CAMPBELL-JOHNSON

At the Anglican Church rectory, Athens, on Wednesday, June 18, the Rev. W. G. Swayne united in marriage Mr Elmer Campbell of Chantry and Miss Jennie Johnson, daughter of Mr Wm. J. Johnson of Oak Leaf. The contracting parties were attended by Mr Melburn McDonald of Portland and Miss Lena Campbell, sister of the groom.

Immediately after the ceremony the happy couple left for Ottawa and other points.

The Reporter extends congratulations.

FISH AND GAME PROTECTION

For some time the need of steps being taken to increase and conserve the fish of Charleston Lake has been recognized, but no definite action was taken until a few days ago, when at a meeting held in the office of J. P. Lamb and Son an association was formed. The following officers were elected:

Hon. Pres.—Hon. W. T. White, J. R. Dargavel, M.P.P., and A. E. Donovan, M. P. P.

Pres.—J. H. Sexton, M. A.

Vice-Pres.—Joseph Thompson.

Sec'y-Treas.—L. Glenn Earl.

Executive—W. G. Parleh, John Watson, E. C. Tribute, S. C. A. Lamb.

One of the first matters to receive attention is the installation of a fish way at the outlet. On invitation, Mr Jas. S. Hurst, Dominion Inspector of Fisheries, Belleville, visited the lake last week, and under the pilotage of Mr S. C. A. Lamb, went to the outlet and inspected the dam. He found below the dam a large number of bass apparently anxious to go up higher and was informed by the caretaker of the dam that this is the normal condition. The massing of fish at this point the inspector regarded as constituting a great temptation to fish pirates. He said he had never visited a point more sorely in need of a fishway, and he will strongly impress upon the department at Ottawa the importance of installing this improvement at once.

Mr Hurst was greatly impressed with the beauty of the lake and said he had not found its equal in the province.

Correspondence has been had with Mr Kelly Evans, Provincial Secretary of the Ontario Forest, Fish and Game Protective Association, and he has promised to come and address a meeting, at which the local association will be fully organized and by-laws adopted.

INSTITUTE MEETING

The Athens Women's Institute heard with a good deal of pleasure and profit the address given by Miss E. Smillie of Toronto on Tuesday in the town hall. Miss Smillie is a nurse graduate of Toronto General Hospital and filled with interest her discourse on "Emergencies with their Treatments," giving a demonstration in bandaging.

The audience was favored with a piano duet by Miss Earl and Miss Rowsome; also a vocal solo by Miss L. Arnold.

The question box was also an interesting feature of the programme. All left the hall feeling that many good things are given the members of the Women's Institute.

A cordial invitation is extended to all ladies to attend the Women's Institute meetings, which are held once a month.

DEATH OF OLIVER HAYES

On Monday morning Oliver Hayes died at his home near Athens, aged 61 years. He had been in ill-health for several years and following the death of his wife three weeks ago rapidly declined and passed away.

His whole life had been spent in this section and he was held in the highest esteem by neighbors and friends. He is survived by one son, George, at home, and by two brothers, and two sisters, namely, Manson and W. C. Hayes residing nearby; Mrs Alex McDougall of Elizabethtown, and Mrs Atcheson, North Augusta.

Local Items

Mr E. Middleton of Hamilton has been visiting for a few days at the homes of Messrs P. and E. Robeson at Hard Island. En route here he visited his sister at Clayton and Mr Charles Robeson at Hammond.

The final draft of stations of Montreal Conference contains the following changes from the first draft: Brockville District—Prescott Rev. William Howitt; Mallorytown, Rev. E. W. Crane; Westport, Rev. E. D. Baldwin; Frankville and Toledo, Rev. E. A. Hagar.

An item in Saturday's Recorder stated that Mr Theodore Stevens, while turning his auto on King Street, had backed into and taken a wheel off a buggy. We are pleased to learn that this was a case of mistaken identity, as Mr Stevens knew nothing of the accident until the report appeared in the paper.

Dr. H. C. Pritchard, Dentist, late of Toronto, has opened an office in the Gamble House Block, where he will attend to calls during the day and from 7 to 9 in the evening. Dr. Pritchard is a graduate of the A.H.S., Class of '99, and on returning to Athens to practice his profession is being warmly welcomed by many old friends.

On Tuesday night of last week professional burglars visited Lanadowne and forced an entrance into the stores of G. F. Deane and Percy Earl, and also the Grand Trunk station. Nitroglycerine was employed in breaking open the safe in Mr Earl's store, but only a little small change was found in either store. A few articles of clothing were appropriated. At the railway station about \$15 was obtained.

The O. & K. Electric Railway

The Kingston Whig learns that there is a prospect of the electric railway from Ottawa being built in the near future.

The line which will be about 125 miles in length, after leaving Ottawa, will pass through or near to the towns of Manotick, Kara, Bridoview, and Kilmarnock to Smith's Falls. Between Smith's Falls and Kingston the railway is located close to Lombardy, Portland, Egin, Morton, Seeley's Bay, Brewer's Mills, Washburn, Jocoyville and Cushendall and from thence into the city of Kingston. On the Lanark branch, it is proposed to serve Rideau Ferry, Perth, Balderston and Lenark.

A HEAVY FINE

Kingston, June 16.—On a charge of illegal netting and interfering with an officer in the discharge of his duty, Thomas Shipman, residing near Rockport, Leeds, was fined \$101 and costs Saturday by Police Magistrate Carroll at Gananoque. The charge was laid by Fish and Game Overseer, of Gananoque, who has been especially vigilant lately in prosecuting offenders against the fish and game laws. Overseer Toner found Shipman, drying a net on a line near his house and on attempting to make a seizure of the net, Shipman seized a gun and threatened the Overseer, who at once returned to Gananoque, and preferred the charges.

RURAL MAIL ROUTES

The Postoffice Department is asking for tenders for carrying the mails over Athens rural route No. 4. The distance for the round trip is thirteen miles and is described as follows: To leave Athens daily, Sundays excepted, at 2 p.m. Proceed from Athens P. O. east on the road allowance between the 8th and 9th concessions of Yonge four miles to Addison P. O. thence north-westerly on the lake Elolida road four miles to the town line between Yonge and Kitley, thence west on said town line 1 1/2 miles passing Elolida postoffice enroute to the Athens and Lake Elolida road, thence south on said road 3 1/2 miles back to Athens P. O.

The department is also asking for tenders for rural route No. 2 out of Athens. The computed distance is 12 miles and the details are as follows: From 1st April to the 31st of October, to leave Athens after the arrival of the mail due at Athens from Belleville at 4.30 p.m., and from the 1st November to the 31st March to leave after the arrival of the mails due at 11, proceed north and west to Plum Hollow, thence east to a road running south through lot 27 con. 10 of Kitley, thence south on Athens and Lake Elolida road to Athens.

Clerical Suits a Specialty.

Bladder and Kidney Troubles

Are caused by poisoning impurities, which clog the kidneys; intense pain is the result and sleepless nights follow. The patient becomes annoyed with sharp pains shooting through the back and up the spine. These pains are often so violent and acute that the patient suffers the greatest agony and is driven almost to despair. The refuse and sediment which settled in the kidneys must be removed in order to procure relief.

SANOL, the Kidney Cure, is the only reliable remedy which has combined effect of acting on the kidneys, and restoring them to their natural condition, and removing Kidney, Bladder and Gonorrhoea by dissolving same. It cleanses and purifies the system, strengthens and invigorates the kidneys, and encourages proper filtration. It relieves the pain and gives strength and energy to the body. Price \$1.50 per bottle.

Literature free from the SANOL MANUFACTURING COMPANY, OF CANADA, Limited, WINNIPEG, MAN.

THE FIGURE 6.

Babylonian Astronomers Knew Its Utility.

Why are there sixty seconds in a minute? Why are there sixty minutes in an hour?

It has taken science something like seven or eight thousand years to figure that out. And they've just found the answer.

Six is the world's number and sixty is the number that more other numbers and tens go into evenly than any other up to 100.

For centuries the mathematicians of the world have been puzzling their brains to find out why time was divided as it is. It was accepted by them because it was a convenient and simple way to divide time and they haven't been able to find any way to substitute for it that would do the work. But they didn't know why.

In other words, the ancient Babylonians, the men who invented most of the regular forms that are used in astronomical studies to-day and who lived way back yonder 5,000 to 10,000 years before Christ, discovered that the world's days should be divided and divided them like that for all time and eternity and the reason they did it was so simple to them, that they didn't take the trouble to leave any record of it.

Hence the extreme anxiety of present-day scientists to find out why. They've put in almost as much time on this problem as they have on the discovery of new planets and stars and new ways to judge the weather.

The highest type of civilization can never be reached until in all things there is the same moral standard for man, whether in his individual or in his collective capacity. That time may not be very near, but human assistance must be imposed to hasten its approach. But if we say it is an impossibility, then we give up the hope of humanity; we admit that man is only a brute and that a brute he will always remain.

Just examine it carefully and reason is very plain. Sixty can be divided evenly in six ways. It can be split in ten different ways. It was, therefore, decided that this was the number that the world should be governed in its more important things and the Babylonians put all their calculations under it. The result is that the ancient Babylonian calendar had every second of the world's time equally divided and is as good to-day as it was then.

On the other hand, the modern calendar is the most imperfect and wasteful time that every four years an extra day must be added to make it up. The discovery of the use of the number of sixty in the calculation of time also shows the origin of what is known as the duodecimal system by which certain quantities were calculated in dozens and gross lots. These two figures are also divisible by the numbers two, three, four, six, and ten. It has taken our modern scientists years to figure it out.

The Housekeeper

To keep air dry in cellar or pantry, place bowls of unslacked lime on shelves near the food, refilling them with fresh lime from time to time.

To clean white straw hats, brush them over with a mixture of one teaspoon of salt to a dessertspoon of lemon juice. Rinse off with clear cold water, drying in the open air. Be careful to preserve the shape of the hat.

To make a cheap and good substitute for maple syrup, take a cup of brown sugar and two cups of water and boil together until they reach the consistency of syrup; then add four or five drops of vanilla.

If the wooden chopping bowl has the odor of food, soak the bowl in boiling water in which a little soda is dissolved. A tablespoonful of soda to a gallon of water is the proportion.

The most successful way to soften paint brushes when the paint has hardened on them, is to place them in vinegar. Heat the vinegar to boiling point and allow the brushes to stand in it a little while.

To prevent silver discoloring when packed away for the summer, put a lump of camphor in the silver case when putting the silver away. Laying silver away in a box of flour is another way of keeping it bright.

To clean plaster casts, free them from all dust and scrub them with a brush dipped in gasoline. The first washing will leave the gasoline very dirty, so you must carefully wipe the figure and repeat the process with fresh gasoline.

A small watering can, such as used for window panes, is excellent for sprinkling clothes. Cayenne pepper and borax, mixed and dusted around will free the pantry of ants.

Ask for Minard's and take no other.

WAR AND ARBITRATION.

(London Advertiser.) If we have found the fighting impulse in the individual controllable, why should it not be controlled in the nation? If it is a crime for two men to shoot each other, why should it be any less criminal for two nations to follow? The answer is that it may be admitted that there is not only law, but a power to enforce the law, in the case of the individual, which does not exist in the case of the community. All the more reason why law, and power to enforce law, should be the same in the one and the other. The criminality is the same in one case as in the other and the remedy must be the same, even though there are great difficulties in the way of bringing it into effect.

The highest type of civilization can never be reached until in all things there is the same moral standard for man, whether in his individual or in his collective capacity. That time may not be very near, but human assistance must be imposed to hasten its approach. But if we say it is an impossibility, then we give up the hope of humanity; we admit that man is only a brute and that a brute he will always remain.

BETTER THAN SPANKING

Spanking does not cure children of bad-wetting. There is a constitutional cause for the trouble. Mrs. M. Summers, Box W. S. Windsor, Ont., writes: "I have had my mother's successful home treatment, with full instructions. Send no money, but write her to-day if your child-renal trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures the wetting of aged people troubled with urine difficulties by day or night."

RHINOCEROS IN ENGLAND.

What are stated, on the authority of the geological survey and the officials of the British museum, to be the remains of the head of a hippopotamus and two pieces of an ivory tusk, probably that of a mammoth, have been discovered on the estate of the Cane Hill asylum at Coulsdon in Surrey. There are several considerable fragments of the head of the hippopotamus, which include portions of the jaw with teeth in position, the articulation of the awbones, two of the larger teeth, and some of the vertebrae, and there are also a number of small parts of bone which so far it has not been possible to piece together.

Discoveries of this nature are not unusual, though the remains, as a rule, are not in a good state of preservation. About fifteen years ago the skull and some bones of a hippopotamus were found near Kewbridge. A little later, in a brick pit at Ilford, a number of remains of the pleistocene period were uncovered, including those of a mammoth cave bear and a woolly rhinoceros. When digging for the foundations of the new admiralty buildings the bones of animals belonging to the same period were found. But most of these latter relics were in such a state that it was difficult to say to what species they belonged.

The most important find of this description in recent years was made nearly 10 years ago—in July, 1902—in the course of excavations between Whitefriars streets and Salisbury square. Bones of extinct animals were unearthed. These included a very fine skull of the woolly rhinoceros, together with part of its lower jaw and portions of its limb bones. The specimens were presented to the natural history museum, where they are now exhibited.

The continuation of these excavations led to the discovery of other remains—bone of the rhinoceros, the mammoth, the reindeer, the horse and the great extinct ox. The woolly rhinoceros is represented by a beautifully complete skull of a young animal, in which were still the milk teeth. Curiously enough, the second half of the lower jaw of the rhinoceros whose skull was found in 1903 was also discovered, and the two are now reunited.

The remains were all entombed in mud, deposited in the valley of the ancient Thames, or perhaps more probably of some small tributary or backwater. Various estimates of the time which has elapsed since these animals lived in the Thames valley have been made, and it is probably more than 150,000 years. At that time the North Sea was a big bay, into which the Thames and the Rhine flowed into a common estuary, and there were no Straits of Dover.—London Chronicle.

Blobs—Bones can't see a fight without wanting to get into it. Slobs—Perhaps it is just as well. It's generally the innocent bystander that gets hurt.

