

THE ACADIAN

AND KING'S CO. TIMES.

HONEST, INDEPENDENT, FEARLESS.—DEVOTED TO LOCAL AND GENERAL INTELLIGENCE.

Vol. XIII.

WOLFVILLE, KING'S CO., N. S., FRIDAY, APRIL 13, 1894.

No. 34.

THE ACADIAN.

Published on FRIDAY at the office
WOLFVILLE, KING'S CO., N. S.

TERMS:
\$1.00 Per Annum.

(IN ADVANCE.)

CLUBS of five in advance \$4.00.

Local advertising at ten cents per line or every insertion, unless by special arrangement for standing notices.

Rates for standing advertisements will be made on application to the office, and by mail or by advertising agent, but not guaranteed by some responsible party prior to its insertion.

THE ACADIAN JOB DEPARTMENT is constantly receiving new type and materials, and will continue to guarantee satisfaction on all work turned out.

Very commendations from all parts of the county, or articles upon the topics of the day are cordially solicited. The name of the party writing for the ACADIAN must invariably accompany the communication, although the same may be written over a fictitious signature.

Address all communications to
DAVIDSON BROS.,
Editors & Proprietors,
Wolfville, N. S.

Legal Decisions

1. Any person who takes a paper regularly from the Post Office—whether directed to his name or another's or whether he has subscribed or not—is responsible for the payment.

2. If a person orders his paper discontinued, he must pay up all arrears, or the publisher may continue to send it until payment is made, and collect the whole amount, whether the paper taken from the office or not.

3. The courts have decided that referees take newspapers and periodicals from the Post Office, or removing and leaving them uncollected for a prima facie evidence of intentional fraud.

POST OFFICE, WOLFVILLE.

APPLE TREES for SALE

For the Fall and next Spring trade, at the
Weston Nurseries,
KING'S COUNTY, N. S.

Orders solicited and satisfaction guaranteed.

ISAAC SHAW,
PROPRIETOR.

LAME BACK

NEURALGIA, PLEURISY, SCISSOR AND RHEUMATISM CURED EVERY TIME

WHEN THE "D. & L." MENTHOL PLASTER IS USED

BY SKODA'S DISCOVERY

Great Blood and Nerve Remedy

Physicians endorse them, and make them.

As I am pleased to recommend

Skoda's Discovery

and Skoda's other remedies, as I know them to be articles of true merit, and the physicians who compound them, to be men of integrity and ability, Skoda's Discovery is unlike any other proprietary medicine—it cures disease by removing the poison, and as the same time SUPPLIES GOOD BLOOD to wasted parts. No other remedy has performed so many wonderful cures or relieved so much suffering.

Skoda's Little Tablets cure constipation, sick headache and dyspepsia. 30 cts.

MEDICAL ADVICE FREE.

SKODA INVENTOR CO., LTD., WOLFVILLE, N. S.

DIRECTORY.

SHAW, J. M.—Barber and Tobacco Dealer.

WALLACE, G. H.—Wholesale and Retail Grocer.

WITTER, BURVEE—Importer and Dealer in Dry Goods, Millinery, Ready-made Clothing, and Gent's Furnishings.

It was at this point that we promised to follow the rule I have stated.

My sister Elsie, who was sixteen, and I, two years older, never for one moment thought of looking for support to James, who threw his arms dramatically round my mother's neck and declared for the fifth time that we would "turn over a new leaf"; but we instinctively took up the advertisement sheet of the "Times." My mother shed her jewels without a murmur, and said that a good thing it was that she had always been so famous for her strict economy. But it was a virtue that did not bear transplanting from Queen's Gate to Pimlico. When my mother traveled by railway, she said she did not mind going third-class, but she would not go second; and, as we could not allow her to travel third-class, she went "first."

Our lodgings were small and smoky, but at first Elsie and I agreed that, if this was adversity, it was rather pleasant for a change. We had been very naughty as children, and rather troublesome as growing girls, restless and difficult to manage; but now the new sense of mingled freedom and responsibility seemed to have done us good. We felt that we were young and strong; people had told us that we were clever—in deed, we told each other so. Our mother lamented that our father had spoiled our "future"; why should we not make a "future" for ourselves? My sister, at an early age, had drawn and painted large-eyed nymphs with wavy hair like the lady in the advertisement for a certain wonderful hair-restorer, and they had been spoken of in the drawing-room as showing undoubted genius. I, at fourteen, had written a story which our maid pronounced to be "intensely interesting." But Elsie and I had too much sense to suppose that our dancing and scribbling would prove profitable yet, if ever they did; and so we turned naturally to "fiction."

POETRY.

Hush.

"I can scarcely hear," she murmured,
"For my heart beats loud and fast,
But surely in the far, far distance
I can hear the sound of last."

It is only the reapers singing
As they carry home their sheaves;
And the evening breeze has risen,
And rattles the dryish leaves.

"Listen! there are voices talking";
"Listen! still she strove to speak,
Yet her voice grew faint and trembling,
And the red flushed in her cheek."

"It is only the children piping
Below, near their work's stone,
And they laugh that their eyes are dazzled
By the rays of the setting sun."

