Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires: Various pagings.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been reshelved to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	14x	18x	22x	26x	30x
12x	16x	20x	24x	✓	28x

The copy filmed here has been reproduced thanks to the generosity of:

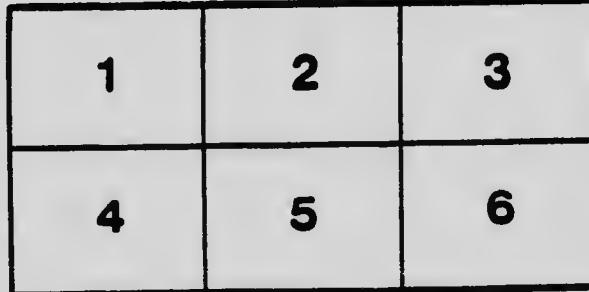

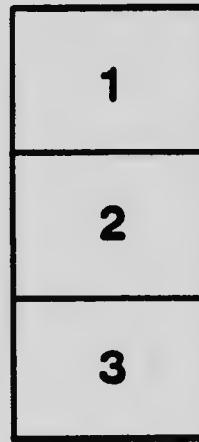

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filming.

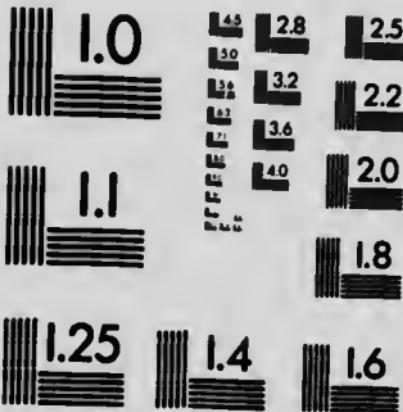

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminent soit par le dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur le dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

TRIANGULATION AND SPIRIT LEVELING
OF
VANCOUVER ISLAND, BRITISH COLUMBIA
1909
BY
R. H. Chapman

TRIANGULATION.

Triangulation was extended from the vicinity of Victoria, about eighty miles up the island, to points northward and southward from Cowichan lake.

Preliminary observations were made to Mt. Arrowsmith, and several stations were located near Nanaimo for the control of a large scale topographic map of that vicinity.

The observations were made with a Bausch and Lomb Optical Co. theodolite with 8 inch circle, reading by micrometer microscopes to two seconds. Signals were built on all primary, and several secondary stations before observations were made. The centre of each station is marked in a permanent manner, and several witness marks were usually placed on each station.

Observations for azimuth were made on Gonzales Hill station near Victoria, by sights to Polaris.

The latitude, longitude, and distances, depend upon values furnished by the United States Coast and Geodetic Survey for two points near Victoria. These values are for stations on Discovery island and Gonzales hill, and are reduced to the "U. S. Standard": which is a mean value of many astronomical stations widely distributed over North America, and tied together by triangulation.

All observations of the primary stations have been adjusted by the least square method,

The work was done under my direction by Mr. S. C. McLean, with Mr. T. B. Williams as assistant.

The data contained in the following statement, are arranged under three heads:—

Primary Stations—Points upon which signals were erected, permanent marks left, and observations made. (Symbol ▲.)

Secondary Stations—Points upon which signals were erected, permanent marks left, but no observations made. They are computed from more than one unclosed triangle. (Symbol Δ.)

Intersected Points—Objects not signalled but cut in from primary stations, and computed from one or more unclosed triangles. (Church spires, lighthouses, etc.) (Symbol ⊙.)

Saltspring (Admiral) island.

About five miles northwest of the town of Sidney, on the southwestern slope of Mt. Tuam on the southern end of Saltspring island. The station is about 100 feet below, and about 300 yards southwest of the highest point of Mt. Tuam.

Centre— $\frac{3}{4}$ inch drill hole, $1\frac{1}{2}$ inch deep, surrounded by a triangle, in solid rock.

Witness No. 1.—A copper nail and burr, marked G. S. C., in root of blazed fir tree, 3 feet diameter, 36 feet north of centre.

