in each case and tenders must be accompanied by a certified cheque for \$1740.20 and \$701 and \$467 and \$1200, being the amount of the first year's rental and cost of cruising on each respective limit.

Certificates of incorporation have been issued to the following:

Camp Creek Hydraulic Flaxer Mines, Limited—Capital \$125,000 in 125,000 shares of \$1 each. To acquire the placer mining leases known as the Della Fairmount, Perrinville, Annie, Daisy and Woodruff, all on Camp Creek in the Revelstoke district.

Cascade Power Company, Limited—Capital \$50,000 in 50,000 shares of \$1 each.

Cascade Steam Laundry Company, Limited—Capital \$10,000 in 100 shares of \$100 each. To carry on the business of laundries at Vancouver and elsewhere in British Columbia.

Crawford Double Rope Aerial Tramway System, Limited—Capital \$10,000 in 10,000 shares of \$1 each. To acquire from E. F. Crawford of Nelson, B. C. Travis and W. Perry, the same place, their rights in certain aerial tramway patents.

Fort Steele Brewing and Malting Company, Limited—Capital \$150,000 in 750 shares of \$200 each. To acquire a brewing business carried on at Fernie.

Great West Optical Manufacturing and Supply Company, Limited—Capital \$100,000 in 10,000 shares of \$10 each. To acquire from E. F. Crawford of Nelson, B. C. Travis and W. Perry, the same place, their rights in certain aerial tramway patents.

George S. Waterlow, who retired from the directors in rotation, was re-elected and added some remarks on the hopeful future for the Le Roi.

Manager Parrish came in for kindly mention in connection with the eminently satisfactory results attending his policy for the exploration and development of the deep levels of the mine, the effect of which in promoting confidence in the Le Roi's future has materially strengthened the position of all British Columbia mining securities in London.

Kamloops Coal Development Company, Limited—Capital \$50,000 in 100 shares of \$50 each.

Valley Dairy Company, Limited—Capital \$10,000 in 1,000 shares of \$10 each. To carry on the business of dairying in Vancouver and elsewhere in British Columbia.

The Handy Gold Mines Development company has been registered as an extra-provincial company. The head office is in British Columbia, the capital being \$1,500,000 in 1,500,000 shares of \$1. The head office in British Columbia is at Kaslo, A. J. Curie being the attorney.

Four applications to purchase and one to lease lands, 13 for timber licenses and two for coal prospecting licenses are contained in this issue.

Notice is given that Charles Richards and Malcolm Young, carrying on business as general merchants at Fernie, British Columbia, under the firm name of C. Young retiring.

Application has been made to change the name of J. W. Mellor & Co., Limited, to the Melrose Company, Limited.

Keith Whitmer gives notice that he intends to clear Big Sandy creek, East Kootenays under the provisions of the Rivers and Streams Act.

\$100 REWARD, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

# LE ROI'S PROSPERITY

Extremely Satisfactory Statements Submitted to the Shareholders at the Meeting in London Yesterday.

A Profit of \$50,000 Shown For the Month of January—Last Year Yielded \$400,000—The Shares Advance.

LONDON, Feb. 13.—The annual general meeting of the Le Roi Mining company took place here today and proved to be one of the most satisfactory in the annals of the well known British Columbian mining corporation. As the outcome of the developments at the meeting the feeling in respect to the Le Roi shares has improved to a remarkable extent, and this has already extended to the stock exchange, where the price of Le Roi is stiffening steadily.

Aside from the gratifying reports as to ore discoveries in Le Roi deeps, the feature of the meeting was the announcement that the company had earned a profit of \$50,000 in January. In view of the losses reported in recent months, the statement was received with lively interest and satisfaction. Inasmuch as nothing unusual in the way of shipments or ore values contained therein was reported for January, it is generally believed here that the mine has reached a turning point in its history, and that in future regular profits of this sum or more will be forthcoming.

The annual meeting was largely attended by shareholders, and at the close of the session the feeling was quite buoyant. The financial report for the year ending in June last showed a profit of \$400,000. This was compared with the announcement of a \$50,000 profit in January, as stated.

The chairman addressed the meeting at length on the position of the company and its bright prospects, going into details respecting developments in the mine and matters at the smelter. The gratifying results attending the vigorous development in the deep levels were dwelt on, especially with reference to the great bodies of pay ore encountered on the 1850 level. These features were described as giving promise of a most successful future for the mine.

George S. Waterlow, who retired from the directors in rotation, was re-elected and added some remarks on the hopeful future for the Le Roi.

Manager Parrish came in for kindly mention in connection with the eminently satisfactory results attending his policy for the exploration and development of the deep levels of the mine, the effect of which in promoting confidence in the Le Roi's future has materially strengthened the position of all British Columbia mining securities in London.

## OUTPUT UP TO 9000 TONS

Normal Week's Operations Sees Tonnage Fully Restored.

Excellent Effect of Le Roi Developments—Local News.

Conditions in the Rossland camp were restored to normal last week, with the result that shipments of ore again assumed the proportions existing prior to the weather and other interruptions which had the effect of cutting down shipments. Last week, therefore, saw the output of Rossland mines again over the 9000 ton mark and well on toward the five-figure standard that will be attained as soon as shipments of milling ore are commenced.

The event of the past week was the receipt of flattering intelligence from the annual meeting of the Le Roi company, and the statement that January profits aggregated \$50,000. The latter immediately suggests that a continual stream of such profits can be turned out from the big property, the effect of which would be so stimulating on the local mining industry as to entirely alter the outlook. The Le Roi now has the ore and the lowest operating expenses yet attained at the mine, resulting costs are claimed to be the lowest ever applied to Le Roi ores, and development and exploration have reached the stage where per ton costs under this heading will be normal. Figures are not yet to hand as to the company's indebtedness, but it is stated that this sum is not large, and that a few months' successful operations will enable the company to discharge any existing liabilities and commence the reservation of profits for the dividends that are expected to be reached before the end of the current year.

