#### INDUSTRIAL WINNIPEC.

The June issue of the Winnipeg Industrial Bulletin, which is published by the Industrial Bureau of that city, is a very creditable sheet. It is profusely illustrated, and contains facts and figures of Western progress which appeal to all interests. Business men throughout the continent would do well to be placed on the Bulletin's mailing list. All inquiries will be answered by Mr. Chas. F. Roland, the Industrial Commissioner. the Industrial Commissioner.

The growth of a town adds responsibility and imposes obligation upon its authorities. This the town council of Toronto Junction seem to have forgotten in considering fire protection. The C.F.U.A., in suggesting three steam fire engines for the place, may be asking too much, but they are not asking anything unreasonable when they remind the residents of that growing place, that in view of its increased extent, its increased requirements, the supply of water is in-adequate in the event of a big fire, the largest mains being only 12 inches diameter. The fire-fighting conditions now are as they were in 1904. Growth in population and extent, demands that fire-fighting appliances should grow too.

### An Authorized Trustee Investment.

The Debentures issued by this Corporation are a security in which Executors and Trustees are authorized to invest Trust Funds,

They bear interest at FOUR PER CENT per m payable half-yearly.

They are issued in sums of one hundred dollars and upwards, as may be desired by the investor, and for terms of from one to five years.

Interest is computed from the date on which the ney is received.

They have long been a favourite investi elent and Fraternal Institutions, and of British and Canadian Fire and Life Assurance Companies. largely for deposit with the Canadian Government, nore than ONE MILLION DOLLARS.

#### HUGGER-MUGGER METHODS.

To presume to criticize Governments is usually, in the eyes of Governments, black sin. Lord Curzon, as Viceroy of India, was a viceroy, nothing more. One of his troubles was friction with the military authorities. In other words, with Lord Kitchener. Kitchener, a born army organizer, a man to whom the army is omnipotent, was strong in his military ideas. Lord Curzon was a strong viceroy. When military and civil powers meet, there comes a clash.

The civil power must always be the guiding influence. Countries ruled by their soldiers are frequently found in the lighter side of the international scales. The famous Dreyfus case illustrated how a nation's internal affairs can be almost wrecked when the military factor rules. Lord Curzon now, as a man and not a viceroy, has spoken. He has said what many another man would like to say. The sacredness of cobwebbed traditions he has ruthlessly disregarded. To the dignity of Imperial Government he has given a deep thrust. The colonial and other departments, he says, are ruled by hugger-mugger methods. Men who know nothing of the colonies, the countries, the miniature empires, the destiny of which they are supposed to assist in directing, have never visited them. In other words, officials who administer advice to their officially lesser fry in Canada, in Australia, in South Africa, in India, know these lands only on the library shelf.

served. To others, its justness will be manifest. Mr. Winston Churchill has visited many parts of the Empire. perhaps one day he will, some sweeping changes in the

Hamar Greenwood, a Canadian born, and a member of the Imperial Parliament, may not be unacquainted with the situation at the Colonial Office. A man of his calibre who has risen thus far, may rise still further. And there are others. Mr. Lloyd George, of the Imperial Board of Trade, has shown his appreciation of the future of the empires overseas. Mr. Richard Grigg has just returned to England from an extended tour through Canada. He was a missionary in a commercial campaign. He sought information for strengthening trade relations. The idea of his coming emenated from the Imperial Board of Trade Chambers.

Thus there have been developments in some of the administrative departments. Men who know have taken the place of men who think they know. Hugger-mugger methods have fallen away under the influence of system and commonsense. But a greater change must come yet. The British civil service is a venerable institution. What one man does for fifty years his successor continues doing for another fifty. Precedent is the allpowerful idol. He who dares to break a precedent is himself broken for all time in the eyes of the powers that Pigeon-holes and personalities are intertwined with red tape. If a clerk, made mechanical by a system of "work, but think not," is unfortunate enough to commit some trifling breach of official etiquette he is handed an imposing yellow colored sheet. With great solemnity he must detail thereupon the reasons for his error. This document, one so valuable to Imperial interests, then proceeds upon a journey through a labyrinth of official files. That is but an instance.

The British Civil Service works like an admirable timepiece. There are too many busybodies around to allow its mechanism to become clogged. Austere-looking To some, Lord Curzon's criticisms will appear unde- gentlemen, drawing comfortable salaries, see that it is always kept wound up. If intelligence dares to interfere with this delicate mechanism, the alarm goes off. And He has made and earned a reputation. If he dared, and intelligence is either scared or carefully put away. The whole system is one which keeps good men down. Amofficial methods of the Colonial Office may occur. Mr. bition, genius, sense, desirable innovations are all choked

by the hand of officialism. "Nothing new" is the motto; "Nothing doing" the result. There are a dozen men, in the ranks of the thousands who are performing donkey work in Impe. I departments, who, if given an opportunity, would be useful assets where the thinking for the Empire is done.

Those who talk officially of Canada should know the Dominion. Those who advocate or denounce officially Chinese labor in South Africa should know the country. Those who prate and preach, officially, of the unrest in India should know their India. Those who assist officially to direct Australia should be cognizant of that continent. Too much trust is put in the cable. Imagine a man sitting in an armchair, thousands of miles from the scene he has in his mind, and directing this battalion to proceed at once to that district, or this official to confer, without delay, with that official. A cable message is easy to send. It is not always simple to carry out its instructions.

The Man on the Spot is too frequently overridden and overlooked. If he is worth his salt, he should be trusted. If not, he is unsuitable. Men who direct Imperial affairs should know their Empire. When they give orders, they should be able to realize what those orders mean. They should imagine themselves for a moment in the place of the recipient of those orders. Think what must be the disgust and heartburnings sometimes of the man on the spot. The wonder is that we do not hear more frequently of his resignation.

When a fellow is told to steer, he likes a hand near the tiller. A message from a superior, three thousand miles away, directing him to steer a south-westerly course, where he knows there are dangers, places him in a peculiar position. If he obeys orders, he meets trouble. If he disobeys, he meets worse trouble. And that is how crises arise.

No one would gainsay the claims of diplomacy. They are indisputable. Diplomacy, tinged with the essence of commonsense is the best thing in the world. When the Russian warships, a few years ago, made an unfortunate mistake in bombarding an innocent British fishing fleet, indignation in the British Isles was almost unrestrained. If you had polled the people of Britain as to whether they would war with Russia at that moment, there would have been a majority in favor of bloodshed. By a masterpiece of diplomacy the situation was saved.

Slovenly and ignorant methods have prevailed too long in official circles. There are welcome signs in Great Britain of a real appreciation of the potentialities and possibilities of its overseas possessions. Transportation facilities have improved. The interchange of official and friendly visits have increased in number. Linking up the Empire with fast steamships is one great thing. Linking it up with real horse sense is another. It is equally desirable, too.

Great Britain's prosperity has naturally created a luxurious nation. Luxury and hard work are not good friends. A revolution in British methods has been witnessed during the past decade. John Bull has continually told himself, "I am prosperous." With that reassuring assertion, he slid into slumber again. Now he sees that the prosperity is not his only, but is a world-wide prosperity. Other nations can truly say they are prosperous. Indeed, there is a chorus of prosperity. Increase of trade in many countries is almost as great as in Great Britain. This fact has given, it is hoped, an impetus to the vigour of the Motherland. Some of the hugger-mugger methods have been shorn of their false attractiveness by officials who think, and agt. Innovations have been introduced, in the various Imperial departments, which ten years ago would have been considered a master stroke of impudence.

With the passing away of red tape and the worship of precedent we shall see a system of government—a government which vitally affects Britain's younger and far distant peoples—which will be a credit to the twentieth century.

#### REAL MINING.

"Mining is becoming more a settled business by the elimination, to a large extent, of visionary schemes." This is an extract from the annual report of the Minister of Mines of British Columbia. The excitement of Cobalt stock manipulation has cast a shadow upon the merit of real mining in the Pacific coast Province. Not that legitimate mining is not in evidence at Cobalt. The weekly record of ore shipments proves the value of mining proper. But when many men are fast within the toils of a get-rich-quick craze, they are apt to overlook substantial developments in a country in which the craze has come and gone.

People who were in the British Columbia mining "boom" are not seeking to retrieve their fortunes at Cobalt. A reader of the Monetary Times has been persistent and bitter in his denunciation of mining in every shape and form. The industry, to him, is simply a money-making scheme for company promoters. Whereas what mining means to the country is gathered from the fact that in 1871 the mineral production of the Dominion was valued at \$6,043,868, and in 1905, the figures for which year are the latest available, the value was \$68,574,707. Since that year, Cobalt has shipped ore in thousands of tons.

But this particular mining critic was in the British Columbia "boom." He was one of many hundreds who received a beautiful sheet of scrip, embellished with gold letters and impressive seals. He was one of many who received a dividend shortly after paying for his certificate. He was one who, not hearing news of a certain mine for many months, wrote to the secretary of the company. And he was one of the army who received the reply: "The treasurer and directors cannot be found." We have no office; we have no funds. For heaven's "sake do not write us again—we have no money to pay "the postage."

Now that the unhealthy excitement has passed, mining in British Columbia has become a thriving and legitimate industry. In 1890, just before the beginning of the exploitation of the quartz lodes, the total value of British Columbia's mineral production was \$2,608,000. Ten years later, this had increased to \$16,300,000. Last year, the value was \$23,980,000, being a record year for the Province. The value of the mineral production of all the Provinces combined, in 1906, was a little more than \$31,000,000. British Columbia's pre-eminence in mining spheres is at once apparent.

Almost all the minerals known in commerce are found in the Province. Large areas remain to be prospected. With more capital and more abundant labor the figures for 1906 should be surpassed. The production in 1906 was 11 per cent. greater than that of the previous year, and 42 per cent. greater than in 1903. Forty-one mines shipped in excess of one thousand tons each during the year.

The country looks to British Columbia for assist ance in the solution of its coal problem. The actual production of coal in that Province was, until recently confined to the collieries in the vicinity of the Crow Nest Pass and the collieries on Vancouver Island Other companies are now exploiting coal areas. The gross output of the coal mines of the Provinces last year was 1,899,076 tons. Vancouver and other Pacific coas cities felt acutely last winter the coal famine. The Province has practically at its back door immense con areas. Capital, enterprise and labor are required Reward awaits all three. The industry may have been hampered for lack of transportation facilities: railroad companies recognize that British Columbia wi grow and develop as their steel pushes its way through the forests and around the mountains, and are giving their opinions effect.

In the value of production for 1906, copper comes first, the figures being \$8,288,000. The high prices being realized for the mineral should give this particular

industry a great impetus. Gold covalue of \$5,579,000. Coal and coke the value of \$5,548,000.

The work of the Bureau of M creases year by year. The extension of the Province, the proportional increof mines, the increasing desire of the information which the Bureau supp tricts and camps, and the appreciation of the fact that he may obtain; grat of any rock or mineral which he may are some of the reasons why the office

One cannot but wish that fewer their money in the alleged exploitation this vast Province. Very little that to assist in real development. It simulates the banking accounts of a few enterprocess of the most pleasing ment in the Dominion.

#### COMPLAINTS AND THE

Many complaints of the scarcity higher prices charged for it by bank in various parts of the country. One cannot but wish that fewer people had lost to assist in real development. It simply helped to swell times. the banking accounts of a few enterprising and impudent scoundrels. But the record of real mining in British Columbia is one of the most pleasing signs of development in the Dominion.

#### COMPLAINTS AND THEIR CURE.

Many complaints of the scarcity of money, and the higher prices charged for it by banks, have been made in various parts of the country. In consequence of a presumed slight to a community in a Western Province who did not obtain all the bank credit it sought, the immediate formation of another bank was argued-a bank "which should give adequate consideration to the "wants of the West." In Vancouver, too, there is a proposal to establish "a bank that will keep the deposits of the West in the West for Western business.

A Newfoundland paper strongly criticizes a leading Canadian bank for raising its rates on that Island. The journal suggests the establishment of a Colonial Bank, with the guarantee of the colony.

These communities appear to have forgotten that scarcity of money is world-wide, and higher prices for it universal. Merchants and manufacturers throughout Eastern and Central Canada are feeling the pinch, and cannot pursue opportunities for increased business. It is not reasonable to suppose that any bank will arbitrarily raise rates for the mere sake of making money out of one community.