Witness No. 2.—Ditto, in top of stump of balsam fir 15 inches diameter 87·4 feet northwest of centre.

Latitude, $48^{\circ} 43' 35''$. Longitude, $123^{\circ} 29' 06''$.

			Metres.

Albert.

U.S.C. and G.S. 1869.

G.S.C. 1909.

About six miles southwest of Victoria, on the open grassy slope, with low rocky ledges, of Albert head. It is about 80 feet above the sea, south of a row of trees that reach nearly to the water, and nearly half a mile south of the northernmost point of the head.

Centre.— $\frac{5}{8}$ inch drill hole, 2 inches deep, in solid rock—Eley, London, No. 12 gauge paper shell in hole, established 1869 by U.S.C. and G. S.

Witness.—Copper nail and burr, marked G.S.C., on root of a blazed fir tree 86·8 feet about southwest of centre.

*Note.**—Cannot see southwest, west, or northwest from here.

Latitude, $48^{\circ} 23' 16''$. 649. Longitude, $123^{\circ} 28' 38''$. 916.

Benson.

G.S.C. 1909.

About five miles west of Nanaimo on the highest point of the southern of the three rocky knolls of Mt. Benson.

Centre.—A $\frac{3}{8}$ inch drill hole, $1\frac{1}{2}$ inch deep, surrounded by a triangle, in solid rock, on the east side of highest point. An Eley, London, No. 12 paper shell in hole. The rock splintered while drilling.

Witness No. 1.—A wire nail and brass burr, marked G.S.C. Δ , in top of a blazed dead stump 33·2 feet west of, and 10 to 12 feet lower than centre.

Witness No. 2.—Brass nail and burr, stamped G.S.C. Δ , in top of blazed stump 59·1 feet northwest of, and 8 to 10 feet below centre.

Witness No. 3.—Ditto, in notch in root of blazed dead fir 60·5 feet on slope north of, and 20 feet below centre.

Witness No. 4.—Arrow on flat sloping rock 10 feet northwest of, and 4 feet below centre.

Latitude, $49^{\circ} 09' 00''$. 56. Longitude, $124^{\circ} 02' 58''$. 48.

Brenton.

G.S.C. 1909.

About fifteen miles northwest of Duncan, on the highest rocky point of a conical timbered mountain of the high, heavily-timbered ridge of Mt. Brenton. This rocky point is about two miles southwest of the

part of the ridge described as Brenton Bluff, and is entirely hidden by the timber for short distances over about 100 feet of it. About two miles north of west of station is a higher timbered ridge with two summits, one of which has a rocky cliff.

Centres.—A $\frac{1}{8}$ inch drill hole, $\frac{3}{8}$ inch deep, surrounded by triangle, in solid rock, Eley, London Gas Tight, 12 gauge paper shell loose in hole.

Lines cleared to Prevost, Admiral, Jocelyn, and DeCourcy.

Witness No. 1.—Copper nail and burr, stamped G.S.C. Δ , at foot of blazed hemlock stub, almost dead, 16·6 feet a little east of north of centre.

No. 2—Ditto, at foot of blazed hemlock 6 inches diameter, 19·8 feet a little north of east of centre.

No. 3—Ditto, in top of hemlock stump 3 inches diameter, 34·2 feet southeast of centre.

Latitude, $48^{\circ} 54' 05''$. 946. Longitude, $123^{\circ} 50' 47''$. 734.

Brenton (Bluff).

G.S.C. 1909.

(Not occupied.)

About ten miles north from Duncan, on the rocky bluff at the north-east end of the ridge of Mt. Brenton, $2\frac{1}{2}$ miles—and visible from the Tyee mine on Mt. Sicker.

No permanent mark.

Latitude, $48^{\circ} 54' 35''$. 6. Longitude, $123^{\circ} 48' 41''$. 2.

Buffalo.

G.S.C. 1909.

(Not occupied).