A Bad Heart, Its Cause and Cure

Many, Firmly Convinced They Are Dying of Heart Trouble, Have Often the Strongest Hearts.

Sometimes you wake up at night, heart throbbing like a steam engine. Your breathing is short and irregular; pains shoot through the chest and abdomen, and cause horrible anxiety.

Your trouble isn't with the heart at all. These sensations are the outcome of indigestion, which has caused gas to form on the stomach and press against the heart.

Just read what happened to Isaac Malloux, of Belle River, Ont.: "Three months ago I was a weak, sickly man. My appetite was poor; food fermented on my stomach; I had sour risings and indigestion. At night I would often awaken with gas in the stomach and heart palpitation."

The most successful way to soften paint brushes when the paint has hardened on them, is to place them in vinegar. Heat the vinegar to boiling point and allow the brushes to stand in it a little while.

To prevent silver discoloring when packed away for the summer, put a lump of camphor in the silver case when putting the silver away. Laying silver away in a box of flour is another way of keeping it bright.

To clean plaster casts, free them from all dust and scrub them with a brush dipped in gasoline. The first washing will leave the gasoline very dirty, so you must carefully wipe the figure and repeat the process with fresh gasoline.

A small watering can, such as used for window panes, is excellent for sprinkling clothes. Cayenne pepper and borax, mixed and dusted around will free the pantry of ants.

Ask for Minard's and take no other.

AN UNDESIRABLE HUSBAND.

(New York Herald.) Replete with wisdom that would honor a Solomon are the words of Judge Pettit, of Chicago, and his comment upon a divorce suit upon which he was passing judgment. "Mamma's boy," one who remains tied to the maternal apron strings, is a most undesirable matrimonial asset, he declared. "His mother believes he can do no wrong, and usually he comes to regard himself a superior being."

Men may sometimes feel they have a mother-in-law problem on their hands, but in the opinion of this Chicago jurist their plight is enviable in comparison with that of the girl so unfortunate as to marry a "mamma's boy."

Evil of Substitution Exposed

A dealer substitutes because he makes more profit on an inferior article. A local citizen was induced to take a substitute for Putnam's Corn Extract, with the result that the substitute burnt his toes and failed to cure. Putnam's contains no acid and is guaranteed. Always get Putnam's Extract, 25c., at all dealers.

MAKE THE CONVICT WORK.

(Buffalo Express.) Convicts ought to be worked for their own moral, mental and physical salvation. When the convict is put to work he puts the state. Such of them as are unskilled should be taught trades in prison. The state should provide them with their own tools. They should be given the first fruits of their labor should go to the state; the residue to their families. They should be employed in any way which would tend further to degrade them or demoralize the public.

Our Precise Artist

He was struck with his own "GOOD- LUCK."

NO BUSINESS OF THE U. S.

(Pittsburg Gazette-Times) It is an old saw that when a woman says that she won't she won't, and the British Government can no more make a fanciful suggestion that it can take her behavior. But nature falls, the loss will not be irreparable. As for serious making less Emerson the subject of inquiry, that would be regrettable. She was perfectly aware of the danger of her offense and the certainty of her punishment, and the prison administration of England is not a detail with which the United States has anything to do.

WONDERFUL DELAWARE GOOSE.

James Donovan, an Ellendale farmer, has a pet goose which is a wonder. It is as attached to him as a dog to its master. Donovan has the habit of taking naps during the warm weather under his large shade trees, and the goose stands beside him picking off flies and mosquitoes as they alight on his sleeping master. Donovan had refused good offers for the goose and is satisfied that should he sell it, it would find its way back to his home.

A NEEDED INVENTION.

(Ottawa Free Press) It would be a bad idea if someone would invent a brake which would work automatically when automobiles obtain more than the maximum speed allowed by law.

QUEEN'S ARTS, EDUCATION, MEDICINE, SCIENCE, INCLUDING ENGINEERING Arts Summer Session

July 2 to Aug. 16

UNIVERSITY KINGSTON ONTARIO

KEEP DAIRY RECORD And Cut Your Work Down One-third.

A decrease of labor with no diminution of results, is a combination which appeals to any one. Labor saving machinery and thoroughly efficient machines might just as well be used by dairy farmers as by any manufacturer.

So the questions come: Have we efficient cows? Do they save or make work? Are they so good that they decrease both comparatively and actually the necessary amount of labor in keeping cows, and at the same time increase the income? Every dairy farmer needs to answer such questions as applied to his herd, as he can answer them satisfactorily when he keeps dairy records.

A statement made by the Dairy Division, Ottawa, regarding Ontario cows last year, was that dairymen are keeping sixteen cows to do the work of ten. So it is quite possible to cut down work one-third, and rejoice because possessing more efficient cows. To the scrap-heap with the old junk!

A Quebec dairymen after one year of cow testing writes the Dairy Division that he now gets as much milk from his 32 selected cows as he used to get from his larger herd of 42 cows. Ten inefficient were culled. Dairy farmers hang out to waste working for poor cows, so make sure that each one pays.

To continue the topic of lace as a decorative medium in other departments of dress, we find it very splendid in heavy gold worked by hand, and response designs. A little magnificence of this type is worth more than a lavish display, and thus it happens that medieval-looking bullion lace is used for the Medici collar of the evening cloak or the gorgeous full dress toilette, for the crown of a hat of the veiling of a bag.

Gold Nuggets.

How do nuggets of gold originate? Sometimes a mass of the precious metal worth a thousand dollars or more is found. By what process was so much gold compacted into a lump? An attempt was made not long ago to answer this question. An investigator in Australia cut and sliced and polished gold nuggets with the sole purpose of finding out just what is their structure. The first thing he discovered was that there is one curious point of resemblance between gold nuggets and meteorites. Both, when polished and etched with choline water, exhibit a crystalline structure. In the case of meteorites the lines thus exhibited on the etched surface are called Widmanstättian figures, and their presence is said to be one of the most invariable characteristics of those metallic bodies that fall from the sky to the earth.

But it is not meant to be implied that gold nuggets have fallen from the sky because they exhibit a crystalline structure, recalling that of meteorites. The resemblance is apparently only superficial, and the crystals of the nuggets differ in form from those of the meteorites.

Another curious fact is that when a nugget is heated in a Bunsen flame explosions take place on its surface. Blistering occurs until they burst with a sharp report and bits of gold are violently scattered about. It is evident that the nuggets contain either gases or some liquids or solids which are easily converted into the gaseous form, the expansion of which produces the explosions.—Harper's Weekly.

Minard's Liniment Co., Limited. Gents—I have used your Minard's Liniment in my family and also in my stables for years, and consider it the best medicine obtainable.

Yours truly, ALFRED ROCHAV, Proprietor Roxton Pond Hotel and Livery Stables.

OVERDOING ATHLETICS.

(Detroit Free Press.) Is it not possible that the extreme of athletic development is as dangerous as the utter lack of it? A good many of our physicians and students of human nature are warning against the danger of our youth, and the example of Murphy (the recently dead trainer) may perhaps support their cautionary words. It may be that he would in any event have fallen on a claim for the disease that carried him off. It may even be that he lasted longer than he would have otherwise because of the persistent exercise he underwent. But he was a man of exemplary habits in every way, and it is hard to escape the thought that his illness and his lamentably early death were caused by the strain he put upon his powers so long and so excessively.

Moderation in all things is generally the wise course. Even in physical exercise it must be true.

Minard's Liniment Lumberman's Friend.

CUT OUT THE FRILLS. (Detroit Free Press) We need to cut out the superfluous, which cost so much time and money. Instead, we are constantly adding to our "frills" and making existence more complex. Women, particularly, never see a new frill that they do not at once mentally consider the possibility of incorporating it into their wardrobe. Living whether it suits their home, social position, needs, or otherwise.

The real test of a woman's economy means safe and sane existence. It means good standards, cheerfulness, simplicity, excellent without the "frills," keeping up with others' extravagances.

NEW SUMMER EVENING WRAP.

It is new. It is Parisian. It is of taffeta. It is of a soft color. Bronze and old gold are good. It is edged with a pinked ruffle. The ruffle goes up the fronts and around the neck.

The yoke, which points up at the back, forms the sleeves. The short sleeves are also edged with the dainty pinked ruffle. This little wrap laps well at the fronts, is cutaway and full length at the back.

SHOE POLISH

Gives a Quick, Brilliant Polish That Lasts. Easier to Use Better for the Shoes.

LACE AND NET. Both Play an Important Part in Latest Fashions.

Lace is a fad and where lace leads net is sure to follow, and already the most famous couturiers are dealing with it. A two-tier skirt materialized in Malines net with a lace edging and a very broad band of apple green velvet, half revealed by and half hidden beneath the uppermost tier, is a novelty that greatly pleased its feminine beholders. The net is mounted upon champagne satin, which throws up the ringed design, and into the corsage, which is all of the finest description, is tucked a bunch of apple blossoms to intensify the springlike note suggested by the green velvet skirt band.

To continue the topic of lace as a decorative medium in other departments of dress, we find it very splendid in heavy gold worked by hand, and response designs. A little magnificence of this type is worth more than a lavish display, and thus it happens that medieval-looking bullion lace is used for the Medici collar of the evening cloak or the gorgeous full dress toilette, for the crown of a hat of the veiling of a bag.

Hand & Foot Levers with Roller Bearing.

Maxwell's "Favorite" is used all over the world—in Denmark, the butter country of the world—in the United States, in spots of high latitude, and in every Section of Canada. Our Agricultural Colleges and Govt. Inspectors recommend it, because it is the finest butter-maker in the world.

Write for catalogue if your dealer does not handle it. DAVID MAXWELL & SONS, ST. MARYS, ONT.

Unconscious Child Humor.

Teacher—Johnnie, what was the most ferocious animal you saw in the circus parade? Johnnie—The callopie.

"Now, Edgar," said the teacher to one of the members of the primary class in grammar, "what is the plural of tomato?" "Ketchup," was the prompt but unexpected reply.

"Now, Jeannette," said the Sunday school teacher to a small student, "can you tell me why God gave Moses the rod?" "Yes, ma'am," replied Jeannette; "so he could chastise the children of Israel if they didn't get their lessons."—Chicago News.

Minard's Liniment Used by Physicians

A DAY IN MAY. (Chicago Tribune)

No day to work a day to sit with your back against the sunny side of the house and listen to the warblers—such as warble—and the thrush—when it gets towards evening—and to the lark going ecstatically or amiably into the egg business and into turned mold of their neighbors' and look at the shad bush and the apple gardens. No day to work. A day to sit trees, the wild crab trees, the building oak; to watch the blue and stiff perfume between times of filling a corned pipe.

THE HOLY NAME CLUB.

(Montreal Herald)

From time to time the police make attempts to suppress profanity and fifth which are so common on our streets. Occasionally, convictions for this offense are recorded in our police courts; but there is but little hope of permanent improvement by these means. The foul mouthed language of the crowd should be punished whenever he can be caught, but we have more hope of permanent improvement through such work as the Holy Name Society is carrying on. We would be glad to see every Protestant denomination take a hand in the propagation of this Society and carry on its work with all their might and irrespective of creed.

Care of Brooms.

(By Caroline Coe.)

Buy brooms in pairs. You will save money by so doing. Give one a bath and allow it to rest a day and see how fresh and new it seems. Dip the broom into hot soap suds. Try it on wash day. Dip it in until the suds are clear. Then dip the brooms into clear hot water and hang it in a draught to dry. You will be surprised at the amount of dirt you will find. Be sure there is a hook or screw eye screwed into the end of the handle to hang up the broom. More "one sided" brooms are made from standing on the floor in a corner than from being worn by sweeping. Do not use the same broom for all parts of the house. One that has been used in the dining room may be in such a condition as to ruin a valuable rug.

NEWS OF THE DAY IN BRIEF

Attempted German Imperial Loan a Failure.

MAGISTRATE CLEAR

Danish Premier and Cabinet Have Quit.

The British consul at Berlin says that Germany is hoarding her gold supply.

The clergymen of the Toronto Methodist Conference are likely to receive higher salaries.

R. E. Truxax was the unanimous choice of the nominating convention of South Bruce Liberals.

Mr. Malcolm McTavish, master in Bowmanville public school for 46 years, died in his 82nd year.

Dr. Peter Sandiford was appointed to a chair in the faculty of education at the University of Toronto.

Prof. Nathaniel Henry Aleock, professor of physiology at McGill University since 1911, died at the age of 42.

Police Magistrate W. J. Watson, of Oshawa, was discharged by his honor Judge McGillivray in the bigamy case.

As the result of a friendly visit to a Polish wedding, David Craig, a mining shift boss, of Cobalt, had three ribs broken.

That two hundred girls are lured away from Toronto yearly was a statement made at a meeting of the Anglican Synod.

Six men, all suspected of being pickpockets in the wake of Barnum & Bailey circus, were placed under arrest at London.

Rev. George A. Dawson, St. Stephen, was elected president of the New Brunswick and Prince Edward Island Methodist Conference.

The attempt to place the new \$12,000,000 four per cent. German Imperial loan and the Prussian loan of \$45,000,000 has practically resulted in failure.

Conservation in industrial exploitation was counselled at the annual meeting of the Toronto branch of the Canadian Manufacturers' Association.

George J. Lebonville, Sarnia, was electrocuted by coming in contact with an electric light wire while assisting Mr. Bowles, contractor, in moving a house.

Col. W. W. Raibe, widely known in Montreal insurance circles, was struck and killed by a Lachine car. Col. Raibe was between fifty-six and fifty-seven years of age.

Lord Strathcona has made a contribution of \$50,000 towards the purchase of the British Crystal Palace, the acquisition of which for the nation's use is now assured.

General Hadji Nazim Pasha, and it is also reported General Salih Pasha, have been arrested for alleged participation in the murder of Grand Vizier Mahmood Shekret Pasha of Turkey.

Rev. A. B. Demill, of Toronto, formerly principal of Demill Ladies' College, Oshawa, died suddenly while on a visit to Peterboro. He was 82 years old, and for 50 years a Methodist minister.

Four persons are dead and many injured, some seriously, as the result of a rear-end collision on the main line of the New York, New Haven & Hartford Railroad, opposite the Stamford, Conn. station.

King Christian of Denmark accepted the resignation of the Danish Premier and the members of his Cabinet. The step was taken by the Government as a result of the recent elections when the party in power received an adverse vote.

