonist.

Seated on the deck of the ocean liner, the cartoonist amused himself by drawing pictures of the different passengers. A few months before he had been employed on a Chicago newspaper; now, a professional cartoonist no longer, he was on his way to the Philippines, a missionary of the gospel. His vision had been as swift as it had been bright.

A number of notable people were making the trip, and among them were the captain of an American battleship and three or four millionaires with their wives. One of the women, becoming enthusiastic over the cartoonist's ability, asked him whether he would draw a picture of her husband. The cartoonist complied gracefully, and while he was at work the wife of the captain watched with interest.

"Oh," she exclaimed at last, "I suppose you are one of our great American artists on your way to the Philippines for new ideas! What a wonderful thing it is to be so gifted! I suppose you make barrels of money?"

"No, madam," the cartoonist replied, "I am going to the Philippines as a missionary. I have given up my career as an artist."

The woman regarded him first in astonishment, then with reproach. "The very idea!" she exclaimed. "To think of a young man like you with all of your ability throwing his life away on a lot of worthless heathens. I can hardly believe you're serious! Really you are joking, aren't you?"

Eight years passed, and the cartoonist and his wife were sailing for home on doctor's orders, for the climate had proved too much for the woman. The lives of both were wrapped up in their work; it was hard for them to leave the natives, who had come to depend on them, but there was no help for it. A great crowd of Filipinos came to the dock to see the missionaries off. Tears were running down the faces of many of them. All were sad and made no efforts to hide their feelings. As the steamer pulled out thousands of hands waved the missionaries good-by.

The cartoonist and his wife stood silent together on the deck; their eyes were wet, and their throats felt tight and strange. If the captain's wife had witnessed that scene, would she have said that the cartoonist's life was wasted?

What Music the Boys and Girls Wanted to Study.

With the assistance of the Rotary Club and other public-spirited bodies, plans were made in a small city to give the children of the masses instruction in music at a nominal cost by means of music classes in connection with the schools. A survey of several schools revealed an interesting set of desires. When asked the particular kind of music study they would like to take up the pupils in one school reported as follows, according to a correspondent in Musical America:—101 for violin, 58 for piano, 57 for singing, 32 for cornet, 11 for drums, 10 for mandolin, 8 for saxophone, 2 for guitar, 2 for cello, 2 for clarinet, 2 for ukulele, 4 for trombone.

In another school the pupils responded as follows:—73 for violin, 47 for piano, 32 for singing, 10 for drums, 1 for mandolin, 10 for saxophone, 1 for guitar, 2 for banjo, 2 for clarinet, 1 for bass horn, 1 for trombone, 1 for flute, 1 for xylophone.

HAD TO FIGHT TO GET HIS BREATH

Reed Declares Gases Were So Bad He Nearly Choked at Times.

"The best I can say is not half good enough for Tanlac," states Frederick E. Reed, 286 Roxborough Ave., Hamilton, Ont., well-known business man.

"Last winter gripe and tonsillitis confined me to my home for weeks and left me so thin and frail it looked like I could never get back to my business again. I would choke up with gas until I had to fight for breath, was so nauseated I could scarcely retain a thing, and pains in my stomach and sides would double me up. I could scarcely sleep a wink, and my hands were so trembly I couldn't even arrange my tie.

"However, the Tanlac treatment suited my case so well it ended my troubles, increased my weight, and fixed me up to where I felt as fine as ever did. I feel right all the time now, and haven't missed a day from my business since I finished the treatment. Tanlac has no equal."

Tanlac is for sale by all good druggists. Take no substitute. Over 37 million bottles sold.

Butterflies' Eye Spots.

What do the eye spots on butterflies' wings mean? The naturalists say frankly, "We do not know." It is thought that these eye spots may have some utilitarian application. They form one of the most intricate of all natural designs.

The fact that butterflies have been captured with their eyes avoirdupoised, as it from the attack of birds, has been used as an argument in favor of the view that they must be "protective markings," imitating eyes, because birds strike at the eyes of their victims.

But this suggestion is hardly regarded as satisfactory. Among butterflies the most striking examples of eye spots are found on the under surface of the wings.