About twelve miles southwest of Nanaimo, on the summit of a mountain about 4,100 feet high, called (limited local use) Buffalo Hump. This mountain lies almost due south of Benson. It is fairly well timbered about the base, and up to an elevation of 3,000 feet, where the timber passes into rock and scrub. The top is formed of a series of bare rocky knolls. The station is on the highest point of the knoll, east of the highest summit, and 8 to 10 feet lower.

Centre.—A triangular $\frac{1}{8}$ inch drill hole, $1\frac{1}{2}$ inch deep, surrounded by a triangle, in solid rock—No. 12 gauge Dominion Sovereign paper shell in hole.

Witness No. 1.—Brass nail and burr, marked G.S.C., in a notch in the root of a blazed stunted pine 18·4 feet west of centre.

Witness No. 2.—Ditto, in top of a blazed, stunted, and contorted pine 20·6 feet north of, and 10 feet lower than centre.

Witness No. 3.—Ditto, in the end of a branch knot close to the root of blazed stunted pine 18·4 feet east of centre.

Witness No. 4.—An arrow, on rock 8·4 feet east of, and about 3 feet lower than centre.

Latitude, $49^{\circ} 00' 30''$. Longitude, $124^{\circ} 04' 10''$.

Conspicuous.

G.S.C. 1909.

About seventeen miles a little north of west of Victoria, on the high, bare, rocky, conical peak which is visible from there. It is the highest point in this part of the island (about 2,200 feet), stands up conspicuously, and cannot be mistaken. The station is on the highest knoll of the southeast part of the rim of the saucer-like top, on a knob of rock about 3 feet south, and 1 foot lower than the highest knob.

Centre.—A $\frac{1}{2}$ inch drill hole, 2 inches deep, surrounded by triangle, in solid rock—a plug of wood loosely in the hole.

Witness No. 1.—Copper nail and burr, marked G.S.C. Δ , in the top of a blazed stump of a pine tree, 20·5 feet west of centre.

Witness No. 2.—Ditto, in top of a blazed pine stump, 19·8 feet northwest of centre.

Witness No. 3.—Ditto, in top of a blazed pine stump, 21·5 feet east of centre.

Witness No. 4.—Arrow chiselled on a knob of rock 16·2 feet southeast of centre.

Latitude, $48^{\circ} 27' 57''$. Longitude, $123^{\circ} 40' 21''$.

Cottle.

G.S.C. 1909.

About four miles northwest of Nanaimo and about one mile west of Departure bay, on Cottle hill—a bare rocky knoll about 400 feet high, and three-quarters of a mile east of prominent rock top.

Centre.—A $\frac{1}{2}$ inch drill hole, 2 inches deep, surrounded by a triangle, in solid rock. A No. 12 gauge paper shell (Kynoch, Birmingham) loose in hole.

Witness No. 1.—Brass nail and burr, stamped G.S.C. Δ, in notch at root of a blazed pine tree, 70·4 feet southeast of centre. A companion pine, and the stump of a third, stand within 3 feet or so, of this one.

Witness No. 2.—Arrow on a rocky knob, 21·0 feet west of centre.

Witness No. 3.—Brass nail, etc., in notch, in root of blazed fir 78·3 feet northwest of, and 15 feet lower than centre.

* Calculated from Geodetic positions.

DeCourcy.

G.S.C. 1909.

About twelve miles, a little southeast of Nanaimo, on the northern and largest of the DeCourcy group of islands off the east coast of Vancouver island. The station is on a little camel-back of rock close to the edge of the bluff, on the western shore, and at about the highest point. It is about one-quarter mile south of the residence of Wm. Fluid, owner of the island. Back of, and around the station, is a grove of fir and arbutus trees, entirely clear of underbrush.

Ce tre.—A $\frac{1}{2}$ inch drill hole, 2 inches deep, surrounded by triangle, in solid rock, and with paper cartridge shell.

Witness No. 1.—Brass nail and burr, in notch in root of blazed arbutus, 33·9 feet north of centre.

Witness No. 2.—Brass nail and burr, in notch in root of blazed arbutus, 20 feet northeast of station.