There are other banks eager for the business of that community, in such a case, if its business were desirable, and there were just grounds for the complaint that enormous burdens are being placed on trade."

Those in Western Canada who want a bank specially "to serve the West," will remember that twenty years ago the Commercial Bank of Manitoba was founded in Winnipeg. It was to be an institution to serve Manitoba. Although it obtained a good share of the business of the then new country, the bank closed its doors after a few years' operation.

The people of St. John's, Newfoundland, might reflect upon the failure of local banks established to do the business of that Island, and the causes of those failures. The establishment of a Colonial Bank would scarcely improve matters, as financial institutions the world over must be affected by general financial conditions.

#### EDITORIAL NOTES.

When experts differ there is bound to be trouble. The Toronto waterfront problem, with its viaduct, bridges, and other transportation phases, has already to a standstill, public opinion might have been big companies. Popular opinion votes for the viaduct. great industries in the palm of the hand.

industry a great impetus. Gold comes next, with a Popular opinion is not far wrong. 'The Toronto watervalue of \$5,579,000. Coal and coke were produced to front has not many rivals. If it were made an attractive asset the world would patronize its commercial and vacation charms. A decision must be given before Sepcreases year by year. The extension of the mining area tember 1st. When this is done, we hope it may show

The judgment of the Railway Commission directing tricts and camps, and the appreciation by the prospector the Grand Trunk Company to issue third class tickets of the fact that he may obtain; gratis, a determination at the rate of one penny per mile, and to run third class of any rock or mineral which he may send to the Bureau, passenger carriages attached to one train per day, is the result of a great deal of agitation. The company will appeal against the Commissioners' decision. It is their money in the alleged exploitation of the mines of time our big corporations, for whose good deeds the this vast Province. Very little that was lost ever went whole country is grateful, recognized the signs of the

> Apparently there should be more trade between Newfoundland and Canada than is being done at present. The Canadian merchant often leaves valuable business in that colony to the enterprise of the United States commercial traveller. It is well to remember that Mr. E. D. Arnaud is located at the Gazette Building, St. Johns, Nfld., for the especial purpose of assisting in the extension of trade relations between the colony and the Dominion. Representatives of Canadian business firms visiting St. Johns should bear this in minds as information valuable to them may be obtained from this commercial agency of the Canadian Government.

> The three orders issued by the Railway Commission to prevent fires in the vicinity of railway tracks will apply to all roads in Canada. Every passenger coach is to be equipped with two fire extinguishers. From May to September inclusive, the railway companies are to provide watchmen at all of the trestles, to guard against fire, and dead grass or any inflammable material is to be removed. No lignite coal is to be burned. There are several other stipulations, all designed to minimize fires from locomotives. The loss by fire each summer of our forest resources through the spark from locomotive is great. The Railway Commissioners' have framed their orders. It only remains to enforce

> Although Haywood, of the now famous Western Miners' Federation, has been acquitted in the eyes of the law, the methods of the Federation are far from countenanced in the eyes of the public. Western mining history is a black blot in the American history book. Haywood may count himself fortunate in gaining his freedom. Judge Wood acted in a spirit which he conscientiously believed to be impartial. He stood erect, and legal technicalities overbalanced him. The extraordinary evidence at the trial proves there is room in the Western Miners' organization for a general cleaning up of vicious methods. Civilization in the United States should not be a mere myth.

After much barking and some biting, the Dominion Coal Company and the Dominion Iron and Steel Company have met in the law courts. A glance at the directorates, as they stood some little time since, reveals a curious state of affairs. It is as well that there really are a few gentlemen who are directors of only one and not both companies. It is unfortunate, seeing that the two companies have so many interests in common, that an amicable settlement out of the courts was not arranged. The personal element has largely stood in the way of peace. Had the two industries been brought made a record as a hoary topic of discussion. Those more caustic than it has been. While each director indichiefly concerned in deciding what is best for all have vidually is respected, it is rather an illuminating fact been apt to think of only what is best for one. The that a handful of prominent men can hold the fate of spirit of altruism is not usually found in the offices of thousands of shareholders, millions of dollars, and two

Every criminal of this class, who can be commission, and stock? (5) What is the whole of the brought to justice, should be dealt with pretty summarily and in an unmistakable manner. If crimes of this sort are allowed license, or are punished not too severely, there is no telling where will be the end. The (7) What provisional contracts have been entered in sword of Damocles apparently has been hanging over for the purchase of sites, erection of buildings, and the heads of this particular group of swindlers for some acquisition of plant? (8) What is the cost of the pro time. It has been almost an open secret in Lindsay that certain people were engaged in private pursuits which were not looked upon with favor by the law. As is frequently the case, suspicious folks did not prosecute their inquiries too far, in case of an unpleasant termination to their investigation.

Now comes another black frost from Wall Street. When Nipissing fell from \$34 a share to \$14.50 within five weeks, somebody was badly hit by the tumble. This week, while the decline was, in the matter of points, not so sensational, it has brought the stock within a little less than three points above par value. That sinister influences are at work is beyond question. The ore shipments from Cobalt constitute weighty testimony to the worth of Nipissing, and of the camp generally. Even the labor trouble, which has agitated the district recently, has not seriously curtailed the volume of the shipments. Last week more than two hundred tons of ore came over the rails. The American Institute of Mining Engineers have seen for themselves what Cobalt really is. At the very moment they were loudest in their praise Nipissing stock gave a graceful imitation of the meteor. The onlooker thinks thrice. He pities those whose money is in stock liable to manipulation by the man who pulls the strings. He wonders why, when one stock declines, the others follow blindly, without regard to individual merits. He feels thankful that more than seventeen thousand tons of silver ore has been shipped from Cobalt since it became a mining centre. The comment of this journal upon Nipissing's attack of nerves last fall is interesting: "The event is not unique in "mining history, but it is surrounded by such extra-" ordinary circumstances, that any explanation may seem "feasible according to one's point of view. Questions " of the propriety, not to say morality, of stock exchange "speculations; problems of what is a fair return on "sound investments, and affairs of public policy are " mixed together so curiously that even a financial genius "could not satisfy himself as to the causes and pending " effects of the debacle."

A writer in a recent issue of the Medicine Hat Times commenced a brave analysis of the merits of the Western Canneries Company, whose destiny is being guided by the optimistic Mr. Malcolm. By the way, some kind friend persistently favors the Monetary Times with copies of journals pleading for the Canneries' cause. This particular article, in the first few paragraphs, gives one the opinion that it is carefully critical. Later, it abandons care, and plumps for Mr. Malcolm. "If the "business is anything like what its directors think-"If the stock pays to him, it must pay to the city." "Twenty thousand dollars is mighty little to pay for an industry like the Western Canneries, if it is worth while for it to be in business. That sum is cheap as a starter for Medicine Hata. The fault with the Western Canneries is the prominence of "if" in its literature. The following questions, which the Monetary Times suggested, in its issue of November 3rd, as tary Times suggested, in its issue of November 3rd, as suitable for the prospective investor, appear to be just as pertinent now as then: (1) What is the record, in dividends, of Mr. F. H. Malcolm as general manager

\$66,363. The paid-up capital is now \$1,218,204.50, and be rest \$50,000. Deposits amount to the very respectable sure \$4,443,619. Current loans, discounts, and other asset are \$4,947,772. The quick assets amounting to \$1,370,804. "The shipment during the past week of over \$1,000,000 in gold to Canada," says the Wall Street Journal, "is 30.

of the New Zealand Canneries, Limited, The Fale (3) What are the terms of the memorandum and articles cost, from ranch to customer, of canned meat? (6) What are current prices of canned meats, and how is the "very modest" dividend of 200 per cent. to be made un posed sites, buildings, and equipment? (9) Why is the qualification for a director fixed at only \$500?

#### CHICACO-NEW YORK ELECTRIC AIR LINE.

The prospectus of this company is not filed with the

Ontario Provincial Secretary's Department.

We would draw the attention of the company to the following clauses of the Ontario Companies Act and the Extra Provincial Corporations Act, which became law on July 1st, 1907:

"95. (1) In this Act the word 'prospectus' shall mean any prospectus, notice, circular, advertisement, or other invitation offering for subscription or purchase any shares, debentures, or other securities of a company, or published or issued for the purpose of being used to promote or aid in the subscription or purchase of such shares, debentures or securities; and the word 'company' shall mean any company incorporated or proposed to be incorporated.

(95. (2) This part of this Act shall apply to every company, whether formed before or after the commencement of this Act, which offers for subscription or sale shares, debentures or other securities, and to every company, whether incorporated under the laws of the Province of Ontario or otherwise, the shares, debentures or other securities of which are dealt in within the Province of Ontario.

"97. (1) Every company heretofore or hereafter incorporated under any general or special Act, the number of shareholders of which is increased to a number greater by ten than the number of applicants for incorporation, or which has its debentures or other securities held by more than ten persons; and every company incorporated otherwise than as above set out which has more than ten shareholders or holders of debentures or other securities within Ontario shall file a prospectus in the manner hereafter set out."

The attention of the prospective investor in the Air Line Company's stock is drawn to the following clause in the same Acts:

"97. (3) No subscription for stock, debentures or other securities, induced or obtained by verbal representations, shall be binding upon the subscriber unless prior to his so subscribing he shall have received a copy of the pros-

#### THE CANADIAN MINT.

#### By Dr. James Bonar, Deputy Master of the Canadian Branch of the Royal Mint.

The coining of money is now considered a prerogative of government. In early times there were many mints in England. Now the only one in that country is the Royal Mint, Tower Hill, London, England.

The United States Mint was established by act of April 2nd, 1792, and located at Philadelphia. Other mints have since been established at San Francisco, New Orleans, Carson City, and Denver. The last two are, properly speaking, assay offices. The United States Mint is a bureau of the Treasury Department, under the charge of an officer called the Director of the Mint.

The title, Master of the Mint, has for many years now belonged exclusively to the Chancellor of the Exchequer. The head of the Royal Mint on Tower Hill London, is Deputy Master, as is also Dr. James Bonar, and the heads of the three Australian Mints at Sydney, Melbourne, and Perth. The reason that mints were established in Australia prior to the branch mint in Canada, was because of the earlier discovery of gold in Australia.]

After long negotiations, an Act was passed by the Dominion Parliament in 1901 setting aside an annuity for the expenses of a "Canadian Branch of the Royal Mint."

The strongest expressions for its advent had come from the West. But the two governments agreed that the fittest place for its establishment was the capital. Accordingly its walls have already risen in Ottawa; and nothing is wanting now but the Royal Proclamation sanctioning the beginning of operations. This Proclamation will probably be issued at the end of the present year. Indeed it is quite possible of operations.

that the work of coining may begin in November.

As a branch of the Royal Mint, the Canadian Mint has the power to coin gold sovereigns. But its more profitable work-more profitable for the Canadian revenue-will probably be the coining of the silver and bronze pieces.

These are now ordered from England, mainly at the profit of the English Royal Mint.

The thirty-sixth annual report of the Royal Mint (Ap-

pendix iii., p. 70) tells us that in the year 1905 the following pieces were executed for Canada:-

Silver, 50 cents, 40,000, value \$20,000; silver, 25 cents, 800,000, value \$200,000; silver, 10 cents, 1,000,000, value \$100,000; silver, 5 cents, 2,600,000, value \$130,000; bronze cents, 2,000,000, value \$20,000; total, 6,440,000; total value,

Canada will now be able to provide these coins for her-There is reason to believe that the amount required will rather increase than diminish. The continued immigra-tion will cause greater need for small money. Patriofism, perhaps, may lead to the partial exclusion of American money, thereby still further stimulating the demand for Canadian pieces.

#### ALBERTA SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

Erickson, No. 1625, \$1,500, W. L. Anderson, Claresholm; Oleskow, No. 1612, \$1,000, John Letawsky, Mundare; Sich, No. 1595, \$800, R. Fletcher, Wostok; Content, No. 1003, \$500, Thomas Q. Moore Content; High River Protestant, No. 144, \$5,000, H. E. Bedingfield, High River; Lainuk, No. 1610, \$1,000, S. R. English, Warwick; Camrose, No. 1315, \$2,500, Duncan Sampson, Camrose; Sunnydale, No. 1594, \$1,200, George C. Wood, Lloydminster; Whitford, No. 393, \$1,200, Robert H. Mennie, Andrew; Glencoe, No. 1622, \$1,400, I. F. Kelly, Wimmer (via Stettler). \$1,400, J. F. Kelly, Wimmer (via Stettler).

