COUNTY NEWS-LETTERS

Received from Our Own Correspondents During the past week.

PORTLAND.

DECEMBER 12.—On Saturday last a young lad named John Dowsett, while skating on the Rideau Lake, near this place, fell into an air hole and was drowned.

ELGIN.

DECEMBER 10.—John Fleming has gone to Kingston to work in a machine shop.

Mrs. Philip Halladay has gone west to leave for Florida, where they intend remaining through the winter.

The question now is in Elgin, who shall be postmaster? and as much always arises out for more, your correspondent thinks it will be John R. Dargavel.

Bad luck has attended the cheese makers in this section, but the patrons are dividing the loss and losing half.

GREENBUSH.

DECEMBER 12.—Dame Rumor states that one of our young men is about to join the Benedicts.

Mud Creek Charley (filled with bug juice) arrived after midnight, a few evenings ago in the company of another of the lower class. Their oaths and foul language were terribly disagreeable. They visited the residence of a lone widow, and after exhausting their vocabulary of vile and derisive language they departed. The next visit they make to our village they will receive a hot reception.

SPRING VALLEY.

DECEMBER 12.—Alex Morrison has sold his farm to Mr. J. Thompson of Westport.

Mr. B. Lane, of California, is visiting his sister, Mrs. Truman Hayes, of this place.

Mr. John Rappale starts for Ireland next week.

Mr. James Campbell has finished his threshing, a two week's job, but his barn and stables are large enough to hold still more. Most of his produce will be fed out on the farm, as he has about 50 head of beef cattle and other stock amounting to about 65 head.

FRONT OF YONGE.

DECEMBER 12.—Weather here is summer like.

Mrs. Samuel Hogaboom will not sell her stock and trade in Caintown, but will enter into and enlarge her business more extensively than heretofore.

Mr. M. Duncan and J. Ferguson are doing an extensive business in coon hunting. They generally kill three a day and some partridges. Ormon Gibson takes a hand sometimes.

Mrs. Duncan, of Caintown, has laid in a good supply of winter goods.

Mr. J. Ferguson, our great Ontario hunter, has arrived home from the North woods.

The hermit of Caintown is living sumptuously by himself in a pleasant cottage by the roadside.

ADDISON.

DECEMBER 9.—H. S. Moffatt has received orders from the Postmaster General to take charge of the mail carrying until tenders are received and decided upon.

Any teacher desiring a good salary, a fine school house and a pleasant village to reside in, would find it to their advantage to apply for Addison school. Good looking female preferred! Rats!

We are pleased to note the return of Mr. Byron Lovrin from an extended tour to New York, Boston and other great cities of Uncle Sam's domains. Rumor says he still possesses the first four letters of his name!

The annual Xmas entertainment of the Methodist Sunday School takes place on Saturday evening, Dec. 24th.

With sincere regret we are called upon to chronicle the death of one of our old and much respected citizens, in the person of Mr. Robert McKim, who was stricken with paralysis, on his daily return from the mail station on Dec. 2nd. He lingered in an unconscious state for four days, when the angel of death bid his sufferings cease.

The deceased leaves a large family of adults to mourn his loss. The funeral sermon was preached by Rev. Mr. Sanderson, from a very appropriate text for the occasion, viz., "For me to live is Christ, but to die is gain." His words concerning the deceased were likewise appropriate, not holding him up as a perfect man, but as a kind father, accommodating neighbor and good citizen.

LYN.

DECEMBER 12.—At last the iron horse has made his appearance and is at work running the construction train seven days in the week.

The managers of the road make a great mistake in disregarding the laws

of God and civilization, as no Sunday work ever paid yet.

Our new station is progressing rapidly, and will be neat and commodious. It is in a very convenient situation, but will require raising another foot from the ground to be out of the reach of spring freshets.

The first passenger train arrived last week, consisting of a palace sleeper and dining car, for the construction gang.

The work of construction is being rapidly pushed forward. A large number of teams are engaged in hauling ties, timber, &c. Good wages and prompt pay brings them from quite a distance.

One of our oldest and most respected citizens, Mr. John Purvis, is very sick. He has been sick for some time, but during the last few days has been sinking rapidly.

Since the completion of the grading the Hotel de Italy is being moved near to the Manitoba siding to accommodate the hands at work on the Brockville section.

C. H. McNish, of Elm Grove, has returned, with his bride, from Guelph.

Mr. E. D. Wilson, who is removing to Farmersville, has sold out his business here to Wm. Neilson.