The effect of the payment of dividends by the Le Roi company would be so far-reaching that an immediate influx of English capital for the development of Rossland mines would be forthcoming. The conditions in the

Mine.	Week	Year
Le Roi	5378	38,496
Centre Star	1350	9,330
War Eagle	290	2,200
Kootenay	210	1,930
Jumbo	350	1,975
Le Roi Two	570	3,290
Le Roi Two (Elmore)	240	2,200
White Bear	300	275
Spitzee	300	275
Total tons	9696	62,699

LE ROI—The week has witnessed marked activity at the mine, the en-

tire seven days being utilized with a view to making up for the two holidays of the previous week. The interest in the mine centres again around developments in the deep level, and great interest has been created by the announcement as to the dimensions of the big ore bodies on the 800, 900 and 1000 levels. Connection is being made between the 900 and 1000 levels, and elsewhere in the deep levels arrangements are being made to utilize the output of ore now blocked out.

LE ROI TWO—At the Le Roi Two properties also much activity was displayed. In the Josie mine the usual program of development on main levels and exploration in intermediate and deep levels was continued with satisfactory results. In the No. 1 mine the stopes were drawn upon for a considerable tonnage of ore, which included the company's shipments. Josie ore is going to Greenwood and No. 1's product to the Granby smelter at Grand Forks. The work at the mill is referred to elsewhere.

WAR EAGLE—Mine operations for the past week were confined to the usual lines. Shipment of ore on intermediate levels, and development carried steadily ahead in the deep levels. Further work was done in connection with the consolidation of the area. The restoration of normal conditions in respect to shipping and the effect of doubling the tonnage were noted.

KOOTENAY—During the previous week mine discontinued shipping to the Greenwood smelter and diverted its output to Northport. The crew at the mine is still confined to the ore being necessary to handle the ore now being shipped.

JUMBO—Good work was done at the Jumbo mine last week. One at the No. 1 level stoping is being carried along steadily so far as is required to connect with the ore now being sent to the Granby smelter. In fact everything at the intermediate level the main drift is being extended through heavily mineralized ground. About 100 feet has been made at this level. The majority are engaged in development work in the main ore body, which is proving up with remarkable rapidity.

SPITZEE—The main drift on the 200 level is now 150 feet on the shaft. The ore body maintains its strength and the value is also holding out well. Short crosscuts are being made at frequent intervals to ascertain the extent of the vein, which has averaged about 20 feet in thickness. Next month the company will probably resume shipping on a small scale to the Trent smelter.

WHITE BEAR—The mine is now regularly on the shipping list and promises to become a considerable producer. The ore shipped is being sent to Greenwood for smelting.

CENTRE STAR—A steady stream of operations along conventional lines is the outline of work at the Centre Star. In the intermediate levels, development has been pursued, and it will be seen that the tonnage is again normal, owing to the improved conditions in respect to shipping.

LE ROI NOW HAS ENORMOUS TONNAGE OF GOOD ORE IN RESERVE.

ANNUAL MEETING OF COMPANY IN LONDON TODAY—BRIGHT REPORTS.

The enormous magnitude of the ore bodies now blocked out in the Le Roi mine can be gathered from the statement by Manager Parrish that on the 800 level the ore is 150 feet in length and 90 feet wide, while on the 1000 level the shoot is at least 120 feet in length and is now being prospect to ascertain its width. In the 900 level the measurements are approximately the same as on the 800, and the connections are now being made for the purpose of opening stopes in the 600 level.

The grade of the product runs as a rule from 42 to 45, but polished cable reports indicate that values several times as large as this are not uncommon.

Mr. Parrish also confirms the report that the Le Roi mine is now producing these great ore bodies were located south of the old ore shoots, in the footwall side of the vein. The decision arrived at by Mr. Parrish to divert development and exploration to the footwall side of the ledge was magnificently justified by the discoveries chronicled.

As matters stand at present the Le Roi has an ore shoot approximately 140 feet in length, 80 feet in width and 150 feet in depth opened up and well explored. Of the enormous tonnage of pay ore thus blocked out but little has been extracted. On the 800 level stoping has been under way for some time, but the tonnage hoisted to date is scarcely sufficient to make any great impression on the tonnage available at that point.

The annual general meeting of the Le Roi shareholders takes place in London today, and the reports to be presented to the company will be those of the past year. The developments in Le Roi deeps have had an effect on the price of shares, the movement in this direction being steadily upward.

# LE ROI TWO DIVIDEND

Gives Shareholders a Shilling Per Share Dividend.

The Company Carries Over \$50,000 Profits to New Year.

A dividend of a shilling per share and \$48,000 in profits carried over to the new year is, in a nutshell, the feature of the annual report of the Le Roi Two Mining company, as contained in the statement issued by the directors to the shareholders. For the year ended September 30 last the company earned something over \$78,000 in profits, most of which is carried over to this year's profit and loss account. The year's profit and loss account, as estimated profits, figured on a conservative basis, for the current year are \$127,000, and the condition of the company's properties and mining plant is described as most satisfactory.

Coming on the heels of a gratifying report of the Le Roi company, Rossland and others interested in the welfare of the Golden City, will learn with lively satisfaction of the Le Roi Two dividend and bright prospects. It is evident that the upward turn is not confined to any one mine, but that the big properties of the Rossland camp are participating in a general return to prosperity and profit-earning.

The directors' report read in part as follows: "The directors herewith submit the audited accounts of the company for the year ending September 30, 1903, showing a balance to profit and loss account of \$78,000. The year's profit and loss account, as estimated profits, figured on a conservative basis, for the current year are \$127,000, and the condition of the company's properties and mining plant is described as most satisfactory."

not exceed \$4 per ton, so that everything over that figure will be profit for the company.

In his report Mr. Hill says that in the past his attention has been devoted very largely to the Josie mine, but that in future he will direct considerably greater attention to the No. 1 mine. "He hopes to ship 1,500 tons monthly from the mine and to realize therefrom a profit of at least \$1 per ton.

GOOD PROFITS AHEAD.

