Canadian Institute for Historical Microproductions / Institut canadien de microreproductions historiques

C1991

Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/
Couverture de couleur
- Covers damaged/
Couverture endommagée
- Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- Cover title missing/
Le titre de couverture manque
- Coloured maps/
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- Bound with other material/
Relié avec d'autres documents
- Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distortion le long de la marge intérieure
- Blank leaves added during restoration may appear
within the text. Whenever possible, these have
been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.
- Additional comments:/
Commentaires supplémentaires:

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
12X	16X	J	20X	24X	28X

The copy filmed here has been reproduced thanks
to the generosity of:

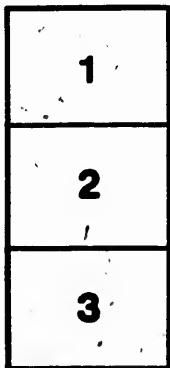

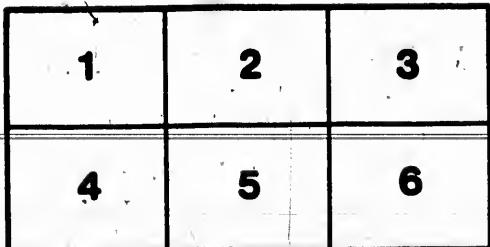

Library of the National
Archives of Canada

The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.

Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back-cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.

The last recorded frame on each microfiche
shell contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.

Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirely included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diagrams illustrate the
method:

L'exemplaire filmé fut reproduit grâce à la
générosité de:

La bibliothèque des Archives
nationales du Canada

Les images suivantes ont été reproduites avec le
plus grand soin, compte tenu de la condition et
de la netteté de l'exemplaire filmé, et en
conformité avec les conditions du contrat de
filmage.

Les exemplaires originaux dont la couverture en
papier est imprimée sont filmés en commençant
par le premier plat et en terminant soit par la
dernière page qui comporte une empreinte
d'impression ou d'illustration, soit par le second
plat, selon le cas. Tous les autres exemplaires
originaux sont filmés en commençant par la
première page qui comporte une empreinte
d'impression ou d'illustration et en terminant par
la dernière page qui comporte une telle
empreinte.

Un des symboles suivants apparaîtra sur la
dernière image de chaque microfiche, selon le
cas: le symbole → signifie "A SUIVRE", le
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être
filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être
reproduit en un seul cliché, il est filmé à partir
de l'angle supérieur gauche, de gauche à droite,
et de haut en bas, en prenant le nombre
d'images nécessaires. Les diagrammes suivants
illustrent la méthode.

AND PRICE LIST.

NESS, McLAREN & BATE

MANUFACTURERS OF

Telephones, Telegraph Instruments,
Annunciators,
Electrical House Furnishings,
and General Electrical Supplies,

MONTREAL.

TERMS:

In order to save time, parties ordering goods who have no account in our books, will please accompany order with cash or references. If preferred, goods can be sent C. O. D. Nominal charges for packages.

We employ experienced packers, and will not be held responsible for damage in transit.

If you wish for any further information, we would be glad to write you fully on anything in our line.

NESS, McLAREN & BATE,
MONTREAL, Canada.

TELEPHONES.

**Do you wish to start a Local Exchange in
your town or village?**

**Would you not like to connect your office
and house, or your house and stable by
Telephone?**

**Would it not save a great deal of time to
have each department of your factory con-
nected by Telephone? or, each floor of
your store?**

We sell these instruments outright.

**Our Telephones are made of the very best
material, and the workmanship is guaranteed.**

**Our aim is to secure your trade by furnish-
ing the best Telephone in the market at
a reasonable price.**

MAIN LINE TELEPHONES.

"LONG DISTANCE" TELEPHONE.

MAIN LINE TELEPHONES.

Our Celebrated Long Distance Telephone, same as our No. 1 Standard, only fitted up with our Mildé Microphone (non-infringing) Transmitter.

Specially good for long distance.

Equally good for short.

Price, complete, with two batteries,

\$18.00.

These Transmitters are giving great satisfaction on all long distance lines in France, Germany and England, and are rapidly taking the lead over all other makes in Canada and the United States.

