NEWFOUNDLAND.

It's natural aspect, its people, industries, etc.

We are indebted to Mr. W. A. Lewis, barrister of this place for an interesting account of his trip to Newfoundland and Maritime provinces, and have endeavored to present here a brief summing up of his impressions of the country and people and a description of the principal places of interest he visited.

Mr. Lewis' trip was made necessary by the tragic death at Petty Harbor of the late Frank Howard Wing which occurred on April 11th and of which an account was given at the time of the occurrence. Mr. Wing was an expert electrician and his death was caused by accidentally touching a wire that was supposed to be charged with two volts but owing to a storm having disarranged the wires was charged with 15,000 volts, and his death was instantaneous. His remains were interred in St. John's, seven miles away, and his popularity can be measured by the fact that his friends in that city insisted on paying all funeral expenses and have marked his resting place by a beautiful monument suitably inscribed.

The history of the island of Newfoundland dates back to the discovery of America, John Cabot having touched its shores in one of his voyages of discovery. Shortly afterwards the fishing industry was commenced in a small way and until quite recently that was the only industry known to the island. A company got possession of the fishing rights and in order to keep them more secure they had laws passed making it a penal offense for anyone to settle on the island farther inland than a distance of six miles and the result was that fishermen came from England in the spring and returned in the fall and the island remained practically uninhabited. Gradually these laws were removed until a few years ago the island was given the boon of self-government and the development, in addition to fishing, of its timber, mineral and even Agricultural resources have been most marked. The great railway magnate R. G. Reid has completed a railway through the centre of the island with several branches and the result is that the island is being speedily transformed from a barren waste of forest growth and rocky eminences to a veritable hive of industry with ample room for still greater development.

Fishing, of course, is the chief industry and furnishes employment to thousands who live along hundreds of miles of the shore. There are no richer fishing grounds in the world and the fact that fishing has been carried on for four hundred years with no perceptible falling off in the catch leads one to suppose that the supply is inexhaustible so long as the ocean remains. Lately valuable discoveries of minerals have been made which includes almost every kind known. Iron and coal predominate and there is reason to believe that Newfoundland may yet become the great iron and steel producing centre of the world. Asbestos is plentiful and gold and silver have been discovered but as yet of no remarkable richness. The timber wealth is also being utilized, and along the railway and where wagon roads have been constructed farming is being attempted, but under great difficulties. The climate is not severe and the extremes of heat and cold are not so great as in this province, and the growth is very rapid. All this goes to show what energy and capital rightly applied will do and will also help to dispel the general impression that Newfoundland was made last and there wasn't enough to finish it. The island has resources that will make it a prosperous country if the present progressive policy is continued.

The city of St. John's, the capital of Newfoundland, ranks first in importance. Three times has it been devastated by fire and each time it has risen from its ashes more modern and up to date until now the private and public buildings compare favorably with the more pretentious cities of the west. The educational buildings are particularly elaborate but it must be remembered that education is not a free institution, but must be paid for and consequently the more well-to-do enjoy a monopoly of it. Other places of importance are the seaport towns of Harbor Grace and Placentia, both owing their present prosperity to the new life that has taken possession of the island.

It might be interesting to state just here that the question of confederation is a live one. The middle classes are in favor of it while the upper classes are not, which may be accounted for by

that in the event of becoming part of the Dominion their commercial advantages might not be as great. Canadians are usually referred to as citizens of the "Great Dominion."

Sydney, Cape Breton, is a Canadian city that is so situated that it enjoys to a marked degree the benefits of utilizing the products of Newfoundland. It is the home of the Dominion Iron and Steel Company, whose works are of great magnitude. The Company's coal mines are situated within two miles of the works so that there is no big haulage bill to pay. Across ninety-six miles of ocean is Belle Isle, part of Newfoundland, which has been partly purchased by this company and has a practically inexhaustible supply of iron ore. The cheapness of working this mine can be understood when it is stated that it is quarried rather than mined. There is a covering of six feet earth of and when this is removed there is a solid mass of iron ore which is loosened with dynamite and shovelled into cars like coal. This is conveyed across to the works at Sydney and gives employment to hundreds of its citizens.

There are no more interesting people than the quaint Newfoundland fisher folk. Generation after generation has known no other employment than battling with the wind and waves and as a result they are among the hardiest of the sons of toil. This coast has been the grave of many an ocean vessel and many a mariner has gone down "unwept, unhonored and unsung." These people have long since forgotten that it was dangerous and someone going out and failing to return is so frequent as to cause scarcely any comment outside of the bereaved family. Mr. Lewis had the pleasure of fishing for cod and it was an experience he will remember. The ocean was, in the opinion of his friends, quite calm and the swells were not a great deal higher than the Gamble House. On the way out to the fishing ground the experience was delightful and "rocked in the cradle of the deep" was clearly illustrated. After a sail of about three miles the dory was anchored and the lines cast. Then something went wrong. The surroundings took on a peculiar aspect, which however didn't effect the usual rise and fall of the boat. The short trip was as telling in its effects as a trip across the ocean and terra firma was touched again with a certain amount of pleasure.

While in Halifax Mr. Lewis was royally entertained by a former Athenian in the person of Mr. A. E. Donovan, and Mr. J. E. Brown, formerly of Delta. Mr. Donovan drives a beautiful turnout, the animal being a full sister to the valuable buckney stallion that was brought to this section some time ago, and a splendid carriage, the product of his father-in-law, Mr. D. Fisher, carriage maker of this place. Mr. Donovan is making a success of it and knows how to entertain friends from his former home. There are many places of historical interest in the old city of Halifax and in other parts of Nova Scotia, among them the "land of Evangeline" and the time spent in this section was particularly pleasant. Mr. Lewis was delighted with his trip and hopes to be able to take it again sometime in the future.

