General News.

The Beecher's East India Linnets.

Ottawa, April 1.—The fruit growers and nursery and seed of Ontario are protesting against the action of the government in agreeing to admit fruit trees, vines and seeds from the United States free of duty.

—For brilliancy and sympathetic light of tone I consider The Newcomb Upright Piano unequalled by any made in Canada.

A deposit of molybdenum has been discovered about twenty-three miles from Chester, N. H. There is thought to be sufficient of the metal to make the material of a profitable investment and a company has been formed to carry on the work.

New York, April 5.—Jacob Sharp, notorious for his connection with the Broadway railroad franchise and 'hoodle' Alderman cases, and who was waiting his second trial for bribery did not appear.

—A novel and very successful method of raising funds was practiced in five city Sunday schools at Haymarket, Ala. The scholars were told that if they could bring a nickel they might bring an egg the next week that Sunday school bore a striking resemblance to an incubating establishment, and the farmers for forty miles around began to contribute the quantity of eggs.

—Three years ago a harsh voiced man, John Steiner by name, stood on State street, Chicago, offering 'twenty-four sheets of note paper for five cents.' To-day he is a millionaire.

—One of the most interesting curiosities in the United States is a piece of mosaic from the floor of the temple of Asclepius, which is preserved in the National Museum at Washington. It is 2,000 years old, and represents a yellow lion in the act of devouring a horse. The lion is made of gold and all are depicted by bits of stone. The fragment is about seven feet square, and is valued at \$25,000.

—Canada has no gold coins, and all the silver and copper coins are made in England at the Royal Mint. In British Columbia it is thought the time has arrived when they should come into use.

—The Victoria paper suggests the coinage of guineas to represent \$5, and half guineas to represent \$2.50.

—About every fortnight last summer and autumn I would be taken suddenly ill. Every thing would turn green before my eyes, and I would vomit bitter gall. My head would ache as if it would burst, and I would be in bed three or four days.

—Maitland, Annapolis Co., March 24, '88. HALIFAX MARKET.—The following quotations are dated April 6th, and are based on the market by Messrs. Mansford Bros., Argyle St. Butter, choice dairy, 20 to 21; butter in rolls, in boxes, per lb. 19 to 20; eggs per doz., 13 to 14; hams and bacon, per lb. 12 to 13; beef, quarters, 5 to 7; hogs, dressed, per lb. 7 to 8; mutton, by carcasses, per lb. 4 to 5; turkeys, per lb. 13; dried apples, per lb. 7; potatoes, 3 lbs. \$1.25; carrots, 1 lb. \$1.15; cabbages, 45; hay, ton, \$14 to 15; wool, 60 to 70.

Ottawa, April 8.—The Ashbury Trust will come up for consideration on Tuesday if Sir Charles' health permits.

It is understood that after careful deliberation the government has determined to continue the steamers and subsidies at present given, for another year. There is considerable pressure to induce the government to accept the offer of a swift Atlantic mail service at a cost of half a million dollars, but the consideration they felt it was better to delay action for another year at least.

"PERRIER" BUTTER.—Prof. L. B. Arnold, the famous dairy expert, says he never judged but one sample of butter which came up to the standard of "perfect." That was one from a dairy whose products sell regularly in Boston for 80 cents a pound. The cream for this butter was raised by intense refrigeration, and kept thus until enough had accumulated for a churning. It was then ripened and churned. When properly prepared the butter milk was drawn from the butter, which was then rolled and pressed into solid condition with the least possible waste.

A terrible tragedy resulting in the death of two persons, occurred at Palmyra, N. B., on the 5th inst. A constable named Farrell, belonging to Shediac, went to Palmyra to collect a debt. He accompanied by a constable named Thomas Bastian. The latter refused to pay, and the constable, after stating that he had a warrant of distress, proceeded to search the Bastian's house. The constable was accompanied by the grocer, and he then shot the constable in the groin, making a wound from which he died a day or two after. Bastian attempted to kill the second time, but was prevented by his wife. He then turned the revolver upon himself and shot himself dead. The people are greatly excited in the vicinity over the distressing affair.