The man Keith, who was charged with the theft of gold amalgam from the small McIntyre mill, was sentenced by Magistrate Torrance, at Schumacher, to a year in prison or a fine of \$500. He promptly paid the fine and has been released.

FORESTERS' HEADS

Canadian High Court Elects Its Officers.

London despatch: The Canadian Order of Foresters brought the 34th annual session of their High Court to a close this evening. All the officers were re-elected by acclamation: High Chief Ranger, J. A. Stewart, Perth, re-elected for the eleventh time; High Vice-Chief Ranger, J. A. A. Broder, Montreal; High Secretary, A. P. VanSomeren, Bramford; High Treasurer, Robert Elliott, Bramford; Chairman of Medical Board, Dr. C. M. Stanley, Bramford; Auditors, W. L. Roberts and J. A. Shults, Bramford; Chaplain, Rev. W. J. West, Port Perry; High Chief Registrar, W. Montreal.

The members of the executive committee were all re-elected, and are as follows: W. M. Gouper, Montreal; N. J. Stevenson, Toronto; R. T. Kemp, Liston; A. R. Galpin, London, and F. H. Davidson, Winnipeg.

It was decided this morning by acclamation to hold the next meeting of the order in the City of Quebec.

WANT BRITONS FOR N. W. M. P. Ottawa despatch: Lawrence Fortescue, comptroller of the Royal Northwest Mounted Police, sails tomorrow for England, the principal object of his visit being to secure recruits for the corps which he commands. The service, apparently, has little attraction for Canadians. Three-quarters of the force now are old country men.

Recently it was decided to increase the force, but few recruits are offering, while those whose three years are up are in many cases, home-staying or going into business for themselves. Mr. Fortescue hopes to secure the required number in England. He will be absent a couple of months.

GIVE WOMEN VOTES

'Twould Lessen Crime, Say Police Chiefs.

Washington, June 16.—Woman suffrage as a means of lessening crime was advocated here to-day by C. E. Sebastian, Chief of Police of Los Angeles, Cal., in an address before the closing session of the annual convention of the International Association of Police Chiefs. Chief Sebastian declared that "through suffrage recognition police women in Los Angeles had been obtained, and crime had been materially reduced. Suffrage, he added, had helped to break down the false modesty which had prevented public discussion of sex problems.

The chiefs chose Grand Rapids, Mich., as their next meeting place, and elected officers as follows: President, Major Richard Sylvester, Washington superintendent of police; first vice-president, Chief Michael Raegan, Buffalo; second vice-president, Chief A. P. Sherwood, Ottawa, Ont.; secretary-treasurer, Harvey O. Carr, Grand Rapids; Sergeant-at-arms, Chief Cassidy, Elmira, N. Y. All were re-elected except the sergeant-at-arms.

CREW MASSACRED

Kabyle Tribesmen Annihilate Spanish Sailors.

When Warship Stands on Moroccan Coast.

London, June 16.—The unusual spectacle of thousands of native sharpshooters pouring a murderous fire on the blue-jackets on a stranded Spanish warship was witnessed on the coast of Morocco. Conflicting reports are to hand regarding the fate of the crew of 100 men, but one account states that all but a few perished. Some tribes in the Spanish zone of Morocco got out and several gun-boats were despatched to the vicinity.

One of the vessels, the General Concho, went ashore during a fog in the Bay of Alhucemas, and the Kabyle tribesmen opened fire on everyone who appeared on the decks.

An official despatch from Alhucemas published in Madrid states that the crew was composed of 98 men. This message admits that the commander was killed. Twelve men, who managed to leave the wreck in a boat, fell in with the gunboat according to the report of the tribesmen.

The Lauria, with other warships, adds the official despatch, immediately went to the assistance of the wrecked boat, and fire from their guns soon drove the Kabyles off. Boats were then put off from the Lauria, and the work of taking off the wounded and the rest of the General Concho's crew was carried out with all possible speed under the protection of the ships' guns. The wreck will be blown up.

A more serious report, however, came from Gibraltar later. Salvage steamers which have just returned from the scene of the wreck report it was impossible to approach, as thousands of Moors on the boats were firing continually on the Spanish vessels.

According to this report, including the officers who remained aboard, were killed and the Moors have taken possession of the warship. The twelve men who rowed off to Alhucemas to report the mishap are safe, but these are the only survivors.

CAN STOP THE HEART

And Start It Again After Ten Minutes.

Paris, June 16.—Surgical research has proved that operations in the thoracic cavity can be performed as easily as in the abdomen, according to Dr. Alexis Carrel, of the Rockefeller Institute for Medical Research, in New York.

In the course of a lecture to-day at the Beaulieu Hospital in Paris, the Nobel prize winner declared that experiments on animals had demonstrated the heart to be an organ of very great resistance and that it does not suffer harm if the circulation is interrupted for five or even ten minutes.

The brain, however, said Dr. Carrel, is more delicate, and may not be interrupted for more than three or four minutes, which nevertheless gives time for the accomplishment of much surgical work.

WHITBY BIGAMY CASE.

Whitby, Ont., despatch: Following Judge McGillivray's refusal to consent to the adjournment asked for by the prosecution, the Crown to-day refused to present to the grand jury the indictment against Police Magistrate Wm. J. Watson, of Oshawa. The case is to stand for a time, the defendant being bound over on bail to appear for trial at the fall Assizes, or at such other time as he may elect, before the County Judge, should be prefer a summary hearing. The Crown undertakes to be ready in eighteen days, and if they are unable then to produce their chief witness, Mrs. Annie Letitia Watson, her deposition may be accepted on proof being given that she is not in the country.

A NEW ALLOY.

Berlin, June 16.—At to-day's session of the Rhenish Institute for Scientific Investigation the metallurgist, Prof. von Borcher, announced the discovery at the Aix-la-Chapelle laboratories of a new alloy equal to platinum, which would resist the strongest acids. The discovery, he said, was important, as platinum was constantly becoming scarcer.

COMMERCE AND ITS WIDE POWERS

The Greatest Influence For Nation's Peace.

J.J. HILL TO BANKERS

Of New York at Banquet in Ottawa.

Ottawa despatch: "Some victories of peace" was the keynote of the address of Mr. J. J. Hill, the noted American railway magnate, in responding to the toast of "Our Guests" at the banquet of the New York State Bankers' Association. Mr. Hill, after eloquent reference to the hundred years of peace, predicting that there would never again be war between English-speaking nations, said in part:

"Capital is the most cosmopolitan force in the world. From the beginnings of human intercourse it has broken down more barriers, cemented more bonds than all the armies and navies of the world. Capital to-day furnishes the sinews of war. For none can long be carried on anywhere, as a rule none can ever be begun, if the great bankers of the world should agree in refusing to finance it. Arbiters of peace and agents of material development everywhere, it is most appropriate that they should be heard here and to-day.

"A century has written in the United States a record never before equaled. It has meant very much to our neighbors and the United States have grown in regard to the population of the world where the United States was in 1813, in all other respects she stands about where the United States did sixty years ago. The apparatus for her development is substantially complete, and the process is going forward at a startling pace.

"In spite of the obstructions, the commercial relations between Canada and the United States have grown to such proportions that astonish even those familiar with the official figures. According to the report of the United States Consul in this city, the foreign trade of Canada reached a total of over a billion dollars for the calendar year 1912. The increase over 1911 was 23.5 per cent. Of the total 56 per cent, was business done with the United States.

For the same calendar year the balance of trade for the whole United States was \$581,000,000; and of this \$255,000,000, was due to our commerce with Canada. It supplied forty-four per cent, of the balance rolled up by our commerce with the world.

"It is usual to speak and think of Europe as the best customer of the United States; and insofar as the rest of the United Kingdom it is true. But the Dominion of Canada is far and away the second best customer that we have. The statistics have been brought down to cover the first ten months of the current fiscal year, which began on July 1 last. During that time our exports to the United Kingdom were \$524,000,000; to Germany, \$291,000,000; to France, \$131,000,000; to Canada, \$338,000,000 and to all Europe combined, \$1,294,000,000. No other country except Great Britain and Germany even approaches Canada as a buyer in the markets of the United States. Her purchases were a seventh greater than those of Germany. They were 26 per cent, of those made up by the whole of a one-sided affair. It looks impressive when considered as a whole. Of the total exports from Canada in 1912 the United States bought over 3 per cent. Almost all the mineral exports of Canada go to the United States; most of its forest products and manufactures, and a third of the yield of its fisheries. This commerce in both directions is destined to grow even more rapidly in the next few years, owing to impending changes in the tariff regulations of the United States, than it has at any time during the last forty of fifty years.

CANADIAN BANKING.

"On two main lines the bankers of the two countries may well take counsel and learn from each other. The next to the United States is to provide a safe and adequate currency for the country. For Canada that problem has been solved in what appears to be a practical way. By your system banking facilities can be furnished through branch offices, as they have been to all the communities of commercial importance.

"The bankers of Canada are in a position to anticipate and forestall many of the most serious blunders that have marked the agricultural development of the United States. It is not too late to prevent the robbing of the soil, the exhaustion of fertility still unimpaired in your more recently settled districts. It is not so large a task, while your population still remains below the ten million mark, to introduce and enforce right methods of farming; to stop the transfer of population from country to city, which has been a mark of decline in practically every country of the world.

The Dominion Government, I believe, has shown its appreciation of the importance and value of this work by an appropriation of ten million dollars, to be spent in and by the various provinces within the next ten years. This is wisely done, but you should take care that these funds are not frittered away on extensive buildings, or large permanent educational staffs, but devoted to practical instruction to the farmer in modern farm methods with his own hands on his own land."

STOKERS INSANE FROM HEAT.

Queensdown, June 16.—While the White Star Line Steamship Majestic was on the voyage from Southampton for New York, at this port, two firemen suddenly became insane and jumped overboard. The moment the alarm was given the captain signalled the engineers to stop the ship and lifeboats were launched. The Majestic remained in the vicinity of the spot where the men struck the water, but the search for them was fruitless.

MOROS DEFEATED

And Entrenchments Taken by U. S. Troops.

Manilla, June 16.—The entrenchments of the rebellious Moros, under the Sultan of Jolo, at Bagsag, were taken by the American forces to-day, after a fierce battle, in which the American casualties were six killed and twelve wounded.

The casualties are regarded as few, in view of the stubborn resistance which the Moros made. The attacking forces had been made up unusually strong as a precaution, there being, in addition to the company of regular infantry, a troop of cavalry, seven companies of scouts, two companies of constabulary, with a battery of four mountain guns and a machine gun platoon.

The main position of the Moros was completely taken. Although there remains one point still occupied in the mountain, the mountain guns will be in a position to shell it easily.

Brigadier-General Pershing, commander of the Department of Mindanao, who led the forces, declares he will continue operations in Jolo until all the rebel's guns have been taken and the island is wholly peaceful.

AGAINST UNION

Presbyterian Ministers Opposing Are Organized.

Would Prevent Split, Not Cause One.

Toronto despatch: The meeting of an organization consisting of Presbyterian ministers, which has been formed to conserve the rights of the Presbyterian Church in Canada, and to endeavor to fight against union with other churches, was held in St. Andrew's Church Institute yesterday afternoon. One of the most important steps taken was to appoint a committee which will prepare a declaration, setting forth the views of the dissenters.

That the men who are in favor of unionism will meet plenty of opposition is the opinion expressed by certain members who were present at the meeting. Without exception the organization is strongly opposed to the union and will fight it to the bitter end.

"We are organizing to prevent a split in the church, not to cause one," said Rev. S. H. Crawford, of Essex. "We don't propose to be rushed into a premature union which will drive some of our strongest men out of the church. In years to come the feeling may change, and the church go into union by a unanimous vote, but at present it is not possible. Many of the older men in the church are against it, and there would be much friction should any such step be attempted.

Dr. Robert Campbell, clerk of the assembly, is also of the same mind, and thinks that Parliament would not pass the "Enabling Act" in the face of such a strong opposition. He says that beside obtaining an Act from the Dominion Parliament, each Provincial Legislature would have to ratify the new Union Church. The moderator of the assembly refused to express an opinion any more than to say that the unity of the church should be preserved.

Rev. D. O. McArthur would not say much about the proceedings of the meeting, but said that he is strongly opposed to the union at the present time, and that the organization as a whole is of this mind.

Certain members of the organization said that they have as yet arrived at no definite plan, and it is not possible that anything further will be done until after the resolution prepared by the committee is submitted. The committee appointed to perfect the organization comprises Revs. Dr. Clay, A. B. Winchester, Dr. E. Scott, Dr. Sedgewick and R. G. MacBeth, and Messrs. John Peuman, Walter Paul, C. S. McDonald, Dr. Murray McLaren and J. B. Mitchell.

UNIONISTS RETAIN SEAT.

London, June 16.—The Unionists succeeded by an increased majority of over 2,000 in retaining the Wandsworth seat, which was vacated by the resignation of Sir Henry Kimber. The figures are: Samuel (Unionist) 13,425; Kimber (Liberal) 7,088. Kimber's two previous majorities over Liberal candidates in January and December, 1910, were 5,339 and 4,614 respectively.

The issue on which the election was fought were mainly those of opposition to the home rule bill, Welsh disestablishment, and the need for an amendment to the insurance act.

LABOR MAY WIN IN AUSTRALIA.

London, June 16.—The Fisher Government of Australia, at a Cabinet meeting in Sydney yesterday, decided to defer its resignation until a definite result of the election vote in Hume district, New South Wales, is known. The Morning Post correspondent says the whole electoral position is now changed by the latest returns from Hume. There are nearly 3,000 absent votes uncounted in this electorate, where Sir William Lyne is now in a minority by 35 votes.

Sir William, although not officially a Laborite, is a consistent supporter of the Fisher Government. If the scrutiny present votes involves the return of Sir William the Government will be in a majority of one instead of in the minority. There is sufficient margin for a possible reversal of the present motion.

SUING GUELPH FOR FLOODS.

Guelph despatch: Three suits for damages involving nearly \$50,000 entered against the city by the Guelph Woollen Spinning Company and the Guelph Carpet Company, are being heard before Judge Middleton at the non-jury sittings of the high court of Ontario. They arise from the spring freshets of 1912 and 1913.