Fight with a Bear.

Mr. Peter Watson, of Alice Township, Renfrew county, had a thrilling encounter with a large she bear on Friday morning of last week. Armed with a gun Mr. Watson took a stroll out in the woods and running across a berry bush, stopped to pick some when he was confronted by a young bear. Mr. Watson lost no time in despatching cubby, but was immediately surprised and put on the defensive guard by the mother bear who made a vicious lunge at him roaring savagely over the fate of the cub. Having no time to reload the gun, Mr. Watson truck at bruin and was dismayed to see the stock shatter into fragments. Things were getting interesting at this juncture, but fortunately the doctory hunter had large knife sheathed by his side. Just as the bear's hot breath was in his face and it looked as if he was coming in for one of those fatal huggings, Mr. Watson stabbed bruin in the side and both rolled to earth together. Consciousness left Mr. Watson for a time and when he came to, he found himself lying across the body of the dead bear. His clothes were badly torn and his arm and side lacerated by bruin's claws. Stiff and weary he dragged himself home and will long have occasion to remember his exciting experience.

BROCKVILLE

CUTTING SCHOOL

IN ORDER to meet the demand for first class cutters, which is steadily increasing, I have opened up in connection with my tailoring establishment a Cutting School, to be known as the Brockville Cutting School where the latest up-to-date systems of cutting will be taught, also instructions on the practical work of the tailor shop, which is most essential for a young man to become a first class cutter, and which will enable him to command a salary of from One Thousand Dollars to Fifteen Hundred Dollars per year in this country and from Fifteen Hundred Dollars to Two Thousand Five Hundred Dollars per year in the United States. This is a rare chance for young men to fit themselves for a lucrative position in a short time. Persons attending this school will receive a thorough training in everything connected with Garment Cutting, and after graduating are competent of filling a position as custom cutter at once.

Pupils will be taught individually and may commence their instructions at any time convenient to themselves.

For all information, see catalogue, which will be mailed to you upon application.

How the World Uses You.

Drink and the gang drinks with you;
Swear off and you go it alone;
For the bar room bum who drinks your rum,
Has a querulous thirst of his own.
Feast and your friends are many;
Fast and they'll cut you dead;
They'll not get mad if you treat them bad,
So long as their stomachs are fed.
Steal if you get a million,
For then you can furnish bail;
It's the great big thief who gets out on leave,
While the little one goes to goal.
Advertise and the dollars will come;
Quit and they fail to arrive;
For how are the men who have money to spend,
Going to know you are still alive!

King's Evil

That is Scrotula.
No disease is older.
No disease is really responsible for a larger mortality.

Consumption is commonly its outgrowth. There is no excuse for neglecting it. It makes its presence known by so many signs, such as glandular tumors, cutaneous eruptions, inflamed eyelids, sore ears, rickets, catarrh, wasting and general debility. Children of J. W. McGinn, Woodstock, Ont., had scrotula sores so bad they could not attend school for three months. When different kinds of medicines had been used to no purpose whatever, these sufferers were cured, according to Mr. McGinn's voluntary testimonial, by

Hood's Sarsaparilla, which has effected the most wonderful, radical and permanent cures of scrotula in old and young.

The practical side of science is reflected in

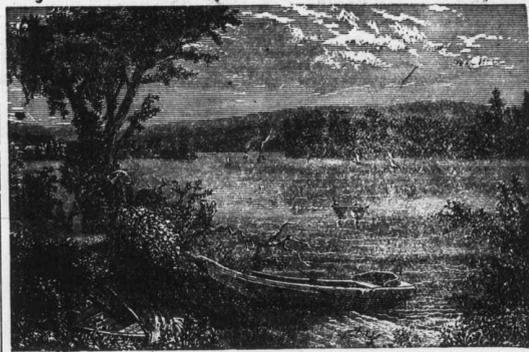

A monthly publication of inestimable value to the student of every day scientific problems, the mechanic, the industrial expert, the manufacturer, the inventor—in fact, to every wide-awake person who hopes to better his condition by using his brains. The inventor, especially, will find in The Patent Record a guide, philosopher and friend. Nothing of importance escapes the vigilant eyes of its corps of expert editors. Everything is presented in clean, concise fashion, so that the busiest may take time to read and comprehend. The scientific and industrial progress of the age is accurately mirrored in the columns of The Patent Record, and it is the only publication in the country that prints the official news of the U. S. Patent Office and the latest developments in the field of invention without fear or favor.

Visit of the Sun Life Officers

VIEW OF CHARLESTON LAKE.

The special train bearing the touring Sun Life Assurance officers arrived in town on Tuesday evening at seven p.m., and were met at the station by a number of the citizens and were escorted to the Gamble House and the Armstrong House where preparations had been made for them.

After supper, which was served as soon as possible, all repaired to the High School building where a large number of the citizens were waiting them and where they were to be entertained for an hour or so. After getting comfortably seated in the front rows, Mr. W. G. Parish as chairman opened the meeting and called upon the municipal clerk, Mr. B. Loverin, to read an address of welcome to the President and officers. The address was as follows:

ROBERT MACAULAY ESQ.,
PRESIDENT, AND STAFF.

It affords me the greatest possible pleasure to extend to you one and all, the freedom of our little municipality and its picturesque environments, with which is coupled the warmth of a true Canadian welcome.