There is a rumor that one of our merchants is about to sell out and remove to California.

Mr. S. Y. Farr, of the Robt. Wright & Co. branch store, has made his show window a centre of attraction by placing therein a novel automaton toy. Everybody has to stop and see it.

The Methodist Sunday School are preparing for a grand Christmas entertainment. Something new, instead of the tree, which has become an old story.

The Scott Act is working well, for with the exception of a few bottle suckers there is no sign of drunkenness. It is very different to what it would be were there licensed houses as before the Scott Act.

NEWBORO.

DECEMBER 5.—Jas. Hazleton moves his family to Westport this week.

The Presbyterian Social last Friday evening was highly successful. The receipts amounted to nearly \$40.

Work on the depot here will begin this week. Wm. Webster, Westport, has the contract.

Wesley Preston starts his express and passenger line to Kingston this (Monday) morning. All will be pleased along the line to see the genial and obliging Smithers on the route again.

Mrs. P. McKim has been quite ill with quinsy. She is improving.

Miss O'Donoghue, Westport, was the guest of the Misses Hart last week.

J. L. Webster has purchased from W. H. Harrison a fine young horse. John is now prepared to make it lively for the boys and pleasant for the ladies.

Mr. J. T. Gallagher has been in Brockville, attending county council, last week.

The Kingston and Brockville mails were very late getting here last week, owing to bad roads.

It is surprising the large amount of noise a few young men can make in a short time during the small hours, as was demonstrated last week on Drummond street.

We have here, what we will call for convenience sake, a donkey club. Some of its members may be seen on the street corners, evenings. Particularly the post office corner, where they love to linger and comment on ladies who are obliged to pass, making it anything but pleasant for them.

It is to be desired that they soon seek some other corner where accommodations are larger. We would propose Singleton's Corners.

Prof. Massey is having good success here. He has now about forty pupils under musical instruction.

(Received too late for last week.)

DECEMBER 12.—Mrs. Harry Leggett has been quite sick for a week past.

It is with regret that we chronicle the death of Mrs. Wm. Chalife, who died on Tuesday morning, December 6th. Mrs. Chalife was a very estimable lady, and has been an invalid for some years.

Prof. Massey has gone home for a visit. He will return after the holidays.

Prof. Tupper has opened a singing school here. We wish it success.

We are glad to see Pat. Fahey again with us. He returned on Saturday last, and will remain until spring.

D. H. Cole has purchased some lots of H. Kilborn, on John St.

Our little work and accommodation train is kept busy carrying track materials and dead head passengers.

We know two of the latter who got sadly left one day last week. Thinking to get a free and quick passage to Singleton's Corners and return, boarded the 11 o'clock express.

On this the Americans were to allow the free entry of Canadian fish and various other products. But no agreement could be arrived at on this basis.

W. G. PARISH.

Building

Lumber.

W. G. PARISH.

tramp it back. Choosing the latter they arrived in town hungry, footsore and cross, vowing vengeance on the driver, freeman and the whole concern.

SLOUCS.

MECHANICS' INSTITUTE.

The meeting in the High School building on Monday evening to consider the advisability of organizing a Mechanics' Institute, while not largely attended, was thoroughly representative in its character.

Mr. Jas. Ross was voted to the chair and called upon by B. Loverin, M. M. Fenwick, Rev. Jas. Pallar, Geo. W. Green, W. G. Parish, A. H. Gibbard, Sala Blanche and F. H. Eaton, who each spoke favorably of organization, and promised to give their hearty support. The discussion, which partook largely of a conversational nature, elicited the following facts in relation to the mode of organization, the membership fee, and the grants given by the government in aid of Institutes.

Any number of persons, not less than ten, may be incorporated as a Mechanics' Institute, by filing a declaration to that effect in the office of the Registrar of the county. The person filing the declaration shall within thirty days thereafter call a meeting for the election of officers and the framing of by-laws for the regulation of the Institute. It shall be the duty of the officers to establish a library and reading room, containing books prescribed by the act. The annual grant shall be as follows: A membership of fifty, contributing \$25, shall receive \$25. If the membership be 100 or over, and the amount of subscriptions be \$50, the grant shall be \$50. In addition to this, every Institute receives \$1 for every \$1 expended on books (but the grant shall not exceed \$150 in any year); the sum of \$1 for every \$1 expended for newspapers or magazines, (the sum not to exceed \$50 yearly); and the further sum of \$3 for every pupil attending evening classes for 25 pupils or under, and \$1 for every additional pupil, not exceeding 100.