The company's profit-earning powers for the ensuing year are estimated as follows:

Concentration of ore from dumps, 200 days at \$1 per ton per day—\$150,000 tons at \$1 per ton profit—\$150,000.

Shipping ore from Josie mine, 12 months at 2,000 tons, 24,000 tons at \$4 per ton profit—\$96,000.

Shipping ore from No. 1 mine, 11 months at 1,500 tons, 16,500 tons at \$1 per ton profit—\$16,500.

Total estimated profits, \$127,000.

Mr. Hill recommends the abandonment of the option on the Josie mine from Vailin lake for several reasons.

Commenting on the local direction of the company's affairs Mr. Hill says: "Your staff at Rossland, consisting of Mr. P. S. Coudrey, Mr. F. Stevens, mine superintendent and Mr. William Falding, accountant, are efficient and reliable. Indeed I consider myself fortunate in being able to retain the services of Mr. Coudrey, who has shown marked skill in his profession as well as considerable tact and judgment in the somewhat trying conditions."

A notable feature of the financial statement is the large sum written off as depreciation of the plant. The figures show that the sum thus taken from the company's assets is considerably larger than the total expended for development during the year. A portion of the previous year's development work being thus added to the sum charged off for depreciation. This does not interfere with the amount available for distribution by the company.

# TO WIND UP GIANT

EDWIN DURANT FILED PETITION IN SUPREME COURT YESTERDAY.

WANTS COMPANY'S AFFAIRS WOUND UP—F. W. ROLT FOR LIQUIDATOR.

Action was commenced in the supreme court yesterday by Edwin Durant against the Giant Mining company under the provisions of the Winding Up Act, for the appointment of Francis W. Rolt as provisional liquidator and such other orders as may appear just in the issue he raises.

The action is a sequel to the suit instituted some months ago by Mr. Durant to recover unpaid salary due him by the company, and by the South African Ventures syndicate, which resulted in the appointment of A. B. Mackenzie as receiver. Macdonald & Winn are acting for the plaintiff Durant in the action just instituted.

The petition for the appointment of W. Rolt as provisional liquidator and such other orders as may appear just in the issue he raises.

# WAR EAGLE MEETING

Annual Report Shows a Net Profit Last Year of \$30,000.

The Good Results Likely to Be Gained by Milling Process.

TORONTO, Feb. 23.—The annual meeting of the War Eagle Consolidated Mining and Development company was held today at the head office of the company, 49 Wellington street. A large majority of the shareholders was represented.

The report of the general manager, E. B. Kirby, was read and listened to with close attention. The report states that developments up to date show that the War Eagle mine has experienced the same general change in the character of its ore deposits which has occurred in all other productive mines of the Rossland district, and which is the general rule throughout the mining districts of the world. This is the result of the occurrence of high grade bonanza ore bodies, capable of profit under the expensive process of smelting, in masses of lower grade, requiring a cheaper treatment by milling.

ECONOMIES BY MILLING.

Continuing the report says: "As the bodies of smelting ore in the vein become less frequent and their average size diminishes, the proportion of this ore to the increasing quantity of development or dead work required to reach the smelting level, and where its profit is consumed by the cost of the dead work. The relief to be derived from milling will therefore be proportionately greater. The amount expected, but also in the increased proportion of pay ore to development work, while the stoping of low grade ore will be rapidly replaced by the stoping of high grade ore, the amount of smelting ore contained within their limits, NEARLY \$70,000 NET REVENUE.

The ore sales during the year have been 60,000 tons, averaging \$13 full assay value, or \$8.75 smelter's gross assay value. The average assay count was: Gold, 0.85 ounces; silver, 1.02 ounces; copper, 1.45 per cent. As shown by the profit and loss statement, the net profit for the year was \$30,000. The cost of smelting was charged off for depreciation of plant, etc., \$38,174, shows an excess of revenue over expenditure of \$68,121.21.

The present reserves of smelting pay ore are estimated at about 30,000 tons, averaging \$10 smelter's gross assay value.

The ore sales during the year have been 60,000 tons, averaging \$13 full assay value, or \$8.75 smelter's gross assay value. The average assay count was: Gold, 0.85 ounces; silver, 1.02 ounces; copper, 1.45 per cent. As shown by the profit and loss statement, the net profit for the year was

Rossland Weekly Miner.

THE SUBSCRIPTION PRICE OF THE WEEKLY MINER FOR ALL PORTS IN THE UNITED STATES AND CANADA IS TWO DOLLARS PER ANNUM IN ADVANCE.

WEEKLY MINER: Daily, per month, by carrier, 75c; Daily, per month, by mail, 60c; Daily, per year, by carrier, 7.50; Daily, per year, by mail, 6.00; Weekly, per year, foreign, 10.00.

WEEKLY MINER: Weekly, per half year, 3.50; Weekly, per year, 7.00; Subscriptions invariably in advance.

PORT ARTHUR.

Port Arthur is familiar ground to the soldiery and marines of Japan. During the war between Japan and China it was assaulted by the Japanese, was captured and a horrible massacre followed—a massacre which is the one bright to Japan's conduct in that war.

The native name of Port Arthur is En-Shun-Kon. It was the largest naval station possessed by the Chinese. It is situated at the extreme southern end of the Liaotung peninsula, up to a quarter of a century ago it was merely a small village consisting of less than 100 mud houses, an occasional shop and three or four inns.

The determination of the Chinese authorities in 1881 to establish a naval dockyard at that port. A French company took up the contract, completing the work in three years. The port then boasted of a large basin with a depth of 25 feet at low water.

Wharves and quays bordered this basin and were connected with the docks by a railroad. Dry docks were built ready for repairing ships of all sizes, from ironclads to torpedo vessels. The harbor is always free from ice, even in the coldest winter.

It was on November 30, 1894, that the Japanese army approached Port Arthur during the war with China. The land defenses consisted of nine small redoubts armed by mud walls in some cases on the north and north-east, and three redoubts on the south-west.