In your ranks are many who live under another ensign than ours and to you, if possible, we put a trifle more feeling into our greeting. We are after all brothers; we are both from the same grand old Anglo-Saxon stock and both nations we believe are destined by the Almighty to be the two great conservators of civilization and Christianity in the world. So we have coupled our flags emblematic of that union which we trust will endure as long as time endures, and which stands for the peace, liberty and happiness of humanity.

We are proud of our home with its classic name which it has justly earned by the high standard of its educational institutions; we are proud of our surroundings of our mountain scenery, gently undulating fields and island dotted lakes teeming with endless variety of the finny tribe, and last but not least, we are happy in the realization that the citizens of this section are striving with all their God given powers to aid in the task we have in hand as Canadians viz—the lengthening the cords and the strengthening the stakes of our Dominion along the lines of the highest and healthiest citizenship.

We are proud of our Canadian institutions. Some of them have before them the manifest destiny of "world powers" and among this class stands the Company you represent to-day. The names of Macaulay and the Sun Life are dovetailed into each other, and both are household words in Canada. Not only so, but the Sun Life Assurance Company of Canada is doing a grand work in advertising our Dominion in lands beyond the seas.

We feel that the ever increasing amount of Life Assurance in force is one of the most encouraging signs of the times, indicating, as it does the thrift of our people.

May the Sun ever continue to shine with undimmed lustre and may its representa-

tives who have dropped in on us ever cherish a lively memory of their brief sojourn at the "seat of learning."

On behalf of all the citizens,
GEO. E. JUDSON, Reeve,
B. LOVERIN, Clerk.

President Macaulay, made a brief and able reply to the address, during which he called on his company to give three ringing cheers for Athens which they did to the King's taste. He referred to the greatness of Canada and said that while the people of this country were part of the great British Empire yet they did not owe everything to Britain, but a share to many other countries. We found in Canada English, Irish, French, Germans and many others and it was a triumph of civilization that there was in Canada such harmony and prosperity among a people so mixed. Observing the two flags, the Union Jack and the Stars and Stripes, declared England and the United States had a mission in the world and that was to stand by the cause of right. He believed there was a connection between those two great nations and while the United States had become a great nation it could not forget the great country that gave it birth. He believed in the old saying that blood was thicker than water and he believed that these nations had rendered valuable services to each other in assuming the attitude each did toward the other in recent critical points in the history of each. Britain lead in all parts of the world and her influence was always for the best. Mr. Macaulay then referred to the Sun Life and its work and referred to it as a noble work. He illustrated by asking if it wasn't much better for a widow to draw a thousand or two in case she loses her partner in life than to be compelled to accept the charity of her friends or eke out an existence by hard work. He said it would soon be considered that a man who did not provide for an emergency in this way did not love his wife and family. He said the Sun Life was doing business in the four quarters of the globe and he believed it was doing more to advertise Canada than all the immigration officers put together. Canada was growing in importance both internationally and commercially and he had always made it a point when in foreign countries to tell them of Canada, what we had to sell and what we required to buy. He concluded an interesting address by tendering the heartfelt thanks of himself and

associates for the very friendly address of welcome.

Mr. Macaulay, secretary of the Sun Life, was the next speaker and on rising said he hadn't to go far for a text when he saw the two flags side by side. He believed the two nations were to lead in all works of civilization, and he who attempted to sow discord between Britain and the United States was an enemy to civilization. He said insurance was systematic philanthropy and the man who didn't make sure that those dependent upon him were made secure in case of death overtaking him was terribly shortsighted. He said in the state of Michigan, though the Sun Life had only entered it fifty years ago in a field of fifty companies there were only five doing a bigger business.

Rural Dean Wright was the next speaker and referred to his pleasure at being one to welcome the Sun Life officers. He was sure everything would be done to make their visit enjoyable as possible. He believed from what he had heard that the Insurance agents were the advance agents of civilization and having always believed in insurance was glad to know what the company was doing and that they were meeting with success.

Mr. Simmons was called on and made a few remarks. He expressed his pleasure at being present. He said the heat of the room was suggestive of the Sun Life. He was glad that the unity of the two great nations had been touched on and he was heartily in accord with anything along that line. He said that he was always in favor of life insurance but thought that provision ought to be made for the poor fellows who did not pass a doctor's examination.

Mr. W. A. Lewis spoke interestingly for a short time. He believed this was the age of the young man and consequently we found principal offices and positions of trust held by young men. He referred to our educational standing and said that although we had only 1,000 population our high school was the third highest in Ontario. A good work was being carried on and men who had received their education here were occupying positions of importance in the various walks of life all over the world. He predicted a beautiful surprise for them when they visited Charleston and hoped they would thoroughly enjoy their visit to Athens.

The program was interspersed with recitations, vocal and instrumental music which pleased the audience if the rounds of applause were indicative. The numbers were as follows: Orchestra selection by Miss Ross and Messrs. Alex. Compo, S. Manhard and Ross DeWolfe; solo, "Strike Up the Band," by Mrs. S. C. A. Lamb; solo, "Bedouin Love Song," W. Guy Pickell; solo, "My Jersey Lillie," Miss E. Slack; piano solo Miss Ross; recitation, "Casabianca," Mr. Jordon of the Sun Life; solo, "Dolly Gray," Miss Pierce; recitation, Mr. Gawnlock of the Sun Life.

Mr. Reid moved a vote of thanks and paid a high tribute to the hospitality of the Athenian people. He was seconded by Mr. Sills of Kalamazoo, Mich., who made an eloquent address. The meeting closed with singing the national anthems and "Good Night Ladies."

