

By STEPHEN COOPER
 Student's council is not happy with Versafood Services operation of the Dalhousie canteen. Council president John Young says if council could find another competitive food service the "council would be pushing very, very hard to see that the best company would be awarded the facilities on campus."

He says that in addition to looking for competitive bids the council is also considering the possibility of operating its own food service.
 Young may be disenchanted with Versafood Services but he has nothing but praise for the being done by the manager of the Arts Annex canteen, George Murray Lyons.
 "Lyons does work hard for the canteen. He gives up his time to open up in the evening for Pizza. Lyons even cooks the pizzas made in the evening - he used to be a chef at Dino's."

Young says the idea of selling pizza in the evening is working out well. He said it was because they are a quality product and are the cheapest in town.
 The canteen is also opened for business after each home football game on Saturday.
 Prices at the canteen are set by the university business office but the canteen's manager usually has his way.

Versafood Services take all price change proposals to students council. Versafoods say they believe that the students have a right to help control prices.
 However, it was stressed that the business office has the final say about prices both at the Arts Annex canteen and the Dal men's residence.
 Versafoods rationalizes its higher prices in the annex canteen by saying that there is more staff in the annex which results in "higher operating costs".

Ruffman at CUSO parley

October 13-15th Dalhousie's CUSO chairman on both the faculty and student level were in Ottawa to attend the fifth annual meeting of the Canadian University Service Overseas (CUSO).
 The Dalhousie Council of students sent grad student Alan Ruffman, the campus student chairman and the Dalhousie Administration sent Professor Lionel Lawrence of the English department, the faculty chairman.

Dalhousie was also indirectly represented by graduate student Ken MacKay and by Mrs. Diane Baigent, both of whom are returned volunteers who have been CUSO staff for the past year.
 The meeting was structured to familiarize the campus representatives with CUSO, its bureaucracy, its aims and with the overseas opportunity it offers people with post secondary education. The CUSO program for 1966-67 finances orientation, and selection were discussed.
 Considerable debate resulted when the student chairman presented questioned their role in CUSO. "Have we become merely recruiters for an employment agency?" was the question asked. CUSO was begun in 1961 by a grass roots student movement and people at the annual meeting questioned the campus student role as CUSO grows to 1000 volunteers in 1967. This problem was not answered by the meeting but it was uncovered for future discussion.

Geology meet, Nov. 11-13

The Atlantic Universities Geological Conference - 1966 November 11-13, 1966 at Geology Department, Sir James Dunn Science Building, Dalhousie University & Nova Scotia Technical College.
 SATURDAY, NOVEMBER 12, 1966
 Morning papers in Room 11 - 19 of the Architecture Building at Nova Scotia Technical College.
 9:00 Mount Allison "Geophysical Surveying"
 9:45 St. Francis Xavier "An Examination of the Grenville Project"
 10:30 Coffee Break
 11:00 Nova Scotia Tech. Demonstration and tour of pilot plant.
 12:00 Lunch provided at Men's Residence of Dalhousie (use chit obtained at registration).
 Afternoon papers in Room 117 at the Sir James Dunn Science Building, Dalhousie University.
 1:30 Memorial University "Pegmatite Occurrences in Newfoundland"
 14:15 Acadia University "Problems in Exploration in the Yukon Territory"
 15:00 Coffee Break
 15:30 Dalhousie University "Groundwater Evaluation in the Annapolis Valley, Nova Scotia"
 16:15 University of New Brunswick "A Study of the Mascarene Group, Charlotte County, New Brunswick"

Halifax fraternities: mutual benefit. . .

Beefs galore Hennigar resigns as publicity head

By ELIZABETH SHANNON
 Student Government Editor
 Frank Hennigar, publicity director for the Dalhousie Student Union resigned last night after being bombarded with "beefs" by Student Council members.
 According to Hennigar it is not realistic to produce posters. He said groups would have to produce their own posters and then bring them to the office. A big problem is putting the posters up said Hennigar.
 He asked council members what changes they thought should be made in the Dal-o-Gram. Council suggested less crowding of events and better distribution.
 Hennigar told Council a new editor, Ed Brown had been appointed and "Betsy" O'Brien had been put in charge of distribution and collection of outdated copies.