From the above it will be seen that the scope of the proposed Institute is large and the grants liberal. There is no distinction as to membership, all classes and both sexes being eligible.

After thoroughly discussing the pro's and con's, a committee, consisting of B. Loverin, Dr. S. S. Cornell and Geo. W. Green were appointed to canvass for membership and subscriptions. The committee will probably call upon the citizens on Friday and Saturday, soliciting their aid and cooperation.

WHO IS MY BROTHER?

A man may have an honest heart, though poverty hourly stare him; a man may have a noble's name, yet have no cash to spare him.

—Burns.

Mr. EDITOR:—There are times in one's life, when the light of prosperity and wealth burns brightly, that benign character may cause one to be over generous. It is at such periods that one seems to have many friends and brethren who will approve of his acts and listen to his counsel. But the scene is changed when adversity breathes upon prosperity, and scanty pockets take the place of well-filled ones, which once shed its light abroad becomes dim, and at times seems about to be extinguished. It is then many mortals cry out with an aching heart, "Who is my brother?"

It is then many mortals cry out with an aching heart, "Who is my brother?"

It is then many mortals cry out with an aching heart, "Who is my brother?"

It is then many mortals cry out with an aching heart, "Who is my brother?"

</

The Frenchmen Dispersed Without Doing Any Mischief.

A Quebec despatch says: The expected riot last night ended in a complete fiasco. From 7 o'clock onwards could be seen wandering their way towards Dufferin Terrace, undoubtedly in quest of mischief. Probably three quarters of a million of these "bouncers" made their appearance upon the band stand. At about 8 o'clock a few juniors presented themselves in front of the barracks, and the crowd, their chief aim was not to trouble further, because the local authorities intended making a thorough test case of the Salvation Army parades. Notwithstanding the most vehement appeals upon the part of the harangues, about one thousand persons assembled and proceeded towards St. Roch's. In passing the Army barracks on route a number of thoughtless youths in the procession emptied the chambers of their revolvers in the air, hoping to frighten the inmates of the barracks. The police made no endeavors to arrest the criminals. From this point St. Roch's the crowd was momentarily augmented until its numbers reached fifty thousand, when all proceeded through the various streets of St. Roch's singing national songs and then headed towards Upper Town, vowing vengeance on the Salvation Army and vowing vengeance of wrecking their barracks. The crowd in their procession were completely disorganized. One feature which was especially noticed was the presence of English-speaking classes. After leaving St. Roch's the mob wended their way up one of the streets until they reached St. John street, when, as though a thunder-clap had fallen, almost the whole of the mob up. Not more than 200 proceeded further.

SLOWLY ROASTED TO DEATH.

A Prisoner Burned Alive in the Presence of a Crowd of People.

A Webberville, Mich., despatch says: The cry of "Fire!" aroused the people shortly before midnight last night, and they rushed from their homes to find the town lockup in flames. It was a wooden structure standing alone in an open square. Above the crackling of the flames cries were heard from an inmate of one of the cells. When the firemen arrived the doomed man was seen frantically beating the bars of his cell and crying for help. The people gathered round the lockup, and in the presence of the crowd he slowly roared to death. Some of the crowd made ineffectual attempts to rescue him, but were driven away by the heat. The pale face and glaring eyes of the man who was being framed by the black, unyielding bars of his cell door. Little by little he was forced back, but only when the bars became red hot did he abandon all hope of escape. The horror of the situation proved such a frightful mental strain on the prisoner that he became insane, tearing his scorched clothing off, and striking against the bars and grabbed the red-hot iron in the vain effort to escape. An odor of burned flesh pervaded the air and made many of the on-lookers sick. The crowd, however, rushed madly around the narrow inclosure while the spectators stood rooted by horror to the spot. Gradually his cries grew weaker and he sank to the floor, and soon all was over. The prisoner was Newhall Tyler, 38 years old. He had been jailed for striking a boy on the head. Tyler had been in the lockup for a week, and annoyed him. He fired the prison, hoping that he would be released thereby.

SAVED BY RUNNING A MILE A MINUTE.

An Engineer's Escape Down a Steep Grade to Avoid a Runaway Train.