No sale has been made of an issue of \$25,000 6 per cent. Vermilion Centre School District debentures offered on

The electors of Grand View, Man., will, on Monday. vote on a by-law authorizing the borrowing of \$2,400 and issuing debentures for the purpose of erecting a new school

The Delorimier Protestant School District, Que., have awarded \$20,000 5 per cent. forty-year school building and site debentures to R. Wilson Smith, of Montreal, at 95.

The Winnipeg tax rate for the present year will be about 16 mills, as against 17.9 last year. The decrease is due to the large increase in the assessment this year, and also to the fact that there is \$97,000 of a balance on hand, that amount of last year's estimates being unexpended when the fiscal year closed on April 30th.

#### CANADIAN BANKING PRACTICE.

By H. M. P. Eckardt.

XIII.

On some few of the accounts it may be that interest on the daily balance is to be allowed. The only way to calculate in that case is to take each one of the changing balances and ealculate interest on it for the number of days it existed. When the proper amount of interest due to each account has been reckoned and checked by another officer, the entries are made.

The total amount of interest to be allowed on all the accounts is debited to interest paid account, and each account is credited with the respective amount due to it. The customers' names, with the interest credited to each one, as entered on the credit side of the cash book; the debit for interest paid appears in one department concerns itself with the clerical work necessity amount on the debit side.

#### How to Calculate Interest.

At every branch transacting a large savings bank business there are always a number of depositors who part of it, that falls to the officer performing the dutie withdraw their balances and close their accounts. One of discount clerk. or more of these withdrawals might take place any day. Whenever interest has accrued on such an account, since the last date fixed for crediting interest on all accounts, it is necessary to calculate what is due upon it and to make a special entry for the interest payment.

The calculation of interest should be checked by another officer before the cheque or receipt is drawn up. When it has been, the most convenient method of getting the customer's receipt for his money is to take his signature on a cheque or receipt form, on which the principal sum, or balance shown at his credit, and the amount of interest about to be allowed him are both set down in figures and added together, the sum of the two bill. being written in the body of the form.

#### Discounts and Collaterals.

When the item arrives at the cash book there would be two entries to go on the debit side—the amount shown as principal would be a debit for the customer's account under the head, "Savings Bank Accounts," and the amount shown as interest would be a debit for interest paid, the two together representing the amount paid out by the teller.

The next post to be considered is that of the discounts and collaterals. It may be that the ledgerkeeper will have the duties of this post assigned to him, but it will be more convenient to treat it separately. It is in the discounting of bills and notes that the banks find their main source of revenue; the department is, because of this and other facts, one of the most inter-

esting of the lot.

A very large proportion of the business of the country is done on credit. Wholesale merchants sell to retailers on two, three, or four months' time. Generally, a purchaser of goods may take the cash discount if he settles his bill in one month from the date of the shipment of the goods. Thus it happens that for a large part, even of his so-called cash sales, the merchant has to wait for his settlement. If he sat down and waited till his debtors remitted cash on the maturity of their respective accounts he would find that an extensive part Only One Safe Way. of his capital was all the time in the unproductive shape of book debts.

#### Banks and the Captain of Industry.

At this point the bank becomes useful. By means of it he can bridge over the time between shipment of goods and maturity of account. He may take notes initialled, but the important point is to have a definite from his debtors or draw bills of exchange on them, and, practice and then to adhere to it. If the bills are handed getting them discounted at the bank, he may have the back to some customers and not to others, the discount use of the money represented in his sales very soon after clerk would not be able so surely to stop a forged the shipment of goods. In other words, the bank buys initial; he most certainly would if the invariable custom the debts due to him when they are put in a certain was for the manager himself to deliver the bills into his

It waits for the maturity of each debt and then collects it. And so with other bills and notes: when the are properly drawn, domiciled at accessible points of places, when the parties signing them possess the requisite degree of credit, and when their unexpired term does not exceed three or four months, the bank stands ready to buy all that may be offered, providing they come under the designation, "Legitimate banki transactions," and providing the bank's own position is such as to permit it to undertake the purchasing of

The discounts call for two different kinds of work, one of which has a much greater degree of responsibil than the other. The higher, more responsible depart, ment decides what bills shall be taken, and on what terms and conditions; it must also watch the movements of the parties to the discounted bills and keep itself posted as to changes in their circumstances. The other sary in connection with the discounting, recording, salekeeping, and reporting of the bills on their being accepter or taken by the bank. It is this clerical work, or a large

#### Ethics of Discounted Bills.

The clerk's first acquaintance with the discounter bill comes about immediately after the customer has succeeded in inducing the manager to discount it. He will have been instructed beforehand in the system of signs by which the manager indicates what rate of discount and of commission is to be charged on the different bills. These signs should tell him, too, in what class or denomination each bill is to be entered in the discount register.

Of course, the manager's initial must be on every The initial, when put on by the manager himsel signifies that the bank accepts the bill for discount, and authorizes the clerk to calculate the proceeds, and to credit them to the account of the party for whom the bill is discounted.

An interesting question as to practice arises here. The customer, be it remembered, is shown or admitted into the manager's office. He has with him the bill or bills he wishes to get discounted. When the manager decides to accept the paper, what is the best method of getting it into the discount clerk's hands? The easiest way is for the manager to initial the paper, mark it with the proper signs, and then hand it back to the customer, allowing him to take and present it at the discount desk.

Though this method is practised at some of the smaller branches, it is not the approved method, as offers too much opportunity for loss by fraud. Three of its dangerous features are: First, the customer mig make some substantial alterations in the paper after receiving it back from the manager and before pre senting it to the discount clerk; second, the custome might forge the manager's initial and duplicate his signs on paper that was never presented to him at all; third he might draw cash on a bill that the manager had agreed to discount for the purpose of taking up another bill or for some other specific purpose.

The only safe way of doing this business, and the way that the best bankers do it, is for the manager himself to deliver the bills accepted for discount to the discount clerk. There are, of course, plenty of customers who could be trusted with the bills after they were

Prominent Canadian Bankers, Brokers and Commercial Men Speak of the Financial Situation.

Mr. Waghorn, of Waghorn, Gwynn & Co., the well-known Vancouver stockbrokers and financial agents, thinks that, so

#### Wholesome Check on Speculation.

"In certain districts," continued Mr. Waghorn, "a wholesome check on speculation is evident, but prices are firm on all inside property. We should say that the effect of tight money in Vancouver is less apparent than in most places, owing to the number of people coming to reside here and rush of tourist visitors. The fact, too, that the terms of sales are not so speculative, a material cash payment in-stead of a nominal one usually being required counts for

"While this growth continues, the expansion of the city and its industries will naturally advance and ensure stability for prices. This industrial expansion would be more marked were it not for the scarcity and high price of labor and material. Any reasonable plan to remedy the lack of labor and bring in workers of all classes would encourage capital investment, and add to and quicken the material development of the Province.

"Living, rent, supplies, and service is high, higher than it should be. Higher wages are obtained, but the purchasing power of a dollar is far less and results in little benefit to the wage earner, and bears hard upon the persons of fixed in-

#### Cost of Living is Too High.

"It is said that fruit remains rotting on the trees for want of help to pick and market it. This is waste of resources, and is illustrative of similar loss of wealth to the community in agriculture and minerals, the product lying ungathered. In relation to this I may say that the Provincial Government are alive to the necessity of assisting emigration. Owing to the dearth of labor, the proper returns have not been obtained from the soil. People have been obliged to let valuable farms go to waste on this account.

"In view of this fact, and of the difficulty of obtaining domestic service even at high wages-wages which are of it-the politicians themselves acknowledge it-and we have to submit to a state of things detrimental to the interests of the Province, inconvenient and unsatisfactory to ourselves, because the labor vote controls the situation and the workers

"The enormous investment of hard cash in all orders of industrial concerns," he said, "and the continuous expansion of these, demanding the absorption of profits for increased stock and plants, is undoubtedly part cause of the

#### Can Afford to Pay High Rates.

"Another factor is the investment of capital in mineral claims, fisheries, etc., by people who have no capital left for development, and find it difficult to procure it, as the number of calls on the market are so great. The consequence is that, although a large flow of capital is maintained in this direction, the keen demand creates high rates. The development of the best propositions is beneficial, inasmuch as it checks pure speculation and creates a decidedly healthy tone. Again, we have the factor that as only the best propositions receive attention we can well afford to pay the rate of interest at present demanded. It is this latter point that must be most borne in mind in relation to British Columbia. in mind Probably in no other place in the world are there so many and such a variety of absolutely first rate possibilities. We can absorb double the capital coming through, and yet not touch speculative business.

There is also a tendency on the part of capital seeking investment to hold back, awaiting even higher rates than at present hold.

· \* ·

The interviews on the financial situation, which have appeared in the Monetary Times in the past two issues, have aroused much interest in monetary and commercial circles. In interest in monetary and commercial circles. In increase of demand for it. The conservative attitude of increase of demand for it. The conservative attitude of increase of demand for it. vestors is doing more than check speculation, it is tending to stay necessary development. We require more money, or far as Vancouver is concerned, business is generally duller, rather can absorb more money, and no matter how fast it as is customary at this season of the year. will not receive it in quantities equal to the field for develop-ment awaiting it."

#### Money Situation is Exaggerated.

Mr. Patrick Donnelly of the Canadian Financiers, Ltd., Vancouver, thinks that popular opinion has overestimated the monetary stringency. Mr. Donnelly's opinion is of weight, as he is well known as one of the successful promoters of legitimate commercial enterprise in British Columbia.

"I believe, Mr. Donnelly said, "that there is quite enough money either in or flowing into British Columbia to meet all legitimate commercial demands, a proof of this is seen in the developments of the last year, many firms having doubled their business. Moreover, it is a well-known fact that commercial men are no mean investors here, and that they are increasing their investments rapidly. The extent to which this is taking place implies increasing wealth when taken in conjunction with the dearth of failures.

"My own experience is that there is enough money in British Columbia, and though the rate is high we can certainly afford to pay it at this side. Cheaper money would mean the withdrawal of the brake to speculation, and as the tendency in that direction must be potentially great here, such cheapness is not to be desired.

#### "If we go Faster we should Get Feverish."

"We are progressing rapidly. If the pace were accelerated, the basis would be unstable and the process feverish. Recently we have promoted several companies, money for which we have no difficulty in procuring locally. My convictions, consequently, are so strong that I am prepared to guarantee the successful promotion of any legitimate commercial enterprise.

" As to a beneficial step that might be taken, I am of the opinion that now is an opportune time for organizing a bank, with headquarters and directors in British Columbia, who would be acquainted with local conditions. Such has been previously attempted, and the attempt was not altogether successful, but the commerce of British Columbia was then double those of a few years ago—it seems absolutely silly to retain a tax and keep out the very people best suited to supply such labor shortage. Every one feels this and talks and the directors were all living outside of the Province.

#### British Columbia Bank Suggested.

"It is obvious that momentarily unemployed capital see something in the introduction of more labor into the country inimicable to their interests. The relation between labor and monetary conditions in this instance are probably too obvious to need mention."

When seen by the Monetary Times, Mr. J. B. Mathers, president of the Dominion Trust Co., of Vancouver, would venture only to give an opinion on local effects, caused by the money stringency.

"The enormous investment of hard cash in all orders of industrial concerns," he said, "and the continuous expansion of these demandism the introduction of more labor into the tends to flow eastward, and that British Columbia does not get a fair return for its deposit account as a consequence. This ought to be rectified, and the present is an excellent moment. I have it at first hand from many of our best financial and commercial men that such an institution would take the cream of the business to be done. This is also my own opinion, and I offer it for what it is worth, believing that this matter calls for discussion at the present moment."

#### RICH MEN AND LIFE ASSURANCE.

It is alleged that life assurance is not sold to rich men at all in proportion to the sums written on poorer persons, on this continent at least. One reason for this, according to a recent writer, is that life assurance agents have not approached wealthy men to canvass for policies because they are too amid. The average agent has not access to such peoples or else does not understand their needs and methods of business. Perhaps, indeed, the agents are not familiar with the condition of men of large wealth, and, therefore, fail to appreciate their desire or need of life assurance.