A trial of this instrument is the best proof that we can offer.

MAIN LINE TELEPHONES.

No. 1 "STANDARD" MAIN LINE
TELEPHONE.

MAIN LINE TELEPHONES.

Main Line Telephone, No. 1.

Standard Magneto, Blake Transmitter, Receiver, Cord and Battery, complete, with automatic shunt, wired up, and ready for use, as shown in cut.

Price, each, with battery,

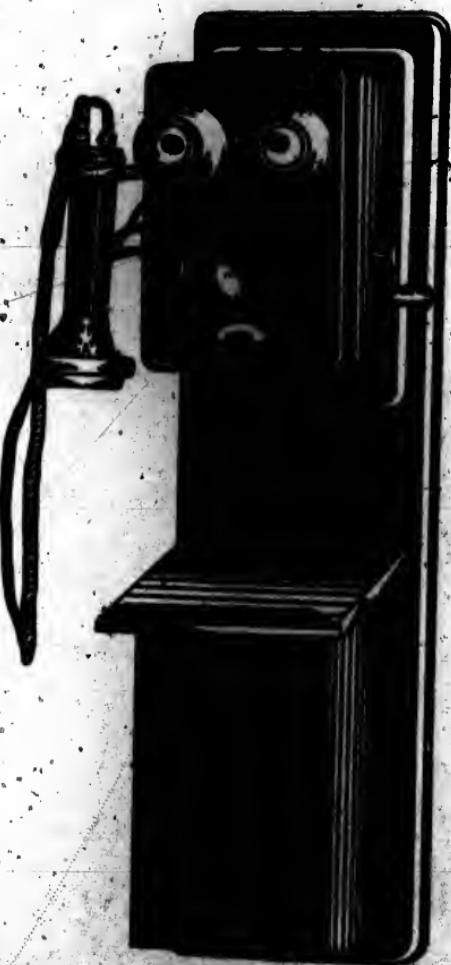

\$17.00.

These instruments are guaranteed to talk over long or short lines, and can be depended on every day in the year.

All our telephones are made of black walnut, unless specially ordered otherwise.
(Extra charge if made up of any other wood.)

We make the best Blake Transmitter in the market, and can furnish them complete in box, or in parts, consisting of castings, drilled and tapped, diaphragms, carbon buttons, platinum points, &c., &c.

MAIN LINE TELEPHONES.

NO. 2nd MAIN LINE TELEPHONE.

ES.

MAIN LINE TELEPHONES.

Main Line Telephone, No. 2.

This is an excellent 'Phone, same as our No. 1, only the Blake transmitter is mounted in the same box with the magneto bells. It is more compact in this form, therefore more suitable for interior work.

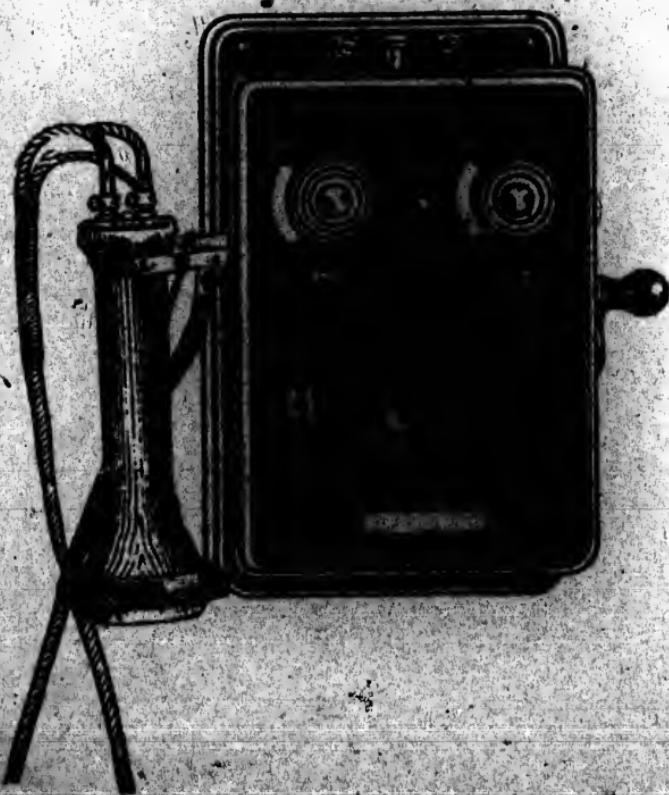

COMPLETE, AS SHOWN IN CUT.