Painters gave their voices, and weaker,
As with anxious eyes she cried,
"Down the avenue of chestnuts
I can hear a horseman ride."

"It was only the deer that were feeding
In a herd on the clover grass,
They were startled and fled to the thicket
As they saw the reapers pass."

Now the night arose in alliance,
Birds lay in their leafy nest,
And the deer crouched in the forest,
And the children were at rest.

There was only a sound of weeping
From watchers around a bed;
But rest to a weary spirit
Peace to the quiet dead.

—Aldrich A. Proctor.

SELECT STORY.

At the World's Mercy.

BY FREDERICK WARDEN.

CHAPTER I.

Whenever I hear of a wife or widow and young family left suddenly unprovided for, I reckon up the children on this wise—so many never do wells and so many governesses. I have met with exceptions, but the rule is sound.

When my father, a wealthy manufacturer, failed in business, he rallied as the world for a little while, and then calling us together, made us a manly and affecting speech, in which he compared himself to Hercules, and declared his resolution to fight the world for us all, and win us another luxurious home, then he set out for Australia in search of his labor, leaving my mother and sister and myself in lodgings in Pimlico, and recommending us to the care of my brother, a lad of twenty, who had just been expelled from college. My high-spirited mother rather resented my father's conduct, and was of opinion that it would have been more heroic to remain and starve with us at Pimlico than to run away and let us starve alone.

It was at this point that we promised to follow the rule I have stated.

My sister Elsie, who was sixteen, and I, two years older, never for one moment thought of looking for support to James, who threw his arms dramatically round my mother's neck and declared for the fifth time that we would "turn over a new leaf"; but we instinctively took up the advertisement sheet of the "Times." My mother shed her jewels without a murmur, and said that a good thing it was that she had always been so famous for her strict economy. But it was a virtue that did not bear transplanting from Queen's Gate to Pimlico. When my mother traveled by railway, she said she did not mind going third-class, but she would not go second; and, as we could not allow her to travel third-class, she went "first."

Our lodgings were small and smoky, but at first Elsie and I agreed that, if this was adversity, it was rather pleasant for a change. We had been very naughty as children, and rather troublesome as growing girls, restless and difficult to manage; but now the new sense of mingled freedom and responsibility seemed to have done us good. We felt that we were young and strong; people had told us that we were clever—in deed, we told each other so. Our mother lamented that our father had spoiled our "future"; why should we not make a "future" for ourselves? My sister, at an early age, had drawn and painted large-eyed nymphs with wavy hair like the lady in the advertisement for a certain wonderful hair-restorer, and they had been spoken of in the drawing-room as showing undoubted genius. I, at fourteen, had written a story which our maid pronounced to be "intensely interesting." But Elsie and I had too much sense to suppose that our dancing and scribbling would prove profitable yet, if ever they did; and so we turned naturally to "fiction."

Our lodgings were small and smoky, but at first Elsie and I agreed that, if this was adversity, it was rather pleasant for a change. We had been very naughty as children, and rather troublesome as growing girls, restless and difficult to manage; but now the new sense of mingled freedom and responsibility seemed to have done us good. We felt that we were young and strong; people had told us that we were clever—in deed, we told each other so. Our mother lamented that our father had spoiled our "future"; why should we not make

THE ACADIAN.

WOLFVILLE, N. S., APRIL 13, 1894.

Some People we Have Met.

BY HARRI HARRIS.

Estorffmers. We have all met them, and had dealings with them. They have taken us in often too. Who hasn't paid \$3.00 a day for board, when flour was selling at \$3.50 a barrel, or 20 cents for two small bottles of maple syrup, or a number one price for number 13 apples, or 14 cents a pound for some with some steak on it, or 70 cents for a 40 cent lecture? No one occupation has a monopoly of the extortioners. In every class there are some who do not live by the Golden Rule. Extortion is stealing. When a farmer charges too much for potatoes, or a lawyer for writing a letter, they rob us and are dishonest. We must pay full value for what we receive. Some say a lawyer and doctor should charge more for their time than a farmer and merchant. Why, are they needed more? No, but because they have spent so much time and money in education. Yes, and have they not received the benefit of that education in enlarged minds and developed faculties? Why ask the world to remunerate them for self-improvement? The public has no right to pay a man for his preparation to earn a living. His study fits him for more work and it comes to him. It is to the merchant's own interest and happiness too, to be educated, but he must not overcharge on his groceries. A young man goes to college and gets his B. A. He then takes a course in an agricultural school and goes to farming. Should he charge \$15.00 for a bushel of wheat and a dollar and a half for a cucumber? He has as much right to do so, as the lawyer has to ask \$50.00 an hour for advice, or the doctor \$20.00 for a 20 minutes call. Some would grumble at the farmer's prices. No doubt, and perhaps the lawyer and doctor would try and beat him down, or go somewhere else to deal. Because one is learned and high in his profession that gives him no liberty to extort. Talents were not given him for such a purpose. There is no excuse for extortion. It is not honest to steal. The Bible says "Do justly," and you cannot get any better recipe for society. The farmer must not take advantage of his servant, or the merchant of his customer, or the lawyer of his client, or the picture framer of his buyer. Do not be in a hurry to get rich. It is better to lay up treasures in heaven than on earth. Try and have the most property where you want to stop longest. People don't live in Nova Scotia forever, a good many have died already. Let him then that stole steal no more. If extortion is wrong in one it is wrong in all.