One might show without much trouble the error of the popular belief that (1) it is not difficult to keep money, but to get it; that (2) wealthy men have ready money; and (3) they can always command money. None of these beliefs is correct, as moneyed men know full well. Few people get money; fewer who get it keep it; wealthy men, with few exceptions, are heavy borrowers, have

A few prominent and wealthy men in the United States carry heavy life assurances. One who is frequently cited is John Wanamaker, of Philadelphia, who carries \$1,500,000, in various policies. Why does he carry so much? Probably because he is shrewd enough te carry both life and fire insurance somewhat commensurate with his ideas or needs, just as he carries more dry goods and occupies a larger building than a smaller competitor. Here is the way it is put by Mr. Edward A. Woods: The idea that because, say, \$800 of fire insurance is sufficient for a \$1,000 building, it is not necessary to insure as heavily in proportion to its value a \$1,000,000 building is so absurd as to require but its statement to confute it. Moreover, the owner of a \$1,000,000 building is probably better able to pay the premium upon an adequate amount of insurance than the man struggling to maintain a \$1,000 property.

Many people look at the amount of life insurance to be carried entirely from the point of view of the convenience of paying the premium, and not of how much insurance is necessary. What man decides the amount of fire insurance from the premium to be paid, instead of the amount needed if the buildings burned down? If men will approach the question of how much life insurance to carry by considering how much will be needed by their families, creditors and estates, when they die, it will be more reasonable, very much more insurance will be carried, and it is the point of view to which attention should be drawn. If this rule were applied, many wealthy men would be unable to get an adequate amount of life insurance, just as our largest concerns find it impossible to get in all the fire insurance companies in the world the fire insurance required. The death of a single individual, as, for example, that of Roswell P. Flower, has caused shrinkage in the values of securities all over the world to the extent of millions of dollars, greater amounts than could have been covered by all the life insurance obtainable.

A man will succeed, fail or die. If he succeeds, the comparatively small amount of premiums safely invested in life insurance is no disadvantage; but frequently props up and saves from failure; if he fails, life insurance is during the many Agents have fixed on Toronto and neighborhood to their summer vacation, all being anxious to be in the characteristics. up and saves from failure; if he fails, life insurance is either the only salvage for the family, or is lost equally with other property; when death comes—and it surely you are cordially invited to attend and bring with you are comes—in most cases it is or saves the whole estate. friends, and the special railway rates are extended to The plans of wealthy men depend upon and extend over wives and lady friends of those attending. many years. #### DOMESTIC INSURANCE.

This title applies to a measure recently passed by the British House, which gives protection to great numbers of persons who live by toil of various kinds. This is the Workmens' Compensation Act, which is now operative in the United Kingdom. Its provisions are very comprehensive, for besides its application to mechanics or laborers in by fire insurance companies for conflagration losses on this particular, it applies to shop assistants, to domestic servants, and even to seamen. It protects all classes of workers, which the old act did not do. By the new act, a person is a work-man if he "works under a contract of service or apprenticeship whether by way of manual labor, clerical work, or otherwise, or whether the contract is express or implied, oral or in

This legislation gives the worker rights which he did not enjoy before, and doubtless raises many curious questions, not Chicago and Boston fires in the seventies, \$750,000, and a previously foreseen. In anticipating some of the emergencies which the legislators perhaps did not foresee, and which no legislator could foresee, a London journal says: "This act makes the householder liable for his maid-of-all-work and the small shopkeeper responsible for his assistant and his The position of a casual charwoman or jobbing gardner may have to be defined; the vicar may be held responsible for injury to his bellringers or his choirlads; the doctor for an accident to his locum tenens."
Then adds, becoming suddenly serious, "but in the main it makes a very substantial and valuable addition to the rights of labor."

It will manifestly be to the interest of all employers of labor in the Old Country to effect insurance against their in-The arrangements made by accident insurance companies and employers' liability companies in antici-pation of this act render this easy, as we have several times shown. Indeed the companies have already been doing a very large business in affording to employers the means by insurance to discharge their obligations to servants should the necessity arise. Employers ought to be careful in their own interest to obtain "insurance that insures," for many new schemes may be tried by many new companies. As to the probable cost of the tax upon industry arising from the new state of things, opinions differ.

One company estimates that there are 1,000,000 domestic servants at work in the United Kingdom, and that at 3s. per cent per head for insurance this will only be £150,000 a year. But in the iron trade the estimates vary: the tax will be not less than £2 per cent. of wages, says one—£1 10s. says another. In the textile industries the estimate is 12s. per £100 of wages paid. There is thus a great variation in the calculation of risks of accident run in different classes of labor.

#### FIRE AND MARINE NOTES.

Montreal has decided to purchase two automobiles for use in fighting fires, especially in the outlying districts.

An Ottawa civic committee recommends to the city council that an inquiry before a county judge be conducted into the circumstances of the Edwards fire last week.

\$10,000,000.

. . . . to be drying up.

The Economical Fire Insurance Company, of Berlin, Ont., held its semi-annual meeting last week. Fire losses have been light, and the half year has been one of the most satisfactory the company ever had.

membership in view of these Conventions.

The fact that the "Committee on Arrangement" is composed of wideawake Toronto men, with Mr. Herbert C. Cox as chairman, jealous for the honour of the conventions.

A montreal dispatch states that the Anglo-American Fire Insurance Co., have acquired controlling interest in the Montreal-Canada Insurance Co. The board of directors of the latter concern has been re-formed and is now constructed. and S. F. McKinnon, J. B. Barker, R. Millichamp, H. H. Beck, Fred C. Lariviere, Emery Lariviere and N. Laclaire. The officers are: H. H. Beck, managing director, and Fred Page, secretary.

> As a result of last week's extensive fire in Victoria, the mayor of that city called a special meeting of the council to consider charges of inefficiency freely made by citizens against the fire-fighting arrangements. As we have already stated, the water-pressure at the fire was very inadequate. It is now said that several of the insurance companies have issued an ultimatum that they will not continue to carry risks unless the service is improved. The damage done is estimated at \$125,000, and the number of buildings burned at nearly a hundred.

> In looking up for a subscriber some of the amounts paid continent we find that the Phoenix, of London, has been a large contributor. The first severe shock came in 1794, when it was only a dozen years old, the Ratcliffe fire, which cost it \$250,000. Next, the St. Thomas, West Indies fire of 1807, which took \$1,000,000 out of its coffers; Newfoundland derived \$570,000 from Phoenix insurance in 1846, and Hamburg \$1,080,000 in 1842. Coming to later years, the London Tooley Street fire cost that company \$650,000; the second Newfoundland blaze, \$620,000. Such facts as these, however creditable to the company, are depressing to the They should teach unthinking people what a real thing is the conflagration hazard.

#### SOME REMINDERS CONCERNING FIRE.

#### Manitoba Commissioner talks of Conflagrations, from the London Blaze of 1666 to present day Outbreaks.

A paper on Fires and their Causes, read to the delegates to the Firemen's Convention in Winnipeg, was by A. Lindbach, fire commissioner of Manitoba, who stated that his office is one of investigation, also of prevention work as to fires; and he hoped it would some time be an educational office on the line of fires. He will do, we expect and hope, some such valuable work as has been done for years in Ohio, by the Fire Marshal's office of that State. The essayist gave some historical facts concerning fires, particularly mentioning the great fire in London in 1666, when 13,300 houses were destroyed, 436 acres desolated, and total loss of \$50,ooo,ooo caused, as having led to the inauguration of the great benevolent institution of fire insurance, though the first in-surance company was not incorporated until 1606. The causes of fires were classified under three general heads of carelessness, incendiarism, and accident. After fire insurance had been inaugurated the new causes of fires, incendiarism, was developed. Instances were given of organizations formed for the purpose of defrauding insurance companies. One instance was mentioned of the authorities of a town conspiring to burn down the entire town for the sake of getting the insurance to get better buildings

It has been often remarked how great a fire-setter matches have become: The lecturer referred to phosphorus matches, which came into general use in 1833, as one of the most prolific causes of fires. In 1835 the safety match was invented in Sweden. The phosphorus match ignited at 175 degrees Fahrenheit; the safety match only at 357 degrees. With the latter there is no danger from rats and mice, or from their being stepped upon. Another cause referred to was spontaneous combustion; and although the elements of it are very generally known it is still a prolific cause. About The money needed by the city of New York this year for fire protection exceeds \$7,000,000. But for the year 1908, the amount asked by Fire Commissioner Laudry will be fireproof buildings. Buildings of non-combustible material are not necessarily fireproof. Mr. Lindbach discussed astrictly fireproof building is. Referring to the mayor's remark that the moral hazard in Winnipeg is small, he told of Dundas reservoir is only one-third full, which is much below the safe level for fire protection. Watering the streets has been suspended. The springs that supply water appear has been suspended. The springs that supply water appear has been suspended. The springs that supply water appear has been suspended. The springs that supply water appear has been suspended. The springs that supply water appear has been suspended. #### MONTREAL'S DEBT

Stated to be Biggest, per Capita, in America-Shipments from the Port-Banking Notes.

> Monetary Times Office, August 1st.

> > \$ 2,329,996.18

The following table shows the earnings and expenses of the C.P.R. for June 1907, as well as for the year ended June 30, 1907, and the net profits, compared with the net profits for the same periods in previous years:-

Gross earnings Working expenses	June 1907. \$6,817,712.41 4,402,606.13	Year ended Jun- 30, 1907. \$72,217,527.64 46,914,218.83
Net profits Previous year		\$25,303,308.81 22,973,312.63

The net profits for June were consequently 24.06 per cent. greater than a year ago, while those for the entire year increased 10.14 per cent.

#### Civic Debt an Undesirable Record.

Increase this year. \$ 477,056.\$2

It is claimed by Le Canada that the debt of Montreal, per-head of population, is the greatest of any city in America. This is a record which the citizens of Montreal are not desirous of maintaining, but which they will doubtless continue to shoulder.

The consolidated debt of the city at the end of the present year will be, in round numbers, \$35,000,000. It is made up of the following items: Consolidated debt at the end of 1906, \$27,000,000; loans, calculated at 10 per cent on the increase in the revenue, \$1,960,000; debts assumed by the city with the annexation of suburbs, \$2,700,000; loan raised this year, \$380,000; interest, \$1,300,000, making a total of \$34,740,000.

\$34,740,000.

According to Lovell's 1907 directory, the population of the city proper is estimated at 360,000. Consequently, if the debt were a million more—which it may shortly be—it would be exactly \$100 per head of population.

The city may have a surplus of \$200,000 on this year's operations. It is claimed by some of the officials of the civic financial department that the income will reach the \$5,000,000 mark this year. The estimates had placed them at \$4,807,271. The actual revenue collected last year was \$4,541,000. mark this year. The estimates had placed them at \$4,007, 271. The actual revenue collected last year was \$4,541,000, and a record surplus of \$375,000 was shown, owing to an increase of \$2,000,000 in the city assessment values.

The specifications for the construction of the big new

cement conduit for the supply of water to the city of Mon-treal, were approved at the meeting of the Water Committee, Tuesday afternoon. The conduit will be 27,300 feet long, and an average of 8 feet 6 inches in diameter, though for

practical purposes the bottom will be flat.

Tenders will be called for to be opened on September 9, but no tender will be entertained unless accompanied with a cheque for \$50,000.

#### Volume of Exports Satisfactory.

The navigation season is almost half over. The results, as shown by the volume of exports via the port of Montreal as shown by the volume of exports via the port of Montreal are, on the whole satisfactory. Grain shipments are nearly all larger than those for the corresponding period last year. This is probably due largely to the impossibility of shipping it out last winter and early this spring, owing to the blockade caused by the severe weather and the transportation

Butter shipments are remarkably small; the large supply of butter in England at corresponding or lower prices having hindered shipments from here. The make of butter in Canada was much lighter than usual, the factories finding it more remunerative to turn out cheese. Hay shipments were light owing to a short crop, and shipments of buckwheat declined owing to scarcity. The export of pats was extraordinary, the shipments of the previous season having been restricted by shortage of supply.

