THE FARM ANIMALS.

Get cattle and young stock to the arn before very cold nights come same flock it would be necessary to on, and do not allow them to remain out in cold Fall storms. After the grass has been frost-bitten it is of not nuch value, and stock will do of miscellaneous nature are not thus nough better in the barns and yards economical, - Annie C. Webster, pay the cost of the fodder there. in Am. Cul. ry to feed them so that the cows ill not shrink in their milk or the thers lose flesh before winter. osts more to get back a pound of sh or a quart of milk after hrinkage than it would to feed so is to keep it and add two pounds to . The down-hill road seems to be asy after they start on it, and it i ot so easy to turn them about an make their gain again.

Feeding stock, cattle, swine or beep will not eat more b artily than hey would in hot weather and gain more rapidly than they will in December. Increase the feed gradnally, and watch carefully, particul ally, and watch carefully, particularly if ashot day comes, as too much rich food then may cause a feverish condition, which well check fattening if it does not cause a total oss of appetite. Try to have them in a condition to bring a first-class

price when sold. Some cattle are so unthrifty that hey will scarcely pay for good feeding, and it may be better to let them 20 for what they will bring than to waste good corn on them, but usual ly a lew weeks of preparation will put them in a condition to diges attening tood, and then, they wil gain fa t enough to pay for it The leaves of the beets, car:ots turnips and cabbages are very good if fed out h fore they are too much willed. They can be packed soile r failing, of d take these y in a bay or stable 14 the barn as corn is packed in the silo, and envered up with straw they can be kept much longer than they can in eaps upon the ground.

FEEDING SHEEP UPON THE

LAND. Much is said about the profit of oiling. Many advocates of the stem believe in soiling. An Engsbman, however, opposes anything hat is allied to the system of so lng sheep. He declares that no amount of artific's manure applied to the land can compensate for the good sheep do by concuming the produce on the land for succeeding crops. The ancients considered hat the hoof of the ox was silvern he hoof of the sheep golded. The system of housing sheep, Winter and Summer, in Germany, has been prevalant in that country from time

memorial There is no mystery about an ice-house for farmers. A bottom that secures perfect drainage, the mearest shell of sides that is stout and tight enough to hold sawdust, a cheap board roof that will turn water and open gables for full and free ventilation is all that is necessary. Then plenty of sawdust, bottom, sides and top, will incure keep The entire outer wal!, includ those of the cooling room should be filled with sawdust, out the partition well need not be a double one. Better make it single, lined with tar paper or building