Mrs. Parker's Statement.

AN ENGLISH LADY INTERVIEWED—HER REMARKS WILL INTEREST CANADIANS.

Mrs. Parker, an English lady, living in St. Charles, near Southport, England, recently interviewed, said she had not been as well for twenty years as then, having just taken a course of Hawker's nerve and stomach tonic and Hawker's liver pills. Mrs. Parker had been a great sufferer from flatulence and indigestion, and what the doctors termed heart trouble. Every remedy that her family physician could suggest was tried but without success, and her condition became so serious that it was thought the only chance for her restoration to health was a change of climate. She could not lie down at night, but had to be bolstered up in a sitting posture and then could only breathe with difficulty. But after taking six bottles of Hawker's nerve and stomach tonic in conjunction with Hawker's liver pills she was completely restored to health. Her symptoms will be recognized at once by thousands of sufferers, in whom they are present in perhaps a milder form, and to them also Hawker's nerve and stomach tonic comes as a deliverer from the tortures of sickness and disease. In Mrs. Parker's case as in thousands of others, the wonderful results obtained are due solely to the remarkable nerve restoring, invigorating and blood building properties of this great tonic, combined with the regulating qualities of the pills on the stomach, liver and bowels. Hawker's nerve and stomach tonic is especially adapted to the diseases peculiar to women giving tone to the nerves and stomach, vigor to the mind and body and strength to the blood, restoring the bloom of health to the pale and delicate. It is a perfect nerve restorer and invigorator, and blood and flesh builder, as well as a reliable stomach tonic and aid to digestion. It is a certain cure when faithfully used for all diseases arising from nerve exhaustion, weakened or impaired digestion, or an impoverished or impure condition of the blood, such as nervousness, weakness, nervous headache, sleeplessness, neuralgia, loss of appetite, dyspepsia, hysteria, and the prostrating effects of a gripper, or any nerve weakness of heart or brain arising from worry, overstrain of mind or body or excess of any nature. Hawker's nerve and stomach tonic can be obtained from all druggists and dealers. Price fifty cents a bottle or six bottles for \$2.50.

In a review of the progress of the Dominion of Canada, during a quarter of a century, Professor Bryce of Winnipeg says: "What truer symptom of the uplifting spirit can be seen than the organic unions which have taken place in the religious bodies. Less than 10 years after confederation, the four separate Presbyterian churches united into one great church. Nine years after, the sundry followers of Wesley joined in forming the strong Methodist church of the Dominion, and its power is felt from the Bay of Fundy to the Gulf of Georgia. In seven years more the Church of England with its many dioceses has been brought together in a happy union, and the city of Winnipeg has been honored in becoming the seat of the arch prelate of that church, a token of the spirit of union coming both from the Atlantic and Pacific shores."

Visitings caused by indigestion is prevented by K. D. C.

The Ancient Colony.

NOTES TAKEN ON A TRIP TO ST. JOHN'S, NEWFOUNDLAND.

We left Halifax Feb. 24th, 1894, one of the coldest days of this season, on one of those large steamers that cross the Atlantic. We met with plenty of ice most of the way down, and off Cape Race saw an immense iceberg looming up like some great castle with its pinnacles and wings something grand to behold. The entrance to St. John's, Nfld., harbor is much like Digby Gut, narrow and bold. The city is built on the side of a high hill. Nfld., Britain's oldest colony, is so little known to Canadians and Americans, that having just returned from its capital, I might endeavor to give a brief outline of its resources, etc. Newfoundland has a population of about 200,000 people, 30,000 of which reside in the capital, St. John's, and there are quite a number of smaller towns with populations from 8,000 to 15,000.

The island has an area of 42,000 square miles, and until very lately little or nothing was known of its interior, but now that the country is opening up by means of railways, there are quite a number of settlers on the line, and quite a number of saw-mills are in operation in places that a year or two ago were hardly known. A very fine quality of lumber, mostly pine, is obtained in the country, and spruce, birch, fir, larch, willow and ash are also to be found. In minerals Nfld. is very rich, there being copper, iron pyrites and lead in abundance. Gold, silver, limestone, granite, asbestos and coal are also to be found in deposits of various extensions. On the west coast of the island a valuable deposit of petroleum has been discovered and proven to be of a good quality, and a company is now being formed in St. John's to have the claim worked at an early date.

The mainstay of the colony is its fisheries, and principally, which are very abundant around the coast. The lobster, salmon and herring fisheries are also valuable, and between them keep the majority of the Nfld. fishermen busily engaged all the year around, but in many of the outputs the fishermen do nothing in the winter but live on the profit of the summer voyage. Newfoundland has been termed the land of "fog and fisheries." While in a manner the latter may be true, St. John's, Nfld., cannot in any way compare with St. John, New Brunswick, as far as frequent fogs go, and on the whole, Nfld. possesses a very fine climate. Of late years the thermometer in winter rarely goes lower than 12 or 15 degrees below zero in St. John's, and in summer seldom exceeds 85 degrees and never below 50 degrees.