The following are the shipments by ocean vessels from the opening of navigation till the end of July, as shown by Board of Trade records, the figures being in order for 1906 and for the present season:—Wheat, bush, 5796,242,

Which only proves that one is one is one that one is on 7,731,045; corn, 1,615,739, 2,605,545; peas, 66,945, 67,031; that somebody behind the scenes is -

oats, 997,140, 2,463,038; barley, 368,539, 370,329; rye, 25,196, 66,526; buckwheat, 42,155, 1,443; flax-seed, 814,201, 390,711; flour, bls., 344,128, 283,241; meal, bls., 34,295, 32,113; eggs, cases, 1,670, 1,736; butter, pkgs, 127,037, 12,824; cheese, boxes, 836,727, 679,306; lard, bls., 122,400, 130,418; pork, bls., 1,175, 1,469; beef, 745, 1,059; meat, pkgs., 88,473, 59,986; hams and bacon, pkgs., 29,146, 22,807; deals, standards, 22,682, 7,255; leather, rolls, 8,082, 3,870; hay, bales, 216,218, 35,147; cattle, head, 47,960, 35,220.

Volume 41.

#### Coal Prices to Advance.

It is said that on September first the price of anthracite coal will be advanced 25c. per ton. This advance, it is claimed, will be made necessary by the increased expense of handling the coal and getting it to the consumer. Consequently, the price of all kinds of coal will be higher this season, the certainty of an increase in soft coal prices having already been announced in these columns.

The Canadian Manufacturers' Association has taken up the matter of cartage rates, and has appointed representatives to visit the Board of Trade and the Chambre de Commerce for the purpose of discussing the matter with these organizations. It seems that the rates are considered very high, besides which strikes and other interferencess are always threatening, and the merchants are desirous of making some provision with a view to less cost and more security. The agitation has been productive of many suggestions advocating the handling of freight by the street railway.

According to cables received this week, a new ship is being built for the Dominion Line, for its Liverpool-Canada service. In this ship a new combination of turbine and reciprocating engines is being adopted. There will be three distinct installations of machinery, and three propellers. The tonnage of the ship will be 14,000, and the speed 18 knots an hour. She will make her first trip to the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, in law, part leaded a William of the St. Lawrence, part leaded a will be three distinctions of the ship will be three distinctions of the ship will be 14,000, and the speed 18 knots and the ship will be 14,000, and the speed 18 knots and the ship will be 14,000, and the speed 18 knots and the ship will be 14,000, and the speed 18 knots and the ship will be 14,000, and the speed 18 knots and the ship will be 14,000, and the speed 18 knots and the ship will be 14,000, and the speed 18 knots and the ship will be 14,000 and the speed 18 knots and the ship will be 14,000 and the speed 18 knots and the ship will be 14,000 and the ship will be 14 rence in June next. & Harland & Wolff are building her.

#### C.T.R. will Appeal in Two Cent. Fare Judgment.

Mr. W. H. Biggar, general solicitor of the G.T.R., being asked what the road intended to do in view of the recent judgment directing the company to issue third class tickets at the rate of a penny a mile, and to operate a certain number of third class carriages, said: "We shall; of course, appeal immediately. . . . . . If the judgment should finally go against the G.T.R. a third class passenger car will be placed on the route between here and Toronto once a day, both ways. More than that it is hard to say, because we shall at once go into appeal. The services we shall at once go into appeal. once go into appeal. The outcome remains to be seen."
An interesting point has just been decided by the Privy

Council in the case of the Bank of Montreal against the King and others. Some years ago, an employee of the Militia Department, one Martineau, forged a number of checks of the Militia Department, the forms of which he had stolen. He cashed a number of the cheques at the Bank of Montreal before the fraud was discovered. The bank claimed that the Department was responsible for the amount of the fraud, but the Privy Council has decided assistant this contention. The the Privy Council has decided against this contention. bank is thus responsible for the amount of the cheques—over \$70,000—and the costs. The bank had a somewhat similar dispute with the City of Montreal a few years ago, and the result of which was probably a compromise.

#### COBALT ORE SHIPMENTS.

The following are the Cobalt ore shipments in pounds, for the week ended July 27:—Buffalo, 600,000; Coniagas, 312,000; La Rose, 80,000; Nipissing, 60,975; Trethewey, 50,300; total, 563,275 pounds, or 281 tons.

The following are the shipments, in pounds, since January 1st: Buffalo, 1,243,700; Coniagas, 4,080,510; Cobalt

530; Silver Queen, 476,157; Silver Leaf, 43,518; Trethewey, 1,448,018; Townsite, 84,078; Temiskaming, 110,000; University, 61,383; Imperial Cobalt, 37,530.

The total shipments since January 1st, 1907, are now 14,053,394 pounds, or 7,026 tons. In 1904 the camp produced 158 tons, valued at \$136,217; in 1905, 2,144 tons, valued at \$1,473,196; in 1906, 5,129 tons, valued at \$3,900,000.

#### STEEL-COAL DISPUTE.

Review of the Chief Events of the Past Few Years, Leading to the Present Litigation.

Now that the long-expected legal battle has commenced, a review of the situation is given below:-

Damages claimed by Steel Company: \$15,468,586. Chief points to be settled: Was the Steel Company justified in refusing coal? If so, was the Coal Company justified in breaking the contract?

Many of the large shareholders of the one company were large shareholders in the other company.

An Interesting Comparison of Directorates.

Here is the board of directors of each concern :-

#### Steel Company.

J. H. Plummer, president, Hon. L. J. Forget, vicepresident, Sir Wm. C. VanHorne, Hon. Geo. A. Cox, Hon. David Mackeen, F. H. Dimock (N. Y.), W. B. Ross, F. S. Pearson (N. Y.), Hon. Robert Mackay, Wm. MacMaster, Elias Rogers, H. M. Whitney (Boston). Frederic Nicholls, Sir Henry M. Pellatt, E. R. Wood.

#### Coal Company.

James Ross, president, F. H. Wanklyn, vice-president. W. D. Matthews. James Reid Wilson, R. B. Angus, Lord Strathcona, F. S. Pearson, W. B. Ross, F. H. Dimock Hon. David Mackeen, Hon. Geo. A. Cox, Sir Wm. C. VanHorne,

Half the members of the Coal Company's directorate were also members of the Steel Company's. This is not so to-day, several members of each board having resigned. First Coal Contract in 1899.

The two companies first contract for coal was entered into in 1899, the price being \$1.20 per ton and .04 cents for car hire, making a total of \$1.24 per ton. No limit was placed on the quantity of coal to be supplied under this agreement. Delivery was to be made whenever required. This contract assisted considerably the raising capital for the Steel Company.

In 1902 the contract was cancelled by an agreement by which the Steel Company was to lease the Coal Company, there being a provision whereby the original contract was to be revived, in a modified form, in case of the cancellation of

This latter contingency arose the following year. October 20th, 1903, a new contract was made and the lease surrendered. This is the lease over which the present trouble has arisen. It was based on the original contract, but many of the terms thereof were altered. For instance, the rate per ton was raised 4 cents, being now \$1.24 for the coal, and 4 cents for the car, or a total of \$1.28 per ton. These prices were subject to revision in 1909. In this contract the quantity of coal to be called for was limited to that necessary to operate blast furnaces at Sydney, of the capacity of the four existing furnaces with their adjuncts. The contract was to run till 1992, and by it the Coal Company was to supply coal for the manufacture of coke for the Steel Company's blast furnaces, and coal for the gas producers used in connection with the open hearth furnaces and mills, which would mean 75 per cent. to 80 per cent. of the Steel Company's entire consumption, according to Mr. Plummer, who also claims that the quantity required from the Coal Company, under this contract, will shortly reach 100,000 tons

#### Disputes as to Quality of Coal.

During the next few years, disputes arose regarding the quality of the coal supplied by the Coal Company. In December, 1905, an understanding was reached between the two companies (but all rights were reserved under the contract of 1903) by which the Steel Company made certain concessions regarding slack banked coal and delivery in advance. These concessions, according to Mr. Plummer's statement, were to continue so long as the Steel Company's requirements were satisfied unless interfered with by causes beyond the Coal Company's control.

the quality of the coal delivered was unfit for the purposes schaum stock figured prominently. for which it was required. The Steel Company refused cer-

tain deliveries of coal on the point of quality and made purchases of coal from the Nova Scotia Steel and Coal Co.

On November oth, 1906, the Coal Company declared the contract void on the grounds that the Steel Company had rejected its coal and had made purchases from outside sources. It placed the act of violating the contract at the door of the Steel Company and refused to make any further coal deliveries.

Negotiations were commenced with a view to adjusting matters for the time being, in order to avoid the loss which would accompany the closing down of the Steel plant. The proposition, as announced at the time, was that the Coal Company should continue to supply coal at the ordinary market price, subject to the decision of the courts as to the rights of both companies. The Coal Company refused to supply the coal on such conditions unless the legality of its act of November 9th was admitted, claims for damages waived, and a new contract entered into.

Steel Company Refused to Comply.

The Steel Company refused to comply with these conditions with the result that its furnaces remained banked, owing to inability to obtain sufficient coal from the Nova Scotia Steel and Coal Company or other sources.

In December last the Hon. Mr. Fielding made an attempt to fix up an agreement between the companies. An agreement was signed whereby the Coal Company was to supply the Steel Company with 65,000 tons per month for two years, at the rate of \$1.75 per ton for slack and \$2.62 for run of mine, for the first 30,000 tons per month, and at the rate of \$2.80 for slack, and \$3.05 for run of mine for the remaining 35,000 tons per month. The works opened up again and commenced active operations.

At the beginning of January the details of the damages demanded by the Steel Company against the Coal Company became known, action having been entered before the Nova Scotia courts. The amount claimed was \$15,468,580. This is rather more than the common stock of the Coal Company.

The claims were \$400,000 for damage to the coke ovens, furnaces, loss of profits and increased cost of production up to November 30th, 1906, \$65,580 was claimed for increased price of coal bought from outside sources. The Steel Company also asked that the value of the 90-year contract to the Steel Company be assessed at \$15,000,000, and that the Coal Company be held liable to the Steel Company in that

The declaration of a 4 per cent. dividend on Coal common was thought to be partly a matter of policy, in view of the position of Mr. Ross in the struggle, and also as a slight stimulant for the stock.

The annual statement of the Steel Company, issued in June last, gave coal at the contract price of \$1.28. The aggregate of the extra cost, \$810,000, was placed in contingent account to be taken from the Coal Company in case the courts decided in favor of the Steel Company.

#### Another Peace Conference Fails.

Sir Henry M. Pellatt unsuccessfully endeavored to ar-

range a peaceful settlement.

Mr. Ross, president of the Coal Company, had become the largest individual holder of Steel stock. It was thought he and his followers could control a majority of votes at the Steel Company's annual meeting, which was due on July

The resignation of Mr. Plummer was announced. Steel shareholders then thought that with the president of the Coal Company in control their position was just what he pleased

Mr. Plummer rather upset calculations by announcing that the story of his resignation was absurd, and that there would be no annual meeting of the Steel Company on July 5th, he having obtained a postponement, in accordance with the company's charter, until October 1st.

The opposing interests endeavored to postpone the date of the legal action. Their plea was heard and refused. Next they tried to have rescinded, the permission to postpone the annual meeting. This attempt was unsuccessful.

#### DECLINED FROM EIGHT DOLLARS TO FIFTY CENTS.

Last week witnessed a meteoric decline on the Wall Street curb. Meerschaum stock broke from \$8 a share to 50 cents a share, creating much excitement among the brokers. One explanation of the slump was the selling by an Company gave notice that it would withdraw from the provisional understanding on November 1st. It claimed that in August, September and October the deliveries of coal were reduced without instifct of the company was the selling by an interest, said to be in a pooling agreement, but who had become dissatisfied. #### SECTION WINNIPEG

330 SMITH STREET.

Representatives: Amalgamated Press of Car In Association with 1.
The Market Record and The Daily Grain Letter.

#### WINNIPEG STOCK EXCHANGE.

Organization Nearly Complete-High Wheat Prices to Rule Winnipeg's Civic Loan.