Minard's Liniment for sale everywhere

Good Model.

Tommy entered the village store with an assured air, and said to the man: "I want a lamp globe, and mother says she would like it as strong as the bacon she bought here yesterday."

Extremely Plain.

Customer—"Which way to the haberdashery department, please?"

Shopwalker (an ex-soldier)—"Right turn at the next aisle, sir, forward about twenty paces, left incline, forward, left turn, halt, and it's there."

Cuticura

Keeps Your Skin Fresh And Clear

The Soap cleanses and purifies the pores, the Ointment soothes and heals any irritation, redness or roughness. Treatment: On retiring smear the affected surface with the Ointment on end of finger. Wash off in five minutes with Cuticura Soap and hot water. Do not fail to include the exquisitely scented Cuticura Talcum in your toilet preparations.

Soap 25c. Ointment 25c. and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lyman, Limited, 344 St. Paul St., W., Montreal. Cuticura Soap shaves without razor.

"KING OF PAIN"

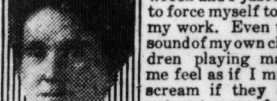

MRS. DAVIS NERVOUS WRECK

Tells Women How She Was Restored to Perfect Health by Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"I cannot speak too highly of what Lydia E. Pinkham's Vegetable Compound has done for me. I was a nervous wreck and I just had to force myself to do my work. Even the sound of my own children playing made me feel as if I must scream if they did not get away from me. I could not even speak right to my husband. The doctor said he could do nothing for me. My husband's mother advised me to take the Vegetable Compound and I started it at once. I was able to do my work once more and it was a pleasure, not a burden. Now I have a fine bouncing baby and am able to nurse her and enjoy doing my work. I cannot help recommending such a medicine, and any one seeing me before I took it, and seeing me now, can see what it does for me. I am only too pleased for you to use my testimonial."

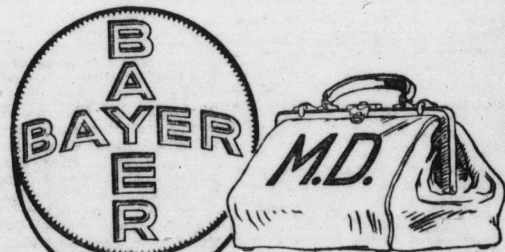

—Mrs. EMILY DAVIS, 721 McGee Street, Winnipeg, Man.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ont. This book contains valuable information.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark registered in Canada of Bayer, Manufacturers of Most Anesthetics and Painkillers. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their genuine trade mark, the "Bayer Cross."

A Merchandising Masterstroke!

Of the many big value successes achieved by the "Mayhew Co." we regard this as the very greatest on record! It's the result of some astounding purchases from overstocked manufacturers who were hard pressed for cash—combined with numerous lines from our stock at heavy reductions this week.

Big Bargains in Men's and Boys' Suits Still Offered This Week

E. A. MAYHEW & CO.

How long will God keep His covenant with those that love Him and keep His commandments?—Deut. 7: 9.

NEWBURY

May 2nd, 1923. As the future generations play in Old Boys' Park that day will be remembered as the "tree planting day." A splendid band of willing workers, under the leadership of J. J. McConnell, planted 95 trees which were kindly given to Glen by Mr. Smith of the Tryon farm. Mr. Smith is a newcomer but we are glad to welcome one with such a splendid community spirit. We would suggest that all our readers take a walk through the park as we have done and note the splendid work done. The trees are in line on the straight and on the bias, any way you look. The trees put in a few years ago are already making a good showing and it will not be long till we have a beautiful park in the midst of our village of which we may be justly proud. Our baseball diamond is already known as one of the best anywhere. Other amusement spots for old and young will be mapped out, and we know each one will feel a personal interest in making and keeping up a park for clean sports.

George Dear and wife, of London, spent Sunday at John T. Armstrong's. John E. Burgess, of Dresden, motored over on Saturday, meeting Mrs. Burgess, who had been in Hamilton attending a convention of the I. O. D. E.

Mr. R. Henderson, wife and son, Murray spent the week-end in St. Thomas.

Mrs. Horace Liddington and baby Frank, of Glenoe, are visiting at the home of her father, E. Woods.