The mail service of Nfld. could be better in the winter, but in summer, all that could be expected, as it frequently happens that there are two mails a fortnight from Great Britain, and three mails a week from Canada and the United States, while the local mail service is improving every year, and many places that hitherto received but one mail a week, now have a daily mail. Since the great fire of '92, St. John's has wonderfully improved in appearance, and now that its sewerage system is a good one, its streets wider, and many lanes and narrow streets closed up, when fully rebuilt, which is rapidly going forward, the city will be quite an imposing one, with its fine churches, banks and public buildings.

It has a Government appointed in England for a period of six years, and a local Government consisting of a Legislative Council and House of Assembly, the former with sixteen members appointed by Government and the latter with thirty-six members elected by the people. The seal-fishery at 1893 was not a good one in Nfld., and unless a decided change takes place then reported from the ice-fields up to date, Mar. 20th, this year's fishery will certainly be a poor one. To give some idea of the extent of this industry there were twenty-one steamers, tonnage 6325, carrying 4,700 men, besides schooners sailing from some of the outports, those all leave for the ice-fields Mar. 10th, at 2 o'clock p. m. The week previous to their sailing is a lively time in St. John's.

At present there is quite a stir in Nfld. owing to several election trials going on, one of which has just been completed the verdict being against the Government. Hon. H. J. B. Woods, Minister of Finance, Mr. Woods is the Surveyor General of the colony. There are eight petitions filed and the three judges will be kept busily engaged for some time. One visiting St. John's, Nfld., for the first time will be surprised at the amount of business transacted and the immense stocks some of the principal merchants carry. The amount of shipping owned is large, and they have a good dry dock, two large steamers are repairing there at the present time.

Nfld. is not an agricultural country, but in portions of it the soil is very good particularly in St. George's Bay. In some few instances wheat has been raised with success, but as the summer season is short it could not be grown profitably. As for vegetables very fine potatoes, turnips, pease, carrots and beets are raised but not in large quantities. Small fruits such as plums, cherries, gooseberries, currants and raspberries can be grown profitably, but the season is not long enough to grow apples and maturing them perfectly except in some favored localities.

The people are fine, healthy looking, kind and hospitable to strangers. The hotel accommodation might be improved and probably will be when the city gets built up again. There is much more I might add but think I have already trespasses too far on your valuable space.

J. E. LOCKWOOD, Editor, April 24, 1894.

W. S. WALLACE, MERCHANT TAILOR.

Bible Wines. DEAR ACADIAN,—A few weeks ago I noticed in the "White Ribbon" column of your paper an article on the "two wine" theory, which I was a little surprised to see, knowing that the department of your paper was conducted by the most scholarly ladies of our town. The Sunday School Times, an authority, I think, no one will doubt, gives the other side of the question, which, in the interest of truth, I am sure, you will find space for in your valuable paper. It is as follows: "There is no gain in trying to make the Bible prove what we believe; or would like to believe, by twisting the plain meaning of the Bible text, or by denying that that text is what it is. Yet there is a temptation to do this very thing in the interest of our favorite reforms, and many a well-meaning person has yielded to this temptation. Because experience causes us to believe that even 'moderate drinking' is not safe for us, we would like to find the specific teaching of the Bible in favor of total abstinence for all at all times. In order to reconcile apparent contradictions on this point in the Bible text, it occurred to some that there must be a difference between the 'wine' that is commended as a blessing from God and the 'wine' that is to be shunned as a source of evil; and this has led to the theory that one of these wines must be fermented grape-juice and the other fermented malt-juice. This theory was advocated with earnestness by very excellent men, including some strong scholars; but gradually the force of the argument in its favor was broken by research and close Bible study, and it is practically abandoned by scholars of all grades. Yet there are honest inquirers who still in doubt about the matter, and who seek for fuller knowledge. Here for example, comes a distinguished clergyman with this question, which he probably asks for the sake of others, rather than for his own sake. 'Will you kindly state whether there is any authority for the statement often made that there were two kinds of wine spoken of in Scripture, one unfermented and harmless, and the other fermented and capable of producing intoxication? And will you also kindly give a few of the authorities upon which you base your answer?'

President Cleveland's Brother, the Rev. Wm. N. Cleveland, certifies to Mr. John D. Rose's sickness and cure. Mr. Rose's statement is as follows: "I, the undersigned, feel constrained to bear testimony to the value of your remedy for Dyspepsia. Last summer my stomach failed so entirely that I was unable for weeks to digest any food except an occasional cracker, meanwhile, I was reduced to a skeleton, and because so weak as to be unable to walk without staggering. Having seen in a Toronto paper your remedy advertised, I procured through my sister, a bottle of your medicine. Upon trying it I began at once to mend, and in a short time entirely regained my health, gaining in weight about 15 lbs. To day I am well and hearty, which blessing, under God, I owe (as I think) to your medicine, K. D. O. Yours truly, JOHN D. ROSE, Chautauque, New York.

