Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut qu'en certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or part obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

| 10x | 14x | 18x | 20x | 22x | 24x | 26x | 30x |
|-----|-----|-----|-----|-----|-----|-----|-----|
| 12x | 16x | | | | ✓ | | 32x |

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

LABORATORY
OF THE
INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 412

BRAN

NOTES AND COMMENTS.

Under this heading, as occasion arises, the Bulletins issued by this Department will contain, as an appendix, such comment as may seem necessary or advisable upon matters relating to the work of the Department in connection with the administration of the Adulteration Act, the Fertilizers Act, the Feeding Stuffs Act or the Proprietary Medicines Act.

It frequently happens that correspondents ask information regarding the above Acts, of such nature that the matter in question possesses general interest, and comment upon it would prove acceptable and useful to others than the immediate questioner. In such cases the reply may find a place in these columns. For convenience of reference these notes will be numbered in series.

A. MCGILL,
Chief Analyst.

LABORATORY
OF THE
INLAND REVENUE DEPARTMENT
OTTAWA, CANADA

BULLETIN No. 412

B R A N

OTTAWA, July 31st, 1918.

GEO. W. TAYLOR, Esq.,
Asst. Deputy Minister of Inland Revenue,

SIR,—I beg to hand you a report upon 153 samples of Feed's, purchased as Bran by our inspectors during January, February and March of the current year.

With one exception (70445) these samples are brans, and the exceptional sample is sold as Oat Feed. It is of very low quality and if offered for sale at all should be registered, and sold under a guarantee of actual feed value.

All the remaining samples meet existing standards for Bran, so far as nutritive value is concerned. Bran must contain (Order in Council of May, 1910, revised Dec. 1917, Circular G. 1292).

| | |
|---------------------|---|
| Proteids | at least 14 per cent. |
| Fat..... | " 3 " |
| Fibre | at most 10 " and not more than 25 seeds of noxious weeds per pound of the material. |

Fifteen samples are condemned on account of excessive amounts of the seeds of weeds declared noxious, by regulations made under the Seed Control Act, modified in such a way as to apply to grain products used as food for domestic animals. As explained in Bulletins Nos. 254 and 319, a certain amount of devitalization of weed seeds occurs in the digestive tract of animals, and it has been held reasonable to adopt a much less stringent interpretation in the case of Cattle Feeds, than can be allowed in seed grain.

It is much to be deplored that our Western farmers appear to permit the almost indefinite spread of weeds in grain fields. While the spread of noxious weeds is particularly objectionable, I cannot regard the presence of thousands of seeds per pound of bran, as insignificant, even when such seeds are those of Lamb's Quarters (*Chenopodium album*) or Black Bindweed (*Polygonum convolvulus*) not usually listed as noxious. It is quite true that most seeds possess a distinct value as food material, containing as they do, protein and fat in high percentage amount, and in some cases starch as well; but it may be questioned whether the danger of further propagation of these nuisances in our wheat fields does not completely offset such value as feed. The

seeds of various species of mustards, which are very largely in evidence, are, moreover, distinctly poisonous to cattle and especially to hogs; so that the question of destroying these seeds at the elevators, instead of permitting them to come into commerce, is worthy of consideration.

Changes in the milling of grain, authorized during recent years by the Board of Food Control, may be naturally expected to affect, in greater or less degree, the character of by-products, such as bran. Inspection of this Feed will be continued, and further reported in due course.

Meantime, it is satisfactory to note that the present report indicates no marked deterioration of commercial bran during the first three months of the current year.

I beg to recommend publication of this report as Bulletin No. 412.

I have the honour to be, Sir,
Your obedient servant,

A. MCGILL,
Chief Analyst.