On the north side is a range of hills from 250 to 650 feet high, the tops of the hills being not more than 2,500 yards from the town and dockyard. Three coast batteries surrounded by a mud wall crowned the hill on the right of the entrance to the harbor.

The forts were armed with heavy Krupp guns and within the defenses were electrical searchlights, torpedoes, factories, etc.

The opening attack of the Japs was on the northwest turret fort at Table Mountain. Nine batteries of field and mountain guns were got into fine positions on lofty ridges nearly on the same level and almost within rifle range of the forts.

The representative of the Fall Mail Gazette appears to have been surprised that Mr. Smart made light of trifling matters, as he expressed the opinion that the Dominion, taken generally, was not greatly interested in Mr. Chamberlain's proposals.

For the possession of the other forts a furious fight was maintained by both sides for nearly two hours; but the Chinese shot got wilder and wilder as the Japanese improved, until finally the Shoji magazine blew up and set fire to the sheds inside the forts.

The Japs charged all along the line, and by 1 o'clock had taken all the eight forts. The Japs then attacked the camps of the Chinese army, creeping forward from cover to cover. Three times the Japanese came out from behind the parade ground to cross the bridge but were driven back by the withering shower of bullets.

The Westminister Gazette representative referred to the subject of the importation of skilled labor, which the Canadian labor unions have naturally opposed. Mr. Smart explained to this interviewer that while the officials of his department did not seek artisans, and no bonus is paid to the steamship agents and others except on immigrants who actually settle on the land, still, Canada will never legally restrict emigration of any sort.

He referred to the excellent opportunities in Canada for British subjects in primary schools, and advised them to watch the advertisement columns of the Winnipeg newspapers. At the conclusion of his interview with this representative, he expressed his con-

until the fifth day after the battle. All resistance on the part of the Chinese ceased at 2 o'clock on the afternoon of the 11th, when the Japanese army entered the town.

The massacre did not cease with the excitement of victory but was continued in cold blood during the four succeeding days. There was murder and pillage from dawn to dusk, every species of mutilation and every conceivable kind of atrocity.

All the war correspondents who were at Port Arthur agreed that the massacre forms one of the blackest pages in history. The Japs lost, all told, 19 men killed and 150 wounded.

The capture of Port Arthur was the deciding conflict in the war between Japan and China. Not again were the Chinese able to make any decided stand against the advance of the conquering Japanese.

tion his heartiest support and indifference about the prosperity of himself as well as that of the province.

There seems to be little or no abatement to the extraordinary state of lawlessness that has prevailed in the Crow's Nest region for a considerable time. Never 12 weeks passed but some four crimes were perpetrated in or around the town of Fernie.

The local jail is seldom empty and is only too frequently over-crowded with thugs, thieves and desperate toughs. This sort of thing is a monstrous disgrace to the authorities. We are well aware of the character of some of the foreigners who work in the East Kootenay coal mines.

er's oratory. Today, science has cast such light upon the horizons of life that the missing link between the phenomena hitherto classed as physical and those designated as psychical seems absolutely within reach.

It is only a few months since the discovery was made that the human body emitted rays to such an extent that it was found possible to take its own photograph by its own light. Students of the occult note at the time that there was an interesting correspondence between this observed fact and the theory of Oriental philosophy about "aura."

The rays emitted by the body, the so-called "n-rays" of Blondlot, have been subjected to further investigation, and M. Charpentier, lecturing recently before the Paris Academy of Sciences, has reported further interesting discoveries.

Every nerve-centre that functions adds new n-rays to those normally emitted, and this to such an extent that the location of the centre in action can be determined by the increase in rays at that point. For instance, during speech there is a pronounced increase of rays from the region of the skull above Broca's centre, the brain centre for articulate speech.

It is to be regretted that the provincial government has seen fit to ignore the earnest efforts of the people here to have the agricultural lands of the North Thompson valley made available to settlers, for the reason that the valley could accommodate hundreds of waiting settlers.

A good distinction was lately drawn by a public speaker between the citizen and the adventurer. The citizen in the true sense of the word is one who lives in a community, identifies himself with its interests, who never suggests that, if he thrives, it is because the protection of society and of the laws makes it possible for him to do so, and who governs his whole course in such a way that good, and not evil, may result to others from his social and business activity.

The citizen in the true sense of the word is one who lives in a community, identifies himself with its interests, who never suggests that, if he thrives, it is because the protection of society and of the laws makes it possible for him to do so, and who governs his whole course in such a way that good, and not evil, may result to others from his social and business activity.

The citizen in the true sense of the word is one who lives in a community, identifies himself with its interests, who never suggests that, if he thrives, it is because the protection of society and of the laws makes it possible for him to do so, and who governs his whole course in such a way that good, and not evil, may result to others from his social and business activity.

"The report presented by the directors to the shareholders in the Le Roi Mining company at the annual meeting, held in London on Thursday last, must have been a gratifying one. The profit for the year ending June 30th was stated to amount to \$400,000, while as an indication of the satisfactory results that are likely to give under good management, it was stated that the profits for January were \$50,000. The property, in the hands of a business management, is now beginning to show its intrinsic value. While the mine is earning substantial profits, the management is not neglecting the development of the property. The managing director, in the course of his statement to the shareholders, said that splendid results had attended the vigorous development work in the lower levels. Large bodies of payable ore have been blocked out, especially on the 1550-foot level. While management pursues the policy of expediting development work well ahead, the mine will be put on a sound basis and regular dividends should be tolerably well assured.

"While this report of the year's operations in the most widely known mine in the Rossland district cannot fail to be most satisfactory to the shareholders, especially to those who have been interested in the property through the years of development, it is scarcely less so to the people of British Columbia who realize what tremendous mining industry means to this province. What the Le Roi mine can do to show under honest and capable management, other properties in also under similar conditions, have expressed the opinion on more than one occasion that one good dividend paying mine would do more to attract capital to British Columbia than all the efforts of the government in the way of advertising our resources could accomplish. This report of the Le Roi company will undoubtedly be an important influence. Within comparatively short time we have had the reports of the companies operating the War Eagle and Centre Star and the Le Roi mines in the Rossland district, and of the Granby company striking mines at Phoenix. All of these reports showed that profits had been made in the year to which they refer. While there is every reason to believe that the satisfactory results will be maintained, the list of paying mines will almost certainly be increased during the present year. The province is now embarking on the second stage of mining development, that of actual mining succeeding the stock raising."