Monetary Times' Office,

Winnipeg, July 29th. During the past week the weather has been favorable, heavy showers, and plentiful sunshine. Considerable with heavy showers and plentiful sunshine. damage was done in parts by hail and wind, but only where the crops are heavy. Several excellent samples of growing wheat were exhibited on the Exchange from different parts in the West, which helped considerably to make grain men believe that the crop may turn out better than at first ex-

#### Concerning the Wheat Market.

Whatever yield should the West have this fall, we are satisfied that prices will be much better than last year, not only because of the condition of the crop alone, but also because of the crop shortage the world over. Should there be a black rust scare, and there is some probability, with a late harvest, the market will rise by leaps and bounds. Speculation has so much to do with the price of wheat, that requirements or supply and demand little affects the price when the public are in the "market."

During the week, the city will be visited by the Beef Commission, who will secure evidence as to the operation of the beef trade in the province. Only one witness is cited, but numerous parties will assist in the investigation. sensational evidence is expected here.

The city may erect a public abbatoir in the near future, which would be of great assistance not only to the small dealer but also to the farmer.

#### Winnipeg Secures Loan of \$3,000,000

After lengthy negotiations between the city authorities and Messrs. Heuback and Farrell, agents for an English financial house, the city has decided to secure cash for their \$3,000,000 issue of thirty years debenture bonds at 94. Financiers here think, considering the money market and the necessity of obtaining a loan at the present time, the city has closed a good bargain.

city has closed a good bargain.

The following figures have been compiled by the City
Treasurer showing what will probably be the expenses and
net returns of the deal to the city:

	ds to London 2,000 00 to Winnipeg (£400.5
000, rate \$4.85)	
\$3,000,000 at 94	\$2,820,000 38,600
	92 -9. too

There are a few conditions attached to the sale which are interesting, on account of the deal being between English capitalists and a Canadian city. The stamp duty in England alone is ½ per cent, or \$15,000. The new bonds will rank equally with other city bonds while the city undertakes that there shall be no further issue for six months and that a further six months must elapse before any bonds can be offered for sale at 94, and that the present underwriters shall have the preference and first refusal of any offers providing the same be equal to the highest offer.

Payment on the same present issue will be spread over three months, beginning about August 10th, plus interest to date as from August 1st.

#### Coal Shortage is Feared.

News reaches us from Alberta that the Coleman mines are experiencing a car shortage. Several of the mining companies were led to understand by the C. P. R. officials that there would be ample car accommodation for a continuous capacity run for the season. Among the companies who have gone to a large expense for adequate car service was the International Coal and Coke Company. There is very Dietzgen Co., little coal at the different stations throughout the West, and unless matters improve by providing sufficient cars, it will (Continuous Continuous Continu

be impossible to have a sufficient supply at the larger cities before the grain rush starts.

On Thursday an organization meeting of the Exchange was held in the office of Mr. Hugh Sutherland, when the by-laws were adopted and officers elected. The membership for the present is limited to twenty-five seats and the entrance fee will be \$200. Owing to the amount of organiza-tion work to be done, it was decided not to make any an-nouncement of the date business will be transacted, but it is understood that during the month of September premises

will be secured and the Exchange formally opened.

The officers elected were: Chairman, A. M. Nanton;
Vice-Chairman, T. H. Champion; Secretary-Treasurer, W.
Sanford Evans; Committee, R. T. Riley, Hugh Sutherland, and W. R. Allan.

Brandon Fair for 1907 proved financially successful. It 13 described as the best ever held in the Wheat City.

in Toronto, Montreal, and of the Chief Happenings Summary Other Exchange Circles.

#### STOCK EXCHANGE THIS WEEK.

Little improvement was shown at any time this week, and the general tone of the markets has been dull and easy. Upon several days the volume of business at Montreal was scarcely worth recording. A feature was the decline in Do-minion Iron, common to 2014. Another feature was the decline, on Thursday, of Montreal Power to 92 for a broken lot at the close. This was ex-dividend, but even with the dividend added the price would only be 93½. The advance which it was thought would come to Power because of the increased dividend is not being realized. A continuance of present conditions is likely for some time to come.

The break in Nipissing was the chief feature this week in the Cobalt mining markets. It sold down on the New York curb and the Toronto Exchanges on Monday nearly \$2 a share below the previous week's close. The following table shows this week's sales:-

Monday .- The Toronto market was quiet and irregular, the feature being the decline of 1½ in Nipissing. Bank shares were quiet, the only transactions being 60 shares of Traders at 130. The tone at Montreal was dull and heavy. Montreal Power was the only active issue, and 553 shares changed hands.

Tuesday.—The feeling at Toronto was unsettled.

Nipissing was ½ lower. A broken lot of C.P.R. sold at 175%. The tone at Montreal continued dull, with further losses throughout the list.

Wednesday.—The Toronto market was quiet and irregular. Money was scarce and some loans called. The tone at

ar. Money was scarce and some loans called. The tone at Montreal generally was weak. There was some liquidation. The selling was heaviest in Dominion Iron, common.

Thursday .- Trading at Toronto was more active, with values unsettled. Montreal was dull and weak. Nipissing sold at 8%, 4% points lower than last previous sale there.

Friday, 5 p.m.—Toronto Reilway was active in Mont-real, one block of 700 shares selling at par. Coniagas on the Toronto curb sold at \$3.69 to \$3.70 for 625 shares.

#### IN THE COURTS AT LAST.

Sir Wm. VanHorne's evidence on Tuesday was very favor-Ross and Sir Wm. were seen to be strained.

Mr. Ritchie, in his opening address on behalf of the Steel Company, said that it was one of the contentions of the Steel Company that the coal supplied was not from No. 6 Phelan seam, and also that the coal was not suitable for the purposes of the company. He also said that previous to the trouble the Coal Company had taken back coal that was rejected by the Steel Company, and that early complaints in regard to the quality of coal were met in a friendly spirit by the Coal Company.

He also pointed out that while agreeing to supply 80,000 tons a month, the Coal Company was short in deliveries 21,000 tons in August, 29,000 tons in September, and 18,000 tons in October, and that the Steel Company had to supply coal elsewhere to meet requirements.

Thursday, the third day of the hearing, was largely devoted to a discussion as to whether the Coal Company's No. 6 is situated on the Phalen seam. This is an important point

for the Coal Company's defence.

The matter was discussed with Mr. Fletcher of the Geological Survey in Montreal in December, 1906. He understood Mr. Fletcher to imply that it was not an easy matter with the information at hand to state positively that No. 6 was on the Phalen seam. The conversation with Mr. Fletcher took place at the Windsor Hotel. Mr. Plummer and Senator McKeen were present. He further understood Mr. Fletcher to intimate the impossibility of geological maps being inaccurate. The Steel Company designated the Phalen seam as understood prior to the making of the contract with the Coal Company.

Mr. Ritchie at this point requested the production of the notices by the Steel Company designating the Phalen seam. This resulted in a long search through the correspondence on file, and much valuable time was lost, and the hour for adjournment was reached with but little progress having been made.

#### INVESTMENTS IN INDUSTRIALS.

The following figures give an idea of the value as investments of some of the industrial stocks. Particulars of capitalization, etc., will be found in the stock and bond tables. The table is compiled up to mid-May.

#### SMOKE AND ITS PREVENTION.

By W. H. Booth,

Consulting Engineer and Official Lecturer of the Coal Smoke Abatement Society, of London, England.

[In view of the importance of the prevention of the smoke nuisance in the cities and towns of Canada, the Moneyary Times has requested Mr. W. H. Booth, who has studied the subject for many years, and is looked upon as an authority to discuss the matter in these columns. Mr. Booth tells the story of smoke prevention in a manner which will interest every Canadian citizen, and with a freedom from technicalities.]

steam boiler furnaces, but nevertheless its production can be reduced to very small proportions, and black smoke entirely prevented by observing correct principles in furnace design and construction. The first cause of smoke is probably the neglect to provide an adequate air supply at the correct locus. The next cause is the endeavour too quickly to abstract heat from the gases before they are burned.

Insufficient space in a furnace will often cause smoke to be produced, because this fault shortens the path of the gases

be produced, because this fault shortens the path of the gases on their way to the boiler heating surfaces. Why is a common vertical boiler so great a sinner? Because the gases from the coal rise vertically from the grate surface and are not mixed with air.

not mixed with air.

Similarly the locomotive smokes from the same cause. Smoke will be formed because a boiler is worked too hard, and it will also be formed when a boiler is too easily worked unless the arrangements for regulating the air supply are correctly devised. Bituminous or smoky coal does not contain much actual elemental gas. It contains a small percentage of hydrogen, and this light gas is combined with part of the solid carbon of the coal and has the power of converting many times its own weight of carbon into hydrocarbon gases. carbon gases.

carbon gases.

These gases burn readily if mixed with air and maintained hot until they have become thoroughly combined with air, or burned. If the combustion is checked, black smoke will be formed because some of the carbon is thrown out of combination and is not in contact with air hot enough to combination and is not in contact with air hot enough to burn it. An ordinary central air tube, petroleum or oil lamp, is an example of very smoky fuel being burned perfectly. Stop the central air supply and smoke will be produced at once. Turn up the wick too high and again smoke will be made because there is more oil gas than there is air to burn it. Take a lamp that is just turned up so far that it will smoke if the stack be turned any higher, and, instead of glass chimney use one of iron with a surrounding jacket of water. Again smoke will be produced, not because of lack of air or of mixture but because there is too low a temperaof air or of mixture but because there is too low a tempera-ture, for heat has been abstracted from the flame by means of the water cooled plate chimney before the gases have been completely burned. The oil lamp can thus be used to illus-trate all the phenomena of soft coal combustion, for oil is, all said, merely a very soft coal. Where soft coal way con-tain say 5 or 6 per-cent of hydrogen, the petroleum oils will contain 16 per-cent. of hydrogen,

tain say 5 or 6 per cent of hydrogen, the petroleum ons will contain 16 per cent. of hydrogen.

Nothing in the shape of coal will produce so bad a smoke as may be made with oil. On the other hand oil can be very intimately mixed with air, and, if the necessary condition of high temperature be maintained, oil can be burned without smoke in a furnace of correct design, as pointed out in my book on "Liquid Fuel and its Combustion," published in London by Constable & Co.

So finely floured bituminous or soft coal will burn perfectly like gas if blown by an air spray into a suitable furnace and it would be best so burned were there not difficulties with the emission of the dust or consumable ash from the chimney top.

In boilers of the Lancashire type, worked under good conditions, there is no smoke formed by a good fireman. This teaches us just where the critical point arises.

The only fault is perhaps that of insufficient temperature. But this knowledge, properly applied, enables any furnace to be improved. In many cases the design is so bad that but little good can be effected, but an expert engineer

that but little good can be effected, but an expert engineer can tell this to the owner and save him from spending useless can tell this to the owner and save him from spending useless money on a hopeless case, Mere apparatus is in itself of no use unless such apparatus happens to fill a gap in the group of conditions necessary to perfect combustion. If it should do this then the maker of the apparatus gets some credit. If it should not give success it is because some other gap yet remains unfilled.

The chemistry of the combustion of bituminous coal is, in short, very simple. It is only to ignorance of such chemistry.

in short, very simple. It is only to ignorance of such chemistry or futile aftempts to circumvent the laws of chemistry, which are Nature's laws, and are not to be disobeyed, that smoke is due. For twenty years, these simple facts have been insisted on by the writer. He did but add something essential to the teachings of Mr. Wye Williams of 50 years

ago. The facts as demonstrated for many years by the author are now accepted by Professor Breckinridge and Professor Kent and others as correct, and a body of scientific thought is now engaged in preaching the doctrine so long insisted on by the present writer.

#### MONEY AND MUNICIPALITIES.

A municipal census gives Sherbrooke a population of 14,713, an increase of 763 for the year.

The Unionville School District No. 16 (P.O. Union.

ville), Ont., has disposed of school debentures

Sherbrooke ratepayers have woted a bonus to the Fairbanks Company, of St. Johnsbury, and have given a franchise to a public steam-heating company.

The citizens of Brownlee, Sask., which in May was merely a place of tents, are preparing to incorporate as a village, having many wooden business houses.

The City of Fredericton, N. B., have sold between \$40,000 and \$50,000 of the re-issued bonds. It is stated that none of these have been sold as low as 95, and that a large percentage of them were sold for 98. Almost the entire debt of the city, amounting in all to \$180,000, will be due during the next few weeks.