Price, with battery,

\$16.00.

All our telephones can be fitted up with the "MILDÉ" transmitter, but two batteries would have to be used instead of one to give perfect satisfaction.

MAIN LINE TELEPHONES.

NO. 3 MAIN LINE TELEPHONE.

MAIN LINE TELEPHONES.

Main Line Telephone, No. 3.

Standard Magneto and Transmitter combined in one box, without battery-box or backboard.

The battery is placed anywhere conveniently near the instrument, and wired up to the two binding posts at the bottom of the Phone.

Price, complete, with battery,

\$15.00.

With nickel-plated stand for desk,

\$2.50 extra.

These instruments are very popular for private lines, affording a cheap means of communication between factory and office, or store and house.

MAIN LINE TELEPHONES.

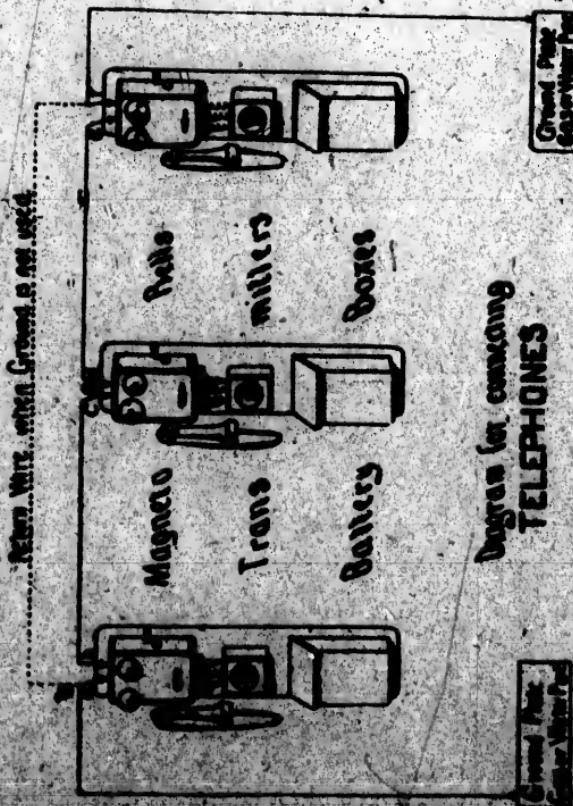

Diagram for connecting our Main Line Telephones.

MAIN LINE TELEPHONES.

Instructions how to connect our Main Line Telephones.

SEE DIAGRAM ON OPPOSITE PAGE.

If only two instruments are to be connected, one wire is to be run from binding post marked b to binding post e, but if more than two are to be connected, they should be wired as per diagram, b to c and d to e, etc. If the terminal instruments are not far apart, the return wire may be run from a to f (as per the dotted line), otherwise a ground connection may be made from a to f. If they are to be grounded on a gas or water pipe, wrap about two feet of bare wire tightly around the entrance pipe, and solder it well to ensure a good connection. If this is not practicable, solder the ends of terminal wires to copper plates, each having a surface of three square feet, and place them three or four feet in damp earth.

For protection against lightning in all instruments, except terminal ones using a ground wire, run a wire from the *centre* binding post "G" to ground, and insert plug in hole between the metal plates during a storm, taking care to remove same afterwards. In terminal instrument, where a wire already runs to ground, inserting the plug is all that is necessary.

CENTRAL STATION SWITCH-BOARDS

Our Switch-Boards are all finely finished in hardwood, natural cherry, and built of the very best materials throughout.

BOARDS

finished
t of the

CENTRAL STATION SWITCH-BOARDS

We do not keep all sizes of Switch-Boards in stock, but usually make them up to order with as many drops as may be desired.

It is well to always order a larger board than you have subscribers for, as the chances are you will, from time to time, add more subscribers.