The GREAT MILK YIELD.—Some weeks ago news came of the latest and greatest phenomenal test of a Holstein Friesian cow, or of any cow ever recorded. The animal making the test is Peter's No. 2, 3273—E. H. B., and now ten years old. She imported from Holland. Her first year she produced 13,985 lbs. of milk, and in 1887 she yielded 14,383 pounds. The largest yield for a single day was 112 pounds, 7 ounces; the maximum monthly yield was 3,289 pounds, 10 ounces, for thirty-one days. Her lactation has been the record of Clothilde by over 4,000 pounds. Of the members of her family which remains in her owner's possession is a son now three years old, three daughters aged 3, 2 and 1 year old.

—William Peepers and Mrs. Jane Doyle are being tried in the Supreme Court, Halifax, for the murder of the latter's husband some months ago. Doyle was a farmer, living at Musquodoboit, and Peepers was a laborer engaged on the farm. Mrs. Doyle was much younger than her husband. One day in the summer Doyle was found dead on an old road, three miles from home, with a gunshot wound in the back. The coroner's jury returned a verdict of accidental death, although strong suspicions were entertained of murder. Immediately after Doyle disappeared from home, Peepers and the murderer man's widow were living in improper relations, intimating words dropped by Peepers during conversations with his paramour were heard by the latter's sister, and finally led to the arrest of both.

Atlanta, Ga., April 1.—The penalty of wearing store clothes in Rabun County, Ga., is death. Some time ago the murder of William Thomas in that county was reported. Yesterday one of the murderers, Joseph Hopkins, was brought to this city and he tells a curious story as to why the murder was committed. "Thomas came covering up to the church," he said, "wearing store clothes. He boys did not like to see him in the store clothes, so we concluded to have a little fun. We asked him to take a drink, but he was too uptight to do that. My brother threw a stone at him to see how he would run and he ran sure enough. Then we both ran after him, throwing stones after him, when suddenly he dropped down dead. I am never going to do the same kind of life. But I never did like a man who wore store clothes."

Some time ago being troubled with colds and coughing, I went to the drug store and got Hayward's Peppermint Balsam. In a short time I was well. I have found it superior and am thankful that I used it, and now would not part without it. E. A. Sanchez, Berlin, Ont.

DOMINION PARLIAMENT.

[From our Correspondent.]

Ottawa, April 3.—Parliament having had a recess from last Wednesday till today, the week has been a dull one, but an interesting letter from the Capitol does not depend on the House of Commons, because many sittings of that illustrious body are as dull as a case in Chancery. There is nothing so wearisome as the tail end of a long debate. Fancy listening to forty-two speeches day in and day out on the one topic. As far as the minister who forgot his manuscript in the evening and repeated his discourse of the morning. Some of these heads many occasions are counted on, so few members are in their seats. The comfortably cushioned chairs and the spacious hall in front of the expediting of public business. Here members can sit conducting their correspondence and reading the district papers or a book from the library, the members from Ontario, who are talking to the Harad reporters. In a few days the floor will be secured by a prodigious number of Hansard's constituting speech and mail them to the admiring constituents.

THE DEBATES ARE REPORTED. The official reporters of the Commons are six in number, and are all skilled scribes. They sit at long tables on the floor of the House midway between the Ministerial and the Opposition benches. Their desks are in the Chamber in "takes" of ten minutes. A time-keeper in the debates room sends the first man in when the Speaker rises the chair. The number of the speaker by the way, is announced by the ringing of electric bells in all parts of the building. At the end of the first ten minutes a second reporter enters and sits down at the second table. The first reporter concludes the sentence he is writing, if it is not too long, and then he calls on the next speaker to take up, or takes down the thread of the discourse, relating to the debates room where his manuscript sits at a typewriter. Each reporter has a copy of his notes and in about half an hour the typewritten copy is handed to a man whose duty it is to paste it for the printer. It is deposited immediately to the printer who sets the type for the next day's issue. The copy is then set up, and the printer's work is commenced. The printer's work is commenced, and the printer's work is commenced.