"The Vancouver World also says: 'Readers of the mining news in the world will have noticed the cheerful reports coming from Rossland of late. It finds that the new ore body in the Le Roi has been uncovered at the level of the lower levels of the great event which has already sent out from Rossland will surely mean many more years of life to the Red Mountain camp. In addition the success which is attended the new concentration process has been of such a nature as inspire all friends of the well known mining town with a feeling that the good times are to be restored at an earlier date. Studying the reports so far this year we see that the Rossland mines have already sent out 900 tons through the year in the first six months. Last week, despite the interference with mining that the central so pleasantly made, over 6000 tons were sent out."

**THE WAR AND STOCK QUOTATIONS**

Some of the comments upon the way stock markets have acted in the course of the actual beginning of hostilities between Russia and Japan relate in the manner in which political sentiments affect price movements. British sympathies with Japan are claimed to render the successes of that country a bullish influence in the London market. In the same way, the news from the Bourse, it is inferred, has been largely affected by these circumstances in view of the Franco-Russian alliance. It might be more correct to say, perhaps, that French investors hold such large amounts of Russian government securities, that adverse news concerning the forces in the Far East would naturally chill financial sentiment at French capital. The New York market has naturally been affected, indirectly at least, by news from abroad, and the eastern war is also somewhat overshadowed by great domestic calamity at Baltimore and its possible financial effect. In the main, however, an impartial survey of the situation would lead to the conclusion that the long-drawn suspense negotiations continued, and the war being balanced between the two powers, led to the adverse position being discounted by the recession in values at the European financial centres, and that, apart from the blitty of further complications, influence of the collision between two belligerent powers on speculation and investment has been exaggerated.

**WILL BE 500 STRONG**

**LOCAL MINING ASSOCIATION**  
NOW HAS 450 MEMBERS.  
SENDS FULL DELEGATION TO VICTORIA CONVENTION NEXT WEEK.

From Thursday's Daily. The Rossland branch of the Provincial Mining Association of British Columbia started the new year last night under most propitious circumstances. The paid membership for the new year is already 450, with indications that this will be readily increased over the 500 mark. As reported last night the membership has been recruited to date as follows:  
From Le Roi mine.....105  
War Eagle-Centre Star mines.....75  
Naselle Power Company.....75  
City.....95

In addition to the foregoing a number of members have been secured through the employment of the Le Roi company, and a considerable number of citizens are yet to be added to the list. It seems likely that 500 members will be secured for the local branch before the week closes.

The second annual convention of the association assembles in Victoria next week. The session there most of the week. Empowered to send a delegate for every twenty members in the association, the Rossland branch will send a full delegation of twenty members to the convention. A score is the maximum allowed for any association, so that Rossland's excess membership of 450 will not secure greater representation.

At last night's meeting the following list of delegates and alternates was approved: Dr. Sinclair, B. B. Kirby, Paul S. Coulter, Alfie McMillan, Smith Curtis, Francis A. Hewar, A. S. Goodere, W. B. Townsend, Richard Marsh, Hon. G. Stewart, Fred Demuth, Patrick Bennett, Astoria, Sorenson, Andrew G. Larson, R. A. Laird, M. R. Galusha, Rupert Bulmer, Dan Thomas, Britton Duke, Arthur Pendray, Philip James, Campbell, Harry G. Steiman, H. H. Johnson, A. B. Mackenzie, S. F. Parrish, George T. West, Thomas H. Reed, Robert H. Anderson, William L. McDonald and F. R. Blochberger.

Some of the foregoing gentlemen will be unable to attend the convention, and a committee was appointed as follows to ascertain exactly who can go and supply the necessary credentials: H. G. Steiman, Britton Duke, A. B. Mackenzie, A. McMillan and A. C. Galt.

To reach Victoria in time for the opening session of the convention the delegates will require to leave Rossland on Friday evening, if going by Canadian Pacific, or on Saturday morning if travelling by the Victoria and Northern. Both lines give a single fare return for convention week. It is understood that delegates will be recompensed to some extent for the travelling expenses incurred.

The meeting was largely attended and animated. A. C. Galt occupied the chair and debated the various points of interest lasted for two hours and a half.

of little ones come when least expected, and a dose of the Tablets promptly given may save a precious little life. Baby's Own Tablets cure all (minor) fits of little ones, and an occasional dose will prevent sickness. They are guaranteed to contain no opiate or harmful drugs. The Tablets are sold by all medicine dealers or sent by post paid at 25 cents a box by writing The Dr. Williams Medicine Co., Brockville, Ont.

**UPSETS OLD ORDER**

**MAYOR CLUTE RERARRANGED STANDING COMMITTEES OF COUNCIL.**  
**DULL MEETING OF CITY COUNCIL—MAJORITY IS REVERSED.**

From Saturday's Daily. Last night's session of the city council was entirely free from the acrimonious features that have been a feature of council meeting to date during the current year. That the council was evidenced in the course of the session. Two divisions were taken, and in both the former majority element came out in the minority.

The real feature of the meeting, although it passed through without special comment, was the action of Mayor Clute in handing down to the council a new slate for standing committees. Under a section of the Municipal Clauses Act the mayor is empowered to name these committees, and no resolutions are required by council. At the initial meeting of the board Mayor Clute did not exercise this prerogative, but last night he did so, the opportunity being presented by the recent changes in the personnel of the board. The new committees as named by the mayor are as follows:

**Finance**—Aldermen Hamilton (chairman), Stout, Martin and McDonald.  
**Fire, water and light**—Aldermen Roll (chairman), Stout, Lockhart and McDonald.  
**Every member of council is placed on two committees. The mayor is ex-officio a member of each committee. The committee in place as chairman of the finance committee is taken by Alderman Hamilton, whose ripe experience in the council eminently fits him for the position. Alderman McDonald is succeeded as chairman of the fire, water and light committee by Alderman Roll.**

Toward the close of the meeting Alderman McDonald asked if this slate was subject to ratification by the council and why his worship had altered the chair and debate on the matter. Mayor Clute replied that ratification by council was not necessary, that he was now exercising the prerogative conferred upon him by the statute and that he had not intended upon at the commencement of the session.