Rabball Smith, treasurer, asked Hennigar if he thought he could handle the job in its present context. Replied Hennigar: "Well maybe somebody could define it." Smith said this was the problem. It's now October 31st and it hasn't been defined yet.
 Hennigar admitted he wasn't doing a good job, he said he "is out of touch with the people who are the workers, the Sophomores, and with the rest of the students. Said Hennigar, "I don't know what the hell they're doing."

Looking after the mechanics involved in the running of the publicity department and being a good student besides can't be done said Hennigar. He stated that the mechanics would have to be transferred to someone full time.
 He quoted the case of last year's Publicity Director who failed, along with several of the staff.

He agreed the Dal-o-Gram wasn't doing its job and made several suggestions for better handling of it.
 He called for more centralization in order to co-ordinate publicity. He suggested the campus be broken into sections each with a central head. Council suggested that societies look after their own posters.
 After debate which lasted close to an hour on the subject in which Young said "we appear to be going around in circles", Hennigar resigned, and a committee was appointed to set a format for the publicity Department.
 More "beefs" were presented to Council by Ming Tan, Medical representative, on behalf of the Medical Society. Said Tan: "We form 10% of the campus population and that "all campus activities should not be planned as if Med students were non-existent."
 He was referring to the fact

that most of the major activities as well as D.G.D.S. productions take place during the medical students first and second trimester exams. Tan expressed the dissatisfaction of the medical students. He said medical students pay 12.75 in Student Union fees like everyone else and we are not getting our money's worth."
 A few of the complaints Tan made were that only four posters were put up on the "other campus," and there was no Fall Festival publicity put up at all. He put the blame on the Gazette for not properly distributing the papers and on the "exceedingly poor publicity carried out by Student's Council."
 Tan said he couldn't blame medical students who say: "are we always to give and never to receive."
 Because the suggestion to

Lawman Jack Lovett

Sets sights on Pan American Games

Lawman Jack Lovett in a single-oared scull on Lake Banook, Dartmouth. Lovett hopes to gain a berth with the Canadian sculling contingent to the 1968 Pan American Games in Winnipeg. (Gazette Photo-ROSS POPE).

By DAVID DAY
 Associate Editor
 Jack Lovett is a hard act to follow.
 The ice has barely disappeared from Lake Banook, Dartmouth each spring, when he starts daily racing practices at dawn in a 20-foot single scull, in preparation for summer competition.
 In mid-February, he has spent lunch breaks running between the Studley and Forrest campuses in sub-zero temperatures for physical conditioning.
 Over in the Dalhousie gymnasium he lifts weights three times, weekly.
 He spends summer vacations as a labourer in a Hamilton steel mill and sculls in Canadian and international sculling engagements, (London, Toronto, Buffalo, St. Catharines, Philadelphia).
 To borrow a phrase from an English soccer commentator, Lovett is supremely fit.
 At 23, John Cameron Lovett is reading his final year in law at Dalhousie, presides over the Law Student's Society and nurtures an ambition to compete for Canada in the 1968 Pan American Games.

 One July day in 1863, Lovett's great grandfather, George, raced to victory in the 5-mile Halifax Harbour Sculling championships.
 His Grandfather was a professional oarsman, around the turn of the century.
 From 1930-38 his father, James, was a keen oarsman and one year, he was a member of

the Maritime junior and senior, four-oared championship crew.
 However, Jack Lovett is already outpacing his forefathers as he perpetuates a family tradition in the racing shell.
 After paddling for the Banook Canoe Club of Dartmouth in the local regattas for five seasons (1956-60) he turned to sculling - first in the four-oared shell and later in the single scull.
 In 1963, after three summers of sculling with the Micmac A.A.C., Dartmouth, he made his first appearance in the world series of rowing in St. Catharines at the Royal Canadian Henley. The same summer, he repeated his grandfather's feat of 100 years earlier, by winning the Harbour Sculling championship.
 Today, Lovett can boast the experience of four Henleys.
 Besides, he has travelled to a dozen other American and Canadian centres to meet sculling competitors, including top athletes from the Harvard, Yale and Cornell campuses.
 Next July, outstanding performers at the Henley Regatta will form Canada's contingent to the Pan American Games, in Winnipeg in 1968.
 Lovett is counting on his extensive competition experience and his comprehensive training program to give him a good opportunity to secure a berth on the sculling team.
 Meanwhile, he intends to row in the Centennial Regatta next August at St. Catharines, and

