## AT GALT

Is to be found the finest stock of Japanese Art Goods in Ontario.

When taking a trip on the Grand Valley you will find our store the most interesting place in Galt to visit.

We do not carry the common run of Japanese wares, but give our special attention to the finer lines, such as

OLD SATSUMA WARE,  
FINE CLOISONNE,  
IVORY CARVING,  
OLD CURIOS AND  
BEAUTIFUL SILK WORK.

Most of our curios were collected by Capt. F. J. Brown, who has spent over twenty years in Japan and the Far East.

**F J BROWN & SON,**

# PARIS.

## The Prettiest and Busiest Town in Canada.

The citizens of Paris have every reason to be proud of this native town. Its beauty and variety of landscape, broad valleys and limpid streams, stately homes and beautiful decorated lawns, busy factories and mills, peaceful and law abiding citizens constitute an ideal town then Paris certainly stands unsurpassed by any other town in our fair Dominion.

Nestling in the valley of the Grand River, where it is joined by the winding Nith, surrounded by precipitous hills, which offer points of vantage from which the beautiful landscape of the surrounding country may be viewed for many miles, Paris presents a variety of scenery—one of the fairest that ever rejoiced the heart of man.

Crystal streams of spring water gush out at numerous points along the banks of the rivers, hence the town is furnished in many places with a natural supply of spring water, in addition to that afforded by a complete system of waterworks.

Within the limits of the corporation are to be found two mineral springs containing ingredients of medicinal value equal to any mineral spring in Canada. Samples of these waters have been carefully analyzed by experts and pronounced rich in sodium iron, magnesia and other highly beneficial substances usually found in mineral springs elsewhere. The town therefore furnishes every requisite and is destined to be one of the most popular summer resorts of Western Ontario.

The waterworks system of the town is one of the oldest in the Province, having been constructed in the year 1882.

The source of supply is a number of springs situated about two miles from the town. These furnish a never failing supply of beautiful spring water which is pumped by electric power to every part of the town. The main lines of water pipe are over seven miles in length and vary from two to ten inches in diameter. (There are laid 485 water services.) These are nearly all for domestic supply, as river water is largely used for manufacturing purposes.

The system is carefully and economically managed by a Board of Commissioners and will soon become a source of revenue to the town as the debentures for purposes of construction will soon be entirely paid off.

A reservoir is situated on an elevation of 185 feet above the lower town and has a capacity of 1,000,000 gallons, thus providing amply supply when an extra amount is required for fire protection.

In this connection it is but right that a well earned tribute should be paid the thoroughly equipped and efficient fire brigade of the town. It is composed of over 50 members and is supplied with every appliance necessary for fighting a conflagration in any part of the town. For the last three years in succession they have won the championship prize for speed at the annual hose reel races, thus eclipsing all previous records in the Province.

Owing largely to the excellent water supply and natural drainage, the town has been singularly free of all infectious diseases and typhoid fever, that much dreaded disease recurring annually in many centres, is here practically unknown.

The death rate from all causes is much below the average in the Province.

A complete system of electric light is owned and managed by the town. A large power house furnished with the latest and best improved machinery is

located in the centre of the town. The schedule of rates is very reasonable—the object of the management being not to raise a revenue by this means but rather to give manufacturers, merchants and citizens light at a minimum cost. An all night service adds greatly to the popularity of the system

*Om* The Dominion Natural Gas Co. have contracted to supply the town with natural gas for purposes of heat, light and power at a rate not to exceed 75 cents per thousand cubic feet, and should gas be found in paying quantities within a radius of five miles which is highly probable, the cost is not to exceed 30c for the same quantity. They further agree to supply gas for manufacturing purposes at the exceedingly low rate of \$16 per horse power per year *great*

A franchise for twenty-five years has just been granted by this municipality and a complete system will be installed within the next three months.

Two Niagara power lines have also been surveyed through the town. In a few months the citizens of Paris will be furnished with an abundant supply of electricity and gas for all purposes. This means cheap heat and light with an inexhaustible supply of motor power at close competition rates.

During the last few years the plank system of sidewalk making has been superseded by that of concrete and already over seven miles of these walks have been constructed. This adds greatly to the neat and attractive appearance of its well kept streets.

Spanning the rivers are three large iron bridges which are the property of the town. A little further up the Grand River is to be seen the immense double tracked structure, over which dozens of heavy freighted trains pass daily. Indeed as a railway centre, few towns in Canada are so happily situated.

The main line of the Grand Trunk Railway (Southern Division) and the Buffalo and Lake Huron division enter the town and thus give the citizens hourly trains to the larger cities of Ontario. The Grand Valley electric road which connects Brantford with Galt, passes through Paris and not only affords easy access to farmers and others to reach the town at any hour of the day but also gives freight and passenger connections with the Canadian Pacific and Michigan Central Railways.

The attractiveness of a town as a place of residence depends in no small degree upon the educational advantages offered. Paris can justly boast of schools of which they have every reason to be proud.

The public schools give a thoroughly efficient training in all the primary branches of education. The methods used are up-to-date and the results highly gratifying, as evidenced by the large number who pass the standard examinations every year.