We furnish Switch-Boards complete or all or any of the parts necessary to make a Switch-Board.

PRICES ON APPLICATION.

WAREHOUSE TELEPHONES.

WAREHOUSE TELEPHONE, No. 11.

WAREHOUSE TELEPHONES.

Warehouse Telephone, No. 11.

This instrument consists of Transmitter, Hook, Receiver, Cord, Battery Box, Battery for Transmitter, Bell and Switch, all mounted on Backboard, and wired for any number of points.

Price, complete, with battery,

\$12.00.

Ringing Batteries, for warehouse telephones, are always charged for extra at the rate of \$1.00 per cell (Leclanché).

These instruments are all prepared for actual use before leaving the factory, the wires having simply to be attached to the

WAREHOUSE TELEPHONES.

WAREHOUSE TELEPHONE, NO. 10.

NES.

WAREHOUSE TELEPHONES.

Warehouse Telephone, No. 12.

This instrument is complete, with exactly the same parts as the No. 11, excepting the battery box, the battery being placed at any convenient point, and wired up to the binding posts at the bottom of the 'Phone.

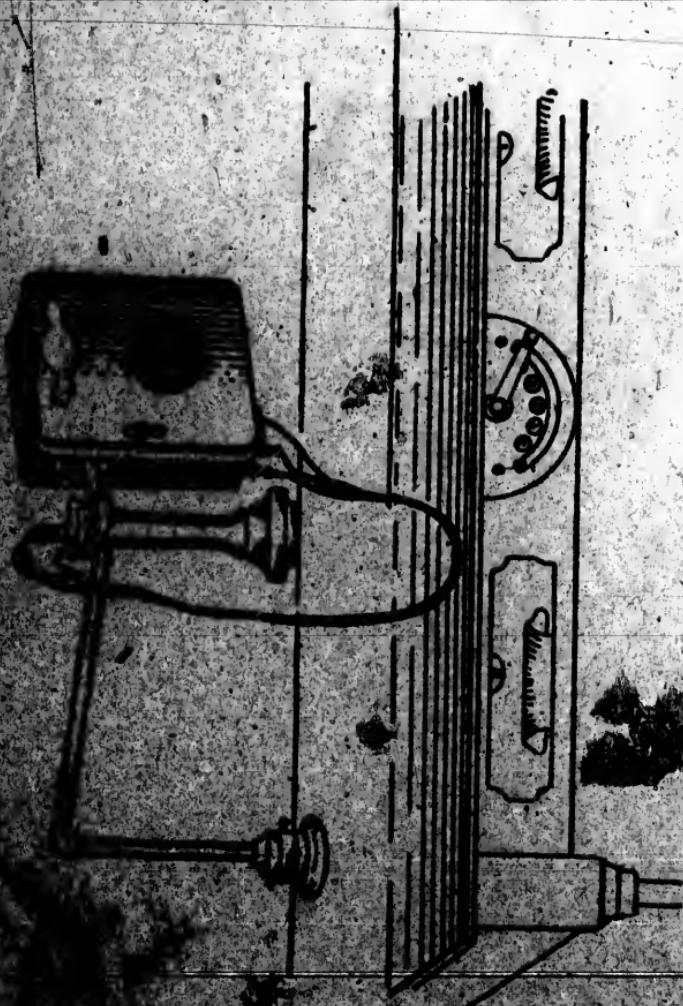

Price, complete, with battery,

\$11.50.

The same system is used in wiring as with the other warehouse telephones.

Each transmitter takes one cell of battery. For calling up, an extra ringing current is necessary of, say, three to six wells, according to distance and number of the circuit.

WAREHOUSE TELEPHONES.

TELEPHONE, No. 13

WAREHOUSE TELEPHONES.

Our Desk Warehouse 'Phone,
No. 13.