an earlier sculling meet in Philadelphia on July 4th Independence Day.
 "Sculling can be the loneliest sport in the world," admits Lovett, who must log hundreds of training hours in a single scull during the year, "it's also the toughest sport I've participated in" he says.
 As a sometime Junior Varsity football player at St. Mary's (BA, '64) who is currently active in inter faculty football, hockey, track and cycling, he should know.
 Lovett ambles through the new Law School like a fullback on the gridiron, and what's more, he closely resembles one.
 His booming voice and forthright manner brings to mind a stevedoring boss, and stirs the 214-member Law student society to support athletic, academic and social projects undertaken by the school.
 When the society held its annual budget meeting in September, Lovett posted a notice advertising the event, that read: "Budget Day at the Law School, Room 112 at noon. Be there. Remember - It's Your Money I'm Spending."
 His impromptu showmanship and abrasive wit can produce bedlam in the third-year class and at weekly society meetings.
 "Student spirit at the Law School is a vital, commodity" explains Lovett, "and it's manifested in our fine showing in campus activities at Dalhousie in the past."

which includes the construction of four new schools and the enlarging of several others.
 He said the national and international recognition of Dal's medical school has resulted in his receiving several requests for teaching positions.
 The big problem for the Dalhousie school is finding the money to pay for its new building. Recent petitions have gone to the Maritime provincial governments and the federal government.
 Dr. Stewart said there is no plan to change the course next year, but he acknowledged that there is a growing move to expand special training for general practitioners.
 This group usually has one year internship after four years in medical school. With this they must be prepared to meet all emergency and use an ever growing variety of treatments and drugs.
 The new scheme will provide a special two-year extension study course. Two such schemes will soon be in existence at the new med school in Calgary and at the University of Western Ontario in London, Ontario.
 Dalhousie will establish a scheme that different type scheme for the same purpose. It has been given senate and faculty approval but lacks the space and staff this year. There is no intention of making it compulsory.
 The new school will house 700 full-time and 700 part-time students. These include classes in nursing, physiotherapy, dental hygiene, pharmacy, physical education and some graduate studies.
 The old medical building will be remodelled for September and given to the pharmacy department. Their space in the Forrest Building will be given to the biology and oceanography departments.
Radio station starts soon
 Dalhousie now has its own radio station. According to Rod MacInnis, president of the radio society, there was "a tremendous response at our first meeting".
 MacInnis and the vice-president approached radio station CHNS and arranged for an initial one-hour FM program to be heard weekly for a ten week trial period. "We will graduate from that to AM, then to closed circuit and then to our own station," said MacInnis.
 The program will consist of about 75 per cent music geared to young people between 18 and 25. It will also include 1-3 minute commentaries of a documentary nature.
 "CHNS will give us the world - their facilities, library - the

Press reports said university fraternities are bad influence...

Little evidence to justify criticism of fraternities

By The Gazette News Department
 Two weeks ago The Halifax Mail Star published a report headed "Frat Houses Said Bad Influence." The newspaper was reporting remarks made by recently-re-elected Halifax alderman Gordon Black.
 Immediately there were protests from graduate and undergraduate fraternities in the city criticizing the alderman for his statements regarding noisy, partying students.
 The alderman, a fraternity member himself, then attempted to clarify his position, explaining that he did not want to be regarded as opposed to fraternity activities, but said that he had received a telephone call from a Halifax homeowner complaining about a noisy band playing at a nearby fraternity.
 Reporters from The Dalhousie Gazette have tried to ascertain the extent of opposition to fraternity activities - by interviewing citizens living near fraternities, the Chief of Police and fraternity members and non-members.
 Their findings appear to indicate there is little justification for condemnation of Halifax fraternities.

Alderman Black states position

By ALEX PETT
 Gazette News Staff
 next door to her in a fraternity house.
 Alderman Black said he was a fraternity member himself and sympathized with those who were annoyed over the derogatory attitude of the article towards fraternities.
 "I don't blame them (fraternity members) for getting upset," he said.
 "Let me assure you that I enjoy a party as much as anyone and the detrimental remarks about fraternities attributed to me in the article were completely unfounded," he continued.
 "Maybe," he said however, "the boys could keep down the noise and try to be considerate of their neighbors."