Mr. and Mrs. James Patterson celebrated their fiftieth wedding anniversary very quietly at their home on Sunday, May 6th. They were married by Rev. Mr. Donaldson, who preached in the old Presbyterian church here many years ago. Congratulations are extended to Mr. and Mrs. Patterson. The former is in his 96th year.

Much sympathy is extended to Mrs. Clements in the death of her son Alfred, of Sheddin, who was killed in the P. M. yards at St. Thomas Friday evening while at work there. On receipt of the sad news Mrs. Clements left at once for Sheddin where the family of deceased lives.

Miss Mabel Chasely, of Wallaceburg, spent the week-end with Mrs. R. H. Moore.

Miss Alena Teller, of Port Huron, is visiting at her home here.

Wm. C. King spent the week-end in Detroit.

David Congreve, wife and daughter and Miss Lindsay motored from Corinth for the week, bringing Mr. and Mrs. T. E. Yates and daughter Lillian, who have been visiting there.

Miss Thelma Pringley, of Cairo, is visiting Miss Elsie Pringley.

Roy Barnes, of Thedford, spent the week-end at Thos. Fletcher's.

Rev. C. D. Farquharson attended Presbyterian Synod at Stratford last week.

The W. M. S. of Knox church met at the manse on Thursday. Mrs. W. Bayne gave a fine paper on "The type of immigrant required and where obtained." Mrs. Donald Fletcher followed with an interesting paper on

"Our treatment of the immigrant." Mrs. Farquharson gave a splendid report of the convention at Windsor. Meeting closed in usual way, and refreshments were then served.

The Forbes Mission Band held its regular meeting on Saturday, May 5, in the school room of Knox church, with nearly thirty present. The membership contest resulted as follows:—Janet Stalker's side, 31 members; Ronald Galbraith's side, 29 members. The losers will entertain the winners next meeting. The band enjoyed an address by Mr. Parke on "British children: their schools, games, holidays, customs, etc." Mr. Parke is to teach the school children some new English games after four on Wednesday, May 9th.

WARDVILLE

Mrs. Sparling left on Monday for Niagara Falls where she went to visit her brother, who is ill.

Donald McRae, who has taken a position in Detroit, was home for over Sunday.

Mr. and Mrs. C. Nichols were in Stratford on Thursday attending the funeral of a friend.

Howard Willis, of Detroit, spent the week-end at his home here.

Albion (Rev.) J. Murphy Violet and Ford Murphy and Miss Jean McRae spent Thursday in London.

Mr. and Mrs. Garret McMaster, of Windsor, spent Sunday with Mr. and Mrs. Wm. McMaster.

Mr. and Mrs. Art. Smith and children and Morley Faulds, of St. Thomas, spent the week-end with relatives and friends in the village.

Jack Walker, of Windsor, spent the week-end at his home here.

Mr. and Mrs. C. Nichols and Mrs. Art. Wilson motored to Detroit on Saturday for a short visit.

Alex. Watterworth, of Windsor, was home for over Sunday.

Miss Lillian Blain, of St. Thomas, spent Sunday at her home here.

Miss Muriel Willis was home for over Sunday.

Mr. Dickson, who has just finished his work at Huron College, London, was the minister at St. James' Anglican church on Sunday.

Bert Treastin, of Tillsonburg, called on friends in the village on Sunday.

Rev. Mr. Gilpin, of Aldborough, was the preacher at the Methodist church here on Sunday. Mrs. Gilpin, Jr., sang two delightful solos.

No. 11 Bible Society presented their play, "Where the Lane Turned," in the town hall on Friday evening. A large number were present to enjoy the delightful performance.

Mrs. (Rev.) Paton and Mrs. John Strachan, of Glenoe, organized a young ladies' mission circle on Saturday afternoon at the home of Mrs. W. H. Parnall. Miss Winnifred Parnall was elected president, Miss Helen Atchison vice-president and Miss Janet Elliott secretary.

Don't forget "Deacon Dubbs" in Wardsville, town hall Friday, May 11.

Notice.—Monuments in Scotch and Canadian granites furnished. Inscriptions cut at the cemetery.—Wardsville Granite & Marble Works; Chas. Minna, proprietor.