The first division at the board arose in connection with the action against the corporation by John Bouthie to recover \$13.75. It will be remembered that in common with all city officials Mr. Bouthie, when police magistrate, received free water. Ex-Mayor Dean decided that this was not right, and the last check received by Mr. Bouthie from the city was docked to the extent of \$13.75 for these water rates. Mr. Bouthie has commenced suit in the county court to collect the shortage, and the city solicitor recommended that he be paid the amount. Alderman Hamilton moved that the solicitor's advice be acted upon, especially as the matter could not be quoted as a precedent and was of a trifling nature. The great fault with the council had been to permit the matter to reach its present stage without action of some description being taken.

On a division Aldermen Hamilton, Roll and Lockhart and the mayor voted in the affirmative, with Aldermen McDonald, Stout and Martin in the negative.

before the Le Roi scored the second and decisive goal.

In the course of the game Levaner, of Hunter Bros., was painfully hurt in a collision with George Fraser of the Le Roi team. Levaner's leg was so severely injured that it was feared a fracture had been sustained. Later it was reported that a severe sprain was the extent of the injury. The player was taken to the St. Mary's hospital, and Fraser went off to balance the team.

The losing team had the best of the play for a considerable portion of the game, and Le Roi was only saved at many critical stages by the really clever work of the bowlers between the posts. The Le Roi goalkeeper demonstrated the possession of a remarkably quick eye, and he relieved the situation at various stages when it seemed that the attack by Hunter Bros. forward line would be successful. Terman's deadly lifter only got into full view once, but that shot secured Hunter's sole tally. It was Terman hit that the mine boys feared more than aught else in the game.

The game played a strong and dogged game, although all hands were desperately tired before the long game closed. Early in the play, when the teams were fresh, the match was quite fast.

At least 3000 changed hands on the match. Bets were laid at even on both teams, and the result indicated that the sportsmen had been well up to the mark with accuracy, for it was anyone's game to the last moment.

The teams went as follows:  
Goalkeepers.....H. Hunter  
Point.....H. Hunter  
Fraser.....H. Hunter  
Clothing.....H. Hunter  
Anderson.....H. Hunter  
Mackenzie.....H. Hunter  
Keating.....H. Hunter  
Tomkin.....H. Hunter  
Levaner.....H. Hunter  
Conroy.....H. Hunter

The Miner has failed to run to ground the report that the Le Roi and the Hunter Bros. teams would meet again at an early date. It is supposed to believe the report is unfounded. In the opinion of most citizens it is better to let the matter drop. The rivalries of the mine and the town are not to be revived by bringing on new contests when the parties are tired of their strength and endurance. To bring on the matter again would only make enemies where only trifling branches now exist, will incite to trifling and leave openings for dirty work and the kind of things that will subject the drop for the present, and do it manfully when the next public demonstration takes place.

Is Rossland of the map? Have we ever had Winter Carnivals in the Golden City, with ski jumping championships, curling and other winter sports? It is a question that has been asked by many of our citizens. The answer is that we have never had a winter carnival in the Golden City. It is a question that has been asked by many of our citizens. The answer is that we have never had a winter carnival in the Golden City.

Because of Rossland's refusal to buy in Nelson at all and her counter proposition, the local team is forced to the conclusion that the Golden City team does not desire to meet the local hockey team. The Nelson club is in communication with the Rossland club with a view to playing a game in each city during the latter part of the season.

A Nelson sportsman who was in the city yesterday says Big Joe Thompson is devoting several hours daily to playing this game in Nelson what he calls the Rossland matter and he said that what Big stunts he is going to do when Nelson and Rossland meet must just show that he is not a dead end. It is his opinion that the game will be a very close one.

"The war in the Orient may have the effect of enhancing the prices of live stock in Alberta, especially for horses, but up to the present time this has not been noticeable. Reports have been afloat as to the operations of buyers for the Russian and Japanese armies, but you may safely put these down as incorrect." This is from P. Burns, the Calgary cattle king and head of the great firm of P. Burns & Co. Mr. Burns is in the city for a couple of days, with Blake Wilson of Nelson, manager of the P. Burns company.

"Whether the prices of live stock are inflated because of the present war," continued Mr. Burns, "has been a large measure upon the duration of the conflict. If the struggle is long maintained and other countries are involved there is certain to be a great demand for live stock, particularly in large measure upon the duration of the conflict. If the struggle is long maintained and other countries are involved there is certain to be a great demand for live stock, particularly in large measure upon the duration of the conflict."

Asked as to the probability of a large influx of settlers into Alberta during the present year, Mr. Burns said: "We are certain to receive many settlers. The Edmonton district will receive many of these, while Southern Alberta and the Calgary and Lethbridge districts will also profit extensively by the arrival of homeseekers. Generally speaking, however, the new blood will be fairly well distributed over the province. One effect of this settlement of the country will be to restrict the ranges. It is believed that many of the very large bands of cattle now in Alberta will be divided up into smaller herds, and that this will actually improve the quality of the stock, because in smaller bands the cattle will receive better attention than is now the case. The number of cattle will also be increased. A feature of the settlement of Southern Alberta, the settlement of the Mormons coming in. A considerable number of the followers of Joe Smith have already located in the district and they have proved to be excellent settlers. The Mormons are hardy, frugal agriculturists, understand their business thoroughly and flourish under the climatic conditions of the province and are sending for their friends to an extent that will build up the district substantially. They do not practice polygamy."

Mr. Burns has extensive mining interests in the Rossland camp, and is taking a lively interest in the progress of the mining industry here. He is undecided about actively developing the properties in which he is interested this year, stating that much depends upon the matter of securing lower treatment for the ore which his properties will produce.