The printer's work is commenced, and the printer's work is commenced.

THE OFFICIAL REPORTER. The official reporter of the Commons is six in number, and are all skilled scribes. They sit at long tables on the floor of the House midway between the Ministerial and the Opposition benches. Their desks are in the Chamber in "takes" of ten minutes. A time-keeper in the debates room sends the first man in when the Speaker rises the chair. The number of the speaker by the way, is announced by the ringing of electric bells in all parts of the building. At the end of the first ten minutes a second reporter enters and sits down at the second table. The first reporter concludes the sentence he is writing, if it is not too long, and then he calls on the next speaker to take up, or takes down the thread of the discourse, relating to the debates room where his manuscript sits at a typewriter. Each reporter has a copy of his notes and in about half an hour the typewritten copy is handed to a man whose duty it is to paste it for the printer. It is deposited immediately to the printer who sets the type for the next day's issue. The copy is then set up, and the printer's work is commenced. The printer's work is commenced, and the printer's work is commenced.

Destitute Children.

"How great a matter is a little brother!" Jas. 3, 5.

A good work of caring for destitute children was commenced by Miss Stott of Edinburgh, in 1877, (just eleven years ago.) At that time there was no provision made, in her city, for the numerous children, who through the sickness or poverty of parents were improperly cared for. Such children were often left in a wretched state; roaming about the streets, locked out or out of houses, as the case might be, and growing up in vice and crime. To remedy this evil, Miss Stott, after some years of study, and conducted alone by Miss Stott, for one year. After this she was aided by noble Christian workers who joined her and endeavored to improve the children.

Later, seeing that many of the little ones often went from the "Nursery" in the evening, to misery, and sometimes to death, their first friend, Miss Stott, no longer remain in the work, unless a home could be provided for their permanent protection. In this way, she was induced to open successfully seven "Homes" for them. But these "Homes" becoming "too small" by reason of the ever increasing numbers, something more had to be done, and this made their friend think of a broad land across the sea, where it would be well to take the strong and favored ones, to aid in all the work of the country. But this plan involved another thought, the children must not be consigned to the hands of strangers without their friends beside them; so a farm and home in Nova Scotia, near Aylesford, Kings Co., was purchased as headquarters for those who had newly landed; where their old friends could look after their interests generally.

This "Home" has now been maintained for two years, and by the hearty cooperation of many friends of children in Nova Scotia, New Brunswick, and Prince Edward's Island, who have been induced to do so, a large number of children have found homes, where it is hoped each one will prove a signal blessing.

Since the late arrival of a party from Scotland the number of children at "The Farm" has been greatly increased. Homes are being rapidly secured for all the largest ones; but there is quite a number of bright little boys of four, five, and six years of age, who would gladden any heart that would open to receive them, and which is bent, the tree is inclined, so it is with these little ones; they now look into the faces of those about them, and learn to think and act for themselves, and are taking them to homes, they can be treated as individual tates. "In as much as you did it unto one of the least of these, ye have done it unto me." You, kind readers, who have your personal friends, consider Him who for your sakes became poor, that you might be rich, and who in the work of ministering unto Him. A FRIEND OF LITTLE CHILDREN.

PROVINCIAL LEGISLATURE. The bill to enable the inhabitants of Annapolis to supply themselves with water, will probably not pass the House this session, owing to the chairman of the committee on private and local bills, Mr. Fraser, reporting in detail to the Legislature, and that time would not permit the committee to remedy the defect, which it would be otherwise disposed to do, owing to the excellent object of the bill, Mr. Fraser also stated that a petition has been sent in against the bill. He also reported that the bill was in the hands of the committee on private and local bills, Mr. Fraser also stated that a petition has been sent in against the bill. He also reported that the bill was in the hands of the committee on private and local bills, Mr. Fraser also stated that a petition has been sent in against the bill.