NOTICE OF ASSIGNMENT. NOTICE is hereby given that Burpee Witter, of Wolfville, in the county of Kings, merchant, did by his assignment date the 1st day of April, instant, assign to me all his real and personal property, whatsoever and wheresoever, in trust for the benefit of his creditors. U. are held every Sunday afternoon at 4.15 o'clock, in the vestry of the Methodist church. All are welcome.

Individual Responsibility in Public Matters. The great difficulty in reform work is concisely stated in the ancient adage, "What is every body's business is nobody's business." In other words, there is an almost total lack of realization of personal responsibility in regard to matters of public interest.

If we urge the passage of a prohibitory law we are informed by Christian men who really desire prohibition, that it is impossible to enforce such a law because public sentiment has not yet been educated up to the necessary standard. If we entreat these same men to demand of their respective political parties a declaration explicit and uncompromising against the liquor traffic, we are assured that it is folly to ask the party to take a stand which would insure its defeat and the consequent sacrifice of other paramount interests. In the meantime said individual seems not at all to recognize their own responsibility in the matter of forming public opinion both within and without their respective parties.

The crying need of the times is for men to recognize the truth of Henry Ward Beecher's statement that every one is responsible for any national crime until he has done everything in his power to overthrow it. The individual voter is partially correct in thinking that he can do little to stem the tide of political evil, he is fatally wrong in concluding that therefore he is justified in doing nothing. If he found himself in a hopeless minority in a company bent on highway robbery, he would not therefore consider himself justified in accepting a stipulated share of the proceeds. This is his precise attitude towards liquor traffic. He might rightly feel it a duty to accompany a band of anarchists as a relief party for fellow creatures who were exposed to death on a wreck, but if his companions insisted upon burning cities on their way, he would justify himself an accomplice in their crime if he continued with them to accomplish the work of humanity which was their ultimate mission, so does he not with regard to his political party.

It is perhaps not to be wondered at that those who are "without God in the world" take such an attitude and disregard their own personal responsibility, but we confess it is utterly beyond our comprehension how one who has a real faith in the real God can thus ally himself with the powers of darkness. If we hold, not as a mere theory, but as an actual fact, to be acted upon as we act upon the law of gravitation, that God rules in the affairs of men and that "one with God" is an invincible majority, how can we for one moment doubt the ultimate triumph of our cause whatever are the forces against us? If we really believe that He will some day call us to account for "the deeds done in the body," so does he not with regard to his political party.

Watch your Weight

If you are losing flesh your system is drawing on your latent strength. Something is wrong. Take Scott's Emulsion the Cream of Cod-liver Oil, to give your system its needed strength and restore your healthy weight. Physicians, the world over, endorse it. Don't be deceived by Substitutes! THE ACADIAN.

WOLFVILLE, N.S., APRIL 13, 1894.

Local and Provincial.

Don't fail to see portraits of Madame and Herr Walther in Wolfville Bookstore window.

A mine named James Ackels was killed at the Tor Brook mines on Saturday by an explosion of dynamite.

Buy your new suit at C. H. Borden's. Mr L. E. Duncanson has sold the house on College avenue extension in which he is now living to Mr C. W. Strong, of Canada.

We understand Mr John W. Harris has purchased "Bay View House" and property from Mrs Henry Brown, and will reside there.

The Humanitarian is the name of the new paper published in Halifax and is devoted to the cause of total abstinence and the advance of the cause of social and moral reform generally.

New Stock Valises and Trunks just received. C. H. Borden.

On Friday last in the House of Commons, Mr Kenny introduced a bill consolidating the Windsor and Annapolis railway and the Western Counties railway under the name of the Dominion Atlantic Railway Company.

A large assortment Men and Boys Caps just opened at C. H. Borden's.

It is announced that owing to the impossibility of obtaining sufficient milk at Nappan for cheese making in April the Dairy School will be held at the Dairy Station at Sussex, N. E. The work will commence April 16th and continue two weeks. Cheese-makers who have worked at the business one year or more will be accepted as pupils free of charge. A School for butter-making will be open at Nappan early in May.

No. 1 Health Readers now in stock at the Wolfville Bookstore.

"Lily of the Valley" Division, Port Williams, is in a flourishing condition. At the last meeting, Friday evening, 6th inst., the officers were installed, and a good start made for the ensuing quarter. The members are talking of building a hall during the coming summer. To raise funds for that purpose they intend holding a Bazaar, Social, and Fancy Sale, on Wednesday evening, 18th inst. All who are interested in the cause of temperance at the "Port" are cordially invited to attend.

Men's Calf Pizzally Hosiery in Black and Tan at C. H. Borden's.

College Hall was well filled last Saturday evening to hear the Old Home-land Quartet, and all the anticipations respecting these popular artists were fully realized. The programme was a "strong" one in a musical sense; every number seemed to be adapted to the fine voices of the singers, and all the selections were rendered with fine effect, the blending of the voices in the concerted pieces being marked sweetness and precision. The audience were more than pleased with the lady reader who is with the Quartet—Miss Alice DeLancy Ghardeau. They were simply delighted with her, and her appearance on the stage each time was the signal for an outburst of applause.