At an early hour Wednesday morning the party was astir, some leaving at 5 a.m. in order to get a chance at the "Finny tribe" of which they had heard so much. By 9 a.m. all were at the lake and those who could secure boats and oarsmen took to the water. The rest were carried over to King's island by Messrs. Parish and Loverin in their steam launches, it being necessary to make two trips to get them all over. At noon the party all gathered at the island and here Mr. King had made ample provision to feed a lot of hungry men and they gave ample proof of the assertion made the night before by Mr. Lewis that the air of Charleston was a great appeaser. Dinner over the crowd which had been augmented by a lot of Athenians were entertained with songs, recitations and speeches, ably assisted by the members of the Chas. J. Russ fishing and hunting club, (camped on Derbyshire's Point) who sent over a deputation of 10 or 12 of their best musicians to help entertain the crowd.

The party started for Athens at 6 but many did not get to the village until a late hour, being unable to tear themselves away from the fascinating sport and beautiful scenery. They one and all voted Charleston the most beautiful and picturesque spot they had ever visited in their annual outings. At 9 o'clock the party gathered on the lawn of B. Loverin, of the Reporter, having announced the previous evening that they would give an impromptu concert and entertainment for the benefit of the people of Athens. The villagers turned out en masse and there must have been nearly 500 on the lawn during the evening. Miss Green kindly loaned her piano for the occasion and the entertainment was "kept up lively all the while" and gave general satisfaction. We regret that space at our disposal prevents us giving the names of those who contributed to a choice and varied program. In closing the chairman, ably assisted by the secretary-treasurer of the Sun Life Insurance Company tendered the citizens generally a cordial vote of thanks for the kind and cordial greeting they had received and promising to come again at no distant day.

Public Opinion in Europe is Opposed to More Wars.

A London cable says: Frederick W. Halls, United States member of the International Court of Arbitration, at The Hague, who is in London, after prolonged visits to St. Petersburg, Berlin and Vienna, in the course of his impressions of the relations between the European powers and America, said: "Although my trip was of a professional and private character, I have had the opportunity of seeing leading statesmen and foreign Ministers, as well as numerous publicists and international lawyers. From all we have heard we have no doubt that the outlook for peace among the great powers and for the gradual but unmistakable development of the intent of the Peace Conference could hardly be better. No European people wants war any more than the Americans."

German Women Threaten to Revive the Crinoline.

Berlin, Aug. 18.—German women have begun a crusade against whiskers, and are filling the columns of the Berlin and provincial papers with warlike communications insisting that beards and moustaches must go, unless the men of the nation desire reprisals in the form of hoopskirts and long trained dresses. Francis Haby, the Kaiser's barber, and the designer and keeper of the Imperial moustache, said today: "This talk is utter nonsense. One might as well ask the men of Germany to wear rings in their noses as smooth faces. From time immemorial the Germans have believed a handsome beard and moustache to be not only man's proudest heritage, but the bulwark of the nation's greatness. Our whiskers really come to mean more than that, because nowadays a whiskerless face is the monopoly of waiters, cab-drivers, butlers, and trench diggers. I fear these ladies have undertaken a hopeless task."

TO STOP ROOSTER CROWING.

Down-East Invention to Preserve Early Morning Sleep. Brockton, Mass., Aug. 18.—Edgar P. Howard, of this city, has invented an appliance to keep roosters from crowing in the early morning, and it is said to work like a charm. It is called the Brockton "Anti-crower." The device is fastened to the bill of the rooster at night by a simple clip which does not interfere in any way with respiration. When the chattering rises before dawn, throws back his head and attempts to utter a crow, and everybody else by uttering a clarion note, the device restrains his ambitious plans, and not until his owner sees fit to remove the clip will his vocal organs give utterance to his feelings. The inventor hopes to raise a race of non-crowing fowl by means of this device.

SMALLPOX AT HULL.

Two Mild Cases Develop in Home of a Poor Widow. Ottawa, Aug. 18.—Hull has two cases of smallpox. The latest appearance of the disease is in the household of Mrs. Mathilde Monette, a poor widow, residing on a narrow street, Tetreuilville, Hull's western suburb. The disease is of a mild type, and only fairly well developed. The house is an isolated one, and a spread of the disease is not looked for. The afflicted ones are Mrs. Monette's two daughters, aged 9 and 7 years. The mother and another child are in the house, which has been quarantined. It is situated near the Aylmer road, and about a mile from the business portion of the city.

Drowned From Horse's Back.

Ottawa, Aug. 18.—Honora Aubrey, eleven years old, was drowned in Leamy's Lake, Hull, this morning. The lad worked for his uncle, a farmer. It is thought that while the family was in church he mounted a horse and rode it to the lake to give it a drink. He was evidently thrown from its back, for when the other members of the family returned they found the horse standing in its stall with the halter all wet. A search of the lake was made at once, and the body was found in twenty feet of water.

London's Meat Markets.

London, Aug. 18.—The medical officers' annual report shows that 64 per cent. of the meat sold in the corporation markets is imported from America, Australia, New Zealand and the Continent, the United States sending 23 per cent., and Australia 21. Five years ago the outside deliveries were barely 50 per cent.

Woodstock Veterans Honored.