The High School staff of four specialists cover every branch of learning included in the course prescribed for secondary schools. Special attention is given to the equipment of students for commercial pursuits. The large attendance from the surrounding counties as well as from the town, indicates the popular place which this school holds in the community.

Besides a large fire hall and electric building the town can boast of a \$30,000 Post Office and Customs Building, a \$10,000 Library Building and a \$17,000 Y. M. C. A. The latter was donated to the town by one of its leading citizens, and remains its property so long as it is maintained for the purposes already indicated. It is a model building both in arrangement and equipment and is not surpassed by that of any other town on the continent. The Public Library is free to all and is well furnished with all the standard works and periodicals.

Paris is well supplied with churches. The Presbyterian, Methodist, Catholic, Baptist, Episcopalian and Congregational churches are all strongly represented and as will be seen by the photogravures given, the structures are architectural in style and the seating capacity abundant.

The citizens of Paris are truly a music loving people and have always maintained a band which has been a credit to the town. Lately they have been honored with a prominent place among the militia bands of the Dominion and present a very attractive appearance in their new uniforms which it is their privilege to wear. *\**

Several hundred dollars have just been expended in new instruments and much is expected from our band under these improved conditions.

Prosperous Branches of the Banks of Commerce and Montreal are located here. Each occupies commodious premises, beautifully furnished, and fully equipped for all departments of their work.

Since the great fire which swept away a large part of the business portion of the town, enterprising citizens have erected several large brick blocks which are modern in every detail, so that the front street today presents an up-to-date appearance, befitting in every respect the enterprize and zeal of its merchants. Every branch of the merchantile trade is represented. Large, well selected stocks are carried and customers can rely upon getting their wants supplied at reasonable prices.

Paris is essentially a manufacturing town and has within its limits more extensive mfg. establishments than any other town of its size in Canada. First and foremost among these is the Penman Mfg. Co., the largest manufacturers of woollens in the world under one management.

This extensive business was founded by Mr. Jno. Penman in the year 1868. Under strict business principles and judicious management the institution has grown until at the present time it embraces eight large factories, six in the province of Ontario and two in Quebec, giving direct employment to over two thousand persons and indirectly to several hundred more.

These mills are all engaged exclusively in the manufacture of knitted goods, and their products are supplied to the wholesale trade only. Their annual output embraces over 240,000 dozen pair of hose and 300,000 dozen suits of knitted underwear.

The supply however is not equal to the demand and as a consequence large extensions, costing immense sums of money, are under way in the town of Paris. Here the headquarters of the Company are established and three large mills fully equipped with the most modern machinery are now operated by water and steam power.

Over 800 persons are employed in the town alone by this company and over half a million dollars is paid out annually to the employees in Paris. This company manufactures several special lines of goods, which have been frequently imitated but never equalled by others. They have established a continental reputation for reliable goods and integrity of business methods and the Penangle brand, placed on every article is a sufficient guarantee of its quality and genuineness.

Adjacent to this company's mills are these of The Watson Manufacturing Company, Limited, manufacturers of ladies' and children's ribbed knit underwear.

This Company was formed about seven years ago and today they employ about 225 hands. This is the best equipped mill of its kind in Canada. Their goods have given excellent satisfaction to the trade in every way and are supplied to retail dealers exclusively.

Their customers are found in every city, town and hamlet in the Dominion. A considerable percentage of their output is also shipped to the British colonies beyond the seas. The raw material is purchased at the lowest cash price and their numerous customers reap the benefit accruing therefrom. The buildings of the company are found to be too small to accommodate the immense demands of the trade and large extensions must be made in the near future.

Four large ware houses have already been rented by the company to store their goods in order to be ready to meet the daily emergencies of the trade.

The Alabastine Company is the only one manufacturing this article in Canada. It was incorporated in 1885 with a capital stock of \$50,000. The office and mills of the company are situated on the west side of Willow St., and they consume the output of three mines at Paris, Caledonia and York, where there is an unlimited supply of gypsum.

Special attention is given to manufacturing Church's Cold Water Alabastine for wall tinting and decorating. The quality of work produced by this article is only limited by the ability of the workman to design and execute. They also manufacture the famous Paristine Wall Plaster, Calcined Plaster, Jellstone, Church's Bug Finish, &c., all of which meet with a ready sale throughout Canada. The Alabastine Company controls all the cold water process patents for Canada, its trade mark is familiar to everyone owing to its wide popularity and the extensive advertising done by the company.

The Paris Wincey Mills Co. was founded in the year 1888 and has been running night and day ever since.

Their specialty is the manufacture of grey flannels of all grades. There is an increasing demand for these goods and it is with difficulty that the one hun-

dred employees are able to cope with the ever increasing demands of the trade.

This company like many other manufacturing concerns in the town own and operate their own electric plant. They have also a thoroughly organized fire brigade.