Don't forget that you can buy wrapping paper (right) at the Wolfville Book Store.

Monday, April 7th, of the present year, will long be remembered as the date of the heaviest snow-fall of the winter—a remarkable fact occurring so late in the season. The snow began to fall on Sunday evening and continued falling all night, the wind blowing heavily. The storm continued all day Monday from the north-east, and not until after midnight did the snow fall cease. One of our oldest residents informs us that nothing equal to Monday's storm has occurred so late in the season for sixty years. In Halifax, fourteen inches of snow fell, on the level. Dibley Pier was completely destroyed, and despatches from Amherst, Moncton and St. John state that business was practically suspended in those places. On the New England coast the storm raged heavily, several wrecks being reported.

Ask to see the latest styles in Four in Hand Ties. Bows in great variety. Largest stock in town. C. H. Borden.

Check your Indigestion, with R. D. C. the Great Checker.

SEEDS!

CROCKERY, CHINA, and GLASSWARE.

Spring Stock. Cases and barrels opening this week.

DINNER SETS, TEA SETS, CHAMBER SETS.

Plain and Fancy China and Glassware in Great Variety. PRICES REDUCED!

Fresh Eggs and Batter wanted. Open Evenings. Telephone 37. R. PRAT. Wolfville, April 4th, 1894.

Port Williams.

[The following items were intended for last week's issue, but came to hand too late.—Ed.]

Spring brings many changes as the following will show. W. P. Farnsworth has taken the house on Belcher street, owned by Bedford Chase. Charles Lockwood occupies the house vacated by Mr Farnsworth.

Wm. Reid has moved into the Benjamin house on Main street. John Devine is now living in the Clark house, Belcher street.

The farm on Belcher street owned by Dr Fullerton has been purchased by Capt. Hibbert of Yarmouth. After ploughing the sea so many years, we wish the captain success in ploughing land.

Miss Minnie, daughter of Capt. Rugan has bought the Sangster property on Kara street.

Vessels are again entering this port. The "Packet" arrived Mar. 30th, with general cargo for Halifax and Harvey. The "Cygnus," Capt. Dalton, arrived 4th inst. She will be laden with laths for Boston.

The hall given on the 26th ult, by Mr and Mrs O'Kay, was pronounced a success.

Messrs Ilsey and Harvey are improving the interior of their store by a coat of paint.

The members of the Lily of the Valley division have organized a sewing circle to aid in raising funds for a new hall. They realized about \$25.00 from the picnic held Tuesday, 27th ult.

To Let.—Dwelling House situated on Wolfville Ridge. Apply to Mrs W. A. Cleveland.

Rational Memory Training. A series of articles on the subject of memory training from the pen of Principal Austin, M. A., of Alma College, has been issued in book form. They make an interesting book of 12 chapters, 124 pages, and will be invaluable to students and all who desire to improve their memories. The volume costs only 25c. and may be had of The Journal Co., St. Thomas, Ont.

FOR SALE.—A good working mare, 7 years old, weight about 1300 lbs., also "Black King." Also a quantity of good Seed Oats. Apply to ALBERT MINER, Wolfville Hill.

Best \$1.00 Unlaundried Shirt ever offered. C. H. Borden.

Born. HARRIS.—At Wolfville, 3rd inst., to Mr and Mrs O. D. Harris, a son.

Married. NEWCOMB.—At the Methodist Episcopal church, Canada, on the 4th inst., by the Rev. W. Dawson, Byron Newcomb, of Centerville, and Bessie, eldest daughter of D. McQuib, Esq., of Sheffield, Minn.

Died. HARRIS.—At Wolfville, 9th inst., Blanche, beloved wife of O. D. Harris, aged 27 years.

COLEMAN.—At the residence of her nephew, T. W. Mills, Esq., Woodville, on Wednesday, April 4th, Miss Annie Coleman, aged 93 years.

RAVEN.—At Canby, March 25th, after a short but serious illness, Annie R., second daughter of George P. and Decidiana H. Raven, aged 30 years.

HARRIS.—At sea, March 9th, on the voyage from Sydney, N. S. W., to London, Sabre, wife of Capt. T. H. Harris and daughter of the late Capt. Benjamin Woodworth, of Grand Pré, aged 50 years.

TO LET. House on Kew Street. Apply to L. E. DUNCANSON. Wolfville, April 12th, 1894.

Wolfville, March 1st, 1894.

The Characteristics of Feeding and Breeding of Cattle.

A PAPER READ BEFORE THE MEMBERS OF THE UNION AGRICULTURAL SOCIETY, OF CORNWALL, APRIL 23, 1894, BY A. G. GODDARD, OF GRAND PRE.

The Genus Bos, or Ox Tribe dates back to the creation of the world; in the 1st chapter of Genesis we learn that on the fifth day God created cattle; now these cattle, whatever they might have been then, are the ancestors of the domesticated cattle of to-day; we read later on that oxen were used for draught purposes and that the flesh of cattle was used as a food for man.

