Owen Sound

FROM the splendid situation, both from a local and commercial standpoint, one who studies natural advantages peculiar to towns and cities cannot help coming to the conclusion that the town of Owen Sound is destined to become one of the leading cities of the Dominion of Canada.

matter how the wind blows, any vessel can with safety make this port.

*Steam-
ship
Lines*

The following steamship lines make Owen Sound their headquarters: Dominion Transportation Co., Georgian Bay fleet of the Northern Navigation Co., Chicago, Duluth and Georgian Bay Transit Co., and Georgian Bay Navigation Co. It is also a regular port of call for

*Water-
front*

Canadian Pacific passenger steamships. A number of freight steamers are usually in the harbor with cargoes for or from points on the Great Lakes.

The harbor of Owen Sound is large and contains miles of undeveloped waterfront along which the lines of railway run making an excellent point for manufacturing, which is already being taken advantage of by a goodly number of manufactures of iron, steel and wood.

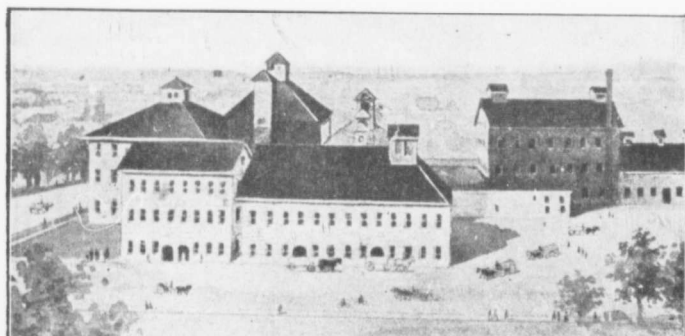

In fact, it is mainly from its advantages as a manufacturing centre that the people of the town expect its future greatness.

These are not all the advantages of Owen Sound.

*Steady
Progress*

It is nearly sixty years since Owen Sound was incorporated as a town. Since the advent of the railways, the growth of the town has advanced steadily and improvements in many respects have kept pace with its growth so that now the town has a practically complete sewer system, about forty miles of concrete walks, an abundant supply of pure

Lemon
Bros.

Health water from a gravitation system, giving splendid fire protection. To the completeness of the sewer system and the pure water is largely due, it is believed, the good health of the people of the town. For years there has been nothing in the nature of an epidemic. For years not a single case of typhoid has developed in Owen Sound.

*Educa-
tional*

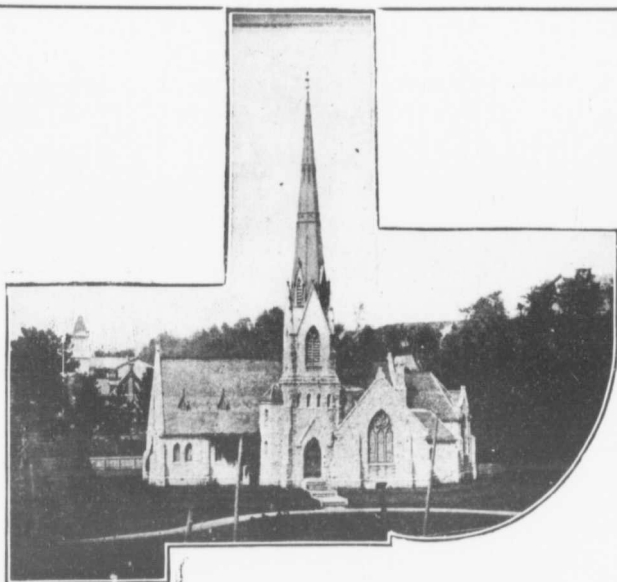

In educational matters, Owen Sound is keeping pace, its public school being modern and efficient, and its Collegiate Institute ranking among the best in the Province.

*Public
Utilities*

The town of Owen Sound owns its own public utilities and is a good example of what can be accomplished by public ownership. The water rate in Owen Sound for a complete house service is only six dollars a

year, the revenue being sufficient to meet all charges for maintenance, sinking fund and interest.

*Light
and
Power
Plant*

The light and power plant is at present steam, of a capacity of nine hundred horsepower. This is to be replaced by power now being developed by the Hydro Electric

Power Commision of Ontario at Eugenia Falls, 36 miles from Owen Sound, where five thousand horse-power is being harnessed for the use of the town of Owen Sound. Delivery of this power is promised by January 1st, 1915. This is the first actual development of power by the Power Commission in the Province and no doubt care will be taken to insure every factor contributing to the best result. This power should be sufficient for many additional factories and no doubt will be taken advantage of.

*Steel
and Iron
Manu-
factures*

For those contemplating manu-
facturing steel and iron products,
we have laid a good foundation.
We have a large steel foundry,
making all kinds of fine steel castings.
A malleable iron foundry, four grey
iron foundries, a bolt and screw
works; all of which would be of
assistance in supplying parts; thus
often saving time and expense nearly
always incidental to bringing goods
from a distance.

*Hydro
Power*

The prices for Hydro power are not yet computed but it is thought that it will be very cheap, especially when the time arrives when the power is nearly all in use. As a considerable quantity has already been spoken for, it is expected that that the rates will be favorable from the start.

A good quantity of gas is sold from the town's plant at \$1.00 per 1,000 cubic feet. The population of the

Growth*

town is now about 13,000 and is steadily growing. To prospective manufacturers, the town is offering such inducements as are consistent with good business, with an eye to the growth and welfare of both the town and manufacturers and any one who contemplates establishing an industry in Canada, we feel sure cannot do better than communicate with the chairman of the Industrial Committee.

*Natural
and
Acquired
Beauties*

Owen Sound possesses great natural beauty especially during the summer months. For twenty years, practically nothing but brick, stone, and cement have been used in the construction of buildings, even of the cheapest class, and this together with the well kept lawns and abundance of shade trees gives the town an appearance of solidity and comfort such as is not usually seen in growing centres.

hardware specialties, built up desk and table tops, office furniture, or any other lines for which the demand will warrant the establishment of a factory.

*Wood
Manu-
factures*

Owen Sound is an ideal point for manufactures of wood, being situated in the centre of a splendid hardwood district and having access to great pine and hardwood forests of the North Shore of Georgian Bay.

*Summer
Resort*

As a summer resort Owen Sound has many attractions, good hotels, fine scenery, beautiful drives and splendidly shaded camping grounds along the shores of the bay. The bay affords good opportunities for bathing and boating. Many cottages adorn its shores.

The Chicago, Duluth & Georgian Bay Transit Co., operating the two largest exclusively passenger steamers on the Great Lakes, has selected Owen Sound as its only port of call on the Georgian Bay. This Company alone land at least 1000 passengers weekly at Owen Sound during the months of July and August.