TRIANGULATION AND SPIRIT LEVELING OF VANCOUVER ISLAND. 15

Witness No. 3.—Ditto, in notch in root of blazed fir, 25·4 feet south-east of station.

Witness No. 4.—Arrow on same camel-back of rock as, and 9·1 feet sc 'heast of centre.

Latitude, $49^{\circ} 06' 04''$.59. Longitude $123^{\circ} 44' 54''$.84.

* Position, azimuth, and Dist., from U.S.C. and G.S. data of Jan. 26, 1910.

** Observed Oct. 13-15, 1909.

James.

About $4\frac{1}{2}$ miles southeast of the town of Sidney on the southwestern end of James island: an island off the east coast of Vancouver island, owned by I. H. Wheatecroft. The station is about 200 feet northeast of three large fir trees, and about 50 to 75 feet above sea-level.

Centre.—A $\frac{5}{8}$ inch drill hole, 2 inches deep, and surrounded by a triangle, in a granite boulder of about 200 pounds weight, level with surface.

3333—2

Witness No. 1.—Copper nail and burr, marked G.S.C., in root of blazed arbutus tree, 54 feet north-northeast of centre.

Witness No. 2.—Ditto, in root of a blazed fir, about 202·5 feet south west of centre.

Witness No. 3.—Ditto, in root of a blazed fir, 181 feet southwest of centre.

Latitude, $48^{\circ} 35' 24''$. 85. Longitude, $123^{\circ} 20' 47''$. 96.

Jocelyn.

G.S.C. 1909.

About twelve miles northwest of Victoria, on the summit of Mount Jocelyn. This mountain is east of and in the angle of bend of Finlayson arm of Saanich inlet. The station is on the south end of the summit, on a ridge of rock running about north and south, and about 10 feet below the highest point.

Centre.—A 3 inch brass screw in a plug of wood surrounded by a conical mound of cement, about 3 inches high.

Witness No. 1. Arrow in surface rock, about 19·1 feet southwest of centre.

Witness No. 2.—A copper nail and burr, marked G.S.C., in the root of a blazed fir (dead), about 111 feet southeast of centre.

Witness No. 3.—Ditto, in root of a blazed jackpine, 65 feet east of station.

Witness No. 4.—Ditto, in root of a blazed fir, 115 feet northeast of station.

Latitude, $48^{\circ} 32' 09''$. 64. Longitude, $123^{\circ} 31' 35''$. 37.

Koksilah.

G.S.C. 1909.

About five miles west of Cowichan station on the Esquimalt and anaimo railway, on the summit of the bare, rocky, eastern end of Koksilah ridge, at elevation about 2,500 feet. The west end and summit of the ridge are heavily wooded, but the eastern end is rocky and bare, and the eastern slope well burnt over. The station is on the north corner of the highest knob of rock, about three feet north of, and one foot lower than the highest point. Ten feet north is another knob of almost equal height.

Centre.—A $\frac{1}{8}$ inch drill hole, 2 inches deep, in solid rock, surrounded by triangle.

Witness No. 1.—Arrow on a high knob of rock 8·8 feet north of centre.

Witness No. 2.—Brass nail and burr, marked G.S.C. Δ , in a notch in the root of a blazed and trimmed pine 36 feet east of station.

Witness No. 3.—Ditto, in notch in root of a tall, half dead fir, with branches on the east side only, 60·8 feet southeast of station.

Witness No. 4.—Arrow on highest point of same rock as station, and 3·1 feet south of centre.

Witness No. 5.—Arrow on a flat surface of rock, 16·6 feet west of centre.

Latitude, $48^{\circ} 42' 01''$. Longitude, $123^{\circ} 45' 05''$. 12.

Waterloo.

G.S.C. 1909.

About ten miles southeast of Cowichan Lake post-office, and fourteen miles south of west of Cowichan station on the Esquimalt and Nanaimo railway, on a high, rocky, burnt mountain on the divide between the Koksilah and San Juan rivers. This mountain is visible from the railway on grade just south of Shawnigan lake, and also through gap on the hill in sky-line at one point on the road from Duncan to Cowichan lake. Station is on eastern rocky top.