A by-law approving of the sale of debentures to raise \$4,000 for expenditure on sidewalks, grading and improving streets has been carried at Lumsden, Sask. Donald Jeffrey, of Lumsden, offered to purchase the debentures. The town council will not require to look for a purchaser in the East. There are others in town prepared to purchase if Mr. Jeffrev declines.

#### FACTORY LOCATIONS.

The following Canadian municipalities are offering inducements to secure manufacturing er Those interested should corres the parties named below. In order to facilitate the bringing together of manufacturing firms with municipalities ready to make special co we are charging a very nominal rate for cards in this column. It will be furnished for the asking.

Vancouver Office: Representative: A. Oswald Barratt,

#### ORIENTAL LABOR.

Twelve Hundred Japanese for British Columbia from Honolulu-Prospects of Another Coal Shortage-Four Thousand Dollars from Four Acres.

Monetary Times Office,

Vancouver, July 27th.

This has been a week of excitement among the Vancouver labor unions on account of the arrival of the 1,200 Japs from Honolulu. The steamer "Kumeric," with her cargo, arrived in port on Thursday night, and it was not until yesterday morning that the Dominion Immigration Inspector got through with his work of examining the horde. Care was taken by the company bringing the men here to have them fit and supplied with the necessary \$25, which funt they must have to obtain admittance to the country practically all were passed.

#### Keir Hardle to Visit Jap and China Town.

On Wednesday, a committee of the Trades and Labor Council, after a conference with Mr. R. G. Macpherson, M.P., had the latter send a telegram to Ottawa urgently ig attention to the matter, but no notice has been taken is. The Japanese consul wired to Honolulu, advising the Japs not to come, but this advice was ignored

The labor men are taking the matter up very strongly, and purpose having a public demonstration in Vancouver when Mr. J. Keir Hardie, the noted British labor leader, arrives here next week. They will also take him on a tour through the Chinese and Japanese quarters, and show him the un-British conditions which exist there, so that he may be personally informed when it comes to a discussion in the Imperial House.

It was declared at the meeting of the committee that the C.P.R was responsible for this influx, but Mr. R. Marpole, Western Executive of the company, lost no time in denying this statement. It matters little who are instrumental in bringing these men here; the fact remains that the Province is being flooded with an alien element which will have at least the effect of increasing the friction which exists to a more or less degree between labor and capital in British Columbia. exists to a more or in British Columbia.

Coast cities are beginning to look with alarm on the spect of a shortage of coal next winter. This subject has been mentioned before, but new light is brought to bear by the action of the Vancouver Gas Company, which has asked permission to store fuel oil, stating that it would not be able to get a coal supply. Then, too, all the vessels are leaving the coast shipping and loading for Australia, from where coal is being brought to the Pacific coast.

#### upply Domestic Coal Needs First.

In British Columbia the millionaire owners of coal mines are protected by a duty, which prohibits coal coming here from Washington State. The result is that not only is a very high price charged, an increase of \$1 per ton having been made and maintained because of the scarcity, but people are put to great inconvenience. Last winter it went as far as suffering, while at the same time large cargoes of coal were being shipped daily out of the country. It is extremely probable that the Government will be appealed to in the matter, and either asked to repeal the duty or prohibit the export until the domestic supply is satisfied.

In the mining country a shortage of coal is not imminent unless another strike occurs. Not only are the present companies operating on a larger scale, but new concerns are getting into the field. The Maple Leaf Mining Company has been organized at Spokane to develop lands in Western Alberta, and A. C. Flumerfelt, president of the International Coal and Coke Company, has, with others, purchased 7,000 acres of coal lands adjoining the lands of the Galt Coal Company at Lethbridge. All these will be producing for the interior and Western market.

On the coast, the mines of the Nicola are expected to give an increased supply, but until these are shipping to coast cities it will not be known just what effect they will have on the market. In British Columbia the millionaire owners of coal mines

## To People the Province.

upon, and expressed his appreciation of the work that had

been done.

Mr. D. McNicholl, first vice-president of the C.P.R., spent a couple of days on Vancouver Island looking over the proposed routes of the company's extensions there, and on his return to Victoria spoke very encouragingly of the prospects. Like all railway officials, he spoke very generally, and what the company has in view is not definitely known. It is stated that not only will the line go to Alberni, but will also reach Quatsing, where a large sawmill now is. but will also reach Quatsino, where a large sawmill now is, and where pulp works are proposed.

#### One Hundred Thousand Bottles per Day.

This company has been extending its lines on the mainland into the rural sections with great success. The line to Chilliwack is now being constructed, and an announcement of a change in route is about to be made. It was first planned to run it close to the Fraser River, but now it will to a considerable distance inland and give transportation to

go a considerable distance inland and give transportation to a district which has never hoped for it.

The furnaces of the new crystal glass factory at New Westminster were blown in this week, and in a few days the plant will be in producing operation. The capacity will be 100,000 bottles per day, and a hundred hands will be employed. A specialty will be made of fruit and pickle jars, contracts having already been made.

With the setting out of so many fruit trees in British Columbia the remark has been made that the market will be over-supplied. At present the demand is far greater than the supply, and the indications are that it will remain so. Not only is the home market growing, but Australian importers, failing in their efforts to secure apples in this Province, have placed large orders with firms in Eastern Washington. These amount to 22,000 boxes, and they will be shipped via Vancouver next fall.

#### Four Acres of Land Produce \$4,000 Fruit.

The fruit industry is becoming very important. Not only in the Okanagan, but in the Kootenay and Boundary, in districts devoted exclusively to mining and lumbering heretofore, orchards are being set out. Besides, small fruits are being grown. O. J. Wigens, of Creston, Kootenay, got over \$4,000 worth of strawberries off four acres of land, and his is only one experience.

over \$4,000 worth of strawberries off four acres of fanu, and his is only one experience.

The establishment of fruit canneries will assist in the disposal of any fruit left over from shipments. The object has been to ship only the best, and with canneries in operation there will be no surplus product. Two or three of these establishments are ready to operate this season, and should find a good market in this country, where so much canned goods are used in mining and lumbering camps.

Contracts have been let in the construction of the pulp mills at Swanson Bay, and from now on the work will take a more definite shape. Preliminary surveys, etc., have consumed considerable time, but with the growth of the buildings above the ground it will be seen that this new industry is going ahead. The success of this will mean the

buildings above the ground it will be seen that this new industry is going ahead. The success of this will mean the starting of other pulp works on the coast; in fact, the one at Quatsino is going ahead anyway.

The Vancouver Stock Exchange will commence active operations on Thursday, August 1st, in the quarters which have been obtained at the corner of Pender and Hornby Streets. Call will be made at 10.30 in the morning, and the public is invited.

#### Vancouver Stock Exchange.

Vancouver Stock Exchange.

A meeting of the members was held yesterday morning, when it was unanimously resolved that the admission fee be \$500. The official list of stocks will not be decided upon until the Exchange is in full working order, and trading will be done on a temporary list in the meantime. The stocks which will be called may or may not be continued after the official list is selected.

The membership has been limited to twenty-one, and twelve have already been received. Three seats will be reserved, so that only six more will be selected at present. The secretary is now advertising for members. Applications for listing of a number of local stocks have been received, the fee for which is placed at \$50.

The Exchange has been formed along the lines of similar institutions in Toronto and Montreal, and, judging from the interest already taken, success should follow the inauguration of such a move in Vancouver.

#### RAILROAD CONSTRUCTION AND ORIENTAL LABOR.

The Monetary Times has made inquiries as to the report that the C.P.R. has made arrangements to import Japanese laborers. Mr. William Whyte, the second vice-president,

The appointment of a special committee of the Western Canada Immigration Association to arrange a plan with bring this Province into the scope of an organization which has done good work in collisting capital and securing immigrants for the West. Mr. Herbert Cuthbert, secretary of the Victoria Tourist Association, was made a member of the Executive at the meeting at which this action was decided where the victoria are the meeting at which this action was decided where the west in reply.—

"In respect of the report that it is intended to import several thousand Japanese for construction work I desire to say that we have not in the past, nor are we at present, making it a practice of importing, wholesale, for our construction work, laborers from Japan. We have derived excellent results from the employment of Japanese in our section and construction gangs, and we have no hesitation what-

#### COBALT IN LONDON

#### Not Many Shares Held in Britain-Immigration Literature Compared-Trade Statistics-Banking and Commercial Notes

London, July 19th.

Canadian finance has been mentioned here chiefly in connection with the Cobalt strike. Desultory discussion concerning Cobalt "wild-catting" continues to small apparent purpose. The papers that have most freely castigated Cobalt finance are getting approving words from Canada.

#### Tired of Platonic Assurances.

Of course this is not the same thing as business, and perhaps the financial public is just a little tired of platonic assurances. Little Cobalt paper can be in the hands of the British public. Little is likely to get there until they are treated to an open view of a property that is certainly good to buy and likely to be better worth buying. Vagueness is doing Cobalt no good in England. doing Cobalt no good in Englands

One of the hardest-headed men of the times—H. H. Asquith, Chancellor of the Exchequer—has given the city some useful assurances. One of these is that depreciation in the national securities has touched bottom, and that prices will

The next is of more moment to the trustees and financial institutions that have put their faith in the British Government's regard for the rights of property. There is to be no "expropriation," no "robbery," no "confiscation" under the law. Existing contracts are all to be respected. That is the starting-point of any legislation to be proposed. Adequate compensation and adequate security are guaranteed alike to private and public investors.

This assurance was not so superfluous as might seem.

Nonsense has been talked and written without end by men who ought to know better, and the city has been suffering from "nerves." Especially has prospective licensing legislation provoked qualms.

#### Thousand Million Dollars in Peril.

A dozen of the insurance companies, the leading invest-A dozen of the insurance companies, the leading investment trusts, prominent bankers and capitalists are all members of a committee formed to protect the interests of holders of brewery and distillery debentures. Fully \$1,000,000,000 worth of licensed property in this Kingdom is now in peril. Breweries by the dozen are already tottering on the verge of unsoundness. It must be an extremely dangerous adventure to weaken capital security on property of this class. The question is in how far Mr. Asquith is going to let his more impassioned colleagues interfere in this branch.

Two emigration agents are advertising in London papers their willingness to inform prospective emigrants. One is

their willingness to inform prospective emigrants. One is the agent of the Southern Railway Company (U.S.), the other the official labor agent of the Canadian Manufacturers' Association. To compare the packages of papers they send in response to inquiry is interesting.

On behalf of the Southern States the applicant gets nearly two pounds weight of land dealers circulars. Of these many are abominably printed and unconvincingly prepared. Besides, there are cards of municipal brag from small Southern cities, and a really useful map or two and other good railway matter. But the impression gained is that the South wants to sell land, and wants only the emigrants who can wants to sell land, and wants only the emigrants who can

#### Praise for Canadian Manufacturers' Association Literature.

A better impression is derived from the small bundle of Canadian papers. If the applicant will fill up an enclosed blank form with details of his experience, the agent will tell in about three weeks what Canada has definitely to offer this particular woman or man. Meantime, he encloses a list—somewhat out of date—of situations vacant with the approximate wages receivable in English currency terms.

The rest is steamship and railway information, and there

The rest is steamship and railway information, and there is less about Canadian conditions than might be expected. But the Manufacturers' Association do convey the idea that skilled people are wanted, and that work will be found for

skilled people are wanted, and that work will be found for them. To the artizan their parcel is by far the more encouraging to receive. Presumably the U.S. contract labor-laws have something to do with making this contrast.

All is mystery still about the real attitude of the Government towards the "All-Red Route," for which Sir Wilfrid Laurier has been working. The hopes of the Little Englanders who seek to quash the scheme are alternately raised and dashed by the incessant stream of rumours. Who originates the rumours that the whole bargain is "off," can only be guessed. only be guessed.

#### Some Feeling Concerning the All-Red Route.

for the fact that certain Canadian railway snares were in certain hands. There are other inuendoes of the same sort.