... and social enjoyment

"...bloody nonsense"

Dean Stewart won't be alone on 15th floor

By BEVERLEY HARNISH
 Gazette News Staff
 "That is bloody nonsense!" This was the reaction of Dr. C.B. Stewart, Dean of Medicine, to the rumor that he will have the entire 15th floor to himself in the new Sir Charles Tupper medical building, which is now under construction.
 He explained that on the top (15th) floor there will be the offices of the administration. These include the dean's office, the assistant dean's office, director of staff of post graduate studies, office of the medical society of Nova Scotia, faculty council room, faculty lounge, and a relatively small lecture room of 50 to 60 seats.
 Dr. Stewart says his office is about 15 by 15 feet and "nothing luxurious."
 The -15-floor complex is broken down into about two floors per department, with one re-

search lab and one teaching floor.
 The departments represented are physiology, pharmacology, bacteriology, biochemistry, anatomy, pathology and a library.
 The first floor of a two-story extension, that runs toward University Street, houses a large student lounge, four lecture rooms, and a lunch counter.
 The second floor contains 200 private study cubicles complete with desk and locker. These are available to students without suitable study areas at home.
 The cubicles are signed out for one year at a time and can be used for full-time or occasional studying. The system is designed to free students from having to conform to set library hours.
 Dr. Stewart said there will be some problems in staffing the new teaching hospital but they should not prove serious. He said the shortage is the natural outcome of the current building boom,

which includes the construction of four new schools and the enlarging of several others.
 He said the national and international recognition of Dal's medical school has resulted in his receiving several requests for teaching positions.
 The big problem for the Dalhousie school is finding the money to pay for its new building. Recent petitions have gone to the Maritime provincial governments and the federal government.
 Dr. Stewart said there is no plan to change the course next year, but he acknowledged that there is a growing move to expand special training for general practitioners.

 The old medical building will be remodelled for September and given to the pharmacy department. Their space in the Forrest Building will be given to the biology and oceanography departments.

Police on frats

By ROBIN ENDRES
 News Editor
 Halifax Chief of Police Verdun Mitchell said that the general policy taken with fraternities was to see that all laws are obeyed. He said there were frequent complaints, mostly from one source, a resident in the area. The complaints are mostly about what he termed "rowdys m", caused "most from drinking, but that's my own opinion". All complaints are followed up by police.
 Asked if some fraternities

Dalhousie's new library...in 18 months

This is what Dalhousie's new library is expected to look like when it is completed in about 18 months time. The size of the

five story building can be seen by comparing it to the scale model of the chemistry extension

which appears in the left corner of the picture. Plans call for the new library to contain 1-million

volumes by 1985. The new facilities will not house the medical, law or special science collections.

the campus

Dal, \$250 richer

Scholarship won by Tech student

Dalhousie University is \$250 richer because a student at the Nova Scotia Technical College won a \$500 scholarship from the Zeta Psi Educational Foundation.

The odd twist resulted from Zeta Psi being a Dalhousie fraternity, and not a group involved at the technical college. And when a scholarship is awarded to a student who is a member of Zeta Psi, the university where the local fraternity has its headquarters, receives a donation.

In this case, the student is Dale Retallack, of 36 Clearview Crescent, Dartmouth, a Dalhousie graduate now at the Nova Scotia Technical College. At the 119th annual convention of Zeta Psi held last month in Los Angeles, he was awarded the \$500 scholarship from the fraternity's educational foundation, as were other students in Canada and the United States.

At a ceremony at Dalhousie University, a cheque for \$250 -- to be used for any purpose the university desires -- was presented to Dr. Henry D. Hicks, the president, by John Wentzell, president of Zeta Psi at Dalhousie.

Mr. Retallack, taking his MSc in mechanical engineering at Nova Scotia Technical College obtained his diploma in engineering and his BSc from Dalhousie in 1965.

Spanish Dept. offers films

Dalhousie University's Spanish department will offer a series of films dealing with different aspects of Spanish culture during the current academic year.