A Youngstown, O., despatch says: Allan Cowden, a well known locomotive engineer, has just had a thrilling experience. While working on the main line, the engine, which was being driven by Cowden, was struck by a flying train, and the danger of a collision, Engineer Cowden endeavored to pull away with the cars, but the engine was so badly damaged that the train steadily gained. The engine of the flying train became fearful. A mile out of Marquette he thought of the many men at work in the yard who might be killed by the runaway, and he decided to plan to save them. Ordering the fireman to cut loose from the train he crowded on every pound of steam. As the locomotive sped forward he kept the whistle blowing, and the whistle, indicating that he wanted to keep the main track and for the switchman to send the train on the siding. The engine passed over the main track in a minute, returned the lever and the two sections of the train dashed into the siding and piled the cars up in an indescribable mass. Cowden had saved all the lives of his fireman, besides twenty employees in the yard, but the train was a total wreck, however, it would have been in any case.

REMARKABLE RELIGIOUS TRAIL.

Men and Women Who Lived in a Nudist Condition—Good Subjects for Hypnotization.

A London cablegram says: The Chronicle gives a strange account of a trial in Tolax, a village in Maine, in the State of New York. The trial was held in a room where religious fanatics of strange practices. They originally went naked like Adam and Eve before their fall, but the authorities intervened. Since that time they have worn loincloths and wadded tunics, and have had their wounds upon themselves in imitation of the crucifixion, and burnt all their goods, believing a higher power would provide food. When put on trial they were hypnotized in order to get their minds cleared. Irving in "The Belles," and proved good subjects. It is even alleged that, on being ordered to perspire, they broke out into a profuse perspiration. Other articles in the first time such a scene has happened in a court of justice in Spain. The probable result of the trial will be a nominal punishment.

A. O. U. W. Insurance Case.

A London despatch says: Susan Drury, formerly of this city, now the wife of Mr. O'Connor, also formerly of this city, was at one time engaged to be married to Geo. W. Child of Detroit, Mich. In the course of their engagement, became a member of the A. O. U. W., and had named his fiancée as his beneficiary. Child afterwards married another woman, and made an attempt to change the policy, but that his wife would receive the benefit of it in his death. Mrs. O'Connor protested against any such change being made, and the officers refused to do so. A restoration unless the original policy was produced, and as it was in Mrs. O'Connor's hands she refused to give it up. Child now retained power of attorney in Geo. W. Child in the hope that he would be able to get the policy from Mrs. O'Connor, but before the attempt was made Child died. The Grand Lodge A. O. U. W. filed a bill in Wayne Circuit Court to determine who the benefit was to be paid. Judge Cook decided in favor of Mrs. O'Connor.

POSTMASTER ENGLISH OF NEW HAVEN, Conn., recently received a letter addressed "To the most beautiful and intelligent lady in New Haven from 18 to 21 years of age." Not feeling competent to make the decision Mr. English consulted the postal authorities at Washington, and has just been directed to send the epistle to the Dead Letter Office. How little romance there is about a Government bureau.

"How deliciously clean he looks," said Washington (D. C.) belle of Joseph Chamberlain.

Grunblers in the Knights of Labor Get a New Member.

A Philadelphia despatch says: Powderly's second letter to the Knights, published here in the Standard, is considered a "corker." He gives the growlers and so-called secessionists a sound drubbing. Mr. Powderly seldom indulges in talk of this kind, but when he does hit a blow it comes straight from the shoulder.

When I hear men talk of seceding from the organization, with the threat of starting an improved order, I fancy that they know but little of the trials, the dangers, the odds against which they will have to contend, and I feel that the amount of money necessary to build up a new Order, if properly applied in the old one, would make it invincible.

Powderly pitches into the "assassinating character" with much vigor, and asks that slander shall cease and honor criticism take its place. "Let me ask a question of the member who now and then publishes a column or half column of abuse of the general officers, charging them with all sorts of shortcomings. What are they doing in your own locality to make the lot of the toiler easier? Can you expect me to turn and swelter under the heat of the sun, while my lieutenants are furnishing the enemy with the ammunition with which to attack me?"

"Attack if you will, criticize if you please, abuse if you choose, but do not forget that right where you live, in your own town or city, within sound of your own ears, you are doing the degradation of the workshop of the factory. You will find the cry of poverty in the tenement house. You will find the sick and dying in the streets. You will find the wail of men and women urged to sin because of hunger and cold."

From an organization numbering less than 100,000 members, the first General Assembly was held, we have seen the Knights of Labor grow until over 700,000 men and women claim membership at one time. They have organized an industrial army, and have been gathering together their forces, and now, when they are being driven back, they are making sacrifices that the Order will live in history as a power for good.