SIX DEAD IN WRECK

Death List in Stamford Smash Grows.

Newspaperman Victim True to Duty.

Stamford, Conn., June 16.—One additional death was added to the list of those who were victims in the collision of the second section of the Springfield express with the first section here, late yesterday, making the total six. Gregory Hume, a newspaper man, died this morning. The body of the woman, which was not identified last night, is that of Mrs. W. H. Seelye, wife of W. H. Seelye, manager of the Industrial Bureau of the New York, New Haven & Hartford Railroad at Boston. Two brothers of Mrs. Seelye reached here early to-day and completed the identification. The condition of seven patients who are at the Stamford Hospital was reported this morning as comfortable, and the opinion was held that all would recover.

The death list from the wreck follows: Mrs. Edward J. Kelly, Winthrop, Mass.; Everett H. Woodruff, Flushing, L. I.; Dr. Harmon G. Howe, Hartford, Conn.; Frank S. Confield, Springfield, Mass.; Mrs. W. H. Seelye, Boston; Gregory Hume, New York City.

Gregory Hume, a newspaper man, employed on the New York World, retained above all his sense of news when terribly crushed in the wreck. He was returning from a visit to his mother at Pine Orchard, Conn., and was a passenger in the Pullman car, which was telescoped by the engine of a train behind. When he was carried out of the wreck, suffering from a crushed pelvis and compound fractures of both ankles, as well as painful internal injuries, he said to those who were carrying him:

"Call up my paper right away and tell them there is a wreck here—a big story. Tell them I am sorry I won't be able to work because I am smashed up. Call up my mother, too."

Having done his duty—the first thing that flashed into his newspaper mind—he collapsed and became unconscious.

The inquiry into the collision was begun at once, Coroner Phelan, of Bridgeport, coming here as soon as notified, and formally opening an inquest at the town hall. The independent inquiries are already under way by the railroad company, and for the Public Utilities Commission through its engineer, Mr. Elwell.

Engineer Charles Doherty is at his home in New Haven, and sent word this morning that he would be here to answer questions at the inquest. Freeman Smith is already here. It was further stated that the fireman on the express at Westport was W. S. Moker. It had been currently reported that the engine and the fireman on it had figured in the Westport wreck of the second section of this same express, but records do not bear this out.

THE WARBLE FLY

An Insect Injurious to Cattle Raising.

Cattle raisers in almost all parts of Canada are familiar with the small lumps that appear on the backs of their animals during the summer months, and from which white grubs or maggots emerge at a later date. Many theories exist as to the exact life history of the insect known as the Warble Fly, of which the white grub is the larva. The opinion generally held that the eggs are laid on the backs of the cattle, and when hatched work their way beneath the skin, is proved by careful investigation to be incorrect. Dr. Seymour Hadwin, first assistant pathologist of the health department of Agriculture, who has studied the subject, claims that the eggs are not laid on the back, but on the legs of the cattle. This appears to bear out the theory that the newly-hatched insects are licked by the animals and thus taken into the system and ultimately find their way to the backs, where they develop beneath the skin.

The matter of chief importance to the cattle-raiser is not the exact course taken by the insect within the body of the cattle, but rather the economic effect of the grubs upon the business of cattle raising. To throw light on this phase of the subject, Dr. Hadwin has written a bulletin, which is numbered 16, of the Health of Animals Branch, dealing with the economic aspect of warble flies. In this it is shown that enormous losses occur each year through damage to hides caused by these insects. Tan Havelock Wilson (Ind. Lab.) says that during the "grubby season" extending from January to July, from 25 to 75 per cent, of hides are more or less damaged. The extent of damage is variously estimated by 16 large tanners to be from 50 cents to \$1 per hide; the estimate of one Ontario tanner was 10 per cent, which is equal to \$180,000 per annum.

The author observes that the farmer who undoubtedly loses is the farmer; the tanner does not want warbled hides at any price, and several of them testify that they buy hides only during the season when hides are not grubby. He estimates the annual loss to be between 25 and 30 per cent.

This bulletin of twenty pages, which is the first to have been issued on the subject in Canada, is helpfully illustrated. Copies will be mailed in response to applications made for it to the Publications Branch of the Department of Agriculture at Ottawa.

BOTH SIDES WON.

Toronto despatch.—The employees of the Randall & Johnston firm of clothing manufacturers, Toronto, who have been on strike for several weeks, demanding recognition of the union, have decided to return to work. The men claim that their demands have been met, but the company denies this and also claims a victory.

TROUBLE COMING

Venezuela Fears Fighting Over Presidency.

Willemstad, Curaçao, June 16.—Details of the recent political disturbances in Venezuela, where a large number of prominent men were imprisoned or took to flight in consequence of accusations being made against them of conspiring against the Government, have just reached here.

It is stated that a plot to depose President Juan Vicente Gomez was frustrated by the imprisonment of General Delgado Chalbaud and a number of his friends. The plot was to have been carried out at the inauguration of the Venezuelan Automobile Club a few weeks ago, when the plotters intended to assassinate the President.

The announcement made by the Government says that the plot was discovered through General Manuel Coroa, who, when invited to do so, flatly refused to join in the conspiracy, and started off toward Miraflores Palace to inform the President of the danger. On his way he was shot at, but escaped injury, and the information he gave to the President led to the imprisonment of the plotters.

In circles in which General Chalbaud is well known, it is stated that there was no plot of any kind against the President, who is declared to have imprisoned General Chalbaud because he was jealous of him, and was afraid he might become a candidate for the Presidency at the conclusion of the present term in April, next year.

In connection with the Presidency there is much speculation in Curaçao as to what will happen. Many believe that President Gomez will either try to succeed himself, which is contrary to the constitution, or to secure the election of one of his trusted friends. In either event it is considered certain that some trouble will follow.

FOR KING'S JESTER

Proposal in House in Laureate Discussion.

London, June 16.—The House of Commons was enlightened to-night with a question in regard to the poet laureate'ship, which is vacant owing to the death of Alfred Austin. Arthur Lynch, the Irish member for West Clare, wanted to know the salary, perquisites and privileges which were attached to the office, and the nature of the duties required.

The Premier said the salary was \$350 a year, with an allowance of \$135 in lieu of "a butt of sack." He did not know the exact duties of the office.

Mr. Smith, member of St. Helens, and Mr. McNeal suggested a revival of the post of King's jester, whereupon another member drew roars of laughter by asking the Premier to consider the claims of Messrs. Swith and McNeal for the post.

Captain Lynch wound up the discussion by asking whether a butt of sack was not an intolerable deal—a sack for a ha'porth of poetry.

A SALE OF PEARLS

Big Prices for Valuable Jewelry.

London, June 16.—A magnificent five-row pearl necklace composed of 471 pearls of fine Orient fetched \$90,000 at a sale of important jewels at Christie's to-day. Mattland, the collector, was the successful bidder. A magnificent three-row pearl necklace composed of 100 well-matched and graduated pearls of the finest Orient, sold for \$90,000. A pearl necklace composed of a row of 56 graduated pearls of fine Orient, with a single brilliant clasp, brought \$15,000. A pearl necklace composed of thirty-two large pearls, divided by smaller ones, and with a brilliant flower pattern clasp, fetched \$14,000. A set of five large pearl drops, each of pear shape, of fine Orient, each of pearl shape, brought \$9,750. A brilliant tiara designed as vertical bars, surrounded by 118 fine graduated brilliants, fetched \$11,000. The total for the sale was \$350,000.

ELECTORAL REFORM STRIKE.

Berlin, June 12.—There was confirmation of yesterday's report in regard to the possibility of a general political strike by a speech made by Herr Ledebour, one of the leaders of the Radical party, in a speech in the Reichstag this afternoon. In opposing the military increase and tax bills, he openly threatened the Government with a general strike to compel the carrying out of the Prussian electoral reforms. He declared that the entire Socialist representation in the Reichstag was in favor of taking this step.

NOBLES WED ATTRESSES.

London, June 16.—Another matrimonial alliance between the peerage and the stage was consummated to-day. Sir Miles Talbot Stapleton, who is but 22, was married to Dorris Ludford, who made a brief appearance in "The Arcadians."

Notwithstanding the denial of his engagement to May Etheridge, the actress, which Lord Edward Fitzgerald, a lieutenant in the Irish Guards, and the youngest brother of the Duke of Leinster, communicated to the Times on May 20, the couple were married to-day at the registry office.

WALES AS A PRIVATE.

London, June 16.—The Prince of Wales will go to camp for a week as a private soldier on Saturday. His comrades, however, will not be Tommy Atkins. He is a member of the Officers' Training Corps, whose curriculum includes a week annually under canvas under the same conditions as the enlisted men.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under its personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

SOWING HIS WILD OATS REAPING A HARVEST OF SORROW

How many young men can look back on their early life and regret their misdeeds. "Sowing their wild oats" in various ways. Excesses, violation of nature's laws, "wine, women and song"—all have their victims. You have reformed but what about the seed you have sown—what about the harvest? Don't trust to luck. If you are at present within the clutches of any secret habit which is sapping your life by degrees; if you are suffering from the results of past indiscretions; if your blood has been tainted from any private disease and you

dare not marry; if you are married and live in dread of symptoms breaking out and exposing your past; if you are suffering as the result of a missed life—**DRS. K. & K. ARE YOUR REFUGE.** Lay your case before them confidentially and they will tell you honestly if you are curable.

YOU CAN PAY WHEN CURED

A 'CROSS COUNTER TALK

Customer: "What constitutes good paint?"
Dealer: "Good paint depends on the materials used, the process of manufacture, and the skill of the paint maker—no more, no less."
"Sherwin-Williams Paint. Prepared, is good paint—the best paint, in fact, that can be made. No care or detail is lacking in its manufacture. The materials employed are of the highest quality and are properly put together by experienced paint makers. The linseed oil—the vital part of paint—used in S.W.P. is made especially by The S.W. Co. in their own mill. The pigments are selected with greatest care and scrupulously tested. The tinting colors are products of the Company's own dry color works. And the mills used for grinding and mixing are designed and made in the machine shops of the Company. They embody the most advanced ideas in paint making. With such high quality materials, such care and attention, S.W.P. must be and is good paint all the way through."

HOSTILITIES IMMINENT

The Balkan States Situation Has Reached a Crisis.

Serbia and Greece Are Ready to Seize Macedonian Territory and Give Bulgaria Cause for War—Latter is Believed to Be Hard Up for Money—Body of Turks Anxious to Enlist With Bulgars.

LONDON, June 10.—With both sides stubbornly refusing to make the slightest concession, war between the Balkan states is hourly becoming more imminent. If Bulgaria sends a negative reply to the Serbian note—and nothing indicates that she will answer otherwise—Serbia and Greece will proclaim the annexation of the unoccupied Macedonian territories, thereby establishing a definite casus belli.

The only hopeful feature of the situation consists in the belief that Bulgaria is lacking the sinews of war. Serbia and Greece are not only better situated in this respect, but also occupy superior strategic positions. These facts probably account for the calmness with which Serbia apparently regards the prospects of war.

Serbs Hold War Council. BELGRADE, Serbia, June 10.—Gen. Radomir Putnik, chief of the general staff of the Serbian army, arrived here yesterday by special train to attend the War Council, which will be held under the presidency of the King.

The Bulgarian reply to the Serbian note respecting a revision of the treaty of alliance, which, it is believed, will be in the negative, is expected at an early date. Preparations for war continue and the hospitals are being re-opened.

Turks Would Serve Bulgaria. SOFIA, June 10.—The president of the volunteer societies has received a telegram from Shumla, stating that 1,000 Turks, exempt from military service, desire to form a corps to serve Bulgaria in the event of war.

Outlet For Serbia. LONDON, June 10.—The Ambassadorial Conference yesterday discussed the question of providing Serbia with a commercial outlet to the sea. A tentative plan was adopted and will be submitted to the Home Governments for further consideration.

Peace Conference at an End. LONDON, June 10.—The final session of the peace conference between the delegates of the Balkan allies and those of Turkey was held yesterday at St. James' Palace and ended without anything being decided as to the exchange of prisoners or other matters. The delegates agreed to leave all outstanding questions to their respective Governments.

RUNAWAY CHASES MAN.

Toronto Bicyclist May Die as Result of Accident.

TORONTO, June 10.—Pursued by a runaway horse along St. Patrick street late yesterday afternoon A. Spellman, 125 D'Arcy street, was at length trampled down by the animal near the corner of Spadina and St. Patrick and seriously injured. The horse, galloping at a furious pace, disappeared and the owner cannot be found.

Very few people witnessed the accident, and it was supposed that Spellman had fallen off the bicycle he was riding. A man who saw the whole occurrence stated that Spellman attempted to get out of the way of the runaway beast by going to one side of the road. The horse seemed to divine his intention, and turned in also. The man then sped to the other side and the horse followed.

Spellman became excited and rode into the centre of the road with the result that he was run down. He was taken to the Western Hospital and is in a serious condition.

ALASKA VOLCANO HAS ATTACK.

People In Seward Aren't Nervous, But Hate the Smoke.

SEWARD, Alaska, June 10.—Although a west wind has been driving smoke and fumes from Katmai volcano over Seward, no alarm is felt here. There are four craters on the mountain giving vent to the internal convulsions, but a terrific outburst like that of last year is not expected. It is believed, however, that Katmai will continue to emit vast columns of smoke indefinitely. The fumes from the smoking mountain were particularly noticeable here Sunday. The sun was visible yesterday, but the sky was murky.

The eruption of Mount Shishaldin on Unimak Island was spectacular. A great column of flame poured out of the top of the mountain, while ashes spread over the surrounding country. The district affected by the volcano is uninhabited.

DR. GRANT IS CHOSEN.

Presbyterians Want Him to Take Big Financial Office.

TORONTO, June 10.—Rev. Dr. A. S. Grant is the man of the hour at the Presbyterian General Assembly meeting here.

This morning a special committee will report upon the question of transferring him from the superintendency of home missions to take the new position of chief executive officer of the board of finance. Rev. Dr. Grant became prominent as the pioneer Presbyterian missionary to the Yukon. The position of chief executive officer of the board of finance was offered to Dr. Grant last June, but he declined.

The board has now called upon the general assembly through a special committee to secure, if possible, believing that in a very special way he possesses those qualities necessary to make the work of the board a success.