Woodstock, Aug. 18.—Sergts. Chas. Mole and Geo. Parker, of Gen. French's scouts, arrived at their homes here this morning, after having served nearly two years in South Africa. They went out with the Gurkha battery, and instead of returning with the others last winter enlisted with the scouts, and were with "Gen." Howard when he was shot. They have never received a scratch, and have always been in good health. They say that had they been opposing the Boers alone the war would soon have been over. But there are many foreigners, mostly British, in the Boer Generals.

INTERESTING FIGURES FROM THE CENSUS.

Comparison of the Increase in Families, Dwellings and Population.

Ottawa, Aug. 16.—The census bulletin issued to-day gives the population of the Dominion as 5,338,883, an increase of 505,644 over the census of 1891. Given by provinces, the population is as follows, compared with 1891:

WANTS HER CHILDREN.

Mrs. Delpit Enters Action in the Montreal Courts.

HER ALLOWANCE IS STOPPED. Montreal report—The famous Delpit case, which recently provoked so much discussion throughout the Dominion, has entered upon a new phase. Mr. Taillefer, counsel for Mrs. Delpit, has entered an action in the Montreal courts to obtain a separation for Mrs. Delpit as to bed and board from Mr. Delpit, who is at present in the United States. A peculiar feature of the action is that in the application for separation as to bed and board, Mrs. Delpit's attorneys have asked to plead for the same in forma pauperis. It appears that before Mr. Delpit went to the United States he had made a private arrangement with his wife to pay her twenty dollars a month to support herself. This agreement was kept until Mr. Delpit decided to go South, when the allowance was stopped. For this, and for another reason, it was decided to ask to plead for separation, etc., in forma pauperis. As soon as the separation is granted the court will be asked to issue a command that Mrs. Delpit get possession of her children. A few days ago Mr. Taillefer returned from New York, where he had been in order to get trace of the little ones. He has now a pretty good idea where they are, and there may be some interesting developments. It is the opinion of Mr. Taillefer that he will have no difficulty in getting the courts here to grant the separation. Mrs. Delpit wants seeing she can prove that her husband has abandoned her, and is not contributing towards her support. Judge Loranger has granted the request to plead in forma pauperis for separation. The merits of the plea will be heard in the course of a few days. E. H. Wartman, of Kingston, has been appointed by the Dominion Government, upon recommendation of Prof. Robertson, Commissioner of Agriculture, to the inspectorship of the Montreal under the new Fruit Grading Act.

SOME SEVERE FIGHTING.

Kritzinger's Force Routed, Commandants Captured.

ONE FATALLY WOUNDED

Fifty of French's Scouts Captured—Boers Also Capture a Maxim—Boers Trapped and Hussars Bayonet Twelve—Boer Camp Captured.

London, Aug. 16.—Gen. Kitchener reports to the War Office, under date of Pretoria, August 16, as follows: "French reports that Goringe attacked Kritzinger's commando on August 13, north of Steynsburg, driving them north to near Venterpruit in confusion. Among the prisoners are Commandants Erasmus and Cachet. The latter, who was second in command, is mortally wounded. French's other column is pressing the enemy northward.

"Fifty of French's scouts proceeding to join the column near Bethesda were surrounded in the hills by a superior force under Theron, and surrendered. One man was killed, a captain was dangerously, and three men, slightly wounded. The prisoners were subsequently released."

The Boers Lost Heavily. Durban, Aug. 16.—Details of the operations of Steynsburg show that they have done excellently in Swaziland, patrolling from the Portuguese border to the Orange River. A number of captures were made. The commando suffered considerably from the unhealthy nature of the country.

A small British force, evacuated Bremerdorp, but was driven out of the district. The Boers pursued them, but were repulsed. The Boers received 500 reinforcements, and then compelled the British to retire. The latter made a last stand ten miles away. The Boers, assisted by Swazis, captured three wagons loaded with rations and a Maxim gun. They afterwards burned Bremerdorp. The British lost four killed and fourteen captured. The Boers lost heavily.

Clear of Commandos. Cape Town, Aug. 16.—As the result of the recent operations, the Cradock district is considered to be clear of any large commandos. It is hoped that the two British columns operating in other districts.

To Attack Botha. Durban, Aug. 16.—Lord Kitchener, with a strong force, is moving on Howdwell, on the border of Zululand, where General Botha is reported to have concentrated 4,000 Boers. An important engagement is expected to ensue.

British Capture a Boer Camp. Cape Town, Aug. 16.—A small column of the Cape Mounted Rifles and the Second Welsh Mounted Infantry made a forced march from Prieska, Cape Colony, and surprised a Boer camp at Middlepath (Middle Drift). The Boers fled, dismounted in the darkness, and abandoned everything, including 26 horses and a large quantity of ammunition. Eight commandos were captured, a portion of the Boer force, which occupied a neighboring kopje, opened fire on the British. The fire was returned, and the fighting lasted until dawn. The Boer casualties were unknown. The Boer commandos were unknown.

Caught in a Trap. Port Elizabeth, Aug. 16.—Particulars have only now been obtained of an important fight which took place last Thursday on the Fish River. A Boer commando attempted to cross the river by the railway bridge, and by the drift simultaneously. The task would have been difficult at any time, but upon this occasion the marauders were ignorant of the fact that the British had been constructed in sheltered and admirably selected positions. Moreover, they neglected their customary precautions, with the result that as they were engaged in their enterprise an armored train bore down upon them, and at the same time the blockhouses unexpectedly opened fire.

The Boers taken entirely by surprise, lost many killed, wounded, and prisoners.

With Fixed Bayonets. Pretoria, Aug. 16.—During the pursuit of Commandant Viljoen, by General Kitchener, the British column pressed so hotly upon the flying Boers' track, that near Oliphant's River, north of Middleburg, a portion of the force, consisting of the 18th Hussars, who are now armed as mounted infantry, came up with the enemy, and engaged them in the dense brush.