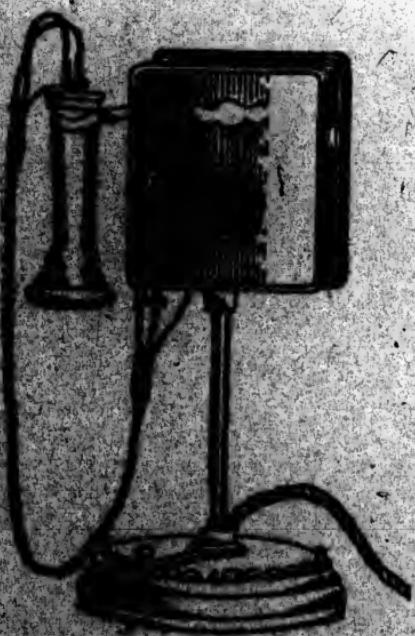

These instruments are a great convenience to business men. They may be attached to wall, table or desk, with a swinging arm, so that, when not in use, the telephone may be turned aside out of the way.

Price, complete, with battery,

\$13.50.

This outfit consists of Transmitter, Hook, Receiver and Cord, mounted on nickel-plated swinging arm, with separate switch for connecting with other instruments.

WAREHOUSE TELEPHONES.

WAREHOUSE TELEPHONE, No. 14.

NES.

WAREHOUSE TELEPHONES.

**Warehouse Telephone,
No. 14.**

A complete instrument with Transmitter,
Hook, Receiver and Cord, mounted on up-
right nickel-plated stand, with switch at foot.

**Price, complete, with battery,
\$13.00.**

These 'Phones are specially designed for
office use, and may be fastened to desk, or
simply attached to end of flexible cord, and
moved about at will.

WAREHOUSE TELEPHONES.

Our "Automatic Return" Warehouse Telephone.

Patented in Canada, - September 12th, 1893.

United States, " 19th, 1893.

PATENT APPLIED FOR IN FOREIGN COUNTRIES.

This instrument, complete, with Transmitter, Receiver and Cord, Automatic Return Switch, Battery Box and Backboard.

Price, with battery,

\$18.00.

The Automatic Return, a very valuable feature, is fully covered by patents.

Made on principle of our ordinary warehouse instruments, but with special attachment, so arranged that switch-lever returns automatically to its own point when receiver is hung up after a conversation finished. You can see the great value of our warehouse instruments.

WAREHOUSE TELEPHONES.

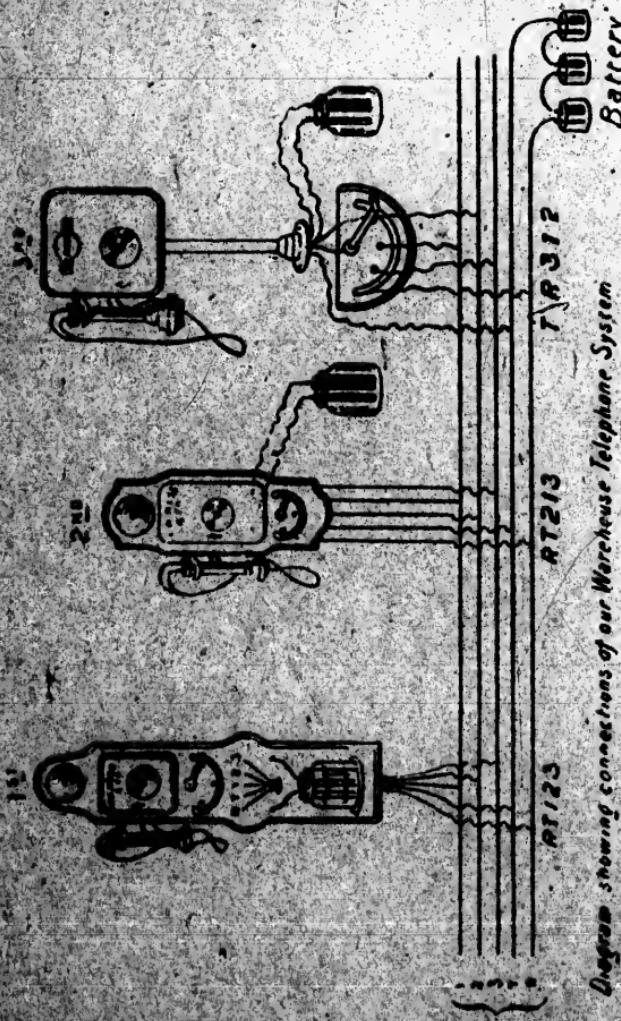

Diagram showing connections of our Warehouse Telephone System.