TRIBUNAL MEETS.

Ancient Canadian-U. S. Claims Are Under Adjudication.

OTTAWA, June 10.—The pecuniary claims tribunal, consisting of Henri Fromageot, Sir Charles Fitzpatrick and Chandler P. Anderson, began a series of sittings in the Supreme Court yesterday afternoon. The commission is to pronounce upon a number of outstanding claims of an international character. It has already sat in Washington.

The cases on the list this week are not of particular importance. The first to be proceeded with is what is known as the King Robert case. It is a claim of \$555 interest on \$26,428, the amount of a deferred payment by the U. S. Government to the claimants. The McCall Dinning Co. of Baltimore contracted with the U. S. Government to convey 30,000 tons of coal from Baltimore to Manila, and leased the vessel King Robert from R. Chapman & Sons, of Newcastle-on-Tyne, to carry the cargo. The contract was performed, but when the time for payment came, the naval appropriations were exhausted. From Nov. 17, 1905, to the following March, the account was unpaid and the claim now made is for interest on the amount for that period.

The U. S. claims that its Government is not liable like a private individual for interest on deferred payment in the absence of statutory authority, and even where it is provided by law, it is not the practice of the U. S. to allow it. The argument took up the afternoon sitting of the commission. Judgment will not be given now.

MAKES RECORD TRIP.

Zeppelin Airship Goes From Baden-Baden to Vienna.

VIENNA, June 10.—Accepting an invitation from Emperor Francis Joseph, Count Zeppelin, with his airship Sachsen, paid a visit to Vienna yesterday. The Sachsen started from Baden-Baden at 5.30 yesterday morning and reached Vienna at 1.30 p.m. After cruising for twenty minutes over the capital the airship took a straight course to Schoenbrunn Castle, there manoeuvring twenty minutes and saluting the emperor, who was awaiting it. Thence the Sachsen proceeded to the Aspern fields where it was landed smoothly.

Besides Count Zeppelin and his son, 22 other people were aboard the Sachsen. The journey from Baden-Baden, a distance of about 430 miles, was made at an average speed of over 50 miles an hour.

The express train from Baden-Baden to Vienna occupies 16 1/2 hours in the trip. Count Zeppelin is the emperor's guest in Vienna. His reception on landing in the Aspern fields, was exclusively of a military character. Four hundred soldiers of the aviation brigades were present to help with the landing. Two hours after the arrival of the Sachsen, a terrible storm swept over the Aspern fields.

Count Zeppelin was publicly welcomed in the Town Hall last night.

STILL RETICENT.

Winston Churchill Not Prepared to Discuss Those Three Ships.

LONDON, June 10.—(C.A.P. Cable.)—In the House of Commons yesterday Sir William Byles asked the First Lord of the Admiralty whether, in view of the fact that he had informed the House last December that the Canadian contribution to the navy was to be in addition to and not in any degree in substitution for the existing British program, he would explain why that program should be rendered in any degree inadequate by the temporary check in providing the Canadian addition.

Mr. Churchill, replying, referred Sir William to the Admiralty memorandum of December last and to his own speeches in March.

Sir William asked if this acceleration was not in conflict with the spirit of the naval holiday.

Mr. Churchill said this had been most carefully kept in mind, but expressed the opinion that he could not discuss the matter with any advantage or in a manner satisfactory to the House at question time.

PRINCE BACK IN QUEBEC.

Gazes Upon Some Souvenirs of His Distinguished Ancestors.

QUEBEC, June 10.—H. R. H. Prince Albert, who returned from Niagara Falls with the cadets of the training ship Cumberland, paid a formal visit to his honor, the Lieutenant-Governor, Sir Francois, and Lady Langeleur, Sunday at Spencer Wood.

He afterwards visited Victoria Park, where a bronze statue of his great grandmother, the late Queen Victoria, is situated. His Royal Highness later proceeded to Montmorency Falls, where he was joined by his cadet mates and took tea in the Kent House, a summer residence of his ancestor, the Duke of Kent, when the duke was commander-in-chief of the British forces in Canada.

Plotted Against Monks.

MILAN, June 10.—Four Town Councilors of Somma Vesuviana, near Naples, were sent to prison for ten months and fined \$100 each for entering into a conspiracy against the community of Franciscans. By means of forged and faked photographs they brought grave charges against the monks. Three women who were concerned in the plot were also fined and imprisoned.

Farmer Strangely Missing.

BELLEVILLE, Ont., June 10.—On Saturday last Albert Hoskins, a well-known farmer residing in Thurlow Township, left his home during the family's absence and since that time no trace of him can be found. He took with him a rifle and a cartridge, and left upon a table in the house his watch and some money. Parties have made a thorough search of the neighborhood.

USED FOR PARTY FUNDS

New Sensation Sprung in Marconi Shares Scandal.

Revelation is Made at Inquiry Into Charges Against Liberal Ministers In Britain, That Former Government Whip Invested Party Funds In American Marconi—Home Rule Bill Starts Journey.

LONDON, June 10.—When Premier Asquith moved the second reading of the home rule for Ireland bill yesterday a Parliamentary battle broke which, if waged with as much violence and bitterness as the political warfare carried on outside of the House, will make the session a red-letter one. The Unionists have begun the fight with their hopes running higher than at any time during Mr. Asquith's Premiership, while the Liberals are suffering from what may be termed "Marconitis."
 Yesterday the "scandals" whereupon the great wireless telegraphy inventor's name has been bestowed were marked by somewhat startling developments. It transpired that Lord Murray of Elibank, the mystery of whose silence was recently related, had not been so mute as was supposed, for he had exchanged cablegrams with the chairman of the Marconi Inquiry Committee, Sir Albert Spicer, last April, when he declared it was impossible to return to England from South Africa before July. Spicer is blamed for having kept the information to himself till Lord Murray was subjected to comments of, to say the least, a most ungenerous nature.

More sensational even is the discovery that Lord Murray's purchases of American Marconi, outside of those he acquired in conjunction with Mr. Lloyd George and Sir Rufus Isaacs, were made for a trust account which his brother, now in England, states was for the Liberal party funds. The Unionist critics have been making invidious comparison of the fact that Murray has not yet paid for the stock he got in April from Sir Rufus Isaacs and Lloyd George, and the fact that the 3,000 additional shares he purchased in May were fully paid for. The explanation, of course, is found in the circumstance that the May purchase was made for the Liberal party funds.

Percy Illingworth, who succeeded Lord Murray as Chief Whip of the Liberal party in August, and is at present controller of the party funds, stated that he had not got the shares in question, and knew nothing whatever about them, except what Lord Murray's brother had told him a few days ago for the first time.

WEST IS CARELESS.

Alberta Towns Responsible For Poor Credit, Says Aitken.

MONTREAL, June 10.—While Sir Maxwell Aitken, British M.P., who arrived here yesterday from England, is as optimistic as ever regarding the future of Canada, he regards the imminent outlook in the money market as anything but reassuring.
 "Canada has been over-borrowing," he remarked, in the course of an interview. "There can be no question about that. The provinces and municipalities have been getting too much money, and now we will have to wait till the effect of this has worn off."
 "I am not referring to old Canada, neither can anything be said against the financial methods of the lower provinces. The west, however, has been going too fast in a great many ways."
 "Have you Alberta in mind?" he was asked.
 "Yes," he replied, "that is where the shoe pinches. Alberta's financing has been anything but wise. The western municipalities generally have been going it at a rapid pace, but, of course, the wonderful development and rapidly increasing population will help them out in the end."

GEORGE WYNDHAM DEAD.

English Soldier, Parliamentarian and Author Was 49 Years Old.

LONDON, June 10.—The death of the Rt. Hon. George Wyndham, who was Chief Secretary for Ireland from 1900 to 1905, in Arthur J. Balfour's Conservative Cabinet, occurred yesterday in Paris, according to private despatches received here. He was in his 50th year and had been Conservative member of Parliament for Dover since 1889.

Soldier, Parliamentarian and author was the late Rt. Hon. George Wyndham, born in London, he, as an officer of the Coldstream Guards, took part in the Suakin campaign of 1885. In 1889 he entered the House of Commons. He was Under Secretary for War 1898-1900 and Chief Secretary for Ireland 1900-1905. His term of office was marked by the passage of an Irish land bill, which has done much to hasten the establishment of a peasant proprietary.
 He was the author of several books, including "North's Plutarch," "Shakespeare's Poems" and "Ronsard and La Pléiade." His favorite author was Sir Walter Scott, and by the time he was eleven years of age he had thrice read "Rob Roy."

Explorers Sail Next Week.

VICTORIA, B.C., June 10.—When the Stefansson exploration party sails north next week, one woman will be on board, the wife of Dr. Anderson, zoologist for the expedition. Mrs. Anderson will accompany the party to Nome, where she will say good-bye to her husband for three years. She and her husband were schoolmates at the State University of Iowa, she being a freshman in the year he was junior.
 Stefansson said the Karluk will be ready to sail Saturday, but he did not say when the expedition would start.

AGAINST OPEN BAR.

Congregational Union Approves the Alliance Platform.

TORONTO, June 10.—Amid great enthusiasm in which over 600 men and women joined, the Congregational body of Canada, and more particularly of Ontario, last night formally pledged itself to lend all possible aid to the movement for the abolition of the open bar.

It was Young People's night and the final session of the Congregational Union of Canada, when Rev. E. D. Silcox as convener of the temperance committee to present his report. In addition to about one hundred delegates from all over the Dominion, the Northern Congregational Church was filled with several hundred young men and women representing branches of the Christian Endeavor in the city.

The report, adopted unanimously, was as follows: "We desire to place on record our heartfelt appreciation of the work being carried on by the Dominion Alliance, which is the fighting force of the denominations; and we pledge ourselves to assist the Alliance in their noble endeavors to bring about local option and to banish the bar, thus to hasten the day when the white flag of prohibition shall wave in glorious triumph from sea to sea, from sea to sea, over our fair Dominion."
 The session last evening, which was the most largely attended, was marked by three notable addresses on young people's work. Rev. A. F. Pollock, B.D., of Cobourg, spoke on "Fundamental Principles in the Development of our National Life," and impressed the fact that we will never have a good Government until every man takes upon himself seriously the responsibilities of citizenship. Rev. J. R. Heyworth of Paris addressed the meeting on the subject "The Challenge of the Immigrant to Our Y. P. Societies," and Miss Effie Jamieson spoke on "Our Young People and the Foreign Work."

The Congregational Union of Canada will meet next year in the First Congregational Church, Hamilton.

TELEGRAPH BRIEFS.

The Presbyterian General Assembly will meet in Woodstock next year. Eighty cadets were dedicated by Commissioner Rees of the Salvation Army in Toronto yesterday.

Capt. Peary, the Arctic explorer, was made a grand officer of the Legion of Honor in Paris yesterday.

The American Medical-Psychological Association opened its 69th convention at Clifton Hotel, Niagara Falls, today.

The Ontario Government will send Mr. W. A. MacLean, engineer of the Highways Department to Europe to study roads.

Fred. Mince, a farm laborer, was killed near Ontario when his team shied at an automobile, throwing him under the wagon.

Fire which started in a department store at Springfield, Mo., yesterday destroyed buildings worth several hundred thousand dollars.

Lady Scott has undertaken to design a bronze statue which will be erected in Oshkosh by public subscription to Dr. Edward Wilson, who lost his life with Capt. Scott.

Mrs. J. Grimshaw, 80 years of age, met death at Marlbank, near Kingston, as a result of falling out of a window. She was feeble-minded and staying with a daughter, Mrs. Henry Wagar.

As the result of a decision of the U. S. Supreme Court, several railroads operating in Minnesota will pay into the State Treasury approximately \$3,000,000, in the shape of overcharges.

While putting his rifle together in the cellar at 107 Geoffrey street, Toronto, yesterday, Charles A. Thompson of the Q.O.R. accidentally shot himself in the breast and died a short time later.
 An unidentified organizer of the Industrial Workers of the World was stoned to death at Wilson Creek, Wash., during a pitched battle between several members of the I.W.W. and Italian laborers employed by the Great Northern Railway, whom they had tried to persuade to quit work.

WOULD STOP GRANT.

Dr. Bruce Smith Condemns Hamilton City Hospital.

TORONTO, June 10.—Disgracefully dirty and untidy, overcrowded, poorly ventilated, are a few of the adjectives applied to the public wards in Hamilton City Hospital by Dr. Bruce Smith, inspector of hospitals and charities for Ontario. Dr. Smith has advised that the Government grant, which amounted to \$10,286 last year, be discontinued, as the hospital is far below any modern standard.
 The inspector visited the hospital recently, and in his report calls attention to the fact that his former recommendations have been ignored. The buildings, he says, appear old and dilapidated. The main kitchen is poor. The separate building for tuberculosis patients is disgracefully overcrowded. Nothing is apparently being done to remove the disadvantages under which the hospital is conducted.

A Hamilton newspaper demands that an emergency meeting of the City Council be called to consider the situation.

Women Among Conspirators.

PEKIN, June 10.—Some women of modern education were among the alleged anti-Government conspirators who were placed under arrest at Tien Tsin and Pekin in the past few weeks. It is reported that 200 of the conspirators already have been executed after only a summary examination.

Horse Thief Sentenced.

CORNWALL, June 10.—A young man, Frank Philbin, aged 22 years, was before Police Magistrate Danis yesterday on a charge of stealing a horse and rig at Milleroches. He pleaded guilty and was sentenced to one year in the Central Prison at hard labor.

MANY GOING TO CIRCUS.

Barnum and Bailey Attracting Thousands with Many New Novelty Features.

The Barnum and Bailey Greatest Show on Earth is attracting unusual interest with its wonderful program of European novelties, its rebuilt parade, its complete menagerie and its recently added \$500,000 wordless spectacle of "Cleopatra," all of which will be seen in Brockville on June 26th.

The parade, which takes place at 10 o'clock in the morning, is three miles in length. In the menagerie will be found the only baby giraffe on exhibition anywhere on earth. The inaugural spectacle of "Cleopatra" is produced on the biggest stage ever devoted to an open air amusement. It is erected in the main tent of the show. There is a cast of 1250 characters, a grand orchestra of 400 voices, an orchestra of 100 musicians, a ballet of 350 dancing girls, 560 horses, five herd of elephants, caravans of camels, and an entire trainload of special scenery, costumes and stage effects. This is the greatest spectacular, theatrical and circus event in the history of amusements in America.