I am not aware that the cattle in these days were bred for milking qualities; probably not, but merely produced for flesh and toll, for in those days camels and goats' milk supplied that needed article of diet as it does in many parts of the East to-day.

The breeding of cattle for certain objects was evidently practiced at the time of the formation of the Pyramids of Egypt. We will now consider the special objects that domesticated cattle are bred for to-day, first disposing of those which are not immediately connected with our own husbandry here in Nova Scotia.

In domesticated cattle we include those species which have been subjected to improvement by man's hand, not the lion of the Western Plains commonly known as Buffalo and also, nearly extinct; nor the several varieties of wild cattle in Asia and Africa, indeed we can hardly include the white Chillingham cattle of England and Scotland.

We find cattle raised in some parts to adorn parks or other unutilized lands; also for show purposes in menageries such as the Zebur or Brahmin cattle to be often seen in Zoological collections.

The breeding of cattle for draught purposes through an ancient custom is not practiced much in Europe and America as a separate branch in cattle raising. The Devon cattle have been largely used in England for tilling the soil, but their use is gradually being abandoned, and here horses are taking their place, though they will still have their part to perform in the forests of this Continent. Now we come to the main Cattle Industry of the world, the raising of cattle for the sustenance of man, in the production of meat or milk.

Here we have the Shorthorn of to-day, the work of man's hand, the result of careful selection and mating by such men as the Collins, Booth, Bates and in deed Aberdeenshire Shorthorn for largely the work of his hand.

making properties of your stock, and they soon will be like many a fine cow is to-day, incapable of raising a calf. I have seen cows myself that positively could not raise their offspring; this is often the case with ewes but happily not with cattle here; these were show cows mostly I refer to, why they had no udder; this is the result of training for the show ring. I will admit that I have seen sweepstakes cows of beef breeds heavily fleshed that were able to raise their calves but this is an exception. Raise the calves by hand, and if advisable give them whole-milk, but it is not the most profitable way of feeding, especially for the average farmer, but possibly necessary in raising bull calves to push them well forward, but for steer or heifer calves by all means give them sweet skim milk with flaxseed meal or linseed meal in it; heifers thus raised have less superfluous fat on them and are more successful as breeders and mothers and have better milking qualities; never let the calf be with the cow more than two days in the shorter time the better when all is well, and if the cow's udder is inflamed by what is known as garget, rub in well some of the following ointment: 1 oz. powdered camphor, 2 drms. mercurial ointment, 5 oz. lard, all thoroughly mixed together, this is a sure cure for garget every time. It is always advisable to keep bull calves in good flesh though not too much fat on them. You must feed a bull properly, oats are the best grain food and a part peas is better, but not cornmeal, feed roots and hay, give him exercise, here is where they fall so much with parties in the Provinces, with poor feed and no exercise, or, if any to be kicked around the barnyard, hammered with stakes and probed with forks, this is not my idea of proper exercise; if convenient let him out if quiet at nights in a little field or paddock, he will not be then tormented by flies or the heat, feed him during the day in a cool place on grass or some cooling crop wiltered a day or two and some oats for grain feed; a good way to exercise a cow bull is to sink a post in the ground then fasten a pole on the top with an iron pin, fasten a chain or rope to one end of the pole and fasten that into the ring in bull's nose he can then turn either way or walk around the post; in England bulls are often led along the roads for exercise by an attendant. Take care to keep their feet pared so as not to cripple them, this can be accomplished best by "slighting" them, but also with a sharp chisel or axe, or with a saw.

As bulls are very treacherous animals it is best to be cautious at all times, but show him if he acts too precocious that you are his master and the first hint that he means mischief is when I advocate a thorough handling, in fact pounding, but not brutally, one or two blows across the eyes, never anywhere else will generally accomplish what is necessary, never strike his horns or injure his nose, and don't walk away from him but let him show that he has seen enough of you and prefer to avoid your presence; if you carry your pounding too far you will make him shy and nervous, this must be avoided, train the youth in the way he should go, don't leave it till too late for then it is impossible to handle him; but one properly fed, used and cared for ought to see his tenth year before going to the shambles providing he can be changed about so as to avoid inbreeding to any extent. A bull to produce beef stock of early maturing propensities should be low set, deep through the back, broad back with deep loin and broad ribs, plenty of bone (for the butcher's cart) thick thighs carrying the flesh well down, buttocks heavy and full twist, a fine masculine head, broad and not too long, a mild eye, not extra large, a thick neck well set on at shoulders and full behind the shoulder, a loose hide and plenty of fine hair. For a dairy bull we need rather a different character, here we find a high spirited, lively fellow, no slouch like his lovely brother for beef; rather lean looking, but not thin, a fairly level back, high crest, long neck, broad head and nose not too long, large, prominent eyes, with an excited expression or in many cases a wicked look, he must have fine hair and of a silky softness, very loose skin and for the production of butter stock an orange hue or yolk and underneath that a clear pink skin; well sprung ribs, a good wide loin, a long, slender tail with good switch, lean thighs free from beefy buttocks, full in the wrist and a good scutechon; bone rather fine, must be deep through the heart, too many are narrow and slab-sided, I want to see ribs like a barrel, a large heart, girth denotes constitution and a large barrel feeding capacity.