"The Order is not being driven back because of their misfortunes, for the reason that they felt that it was theirs to do, and they were not working for self nor for posterity, they worked for posterity and the future."

LOVE MADE HIM A WANDERER.

The Romantic Story of a Ragged Old Nobleman in Evansville, Ind.

An Evansville, Ind., despatch says: A few nights ago the police found Henry Gabling unconscious in the gutter. Gabling has long been an inmate of the almshouse, and has been in the institution, having been seen tapping legs in front of the saloons in an effort to wring out a drink of stale beer. When taken to the station-house he was found with an ugly wound on his head. They told the poor wretch that he came to consciousness that his days of life were few and sent for a preacher to visit him. To the clergyman Gabling told a romantic story of his life, and how he had been a Roman in rank, was carefully educated and had a wife picked out for him. But he didn't marry her. All unknown to his wife, he had fled from his home, and his nobility had quietly fallen in love with a peasant girl. He had her, and his parents, finding all other methods unavailing, had the girl gotten out of the house without saying a word to any one of where she was going. The hour grew late until the hope of the household did not return, and the girl was absent in a flash, but returned without tidings of the missing one. The fleeting days, months and years brought no word of him. Then he discovered that the girl had been found and had started out into the wide world, hunting for his girl and hoping to find her. For years he went and hid in the capitals of Europe, but he didn't find her. He roamed over the continent, and all quarters of the continent and the islands of the sea, but the fair face of which he was in quest lived only in hope and memory. Then he heard that she was in Paris, and he came to work as a book-keeper. From Cincinnati he went to Louisville and then came here, where for years he held responsible positions. In his dependency he took to drink, and it has wrecked his health. He is 80 years old. Of his childhood's friends he knows nothing, and of his lost love he hasn't found a trace.

WICKEDNESS IN HIGH PLACES.

How a British M. P. Got Into Difficulties With His Creditors and His Mistress.

A London cable says: The examination of Mr. Borlase, ex-Under-Secretary of the Local Government Board, was continued in the Bankruptcy Court yesterday. He admitted having borrowed £10,000 from Madame de Quiros, who was formerly his mistress, but he said the money was his own, and he had never promised to settle £1,500 upon her. She asked him, he said, for £500 down and £1,500 a year, saying that she would get the same amount out of another man. He died at her house borrowing the £1,000, when she tried to murder him. After getting the sum mentioned he borrowed £2,700 from her, giving her a receipt for the amount. He had afterwards that this money had been given to her by another man. Mr. Borlase said that his average income was £2,000, and that he had never been largely expended in political life for elections, dinner parties, etc. Ever since he entered Parliament he had been involved in financial troubles. The further hearing of the case was adjourned.

The Last Hours of Lady Brassey.

A Port Elizabeth correspondent writes to the Liverpool Post giving some particulars of the death of Lady Brassey. It would seem that the party on the yacht consisted of Lord and Lady Brassey, the Hon. Mr. Brassey and the Hon. Mrs. Brassey (three). They had a delightful cruise and were bringing away from Australia exceedingly pleasant reminiscences. Lady Brassey was taken ill on the morning of the 7th of September, and she died on the 11th of September. She was 75 years of age, and she had devoted so much attention to her duties that she had become unconscious, in which condition she remained until her death about 11 o'clock on the morning of the 11th of September. The interment took place at sunset that day, and was a melancholy and memorable ceremony. Lord Brassey read a portion of the service, and the other members of the family assisted in the last rites.

P. T. Barnum says that his favorite novel is "Ivanhoe." He is, of course, especially interested in the scene which describes the burning of Front-de-Baie's castle.

Mr. Seth Cohoe, foreman of the electoral department of Mr. H. S. Moore's roller flour mills at Norwich, is about to leave for Rockport, where he will start in business for himself.

Premier and Madame Mercier returned to Montreal from Quebec. The Premier is still very ill, and it is expected that he will have to take a trip to the States.

A Curious Lodge of them in New York.

Old Masons were, until late, of the opinion that no such thing as a Chinese Mason existed. One gentleman said he had seen Arabs and Turks who were good Masons, but to the best of his knowledge no Chinaman was in the Order. Nevertheless, there are not only Chinese Masons, but Chinese Masonic lodges in full view, and membership of over three hundred. It is a native organization, not allied directly to the Free and Accepted Masons, but said to be founded on principles very nearly akin to those of the latter.