The Hussars dismounted, and finally with fixed bayonets bore down all opposition, accounting, in their smart brush, for twelve of the enemy.

Italians With Boers. Woodstock, Aug. 14.—Sergts. Chas. Mole and Geo. Parker, of Gen. Freater's Column, arrived at their homes here this morning, after having served nearly two years in South Africa. They went out with the Gulpch battery, and instead of returning with the others last winter enlisted with the scouts, and were with "Gat" Howard when he was shot. They have never received a scratch, and have always been in good health. They say that had they been fighting the Boers alone the war would soon have been over. But there are many foreigners, mostly Italians, helping the Boer Generals.

Woodstock Veterans Honored. Woodstock, Aug. 18.—Sergts. Chas.

Mole expects to go back, and will settle in Africa.

London, Aug. 18.—The effect of Lord Kitchener's—or rather Mr. Chamberlain's—proclamation is not distinctly noticeable in South Africa. There are rumors of a renewal of negotiations between General Botha and General Kitchener, but these are probably fictitious, like the vagaries to look for a result of this kind when the proclamation allows several weeks in which the Boers can reconcile themselves to the idea of submission. Practical military men have little confidence in the efficacy of the proclamation as a peace-making agency, but admit that it will be useful to have a convenient date for another manifesto, withholding the belligerent rights and changing the character of the military operations. There has been no material change in the situation during the past week. The Orange River Colony is more peaceful than any other section, but this is because the country has been thoroughly cleared and the combatants have been driven north and south for ammunition and food. Four Boer commandos have been lost recently in the Transvaal, and the burghers seem thoroughly dispirited. General Kruger, and the most arduous work among the Cape rebels, but is gaining ground, and reducing the area of hostile operations.

In Refugee Camps. London, Aug. 18.—An official paper just issued shows that there were 118,497 persons in the refugee camps in South Africa on July 31.

Krugger Again Talks. London, Aug. 18.—The Freeman's Journal, of Dublin, publishes an interview between Mr. Kruger and William Redmond, in Hilversum, Holland, in the course of which the former President of the South African Republic, expressing gratitude for Irish support, said he regarded the Irish as "brothers in oppression," and urged the Nationalist members of the British Parliament to continue their "efforts in the cause of justice and truth."

When asked concerning the effects of Lord Kitchener's recent proclamation, and of Mr. Chamberlain's speeches, Mr. Kruger replied: "My people are not to be frightened by such proclamations or speeches, which will only encourage them to continue fighting."

"The British have used armed natives against the burghers from the beginning, but we have not used armed natives. It is an act which was against our principles to use the black men against the whites."

Mr. Kruger emphatically denied the existence of a Dutch conspiracy against British influence in South Africa, and repeated his former statements about the genesis of the war. When asked regarding Great Britain's promises as to treatment of the Boers after surrender he said: "I know Great Britain's promises. In Ireland ought to also know them. The British promise to lend us money to put things right. Then if it were not repaid our land would be taken. They ask us to allow a rope to be put around our necks and to call that freedom. We should be slaves."

After expressing his firm conviction that God, in good time, would give the Boers the victory he remarked: "Even now we could rebuild our country, but to do so we must have full independence." He emphasized the word "full." When asked about the burghers and the concentration camps he exclaimed: "Why do they fight women and children? There are our own men to fight against. Do not believe the British people know what is being done in their name. If they did know they would stop it."

Mr. Kruger said nothing had been definitely settled on the subject of a visit to the United States. According to Mr. Redmond his appearance here is the idea that he is breaking up either mentally or physically.

The Boer Women Exulting. London, Aug. 19.—A despatch to the Standard from Pretoria states that Boer women who have just been taken to the concentration camps, their husbands being on commando, declare loudly that in spite of all that has happened lately the Boers are going to win. They say that letters from the Boer delegation in Europe assure the fighting leaders that the Continental powers will shortly intervene.

So sure are the men of this that they are holding thanksgiving services. The wives of men still in the field are continually insulting the wives of those who have surrendered. Consequently some of the burghers who had surrendered, desiring to be on the winning side, have escaped and returned to commando.

Women Gathering Horses. Cape Town, Aug. 18.—The recent operations in the Cape Colony have frequently shown that Boer women are riding about gathering horses for the use of the commandos.

Botha May Surrender. London, Aug. 17.—The Sun today says it hears that the concentration of General Botha's forces at Howdwell, on the borders of Zululand, announced in a despatch from Durban last night, which said Lord Kitchener was moving with a strong force on the place, does not foreshadow a fight with Botha, but his surrender, in pursuance of an understanding reached between General Botha and Lord Kitchener. The Sun adds that the Government is so satisfied that the war is virtually over that Lord Milner, now on his way back to South Africa, has in his pocket the draft of a complete constitution and plans for the future government of the annexed territories.

Broke Through British Lines. Pretoria, Aug. 18.—There has been considerable improvement in affairs in the Cape Colony since General French took command there. The burghers are fleeing north, but Commandant Scheepers is said to have broken back through the British lines. According to the reports circulated here the Boers are becoming disorganized.

Woodstock Veterans Honored. Woodstock, Aug. 18.—Sergts. Chas.

Mole and George Parker, the two Woodstock boys who returned home from South Africa on Wednesday, were tenderly welcomed by the citizens on Friday night, and presented with an address and a gold watch each. The presentation took place in the Vansittart Avenue Park and was witnessed by several thousand people.