The series, open to students, faculty and the public, will begin on Nov. 8, at 8 p.m., in Room 304 of the Sir James Dunn Science Building.

The films will include Malaga and its Sunny Coast, Bullfighting Goya style at Ronda, New Religious Architecture, and Extremadura: Origin of Explorators.

Gale lecture, Nov. 4

Professor Richard M. Gale, associate professor of philosophy at the University of Pittsburgh, will be a guest of Dalhousie University's department of philosophy, on Nov. 4, when he will give a lecture on the objectivity of time.

The lecture will begin at 8.15 p.m. in Room 135 of the Sir James Dunn Science Building.

Prof. Gale, well-known for his writings on time, is a native of New York City, and has taught at New York University, Hunter College, Vassar College, and, since 1964, at the University of Pittsburgh.

He has written two books about time, and is the author of many articles and papers.

Folk Mass

"The Mass should be a cry of joy and thanksgiving," says David Maxwell, Spiritual Chairman of the Newman Student Association. In order to emphasize this dimension of joy, the Newman Association is having regular Folk Masses, the first of which will be on Sunday, Nov. 6, at 7:30 p.m. The Mass will be celebrated in the round church on stilts attached to St. Vincents Guest House, beside the Newman Hall on Windsor St. There will be a dance in the Hall after the Mass.

Residents assess frat conduct

Fraternity Debate

Continued from Page 1

How do Halifax residents look on fraternities. During a safari to the homes of citizens living in the vicinity of fraternities, Gazette reporter Gay MacKintosh gleaned these comments.

SIGMA CHI - MRS. HOWAT- We were all young once. I didn't have any trouble with them last year. But one night this year I had to call the police at 4:00 A.M. - on a Sunday. My husband is Church organist and he needs his sleep. The Police came down in 10 minutes and quieted them down. I also think that they shouldn't squeal their tires as they go away. All you can hear is the dum dum dum of their drums and they should be more considerate when they leave on Sunday morning.

PHI DELTA THETA - MRS. GILL I have no comment to make except that they're pretty good on the whole but do get wild on party nights.

MRS. LITTLE -- They do make a noise as I have heard so many people say. Quite loud with their 'Beatie Songs.' One night one boy walked into the house - walked all

around and when he saw us he said "I thought it was open house." Then he left.

ZETA PSI - MR. McLENNAN They've been better lately I must say because there is a certain amount of pressure on them by the neighbours and the police. You can play music that is audible to people in a house without it sounding along the whole street.

PHI KAPPA PI - MRS. R. MURRAY I've got nothing against them. They've got to live. They have their little parties on Saturday night but its only one night a week. I have complaints from neighbours coming to the door. I've been here for two years and if I go to bed, I go to bed to sleep and they don't bother me once I get there. The way I look at it, they could be out on the street making a lot more trouble. It's good that they have a place to go.

PHI CHI Things hve changed since I was a graduate of Dalhousie. I suppose a few years ago a house mother could take care of the noise but I don't know about the system now. Maybe they can't afford them. I wonder if this is the trouble. The neighbours say that they keep it up till 2:00 but I go to sleep and miss the get away. They're certainly very nice boys all that I've met, I'd be happy if they'd just keep the grounds clean, get rid of that boat in the back and not make so much noise on Saturday nights. They told me I could phone in and tell them it was getting too noisy.

MRS. K.L. DAWSON: I don't hear the noise of the fraternity. I have heard they are noisy. I worked in one for two years and left because of the noise but I have no complaints because of the noise here-they've never bothered me.

TAU EPSILON PHI TE Miss Clara Bellefontaine, a person who has been making quite a fuss was indisposed at the time but I got the word from

Daddy Bellefontaine. The noise of the drums upset her and she can't sleep. If they didn't have the drums she wouldn't mid at all. She is now indisposed because she has a headache. She is trying to get her sleep during the day because she can't get it at night.