The lodge-room is at No. 18 Mott street, second floor, front, and has recently been remodelled and refitted in very good shape, all newly painted and cleaned. The lodge furniture is of Chinese design, and imported from China expressly for the society at a great expense. A tall flagpole with a rope for running up colors is on top of the building, and the door as one enters the lodge-room is a red sign in native characters signifying "Chinese Masonic Society," and down the sides are two long signs, one in Chinese and one in English, both bearing mottoes. One of these is "Do good to one another and the other relates to the business of the Order. The interior is like most Chinese lodges, bright and not full of old furniture and trappings. The floor is of a yellow color, and is laid into a sort of an "L" shape, and the main or lodge-room is at the lower end of this "L" shape. The floor is of a yellow color, and is laid into a sort of an "L" shape, and the main or lodge-room is at the lower end of this "L" shape. The floor is of a yellow color, and is laid into a sort of an "L" shape, and the main or lodge-room is at the lower end of this "L" shape.

THE TELEPHONE IN CANADA.

How Hamilton, Montreal and Toronto Compare With Other Cities.

The rapidity with which Canadian citizens adopt new and useful inventions is illustrated by the following comparative table of the number of subscribers to telephones in Montreal, Toronto and Hamilton as compared with other cities of larger populations:

Cities.	Pop.	No. of subs.	Rate per 1000.
Baltimore	333,000	1,965	\$ 80
Boston	349,000	2,148	100
Cincinnati	255,000	1,718	100
Chicago	1,000,000	2,174	100
New Orleans	216,000	1,000	100
Philadelphia	1,100,000	1,727	100
Pittsburgh	142,000	1,000	100
St. Louis	325,000	1,500	100
St. Paul	142,000	1,000	100
Montreal	300,000	2,000	100
Toronto	400,000	2,000	100
Hamilton	100,000	750	100

From the above it will be seen that Montreal, with a population of 200,000—less than half the population of Paris—has almost as many telephones as the latter prospect, as soon as the new company gets into operation, of a largely increased number. In Montreal there is one telephone to every 200 inhabitants, and in every city of fifty-three, in Hamilton one to every fifty-seven, and in Paris one to every 4,346. It, as claimed by post-office and other statisticians, letter-writing and electric messages are to be taken as a sign of civilization and advanced education. Hamilton, Toronto and Montreal may count themselves as cities high up in the educational scale.

STOOD ON A HOT STOVE.

Inhuman Punishment of a Child Who Went Skating Without Leave.

A Boston, Mass., despatch says: Little Willie, a child of five years, was on Friday and told Judge Curtis how John Williams, of No. 40 Grove street, had punished him for going skating. The child's mother is a widow, and she has a boy of five years, and a girl of three. The boy was on the Bay, and says the boy's board and lodging at Williams'. The child went out skating on Thursday, and when he returned he found his shoes and stockings and under him on a hot stove until both feet were blistered. Williams confessed the deed and said he must do something to keep the child on his feet.

Perilous Work on Great Bridges.

In a lecture given at Dundee, Scotland, Mr. Baker, one of the Forth Bridge engineers, tells a fine story of modern heroism. It says that the Forth Bridge, which was one day working at the bridge, standing on a plank 100 feet above the sea level. One of the bolts supporting the plank gave, and the plank fell, and the engineer was hanging by the steel works of the bridge and held on; a fourth diver, was rescued, and it may be added incidentally, that the Forth Bridge, which was one day working at the bridge, standing on a plank 100 feet above the sea level. One of the bolts supporting the plank gave, and the plank fell, and the engineer was hanging by the steel works of the bridge and held on; a fourth diver, was rescued, and it may be added incidentally, that the Forth Bridge, which was one day working at the bridge, standing on a plank 100 feet above the sea level. One of the bolts supporting the plank gave, and the plank fell, and the engineer was hanging by the steel works of the bridge and held on; a fourth diver, was rescued, and it may be added incidentally, that the Forth Bridge, which was one day working at the bridge, standing on a plank 100 feet above the sea level. One of the bolts supporting the plank gave, and the plank fell, and the engineer was hanging by the steel works of the bridge and held on; a fourth diver, was rescued, and it may be added incidentally, that the Forth Bridge, which was one day working at the bridge, standing on a plank 100 feet above the sea level. One of the bolts supporting the plank gave, and the plank fell, and the engineer was hanging by the steel works of the bridge and held on; a fourth diver, was rescued, and it may be added incidentally, that the Forth Bridge, which was one day working at the bridge, standing on a plank 100 feet above the sea level.