Sword for Lieut.-Col. Pelletier. Quebec, Aug. 18.—The sword of honor which is to be presented to Lieut.-Col. Oscar Pelletier, D. O. C., by his Quebec friends, will be publicly presented at the City Hall by Lieut.-Governor Jette, next Tuesday. On one side is inscribed the British flag and the list of engagements in which the colonel took part in South Africa. On the other is a portrait of the recipient, the flag of the Dominion, and the inscription: "Do not draw me without cause; do not sheath me without honor."

OUTLOOK IS FOR PEACE.

Public Opinion in Europe is Opposed to More Wars. A London cable says: Frederick W. Hollis, United States member of the International Court of Arbitration, at The Hague, who is in London, after a prolonged visit to St. Petersburg, Berlin and Vienna, in talking of his impressions of the relations between the European powers and America, said: "Although my trip was of a professional and private character, I have had the opportunity of seeing leading statesmen and foreign Ministers as well as numerous publicists and international lawyers. I have heard we believe that the outlook for peace among the great powers and for the gradual but unmistakable development of war, in the event of the Peace Conference could hardly be better. No European people wants war any more than the Americans."

"Notwithstanding all appearances to the contrary, public opinion is today the greatest European power. Of course it would be folly to say there is no longer danger of war, for popular excitement in any one quarter may upset all calculations. Still, the existence of a foreign tribunal to decide international disputes, the well-recognized breaking down which war now means for all belligerents, the lessons of the Boer war and the frightful fiasco in China—all these elements of the situation are working powerfully for peace."

CAMPAIGN AGAINST BEARDS.

German Women Threaten to Revive the Crinoline. Berlin, Aug. 18.—German women have begun a crusade against whiskers, and are filling the columns of the Berlin and provincial papers with wild and comic denunciations of the man who wears a beard. It must go, unless the men of the nation desire reprisals in the form of hoopskirts and long trained dresses. Francis Haby, the Kaiser's barber, and the designer and keeper of the Imperial moustache, said to-day: "This talk is utter nonsense. One might as well ask the men of Germany to wear rings in their noses as smooth faces. From time immemorial the Germans have believed a handsome beard and moustache to be not only man's proudest heritage, but the bulwark of the nation's greatness. Our whiskers have really come to mean more than that, because nowadays a whiskerless face, the monopoly of waiters, cab-drivers, butlers, and trench diggers, is looked upon as a mark of degradation. I fear these ladies have undertaken a hopeless task."

TO STOP ROOSTER CROWING.

Down East Invention to Preserve Early Morning Sleep. Brockton, Mass., Aug. 18.—Edgar P. Howard, of this city, has invented an appliance to keep roosters from crowing in the early morning, and it is said to work like a charm. It is called the Brockton "anti-crower." The device is fastened to the neck of the rooster at night by a simple clasp, which does not interfere in any way with respiration. When the clasp rises before dawn, it strikes the rooster's head and attempts to wake him, and everybody else by uttering a clarion note, the device restrains his ambitious plans, and not until his owner seizes it, and removes the clasp will his vocal organs give utterance to his feelings. The inventor hopes to raise a race of non-crowing fowl by means of this device.

SMALLPOX AT HULL.

Two Mild Cases Develop in Home of a Poor Widow. Ottawa, Aug. 18.—Hull has two cases of smallpox. The latest appearance of the disease is in the household of Mrs. Mathilde Morin, a widow, residing on St. Ephrem street, Tetreauville, Hull's western suburb. The disease is of a mild type, and only fairly well developed. The house is an isolated one, and a spread of the disease is not looked for. The afflicted ones are Mrs. Morin's two daughters, aged 9 and 7 years. The mother and another child are in the house, which has been quarantined. It is situated near the Aymer road, and about a mile from the business portion of the city.

Drawn From Horse's Back. Ottawa, Aug. 18.—Honore Aubrey, eleven years old, was drowned in Leamy's Lake, Hull, this morning. The lad worked for his uncle, a farmer. It is thought that while the family was in church he mounted a horse and rode it to the lake to give it a drink. He was evidently thrown from its back, for when the other members of the family returned they noticed the horse standing in its stall with the lad all wet. A search of the lake was made at once, and the body was found in twenty feet of water.

London's Meat Markets.

London, Aug. 18.—The medical officers' annual report shows that 64 per cent. of the meat sold in the corporation markets is imported from America, Australia, New Zealand and the Continent, the United States sending 23 per cent., and Australia 21. Five years ago the outside deliveries were barely 50 per cent.

WANTS HER CHILDREN. Mrs. Delpit Enters Action in the Montreal Courts. HER ALLOWANCE IS STOPPED. Montreal report—The famous Delpit case, which recently provoked so much discussion throughout the Dominion, has entered upon a new phase. Mr. Taillefer, counsel for Mrs. Delpit, has entered an action in the Montreal courts to obtain a separation from Mrs. Delpit as to bed and board, Mrs. Delpit's attorneys have asked to plead for the same in forma pauperis. It appears that before Mr. Delpit went to the United States he had made a private arrangement with his wife to pay her twenty dollars a month to support herself. This agreement was kept until Mr. Delpit decided to go South, when the allowance was stopped. For this, and for another reason, it was decided to ask to plead for separation, etc., in forma pauperis. As soon as the separation is granted the court will be asked to issue a command that Mrs. Delpit get possession of her children. A few days ago Mr. Taillefer returned from New York, where he had been in order to get trace of the little ones. He has now a pretty good idea where they are, and there may be some interesting developments. It is the opinion of Mr. Taillefer that he will have no difficulty in getting the courts here to grant the separation. Mrs. Delpit wants, seeing she cannot prove that her husband has abandoned her, and is not contributing towards her support. Judge Loranger has granted the request to plead in forma pauperis for separation. The merits of the plea will be heard in the course of a few days. E. H. Wartman, of Kingston, has been appointed by the Dominion Government to recommend a successor to Prof. Robertson, Commissioner of Agriculture, to the inspectorship at Montreal under the new Fruit Grading Act.