Messrs. Burns and Wilson leave tomorrow for Boundary points.

None for Rossland.  
No Police and License Commissioners for Golden City yet.

**CATTLE KING HERE**

**P. BURNS OF CALGARY SPENDS COUPLE OF DAYS IN ROSSLAND.**  
**TELLS OF MATTERS IN ALBERTA—MANY SETTLERS ARE EXPECTED.**

The following new companies have been incorporated:  
Butler Freighting & Towing Company, Limited—Capital \$25,000 in 250 shares of \$100 each.  
M. W. Watt & Company, Limited. Capital \$125,000 in 1250 shares of \$100 each.  
Queen-Dominion Mining Company, Limited—Capital \$50,000 in 500,000 shares of \$1 each.  
Richard Hill Mining Company, Limited—Capital \$50,000 in 500,000 shares of \$1 each.

E. B. Day of Victoria has been appointed attorney for the Colonial Investment & Loan Company, vice A. B. Fraser and A. F. Lee.

**MOTION RESCINDED**

**RESOLUTION TO DISCHARGE CITY OFFICIALS WIPED OUT LAST NIGHT.**  
**VOTE WAS UNANIMOUS—MAYOR TO GET \$600 FOR THIS YEAR'S SERVICE.**

The city council's resolution to summarily discharge City Clerk McQueen, Solicitor Nelson, Engineer VanBuskirk, Inspector Long and Clerk Heron was rescinded last night. These officials are now safe from discharge unless it is shown later that efficiency or economy can be promoted by changes at the city hall affecting one or all of those named.

The officials named were discharged by resolution passed in council on February 2. Last night's resolution rescinded this resolution, and the rescinding resolution was passed without opposition. Aldermen McDonald and Martin were the only members of the board in attendance who voted for the original motion, but neither of them recorded their ballots against last night's resolution, and Mayor Clute declared the motion carried unanimously, and there was no dissent from his declaration.

Mayor Clute will receive an allowance of \$600 for his services during the present year, the sum being in the way of indemnification for extra disbursements he may be called upon to make. No allowance will be made for the year ending on the 31st of July, 1934.

We take pleasure in offering to the public a saw manufactured at the finest quality of steel, and a temper which toughens and refines the steel, gives a keener cutting edge and holds it longer than any process known. A saw to cut first "must hold a keen cutting edge."

**PRICE FENCES Wear Best**

It is the fence that has stood the test of time—stands the heaviest strain—stands the heaviest wear. Order through our local agent or direct from us.

General News Of the Kootenay

THE BOUNDARY. The tunnel on the Blue Jay, which is now working once more, is in nearly 200 feet, and the ledge is expected to be reached in a short time.

Last week the Elkhorn mine, owned by Full McDonald and James Sutherland, sent another car of ore that will net \$100 per ton to the Greenwood smelter. The mine is shipping regularly about two cars of ore monthly, and is looking better than ever.

In the new No. 4 tunnel of the Granby mines which was started some little time ago work was proceeding steadily, and the face is about 160 feet from the portal. The tunnel, which is being driven on a 10 per cent incline, will reach the 300 foot level of the Old Ironides mine.

With plenty of cars available, ore shipments from the Adelstein mine, in Wellington camp, are somewhat heavier than they have previously been. Twenty horses are employed in hauling the ore from the mine in the Wimples spur, a distance of about a mile, where shipments are made to the Greenwood smelter.

The contractors for the sinking of 100 feet in the shaft of the Don Pedro, in Skyhawk camp, are now about 45 feet down, having timbered the shaft in good shape all the way down. The property is owned by the Chicago-British Columbia Mining company, of which H. H. Shallenbarger is the manager, and some excellent ore has been found in this shaft. The men who have the contract are A. J. Morrison, William Leonard, Ed. Sullivan, Murdoch McLeod and A. Inglis.

Wm. Y. Williams, superintendent of the Granby mines at Phoenix, has returned from a two month tour of the United States. Mr. Williams, in his absence, sought both health and information. He visited the largest and most important of the largest mining enterprises in the eastern states and Canada, returning by way of Old Mexico, Arizona and California.

J. W. Nelson and W. H. Rambo, of Greenwood, have been engaged all winter opening up the shaft at the Adelstein mine, on Wallace mountain, near Beaverdam, West Fork of Kettle river. They have driven a tunnel about 80 feet on a quarter incline, and the shaft is now about 100 feet in silver. The paystreak varies much in width, ranging from two to eighteen inches, and in some places is as thick as a man's arm.

G. W. Rumberger and Thomas Rodrick of Phoenix have purchased one-half interest in the Summit, Hopeful and Mayflower claims in Summit camp for a substantial consideration. The interest was taken from the Summit, Greenwood, executor for the estate of the late Archie Connor, who lost his life some months ago by being accidentally crushed in the Granby mine. Mr. Douglas McInnis, also an old Phoenixian and an ex-alderman of Phoenix, owns the other half interest in the group, having purchased the same two years ago from W. A. Corbett, one of the original prospectors of Summit camp.

Duncan Ross, the Liberal candidate in Yale-Cariboo, is electorizing in Cariboo country. The Cascade Power company, with a capital of \$50,000, has been incorporated. Albert I. Goodell, formerly superintendent of the Sunnet smelter at Boulder Falls, is building a smelter at Grant's Pass, Ore., for a Colorado syndicate. He has sent for a number of the men who were employed under him at Boulder Falls. J. B. Gaffney left last week, and W. S. Keith leaves in a few days to take his position as Mr. Goodell's assistant. H. McCurdy, Boulder, Dan Guy, blacksmith, and Mr. Goodell, Sr., will also visit the mine.