Free illustrations sent on application for Warehouses Telephones.

NES.

WAREHOUSE TELEPHONE CONNECTIONS.

Instructions how to connect our Warehouse Telephones.

This is the only system that insures thorough connection between different departments.

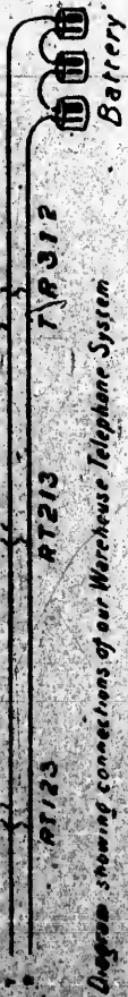

No exchange is required, each instrument having its own Switchboard.

Instant communication is at once procured with the instrument required by turning the Switch to the desired number.

The lines can be used by more than two persons at one time; for instance, with a system of nine instruments, numbers one and three, two and eight, five and seven, four and nine, can converse at the same time.

We use a Cable made up with No. 18 Conductors, covered with office or weather-proof braiding. This Cable must have one wire for each instrument, and also two extra wires for the ringing and talking circuits; for instance, a system of eight telephones would require a ten-wire Cable. This is run around to the different instruments, and tapped into as shown in the diagram.

SEE DIAGRAM ON OPPOSITE PAGE.

TELEPHONE PARTS.

Mildé Microphone, in frame, ready
for mounting on door of Transmitter
box each, \$1.25

Mildé Transmitter, complete, in walnut
case, with long distance Induction
coil each, \$4.00

TELEPHONE PARTS.

The Mildé Microphone Transmitter.

PATENT, NON-INFRINGEMENT GRANULAR
CARBON TRANSMITTER.

This transmitter has taken the lead over all others in the world, and only needs a trial to prove its merits. It is a *sound magnifier*, always in adjustment, and cannot get out of order. You cannot *blow* this transmitter by loud talking, as is often the case with the Blake when too finely adjusted. A shout or a whisper is heard with equal clearness.

Sample instruments sent on approval to intending purchasers. Give it a trial and you will have no other.

FAULTS.

"IN telephonic, as well as in all other systems of electric communication, certain defects, called 'faults,' will from time to time develop themselves, however well the apparatus may have been constructed and erected."

Such faults may be readily located by those familiar with telephonic apparatus, but to the inexperienced the causes may be very difficult to trace: we therefore subjoin a list of the common faults, with suggestions as to their origin:—

1. CAN HEAR BUT CANNOT BE HEARD.—This fault is frequently caused by leaving the receiver off the Switch-hook, after conversation is ended, the neglect resulting in the premature exhaustion of the battery.

2. CAN HEAR AT BOTH ENDS, BUT CAN RING ONE WAY ONLY.—This may result from a weak battery at one end, or the bell at the faulty end may be out of adjustment.

3. CAN RING IN BOTH DIRECTIONS, BUT CANNOT HEAR AT EITHER STATION.—This may result from a broken receiver-cord, or from a disconnected wire in some other part of the secondary (or speaking) circuit, at one end only.

4. RINGING AND SPEAKING ALIKE UNSATISFACTORY.—This may result from weak batteries at both ends, or from a bad joint or bad earth connection.

5. HEARING BAD, WITH RASPING NOISES.—This may result from either of several causes—a loose joint, rust or buckled diaphragm, or excessive battery power in microphone circuit.

NOISES IN ONE RECEIVER ONLY.—This will probably result from one or more particles of iron having been attached to the poles of the magnet, the diaphragm's vibrations being interfered with in consequence. To remedy this, unscrew Receiver cap and wipe off magnet tip.

Badly soldered joints, loose terminals, dirty contacts, broken battery jars, and terminals short circuited, are also frequent causes of local causes.

Line faults may be caused by two or more lines in contact, by the line making partial or dead earth, or by a broken wire or insulator.

LINES IN CONTACT may result in cross talk, and bell ringing when not required.

LINE MAKING PARTIAL EARTH will cause ringing and speaking to be alike unsatisfactory.