Centre.— $\frac{1}{2}$ inch hole in solid rock, Ely, London, No. 12 gauge shell in hole.

Witness No. 1.—+ cut in solid rock 13·0 feet southwest of centre.

Witness No. 2.—+ cut in solid rock 16·0 feet northeast of centre.

Latitude, $48^{\circ} 41' 11''$. Longitude, $123^{\circ} 55' 32''$.

Whymper.

G.S.C. 1909.

About eight miles nearly north of the mouth of Cottonwood creek, Cowichan lake, on the highest point of Mt. Whymper (name from B. A. chart) a sharp, rocky peak, north of the Chemainus river. It is the easternmost and highest (about 5,100 feet) of the ragged peaks near the head of the Chemainus.

Centre.—A $\frac{3}{4}$ inch drill hole, $1\frac{1}{2}$ inches deep, in solid rock, over which is built a cairn of rock 5 feet diameter, by 6 feet high.

Witness No. 1.—+, on solid rock $16\cdot8$ feet northeast of centre.

Witness No. 2.—A 30/30 brass shell in top of small stump, $6\cdot9$ feet southwest of centre.

Witness No. 3.—+, cut in solid rock, $14\cdot1$ feet south of centre.

Latitude, $48^{\circ} 57' 06''$. Longitude, $124^{\circ} 09' 40''$.

SPIRIT LEVELING.

During the field season of 1909 levels were run in the vicinity of the city of Victoria, up the Saanich peninsula as far as Sidney, and from Ladysmith to Wellington via Nanaimo.

A 14 inch Dumpy level was used, with a New York rod. Back-sights and foresights were of equal length, or compensated by balancing, and each line was run at least twice. Steel pins were firmly driven in the ground, and used as turning points. All readings of the rod were made and recorded by instrumentman and by rodman in separate notebooks.

Where possible, brass nails with round heads, driven through brass washers stamped 'G.S.C., B.M.', were used as bench-marks.

Victoria and Vicinity.

The datum for the Victoria and Saanich work is mean sea-level, which was obtained as described below.

The reference is the bench mark at Victoria of the Tidal Survey, described as follows:—

"At the rear of the old Custom House building on Wharf street at the foot of Broughton street. The top of a brass bolt drilled vertically into the granite rock, at 16 feet (SW) from the northwest corner of the building, with letters B.M. cut beside it on the sloping surface of the rock."

This bench mark was given an elevation of 9·12 feet above mean sea-level. It was derived as follows:—

¹ Tidal Survey B.M., above city datum.....	feet.
Mean sea-level above city datum observations 1895-1897 (2 years).....	105·80
Mean sea-level above city datum observations 1903-1904 (1 year)	96·75
Weighted mean of 3 years observations, above city datum.....	96·54
Tidal Survey B.M., above mean sea-level.....	96·68
	9·12

* 38th Annual Report of Department of Marine and Fisheries. Supplement No. I. pp. 8 and 11.

In addition to the elevation of the bench marks described, many heights of indefinite points, such as intersections of streets, railway crossings, etc., are given to the nearest foot.

The work was done under my supervision by Mr. Oscar Barrette.

Victoria and Vicinity.

From Tidal Survey B. M. at old Custom House—via post-office, Humboldt avenue and Fairfield road, to top of Gonzales, or Shotbolt's hill.

	feet.

Langford lake, water level, July 2, 1909.	207

* 38th Annual Report, Dept. Marine and Fisheries, Supplement No. 1, p. 10.

Nanaimo, Wellington, and Ladysmith.

The elevations in this vicinity depend on an approximate determination of mean sea-level by the Tidal Survey, deduced from tide observations during six weeks in 1899: from March 26, to May 12, obtained by Captain M. H. Smyth, R.N., of H.M.S. *Egeria*.*

The value obtained is the half tide level between the average elevation of high water and average low water, above the Admiralty datum, during one lunar month in the above period.

	feet.
Admiralty low water, datum	0' 00
B. M. on foreshore	10' 25
Mean sea-level	10' 50
Summit beacon, Beacon Rock	18' 00
B. M. Custom House	54' 80

The above figures give the following heights, using mean sea-level as a datum.