KNAPDALE

Mrs. Dan McLean is seriously ill.

Mrs. James Thomas and son Earl and Miss Lily Gortley, of Adrian, Mich., spent Sunday with Mr. and Mrs. Alex. Stuart.

Born—to Mr. and Mrs. Duncan McVicar, twins—a boy and a girl.

Nevin McIntyre spent a week at the home of his brother Hugh.

APPIN

We are glad to see "Dutchy" Cushman able to get out again after his recent operation.

Earl Edwards is gaining strength nicely after his serious illness and operation in London.

The old ball game is being revived on the park diamond these evenings.

Rev. N. Stevenson attended the Synod last week at Stratford.

We are sorry to hear that Will Gibbs has poor health this spring. Some of his neighbors made a bee last week and did his seeding for him.

An interesting item at the Young People's meeting held in the Presbyterian church on Sunday evening was the roll call which was responded to by each one quoting a verse of Scripture. The topic, "God Our Strength," was well handled by those in charge, and a very pleasing duet was given by Miss Luscombe and Mrs. Fred McGill. Rev. Mr. Venson went to Melbourne to moderate a call there so was unable to be present.

The domestic science class conducted by Miss Gray, of Toronto, under the auspices of the Women's Institute here, was a decided success. At its conclusion Miss Gray was presented with a pyrex covered baker.

An address was read by Mrs. Brown and the presentation made by Miss Marion Macfie.

The new butcher wagon with its artistic lettering and drawing is much admired. Only prime A1 meat could come from such a wagon.

Miss Margaret Macfie and friend, Miss Dobson, of St. Thomas, spent the week-end at John W. Macfie's.

Miss Jeanette Loran is among the 1923 graduation class of nurses from Victoria Hospital on May 16th.

The Tuxis Boys and Trail Rangers in connection with the Methodist and Presbyterian churches held a banquet in the basement of the Methodist church on Wednesday evening.

It was Father, Mother and Son's night. More than sixty guests and members were present. After a bountiful supper, a fine program was presented. Rev. Mr. Parr was chairman and toastmaster.

MELBOURNE

The Ladies' Aid of the Methodist church held their annual meeting and appointed the following officers for the new year:—Mrs. Gilbert McLean, re-elected president; Mrs. Collier, vice-president; Mrs. E. Richards, secretary; Miss Cornille, treasurer.

The reports of the year showed that between \$500 and \$600 was raised during the year by that society—the best financial year for some time. At the close of the meeting afternoon tea was served and a social evening spent.

The Epworth League of the Methodist church held their annual meeting and elected the following officers: President, Walter Lewis; vice-presidents—Miss Mather, Mrs. Bees, Mrs. Clarke, Mrs. Carruthers, Miss Cornille, secretary, Ronald Lewis; treasurer, Mrs. Kain; pianist, Mrs. Harry Brown.

Rev. T. E. Kennedy, of Cranbrook, preached in the Presbyterian church here on Sunday.

STRATHBURN

About twenty friends and neighbors gathered at the home of Mr. and Mrs. D. H. McRae on Saturday afternoon to bid farewell to Mrs. Charles Simpson and daughter May, who are leaving shortly to make their home in Windsor. During the afternoon Mrs. Murray Campbell read an address expressing the regret of the community in losing such esteemed friends, and Mrs. McRae presented Mrs. Simpson with a cameo brooch and May with a cut-glass flower vase on behalf of the gathering. A sterling silver pin was given for Ethel, who is nursing in Windsor. An enjoyable social afternoon was spent, after which lunch was served.

Mr. and Mrs. John Treastin and Mr. and Mrs. Bert Treastin, of Tillsonburg, called on friends in Glenoe and Strathburn on Sunday.

Nurses Violet and Alfr. Gould, of London, are visiting at their home here.

Nurse Sadie Coulthard is visiting at her home here.

We are glad to report that Jack Lethbridge is recovering after a severe illness.

Miss Minnie Willey is home from the hospital and is getting along nicely after her operation.

EFKFRID STATION

The May meeting of the Eureka Community Club was held at the home of Mrs. Hugh Black on May 3, with a fair attendance of members.