The proposed corn roast at Charles ton lake promises to be a big success. The date has not been definitely fixed but it is expected to be during the first week in September. The place selected is Lab-ne-o-tah bay which can be easily reached by teams. Several farmers have volunteered to give a quantity of corn and Nelson Earl kindly volunteered to take a load down from Athens. Full programme will appear in a couple of weeks.

The Front of Yonge correspondent writes to the Recorder in this strain: 'The beautiful grounds and residence of Mr. and Mrs. Jas. W. Tennant of Caintown. The Reporter can heartily endorse all the correspondent says in that regard:—For beautiful grounds and residence, we think that Mr. and Mrs. James Tennant of Caintown have the cosiest and most lovely. A gravel walk leads to the main travelled road which is lined on either side by beautiful mounds covered with the most fragrant flowers, both foreign and indigenous, and festooned with all manner of creeping vines. The front of the dwelling is adorned from ground to gable with lovely roses, white, black and yellow, high blooming cereus, etc. Now we would advise all those taking a drive in the country to be sure and inquire for the happy home of Mr. and Mrs. J. Tennant, Caintown.'

Four or five dollars is thrown into the water every day while it is about 20 deg. deep.

BANQUET TO MESSRS H. P. BINGHAM AND E. S. CLOW.

The business men of Athens tender these gentlemen a banquet on the occasion of their promotion to more important positions on the staff of the Merchants' Bank of Canada.

On Friday evening over thirty of the representative business men of Athens and vicinity met in the spacious dining room of the Gauble House to tender their congratulations to Mr. H. P. Bingham, who has held the position of manager of the Athens branch of the Merchants' Bank since its establishment here, and who was last week promoted to the manager's office of the same institution at Gananoque, as well as to show their pleasure at the promotion of E. S. Clow from the position of teller to that of manager of the branch here in place of Mr. Bingham.

The Rev. Rural Dean Wright occupied the chair and at his right sat Mr. Bingham and on the left sat Mr. Clow. After doing ample justice to the fine spread the chairman briefly introduced the programme of the evening by calling on Mr. W. A. Lewis to propose the health of the guest of the evening. In doing so he spoke briefly of the great benefit resulting to the business men of Athens and surrounding country by the establishment of a branch of a chartered bank in the place and also of the business tact and ability of the late manager in establishing business relations with the people. He was also pleased with the promotion of Mr. Clow, who being one of our own boys had by perseverance and ability been able to secure the position of manager. He was certain that no more popular appointment could have been made and felt certain that all would join in drinking their health.

Mr. Bingham in rising to respond was visibly affected. He thanked the proposer for the kindly feelings expressed both on his own behalf and that of Mrs. Bingham to whom kindly reference had been made by the chairman and Mr. Lewis. His association with the people of Athens both financially and socially had been of the most pleasing nature and he left with regret to assume the more important position to which he had been appointed.

Mr. Clow responded to the toast drunk in his honor. He felt under deep obligations to Mr. Bingham through whose efforts he had been able to step up to the higher position of manager, and trusted that those with whom he had to deal in business matters would be as kind and obliging as they had been to his predecessor. There was times in the transaction of business when he had to do business as distasteful to himself as to those with whom he done business but he was only carrying out the orders of his superior and he hoped that everything would run as smoothly as in the past.

D. Fisher, I. C. Alguire and A. W. Johnson ably responded to the toast of the educational interests of the village and township, especially the high school, and Joseph Thompson replied for the model and public schools. He spoke particularly of the farming interests being closely identified with the prosperity of the village and schools.

S. A. Taplin spoke for the business men of Athens and paid a high tribute to the men engaged in business in the village. Wm. Karley, J. B. Saunders and B. Loverin spoke briefly along the same line.

A. M. Chassels represented the Scotch element in the village and made some happy remarks eulogistic of his native land.

Thos. Percival as a representative farmer from the country was pleased to have a good word to say in behalf of the Merchants' Bank and Messrs. Bingham and Clow as the heads of the institution in this place.

Jas. P. Lamb responded for the learned professions, ably seconded by Drs. Cornell and Lillie.

M. B. Holmes proposed the press which was responded to by B. Loverin of the Reporter.

John R. Reid, who happened to be in the village on business connected with the coming of the representatives of the Sun Life Assurance Co., spoke of the many pleasing recollections of Athens in former years and he felt certain that in the matter of carrying out any public matter like the present the people of Athens had lost none of their old time vigor and enthusiasm.

Mr. and Mrs. Pierce were then called into the room and Mr. Lewis and the chairman on behalf of those present tendered them a hearty vote of thanks for the care and attention displayed in providing for this entertainment. The meeting broke up shortly after 12 o'clock by singing the national anthem.

Diminished Vitality.

Some people talk very flippantly about diminished vitality. They don't stop to think that vitality is the principle of life—that it is that little understood something on which every function of their body depends. Diminished vitality is early indicated by loss of appetite, strength and endurance, and Hood's Sarsaparilla is the great vitalizer.