The Ontario Nut Works are located on the east side of Elm street, and occupy a two story building well equipped with special machinery. The productions comprise square and hexagon nuts in all sizes. These are shipped in large quantities to hardware dealers, agricultural implement men, and manufactures in all parts of the Dominion. The output last year exceeded that of any previous year.

The Dominion Spring Knitting Needle Works have a capacity of over 20,000 needles a day.

The material used is the best English steel wire, and the productions comprise the highest grade of knitting needles in fifty different sizes, from one to five inches in length. This business was established by the present proprietor twenty-one years ago. Since that time the volume of business has been steadily increasing and larger premises will soon be necessary to meet the growing demands of this important production.

Situated within a few rods of the Grand Trunk station are the Paris Plow Works. This immense group of brick buildings were erected about four years ago at a cost (including the equipment) of about 80,000 dollars, since then owing to the increase in volume of business, large additions have been made for storage and other purposes.

This company employs about 125 persons and manufactures all grades of walking and riding plows, besides manure spreaders, grain grinders, etc. Under the present management the success of the institution has been phenomenal and its future prospects are excellent.

One of the busiest and successful manufacturing enterprises in Paris is the Sanderson & Harold Refrigerator and Screen door factory.

Over sixty persons are regularly employed in manufacturing these goods. Their complete line of refrigerators command a ready sale all over the Dominion. It is the most economical and sanitary refrigerator offered on the market today and is almost entirely superceding all former makes.

The Council and Board of Trade are composed of wide-a-woke business men, who are willing to offer any reasonable inducement to enterprising manufacturers to locate in the town. For cheap light and power it stands unsurpassed.

Its situation in the heart of the best agricultural section of the province within easy access of the larger cities and the excellent shipping facilities of Paris make it an especially desirable location for additional enterprises.

Any person desiring information not included in this brief summary should correspond at once with Jas. Smiley, Esq., secretary of the Board of Trade, who will be pleased to answer all correspondence relative thereto.

Best Comic Band of not less than ten, \$15.

# Church's Alabastine

(MADE IN PARIS.)

is a perfect and everlasting WALL-COATING, made from a cement base, (Plaster of Paris) in twenty tints and white. One that HARDENS WITH AGE; is ready for use by mixing in COLD WATER, and may be re-coated whenever necessary to renew the wall surface.

ALABASTINE is a SANITARY WALL-COATING. It is porous, and permits the free passage of air. Kalsomine, under whatever name or claim, is only temporary—rubs off on everything that comes in contact with it. Wall-paper—with mouldy paste on the back, and arsenical poisoning matter in the finish and coloring on the face—is unsanitary. Besides, kalsomine, wall-paper and paint obstruct wall respiration. "Walls to be healthy must breathe." The walls of hospitals are never papered—the reason is obvious. Sanitarians endorse ALABASTINE. That fact alone is evidence of superiority.

ALABASTINE on the wall of any home will do more to enhance good looks in HOME SURROUNDINGS than anything else that can be used.

ALABASTINE is GOOD, looks rich, and is healthful. Wall-paper gives a room a stuffy smell and impregnates the air with disease germs.

Look for the little church on the label of every package. Alabastine is never sold in bulk. Hardware and Paint Dealers everywhere sell it.

Everybody should be interested. Anybody writing us can have free our booklet on Alabastine. Address.

## The Alabastine Co., Limited, Paris, Ont.

Program Continued.

Best Comic Individual on foot, \$5.

Best Comic Individual mounted, \$5.

Best Representative Character, suit of clothes value \$10

Visit the music and photo-  
graphic House of A. S. Tay-  
lor's. There you will see the  
photographer's art, Baby's  
smile, mother's pleasing look.

**SUPPOSE U POSE.**

In the music rooms are the fam-  
ous Mason & Risch pianos,  
Canada's leading instrument.  
Also the New Scale Williams  
piano, the nicest assortment  
west of Toronto. All Old  
Boys and friends welcome.

# IROQUOIS BLOCK

Built by

Geo.  
Bernhardt,

1894.

It gives me pleasure to have the privilege of a full page in your handsome souvenir to express to people of Paris my sincere thanks for the very kind and liberal patronage you have extended to me for 30 years. During this time I have proven to you that our goods are the best and purest in the market, and our dealings fair and on mutual terms, this is why I still enjoy your large patronage. I will in future continue to give you the best, and all orders placed with me will always have my prompt and careful attention. No house in Canada is placed in a better position than we are to supply your wants. I will therefore solicit a continuance of your kind favors for our Wines, Liquors and Cigars.

# Remember Boys . . . .

You are cordially invited to visit the Model Factory, which has been erected since most of you left the old town, for the manufacture of Plows and other Implements.

Come in and see for yourself why our goods have been brought to the front.

They are of one grade only, and that the very highest.

Paris Plows are superior to all others because of the extra finishing touches they receive in every department.

**Put in a good word for our goods.** They will never disgrace the old Town. . . . .

## Our Specialties ❁ ❁ ❁

High Grade Riding and Walking Plows of every description.

Success Manure Spreaders, the latest improved machine for its work. Years in advance of all others. Largest sale on its merits.

Ensilage Cutters.

Grain Grinders.