PHI KAPPA PI - MRS. R. MURRAY I've got nothing against them. They've got to live. They have their little parties on Saturday night but its only one night a week. I have complaints from neighbours coming to the door. I've been here for two years and if I go to bed, I go to bed to sleep and they don't bother me once I get there. Calgary, Alberta offering careers in

PETROLEUM EXPLORATION

will conduct campus interviews on November 16 and 17

for POST GRADUATES - GRADUATES - UNDERGRADUATES

- Honours Geology -Permanent and summer employment in geology
- Honours Physics -Permanent and summer employment in geophysics
- Engineering Physics -Permanent and summer employment in geophysics
- Maths-Physics -Permanent and summer employment in geophysics

ARRANGEMENTS FOR PERSONAL INTERVIEWS MAY BE MADE THROUGH THE STUDENT PLACEMENT OFFICE

DU PONT OF CANADA EMPLOYMENT INTERVIEWS

Our representatives will be visiting the campus the 14th and 15th of November to interview graduating and post-graduate students in the following disciplines who are interested in a career in industry:

- Regular Employment:** Chemistry and/or Physics General Science Statistics Commerce Mathematics

An interview appointment can be made at your Placement Office on campus where you may obtain position descriptions and information about the Company. If supplies of these are depleted, please fill in the coupon below and forward to us for immediate attention.

Summer Employment: 3rd year students in engineering who are receiving their diplomas in 1967 will be considered for summer employment. In addition, openings exist for students in Commerce or Business Administration, one year from graduation.

DU PONT OF CANADA Personnel Division, P. O. Box 660, Montreal, P. Q.

Dear Sir:
Kindly forward immediately information on openings for 1967 graduates and a copy of your booklet "From University to Industry with Du Pont of Canada".

The Government of Canada needs creative young university science graduates, with training in the fields outlined at the left, who are interested in a career promoting, regulating, inspecting, developing and managing Canada's national resources and in so doing directly serve and contribute to Canada's growth and prosperity.

Representatives of the Government of Canada will be on this campus November 16 - 17, 1966 and are most anxious to discuss the career opportunities that are available to you, Canada's newest graduates.

See your placement office for your copy of our new careers booklet and an interview appointment.

THE CANADIAN METEOROLOGICAL SERVICE

offers professional careers to bachelor graduates in **MATHEMATICS -- PHYSICS** (GENERAL, MAJORS, and HONOURS COURSES)

as **METEOROLOGISTS** - (about 15 graduates required) Successful candidates are enrolled, at full salary, in a 2 year Master's degree course in Meteorology at McGill University, the University of Toronto, or the University of Alberta (Edmonton).

and **METEOROLOGICAL OFFICERS** - (about 50 graduates required) Successful candidates are given a 7 month in-service training program and then posted to the various civilian and National Defence weather offices across Canada.

These opportunities offer good pay, challenging work and numerous employee benefits.

INTERVIEWS ON CAMPUS: NOVEMBER 16 and 17, 1966

Full details, applications and interview appointments available at your Placement Office.

Prominent speakers to lecture here

The Theatre department, philosophy, political science and medical faculties are sponsoring a series of lectures next week.

Theodore Hoffman, director of the theatre program at New York University, will be a guest of Dalhousie University's department of English on Nov. 18, when he will give a lecture on *The Theatre and The Intellect*.

Mr. Hoffman, whose lecture will begin at 8.15 p.m. in Room 215 of the Chemistry Building, has written and edited documentary films. He has been director of the theatre and chairman of the arts division at Bard College, and head of the department of drama at the Carnegie Institute of Technology. He has also taught at Berkeley, Oxford, Stanford,

and the University of Minnesota, and has served as chairman of the theatre communications group and as associate editor of the *Tulane Drama Review*.

Professor D.W. Stairs of Dalhousie University's political science department will deliver a paper entitled, *Confronting Uncle Sam: Two Case Studies*, at the University of Toronto, on Nov. 4. Prof. Stairs, who will speak to the University League for Social Reform, will analyse Canadian-American relations in the light of two case studies - Canadian relations with Cuba and Canada's role in the United Nations temporary commission on Korea in 1948.

Dr. Richard M. Gale, associate professor of Philosophy at the

University of Pittsburgh and well-known for his writings on time, will give a public lecture entitled, *Objectivity of Time*, at Dalhousie University on Friday, Nov. 4.

The lecture, which is being held under the auspices of Dalhousie's department of philosophy, will take place at 8 p.m., in Room 135 of the Sir James Dunn Science Building.

Author of a number of publications and articles he now has two books - *Readings in the Philosophy of Time*, and *The Language of Time* - which have been accepted for publication next year.