Mrs. Geo. Lee took charge in the absence of the president. The minutes of the last meeting were read. On account of sickness the members who were to give the program were unable to be there. It was decided to give a social in the school house on Friday evening next and serve lunch. The club enjoyed the vic-trola music. The roll call was answered by impromptu speeches on various topics. The flower girls then assisted the hostesses, Mrs. Hugh Black and Miss Ethel West, in serving lunch. The next meeting will be held at the home of Mrs. D. J. McLean, with Mrs. Duncan Hyndman and Miss Alice Winger as assistants. The roll call is to be answered by recipes for cool drinks.

Mother's Day will be observed in the Sunday School on Sunday afternoon at 2:30 and at the evening service at 7:30. Special music will be given.

Clarence McLean, of Detroit, paid a short visit to his home here last week.

WOODGREEN

We regret to record the death of L. C. Moore, of Aldborough, on May 2nd, in his 79th year, after a lingering illness. He was born in South-wold township and was married to Annis Graves, of Strathburn, in 1885. They resided on their present farm for 52 years. He leaves to mourn his loss his wife, residing at home; William, residing near Wardsville; Henry G. at Woodgreen, and Mrs. A. F. Squire, at Woodgreen; also one brother, Rev. Geo. Moore, of Nashville, Tenn. There are also twenty-two grandchildren and three great-grandchildren. Those who attended the funeral from a distance were Weston, Charles, Edward and William Moore, of Sheddin, cousins of deceased; and Lydia, Carl and Fred Squire, of Detroit. The pallbearers at the funeral were six grandsons. Services were conducted by S. Whitfield, of Woodgreen.

Mrs. Andrew Clamahan spent a few days in Detroit last week attending the funeral of her sister, Mrs. Brodie.

Miss E. Brown, of London, is visiting Mrs. Kennedy and daughter Lillian, of Cairo, visited at Lorne Goff's on Sunday.

Mr. and Mrs. H. Elsom and family, of Cairo, spent Sunday here with his brother, John Elsom.

Mrs. Ashton and daughter Beulah, of St. Thomas, and Mr. and Mrs. T. Dykes, of Crinan, spent Sunday at T. Simpson's.

Miss Gladys Thompson has returned to Toronto after spending a week with friends here.

Albert Roberts, Pauline and Freda Bridgette, of Wardsville, spent Sunday with Margaret Watterworth.

Sunday, May 20, is "Go-to-Sunday-School Day," and special services will be held at the union Sunday School here.

NORTH EKFRID

Mrs. Ed. Cobbin and daughters returned to their home in Sarnia last week after spending several weeks with friends and relatives here.

Mr. and Mrs. Will Down, Jr., spent the week-end in London.

The Girls' Mission Band held their monthly meeting at the home of Miss Lizzie Down. The afternoon was spent in visiting out and making arrangements for a little Indian girl. Tea was served in the evening.

Mrs. George Klemm is on the sick list.

Mrs. Allan Perry, of Windsor, is visiting relatives in this neighborhood.

Mr. and Mrs. George Pierce spent Sunday with the latter's parents, Mr. and Mrs. Wallace, of Metcalfe.

Mrs. Leonard Carroll, of Mount Brydges, spent the week-end with Mr. and Mrs. Henry Klemm.

Mr. and Mrs. McIntyre, of Lobo, were the guests Sunday of Mr. and Mrs. Thomas Hardy.

Ed. Klemm had the misfortune to upset his car Sunday. The car was badly broken but fortunately no one was hurt.

The farmers here are all through seeding and are preparing their land for potatoes and corn.

Roy Brothers, of Strathroy, is calling on friends in this vicinity.