Among the many European novelties on the regular program which follows the spectacle, are Miss Bird Millman, the wonderful high wire artist, and novelty feats by a company of Japanese warriors and jiu jitsu experts, Winston's riding and juggling seals, the Herr Koening's troupe of statue-building, dancing and jumping horses, a brass band of stallions, Brezac's mule and monkey circus, the Siegrist-Silbon family of high air vaulters and somersault rider in the world, The Five Baltons, world's greatest strong men and women; Vittoria and Georgette, strong arm dancers. Les Jardy and Les Deko families of acrobats, five herds of trained elephants, and the fifty funniest clowns in the world.

The Barnum and Bailey circus for more than fifty years has stood at the head of the world's amusement affairs. This year it is more interesting than ever before, and twice as big. It travels on a train more than a mile in length, covers fourteen acres of ground and has nearly 1500 employes, 700 horses, nearly two-thirds of the elephants in America, 110 in cages the menagerie and over 2000 wagons and other vehicles.
 The two performances that will be given in Brockville will be exactly the same as those presented at Madison Square Garden, New York, where the spectacle was opened in March. Not one detail has been changed. The great spectacle was said to be the most notable dramatic event in the history of amusements in that city, while the circus proper was credited with the best ever given there.

Presbyterians for Prohibition.

The closing session of the great Presbyterian congress at Toronto saw the introduction of a prohibition resolution which was adopted amid thunderous applause.

It was introduced by Dr. A. S. Grant and said: "That in the opinion of this congress, consisting of all the ministers and representative laymen from all the congregations of the Presbyterian Church in Canada, the time has come when legislation should be secured in Canada prohibiting the manufacture, importation and sale of intoxicating liquor for beverage purposes."
 Vigorous denunciation of the liquor traffic and emphatic demand for prohibitory legislation are features of most of the representative religious gatherings which have been held during the past few weeks. Presbyterians, Methodists, Congregationalists and Baptists have been specially outspoken in the denunciation of the bar-room system and in declaration of the desirability of its total suppression.

SUFFERED

With Biliousness and Sick Headache
 Calgary, Alberta, July 8, 1911
 I was a great sufferer for a long time with Biliousness, Sick Headache and Liver trouble. Nothing seemed to do me any good. I had almost given up in despair when I decided to try

FIG PILLS
 After taking about half a box the headaches stopped and my appetite improved. I have just finished the fifth box and feel as well as ever. I can heartily recommend Fig Pills for stomach and liver troubles.

Mrs. MARY ELLSON
 Sold at all dealers in 25 and 50 cent boxes or mailed by The Fig Pill Co. 2, St. Thomas, Ont.

Tenders Wanted

The Council of Rear Yonge and Escott ask for tenders for furnishing 100 cords of stone suitable for road purposes on each of the following roads, on the Charleston road southwest of Athens, on the McIntosh Mills road south of Athens and on the old macadamized road between the G. M. Bates lot and the town line.

R. E. CORNELL, Clerk.

Cause and Cure of Headache

The cause of headache as you know, is the stoppage of the circulation resulting in pressure on the delicate nerves of the head. In time nature will start the blood going again, but meanwhile we suffer and are unfit for duty.
 Assisted by two ZUTOO Tablets, which by the way are as harmless as the soda they contain, nature will remove the pressure and stop the headache in twenty minutes. Why continue to suffer? Why be unfit?
 It is really remarkable how many people now use ZUTOO to cure their headaches. Do you? If not, why not?

Hard Island

Despite the threatening thunderstorm on Sunday evening, the religious service in the school house here was well attended. The sermon and service throughout were truly impressive. In addition to previous announcements a few other workers were also in attendance, whose presence and assistance were a very welcome contribution. A full supply of workers is expected on Sunday evening next.

Scobell's Liquor, Tobacco and Drug Cure

Permanently dispels the need for effects almost instantly—removes all cravings. After taking the treatment there will never be any need to drink intoxicants or use drugs again. Can be given secretly. We have yet to hear of one failure. Mailed under separate cover to any address. Price \$2.00 box, or 3 boxes for \$6.00. The Scobell Drug Co., St. Catharines, Ont.

No bells peal forth at eve to tell The welcome hour of prayer has come,
 But yet from distant hill and dell, With hearts that wish each other well,
 Behold they come.

Do You Know What This Label Means?

It means cement of the highest possible quality.
 It means cement tested by experts whose authority is final at all our mills.
 It means cement acknowledged by engineers, architects and hundreds of thousands of farmers to fulfil every requirement of scientifically made Portland cement.
 It means a cement that is absolutely reliable, whether used for a great bridge or for a concrete watering trough. You can use

Canada Cement
 with complete confidence that your concrete work will be thoroughly satisfactory. You ought to have this confidence in the cement you use, because you have not the facilities for testing its qualities, such as are at the disposal of the engineers in charge of big contracting jobs.
 These engineers know that when cement has passed the tests made upon it at Canada Cement mills, it will pass all their tests.
 And this same cement is gold to you for your silo, your foundations, your feeding-floor, your milk-house or your watering-trough.
 Used according to the instructions in our free book "What the Farmer can do with Concrete," Canada Cement never fails to give satisfactory results. Write for the book. It not only tells you how to mix and place concrete, but will also suggest scores of uses for it on your farm, every one of them valuable and easy to do. In asking for the book you do not incur the slightest obligation.

There is a Canada Cement Dealer in Your Neighborhood

SUNDAY SCHOOL LESSON

LESSON XII.—JUNE 22, 1913.

The Blinding Effect of Sin—Temperance Lesson.—Amos 6: 1-8.

Commentary.—I. The folly of false hopes (vs. 1-3). I. Woe—a word expressive of impending calamity. The woe pronounced in this verse applies to the characters enumerated in the following verses. At ease in Zion—The denunciation is mainly against Israel, but the people's strength is constructed as referring to his beloved nation and its sacred center. While the language suggests that a woe is pronounced upon those who are indifferent and inactive with reference to the interests of true religion, the connection indicates a warning to those who are depending for security upon the strength and sacredness of Jerusalem, without making any efforts to secure their own safety. They were insensible to the danger that was threatening their nation. The warning here given may well be construed as an exhortation to obedience, watchfulness and prayer. Trust in the mountain of Samaria—Samaria was the capital of Israel. The nation had enjoyed a season of peace and prosperity. Her borders had been extended so that her territory was nearly as great as it had been in Solomon's time. This period has been called "the Indian summer" of Israel's history. The end was coming in thirty years. Named—"Notable men of"—V. Chief of the nations—Judah and Israel considered themselves the principal nations of the earth. With respect to religious privileges, they were the greatest. Yet their persistent abuse of their privileges led to their overthrow. To whom the house of Israel came—To the notable men of Judah and Israel, the house of Israel came for counsel, and the house of Israel came for counsel. The house of Israel came for counsel. The house of Israel came for counsel. The house of Israel came for counsel. The house of Israel came for counsel.

later. They stretched themselves—The loungers, the idlers, shall be removed—From a condition of elegance and luxury, they were soon to go forth to captivity and want, and their trust in Zion and the mountain of Samaria would not save them. 8. Hath sworn by himself—He could swear by no greater (Heb. 6: 13, 17). I abhor the excellency of Jacob—The nation which he had chosen for himself, and the very religious system that he had given had to such an extent failed to fulfill his purpose that both became displeasing to him. Therefore will I deliver up the head of God permitted the enemies of Israel to carry out his desire in conquering the nation.

Questions.—Who was Amos? In whose reign in Judah did he live? Who was king in Israel when Amos prophesied? Where was the home of Amos, and what was his occupation? What is the nature of his prophecy? Upon whom did the prophet pronounce a woe (v. 1)? Why is reference made to Carmel, Hamath and Gath? What a difference sin is said of the sin of intemperance? What punishment was foretold? What was the material condition of Israel at this time? How long after this was the kingdom overthrown?

PRACTICAL SURVEY.

Topic.—Conditions in Israel.
I. Apathy in religion.
II. Profanity in pleasure.
III. Desolation in prospect.

I. Apathy in religion. Amos, the author of this prophecy, though a native of the kingdom of Judah, was sent as a messenger to the ten tribes of Israel, at the time of their greatest splendor, yet at the crisis of their destiny as revealed in the prophet's denunciations. The prophet's spirit was deeply stirred by the knowledge of the sins which were being committed by the people. His keen eye pierced through the glittering cover which wealth had thrown over their corrupt lives. Their national life had once characterized by simplicity which had completely passed away, and they were a corrupt, degenerate people. In defiance of the Mosaic law, a class of rulers had arisen who possessed large estates, and had misused their power to oppress the masses who were brought into a condition of poverty, and even slavery. Not that were practiced, they kept up a form of worship; yet they were in a condition opposed to all spiritual improvement. They had no concern for the spiritual interests of Israel. They were agreed not to sacrifice national indignities by too scrupulous attention to religious precepts. Self-denial was not congenial labor was hateful, conflict against evil repulsive. They persisted in their wicked courses of injustice and oppression on the presumption that they should never be called to an account for them. They trusted in their fortifications and external advantages, and in God, a most delusive confidence. Their case was criminal and pleasurable.

II. Profanity in pleasure. The people placed their happiness in the gratification of their carnal appetites at the time when God was calling them to weeping and mourning. They indulged in themselves in all manner of pleasures, and display. They were extravagant, profane, intemperate, extortionate. They profaned the name of God by using instruments of music which had been devoted to the worship of God, thus dragging sacred things to the level of the profane. They neglected the true worship of God, forgetting that there is a distinction between the work for man to do, and the real decay of their nation, when such conditions were due to the profane. They were destitute of true sympathy for the people. They had no true realization of their influence. Distress and decay were disregarded as long as they were in pleasure, supposing their position would justify them and their gain afford such self-indulgence. They continued to call for strong drink when the judgments of God were ready to break upon them.

III. Desolation in prospect. Those who dwell in Zion vainly thought that their power and protection sufficient for them. Disaster seemed unlikely to them, yet by ignoring approaching calamities and by their conduct they hastened their doom. The prophet taught them persistently that God was ever closely watching the doings of nations and men, and that no matter how great the power and protection sufficient for them, yet by ignoring approaching calamities and by their conduct they hastened their doom. The prophet taught them persistently that God was ever closely watching the doings of nations and men, and that no matter how great the power and protection sufficient for them, yet by ignoring approaching calamities and by their conduct they hastened their doom.

They forgot the "afflictions of Joseph," the real decay of their nation, when such conditions were due to the profane. They were destitute of true sympathy for the people. They had no true realization of their influence. Distress and decay were disregarded as long as they were in pleasure, supposing their position would justify them and their gain afford such self-indulgence. They continued to call for strong drink when the judgments of God were ready to break upon them.

FARM GARDEN

High-grade butter making. Butter-making on the farm is not so extensively carried on now as in former years, owing to the increase of creameries. Yet there are farms in sections so remote from creameries that butter is still made quite a profitable article.

To make high-grade butter calls for scientific methods. As a rule, the farmer who does this particular task to the demands the principles of good butter-making, and when he finds one who understands conditions that enable him to make better butter than any creamery butter-maker under similar conditions.

As the farmer has only his own milk at hand, and has only himself to blame if it is not cream and in otherwise good condition, he receives his milk fresh and is enabled to ripen the cream to his own satisfaction. It is the most important thing in all dairy operations. It is impossible to make high-grade butter from dirty milk. Keeping the barn clean, seeing that the cows are well bedded and carried at least once a day is work that is of untold value.

The farmer's milkman just before milking wipes off the sides and udder with a clean rag. This removes the loose hairs and dirt that are most likely to get into the milk. A damp towel is used in winter months to remove what dirt remains. If a damp towel is used in winter months to remove what dirt remains. If a damp towel is used in winter months to remove what dirt remains.

All of the dairy utensils must be thoroughly clean, which is best done by washing in lukewarm water to which a small amount of good washing powder has been added. Then rinse with scalding water. When well scalded with scalding water, they will dry in a few minutes, and will be much more sanitary than if dried with cloth.

Probably ripening the cream is the most important step to be taken. It is a common practice to ripen all the cream for a week, and churn at the end of that period. This is done by stirring the cream while others some cream 2 or 3 weeks old, or by churning butter a few times before churning. Good butter cannot be made out of cream a week old, even if it has good cooling facilities.

It is better to churn two or three times a week, and while this will necessitate more work, it will give a much better quality of the butter. It is a mistake to put fresh cream into the churn to be churned with 12 or 15 hours before churning. When each new stirring is added, the cream should be well ripened. As soon as skimmed milk is added to a low temperature as possible, this will check the growth of bacteria. Before mixing with the old cream, it should be heated to 12 to 13 hours before churning. About 12 to 13 hours before churning. About 12 to 13 hours before churning.

When treated in this way the butter should be of a high grade. It is a mistake to add a lot of water to the cream, as this will reduce the butter fat content. The water should be added in the form of a thin layer on top of the cream. It is a mistake to add a lot of water to the cream, as this will reduce the butter fat content.

THE POULTRY WORLD

A COLUMN OF NOTES.

Any poultry raiser who has space ground should grow alfalfa, the best green feed that grows, containing 7.4 ash or mineral matter and 11 per cent. protein in dry form. In its green state the percentage is much higher. Alfalfa can be grown almost anywhere if certain rules are followed.

The Indian Runner duck is in popular favor now, and those breeding true Runners are reaping a rich harvest. There is a brisk demand for hatching eggs and stock, although good stock is not to be had in large quantities, as the breeders are using them to produce hatching eggs to meet the demand of the trade. A good dry feed for young chicks from five days of age to maturity is 100 pounds bran, 100 pounds middlings, ground oats, 50 pounds of fine ground oat meal, 100 pounds of fine ground oat meal, 100 pounds of fine ground oat meal.

There is money in bantams. They are little and require but small space, and bring a relatively higher price than larger fowls. Many lay well, although their eggs are small.

Incubator hatched chicks, properly incubated, are as strong as hen hatched. The trouble is that many are not properly incubated. Even some experienced fanciers claim that their best birds are hen hatched and raised, but with others who have mastered the art of incubation their fowls win at the market. Too much heat, too little ventilation and the result was chicks that while they lived, were stunted and reached maturity under standard weight.