Dr. Gale's articles have appeared in philosophy journals, reviews and quarterlies, in-

cluding *Philosophy Phenomenological Research*, *Mind*, *Monist*, and *Analysis*, and forthcoming articles will appear in the *Encyclopedia of Philosophy* and the *Australian Journal of Philosophy*.

The postgraduate division of Dalhousie University's Faculty of Medicine will hold its 40th annual refresher course in Halifax Nov. 21 to 24.

Special speakers will include Dr. Lloyd D. MacLean, professor of surgery at McGill University, who will deliver the John Stewart Memorial Lecture;

Dr. Bram Rose, director of the division of immuno-chemistry and allergy at the Royal Victoria Hospital, Montreal;

Dr. Percy E. Ireland, chairman of the department of

otolaryngology at the University of Toronto; and

Dr. Alan M. Mann, of the department of Psychiatry at McGill University.

Registration will take place at the nurses' residence auditorium of the Victoria General Hospital, beginning at 8.30 a.m. on Nov. 21.

This will be followed by the first of the small group clinics to be held each morning 9 a.m. to 12.30.

There will also be afternoon sessions in the VG nurses' residence auditorium, and other sessions will be held at Camp Hill and the Children's hospitals. Socratic luncheons will be held each day of the four-day course.

Dal students support university fraternities

How do the students on campus regard fraternities? Widely varying opinions about the value of the organizations were expressed during an interview with a number of students both members and non members.

LINDA GILLINGWATER
Gazette Staff

HUNTER EARLE, TONY HIGGINS, DAN REID

We're all Phi Rho members. We're a little different in as much as we are a professional fraternity. It gives a chance to meet upper classmen so that we have associates when we graduate. Its big value is social. We are more closely knit than other fraternities because we are all in the same class for four years. If we have a problem then chances are that another member can solve it. This is a big factor; as an undergraduate everyone takes a different course and consequently you aren't as closely knit.

Activities? Well we have professional nights in which we show movies and sometimes have a doctor speak to us. We also have community activities. We give parties for underprivileged children and also canvas for the heart fund. Twenty five guys or so can live in the house that we have; it is a good cheap place to live.

Trouble with neighbours? No, absolutely not. In fact they send us congratulations; they think that they are privileged to have us in the neighbourhood.

DAVE DARES
I don't know too much about fraternities. I haven't thought too much about it. Beyond the fact that they provide a ready made party every Saturday night I don't know what else they provide. They say they have advantages but I'm not sure that I see any. All I hear are their drunks. One bad thing about them is that they produce loyalty to the fraternity and not to the college.

TERRY DeWOLF
Fraternities aren't for me personally. I don't need it. Fraternities act as a womb for its members. They might enjoy it but it doesn't appeal to me. They are an isolated group serving their own ends and not those of the campus as a whole. For the people who want them, they're fine - they are no worse than any other kind of club. If you don't like it you just don't have to join.

BARB DICKSON
I'm not interested in joining this year. I don't even know what it is. I guess that it's a group of kids who get together and have to be voted in by everyone. I flunked out last year and I'm not giving any time to anything except my studying this year. It wouldn't matter to me if the guy I went out with was a fraternity guy; it's basically the person and not the place that you are being taken.

DONNA WILLIAMS
Just from what little I've heard

it's too time consuming and too much money. I don't know what they do. Everything is kind of secret. Why this should be I don't know; it irks me.

ANNE WILSON
If I knew more about it I might be interested. It's limited to a certain clique. You get the impression that anyone could join and everyone can't. They go into your background and if you aren't the type of person they feel they want then you just don't get in.

JANET BECKWITH
I belong to Pi Phi. It's a place to call home on campus, a place to belong to and to meet new people. Dal is a big place and you feel kind of lost in it unless you are an outgoing person. It gives me an identity I couldn't otherwise have. You can belong, and so can anyone else, as long as you don't have a terribly black name.

Cost? Well it's something that I want badly enough so that I'll make room for it. I don't care about out secrecy. The Mason's

can't say anything. There are a few things that we like to have among ourselves. I'm not sure what I'm supposed to say but I guess it's safe to say that our aim is friendship with mankind in general. We're running the canteen in the rink this year you know. Before criticizing you should look into it yourself.