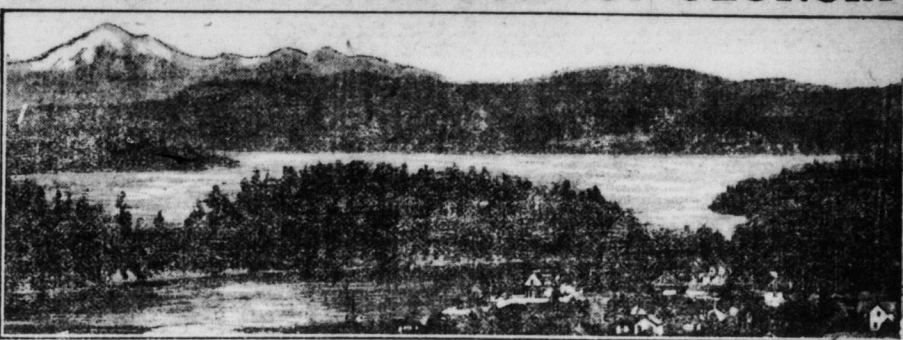

Mother's Day will be observed here next Sunday in the Presbyterian church.

A number of young people from here attended the play in Napier on Friday night.

Miss Pearl Pettit motored to Glenoe Sunday and spent the day with Mr. and Mrs. Calvert Reycraft.

It will prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

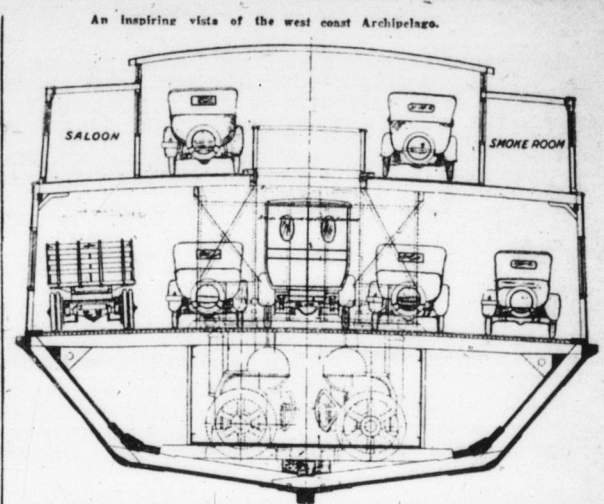

BY AUTO ON THE GULF OF GEORGIA

An inspiring vista of the west coast Archipelago.

WHO has not heard of the thousand isles of the Gulf of Georgia? This Gulf is a ramification of the great strait of Juan de Fuca famed in legend and history, through which the Spanish navigators sailed hundreds of years ago, and which is now one of the important trade routes of the world. It separates Vancouver Island from the mainland of British Columbia and the State of Washington, and is one of the most beautiful waterways known to man.

The city of Victoria, at the extreme south end of Vancouver Island, has several ferry lines connecting it with the mainland, but as the steamship services in the past have proved inadequate for the large crowds of summer visitors and motor tourists, the Canadian Pacific Railway Company has put into service a fast-going vessel which operates twice daily between Victoria and Bellingham, Washington. The ferry is an important addition to the Canadian Pacific fleet and its name, "Motor Princess," is appropriate in that it is the first vessel of the company, operating on the Pacific, to be equipped with internal combustion engines. These engines give the boat a speed of about fourteen knots. On the two main decks there is parking space for fifty automobiles, and there is well appointed accommodation for two hundred and fifty passengers, saloon, restaurant,

Sectional view of the "Motor Princess" showing method of steering cars, smoking room and deck spaces for promenading.

The route travelled by the ferry is marked by islands, some of them many miles in extent, others gem-like little islets which make the waterway a succession of magnificent pictures. The traveller is further entranced by the magnificent view of Mount Baker standing garbed in its everlasting mantle of snow among its satellites the foothills. This lofty mountain is on the mainland near Bellingham, and, beautiful and inspiring, it is seen at its best when travelling to or from Victoria.

NORTH NEWBURY

Mr. and Mrs. McMaster and J. Fletcher motored to Lobo Saturday evening to spend the week-end with relatives there.

Mr. Watson left for Perth Friday evening.

Eugene Crotte, of the Bank of Montreal staff, Guelph, spent the week-end with his parents here.

Business is booming at the elevator these days—dealing out seed and feed and all kinds of flour.

Twenty-five or thirty men, occupying seven boarding cars, are putting in new ties on the railway section here.

Mrs. James Moran spent last week with her parents in Florence.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that besides being an effective vermifuge, they are tonic and health-giving in their effects.