Summit of beacon, Beacon Rock	8' 10
Foreshore B. M.	0' 25
Custom House B. M.	41' 30

The shore B.M. value is used as initial height in the tabulated statement which follows:—

Nanaimo and Vicinity.

From Nanaimo to Wellington, *via* Esquimalt and Nanaimo Railway track.

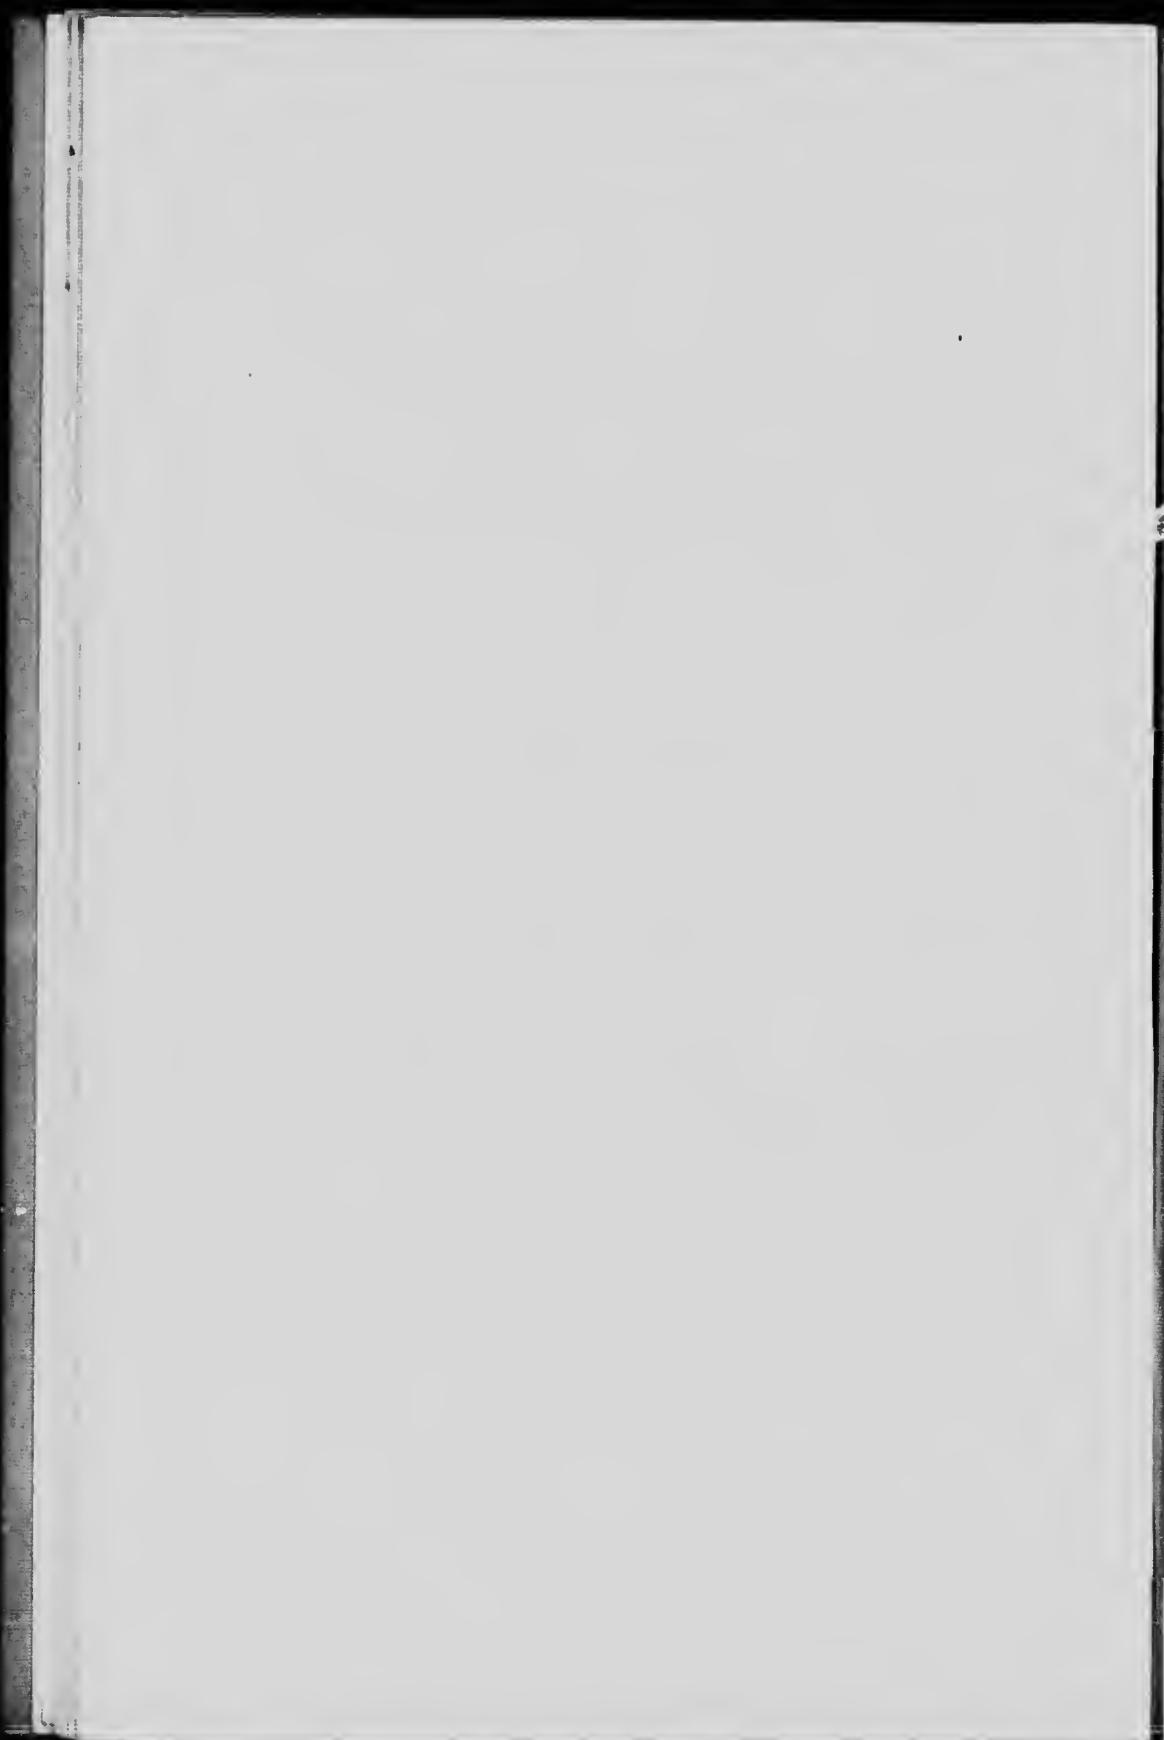

Nanaimo—Tidal Survey B. M.: a brass bolt cemented in rock within range of tide, and 38 feet 9 inches northward along shore from point of intersection of the line of northwest end of Custom House building with the line of half tide	0' 25
Nanaimo—Custom House: broad arrow cut on southeast side of door in rear wall; facing sea, and 1' 4 foot above door sill	41' 31
Nanaimo—corner Fitzwilliam street and Selby avenue: cross on step of Occidental Hotel	117' 72
Nanaimo station 1' 2 mile north of : cross on cement culvert, 7 feet east of track	158' 44
Crossing of Church avenue and Commercial street: centre of	52
Crossing of Bastion avenue and Commercial street: centre of	46
