### The Assembly Debate.

The debate in the Assembly on the Quebec resolutions, commenced last Thursday afternoon, was brought to a close late last night, after all the best speakers had taken part. The principal speeches on the subject, however, were those of the Attorney General and Mr. Hanington, both of whom spoke for five hours. Mr. Blair in his opening address, appeared to excellent advantage doing credit to his great reputation as one of the best olitical speakers Canada has yet produced. Of course Mr. Blair took strong ground in support of the action of the Conference, disclaiming entirely that he and his colleagues at Quebec were actuated by partizan motives, in seeking the amendment of the act of union. Mr. Hanington's chief object- script. ions were to the removal of the veto newer from the Federal authorities, he reconstitution of the Senate and the proposed financial readjust seat. He spoke with great fluency and his address contained a very large cont of interesting matter. Hon. Mr. Mitchell supported the resolutions from a conservative standpoint making a pointed and clever address to which the House listened with wrapt attention. The other speakers were Dr. Alward, Dr. Stockton, Mr. Wilson Mr. Phinney, Hon. Mr. McLellan and Dr. Moore. The Provincial Secretary onfined himself to the financial question, while Mr. Wilson made a charac ch in which he vigorously sailed Mr. Hanington for attacking for Mr. Tweedie's amendment, the measure to bring about these ends. voting standing 34 to 4, and the main was carried on the same

a flying Western boom, but its daily improvement for the past few months, at first innoticable in many quarters, has now become so apparant, that some merchant has suddenly awakened, purchased real estate at a good figure, and the property owners and citizens generally rejoice in the announcement that there is a decided improvement in real estate. No one can deny that there is lots of room for a boom in that quarter. There was a current saying in this city a short time after the fire, that the sight of an unmortgaged house was worth a dollar, but though that is no longer the case, real estate depreciation, caused many a property holder much uneasino longer the case, real estate depreciation caused many a property holder much unsessiness and discouraged further building. One cause of this has been the emigration—if I may so term it—of St. John people to Portland: When rents advanced in this city, hundreds of poor people decided to move seroes the civic line and enjoy cheaper resideness and pay less taxes. The result is that Portland's population has increased at the expense of St. John, and the proportionate number of vacant flats in our sister city is much smaller than in our own. But this