It pays to purchase good chick feed. There are several good grades of feeds on the market, with not over 15 to 25 per cent. of corn. Beware of cheap trash more harmful than any other. Cheap chick feeds are on the market because of the large demand for cheap feeds. It is wise to purchase the best, getting results by a low death rate and thriving chicks.

Keep the chicks close to the brooder the first week. At this age they need a lot of warmth. Make them hustle the second week, when they are stronger and past the danger period. If hatched with hens always confine them to the coop until chicks are placed.

Run placed before the chicks at the fifth day is a good feed and prepares them for the heavier dry mash which should start around the seventh to tenth day, when the chicks are ready to stand a feed that is heavier in ash and protein.

Poultry house construction plays an important part in successful poultry raising. The poultry help the trees and the trees help the fowls. Fowls need shade to make their best development. Many poultry raisers aim to make their fowls comfortable in winter, but their fowls have no shade to shelter them from the hot rays of the summer sun. Artificial shade is better than none, but does not have the natural shade of trees and shrubs. Plant some peach and apple trees in the run or range for future shade. It will pay—both in better fowls and better poultry.

Too many beginners blame the incubator for poor hatches, the brooders for failure construction, when the real fault lies with the eggs that are placed in the incubator and those that are hatched being weak. The best brooder made could not raise them, nor mother hen either. Good, hatchable eggs are only obtained from good, strong breeding stock, fed in a good manner, and they should be housed in a well-ventilated house. Strong breeders play a very important part in poultry from a profit standpoint.

One of the best feeds—the first feed of the younger chick—is rolled oats, followed with a good high-grade chick feed. Dry feeding is safest and it can be best fed in a dry mash, composed of bran, middlings, alfalfa meal, ground oats and beef scraps. This feed is high in ash or mineral matter and protein.

The majority of poultry feeders feed too much corn. Corn is a good feed in its place, but it is never in place to feed more than 50 per cent. as fed in many cases. More wheat and oats will give better results.

The large brooder stove has come to stay. It gives plenty of heat, and, at the same time, plenty of ventilation, a thing that has not been fully developed before in many of our brooders.

Brooder chicks should be carefully handled the first ten days. With many poultry raisers all that are bright, with no hils at ten days of age, are on a fair road to reaching maturity in good shape. Safe and sane feeding, and a warm brooder, with good ventilation, will do much toward making brooder-hatched chicks a success.

We unhesitatingly recommend Magic Baking Powder as being the best, purest and most healthful baking powder that it is possible to produce. CONTAINS NO ALUM. All ingredients are plainly printed on the label.

MAGIC BAKING POWDER

ESQUIETT CO. LTD. TORONTO, ONT. WINDYBEG-MONTREAL

PLOTS THAT FAILED

"You must not tell her that," said India, warningly, adding: "We do not care to tell Bab anything of that kind. Like all golden-haired girls, my dear cousin is a trifle vain."

Her companion looked greatly surprised at this intelligence.

Meanwhile, Rupert Downing was making the most of his tete-a-tete with Barbara Haven. He had found like all girls of her age, she loved poetry, and under the guise of the beautiful rhymes he could utter in her ear that which he had hardly dared say in cold words. As they rode along he whispered to her: "Do you remember I told you I had a second poem to read you, Miss Barbara? I have memorized it," and bending toward her, he repeated the following: "Strangers but a week before giving pleasant word for word, smile for smile and nothing more. Can you tell what look or tone first the tide of feeling stirred? What strange tremor broke the calm of our friendly greeting, gave such tremulous delight in the meeting of the eyes. And the touch of palm to palm? All the gladness of good-day, All the passion of good-night? Was it, then, a swift surprise To your soul as to my own? Did you watch the words, unsaid, In my lips and dream awake All the long night for my sake—Lost in fancy's eager bliss—At the phantom of a kiss? Was it not enough for years— Wealth enough to last till death? What strong love beyond control; What so bent us, soul to soul, Pulse to pulse, and breath to breath?"

Rupert Downing was studying her face as he repeated the words as only he could, and when he saw the flush creep up to her pretty face, he knew that she dimly realized that those lines meant his meeting with her.

She was so young, so romantic, so impressionable, it was little wonder that he, keen and world as he was, began to make an impression upon her childish heart, although, left to herself, she would have preferred his companion, Clarence Neville, to himself.

She could not help remembering India's words: "Every one has noticed how madly Mr. Rupert Downing is in love with you, Bab."

And looking at him shyly from under her long, curling golden lashes, she wondered vaguely if India's surmise could indeed be true, and somehow she found herself wishing from the bottom of her heart that her admirer had been—the other one.

CHAPTER XVI.

A week has passed, and each day saw the two young men at Haven House. Owing to Mr. Haven's absence, there was no one to frown upon their coming so often—true, Mrs. Mack, the old housekeeper, did look a trifle anxious, but when she saw Miss India welcome Rupert Downing so warmly she concluded that he must, of course, call to see her—and his companion was interested in Miss Bab.

If that sort of nonsense suited Robert Downing, she did not care, but the thought occurred to her how little it took to satisfy a man who was really in love, and she could scarcely repress a sigh that sprang to her lips.

Suddenly India was startled from her reverie by Bab calling out, excitedly: "You were speaking about violets yesterday, India, telling me how passionately fond you were of them. Do you see that little slope of ground yonder. That is where they always appear first. See, the green grass is thickly studded with them. You ought to ask Mr. Downing to get out and gather a great bunch for you. They are sure to be wonderfully fragrant and sweet, and would set off your dark, rich brunette beauty as nothing else could do."

India dropped her magazine and looked eagerly in the direction in which Bab pointed.

"If you will stop the carriage, Bab," she said, "I would be delighted to get out and gather them for myself."

India had heard Clarence Neville remark the day before that of all nature's offerings in the way of flowers, he liked the sweet, shy violet best. India did not know that in his own secret heart he had added because they reminded him of Bab's blue eyes.

India determined to gather a large bunch of them for herself and a tasteful little bouquet for Neville. Surely he could not help but appreciate her thoughtfulness, and the sight of violets might always be association with her and that act in his mind.

CHAPTER XVII.

India was wandering farther and farther away from the carriage, gathering the beautiful harbingers of spring, utterly lost in her occupation, when Bab's shrill voice suddenly broke upon her reverie.

"Make haste, India," she cried. "We must reach the turn in the road before the Eastern express comes along, and it

is almost due now. The horses are terribly afraid of the engine. Do make haste, India," but her words had come too late.

Even while she spoke a shrill whistle sounded loud and clear from just ahead, and as the girl raised her startled eyes she saw the train in question sweep suddenly around the curve, bearing swiftly toward them.

"Oh, what shall we do? What shall we do?" wailed Bab, in an entreaty of horror. "We shall be killed." As she uttered the words, she horses reared, plunged sidewise with such terrific speed that the reins Bab held were snapped like veritable threads from her nerveless fingers.

They were directly upon the track now, and with a terror which can be better imagined than described, they swerved and plunged directly forward into the very jaws of death, toward the oncoming train.

"Save me!" gasped Bab, half rising from her seat, clutching wildly at her companion.

For an instant Rupert Downing had been stunned, stupefied, at the horrible danger which menaced him.

One glance at the appalling situation and he realized that it would be out of the question to rescue Bab and save himself. Down at the foot of his heart he was an abject coward. He loved Barbara Haven as such creatures are capable of loving, but when it came to a question of life and death he loved himself best, and his own safety was the one instantaneous thought that flashed through his mind.

With that wild, despairing cry, "Oh, save me!" Bab had sunk at his feet in a dead faint.

Quick as a flash Rupert Downing had decided upon his course of action. Shaking off the clutch of the cold, lifeless little fingers, he made a mad, desperate plunge from the rocking, swaying carriage, falling into the deep mud by the roadside and escaping by a hair's breadth the hoofs of the flying steel that was galloping madly after the vehicle with its unconscious occupant.

Even before he had brushed the dust from his eyes he had realized that the horse was his own, and the rider Clarence Neville.

In an instant Rupert Downing comprehended that Neville had seen his exit from the carriage, which he had been following, and, perceiving Barbara Haven's peril, had dashed on to her rescue.

"A thousand curses upon him," cried Downing, realizing what it would mean for his chum to be the means of saving Barbara's life. The mad hope filled his heart that Neville might perish in his valiant attempt.

It would certainly be little less than a miracle for the latter to succeed, now that he was so near the engine, in saving his own life, let alone Barbara's.

But in this thrilling moment we must follow our daring hero, dear reader.

Clarence Neville, who was riding rapidly up the road endeavoring to overtake the carriage ahead, saw what had transpired, and a bitter cry of terror broke from his white lips as he realized the peril of Barbara Haven and her companion.

He knew that Bab was handling the reins, for he had heard her say that she intended to do so, and he thanked Heaven from the bottom of his heart that Rupert Downing was with her in the vehicle to grasp the reins in his own strong hands.

But when he saw him tumble headlong from the vehicle, his horror knew no bounds. He quite believed that Downing had been thrown out.

Even in his wildest imagination, he would never have dreamed that any man could have been so inhuman as to desert a woman in such deadly peril, with a horrible death staring her in the face.

His thoughts did not linger long with the figure by the roadside, but flew on to the hapless young girl in the carriage ahead.

In that instance Clarence Neville realized what Barbara Haven was to him, even though she loved another.

With a wild, hoarse cry that seemed to rend his heart in twain, he dug his heels fiercely into his horse's flanks and laid on the lash, saying to himself that he would save Bab's sweet young life or give up his own in the attempt.

With a snort of terror, his horse darted forward, and with such velocity that a less skillful rider would have been unseated, but from that instant the animal realized that it was a master hand that gripped the reins and that his iron will would have to be obeyed.

come, thus by almost a miracle saving himself from the fate of the other two. As quickly as it could be accomplished, the carriage was in splinters, but the spot where the brave rescuer had disappeared down the embankment with his unconscious burden.

That they would both be seriously injured by that mad leap, if not instantly killed, he quite believed, but, to his intense amusement, he saw the young man standing on the greenward with the little white figure still clasped closely in his arms.

The engineer had only time to inquire if there had been a serious accident, and being assured that they had both escaped with but a few scratches, and suffered no injury whatsoever, other than a severe fright, he complimented the young man warmly for his bravery, and then the train thundered on at renewed speed to make up the lost time, quickly disappearing from sight, leaving behind it the wreck of the two animals and the carriage as the only evidence of the thrillingly pitiful episode which had but just taken place.

CHAPTER XVII.

Clarence Neville stood like one dazed watching the express out of sight, with the little white figure clasped close in his arms, as they were.

He had saved her precious young life and his joy was so great that he could not restrain the tears that rose to his eyes and coursed down his cheeks—tears that were no shame to his strong, earnest noble manhood.

He held her in his arms close, and the faint beating of the heart of the girl whom he loved so madly and so hopelessly, seemed to wake to new life the love which he had been striving so manfully to conquer since the hour they had first met.

He remembered with a keen pang of abject woe the secret that India Haven had confided to him—that little Bab loved his friend, that they were lovers in secret; but to have saved her very life he could not resist the impulse to bring her to her heart for one little moment.

Ah, dear heaven, she would never know, and the memory of it would go with him to the end of his lonely life.

He looked down into the beautiful marble-white face, with the long golden lashes lying on the white cheeks, and he almost wished that he could die at that moment, clasping her thus in his arms, close to his throbbing heart.

His thoughts were rudely interrupted by the approach of India Haven and Rupert Downing, who came up breathlessly.

"How can I ever thank you for this day's work, Neville," cried the latter, hurrying forward with extended arms to take his burden from him. "You have saved my Bab's life. You may as well know the truth—we are lovers—and therefore, her life is a thousand times dearer than my own. How can I thank you? How can I show you my great, unspeakable gratitude?"

He uttered the glaring falsehood, which he and India had concocted as they approached, smoothly and without a trace of hidden treachery in his tone or glance, and it was small wonder that Clarence Neville believed him, suspecting no deceit.

He relinquished his hold of Barbara, giving her up to Downing, with a strange sensation at his heart which he could hardly define.

"I did only my duty, Rupert," he answered, huskily. "I deserve no thanks in assisting any human being in distress."

"Am glad she swooned and knew nothing of her actual peril," said Rupert Downing.

(To be Continued.)

PIMPLES SPREAD FROM ARMS TO WHOLE BODY

Also on Face. Began to Ooze Water-like Matter. Torture of Itchiness. Pimples Festered and Enlarged. Cured in Two Weeks, Thanks to Cuticura Soap and Ointment.

Mt. Elgin, Ind. Institute, Muncie, Ontario.—"I suffered from skin trouble for two months before taking Cuticura Remedies. The trouble started from itchiness on the back of the hands. When irritated, this itchiness turned to pimples. These pimples soon began to spread up the arms, from the arms to my whole body. They also came up on the face. Having spread over my body they became irritated by my clothing. They began to ooze water-like matter. Then began an almost killing torture of itchiness. When I scratched I seemed to scalp the pimples and make them extremely sore. They festered and enlarged, then they opened and left sore spots. These spots became scabbed and sore beyond expression.

"I sent for a sample of Cuticura Soap and Ointment which I received quicker than I expected. I was much relieved at the first application. I continued applying the Cuticura Remedies for two straight weeks, then I was completely cured. Thanks to Cuticura Soap and Ointment." (Signed) John Jamieson, Mar. 6, 1912.

Cuticura Soap and Cuticura Ointment are sold throughout the world. Send to Potter D. & C. Corp., Dept. 55D, Boston, U.S.A., for free sample of each with 32-page book.

even though that hand guided him into the jaws of death.

On flew the vehicle up the track, the horses plunging forward at a mad gallop. Down swept the eastern express with the speed of the wind.

The engineer had done his utmost, in reversing his lever, to avert the tragedy, but it seemed useless. They were approaching each other at such a rapid pace.

He leaned back sick and with a deathly faintness at his great, honest heart, closing his eyes that he might not behold the cruel sight when the train and the horses should collide.

He had seen a little white figure leap to her feet, then as suddenly sink out of sight in the bottom of the carriage.

He knew that it was a young girl and he groaned aloud from the very depths of his anguished soul.