Raise your heifer calves on skim milk, care for them and handle their udders, don't allow them to get too fat, and when calving at 2 years old by all means feed well, and when she matures she ought to be a typical dairy cow, with plenty of length, broad loin, laval back, well sprung ribs, a long, slender neck, with plenty of loose skin and very soft hair, a long face, prominent eyes, with mild expression in them, rather broad between the eyes, if possessing horns, well curved out, and then upwards and turned over backwards medium and rather flat at base; the body inclined to wedge-shaped, high thin, a large udder free from flesh running well forward and up behind with plenty of loose skin and teats well placed, large, knotty milk vein, and navel, loose jointed in back and tail long and slender with heavy switch, bones rather fine and fat.

Keep the cattle clean and free from lice, using insect powder in winter and kerosene emulsion at other times composed as follows: kerosene oil 2 gallons, 3 lb. hard soap, rain water 1 gallon. Boil the soap in the water till dissolved then mix it into the oil and agitate forcibly for five minutes or until it will set in a jelly, this forms the stock emulsion, take one to 18 parts of water.

When the calf is dropped it is as usual with breeders of pedigree "beef" stock at all events to let it suck the dam till weaned at 3 or 4 months old, this is a natural state of things, but can bear attention by man's hand, with nearly the same success, for if your heifer come in at three years old and suckle their calves, you are positively exterminating the

Scraps for Odd Moments.

Ask for Minard's and take no other. A barber has no right to let his wife. Garfield Tea cures sick-headache. A Russian does not become of age until he is 25. Keep Minard's Lintiment in the House. "After all, first sugar's a bore," as the farmer said when he tapped the maple. Garfield Tea is sold by all druggists. "Are you going to speak to her father?" "I am not, I'm afraid he's going to speak to me."

Minard's Lintiment Lumberman's Friend. The butt end of most things is the rear end, says the Manyanuk philosopher; but this not true of a goat. Minard's Lintiment is used by Physicians. It is all right sometimes for a ship to take in a reef at sea, but the old Kearsarge took in one too many.

Why wear out with coughing, at night when Ayer's Cherry Pectoral will relieve and cure? "Have you read the last poem?" asked the amateur versifier, and the weary critic answered involuntarily: "I hope so."

Read all the advertisements of spring medicines and then take Ayer's Sarsaparilla. We are all in favor of minding our own exclusive affairs when an extra unpaid piece of work has to be performed. La grippe, Coughs and Colds yield readily to Hawker's Tolu and Wild Cherry Balsam.

Beaux (at the soiree)—I wonder if that old lady over there isn't really trying to flirt with me. Seddis (politely)—I can easily find out, sir, by asking, She's my wife. Hall's Hair Renewer is pronounced the best preparation made for thickening the growth of the hair and restoring that which is gray to its original color.

Is this coffee? asked one visitor of another. I don't know, was the reply, as the speaker ruefully twined the contents of his cup, but there are certainly grounds for suspicion. If you do not know how good a remedy Garfield Tea really is for constipation and sick headache, send a postal card to D. Denmore & Co., 271 Queen Street, East, Toronto, for a free, trial package.

It is a malade imaginaire whose chief hobby is to get a doctor to visit him every day. A friend called to see him one morning. Well, how are you today? I don't know; the doctor hasn't been here yet. Diarrhoea and Dysentery are perhaps the most common of our every day ills, and every person nearly has some special cure of their own. Ours is Perry Davis' Pain Killer, and having used it for many years we can confidently recommend it. Get Big Bottle 25c.

I beg your pardon, but in this seat engaged? The maiden surveyed him from head to foot and then said, with dignity to which her snapping eyes added emphasis. No, the seat isn't engaged, but I am. He sat elsewhere. Handsome Features. Sometimes a slightly blotchy, pimply or yellow opaque skin, detracts from the attractiveness of handsome features. In all such cases Scott's Emulsion will build up the system and impart freshness and beauty. Mamma—I noticed that you paid very close attention to tel. minister, Robbie. Were you interested, dear? Robbie—Yes, stree. I kept wonderin' how low it would be before he found out that his necktie was above his collar!

A Painter for You. The following letter from L. E. Rolston, of St. John, to the Hawker Medicine Co., explains itself: "A short time ago I was suffering from a very severe cold, hoarseness and cough. I got a bottle of Hawker's Balsam of Tolu and Wild Cherry and it cured me in two days. I feel that every person should know of the remarkable virtues of this remedy." "Friends, have you tried the remedy referred to for that cold or nasty cough?" The man who has time to sit by the stove in the village grocery while his cattle are shifting for themselves on the hills working for dear life to get a nibble of frosted grass to keep them in the one who blames "the government" because times are hard, and he has not enough money to pay for his farm.

When we assert that Dodd's Kidney Pills Cure Backache, Dropsy, Lumbago, Bright's Disease, Rheumatism and all other forms of Kidney Troubles, we are backed by the testimony of all who have used them. THEY CURE TO STAY CURED. By all druggists or mail on receipt of price. Get extra Dr. L. A. Smith & Co., Toronto.