It has been assumed that Free Trade had no little to do

with making the total of British exports for the half year into £206,317,469. We have been told plentifully that recent trade figures make the best vindication of our fiscal policy. A wire is to hand showing that German exports for the half year improved by £21,785,000, and our own improved only by

The German export, excluding specie, was £165,550,000 —which is not so much behind the British. Although the British increase was 12.4 per cent., the German was 149 per cent. Another feature of resemblance between the pair is that imports in both cases have increased in much smaller or them. ration than exports. In these circumstances Germany, too may find the best vindication of her trade policy. And may is left to wonder of what use are figures in accounting for world-prosperity.

#### Problematical Value of Statistics.

In private business also it becomes more evident how worthless are any obtainable statistics in predicting either the probable strength of demand or its duration. The mar kets know a good deal about supply, but they are at a loss in dealing with the problems of demand. In that sense every one is finding statistics of poor assistance.

The mating of the Phoenix fire company with the Pelican and British Empire Life Office has been generally approved thus far. It remains for the shareholders to signify their contentment, and that they will do so is strongly probable.

The Boards of the two offices have several directors in common, and the institutions have always been friendly. Purely fire-offices have seldom combined with purely life offices hitherto, but this pair is said to be setting a fashion. Other unions of a similar kind are anticipated, but not all off them will represent the consolidation of \$32,000,000 of funds.

#### Profits of the Royal Mint.

A highly lucrative business carried on by our mint is the coinage of silver. The Master reports a profit exceeding \$2½ millions, or 112.47 per cent. Gold coinage is a profiless affair, which is made worse by the presence of such brittle bars of bullion as have been a trouble at Ottawa.

Whereas Canada seems to be confident that her measures will eliminate all difficulties, "it remains to be seen whether the process used in London can be improved to cope efficiently with the impurities left by the cyanide process."

#### MARKETS. COMMERCIAL

Giving Ranges of Prices in some of the More Important Branches of Trade; their Situation and Tendencies.

#### MONTREAL

Montreal, August, 2nd. Montfeal, August, 2nd.

Hides.—The market for hides holds steady. Dealers are offering 7, 8, and 9c. per lb. for Nos. 3, 2, and 1, respectively, and selling to tanners at %c. advance. Sheepskins are a shade firmer, at 30 to 35c. each, and calfskins steady at 8c. for No. 2, and 10c. for No. 1.

The quality of the hides is good, but the demand is dull.

Butter.—The market has advanced strong. We quote: Quebec creamery, 21 to 21½c., Townships, 21½ to 21½c. There is 4 good home demand but not much export.

Cheese.—After a weak spell, the market is firmer, although prices are unchanged at 10% for Quebecs, 10% for Townships, and 10% to 11c. for Ontarios.

Eggs.—The market is firm. Dealers pay 15%c. in the country, possibly 16c., in some instances, and sell at 17 to 17%c., candled. Selects are bringing 20 to 21c., according

Honey.—Some new strained honey, with a slight defect in color, was sold to-day at 8½c, per lb. Pure white clover strained was offered at 8½c. per lb.

#### MARITIME BOARD OF TRADE.

The annual meeting of the Maritime Board of Trade will be held in St. John this year, on the 21st and 22nd August, with Mr. W. S. Fisher, past president of the St. John Board, as president. The list of subjects to be considered include matters of importance to all three Provinces. After the business of the gathering is over the visiting delegates will be entertained by the St. John Board.

#### TORONTO.

Toronto, August 2nd. Provisions .- The market is quiet and firm, and there

are no important changes.

Fruit.—There are heavy arrivals in this market of bananas, melons, and new potatoes. Fancy mountain blueberries will be on the market next week. There is a good demand for Tennesse tomatoes and for Elberta peaches.

Croceries.—Prices of canned salmon are high. The extra cost of labor and material will keep up the advance. Although last year's figures were considered abnormal, this season's prices will be higher. Canned fruits and some vegetables are at a high figure. Australian raisins may be introduced in this market shortly.

Hides.—Hides are down ½c. We quote: Inspected No. 1, 9c.; No. 2, 8c.; No. 3, 7c.; country hides, 10c. Calfskins are down 1c. We quote: City, 12c.; country, 10 to 11c.

Wool .- There is no change in the situation as reported last week.

A party of engineering and science students from the various British universities will visit Canada during the summer of 1908. Lord Strathcona is the honorary president of a committee appointed to further the suggestion, and Sir Wilfrid Laurier will act as honorary patron. The honorary organizing secretary is Mr. Nugent M. Clougher, who is now in Canada making preparations for the visit.

#### BOARDS OF TRADE.

Tisdale, Man .- The Tisdale Board of Trade was organized in 1906. It consists of the leading business and pro-fessional men, who have banded to gether for the purpose of advancing the interests, development, prosperity and well-being of the town and district. The following are the principal officers of the Board of Trade: President, F. Shannon; Vice-President, W. E. Moore; Secretary-Treasurer, C. F. Lutes; Town

Overseer, W. Littlejohn Robertson.
Penticton, B. C.—The following officers of the Penticton Board have been elected: J. R. Mitchell, president; L. C. Barnes, vice-president; and W. J. Clement, secretary-treasurer; B. Martinson, F. H. Latimer, M. C. Kendall, L. A. Rathvon, W. F. H. Swinton, Jos. A. Nesbitt, A. H. Wade and C. A. C. Stewart, council.

Bath, Ont .- A Board has been formed here to further the interests of the town The following officers have been elected for the ensuing year: President, Dr. H. S. Northmore; Vice-President, John S. Northmore; vice-riesaurer, A. B. Forester; Secretary-Treasurer, A. B. Rowan-Legg; Council, E. P. Shephard, I. Johnstone, F. W. Jas. Graham, J. J. Johnstone, F. W. Armstrong, H. A. Lewis, Max Robinson, Dr. S. L. Nash.

#### DISPLAY OF VEHICLES AT TORONTO.

Arrangements have been made this year for the display of vehicle exhibits, automobile exhibits and wagon exhibits in the new fireproof Grand Stand, where a space has been provided 400 feet in length and 100 feet in depth, well lit by large circular windows and affording the additional advantage of keeping the various exhibits in the shade, so that the varnish and polish will not be blistered by the sun. It was intended to erect a new Transportation Building, but it was found that the extensive Grand Stand, the new Agricultural Building, and the new Railway Exhibits Building, amounting in all to \$400,000, was sufficient to undertake in one year.

# SAFE INVESTMENT

### BONDS EARNING INTEREST WITH, STOCK IN SIGHT OF DIVIDENDS.

We offer and recommend for investment:-

Bonds bearing 5% interest, payable half-yearly on May 1st and November 1st each year, with the principal payable in gold on November 1st, 1936.

The present earnings of the Company issuing the bonds considerably exceed the interest on the whole outstanding bond issue, although the proceeds of nearly two-thirds of the bonds are being expended to increase greatly the gross and net profits.

The bonds are offered at 921/2 (payable either in full or in instalments), and in view of the present surplus earnings and the very large surplus earnings which must result when the new construction, which has been in progress for some months, is completed, it is believed that an investment in these bonds at 921/2, at which the yield is 51/2% per annum, is both safe and desirable—but in,

Investors receive stock bonuses of 50% of the par value of the bonds. For instance, \$925 buys \$1,000 in bonds and \$500 in stock. The stock, which is already valuable, should soon receive dividends, and be worth par within a few

These securities are issued by the Porto Rico Railways Co., Limited, having a Canadian charter and under Canadian control.

The Company has all the electric railway, light and water-power business of 100,000 people. Full particulars on application.

## The Art Of being **Up-to-Date**

In every walk of life the art of doing successfully is acquired only by being up-to-date. People always look to the leaders for the latest. If you want to succeed you must be somewhere in the ranks of the First. When there comes the First. When there comes into being something newnew, that is, and at the same time possessing merits — it pays to investigate. The cement and concrete era of construction is with us. Furthermore, it has come to stay. You want to know more about it. The Canadian Cement and Concrete Review for July will give you an idea of what is being done in this line.

Cement and concrete construction does not interest only those intimately connected with the industry. The subject concerns, directly or indirectly, everyone. Financiers must keep pace with the progress of up-to-date constructional methods. Millions of dollars are invested in the Canadian cement industry which is expanding rapidly. There is only one journal in

There is only one journal in Canada devoted to the subject. This is the Canadian Cement and Confrete Review. It deals with cement and concrete construction in every branch. It is printed on fine art paper, and is profusely illustrated. It is edited in such a way that it is alike interesting to the heilder the contractor, the builder, the contractor, the engineer, and the general reader.

The eleventh number, n ready, contains amongst others the following articles:

Prince Albert Cement Block

Some Reinforced Concrete Systems.

Modern Concrete Bridge Bldg. Reinforced Concrete Chim neys.

¶ Specimen copies sent on request, Cement & Concrete Publishing Company, Court Street, Toronto.

¶ Subscription \$1.00 annum in advance.

## The Only Weekly Engineering Journal Published in Canada

A few months ago, when it was decided to issue the

#### CANADIAN -ENGINEER

once a week instead of as formerly once a month, the publishers were a little doubtful as to whether there would be enough engineering news to justify such a change being made.

The fact is it is really difficult to find room for all that offers itself, engineering development of all kinds follow one another so rapidly.

Each week it is filled with distinctly live, up-to-date engineering news.

If you desire to reach the civil and consulting engineers, contractors and supply men, the paper to use is the

Canadian Engineer

#### 62 Church Street Toronto

P.S. Specially valuable when municipalities want to advertise for tenders for public works.

Cecil B. Smith W. G. Cha

back three-quarters of a century farther, the record becomes practically unique." The Canadian manufacturing unique." firm of whom this is said is Brown Brothers, Limited, Toronto. They have issued a handsome pamphlet to cele-brate their Jubilee Anniversary. Thomas Brown the first was apprenticed to the bookbinding at Newcastle-on-Tyne in 1774. His son, Thomas Brown the second, being seized with an adventurous spirit, decided to try his fortunes at New World and in the year 1866. in the New World, and in the year 1846, taking with him his seven sons and two daughters, voyaged across the broad Atlantic, and reached Toronto, via New York. He was succeeded by three of his sons, Thomas, John, and Richard, all trained to the stationery and book-selling business. Of the three, Richard alone survives, Thomas having died in 1867, and John in 1882. The original parnership was some years ago converted into a joint stock company, whose present officers are: Richard Brown, president; T. A. Brown, vice-president; J. T. Hornibrook, secretary; Robert S. Brown and H. J. Brown, directors. Mr. T. A. Brown is the eldest son of Mr. Richard Brown, whose second son, Mr. R. N. Brown, is also in the business, so that the fourth generation is now represented in the management. The remarkable progress and success of the house is attractively recounted in the pamphlet. It only remains for the Monetary Times to say that, after intimate business relations with the Brown Parkher articles. Brothers establishment, extending over nearly forty years, the high opinion at first formed of its probity has never varied, and friendship has increased with the years. Mr. Richard Brown is a man of rare type. Unpretending, thorough, warm of heart, and resolute of purpose, he has through long years made friends of his employees, of his neighbors, of his fellow merchants, exemplifying Christian graces without wearing his religion upon his sleeve.

RIGHTS

Secretary and Actuary. POLICIES ISSUED ON ALL APPROVED PLANS.

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer.

## The Great-West Life Assurance Company,

has always done remarkably well for its Policyholders-both in the way of LOW premium rates, and notably HIGH profit returns.

Under the Policies maturing this year the profits are so substantial that the Policyholders will receive back all premiums paid to the Company, with from 40% to 65% added in cash.

HEAD OFFICE WINNIPEG.

#### TORONTO FAIR HERE ACAIN.

Upwards of \$350,000 will be spent on new buildings and improvements at the Canadian National Exhibition this year, namely, Grand Stand, \$217,000; Horticultural Building, \$50,000; Railway Exhibits Building, \$40,000, making something like a million dollars spent upon new permanent buildings since the century opened. No other established annual exhibition can show a like record.

It will be worth a journey to Toronto between August 26th and September oth alone to see the new grand stand that is being erected on the Exhibition grounds. It will be the largest and most complete stand on the North American continent and will cost complete \$217,000. Its capacity and dimensions will be as follows: Accommodation, 15,000 people; length, 603 feet; width, 115 feet; height, 60 feet; area covered, 77,940 square feet or 1.79 acres; weight of steel used, 1,225 tons; seat stringers, 24,200 lineal feet. The steel used if applied to rails would reach from Toronto to Hamilton, a distance of 40 miles.