He had a daughter of his own, whom he loved better than his own life, and for her sake he tried to utter a prayer for her who was in such awful peril.

With consternation that cannot be described by words, he had witnessed the young girl's companion desert her by leaving her to the swaying vehicle, and he knew that it was almost bereft him of reason. He knew that the dastardly coward had abandoned her to her fate, instead of grasping the lines from her hands and turning the maddened beasts down the sloping embankment.

The swaying vehicle hid the approaching horseman from his sight, but suddenly hearing a shout, he opened his dazed eyes.

The sight that met his gaze he never forget while his life lasted. It was photographed clearly on his brain to the end of his existence.

When within but a few feet of the runaway team he saw the gallant young horseman dash alongside of it, spring from his saddle with a flying leap into the carriage, and grasping the little white heap in his arms, quick by far than it takes to describe, it make a desperate leap with his burden in his arms over the wheels down the embankment. An instant later the engine struck the team, and the horrible story was told. There was an awful disaster, but, thank Heaven, no human beings had been mowed down to death beneath the ponderous iron wheels.

The team had been killed outright and the carriage was in splinters, but the horse that the rider had used had wheeled suddenly about, feeling himself freed from his burden, and had galloped down the track in the direction which he had

HEALTH AWAITS GOOD DIGESTION

When the Stomach is Wrong the Whole Body Suffers—How to Keep It Healthy.

Indigestion is one of the most distressing maladies afflicting mankind. The stomach is unable to perform the work nature calls upon it to do, and the result is extreme pain after eating, nausea, heartburn, sick headache, and often a loathing of food even though the sufferer is half starved. People with poor digestion are prone to try all sorts of experiments to aid the process of digestion, and there is only one way in which the trouble can be actually cured, and that is through the blood. That is why the tonic treatment with Dr. Williams' Pink Pills cures even the most obstinate cases of indigestion. They make the rich, red blood that strengthens the stomach and its nerves, thus enabling it to do its work. The process is simple, but the result means a good appetite, and increased health and pleasure in life. Mr. R. Lussier, of Sorel, Que., offers ample proof of this. He says: "For several years I was a sufferer from indigestion, and the torture I suffered after meals was often almost unendurable. Often I would go without a meal rather than undergo the suffering that followed. Accompanying the trouble I had headaches, dizziness, and often a feeling of nausea. All the time I was taking one medicine after another in the hope of getting relief, but without avail. Finally I read of the case of a similar sufferer cured through the use of Dr. Williams' Pink Pills and I decided to try them. I took the Pills steadily for about six weeks with result that I was fully cured, and could eat anything I cared for. I may add that I have not since had any return of the trouble."

If you are suffering from indigestion do not waste time experimenting, but begin to cure yourself to-day with Dr. Williams' Pink Pills, which go right to the root of the trouble through the blood. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50, from the Dr. Williams' Medicine Co., Brockville, Ont.

GO ON AND WIN

But Honest Success is Only One That Pays.

A contributor to the May American Magazine says:

"When you get up in the morning take a look in the glass. How do you look to yourself?"

"If you can look yourself right in the eye, and not be ashamed of anything you've done, you are far better off than many a man with lots more money than you."

"Of course, it is nice to be successful, to have money. No matter what the business, whether it's marbles or eggs, it is nicer to win than to lose. Success brings happiness, but it must be real success. If you've cheated to win, you've destroyed the pleasure. There is no satisfaction in being ahead of the other fellow if down in your heart of hearts you know he is rightfully entitled to be ahead of you."

"Win if you can win fairly. The knowledge that there isn't a page in your past to which you dare not turn, that there isn't a man in the world can put his finger on any crooked thing you've done, the feeling that whatever happens you have played the game straight, is worth more than all the money and all the power and all the position in the world."

"If you are in business, no matter what the other fellow does, be content with smaller profits and a square deal. Clean money pays best. Crooked dividends bring wrinkles and worries with them."

"It is worth a lot to yourself to know you're square. Maybe the man who plays the game straight will go down and out financially, but if he does he will still be happy. Yet men who play fair don't often fail."

"A good test of a business is what you are going to think of yourself afterward."

An Old Case

The Doc—Is your dyspepsia of long standing?

Patient—Yes, it's a chronic case, Doc. I've been married thirty years.

IF YOU WANT A KISS, TAKE IT.

There's a jolly Saxon proverb That is pretty much like this: That a man is half in heaven If he has a woman's kiss. There is danger in delaying. For the sweetness may forsake it; So I tell you, husband lover, If you want a kiss, why, take it.

Never let another fellow Steal a march on you in this; Never let a laughing maiden See you spoiling for a kiss. There's a royal way to kissing, And the jolly way that make it Have a motto that is winning— If you want a kiss, why, take it.

Any fool may face a cushion, Anybody wear a crown, But a man must win a woman If he'd have her for his own. Would you have the golden apple, You must find the tree and shake it; If the thing it worth the having, And you want a kiss, why, take it.

Who would burn upon a desert With a forest smiling by? Who would change his sunny summer For a bleak and wintry sky? Oh, that you cannot, cannot break it; For the sweetest part of loving Is to want a kiss and take it. —Chicago Record-Herald.

ANIMALS' MORAL CODE. (Ottawa Citizen)

Mr. Ernest Thompson Seton says that animals have a moral code "almost human." The latter is a saving clause, for they probably are not quite human in their disregard of it. Evolution has its prerogatives.

Just One More Woman Rises

TO TELL HER SISTERS THEY CAN FIND RELIEF IN DODD'S KIDNEY PILLS.

Mrs. John Cabot, After Six Years' Suffering, Tried Dodd's Kidney Pills and Found New Life and Energy.

White Head Pore, Que., June 10. (Special).—One more woman has risen to tell her suffering sisters they can find relief in Dodd's Kidney Pills. That woman is Mrs. John Cabot, well-known and highly respected here, and she expresses her enthusiasm in these words: "I certainly recommend Dodd's Kidney Pills. There is nothing better."

Asked to give her experience, Mrs. Cabot continued: "My trouble started in a cold, and I suffered for six years. Rheumatism, neuralgia, stiffness of the joints, cramps in the muscles and heart flutterings were among my symptoms, and finally Bright's Disease developed. It was then I started to use Dodd's Kidney Pills, and they helped me almost from the start. After taking four boxes I feel like a new woman."

Dodd's Kidney Pills cure all the impurities and poisons—all the seeds of disease—out of the blood. Dodd's Kidney Pills not only cure the disease but by ensuring good blood give new life and energy to every part of the body.

DEPENDANCE. (Washington Star)

"Women are terribly unreasonable" exclaimed the small mag with straw-colored hair.

"Trouble with your wife?"

"Not exactly. She told me to buy myself hat and a pair of shoes, but she didn't say a word about whether it was to be a straw or a felt or whether she wants me to get low-cut or high shoes. Why will some women be so thoughtless and unreasonable!"

The counties council is in session this week. The members are to be guests of the warden on a trip to Cornwall.

Mrs W. B. Connerty was in Kingston last week, called there by the illness of her sister, Mrs J. W. Walker, at Hotel Dieu.

—For Sale—About 350 ft. of good boat lumber for immediate sale. Apply at the Reporter office.

Mr and Mrs G. W. Legard of Chicago are visiting friends in Athens and vicinity, guests of Mr and Mrs G. E. Judson.

The Education Department of Ontario has not yet lifted the veil of secrecy that conceals their very latest "reorganization" policy, so we are unable to say what model schools are to be retained.

The local lodge of Odd Fellows will attend divine service in the Methodist church at 3.00 p.m. Sunday next, and there will be no evening service in the church. Visiting brethren will be cordially welcomed.

Athens has a full house this week—entertaining the large number of delegates to the Baptist convention and providing for the annual crop of entrance candidates.

—If you want what you have not or if you have what you want not, tell the people in the People's Column of the Reporter. Cost—one week, 25c.; each subsequent week, 10c.

For Sale—The residence of G. A. McClary, Church Street, Athens, is offered for sale at a special price for next ten days. Apply to G. E. Judson.

Owing to the I.O.O.F. service, the Methodist S. S. will convene promptly at 2.15 p.m. next Sunday. It is temperance Sunday and a special programme is being prepared. Arrange to spend the hour in the Sunday School.

In the abolition of the Model School Athens is far from being the only place affected. The twenty seven teachers qualified here last fall came from the following places: Toledo, Brockville, Portland, Mallorytown, Ellsboro, Seelye's Bay, North Augusta, Forfar, Crystal, McIntosh Mills, Sweet's Corners, Lillies, Lyndhurst, Philipsville, Athens. Perhaps the reorganization policy will include a kind of primary Normal for this section. The announcement should soon be made.

Mr and Mrs N G Earle of Smith's Falls spent the week end with friends in Athens.

Mr J. K. Redmond has returned from St. Vincent de Paul Hospital, Brockville, greatly improved in health.

Mr J. H. Sexton is one of the presiding examiners at the Brockville Collegiate. Mr Husband and Mr Forbes are officiating here.

Arrests in the city of Toronto for drunkenness and disorderly conduct during the year 1912 numbered 15,605. Ten years ago, in 1902, the arrests for the same offence were 4,605.

Mrs A. E. Donovan and daughter, Miss Helen, of Toronto, are visiting in Athens and in company with friends are enjoying trips through the country in their handsome motor car.

—Lost—On Monday last, in Brockville or enroute to Athens per B. W. & N. W., a small purse containing a lady's gold watch. Finder will please communicate with the Reporter office.

The sessions of the Central Association of Baptist Churches in Athens this week are being largely attended and a deep interest is manifested. The convention closes this afternoon.

Robert and Patrick Swayne, on Tuesday evening, returned home from Belleville, where they had been attending school and were warmly welcomed by their young friends.

Athenians will be pleased to learn that Mr S. A. Hittman, the efficient principal of the Model School, is to continue a resident of Athens, having accepted a position on the staff of the High School.

The villages of Winchester and Osgoode carried the by law to give the Ottawa and St. Lawrence Electric railway the right of way and bonus. The township of Winchester voted against the by-law.

Administration of the personal property of George Gipson, late of the township of Yonge, farmer, has been granted to Irwin Wiltse, of the township of Yonge, farmer, as nominee of Lizzie Gipson, widow of the deceased. T. R. Beale, solicitor.

Even the whitefish at Charleston Lake are learning to bite a minnow bait. Several whitefish have been caught by anglers trolling for salmon. One of these weighing 6 1/2 lbs. was caught by Mr S. C. A. Lamb. These fish have a small mouth and necessarily a small bait should be used.

The death occurred at the family residence 19 Perth street, on Sunday, after an illness extending over several months, of Mrs Andrew Ferguson, a highly esteemed and respected resident of Brockville. The late Mrs Ferguson was born at Toledo and was in her eightieth year.

Mr and Mrs R. D. Haskin, of Philipsville, are receiving many expressions of sympathy from a large number of friends in the loss which they have suffered by the death recently of their only daughter, Helen. She was a young girl just budding into womanhood and held in high estimation by all who had the pleasure of her acquaintance.

Watertown Times: Mr and Mrs W. C. Smith, Miss A. Hunt, and Mr and Mrs L. Glenn Earl, of Athens, were in the city to attend the graduation exercises of the 1913 class at the City Hospital. Miss Hunt is a sister of Mrs Anna Uissa Williams, who graduated with the class. The party came to this city in Miss Hunt's auto.

The Hon. Col. Sam Hughes, Minister of Militia, is making a record in the enforcement of the military regulations, which prohibits the sale of intoxicating liquor in training camps. To make the rule effective he has ordered that no malt liquors of any kind shall be supplied, even though a claim is made that such liquors contain so small a percentage of alcohol as not to be intoxicating.

The evening of June 5th was very pleasantly spent at the home of Mr and Mrs John R. Wiltse, when a number of ladies surprised Miss Keitha Barber and Miss Lena Wiltse by showering them both with a number of useful gifts. Dainty refreshments were served after which many good wishes for long and happy lives and also many regrets that they were soon to lose these popular young ladies from Plum Hollow.

Last Saturday, on Brockville market, eggs ruled steady at 25 cents per dozen; butter 28c to 30c per pound, and potatoes 60c to 70c per bushel.

Mrs W. H. Wiltse has returned from Bridgeport, Conn., and Mrs H. R. Knowlton from St. Vincent de Paul Hospital, Brockville, both improved in health.

On Thursday last Mrs J. W. Walker of Cusheadal, underwent a successful operation for appendicitis, with complications, at Hotel Dieu, Kingston, and is now progressing favorably.

Mr Arthur Smith of Watertown, N. Y., is visiting friends in Athens and, as a skilled chauffeur, is doing considerable touring in charge of Miss Addie Hunt's automobile.

Mr John A. Donovan, son of Mr A. E. Donovan, M.P.P., was successful in passing his second year examination at the Ontario Law School. Congratulations.

The Reporter has pleasure in congratulating Mr Beaumont S. Cornell on the successful termination of his first year's study in medicine at Toronto. He passed well up in the list and also won a scholarship.

The forest and apple tree caterpillars should now be cocooning for the next stage of their metamorphosis, and close observers say that they are failing to do so. This is cheering news for next season.

At the annual meeting of St. Lawrence district I. O. O. F. held at Mallorytown last week Mr John Moore of Brockville was elected D. D. G. M. The next meeting is to be held in Brockville.

Five hundred stockmen attended a dispersion sale of Holsteins in Prince Edward county last week. The highest price paid was \$525 and the average for the herd, which included 17 calves, was \$289.68. The total of the sale was \$8,915.

It is the general opinion that the walks put down this season in Athens are an improvement over those of last year. The contractors settled with the council on Friday evening last and entered into an agreement to make good any defect that may develop in the walks within the next year.

Under a new law passed by the Ontario Legislature children sixteen years of age and under found on the streets after nine o'clock are subject to police surveillance, and can be either handed over to the Children's Aid Society or taken to their homes. There is some educational work along this line ahead of our Chief of Police. Parents are subject to a fine.

At the Anglican synod in Toronto, the committee reported that the marriage act passed at the last session of the Legislature calling for greater publicity to marriages was a step in the right direction, and it recommended that the clergy adhere to the rules of the Book of Common Prayer, which calls for the publishing of banns on three Sundays preceding the marriage ceremony.