John R. Gilmour, who purchased the Zala M. employ eight men and are getting out some rich ore. Kelly Hall has a contract for hauling the ore to the siding on the Kettle Valley line, and the old sawmill, Republic. Two four-horse teams are at work and another

AN EXTRAORDINARY OFFER! ELECTRIC BELTS IN THE REACH OF ALL

Our Regular No. 7 High Grade \$40 BELT for only \$5

THE F. E. KARR CO. 139 Victoria St. Toronto, Can.

will be added soon. It is intended to ship two cars of ore weekly.

THE LARDEAU. Jack McIntyre, who is interested in the Snowdon group near the head of Haskins creek, has passed away at Nelson.

Curling is a popular pastime at Trout Lake. Work on the Duncan river electric line will be prosecuted without delay.

A. H. Holdich, the assayer for the Great Northern company's properties at Camborne, has fallen heir to a legacy by the death of an aunt in England.

The Great Northern Mines, Limited, has inaugurated a monthly payday at Camborne, which will be the 15th of every month. The amount of money disbursed every month will be about \$4000.

With the Eves district distributing about \$4000 among its employees and a like amount being paid by the Oyster group every month, it is an assured fact that Camborne and district will enjoy very prosperous times from this on.

Installation of machinery at the Silver Cup reduction works goes merrily on, and this will soon be in place. The big electric plant which will supply motive power and light will shortly be ready for operation. The outdoor work, except the stretching of wires, is about done. Supplies for the works are being rushed in while the roads are good, and the boat is running on Trout Lake from the terminus of the railway. The plant will be, when ready to start, the most complete in the Kootenays.

POPULAR. W. B. Pool will divide considerable of his time this summer between Poplar, Rosiland and Nelson. Three cars of ore averaging \$40 to the ton is on the dump of the Handy group, ready for shipment. Five men are at work sinking on the lead, and a small boiler and pump have been purchased and will be in operation this month. The reduction works, which are on Lynch creek, about eight miles from Poplar. The railroad runs through the property.

The tunnel on the Lucky Jack is in 230 feet and an upraise is being made to the surface, a distance of about two hundred feet. At the Swede group the tunnel is being run at a 10 per cent incline. The Great Northern Mines, Limited, will increase its milling capacity to 100 stamps this summer.

THE SLOCAN. G. W. Hughes, manager of the rich Sunnet mine, disbursed a dividend of \$6000 among the owners last Monday. This makes the third dividend to date, and a grand total of \$1600 in all. It is a handsome showing for this comparatively new property, and speaks in efficient terms of the capability of its efficient manager. The dividend was the shipping list only a few years ago, and a short time after paid its first dividend, and others were quickly added. A year ago last winter, during the worst period of the depression, this property shipped steadily and abundantly, and is showing a good month during the rawling season.

Although the Rambler is not shipping much ore, extensive development is going on at the mine, both on the surface and underground. The Last Chance shipped another car of ore from the new vein on Tuesday. The shaft has been sunk on it 50 feet and is showing up the late strike admirably.

The Ruth mine closed down Monday and the concession has also suspended operations. Both have been working steadily since last June, and it is thought the suspension will only be temporary.

Mine timbers and supplies have been ravelled up to the Majestic and Unworked on the showing now being made in the amalgamated and promising properties continues to improve.

Nat Tucker and George Long have struck a big body of high grade dry ore on the Lew Dillon group, situated on Four Mile, near the Fisher Malden. They are drifting on the ore and the showing improves with every foot.

Regarding the report that is current to the effect that a zinc smelter will be erected in the Slocan by Belgium people, the New Denver Ledger is enabled to say that C. Fernan of Newcastle-on-Tyne and Oscar Legrobre of Brussels are at present in the Slocan, guests of Mr. Gintzberger, and have been in the camp since the last of January. They have already visited nearly all the silver-lead and copper districts in B. C. for the purpose of gathering information regarding the mineral production of the country, with the view of establishing important industries. It is said by one in a position to know that a silver-lead mine owners will, within a few months, be greatly benefited by their visit.

EAST KOOTENAY. The ore from the Paradise mine continues to come down steadily. Many hundred sacks are already in the warehouse at the Wilmer river landing. Alex. Ritchie, who has brought down 100 sacks from a burst in one load, which is an exceptionally heavy load. The North Star mine is still shipping to the Hall Mills smelter at Nelson, and by the end of the week will have shipped 2100 tons since last fall. They are still mining 100 tons a week and continuing the work of development,

and will probably make another shipment in a short time. J. C. Williams of Spokane, secretary of the Sullivan Mining company, W. C. Miller of Spokane and J. D. Weeks of New York, stockholders in the same company, arrived last Monday and left Tuesday for a visit to the smelter at Marysville and the mine, and will return to Cranbrook shortly. Mr. Williams said they were here for the purpose of inspecting the property, but at this time did not care to make any statement, but would probably do so on their return.

The preliminary arrangements for the new brewery at Cranbrook have been completed, and a strong company has been formed with an authorized capital of \$25,000. The new plant will have a capacity of 25 barrels a day, and the equipment will be modern in every respect.

Robberies and other acts of lawlessness continue the Crow's Nest region. The latest case is the robbery of a hotel keeper at Warden of \$500, which occurred at the home, but at that time he had not resided in the province fourteen years, which is one of the qualifications for admission. This term is now complete, and the old gentleman will go north in a day or so. He was the owner of "Barney's" restaurant, which was famous through the voluminous litigation about the property, and at one time turned down an offer of \$12,000 gold cash for his share of the business.

For the second time this winter the corporation is leveling the snowbanks along Columbia avenue. The board of directors has a couple of men with a team and scraper on the work.

Three toboggans owned by the Winter Club, which has been given to the Women's Club on the second Monday in March for the topic for discussion will be "The Russo-Japanese War."

At the next meeting of the Rosiland Women's Club on the second Monday in March the topic for discussion will be "The Russo-Japanese War."

Fifty Years the Standard

Improves the flavor and adds to the healthfulness of the food.

ceedingly feeble health and requires the care which he will get in the provincial institution at Kamloops. An effort was made last year to secure his admission into the home, but at that time he had not resided in the province fourteen years, which is one of the qualifications for admission. This term is now complete, and the old gentleman will go north in a day or so.