BILL STICKNEY
I don't belong to one on campus. They are an asset generally. They provide you with a basis to go by; this campus is so apathetic and transient that you don't get to know many people. I guess that it's chief function is to enable you to get to know people. They have a very positive effect upon campus life but most people don't realize it because they are too ignorant. All the Sigma Chis go to the football games; they emphasize participation to a much greater extent than the campus as a whole.

Noise created? Well I guess that it's a valid criticism against any group of kids that get together.

Student wives' to re-organize club

Coffee party and organizational meeting will be held at Shirreff Hall on Wednesday, November 9th, at 8 p.m. for all students' wives. It is hoped that this club will soon be active on campus. The aim will be to promote acquaintance among the women associated with Dalhousie and to introduce the students' wives to the university community.

It is thought that the membership will be made up mainly of wives of undergraduates and graduate students. We do not intend, in our thinking, to leave out the professional faculties, but it is noted that Law, Medicine, and Dentistry already have their own successful students' wives organizations. However, the club will be open to wives of all Dalhousie students and would welcome these members should they like to attend also.

It is thought that a planned program will be held once a month, dealing with topics of wide interest, such as interior decoration. From this main body, smaller interest groups can be set up to meet more frequently. Interest groups may include such areas as bridge, curling, books,

foreign cooking, and handicrafts. To ensure the continuation of the club from one academic year to the next, the executive and program chairman would be elected in March of each year.

If you are working through the day, or home with small children, or a student yourself, come and meet others in similar situations and make some new friends. Come to Shirreff Hall, Wednesday, November 9th, at 8 p.m.

What every Canadian boy should know

Maritimers are narrow minded. For that matter, so are Westerners. This is just another way of saying that regionalism is a disease common to the whole of Canada. It is so far advanced that in these last two months before we begin continental celebrations, the condition indicates the melody is incurable. Canada may well be a 100-year-old nation. On top of this they have the added burden of having to give leadership to the rest of Canada and receiving nothing in return for their "Ontario know-how".

In Western Canada - better known as English Canada - you quickly learn the correct view of Canadian affairs. The West is the promised land, and all that has held it back for the past 50 or 60 years is Eastern federation. And today everyone knows there where no one has been satisfied since Confederation. It is a giant conspiracy plot to retard the growth of the region. It is spearheaded by you are from British Columbia you might draw the line just the other side of the Rockies.)

There is no reason to doubt the "World". It is preached to you by everyone. School teachers frighten little children with stories about the Gyres of Toronto's Bay street that bleed farmers, give away grain and raise freight rates.

Now that Western Canada has - sold its "isolation". The idea is to break free of birth right to the United States to develop oil and potash resources - China and Russia have suffered crop failures - the federal government has built the South Saskatchewan whether there are such things as national goals.

In a row, they don't need the rest of Canada. Anyone willing to bet that we will last "Friendly" Ross Thatcher, "Holy" E.C. another 100?

Fall Festival: a lost weekend is found

It was small, but it was there. Dalhousie has found its long lost spirit. Imaginative schemes like the caper pulled off by Dalhousie's "Felon Five," not down and scribble a few meaningless quips on the Gazette office walls. (There was an abortive attempt to steal some silverware from one of the dining halls but it did not come close enough to success to be considered a serious effort.)

The Gazette suggests that next year well-run and attended and people became involved. Dave Firth and Dave Osterow, the organizers of the festival should be thanked for putting together an imaginative program.

Next year should be bigger and better. The only disappointing part of the festival to Acadia could not come with any imagination. It could be exciting.

UN faces test

The General Assembly's vote on South-West Africa last week, declaring South Africa's mandate an end and making the West Africa primarily in the interests of its own white population in the territory to the UN. The UN itself has de-

liberated South Africa. Under the League of Nations mandates, the mandatory power undertook to govern in the interests of the people of the man-

dated area and to prepare them for eventual-ly in the interests of the people of the man-

covered with the same dirt that had been there.

Aid for the constipated: The Gazette is seeking to bring an end to constipated toilet facilities in Halifax. (Gazette photo, BROWN)

Dear Sir,
At a time when our gallant American friends, almost alone, our heads closer to the bottom of the sea supporting the cause of freedom and self-determination of STANFORD.
